

## SRM INSTITUTE OF SCIENCE AND TECHNOLOGY, RAMAPURAM CAMPUS

### IETE SOCIETY

### EVENT REPORT

DATE OF THE EVENT: 28<sup>th</sup> August 2019

### Electro-Minance

Event was conducted in our campus by the IETE society for students of all the years. It had technical event initially with a blend of fun filled final touch. Students came in a team of three. This was a surprise event as the rounds were not disclosed to the students to motivate participation opportunities to each and everyone. This had an active participation from the freshers. The first round was a crossword picture quiz. The students have to interpret the picture shown and make out the answers for the crossword. Out of 15 teams, 7 were picked out for the second round. Second round took more surprising turns with circuit puzzles being given to each team. Participants were given five minutes to observe the circuit and place the pieces precisely and the top four teams making it out within time were into the final round. The final round was Shipwreck. It brought about the speaking skills and stage confidence of the participants. They had to pick out chits containing the name of a famous personality and speak in a personified manner about their character. The teams would be speaking about why they should be saved with a comparison to the others. The top three teams with equal participation from the team members and good confidence came up as the prize winners. This event proved to be a great motivation for the freshers to join the IETE

society and take part in the upcoming events.
