ACADEMIC CURRICULA

UNDERGRADUATE DEGREE PROGRAMMES

Bachelor's Degree in Technology

(B.Tech - Four Years)

(Choice Based Flexible Credit System)

Regulations - 2018

Volume – 4

(Detailed Syllabus for Third & Fourth Year Courses)

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram 603203, Tamil Nadu, India

Vision

To emerge as a World - Class University

in creating and disseminating knowledge,

and providing students a unique learning

experience in Science, Technology, Medicine,

Management and other areas of scholarship

that will best serve the world and

betterment of mankind.

Mission

MOVE UP through international alliances and collaborative initiatives to achieve global excellence.

ACCOMPLISH A PROCESS to advance knowledge in a rigorous academic and research environment.

ATTRACT AND BUILD PEOPLE in a rewarding and inspiring environment by fostering freedom, empowerment, creativity and innovation.

Contents (Volume –IV)

ACADEMIC CURRICULA

Humanities and Social Sciences
including Management Courses

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18PDH201T	Course Name	EMPLOYABILITY SKILLS AND PRACTICES	Course Category	H	Humanities and Social Sciences including Management	L	T	P	C
							0	0	2	1

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Career Development Centre	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*identify problems*
CLR-2 :	*recognize the logical coherence of ideas*
CLR-3 :	*understand the structure and principles of writing*
CLR-4 :	*interpret the structure, organization, tone, and main idea of the content*
CLR-5 :	*hone comprehension skills*
CLR-6 :	*give the right knowledge, skill and aptitude to face any competitive examination*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*solve problems*	*3*	*80*	*75*	*L*	*H*	-	*M*	-	-	-	-	*M*	*L*	-	*H*	-	-	-
CLO-2 :	*grasp the approaches and strategies to find solutions*	*2*	*80*	*75*	*L*	*H*	-	*M*	-	-	-	-	*M*	*L*	-	*H*	-	-	-
CLO-3 :	*organize and articulate ideas clearly*	*2*	*80*	*75*	*L*	*H*	-	*M*	-	-	-	-	*M*	*L*	-	*H*	-	-	-
CLO-4 :	*analyze and evaluate contents critically in multifarious ways*	*2*	*80*	*75*	*L*	*H*	-	*M*	-	-	-	-	*M*	*L*	-	*H*	-	-	-

ACADEMIC CURRICULA

Basic Science Courses

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18MAB301T	Course Name	PROBABILITY AND STATISTICS FOR ENGINEERS	Course Category	B	Basic Sciences	L	T	P	C
							3	1	0	4

Pre-requisite Courses	18MAB201T/18MAB203T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mathematics	Data Book / Codes/Standards	Statistical tables		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*To apply the basic rules and theorems of probability theory such as Baye's Theorem, to determine probabilities that help to solve engineering problems and to determine the expectation and variance of a random variable from its distribution.*
CLR-2 :	*To appropriately choose, define and/or derive probability distributions such as the Binomial, Poisson and Normal etc to model and solve engineering problems.*
CLR-3 :	*To learn how to formulate and test hypotheses about means, variances and proportions and to draw conclusions based on the results of statistical tests.*
CLR-4 :	*To understand how regression analysis can be used to develop an equation that estimates how two variables are related and how the analysis of variance procedure can be used to determine if means of more than two populations are equal.*
CLR-5 :	*To comprehend the fundamentals of quality control and the methods used to control systems and processes.*
CLR-6 :	*Acquired the knowledge of probability and statistics and its applications to the respective branches of Engineering.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*To Pertain the Knowledge of probability concepts, to determine probabilities that help to solve engineering problems. and to determine the expectation and variance of a random variable from its distribution*	3	85	80	M	H	L						M	L		H			
CLO-2 :	*Gain familiarity in deriving probability distributions such as the Binomial, Poisson and Normal etc and apply them tn the problems involving Science and Engineering*	3	85	80	M	H		M	M				M			H			
CLO-3 :	*Acquire knowledge in formulating and testing hypotheses about means, variances and proportions*	3	85	80	M	H							M			H			
CLO-4 :	*Getting the knowledge of Regression analysis, ANOVA and apply them in the problems in Science and Engineering*	3	85	80	M	H	L	M					M	L		H			
CLO-5 :	*Understanding the concept and applications of statistical quality control charts in technology and industries*	3	85	80	M	H	M						M			H			
CLO-6 :	*To solve the problems based on probability and statistics in science and engineering*	3	85	80	M	H							M			H			

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*probability concepts, Types of Events*	*Discrete distributions*	*Sampling*	*Correlation and Properties*	*Introduction and Process Control*
	SLO-2	*Axioms and theorems*	*Binomial distribution*	*Small and large samples*	*Karl pearson's correlation coefficient*	*Types of Control charts*
S-2	SLO-1	*Conditional probability Baye's theorem – without proof*	*M.G.F*	*Hypothesis Testing*	*Spearman's rank correlation coefficient*	*Control charts for variables*
	SLO-2	*Applications- Baye's Theorem.*	*mean*	*Large sample test-Test of significance for single proportion*	*Problems on rank correlation –non repeated ranks*	*Control chart for attributes*
S-3	SLO-1	*Random variables – Discrete case*	*variance*	*Test of significance for difference of proportions*	*Problems on repeated ranks*	*Control limits and drawing conclusions*
	SLO-2	*Probability Mass function*	*Fitting binomial distribution*	*More problems on test 2*	*Linear Regression lines and Properties*	*Control chart for mean and range when* $\overline{X}$ *and R data given directly*
S-4	SLO-1	*Problem solving using tutorial sheet 1*	*Problem solving using tutorial sheet 4*	*Problem solving using tutorial sheet 7*	*Problem solving using tutorial sheet 10*	*Problem solving using tutorial sheet 13*
	SLO-2	*Problem solving using tutorial sheet 1*	*Problem solving using tutorial sheet 4*	*Problem solving using tutorial sheet 7*	*Applications of correlation in engineering*	*Problem solving using tutorial sheet 14*
S-5	SLO-1	*Cumulative distribution function*	*Poisson distribution*	*Test of significance for single mean*	*regression coefficient Problems*	*More problems on* $\overline{X}$ *and R data given directly*
	SLO-2	*Mathematical expectation –discrete case*	*M.G.F, mean*	*Test of significance for difference of means*	*More problems in regression coefficients*	*Control chart for mean and range- when* $\overline{X}$ *and R data not given directly*

S-6	SLO-1	*Variance*	*variance*	*Small sample tests*	*Relation between correlation and regression*	*more problems on $\overline{X}$ and R data not given directly*
	SLO-2	*Probability density function*	*Fitting Poisson distribution*	*Student's t- test for single mean*	*problems on relation between correlation and regression*	*Control chart for mean and S.D when mean S.D values given directly*
S-7	SLO-1	*Cumulative distribution function*	*Geometric distribution-M.G.F, mean, variance*	*'t' test for the difference of means*	*Applications of regression in engineering*	*More problems on $\overline{X}$ and S*
	SLO-2	*Mathematical expectation-continuous case*	*Memory less property*	*More problems on t- test*	*Applications of regression in engineering*	*Control chart for mean and S.D when mean S.D values not given directly*
S-8	SLO-1	*Problem solving using tutorial sheet 2*	*Problem solving using tutorial sheet 5*	*Problem solving using tutorial sheet 8*	*Problem solving using tutorial sheet 11*	*Problem solving using tutorial sheet 14*
	SLO-2	*Problem solving using tutorial sheet 2*	*Problem solving using tutorial sheet 5*	*Problem solving using tutorial sheet 8*	*Problem solving using tutorial sheet 11*	*Problem solving using tutorial sheet 14*
S-9	SLO-1	*Variance*	*Continuous distribution:*	*Fisher's F-test*	*Introduction to ANOVA Analysis of Variance – One way Classification*	*More problems on $\overline{X}$ and S*
	SLO-2	*Raw Moments*	*Uniform distribution – MGF, Mean, Variance*	*Test of significance for two sample variances*	*Problems on one way classification*	*Control chart for attributes- np chart*
S-10	SLO-1	*Central Moments*	*Exponential distribution - MGF, Mean, Variance*	*Chi square test- for goodness of fit*	*More problems on one way classification*	*More problems on np-chart*
	SLO-2	*Moment generating function*	*Memory less property*	*Problems on goodness of fit*	*ANOVA – two way classification*	*p- chart*
S-11	SLO-1	*MGF- discrete random variable*	*Normal distribution*	*Chi square test- for independence of attributes*	*Problems on two way classification*	*More problems on p- chart*
	SLO-2	*MGF- continuous random variable*	*Problems on Normal distribution*	*More problems on Chi square test- for independence of attributes*	*More problems on two way classification*	*Control chart for the defects in a single unit- c- chart*
S-12	SLO-1	*Problem solving using tutorial sheet 3*	*Problem solving using tutorial sheet 6*	*Problem solving using tutorial sheet 9*	*Problem solving using tutorial sheet 12*	*Problem solving using tutorial sheet 15*
	SLO-2	*Applications of Probability and Random variables in Engineering field*	*Application of distributions in Engineering*	*Applications and the importance of sampling in various fields of engineering*	*Engineering Applications of ANOVA, Correlation and Regression*	*Engineering applications of control chart*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Apply set theory, functions and relations in storage, communication and manipulation of data*
CLR-2 :	*Apply number theory concepts in computer engineering such as public key crypto system.*
CLR-3 :	*Apply mathematical reasoning in computer science such as design of computer circuit, verification of programs.*
CLR-4 :	*Learning about groups, rings and fields. Solving problems on coding theory.*
CLR-5 :	*Using graph models in computer network and shortest path problems Apply graph coloring in problems involving scheduling and assignments.*
CLR-6 :	*Apply mathematical reasoning, combinatorial analysis, algebraic structures and graph theory in solving mathematical problems as applied to the respective branches of Engineering.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Problem solving in sets, relations and functions.*	3	85	80	M	H	L						M	L		H			
CLO-2 :	*Solving problems in basic counting principles, inclusion exclusion and number theory.*	3	85	80	M	H		M	M				M			H			
CLO-3 :	*Solving problems of mathematical logic, inference theory and mathematical induction.*	3	85	80	M	H							M			H			
CLO-4 :	*Gaining knowledge in groups, rings and fields. Solving problems in coding theory.*	3	85	80	M	H		M					M			H			
CLO-5 :	*Gaining knowledge in graphs and properties. Learning about trees, minimum spanning trees and graph coloring.*	3	85	80	M	H	L						M	L		H			
CLO-6 :	*Learning mathematical reasoning, combinatorial analysis, algebraic structures and graph theory.*	3	85	80	M	H							M			H			

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Sets and examples. Operations on sets.*	*Permutation and Combination*	*Propositions and Logical operators*	*Binary operation on a set- Groups and axioms of groups.*	*Basic concepts - Basic Definitions- degree and Hand shaking theorem.*
	SLO-2	*Laws of Set theory- Proving set identities using laws of set theory.*	*Simple problems using addition and product rules.*	*Truth values and truth tables.*	*Properties of groups.*	*Some Special Graphs – complete, regular and bipartite graphs.*
S-2	SLO-1	*Partition of a set – examples.*	*Principle of inclusion and exclusion*	*Propositions generated by a set-Symbolic writing using conditional and biconditional connectives.*	*Permutation group, equivalence classes with addition modulo m and multiplication modulo m.*	*Isomorphism of graphs – necessary conditions.*
	SLO-2	*Cartesian product of sets.*	*Problems using inclusion and exclusion principle.*	*Writing converse inverse and contra positive of a given conditional.*	*Cyclic groups and properties.*	*Isomorphism- simple examples.*
S-3	SLO-1	*Relations – Properties.*	*Pigeon-hole principle and generalized pigeon-hole principle.*	*Tautology, contradiction and contingency-examples.*	*Subgroups and necessary and sufficiency of a subset to be a subgroup.*	*Paths, cycles and circuits.*
	SLO-2	*Equivalence relation and partial order relation*	*Problems on pigeon-hole principle.*	*Proving tautology and contradiction using truth table method.*	*Group homomorphism and properties.*	*Connectivity in undirected graphs – connected graphs and odd degree vertices.*
S-4	SLO-1	*Problem solving using tutorial sheet 1*	*Problem solving using tutorial sheet 4*	*Problem solving using tutorial sheet 7*	*Problem solving using tutorial sheet 10*	*Problem solving using tutorial sheet 13*
	SLO-2	*Problem solving using tutorial sheet 1*	*Problem solving using tutorial sheet 4*	*Problem solving using tutorial sheet 7*	*Problem solving using tutorial sheet 10*	*Problem solving using tutorial sheet 13*
S-5	SLO-1	*Poset - Graphs of relations Digraphs*	*Divisibility and prime numbers.*	*Equivalences – truth table method to prove equivalences.*	*Rings- definition and examples..Zero devisors.*	*Eulerian and Hamiltonian graphs.*
	SLO-2	*Hasse diagram – problems.*	*Fundamental theorem of arithmetic – problems.*	*Implications- truth table method to prove implications.*	*Integral domain- definition , examples and properties.*	*Necessary and sufficient condition for a graph to be Eulerian- examples.*
S-6	SLO-1	*Closures of relations- examples*	*Finding prime factorization of a given number.*	*Laws of logic and some equivalences.*	*Fields – definition, examples and properties.*	*Matrix representation of graphs- adjacent and incidence matrices and examples.*
	SLO-2	*Transitive closure and warshall's algorithm*	*Some more problems using fundamental theorem of arithmetic.*	*Proving equivalences and implications using laws of logic.*	*Coding Theory – Encoders and decoders- Hamming codes.*	*Isomorphism using adjacency.*

S-7	SLO-1	*Functions – definitions, domain and range of a function - examples*	*Division algorithm- greatest common divisor and properties-problems.*	*Rules of inference – Rule P, Rule T and Rule CP*	*Hamming distance. Error detected by an encoding function.*	*Digraphs – in degree and out degree – Hand shaking theorem.*
	SLO-2	*Types of functions- one- one and onto-bijection- examples.*	*Euclid's algorithm for finding GCD(a,b)- examples..*	*Direct proofs*	*examples.*	*Verification of hand shaking theorem in digraphs.*
S-8	SLO-1	*Problem solving using tutorial sheet 2*	*Problem solving using tutorial sheet 5*	*Problem solving using tutorial sheet 8*	*Problem solving using tutorial sheet 11*	*Problem solving using tutorial sheet 14*
	SLO-2	*Problem solving using tutorial sheet 2*	*Problem solving using tutorial sheet 5*	*Problem solving using tutorial sheet 8*	*Problem solving using tutorial sheet 11*	*Problem solving using tutorial sheet 14*
S-9	SLO-1	*Composition of functions – examples.*	*Problems using Euclid's algorithm.*	*Problems using direct method.*	*Error correction using matrices.*	*Graph colouring – chromatic number-examples.*
	SLO-2	*Associatiivity of composition of functions – Identity and inverse of functions.*	*Least common Multiple(LCM)- relation between LCM and GCD.*	*Problems using CP rule.*	*Problems on error correction using matrices.*	*Four colour theorem(statement only) and problems.*
S-10	SLO-1	*Necessary and sufficiency of existence of inverse of a function.*	*Problems on LCM.*	*Inconsistency and indirect method of proof.*	*Group codes-error correction in group codes-parity check matrix.*	*Trees – definitions and examples. Properties.*
	SLO-2	*Uniqueness of identity*	*Finding LCM and GCD using prime factorization.*	*Inconsistent premises and proof by contradiction (indirect method).*	*Problems on error correction in group codes.*	*Properties continued.*
S-11	SLO-1	*Inverse of composition*	*Finding GCD and LCM using Euclid's algorithm.*	*Principle of mathematical induction.*	*Procedure for decoding group codes.*	*Spanning trees – examples.*
	SLO-2	*Checking if a given function is bijection and if so, finding inverse, domain and range-problems.*	*More problems on GCD and LCM.*	*Problems based on Mathematical Induction*	*Problems on decoding group codes.*	*Kruskal's algorithm for minimum spanning trees.*
S-12	SLO-1	*Problem solving using tutorial sheet 3*	*Problem solving using tutorial sheet 6*	*Problem solving using tutorial sheet 9*	*Problem solving using tutorial sheet 12*	*Problem solving using tutorial sheet 15*
	SLO-2	*Applications of sets, relations and functions in Engineering.*	*Applications of sets, relations and functions in Engineering.*	*Applications of sets, relations and functions in Engineering.*	*Applications of sets, relations and functions in Engineering.*	*Applications of sets, relations and functions in Engineering.*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*gain knowledge in measures of central tendency, dispersion, Skewness and moments in Biotechnology.*
CLR-2 :	*appropriately choose, define and / or derive probability distributions such as Binomial, Poisson and Normal distributions to solve biology related problems.*
CLR-3 :	*learn how to formulate and test the hypothesis of single means and difference of means for large samples and to understand and apply Chi-square test for goodness of fit and independence of attributes in Biological topics.*
CLR-4 :	*learn to formulate and test the hypothesis about means, variances for small samples using t and F test and to have knowledge in ANOVA in Biology related topics.*
CLR-5 :	*gain knowledge in correlation and regression lines and also get expose to Non- Parametric tests in Biology*
CLR-6 :	*Assess problems and determine the appropriate method to solve problems in application areas of Biotechnology*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand solve numerical problems in measures of central tendency and dispersion.*	*3*	*85*	*80*	*M*	*H*	*L*						*M*	*L*		*H*			
CLO-2 :	*Solving problems related to probability distributions applicable to bio technologists.*	*3*	*85*	*80*	*M*	*H*		*M*	*M*				*M*			*H*			
CLO-3 :	*Evaluate the given problems relating to large sample test of mean and difference of mean and Chi-square tests.*	*3*	*85*	*80*	*M*	*H*							*M*			*H*			
CLO-4 :	*Choose and solve problems with t test, F test and ANOVA.*	*3*	*85*	*80*	*M*	*H*		*M*					*M*	*L*		*H*			
CLO-5 :	*Evaluate problems on concepts of correlation, regression and non parametric tests.*	*3*	*85*	*80*	*M*	*H*	*L*						*M*			*H*			
CLO-6 :	*The learners will be able to mathematically formulate and solve numerical problems related to Biotechnogy.*	*3*	*85*	*80*	*M*	*H*							*M*						

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Introduction to discrete types of statistical data*	*Introduction to probability concepts, Random experiment, Trail, Sample space, Sample size,*	*Sampling Theory - Basic concepts*	*Introduction to small sample test*	*Introduction to Correlation and Regression*
	SLO-2	*Introduction to continuous types of statistical data*	*Events(only definitions, properties without proof and simple problems) Problems on Probability related to biological applications.*	*Population, Sample, Sampling distribution, population parameters and sample statistic*	*small sample tests based on t-distribution for single mean*	*Karl Pearson's coefficient of correlations*
S-2	SLO-1	*Measures of central tendency – Introduction to Arithmetic mean, median, Mode*	*Types of Events: Impossible, Simple, Mutually Exclusive and Independent events(only definitions, properties without proof)*	*Testing of hypothesis, Null and Alternate hypothesis, Single tailed and two tailed tests, Type- I and Type – II errors*	*Problems on t-test for single mean*	*Problems on Karl Pearson's coefficient of correlations*
	SLO-2	*Problems in Arithmetic mean*	*Simple problems*	*Acceptance and Rejection Regions, Level of Significance, Degrees of freedom and Confidence limits*	*Small sample tests based on t-distribution for difference of means*	*Spearman's rank correlation coefficient problems*
S-3	SLO-1	*Problems in median*	*Problems based on Addition and Multiplication Theorems*	*Large sample tests based on normal distribution (Z - test)*	*Problems on t- distribution for difference of means*	*Spearman's rank correlation coefficient problems*
	SLO-2	*Problems in mode*	*Baye's Theorem (without proof) and its applications*	*Z-Test for single proportion and difference of proportions and problems*	*Paired t-test*	*Regression lines and its applications*
S-4	SLO-1	*Problem solving using tutorial sheet 1*	*Problem solving using tutorial sheet 4*	*Problem solving using tutorial sheet 7*	*Problem solving using tutorial sheet 10*	*Problem solving using tutorial sheet 13*
	SLO-2	*Problem solving using tutorial sheet 1*	*Problem solving using tutorial sheet 4*	*Problem solving using tutorial sheet 7*	*Problem solving using tutorial sheet 10*	*Problem solving using tutorial sheet 13*
S-5	SLO-1	*Measures of dispersion, Range , Quartile deviation*	*Introduction to one dimensional random variables*	*Z-Test for single mean*	*Problems on Paired t-test*	*Problems related to Regression lines.*
	SLO-2	*Mean deviation*	*Discrete Random variable, Probability mass function , Distribution function, Properties (without proof), Applications*	*Problems on Z-Test for single mean*	*F-test for equality of variances*	*Non-parametric tests - The sign test*

S-6	SLO-1	*Standard deviation and Co-efficient of variation*	*Continuous Random variable, Probability density function , Distribution function, Properties (without proof), Applications*	*Z-Test for difference of means*	*Problems on F-test for equality of variances*	*The sign test additional problems*
	SLO-2	*Problems on Standard deviation and Co-efficient of variation*	*Simple problems on discrete random variables and continuous random variables*	*Problems on Z-Test for difference of means*	*Problems on F-test for equality of variances*	*The Wilcoxon rank sum test or The Man Whitney U test problems*
S-7	SLO-1	*Karl Pearson's coefficient of Skewness*	*Mathematical Expectation*	*Introduction to Chi- square test*	*Introduction to Analysis of Variance (ANOVA)*	*The Wilcoxon rank sum test or The Man Whitney U test problems*
	SLO-2	*Problems on coefficient of Skewness*	*Variance, Properties (without proof), Application related problems*	*Chi -square test for goodness of fit*	*Problems on ANOVA –One -way classifications*	*The Kruskal Walis test problems*
S-8	SLO-1	*Problem solving using tutorial sheet 2*	*Problem solving using tutorial sheet 5*	*Problem solving using tutorial sheet 8*	*Problem solving using tutorial sheet 11*	*Problem solving using tutorial sheet 14*
	SLO-2	*Problem solving using tutorial sheet 2*	*Problem solving using tutorial sheet 5*	*Problem solving using tutorial sheet 8*	*Problem solving using tutorial sheet 11*	*Problem solving using tutorial sheet 14*
S-9	SLO-1	*Introduction to moments*	*Binomial distribution, Application to population Genetics*	*Problems on Chi -square test for goodness of fit*	*Problems on ANOVA –One -way classifications*	*The Kruskal Walis test problems*
	SLO-2	*Raw and Central moments problems*	*Simple problems on Binomial distribution*	*Chi -square test for Independence of attributes – Problems formulations*	*Problems on ANOVA –One -way classifications*	*The Kruskal Walis test problems*
S-10	SLO-1	*Moments about the point x=a problems.*	*Poisson Distribution, Application to population Genetics*	*Chi -square test for Independence of attributes using contingency table*	*ANOVA –Two -way classifications*	*The Wilcoxon signed ranked test problems*
	SLO-2	*Additional problems on moments*	*Normal Distribution, Application to population Genetics*	*Problems on Chi -square test for Independence of attributes using contingency table*	*Applications of ANOVA –Two –way classification problems.*	*The Wilcoxon signed ranked test problems*
S-11	SLO-1	*Problems on finding central moments given moments about a point*	*Problems on Poisson and Normal distribution*	*Additional problems on Chi-square test*	*ANOVA –Two –way classification problems.*	*Additional problems on all the non parametric tests*
	SLO-2	*Additional problems on finding central moments*	*Additional problems on Normal distribution.*	*Problems on Chi-square test.*	*ANOVA –Two –way classification problems*	*Additional problems on all the non parametric tests*
S-12	SLO-1	*Problem solving using tutorial sheet 3*	*Problem solving using tutorial sheet 6*	*Problem solving using tutorial sheet 9*	*Problem solving using tutorial sheet 12*	*Problem solving using tutorial sheet 15*
	SLO-2	*Engineering applications of Measures of central tendency and dispersion*	*Application of distributions in Engineering*	*Engineering applications of sampling techniques*	*Applications of ANOVA in engineering fields*	*Engineering Applications of Correlation, Regression and Non-parametric methods*

Course Code	18PYB201T	Course Name	WAVES AND OPTICS	Course Category	B	Basic Sciences	L	T	P	C
							3	1	0	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Physics and Nanotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Familiarize with the concepts of simple harmonic motion*
CLR-2 :	*Analyze the principle of transverse and longitudinal wave-motion*
CLR-3 :	*Identify the significance of propagation of light*
CLR-4 :	*Create insights to the concepts of interference and diffraction*
CLR-5 :	*Understanding the basics of geometrical optics*
CLR-6 :	*Understand the basics of lasers*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Identify the problems regarding harmonic motion*	2	85	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Analyze thevarious types of wave motions*	2	80	70	H	-	-	M	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Apply the principles of propagation of light*	2	75	70	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Utilize the concepts of interference and diffraction in applications*	2	85	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Apply the principles of geometrical optics.*	2	85	75	H	-	H	-	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Utilizing the principles of laser in holography and microscopy*	2	80	70	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Simple harmonic motion – Basics*	*Transverse and longitudinal waves: Basics*	*Propagation of light*	*Superposition of waves*	*Introduction to modern optics*
	SLO-2	*Energy of a simple harmonic oscillator*	*Velocity in wave motion*	*Huygens' principle*	*Conditions for interference*	*Lasers - principle*
S-2	SLO-1	*Simple harmonic oscillations in an electrical system*	*Wave equation*	*Fermat's principle of stationary time*	*Interference –Constructive and Destructive*	*Einstein A and B coefficients,*
	SLO-2	*Simple harmonic oscillations in a mechanical system -*	*Transverse wave on a string*	*Optical path length*	*Temporal coherence*	*Population inversion, metastable state*
S-3	SLO-1	*Superposition of two simple harmonic vibrations in one dimension –vibrations having equal frequencies*	*Characteristic impedance of a string*	*Mirage effect*	*Spatial coherence*	*Gas Lasers: He – Ne Laser*
	SLO-2	*Superposition of two simple harmonic vibrations in one dimension –vibrations having different frequencies*	*Reflection of waves at a boundary*	*Laws of reflection and refraction*	*Wave splitting Interference - Young's double slit experiment*	*Argon Ion laser*
S-4	SLO-1	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
S-5	SLO-1	*Damped simple harmonic motion*	*Transmission of waves at a boundary*	*Fresnel equations – Derivation*	*Amplitude splitting Interference*	*Gas dynamic laser*
	SLO-2	*Heavy damping*	*Impedance matching*	*Fresnel equations – Different cases*	*Newton's ring experiment*	*Solid state Lasers: Ruby Laser*
S-6	SLO-1	*Critical damping*	*Normal modes and Eigen frequencies*	*Fresnel equation – Interpretation - Reflectance*	*Discussion of fringe formation in Newton's ring experiment*	*Dye Lasers*

	SLO-2	*Application of critical damping to a Ballistic galvanometer*	*Energy in normal mode of operation*	*Fresnel equation – Interpretation - Transmittance*	*Michelson's Interferometer- principle and construction*	*Excimer laser*
S-7	SLO-1	*Light damping*	*Longitudinal waves - wave equation*	*Total internal reflection*	*Michelson's Interferometer – formation of fringes*	*Chemical laser*
	SLO-2	*Methods of describing the damping of an oscillator*	*Sound waves in gases*	*Brewster's angle*	*Mach – Zehnder interferometer*	*X-Ray laser*
S-8	SLO-1	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
S-9	SLO-1	*Energy decay in a damped harmonic oscillator*	*Energy distribution in sound waves*	*Evanescent waves*	*Diffraction*	*Free electron laser*
	SLO-2	*Quality factor of a damped harmonic oscillator*	*Longitudinal waves in a solid*	*Lenses – Refraction at a spherical surfaces*	*Fraunhofer diffraction from a single slit*	*Laser Speckles*
S-10	SLO-1	*Forced oscillator*	*Young's Modulus and Poisson's ratio*	*Refraction at spherical surfaces*	*Fraunhofer diffraction from a circular aperture*	*Q – Switching*
	SLO-2	*The impedance of a mechanical circuit*	*Application to earthquakes*	*Thin Lenses*	*Fraunhofer diffraction from a circular aperture – Quantitative approach*	*Mode Locking*
S-11	SLO-1	*Steady state motion of forced damped harmonic oscillator*	*Longitudinal waves in periodic structure*	*Thin Lenses - Equations*	*Diffraction grating*	*Applications of laser- Holography*
	SLO-2	*Forced oscillator - behavior*	*Reflection and transmission of sound waves at boundaries.*	*Quantum Electrodynamics (QED)*	*Resolving power of grating*	*Applications of lasers- Fluorescence microscopy, eye surgery*
S-12	SLO-1	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*

ACADEMIC CURRICULA

Engineering Science Courses

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18CHS253L	Course Name	CHEMICAL ENGINEERING PRACTICE	Course Category	S	Engineering Sciences	L	T	P	C
							0	0	4	2

Pre-requisite Courses	*Nil*	Co-requisite Courses	*Nil*	Progressive Courses	*Nil*
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	*Heat and Mass Transfer Data Book*		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand various modes of heat transfer mechanism, Fourier's law of heat conduction and Newton's law of cooling.*
CLR-2 :	*Understand difference between natural and forced convection heat transfer. Analyze LMTD for different flow patterns.*
CLR-3 :	*Understand Stefan-Boltzmann law and gain knowledge on diffusivity and mass transfer coefficient.*
CLR-4 :	*Gain knowledge on the mechanism of drying, batch and steam distillation.*
CLR-5 :	*Analyze the difference between single and multi stage leaching.*
CLR-6 :	*Provide students first hand experience of verifying various theoretical concepts learnt in Heat and Mass Transfer.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Determine the thermal conductivity of a material.*	2	80	75	H	H	H	H									H	H	
CLO-2 :	*Determine heat transfer coefficient for natural, forced convection. Design double pipe and shell and tube heat exchanger.*	2	80	70	H	H	H	M									H	H	M
CLO-3 :	*Determine the Stefan-Boltzmann constant, Diffusivity and mass transfer coefficient.*	2	80	70	H	H	M	M									H	H	
CLO-4 :	*Verify Rayleigh's equation for batch distillation and determine vapor efficiency for steam distillation*	2	80	75	H	H	H	H									H	H	M
CLO-5 :	*Determine the percentage recovery of solute by leaching.*	2	80	75	H	H	H	H									H	H	
CLO-6 :	*Verify the governing relations for heat and mass transfer phenomena.*	2	75	70	H	H	M	M									H	H	M

Duration (hour)		12	12	12	12	12
S 1-4	SLO-1 / SLO-2	Heat transfer through Composite wall	Heat transfer by forced convection	Stefan-Boltzmann apparatus	Drying characteristics	Estimation of percentage recovery of solute using Soxhlet apparatus
S 5-8	SLO-1 / SLO-2	Heat transfer through Composite lagged pipe	Double pipe Heat Exchanger	Estimation of Diffusivity	Verification of Rayleigh equation for simple batch distillation	Estimation of percentage recovery of solute for single stage leaching
S 9-12	SLO-1 / SLO-2	Heat transfer by natural convection	Shell and tube heat exchanger	Estimation of mass transfer coefficients	Determination of vapor efficiency for simple steam distillation	Estimation of percentage recovery of solute for multi stage leaching

ACADEMIC CURRICULA

Mandatory Courses

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18PDM301L	Course Name	ANALYTICAL AND LOGICAL THINKING SKILLS	Course Category	M	Mandatory	L	T	P	C
							0	0	2	0

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Career Development Centre	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Recapitulate fundamental mathematical concepts and skills*
CLR-2 :	*Sharpen logical reasoning through skillful conceptualization*
CLR-3 :	*Enable to solve problems and to crack competitive exams.*
CLR-4 :	*understand and master the mathematical concepts to solve types of problem*
CLR-5 :	*identify problems*
CLR-6 :	*give the right knowledge, skill and aptitude to face any competitive examination*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*build a strong base in the fundamental mathematical concepts*	*1*	*80*	*75*	*L*	*H*		*M*					*M*	*L*		*H*			
CLO-2 :	*Apply the learn conditions towards solving problems analytically*	*1*	*80*	*75*	*L*	*H*		*M*					*M*	*L*		*H*			
CLO-3 :	*grasp the approaches and strategies to solve problems with speed and accuracy*	*2*	*80*	*75*	*L*	*H*		*M*					*M*	*L*		*H*			
CLO-4 :	*Collectively solve problems in teams and groups*	*2*	*80*	*75*	*L*	*H*		*M*					*M*	*L*		*H*			
CLO-5 :	*solve problems*	*1*	*80*	*75*	*L*	*H*		*M*					*M*	*H*		*H*

Course Code	18PDM302L	Course Name	ENTREPRENEURSHIP MANAGEMENT	Course Category	M	Mandatory	L	T	P	C
							0	0	2	0

Pre-requisite Courses	Business Basics for Entrepreneurs	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Career Development Centre	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide the knowledge of Legal Systems and trains the students in application skills that enable students to understand the Law and Legal management concepts.*
CLR-2 :	*Comprehend and Practice Ethical Governance*
CLR-3 :	*Understand different HRM concepts*
CLR-4 :	*Understand Project Management and its application*
CLR-5 :	*Use the Project Management skills learnt in the entrepreneurial venture*
CLR-6 :	*Acquire knowledge on validation and Launch of startup*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Acquire knowledge about the Business law, legal procedures, Intellectual Properties and patents.*	1	80	75	L	H	-	M	-	-	-	-	M	L	-	H	-	-	-
CLO-2 :	*Learn the role of government in supporting entrepreneurship to develop the society as well as the role of an entrepreneur as an individual with the government.*	1	80	75	L	H	-	M	-	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*Identify and be able to critically analyze the regulation of governance including that in national and international codes of practice, legislation, common law, norms of practice and ethics.*	2	80	75	L	H	-	M	-	-	-	-	M	L	-	H	-	-	-
CLO-4 :	*Evaluate the effectiveness of HRM practices in supporting the strategic and operational needs of the startup.*	2	80	75	L	H	-	M	-	-	-	-	M	L	-	H	-	-	-
CLO-5 :	*Adapt project management practices to meet the needs of stakeholders from multiple sectors of the economy. Apply project management practices to the launch of new programs, initiatives, products, services, and events relative to the needs of stakeholders.*	3	80	75	L	H	-	M	-	-	-	-	M	H	-	H	-	-	-
CLO-6 :	*Implement project management knowledge, processes, lifecycle and the embodied concepts, tools and techniques in order to achieve project success.*	3	80	75	L	H	-	M	-	-	-	-	M	H	-	H	-	-	-

		Law and Legal Systems	Impact of Governance on ED	HRM	Entrepreneurial Project Management	Project Validation and Launch
Duration (hour)		6	6	6	6	6
S-1	SLO-1	*Introduction to Law and Legal Systems*	*Corporate Governance for Startups*	*HRM – Introduction and Overview*	*Project Management and Entrepreneurship -Introduction*	*Entrepreneur – Pitching the idea "Pitch Fest 01"*
	SLO-2	*Types of Laws and its Impact*	*Governance Structure and Practice*	*Role of HRM in entrepreneurship development*	*Project Management and Entrepreneurship – Concepts and Process*	*Entrepreneur – Pitching the idea "Pitch Fest 02"*
S-2	SLO-1	*Contractual Law*	*Government Programs*	*Functions of HRM*	*Project Management – Aims and Objectives*	*Entrepreneur – Pitching the idea "Pitch Fest 03"*
	SLO-2	*Dispute Resolution*	*Public Policy and its impact on Startups*	*Challenges of Performance and Appraisal in Startups*	*Review of Best Projects – Startup India*	*Entrepreneur – Pitching the idea "Pitch Fest 04"*
S-3	SLO-1	*Intellectual Property Rights - Introduction*	*Market and Institutional mechanisms in Governance*	*HRM - Models and Systems*	*Project Formulation – Concepts and Processed*	*Idea Valuation and Assessment 01*
	SLO-2	*Intellectual Property Rights - Types and Trademarks*	*Ethics in Governance*	*Cultures and Value system for startups*	*Importance and Implementation – Project Formulation*	*Idea Valuation and Assessment 02*
S-4	SLO-1	*Patent Law - Introduction*	*Measuring business performance*	*Employee Motivation*	*Entrepreneurial Project Process Life Cycle - Introduction*	*Project Creation and Setup*
	SLO-2	*Rules and Regulations for Patenting*	*Financial growth for Startups*	*Employee Engagement and Development*	*Entrepreneurial Project Process Life Cycle – Concepts and Methods*	*Project Validation and Assessment*

S-5	SLO-1	*Company Law and Regulations*	*Governance Model for Startups*	*HRM – Key challenges n strategies*	*Project Boundaries and Integration*	*Final Project Launch 01*
	SLO-2	*Types of Companies*	*Structuring Governance for your startup*	*Employee Safety and Security – HRM*	*Core Functionalities in Project Implementation*	*Final Project Launch 02*
S-6	SLO-1	*Business Incorporation – Startup India*	*Risk Management*	*Best HR practices for a startup*	*Stakeholder Management*	*Final Project Launch 03*
	SLO-2	*Make In India*	*Entrepreneurial Risks and its Impact*	*Review for Best Practises in Startup*	*Stakeholder Engagement and analysis*	*Final Project Launch 04*

Course Code	18LEM110L	Course Name	INDIAN ART FORM	Course Category	M	Mandatory	L	T	P	C
							0	0	2	0

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	*English and Foreign Languages*	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce the learners to the changing art forms in different periods of time: richness, variety and significance of various Indian art forms*
CLR-2 :	*Enable the students to recognize and appreciate paintings of different schools prevalent in the different geographical locations*
CLR-3 :	*Draw the learner's attention towards the various types of sculpture based on the materials used and the themes behind them*
CLR-4 :	*Cultivate a sense of appreciation about the aesthetics of drawing as an integral part of our daily life*
CLR-5 :	*Orient the learners about the changing Indian social scenario and the ways they are reflected in the changing facets of Modern Indian Art Forms*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*equip with an awareness of the rich cultural heritage of India*	*3*	*90*	*85*	-	-	-	-	-	*H*	*M*	*H*	*H*	*H*	-	*H*	-	-	-
CLO-2 :	*understand the contexts and significance of various Indian art forms*	*3*	*90*	*85*	-	-	-	-	-	*H*	*M*	*M*	*H*	*H*	-	*H*	-	-	-
CLO-3 :	*understand how the confluence of the diverse art forms of India create the mosaic of the Indian nation*	*3*	*90*	*85*	-	-	-	-	-	*H*	*M*	*H*	*H*	*H*	-	*H*	-	-	-

Duration (hour)		Indian Art over Ages - An Overview	Indian painting	Indian sculpture	The Indian Art of Floor Decoration	Modern Art
S-1	SLO-1	*Ancient India: An Overview*	*Indus Valley civilization paintings on pottery*	*Sculpture during the Harappan period*	*Kolam - the traditional floor drawing of South India*	*Nationalist School of Bengal Art- Introduction*
	SLO-2	*Raj-Ravi Verma: religious stories like mythologies of Hindu gods*	*Cave paintings from different parts of India*	*Terra Cota – What? Where? When? – A discussion*	*Daily life and Kolam - Line drawings, geometric designs and natural world - Some examples*	*Matching the picture with the artist*
S-2	SLO-1	*Mysore and Tanjore Art : included themes revolving around Hindu epics like Ramayana and Mahabharata*	*The paintings of the Ajanta and Ellora caves*	*Rock cut sculpture – Differences between rock cut sculpture and stone sculpture*	*Beliefs behind Kolam*	*Tracing the major ideas through paintings – Going back to Hindu themes*
	SLO-2	*Indian artists from different fields*	*Paintings of North India, South India, East India, West India, Central and Deccan India*	*Sculptures in religious buildings*	*Rangoli – Occasions and motifs*	*Student presentations on individual artists*
S-3	SLO-1	*Folk Art*	*Thanjavur, Madhubani paintings*	*Buddhism, Hinduism, and Jainism in sculpures*	*Kalamezhuthu in Kerala - Religious significance*	*Tracing the major ideas through paintings – Indian Village Life and nationalist themes*
	SLO-2	*Folk art and popular culture: classical and folk art*	*Analysing the recurrent themes style through selected illustrations*	*Visit to Mahabalipuram and submitting a report by the students*	*Mandana paintings of Rajasthan and Madhya Pradesh by oldest tribal communities*	*Student presentations on individual artists*
S-4	SLO-1	*Influential factors giving rise to modern art*	*Kalamkari paintings – Features of organic art; obtaining colours from natural sources*	*Bronze sculptures in India*	*Bengal's floor art-Alpona*	*European influences (British) – Trends in painting – portrait, landscape and realistic*
	SLO-2	*Concepts and Motifs behind modern art*	*Attempting simple Kalamkari/Madhubani paintings using natural colours*	*Cultural stonework in India - in the form of primitive cupule art*	*Festival specific Floor Art across India*	*Collection and display of paintings by various artists*
S-5	SLO-1	*Mughal paintings*	*Pattachitra paintings*		*Festival specific Floor Art across India*	*British Gothic and Indo Saracenic*

				the Buddhist Pillars of Ashoka of the Mauryan period		*architecture through examples*
	SLO-2	*Astonishing contemporary paintings by Indian artists*	*Students presenting and sharing their paintings*	*The figurative Greco-Buddhist sculpture of the Gandhara and Mathura schools, and the Hindu art of the Gupta period: Brief Introduction*	*Pookalam: The Onam Floral Rangoli*	*Field trip to places in Chennai which have Indo Saracenic architecture and report submission*
S-6	SLO-1	*Fairs, festivals and local deities in the development of art forms*	*Moghal paintings*	*Khajuraho Temples in Madhya Pradesh*	*Body Art: Traditional Mehendi*	*Indian Art post-Independence Progressive Artists' Group and their Influence*
	SLO-2	*myth, legends, snippets from epic, multitudinous gods born out of dream and fantasy in art forms*	*Moghal paintings from the various Moghal dynasties and identification of the common features*	*Debate on "Religion and Art Today"*	*Mehendi designs, religious and cultural significances*	*Fusion of western style and Indian themes*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*To introduce fundamentals of building design*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLR-2 :	*Understanding architecture and suggest suitable structural scheme*																		
CLR-3 :	*To impart understanding of integrated design concepts including other trades in building construction*																		
CLR-4 :	*To train manual design for RCC and steel structures.*																		
CLR-5 :	*To train in using software and applications for designing RCC and Steel structures.*																		
CLR-6 :	*Awareness to be created in 3dimensional modelling, analysis and design.*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*																		
CLO-1 :	*Identify various types of design for buildings*	*2*	*85*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-2 :	*Analyze the architectural view and structural design concepts*	*3*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-3 :	*Understand software and manual designs like beam, slab and column*	*3*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-4 :	*Analyze the steel structure as per IS 800-2007*	*2*	*85*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-5 :	*Understand about the steel design and its optimization*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-6 :	*Understand about the 3D-7D planning.*	*3*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-

Duration (hour)		6	6	6	6	6
S-1	SLO-1	*Structural Engineering concepts*	*Aligning with architecture, suitable structural scheme to suite architectural plans,*	*Using equivalent systems in manual analysis and computer analysis.*	*Wind loading considerations Seismic loading considerations*	*Integration of Structural Design*
	SLO-2		*Usage of transfer girders, long spans, irregular building configurations. usage of masonry structures*	*Designing for architectural features, loading pattern and building typologies based on usage parameters*	*Steel optimization method in design*	*Interface with other trades and services*
S-2	SLO-1	*Practical : Overview of structural analysis of building*	*Practical: load combination as per IS codes for proportioning members*	*Practical : Reinforcement detailing for RC elements – columns and beams*	*Practical: Bar bending details and scheduling*	*Practical: Drawing preparation*
S-3	SLO-1	*Practical : Overview of structural design of building*	*Practical : checking of pre and post analysis in software*	*Practical : Reinforcement detailing for RC elements – slabs, staircases etc.*	*Practical : Performing steel structure design as per IS800- 2007*	*Practical: Drawing preparation*
S-4	SLO-1	*Classification of Structures*	*Loading definition and equivalent static methods .Using equivalent systems in manual analysis and computer analysis.*	*Manual design for slabs as per IS456 2000*	*Reinforcement ductile detailing as per IS 13920 - 2016*	*BIM and its uses*
S-5	SLO-1	*Practical : Load calculations of real buildings*	*Practical: Using software's for automated seismic and wind loading*	*Practical: Design of Beams and Columns using software*	*Practical :Seismic detailing practices*	*Practical: construction interfacing*
S-6	SLO-1	*Practical : Load calculations of special structures like bridges as per IRC codes*	*Practical : Manual design for beams and columns as per IS456 2000*	*Practical: Using software's for slab modeling and analysis*	*Practical : Usage of Custom spreadsheets*	*Practical 3D to 7D& planning*

2. Er. G. Hariharanath, GA Consultants, Chennai, gac1996@hotmail.com	*2. Dr. P. Jayabalan, NIT, Trichy, pjeya@nitt.edu*	*Dr. K.S. Satyanarayanan, SRMIST*

Course Code	18CEM402J	Course Name	PROFESSIONAL ENHANCEMENT COURSE II	Course Category	M	Mandatory Course	L	T	P	C
							1	0	0	0

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Create insights into various post tensioning elements.*
CLR-2 :	*Address concepts related to prefabricated buildings*
CLR-3 :	*Analyze concepts of BIM, 3D printing and recent trends*
CLR-4 :	*Address concepts related to LIDAR, UAV, SAR and its recent trends*
CLR-5 :	*Create insights into Scatterometry and polorimetry applications*
CLR-6 :	*Analyze concepts of soil strengthening and stabilization.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Analyse Post tensioning sections and design of elements.*	*2*	*85*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-2 :	*Understand Prefabricated structural buildings*	*2*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-3 :	*Understand recent trends in BIM, Top down construction and sustainability in construction.*	*1*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-4 :	*Analyse about waste management and environmental impact assessment.*	*2*	*85*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-5 :	*Understand recent trends in SAR, LIDAR etc:*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-6 :	*Analyze about the soil strengthening and recent trends in soil stabilization.*	*2*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-

Duration (hour)		3	3	3	3	3
S-1	SLO-1	Structural Engineering – Post Tensioning	CEM : Top down construction,BIM,3D printing	Environmental impact assessment	Empherical and semi empherical modelling of SAR	Trends interferometry in land slide application and recent trends.
S-2	SLO-2	Prefabricated structural design	Safety and other recent trends, Sustainability in construction, OR in CEM	Hazardous waste management – rain harvesting.	ANN in optimization in SAR, Altimetry for ocean studies and geoidal modelling	Soil strengthening measures , Geosynthesis
S-3	SLO-3	Recent trends in structural engineering	Water resources and Environmental Engineering, Climate change and impacts	Remote sensing and GIS : LIDAR,UAV	Scatterometry and polorimetry applications and recent trends	Biotechnology , slope stabilization and other recent trends

ACADEMIC CURRICULA

Open Elective Courses

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18AUO101T	Course Name	HYBRID AND ELECTRIC VEHICLES	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards		Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide an insight into how electric vehicle operate*
CLR-2 :	*Demonstrate the functional requirements of Battery management system in detail.*
CLR-3 :	*Demonstrate how Electric and Hybrid Vehicle vary as per design requirements.*
CLR-4 :	*Perform the detailed analysis on the drives and driveline.*
CLR-5 :	*Selection of the appropriate drive and driveline system for the different cases.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO – 3
CLO-1 :	*Learn the basic concepts of electric vehicle technology and electric vehicles.*	2	90	85	H	M	L	L	L	L	L	M	L	M	M	H	H	H	M
CLO-2 :	*Develop and analyze hybrid and electric drive trains.*	2	90	80	H	H	H	H	H	L	M	H	H	H	M	H	H	H	H
CLO-3 :	*Interpret various vehicle power sources in hybrid vehicle technology*	2	90	80	H	M	M	M	M	L	M	H	M	H	M	H	M	M	H
CLO-4 :	*Analyze data to determine appropriate design calculations of hybrid system under study.*	2	90	80	H	H	M	H	M	L	M	H	M	H	M	M	H	M	H
CLO-5:	*Apply the concepts in sizing the electric motors*	2	90	80	H	H	M	H	H	L	L	M	H	H	M	H	H	H	M

Title		Electric Vehicle Propulsion and Energy Sources	Electric Vehicle Powerplant And Drives	Hybrid and Electric Drivetrains	Electric and Hybrid Vehicle Design	Electric And Hybrid Vehicles – Case Studies
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic concepts and problems concerning the electrification in Mobility*	*Basic concepts of electric vehicle power plant*	*Functional requirements of Hybrid Vehicle*	*Design perspectives of Hybrid vehicle*	*Parallel Hybrid, Series Hybrid -Charge Sustaining*
	SLO-2	*Functional components in an electric and hybrid vehicle*	*Power and Torque plot*		*Power plant energy distribution*	
S-2	SLO-1	*Vehicle Mechanics - Kinetics*	*Construction of Induction Machines,*	*Operational difference between the Fully Electric, Hybrid and Mild Hybrid*	*Matching the Electric Machine and the Internal Combustion Engine*	*Parallel Hybrid, Series Hybrid –Charge Depleting*
	SLO-2	*Vehicle Mechanics – Dynamics & Roadway Fundamentals*	*Operating cycle and application in traction*			
S-3	SLO-1	*Propulsion System Design - Force Velocity Characteristics,*	*Construction of Permanent Magnet Machines*	*Topological Phenomena and Social Importance of e-mobility*	*Parameter optimization – IC Engine*	*Hybrid Vehicle Case Study –Toyota Prius*
	SLO-2	*Calculation Of Tractive Power And Energy Required*	*Construction of Switch Reluctance Machines*		*Position and Types of arrangements*	
S-4	SLO-1	*Electric Vehicle Power Source - Battery Capacity*	*Role of Power Electronic Converters- DC/DC Converters*	*Role of modern drivetrain and the conversion efficiency and power consumption*	*Parameter optimization – Motor*	*Hybrid Vehicle Case Study –Honda Insight*
	SLO-2	*Battery Construction and Types*	*Description of Buck Boost Converter*		*Position and Types of arrangements*	
S-5	SLO-1	*State of Charge and Discharge*	*Isolated DC/DC Converter*	*Description of Hybrid Traction*	*Sizing of Propulsion Motor*	*Hybrid Vehicle Case Study –Chevrolet Volt*
	SLO-2		*Functional Requirements and Operating limits*		*Power Electronics & Drive System*	
S-6	SLO-1	*Calculation of Specific Energy and Specific Power & Ragone Plot Relationship*	*Two Quadrant Chopper*	*Description of Electric Traction.*	*Selection of Energy Storage Technology*	*42 V System for Traction Applications*
	SLO-2		*Switching Modes*		*Topological Optimization*	
S-7	SLO-1	*Battery Modeling - Run Time Battery Model, First Principle Model*	*AC Drives- PWM*	*Topological Optimization for Hybrid Traction*	*Communications & Supporting Subsystem*	*Lightly Hybridized Vehicles and Low Voltage System*

	SLO-2		*Current Control Method*	*Topological Optimization for Electric Traction*		
S-8	SLO-1	*Battery Management System- SOC Measurement, Battery Cell Balancing.*	*Role of Switch Reluctance Machine Drives*	*Power Flow Control & Energy Efficiency Analysis*	*Energy Management Strategies in Hybrid Vehicles- Classification, Comparison, Implementation*	*Electric Vehicle Case Study - GM EV1, Nissan Leaf, Mitsubishi Miev*
	SLO-2			*Configuration and Control of DC Motor Drives*		
S-9	SLO-1	*Traction Batteries - Nickel Metal Hydride Battery, Li-Ion, Li-Polymer Battery.*	*Voltage Control*	*Induction Motor Drive.*	*Energy Management Strategies in Electric Vehicles- Classification, Comparison, Implementation*	*Hybrid Electric Heavy-Duty Vehicles, Fuel Cell Heavy Duty Vehicles*
	SLO-2		*Current Control*	*Permanent Magnet Motor Drives, Switch Reluctance Motor Drives, Drive System Efficiency.*

Course Code	18AUO102T	Course Name	RENEWABLE SOURCES OF ENERGY	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Explain the concept of wind energy*
CLR-2 :	*Create insight on solar energy and its application*
CLR-3 :	*Evaluate the use of geothermal and hydro power for power generation*
CLR-4 :	*Analyze the biomass energy and ocean energy*
CLR-5 :	*Develop knowledge on various energy conversion devices*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1	Learning 2	Learning 3	PLO 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Apply the knowledge of using wind energy for power production*	2	80	75	H	L	L	M	M	H	H	L	L	M	L	H	H	H	M
CLO-2 :	*Analyze the economy of using solar power*	2	85	80	H	L	L	M	M	H	H	L	L	M	L	H	H	H	M
CLO-3 :	*Rationalize geothermal and hydro power plants*	2	80	75	H	M	M	M	H	H	H	L	M	M	L	H	M	H	M
CLO-4 :	*Perceive the concept of biomass and ocean energy for power production*	2	80	75	H	L	M	M	M	H	H	L	L	M	L	H	M	M	L
CLO-5 :	*Demonstrate the working of various energy conversion devices*	2	85	80	H	L	M	M	M	H	H	L	L	M	L	H	M	M	L

		Wind Energy	Solar Energy	Geo thermal and Hydro power	Ocean energy and Biomass based energy	Energy Conversions
Duration (hour)		9	9	9	9	9
S-1	SLO-1 / SLO-2	*Introduction- Renewable energy sources-statistics and technologies*	*Basic properties of solar energy*	*Geothermal – Resources, Types of wells*	*Ocean Energy – Principle, Utilization*	*Need for direct energy conversion (DEC), carnot cycle*
S-2	SLO-1 / SLO-2	*Wind Energy - Introduction*	*Application of solar energy*	*Method of harnessing power and its potential in India*	*Setting of power plants*	*Limitations and principle of DEC*
S-3	SLO-1 / SLO-2	*Application of wind energy*	*Transformation of solar energy*	*Hydropower – Properties and availability*	*Thermodynamic cycles*	*Thermo electric generators*
S-4	SLO-1 / SLO-2	*Transformation of wind energy*	*Solar heat collectors*	*Transformation of water energy*	*Tidal and wave energy*	*Seebeck, peltier and joule Thompson effect and application*
S-5	SLO-1 / SLO-2	*Wind Turbines*	*Solar photovoltaic collectors*	*Hydro power plants*	*Biomass - Principle of biomass conversion*	*Magneto hydrodynamic generator (MHD) – Working principle*
S-6	SLO-1 / SLO-2	*Operating characteristics*	*Application of solar collectors*	*Applications of hydro power plants*	*Anaerobic/aerobic digestion*	*MHD accelerator, MHD engine*
S-7	SLO-1 / SLO-2	*Wind power plant*	*Solar power plant*	*Special hydropower plants*	*Biogas digestors, gas yield and combustion characteristics*	*Electron gas dynamic conversion*
S-8	SLO-1 / SLO-2	*Utilization of wind power*	*Economic study*	*Economic study*	*Utilization for cooking and economic aspects*	*Fuel cell – basic principle*
S-9	SLO-1 / SLO-2	*Trends in wind energy utilization*	*Trends in solar energy utilization*	*Trends in hydro power utilization*	*Utilization in IC engine*	*Hybrid vehicle – Basic principle*

		Off Road Equipments	Farm Equipments	Earth Moving Machines	Construction Equipments	Special purpose vehicles
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Classification of Special Purpose Vehicles,*	*Classification of farm equipments*	*Introduction of Earth moving equipments*	*Scrapers - Introduction*	*Introduction to special application machines*
	SLO-2	*wheel type & track type, applications*	*Introduction to tractors*	*capacity and applications of earthmovers*	*Scrappers Constructional Details, Applications*	*Power Shovel – Introduction and types*
S-2	SLO-1	*Transport Equipment: Powered Equipment, Trolleys, - Constructional Details, Applications*	*lay out of wheeled tractor*	*Basic considerations for equipment selection*	*Scrappers and their types*	*Power Shovel- Constructional details and applications*
	SLO-2	*Trailers Constructional Details, Applications*	*Classification of tractors*	*Bulldozers- Constructional details and operations and applications*	*Graders- Introduction*	*Drag lines*
S-3	SLO-1	*Platform Lift Trucks Constructional Details, Applications*	*Wheeled Tractor - Constructional Details, Applications*	*Types of Bull dozers*	*Motor graders Constructional Details, Applications*	*Revolving shovels –constructional details and applications*
	SLO-2	*Fork Lift Trucks Constructional Details, Applications*	*Crawler Tractor - Constructional Details, Applications*	*Cable And Hydraulic Dozers*	*Classifications of Motor graders*	*Stripper Shovels - constructional details and applications*
S-4	SLO-1	*Containers And Supports.- Constructional Details, Applications*	*Recent Trends In Tractor Design*	*Running And Steering Gears*	*Bush Cutters - Introductions*	*Capacity Of Shovels*
	SLO-2	*Hauling Equipment: Types Of Dump Trucks, On-High Way Vehicles, Constructional Details, Applications*	*Power transmission system In Caterpillar Tractor. – Mechanism*	*Dump Traction- Introduction*	*Bush Cutters- Constructional Details, Applications*	*Ditchers - Introduction*
S-5	SLO-1	*Off High Way Vehicles Constructional Details, Applications.*	*Steering system*	*Dump Trucks and their types*	*Stumpers -Introduction*	*Ditchers - constructional details and applications*
	SLO-2	*Hoisting Equipment: Jacks, Truck Mounted Crane*	*Accessories of wheeled tractors*	*Rigid Dump Trucks Constructional Details,*	*Stumpers - Constructional Details, Applications*	*Articulated vehicles- constructional details and applications*
S-6	SLO-1	*Crawler Constructional Details, Applications*	*Hydraulic control system*	*Articulated Dump Trucks Constructional Details*	*Dozer- Introduction*	*Ambulance*

	SLO-2	*Crane Constructional Details, Applications*	*Power take off unit.*	*Loaders: Single Bucket Constructional Details, Applications*	*Dozer-- Constructional Details, Applications*	*fire extinguishing vehicle*
S-7	SLO-1	*Outriggers. - Constructional Details, Applications*	*Motor Grader: Recent Trends*	*Multi Bucket Constructional Details, Applications*	*Rippers -Constructional Details, Applications*	*Hover craft*
	SLO-2	*Vibratory compactors Constructional Details, Applications*	*Control Mechanism Of A Caterpillar Motor Grader*	*Skid steer loaders constructional details and applications*	*Dragline Excavator -Introduction*	*oil tankers*
S-8	SLO-1	*Human factors in special purpose vehicle*	*Ride and stability characteristics*	*Trenchers- Introduction*	*Dragline Excavator - Constructional Details, Applications*	*Introduction to tankers*
	SLO-2	*Safety features*	*Safety features in tractors*	*Trenchers-Principles and operations*	*Vibratory roller - introduction*	*Special features and constructional details of tankers*
S-9	SLO-1	*Regulatory requirements of special purpose vehicles*	*Human factors in tractor design*	*criteria for selection of prime mover fro dumpers*	*Vibratory roller – Constructional details and applications*	*gun carriers - Introduction*
	SLO-2	*Economics of special purpose vehicle utilization*	*Procedure of testing and standard code for testing of tractor performance*	*criteria for selection of prime mover for front end loaders*	*Concrete mixer– Constructional details and applications*	*gun carriers - constructional details*

Course Code	18AUO104T	Course Name	FUEL CELLS AND APPLICATIONS	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Impart knowledge on fuel cell technology and applications*
CLR-2 :	*Know the concept of electrochemistry in fuel cells*
CLR-3 :	*Distinguish different types of fuel cells and operations*
CLR-4 :	*Inferring different hydrogen production techniques*
CLR-5 :	*Identify the application of fuel cells in power generation*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual &Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Understand the basics of fuel cell technology*	1,2	90	85	H	M	H	H	H	M	M	L	M	M	L	M	H	H	H
CLO-2 :	*Infer the concepts of fuel cell electrochemistry*	1,2	90	85	H	M	H	H	H	L	L	L	M	M	L	M	H	H	H
CLO-3 :	*Classify the major types of fuel cells and their modes of operation*	1,2	90	80	H	M	H	H	H	L	L	L	M	M	L	L	H	H	H
CLO-4 :	*Categorize the methods of production, storage and utilization of hydrogen as a fuel*	1,2	80	75	H	H	H	H	H	L	L	L	M	M	L	L	H	H	H
CLO-5 :	*Gain knowledge on application of fuel cells in power cogeneration*	1,2	90	85	H	H	H	H	M	L	L	L	M	M	L	M	H	H	H

		Introduction to fuel cells and fuel cell thermodynamics	Fuel cell electrochemistry	Types of fuel cells	Hydrogen production, storage and utilization	Application of fuel cells in power cogeneration
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction and overview of fuel cell technology*	*Introduction to electrode kinetics.*	*Classification of fuel cells*	*Hydrogen : Its merit as a fuel,*	*Balance of fuel cell power plant,*
	SLO-2	*A simple fuel cell, fuel cell advantages and disadvantages*	*Introduction to electrode kinetics.*	*Polymer electrolyte membrane fuel cell (PEMFC)*	*Production methods: from fossil fuels, electrolysis, thermal decomposition,*	*Balance of fuel cell power plant,*
S-2	SLO-1	*Basic fuel cell operation,*	*Fuel cell reaction kinetics*	*Electrodes and Electrode Structurein PEMFC*	*Production methods: from fossil fuels, electrolysis, thermal decomposition,*	*Fuel cell power plant structure*
	SLO-2	*Layout of a Real Fuel Cell*	*Fuel cell reaction kinetics*	*Water Management in the PEMFC*	*photochemical, photocatalytic*	*Cogeneration*
S-3	SLO-1	*The Hydrogen–Oxygen Fuel Cell with Liquid Electrolyte.*	*Conversion of chemical energy to electricity in a fuel cell.*	*PEMFuel Cell Cooling and Air Supply*	*Hybrid methods of hydrogen production*	*Fuel cell electric vehicles*
	SLO-2	*Difference between fuel cell and batteries, fuel choice*	*Conversion of chemical energy to electricity in a fuel cell.*	*Direct methanol fuel cells (DMFC)*	*Hydrogen storage methods:*	*Fuel cell in Motor cycles and bicycles, airplanes*
S-4	SLO-1	*Overview of types of fuel cells (with emphasis on PEMFC and DMFC technology)*	*Reaction rate of fuel cell*	*Anode, cathode Reaction and Catalysts in DMFC*	*Onboard hydrogen storage.*	*Case study: fuel cell vehicles with electric vehicles*
	SLO-2	*Fuel cell thermodynamics: Thermodynamics review*	*Reaction rate of fuel cell*	*Anode, cathode Reaction and Catalysts in DMFC*	*Chemical storage*	*Case study: fuel cell vehicles with electric vehicles*
S-5	SLO-1	*Application of first and second law to fuel cells*	*Butler -Volmer equation.*	*Methanol Production, Storage, and Safety*	*physical storage of hydrogen*	*Case study: different fuel cell powered Indian vehicles*
	SLO-2	*Heat Potential of a fuel*	*Butler -Volmer equation.*	*Methanol Production, Storage, and Safety*	*Storage in metal and alloy hydrides.*	*Case study: different fuel cell powered Indian vehicles*
S-6	SLO-1	*Enthalpy of reaction,*	*Fuel cell charge transfer*	*Alkaline fuel cell (PAFC)*	*Storage in metal and alloy hydrides.*	*Fueling stations*
	SLO-2	*Work potential of a fuel:*	*Fuel cell charge transfer*	*Types of Alkaline Electrolyte Fuel Cell*	*Carbon nanotubes*	*Fuel processor and fuel cell stack*

S-7	SLO-1	*Gibbs free energy*	*Mass transfer in fuel cells*	*Electrodes for Alkaline Electrolyte Fuel Cells*	*Carbon nanotubes*	*Water Management*
	SLO-2	*Predicting reversible voltage of a fuel cell under nonstandard-state conditions.*	*Mass transfer in fuel cells*	*Molten Carbonate fuel cell (MCFC)*	*Glass capillary arrays*	*Water Management*
S-8	SLO-1	*Basic Parameters of Fuel Cells.*	*Implications and use of fuel cell polarization curve*	*Molten Carbonate fuel cell (MCFC)*	*Glass capillary arrays*	*Thermal Management*
	SLO-2	*Fuel cell efficiency.*	*Implications and use of fuel cell polarization curve*	*Solid oxide fuel cell (SOFC)*	*pipeline storage*	*Thermal Management*
S-9	SLO-1	*Comparison with Carnot efficiency*	*Activation polarization, ohmic polarization*	*Comparison of fuel cell, Performance behavior*	*hydrogen utilization.*	*Safety issues and cost expectation*
	SLO-2	*Comparison with Carnot efficiency*	*Concentration Polarization, polarization losses*	*Comparison of fuel cell, Performance behavior*	*hydrogen utilization.*	*Safety issues and cost expectation*

Course Code	18AUO105T	Course Name	TRANSPORT MANAGEMENT	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*acquire knowledge about Motor Vehicle Act and Laws Governing Transport system*
CLR-2 :	*familiarize with Transport Taxation and Traffic controls.*
CLR-3 :	*know the various methods of fare charging and fleet management.*
CLR-4:	*acquire knowledge in Goods Transport system and Bus scheduling*
CLR-5:	*familiarize with insurance policies and vehicle maintenance.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*.Able to understand and apply the Motor vehicle Act*	1,2	90	85	H	M	H	H	H	M	M	L	M	M	L	M	H	H	H
CLO-2 :	*Can able to get knowledge about ownership of vehicle and tax methods*	1,2	90	85	H	M	H	H	H	L	L	L	M	M	L	M	H	H	H
CLO-3 :	*Able to apply the knowledge about fleet management.*	1,2	90	80	H	M	H	H	H	L	L	L	M	M	L	L	H	H	H
CLO-4 :	*Thorough knowledge about various Goods vehicles and scheduling*	1,2	80	75	H	H	H	H	H	L	L	L	M	M	L	L	H	H	H
CLO-5 :	*Able to know the insurance claim and how to register accident case.*	1,2	90	85	H	H	H	H	M	L	L	L	M	M	L	M	H	H	H

		Motor Vehicle Act	Transport systems and Taxation	Passenger Transport operation	Scheduling and Goods Transport operation	Vehicle Maintenance and insurance
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction – Motor Vehicle Act*	*Introduction – Transport systems and Taxation*	*Introduction – Passenger Transport operation*	*Introduction – scheduling and Goods Transport operation*	*Introduction – vehicle Maintenance and insurance*
	SLO-2	*Traffic rules and signals – fitness certificate*	*various transport systems.*	*Structure of passenger transport organisation*	*Scheduling - introduction*	*Preventive maintenance system in Transport industry*
S-2	SLO-1	*Registration of vehicle*	*Advantages of Motor Transport*	*Requirement on fleet management*	*Basic factors of Bus scheduling* *Problems in Bus scheduling*	*Tyre maintenance procedure* *Causes for uneven tyre wear*
	SLO-2	*Permit insurance*	*Areas of improvement in Motor Transportation*	*Problems on fleet management*		
S-3	SLO-1	*Constructional regulations of vehicles*	*Principal function of Administration*	*Fleet maintenance*	*Structure of Goods transport organisation*	*Remedies for tyre wear* *Maintenance procedure for better fuel economy*
	SLO-2		*Functions of Traffic and Engineering divisions*	*Public relations - propaganda*	*Scheduling of Goods transport* *Management information system(MIS)*	
S-4	SLO-1	*Government administration structure – personal, Authorities.*	*Chain of responsibility*	*Publicity and passenger amenities*	*Storage of petroleum products*	*Design of Bus depot layout.*
	SLO-2		*Forms of ownership by state Government.*	*Parcel traffic*	*Transportation of petroleum products*	*Insurance types - significance*
S-5	SLO-1	*Responsibilities of Driver, public - offences*	*Public body undertakings*	*Theory of Fares*	*Description of Tipper, tanker, power wagons vehicles*	*Comprehensive insurance*
	SLO-2	*Accidents – causes and analysis – preventive measures*		*Basic principle of fare charging*		*Third party insurance*
S-6	SLO-1	*State and interstate permits*	*Forms of ownership by municipality,private undertakings*	*Method of drawing up of a fare table*	*Description of recovery vans, delivery vans.*	*Furnishing of particulars of vehicle involved in accident*
	SLO-2	*Test for competence to drive*		*Various types of fare collecting methods*		*MACT – hit and run case*
S-7	SLO-1	*Licensing of Drivers and conductors*	*Taxation - objectives*	*Estimating the cost for transport vehicles*	*Advance technique in Traffic management*	*Solatium fund*
	SLO-2					

S-8	SLO-1	*Rules regarding construction of motor vehicles.*	*Structure of laving tax*	*Different rates for different type of service*	*Traffic navigation*	*Duty of Driver in case of accident.*
	SLO-2		*Methods of laving tax.*	*Principal features of operating cost*		*Surveyor and loss assessor*
S-9	SLO-1	*Laws Governing to use of Motor vehicle.*	*One time tax – Tax exemption*	*Operation cost - revenues*	*Global positioning system*	*Surveyor's report*
	SLO-2		*Tax renewal*	*Economics - records*		

Learning Resources	*1. "Motor vehicle Act" – Govt of India publications.* *2. Shrivastava s k, "Transport Development in India", S Chand & co Pvt Ltd., New Delhi* *3. 		Introduction to composites	Polymer matrix composites	Metal matrix composites	Ceramic matrix composites	Advances in composites
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Fundamentals of composites*	*Reinforcement material-Fibres*	*Metallic Matrix Matrix*	*Ceramic Matrix Material*	*Carbon /Carbon composites*
	SLO-2	*Need for composites*	*Glass fibre, Carbon fibre-Processing*	*Selection of reinforcement*	*Failure Behavior of CMCs*	*Carbon Fiber Reinforcements*
S-2	SLO-1	*Classification of composites*	*Aramid fibre and Boron fibre-Processing*	*Processing of MMC*	*Toughening of CMCs*	*Matrix Systems-Thermosetting*
	SLO-2	*Advantages of Composite*	*Properties and Application*	*Liquid state processes*		
S-3	SLO-1	*Disadvantage of Composite*	*Particle reinforcement*	*Stir Casting, Squeeze Casting*	*Processing of CMCs*	*Thermoplastic and Gaseous precursor*
	SLO-2	*Properties of Composite:*	*Nano reinforcement*	*Slurry Casting, Melt Infiltration*	*Ceramic Particle Based Processes*	
S-4	SLO-1	*Particulate Composites*	*Polymer matrix material*	*Spray deposition*	*Cold Compaction*	*Processing of C/C Composites*
	SLO-2	*Fibre reinforced Composite*	*Thermosetting resins, thermoplastic resins*	*Solid state processes*	*Slurry Impregnation*	*Thermosetting Resin Based Processing*
S-5	SLO-1	*Elastic Behavior under Longitudinal Loading,*	*Fillers-Additives*	*Powder Metallurgy technique*	*Sol-gel Processing*	*Thermoplastic Pitch Based Processing*
	SLO-2	*Problems on Elastic Behavior under Longitudinal Loading,*	*Pre-Processed Material-Molding compound*	*Hot Pressing*	*Reaction Bonding Processes*	*Chemical Vapor Infiltration*
S-6	SLO-1	*Elastic Behavior under Transverse Loading*	*Prepegs-PMC processes*	*Diffusion Bonding*	*In Situ Ceramic Composite Processing*	*Properties of C/C Composites*
	SLO-2	*Problems on Elastic Behavior under Transverse Loading*	*Hand layup, Spray up processes*	*Gaseous state processes*	*Melt Processing*	*Oxidation Protection of C/C composites*

S-7	SLO-1	*Longitudinal Tensile Strength*	*Compression molding, Injection molding*	*Deposition techniques*	*Polymer Infiltration and Pyrolysis*	*Application of C/C Composites*
	SLO-2	*Transverse Tensile Strength*	*Autoclave molding*	*Machining and joining of MMCs*		*Nanocomposites*
S-8	SLO-1	*Discontinuous Fiber Reinforced Composites*	*Resin transfer molding*	*Properties of MMCs*	*Properties of CMCs*	*Polymer Nanocomposites*
	SLO-2		*Pultrusion, Filament winding*	*Parameters affecting properties of MMC*		*Metal Nanocomposites*
S-9	SLO-1	*Applications of composite*	*Properties of PMCs*	*Interfacial Problems*	*Automotive Application of CMCs*	*Ceramic Nanocomposites*
	SLO-2		*Automotive Application of PMCs.*	*Automotive Application of MMCs.*		*Nanocomposites- Properties and Applications*

Course Code	18AUO107T	Course Name	NON DESTRUCTIVE TESTING AND EVALUATION	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the basic principle, importance and applications of various NDT techniques*
CLR-2 :	*Acquire proper skills and equip with proper competencies to locate flaws in various materials and products.*
CLR-3 :	*Equip themselves familiar with industrial applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand various Non Destructive Techniques to detect defects*	*1*	*90*	*90*	*H*	*M*	*L*	*M*	*H*	*M*	*M*	*M*	*H*	*M*	*L*	*M*	*H*	*M*	*M*
CLO-2 :	*Apply scientific and technical knowledge to the field of non-destructive testing*	*1,2*	*90*	*80*	*H*	*H*	*M*	*H*	*H*	*M*	*M*	*M*	*H*	*M*	*M*	*M*	*M*	*M*	*H*
CLO-3 :	*Use the relevant non-destructive testing methods for various engineering practice*	*1,2*	*85*	*85*	*H*	*H*	*H*	*H*	*H*	*M*	*M*	*M*	*H*	*M*	*M*	*M*	*H*	*M*	*H*
CLO-4 :	*Recognize and achieve high levels of professionalism in their work*	*1,2*	*90*	*80*	*H*	*H*	*M*	*M*	*M*	*H*	*M*	*H*	*M*	*M*	*M*	*M*	*M*	*M*	*M*
CLO-5 :	*Engage in lifelong learning, thought process and development*	*1.2*	*85*	*90*	*H*	*M*	*H*	*M*	*M*	*H*	*H*	*H*	*M*	*M*	*M*	*M*	*M*	*M*	*H*

		Overview of NDT	Surface NDE Methods	Thermography and Eddy Current Testing	Ultrasonic Testing (UT) and Acoustic Emission	Radiography
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction to NDT*	*Liquid Penetrate Testing-Principle, Characteristics and types of penetrant*	*Principle of Thermography,*	*Ultrasonic Testing-Introduction, Basic Properties of sound beam, Acoustic Impedance*	*Radiography- Principle*
	SLO-2			*IR-radiation-Properties, Factors affecting Thermal measurements*		*Electromagnetic radiation sources*
S-2	SLO-1	*Comparison of Destructive and Non Destructive Methods*	*Developers-Function, Properties and types*	*Contact and non contact temperature sensors*	*Ultrasonic Transducers,*	*Radiation Attenuation and Effect of radiation on film*
	SLO-2					
S-3	SLO-1	*Overview of Non Destructive Testing Methods*	*Cleaning Methods and Emulsifiers*	*Non Contact Thermography System*	*Inspection Methods-Transmission and pulse-echo method*	*Radiographic Imaging*
	SLO-2					
S-4	SLO-1	*Casting Defects*	*Liquid penetrant Testing procedure and Interpretation of results*	*Advantages, Disadvantages and applications of Thermography*	*Inspection Methods- Angle beam pulse echo method*	*Inspection Techniques- Single wall and double wall penetration techniques*
	SLO-2					
S-5	SLO-1	*Welding Defects*	*Penetrant Removal Process, Advantage and Limitation of Liquid penetrate Test*	*Eddy Current Testing-Introduction and principle*	*Ultrasonic Flaw Detection Equipment, Mode of Display-A-Scan, B-scan, C-scan*	*Inspection Techniques-Multiwall penetration technique*
	SLO-2					
S-6	SLO-1	*Visual Testing-Principle and Tools*	*Magnetic Particle Testing-Introduction, Method of Magnetization*	*Factors affecting eddy current*	*Advantages, limitations and application of Ultrasonic testing method*	*Advantages, disadvantages and applications of radiography*
	SLO-2					
S-7	SLO-1	*Optical Aid used for Visual Inspection-Microscope, Rigid Borescope, Mini and Hybrid Borescope*	*Procedure for Magnetic Particle Testing*	*Instrumentation of eddy current testing*	*Acoustic Emission Testing-Principle and Technique*	*Real time Radiography-Microfocal Radiography*

	SLO-2					
S-8	SLO-1	*Optical Aid used for Visual Inspection-Extendable borescope, Flexible borescope, Endoscope, Telescope and Holography*	*Residual Magnetism.*	*Types of probes*	*Instrumentation of Acoustic Emission Testing*	*Advantages and limitations of Microfocal Radiography*
	SLO-2					
S-9	SLO-1	*Merits and Demerits of Visual Testing*	*Demagnetization-Method of Demagnetization*	*Advantages, Limitations and application of eddy current testing*	*Applications*	*Xero Radiography*
	SLO-2

		Spark Ignition Engines	Compression Ignition Engines	Fuel systems	Alternate Fuels	Recent Trends
Duration (hour)		9	9	9	9	9
S-1	SLO1	*Introduction to Spark ignition engines*	*Introduction to Compression Ignition Engines*	*Introduction to Fuel Injection System*	*Introduction to Engine Modifications For Alternative Fuels*	*Recent Trends*
	SLO2	*Air-Fuel Ratio Requirements*	*Stages Of Combustion in CI Engine*	*Fuel Injection System Functions And Components*	*Alternative fuels Properties , Suitability*	*Homogeneous Charge Compression Ignition Engine*
S-2	SLO1	*Design Of Carburetor*	*Stages Of Combustion in CI Engine*	*Petrol Injection - Open Loop Systems*	*Alcohols as a Fuel for IC engines*	*Homogeneous Charge Compression Ignition Engine*
	SLO2	*Carburetor –Fuel Jet Size And Venture Size*	*Normal And Abnormal Combustion – Factors Affecting Knock*	*Petrol Injection - Closed Loop Systems*	*Vegetable Oils And Bio-Diesel*	*Lean Burn Engine*
S-3	SLO1	*Carburetor –Fuel Jet Size And Venture Size*	*Normal And Abnormal Combustion – Factors Affecting Knock*	*Mono Point And Multi Point Injection System*	*Bio-Gas*	*Lean Burn Engine*
	SLO2	*Stages Of Combustion*	*Direct And Indirect Injection Systems*	*Mono Point And Multi Point Injection System*	*Natural Gas*	*Stratified Charge Engine*
S-4	SLO1	*Stages Of Combustion*	*Direct And Indirect Injection Systems*	*Direct Injection Systems*	*Liquefied Petroleum Gas*	*Stratified Charge Engine*
	SLO2	*Normal And Abnormal Combustion*	*Combustion Chambers*	*Fuel Injection In-Line, Rotary Pumps*	*Liquefied Petroleum Gas*	*Surface Ignition Engine*
S-5	SLO1	*Normal And Abnormal Combustion*	*Combustion Chambers*	*Testing-Governing- Injection Lag*	*Hydrogen as a fuel in IC engines*	*Surface Ignition Engine*
	SLO2	*Factors Affecting Knock*	*Turbo Charging*	*Fuel Injector - Types Of Injection Nozzle*	*Hydrogen as a fuel in IC engines*	*Four Valve And Overhead Cam Engines*
S-6	SLO1	*Combustion Chambers*	*Turbo Charging*	*Fuel Injector - Types Of Injection Nozzle*	*Engine Modifications*	*Four Valve And Overhead Cam Engines*
	SLO2	*Combustion Chambers*	*Introduction To Thermodynamic Analysis Of CI Engine*	*Fuel Spray Characteristics*	*Engine Modifications*	*Four Valve And Overhead Cam Engines*

S-7	SLO1	*Introduction To Thermodynamic Analysis Of SI Engine*	*Thermodynamic Analysis Of CI Engine*	*Fuel Injection Timing*	*Performance, emission and combustion characteristics of SI engines*	*Alternative Power Sources: Wankel Rotary Engine*
	SLO2	*Thermodynamic Analysis Of SI Engine*	*Combustion Process in CI Engines*	*Factors Influencing Fuel Spray Atomization, Penetration And Dispersion Of Diesel*	*Performance, emission and combustion characteristics of SI engines*	*Sterling Engine, Gas Turbine Engine*
S-8	SLO1	*Thermodynamic Analysis Of SI Engine*	*Combustion Process in CI Engines*	*Factors Influencing Fuel Spray Atomization, Penetration And Dispersion Of Diesel*	*Performance, emission and combustion characteristics of CI engines*	*Sterling Engine, Gas Turbine Engine*
	SLO2	*Thermodynamic Analysis Of SI Engine Combustion Process*	*Combustion Process in CI Engines*	*Electronic Engine Management system*	*Performance, emission and combustion characteristics of CI engines*	*Cycle test-I*
S-9	SLO1	*Recent Developments In SI Engines*	*Recent Developments In CI Engines*	*Electronic Engine Management System*	*Alternative fuels used in CI engines*	*Cycle test-II*
	SLO2	*Recent Developments In SI Engines*	*Recent Developments In CI Engines*	*Common Rail Direct Injection Diesel Engine*	*Alternative fuels used in CI engines*	*Surprise test*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the ability and information to follow recent developments about the internal combustion engine technology.*
CLR-2 :	*Describe methods for reduction of exhaust emissions, and their relations to fuel quality and engine performance*
CLR-3 :	*Demonstrate competency in skills related to automotive technology.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the Insights in Internal Combustion Engine*	*1*	*90*	*90*	*H*	*H*	*H*	*M*	*H*	*M*	*H*	*H*	*H*	*L*	*M*	*H*	*H*	*M*	*H*
CLO-2 :	*Summarize the Knowledge in Engine Cycles*	*2*	*90*	*90*	*H*	*H*	*H*	*H*	*M*	*M*	*M*	*M*	*H*	*L*	*H*	*H*	*H*	*L*	*M*
CLO-3 :	*Compare the technology in emissions*	*2*	*90*	*90*	*H*	*M*	*H*	*M*	*H*	*H*	*M*	*H*	*M*	*L*	*H*	*H*	*H*	*H*	*L*

Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Internal combustion engines*	*Theoretical engine cycles*	*Fuels and combustion & emissions*	*Velocity and acceleration, speed*	*Vehicle Characteristics*
	SLO-2	*Engine power and Brake power*	*The constant volume cycle (Otto cycle)*	*combustion*	*Speed and velocity Acceleration*	*Load transfer under acceleration*
S-2	SLO-1	*Dynamometers for high-speed engines*	*Thermal efficiency of the theoretical Otto cycle*	*Products of combustion*	*Velocity–time graph Uniform velocity*	*Static reactions*
	SLO-2	*Mean effective pressure*	*Thermal efficiency in terms of compression ratio r*	*Relevant combustion equations*	*Uniform acceleration*	*Vehicle under acceleration*
S-3	SLO-1	*Horsepower PS – the DIN*	*Effect of compression ratio on thermal efficiency*	*Air–fuel ratio Petrol engine combustion*	*Equations of motion and their application to vehicle technology*	*Vehicle acceleration – effect of load transfer*
	SLO-2	*Indicated power Mean effective pressure*	*Relative efficiency*	*Detonation, Pre-ignition*	*Force, mass and acceleration*	*Front wheel drive*
S-4	SLO-1	*Cylinder pressure vs. crank angle*	*Diesel or constant pressure cycle*	*Octane rating*	*Relation between mass and weight*	*Maximum acceleration – rear wheel drive*
	SLO-2	*Mechanical efficiency of an engine*	*Diesel or constant pressure cycle*	*Compression ignition engine combustion chambers*	*Inertia*	*Four wheel drive – fixed*
S-5	SLO-1	*Morse test*	*The dual combustion cycle*	*Diesel fuel-Flash point*	*Motion under gravity*	*Four wheel drive – with third differential*
	SLO-2	*Characteristic curves of engine performance*	*Operation of dual combustion cycle*	*Pour point-Cloud point*	*Angular (circular) motion*	*Four wheel drive – with third differential*
S-6	SLO-1	*Volumetric efficiency*	*Comparison between theoretical and practical engine cycles*	*Exhaust emissions-Factors affecting exhaust emissions*	*Equations of angular motion*	*Accelerating force – tractive effort*
	SLO-2	*Torque vs. engine speed*	*Comparison between theoretical and practical engine cycles*	*Emissions and their causes*	*Equations of angular motion*	*Tractive resistance*
S-7	SLO-1	*Specific fuel consumption vs. engine speed*	*The Stirling engine regenerator*	*Methods of controlling exhaust emissions*	*Relation between angular and linear velocity*	*Power required to propel vehicle*
	SLO-2	*Brake power, torque and sfc compared*	*A double-acting Stirling engine*	*Exhaust gas recirculation*	*Relation between angular and linear velocity*	*Gradeability*
S-8	SLO-1	*Thermal efficiency*	*The gas turbine*	*Catalysts*	*Centripetal acceleration*	*Vehicle power on a gradient*
	SLO-2	*Indicated thermal efficiency*	*The gas turbine*	*Diesel particulate filters*	*Accelerating torque*	*Vehicle on a curved track*
S-9	SLO-1	*Brake thermal efficiency petrol vs. diesel*	*Summary of formulae*	*Liquefied petroleum gas (LPG)*	*Model problem I*	*Overturning speed*
	SLO-2	*Heat energy balance*	*Simple Problems*	*Zero emissions vehicles (ZEVs)*	*Model problem II*	*Skidding speed*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (loom)	Expected Proficiency %)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO –3
CLO-1 :	*Comprehend the potential growth of petrochemical industries, distillation characteristics*	*1*	*75*	*70*	*L*		*L*										*H*	*H*	
CLO-2 :	*Comprehend the thermal properties of petroleum fractions*	*1*	*75*	*70*	*M*		*M*										*H*	*H*	*M*
CLO-3 :	*Comprehend the conversion of petroleum, hydrodesulphurization*	*1*	*80*	*75*	*H*		*M*										*H*	*H*	
CLO-4 :	*Comprehend the fuel, storage and transportation -characteristics*	*1*	*80*	*75*	*M*		*M*				*L*						*H*	*H*	*M*
CLO-5 :	*Comprehend the flow sheets of important petrochemicals*	*1*	*80*	*75*	*M*		*H*										*H*	*H*	
CLO-6:	*Comprehend the salient features of petroleum engineering*	*1*	*80*	*70*	*H*		*H*				*L*						*H*	*H*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of petrochemical*	*Distillation condition*	*Octane number*	*Thermal cracking*	*Overview of Refinery Products*
	SLO-2	*Industrial Growth in India, Economics, Feedstock Selection for Petrochemicals*	*Distillation products*	*Cetane number, Diesel index, their determination and importance*	*Thermal cracking in vapor, liquid and mixed phase*	*Refinery Products*
S-2	SLO-1	*Formation*	*Petroleum refining processes*	*Catalytic cracking*	*Production of aviation gasoline*	*Importance and growth potential of petrochemical in India*
	SLO-2	*Formation theories*	*Petroleum Products*	*Houdry fixed bed*	*Properties*	*Petrochemical types*
S-3	SLO-1	*Migration of crude*	*Evaluation of Crude Oil*	*Fluidized bed*	*Motor fuel, kerosene, fuel*	*Reforming and cracking: Cracking of Naphtha*
	SLO-2	*Accumulation of petroleum*	*Testing of Petroleum Products*	*Catalytic bed*	*Diesel oil, tractor fuel and jet*	*Production of C2 and C3 Compounds*
S-4	SLO-1	*Types of crude*	*General processing, topping*	*Reforming process*	*Lubricating oil manufacture*	*Production of intermediate chemicals: Acrylonitrile,*
	SLO-2	*Crude classification*	*vacuum distillations*	*Alkylation process*	*Petroleum waxes and asphalts*	*ethylene oxide*
S-5	SLO-1	*Formation and Evaluation of Crude Oil*	*Physical properties*	*Conversion of petroleum gases into motor fuel with alkylation*	*Storage of petroleum products*	*Higher olefins*
	SLO-2	*General processing of crude*	*Thermal properties*	*Flow diagram*	*Types of storage*	*Benzene*
S-6	SLO-1	*Atmospheric distillation of crude*	*Properties of petroleum fractions*	*Polymerization*	*Tanks*	*Toluene*
	SLO-2	*Flow diagram*	*Thermal properties*	*Hydrogenation and dehydrogenation*	*Bullets*	*Xylene*
S-7	SLO-1	*Distillation condition*	*Flash point, fire point*	*Treatment techniques*	*Special types of spheres*	*Polymerization process*
	SLO-2	*Distillation products*	*Viscosity factor*	*Removal of Sulphur Compounds*	*Transportation of petroleum products, road, rail*	*Plastics*
S-8	SLO-1	*Vacuum distillations*	*Petroleum refining processes*	*Dewaxing*	*Sea and pipeline*	*Ethenic polymers*
	SLO-2	*Flow diagram*		*Clay Treatment and Hydrofining*	*Types of transportation*	*Polyvinyl chloride*
S-9	SLO-1	*Primary process*	*Refining flow diagram*	*Desulphurization,*	*Safety norms*	*Synthetic fibers- polyesters- polyesters ribbon*
	SLO-2	*Secondary process*		*Solvent Treatment Processes*	*Importance of pipeline transportation.*	*Polyethylene Terephthalate*

Course Code	18CHO103T	Course Name	INTRODUCTION TO CHEMICAL ENGINEERING	Course Category	O	OPEN ELECTIVE	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basics of process calculation*
CLR-2 :	*Be exposed to the fundamentals of Mechanical Operations*
CLR-3 :	*Understand the fundamentals of fluid flow phenomena*
CLR-4 :	*Be exposed to the principles of heat transfer*
CLR-5 :	*Acquire the knowledge on the basics of mass transfer*
CLR-6 :	*Be exposed to the basic principles of chemical engineering*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO –3
CLO-1 :	*Learn the basics of stoichiometry and mass balance*	2	80	70	H	H											H	L	
CLO-2 :	*Familiarized with mechanical operations involved in material handling*	2	80	70		H	H	L									H	H	L
CLO-3 :	*Understand the concept of fluid and its flow*	2	70	65		H	H	L									H	H	
CLO-4 :	*Gain Knowledge on heat transfer principles*	2	80	70	H	H	H	L									H	H	
CLO-5 :	*Comprehend the basics of mass transfer*	2	70	65	H	H		L									M	L	
CLO-6 :	*Analyze the concepts in chemical engineering*	2	75	65	H	H	H	M									H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Units and dimensions, the mole unit*	*Size reduction*	*Nature of fluids: Type of fluids and flow:*	*Introduction to Heat Transfer*	*Introduction to Mass Transfer operations*
	SLO-2	*mole fraction (or percent) and mass fraction (or percent)*	*Size reduction*	*Nature of fluids: Type of fluids and flow:*	*Various modes of Heat transfer*	*Diffusion, Types, Fick's I law of Diffusion.*
S-2	SLO-1	*analyses of a mixture, concentrations*	*Size analysis*	*incompressible and compressible, potential flow, Laminar and turbulent flow*	*Fourier's law of heat conduction and Thermal conductivity*	*Steady – state molecular diffusion in fluids at rest and in laminar flow: molecular diffusion in gases.*
	SLO-2	*basis of calculations*	*Size analysis*	*incompressible and compressible, potential flow, Laminar and turbulent flow*	*Newton's law of cooling, Natural and forced*	*Molecular diffusion in gases: steady state diffusion of A through non diffusing B*
S-3	SLO-1	*Problem solving on Units and dimensions*	*Screen efficiency*	*Hydrostatic equilibrium and manometers*	*Steady-state conduction compound resistances in series- slab and cylinder.*	*Gas phase equimolal counter diffusion. Diffusion in Multicomponent gas mixtures*
	SLO-2	*Problem solving on Concentrations*	*Screen efficiency*	*Hydrostatic equilibrium and manometers*	*Steady-state conduction compound resistances in series- slab and cylinder.*	*Gas phase equimolal counter diffusion. Diffusion in Multicomponent gas mixtures*
S-4	SLO-1	*predicting P-V-T properties of gases using ideal gas law & Van der Waals equation*	*Filtration and its types – pressure and vacuum filtration*	*Newtonian and Non-Newtonian fluids: Newton's-law of viscosity*	*Steady-state conduction compound resistances in series- slab and cylinder.*	*Molecular diffusion in liquids: steady state diffusion of A through non diffusing B*
	SLO-2	*Calculation of density*	*Filtration and its types – pressure and vacuum filtration*	*Newtonian and Non-Newtonian fluids: Newton's-law of viscosity*	*Steady-state conduction compound resistances in series- slab and cylinder.*	*Molecular diffusion in liquids: steady state diffusion of A through non diffusing B*
S-5	SLO-1	*Basics of chemical equation and stoichiometry*	*Filters and its classification*	*Reynolds number and transition from laminar to turbulent flow*	*Problem solving on heat transfer rate*	*Liquid phase equimolal counter diffusion*
	SLO-2	*limiting reactant, excess reactant, conversion, selectivity and yield*	*Filters and its classification*	*Reynolds number and transition from laminar to turbulent flow*	*Problem solving on heat transfer rate*	*Liquid phase equimolal counter diffusion*
S-6	SLO-1	*Problem solving on Density calculations*	*Basics of Settling and sedimentation*	*Boundary layer concept*	*heat transfer coefficient and Overall heat transfer coefficient*	*Effect of temperature and pressure on diffusivity.*
	SLO-2	*Problem solving on Stoichiometry*	*Basics of Settling and sedimentation*	*Boundary layer concept*	*heat transfer coefficient and Overall heat transfer coefficient*	*Principles of drying, driers and freeze drying*

S-7	SLO-1	*Basic concepts involved in material balance calculations*	*Principles of agitation, Types of agitators*	*Friction factors*	*Problem solving on heat transfer coefficient*	*Various methods of distillation and extraction.*
	SLO-2	*Basic concepts of recycle, bypass and purge streams*	*Principles of agitation, Types of agitators*	*Friction factors*	*Problem solving on heat transfer coefficient*	*Various methods of distillation and extraction.*
S-8	SLO-1	*Problem solving on Material Balance - Mixing*	*Flow patterns: prevention of swirling- draft tubes*	*Drag & Lift forces, Terminal settling velocity*	*Heat transfer to fluids without phase change: Boiling and Condensation*	*Basic concept of leaching, adsorption,*
	SLO-2	*Problem solving on Material Balance - Mixing*	*Flow patterns: prevention of swirling- draft tubes*	*Drag & Lift forces, Terminal settling velocity*	*Heat transfer to fluids without phase change: Boiling and Condensation*	*Basic concept of leaching, adsorption,*
S-9	SLO-1	*Problem solving on Material Balance - Drying*	*Blending and Mixing- Mixers: types*	*Introduction to various types of flow metering devices*	*Basic concepts of radiation, examples and application*	*absorption and membrane separation process*
	SLO-2	*Problem solving on Material Balance - Drying*	*Blending and Mixing- Mixers: types*	*Introduction to various types of flow metering devices*	*Basic concepts of radiation, examples and application*	*absorption and membrane separation process*

Course Code	18CHO104T	Course Name	PROCESS PLANT SAFETY	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Familiarize the basics of Industrial safety management*
CLR-2 :	*Acquire knowledge on chemical plant safety*
CLR-3 :	*Impart knowledge on Industrial accidents, prevention and fire protection systems*
CLR-4 :	*Acquire knowledge on Hazard identification techniques*
CLR-5 :	*Expose industrial hygiene and Occupational health hazards, Safety legislation in chemical industries*
CLR-6 :	*Learning safety management , chemical plant safety, techniques of hazard identification, Industrial Hygiene, occupational Hazards and safety legislation in chemical industries*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO –3
CLO-1 :	*Know the basics of Industrial Safety Management.*	2	80	70	L	M	M			L	M		H	H		H	H	M	M
CLO-2 :	*Understand the various aspects of Chemical plant safety*	3	80	75	M	H				M	H	M	H	H		M	H	M	M
CLO-3 :	*Understand the various aspects of Industrial accidents and Fire safety*	3	80	75	L	M	M	M		H	H	M	H	H		M	H	M	M
CLO-4 :	*Able to use Hazard identification techniques for the prevention of industrial accidents*	3	85	80	M	M		M	M	M	H						H	M	M
CLO-5 :	*Know the Various aspect of industrial hygiene and Occupational Health hazards, Safety legislation in chemical industries*	3	80	75	L		M	M		L	H		H				H	L	L
CLO-6 :	*Will be able to prevent and control the accidents in chemical Industries by applying the acquired knowledge from Course Learning Rationale*	1	75	70	M	H	M	M	M	M	H	M	H	H		H	H	H	M

Duration (hour)		9	9	9	9	9
S1	SLO-1	*Importance of Safety consciousness in Indian Chemical Industries*	*Chemical process Industries - Siting and Layout of a Chemical plant*	*Definitions, accident causation theories, Classification, Causes, Costs , Principles of Accident prevention*	*Hazard analysis - Preliminary Hazard Analysis (PHA)*	*Concepts - Industrial and Occupational health hazards, Housekeeping, human factors and error, stress at work*
S2	SLO-1	*Development of Industrial Health and Safety*	*Classification of hazardous chemicals*	*Industrial accidents – Bhopal Gas tragedy, Chernobyl – case study*	*Detailed hazard analysis - FMEA*	*Role of trade unions in Industrial safety and health*
S3	SLO-1	*Development of Industrial Health and Safety - OSHA*	*Transportation of hazardous chemicals*	*Accident prevention technique - Plant and Chemical job safety analysis*	*Fault Tree Analysis*	*Personnel protective equipments –head protection, eye and face protection*
S4	SLO-1	*Safety Organization –Polices-Culture*	*Storage and handling of hazardous chemicals*	*Safety performance measurement tools - FR. SR, (FSI)*	*Hazard and operability (HAZOP) study*	*Personnel protective equipments –hand and foot protection*
S5	SLO-1	*Safety Organization – Planning- Promotion*	*Chemical reaction hazards and their control*	*Safety performance measurement tools- SafeT-Score, Accident rate per 1000 workers*	*Hazard and operability (HAZOP) study*	*Personnel protective equipments –body protection and respirators*
S6	SLO-1	*Safety Organization – Inspection –Rules*	*High pressure - High temperature operations – Case studies*	*Disabling injury index, Accident Compensation Statutes Disabling injury index, Accident Compensation Statutes*	*Human Error Analysis*	*Safety legislation in India, Factories act 1948*
S7	SLO-1	*Safety Organization –Responsibility – Supervision*	*Emergency preparation: On-site and Offsite*	*Accident Investigation reporting and Analysis*	*Risk Analysis*	*Indian boilers act and regulations, Indian electricity act and rules*
S8	SLO-1	*Effective Safety Education and Training*	*Safe guarding of Machines – Ergonomics*	*Conditions -Fire triangle- Classification of fires*	*Risk assessment*	*Indian explosives act and rules, Mines act, Petroleum act and rules*
S9	SLO-1	*Communication at various levels of production and operation, Safety slogans*	*Safe guarding of Machines – Ergonomics*	*Common causes of industrial fires, Fire protection systems- prevention*	*Dow (Index) Fire and Explosion Index*	*Environmental protection act.*

Course Code	18CHO106T	Course Name	INTRODUCTION TO PROTEOMICS	Course Category	O	OPEN ELECTIVE	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards		Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce protein structure and function*
CLR-2 :	*Understand the methodologies utilized for protein isolation*
CLR-3 :	*Understand the analytical methodologies available for protein identification*
CLR-4 :	*Have an insight into methods available for the identification of proteins in a high-through-put manner*
CLR-5 :	*Apply a scientific approach to proteomics investigation using bioinformatics tools*
CLR-6 :	*Introduce various combination of sample preparation and analytical methodologies for proteomics investigation*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO –3
CLO-1 :	*Understand the significance of protein structure and function from a physiological context*	*2*	*80*	*70*	*L*	*M*	*M*	*M*	*L*							*M*	*H*	*M*	*M*
CLO-2 :	*Design a sequence of methodologies for desired protein isolation from complex matrices*	*3*	*80*	*75*	*L*	*M*	*M*	*M*	*M*							*M*	*H*	*M*	*M*
CLO-3 :	*Design one or more analytical methodologies in series or parallel for protein identification*	*3*	*80*	*75*	*L*	*M*	*M*	*M*	*H*							*M*	*H*	*M*	*M*
CLO-4 :	*Conceive high-throughput screening methodology for identification of proteins in complex mixtures*	*3*	*85*	*80*	*L*	*M*	*M*	*M*	*H*	*L*	*L*					*M*	*H*	*M*	*M*
CLO-5 :	*Utilize proteomics methodologies aided by bioinformatics tools for protein characterization*	*3*	*80*	*75*	*L*	*M*	*H*	*H*	*H*	*L*	*L*	*L*	*M*	*M*		*H*	*H*	*H*	*H*
CLO-6 :	*Design a sample preparation and analytical methodology scheme for a proteomics investigation*	*1*	*75*	*70*	*M*	*H*	*H*	*H*	*H*	*L*	*L*	*L*	*H*	*H*		*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S1	SLO-1	*An Overview of Proteomics*	*Strategies for Protein Identification*	*MS- principles*	*Protein structures*	*Protein Chips and Functional Proteomics*
S2	SLO-1	*Need, scope and challenges of proteomics*	*Strategies for Protein Identification*	*MS- principles*	*Techniques for solving protein structures*	*Protein Chips and Functional Proteomics*
S3	SLO-1	*Strategies for Protein separation*	*Strategies for Protein Identification*	*Instrumentation and applications in proteomics*	*Techniques for solving protein structures*	*Protein Chips and Functional Proteomics*
S4	SLO-1	*2D gel electrophoresis- principle and applications*	*Protein Identification with antibodies*	*Instrumentation and applications in proteomics*	*Techniques for solving protein structures*	*Applications of Proteomics in disease diagnosis*
S5	SLO-1	*2D gel electrophoresis- principle and applications*	*Protein Identification with antibodies*	*Strategies for Protein Quantization*	*Protein interactions- principles and methods to study them*	*Applications of Proteomics in disease diagnosis*
S6	SLO-1	*Liquid chromatography- principle and applications*	*Protein Identification with antibodies*	*Quantitative proteomics with standard 2D gels Multiplexed proteomics*	*Protein interactions- principles and methods to study them*	*Applications of Proteomics in disease diagnosis*
S7	SLO-1	*Liquid chromatography- principle and applications*	*Protein sequence determination by chemical degradation*	*Quantitative proteomics with standard 2D gels Multiplexed proteomics*	*Protein interactions- principles and methods to study them*	*Drug development and plant biotechnology*
S8	SLO-1	*Multidimensional liquid chromatography*	*Protein sequence determination by chemical degradation*	*Quantitative with mass spectrometry*	*Protein Modification in Proteomics.*	*Drug development and plant biotechnology*
S9	SLO-1	*Multidimensional liquid chromatography*	*Protein sequence determination by chemical degradation*	*Quantitative with mass spectrometry*	*Protein Modification in Proteomics.*	*Drug development and plant biotechnology*

Course Code	18CEO301T	Course Name	ADVANCED DESIGN OF RCC	Course Category	O	Open Elective Courses	L	T	P	C
							2	1	0	3

Pre-requisite Courses	18CEC207T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	IS 456-2000, SP 16 Charts, IS 3370 Part1,2,3,4, IS 1343-2012, IRC 3-1983, IRC:83-2018 (Part II)		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Analyse the retaining wall with the effect of active and passive pressure*
CLR-2 :	*Design of Flat Slab using Direct Design Method as per IS456-2000*
CLR-3 :	*Utilize the concept the of yield line theory*
CLR-4 :	*Design Water Tanks using Working Stress Method*
CLR-5 :	*Utilize concepts of ILD to analyse the RCC bridge for simple spans*
CLR-6 :	*Analyse prestressed concrete sections for flexure*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Identify the effect of active and passive pressure influencing the behavior in design of retaining walls*	3	80	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	H
CLO-2 :	*Analyse the behavior of Flat slab in flexure and punching shear*	3	85	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	H
CLO-3 :	*Apply yield line theory to the design of slabs*	3	75	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	H
CLO-4 :	*Analyse the behavior of underground and elevated water tanks*	3	90	80	H	H	-	-	-	-	-	-	-	-	-	-	H	-	M
CLO-5 :	*Analyseand design of RCC Bridge and Culvert using IRC loadings*	3	85	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	M
CLO-6 :	*Apply the strength and load balancing concept to the design of beams in flexure*	3	80	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*RETAINING WALLS Introduction to Retaining Walls*	*FLAT SLABS Introduction to Flat Slab*	*RCC WATER TANKS Introduction to Water Retaining Structures*	*DESIGN OF BRIDGES Types of bridges and culverts*	*PRESTRESSED CONCRETE STRUCTURES Basic concepts*
	SLO-2	*Design of Retaining Walls, Proportioning of the size of the wall*	*Advantages of Flat Slab*	*Design of Rectangular and Circular Water Tanks*	*Simply supported girder bridges, Balanced cantilever and their behavior*	*Principle of prestressing methods and materials required*
S-2	SLO-1	*Design for Overturning moment*	*Design of Flat slab, Proportioning*	*Design Problems – Circular slabs subjected to direct tension*	*Design Problems*	*Stress and Strength concept and Load balancing concept*
	SLO-2	*Design for Sliding and provision for shear key*	*Design for Bending*	*Design Problems – Contd.,*	*Introduction to IRC Loading, impact loading, Codal Provisions for design*	*Design Problems*
S-3	SLO-1	*Tutorials*	*Tutorials*	*Tutorials*	*Tutorials*	*Tutorials*
	SLO-2	*Tutorials*	*Tutorials*	*Tutorials*	*Tutorials*	*Tutorials*
S-4	SLO-1	*Design of Toe and Heel Slab of Retaining Wall*	*Thickness of flat slab based on punching shear*	*Design Problems*	*Design of slab culvert for Class AA, 70R, Class A*	*Analysis of sections subjected to flexure*
	SLO-2	*Design of Stem of Retaining Wall*	*Design Problems*	*Design of Underground Water Tanks*	*Design Problems – Design of slabs based on IRC Codes*	*Design Problems – Beams subjected to eccentric prestressing*
S-5	SLO-1	*Introduction to Counterfort Retaining Walls*	*INTRODUCTION TO YIELD LINE THEORY*	*Design Problems – Design of Rectangular Water tanks (L/B >2)*	*Design Problems – Contd.,*	*Design Problems – Contd.,*
	SLO-2	*Design of Counterfort Retaining Walls, Proportioning of the size of the wall and Counterfort*	*Design of Square and Rectangular Slabs*	*Design Problems*	*Design Problems*	*Losses of prestress using Simple cable profile*
S-6	SLO-1	*Tutorials*	*Tutorials - Design of Square slabs for simply supported condition*	*Tutorials - Design of Rectangular Water tanks (L/B < 2)*	*Tutorials*	*Tutorials – Losses due to elastic deformation of concrete*
	SLO-2	*Tutorials*	*Tutorials – Contd.,*	*Tutorials*	*Tutorials*	*Tutorials – Contd.,*

S-7	SLO-1	*Design for Overturning moment*	*Design of Square slabs for fixed support condition*	*Design of overhead water tank and Intze type tanks*	*Loads on T-beam girder bridges using Courbans theory*	*Design of beams subjected to losses in shrinkage in concrete*
	SLO-2	*Design for Sliding and provision for shear key*	*Check for bending and shear*	*Design Problems*	*Design Problems*	*Design Problems – Contd.,*
S-8	SLO-1	*Design of Toe and Heel Slab of Counterfort Retaining Wall*	*Design of Circular and Triangular Slabs*	*Design of Staging with columns and beams, Shaft and conventional types*	*Drawing ILD diagram for simple spans and calculation of design Bending moment, shear force for class AA and class A loading*	*Introduction to design of beams*
	SLO-2	*Design of Stem of Counterfort Retaining Wall*	*Design of Circular and Triangular Slabs*	*Design Problems*	*Design Problems*	*Design of beams based on IS 1343.*
S-9	SLO-1	*Tutorials*	*Tutorials - Design of triangular slabs for different edge conditions*	*Tutorials*	*Tutorials*	*Tutorials*
	SLO-2	*Tutorials*	*Tutorials – Contd.,*	*Tutorials*	*Tutorials*	*Tutorials*

							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basic principles of economies*
CLR-2 :	*Realize the type of firm and market structure*
CLR-3 :	*Understand the concept of Indian economy*
CLR-4 :	*Apply the concept of estimation*
CLR-5 :	*Realize the types of construction specification*
CLR-6 :	*Analyze rate analysis*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Identify the various economic policies*	3	85	75	H	H	-	-	-	H	-	-	-	-	-	-	H	-	-
CLO-2 :	*Identify the forms of market structure and organization*	2	85	75	H	H	-	-	-	H	-	-	-	-	-	-	H	-	-
CLO-3 :	*Apply the concepts of time value of money*	2	85	75	H	H	-	-	-	-	-	-	-	-	H	-	H	-	-
CLO-4 :	*Determine the different types of estimation*	2	85	75	H	H	-	M	-	-	-	-	-	-	-	-	H	-	-
CLO-5 :	*Develop the specification for different types of buildings*	3	85	75	H	H	-	M	-	-	-	-	H	-	-	-	H	-	-
CLO-6 :	*Identify the factors affecting rate analysis*	3	85	75	H	H	-	M	-	-	-	-	H	-	-	-	H	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic Principles and Methodology of Economics.*	*Forms of organizations*	*ROI Problem*	*Present and future worth of cash flows*	*Rate analysis-Importance*
	SLO-2	*Demand/supply*	*Cost & Cost Control –Techniques*	*Payback Period*		*Rate analysis-necessity*
S-2	SLO-1	*Government Policies and Application*	*Types of Costs*	*Payback Period Problem*	*Structure of productive activity*	*Factors affecting rate analysis*
	SLO-2	*Basic Macro-economic Concepts*	*Lifecycle costs*	*Bid price*	*Urbanization*	*Equipment productivity*
S-3	SLO-1 SLO-2	*Drawings to read and understand - Autocad*	*Earthwork estimation (Foundation)*	*Estimation of finishes (Interior and Exterior)*	*Estimation of MEP works*	*Rate analysis – Concrete works*
S-4	SLO-1 SLO-2	*Drawings to read and understand - Autocad*	*Earthwork estimation (Foundation)*	*Estimation of finishes (Interior and Exterior)*	*Estimation of MEP works*	*Rate analysis – Concrete works*
S-5	SLO-1	*GDP/GNP/NI/Disposable income*	*Break even Analysis*	*Evaluation of bids*	*Indian economy - plans*	*Labour productivity*
	SLO-2	*Public sector economics –welfare*			*Post reform Growth*	*Factors affecting productivity*
S-6	SLO-1	*Public sector economics – externalities, labour market*	*Budgets*	*RA Bills*	*Specifications-Types, requirements and importance*	*Measurements for various items*
	SLO-2	*Components of Monetary and Financial System*	*Capital Budgeting*		*detailed specifications for buildings*	*Introduction to the process of Estimation*
S-7	SLO-1 SLO-2	*Quantity estimation basics - Excel*	*Estimation of concrete works (Sub and super structure)*	*Estimation of bridges*	*Reinforcement calculations*	*Rate analysis – Masonry works*
S-8	SLO-1 SLO-2	*Earthwork estimation (Embankments & Trenches)*	*Estimation of masonry works*	*Estimation of culverts*	*BIM Quantity Takeoff*	*Rate analysis - Plastering*
S-9	SLO-1	*Central bank –monetary aggregates, Commercial banks & their functions*	*Application of Linear Programming*	*Final bills*	*Detailed specifications for roads, Detailed specifications for minor bridges*	*IS standards for quantity estimation, IS standards for quantity estimation - recommendations*
	SLO-2	*Capital and Debt Markets, Elements of Business/Managerial Economics*	*Investment Analysis – NPV Problem*	*Depreciation and Time value of money*	*Detailed specifications for industrial structures, Rate analysis-Purpose*	*Drawings – Architectural, Drawings – Structural and MEP*

CLO-2 :	*Study the various Hydrographic Surveying Techniques.*	2	85	75	H	-	-	-	-	-	M	-	L	-	-	H	H	-	-
CLO-3 :	*Acquire knowledge about EDM and Total Station*	2	80	75	H	-	-	-	-	-	H	-	L	-	-	H	H	-	-
CLO-4 :	*Survey Using GPS.*	2	85	80	H	-	-	-	-	-	H	-	L	-	-	H	H	-	-
CLO-5 :	*Study the Concept of Aerial Photo Interpretation.*	2	85	75	H	H	H	M	H	-	H	-	M	-	-	H	H	-	-
CLO-6 :	*learn the importance and different aspects of remote sensing*	2	80	75	H	H	H	H	H	-	H	-	M	-	-	H	H	-	-

Duration (hour)		09	09	09	09	09
S-1	SLO-1	*TRIANGULATION AND TRILATERATION*	*HYDROGRAPHIC SURVEYING*	*EDM, TOTAL STATION, GPS SURVEYING*	*PHOTOGRAMMETRY SURVEYING*	*REMOTE SENSING*
	SLO-2	*Horizontal Vertical control - methods Triangulation – Primary Secondary and Tertiary Triangulation*	*Methods of Hydrographic Surveying Establishment of Horizontal control Tide Gauges-*	*Infrared EDM & Microwave system- Measuring DDM-ODM- EDM Electro-optical system- Measuring& Working Principle,*	*Introduction - Photogrammetry in Civil engineering History of Photogrammetry ,*	*Introduction , Historical Background Components of Remote sensing*
S-2	SLO-1	*Base line –Figure and Layout of base lines*	*Recording and non recording Type, Staff, float and weight gauge, Self registering Tide Gauge*	*Sources of error in EDM ,Total station-Types*	*Terminology in Photogrammetry- Photo theodolite,*	*Electromagnetic Radiation (EMR) Ideal remote sensing system*
	SLO-2	*Base line extension- By Prolongation By Double Sigjhting Method*	*Equipments of Sounding-Shore signal and buoys*	*Measuring and working principle,*	*Terrestrial and Aerial photographs - vertical and oblique photograph*	*Wave length and Frequency of Different bands*
S-3	SLO-1	*Tacheometric Surveying--Constants of Tacheometer*	*Setting out simple circular curve --Single Theodolite Method*	*Total Station Surveying - Measurements of Distances and angles,*	*Total Station Surveying - Measurements of Traversing,*	*Identification of aerial photographs*
	SLO-2	*Tacheometric Surveying--Constants of Tacheometer*	*Setting out simple circular curve --Single Theodolite Method*	*Total Station Surveying - Measurements of Distances and angles,*	*Total Station Surveying - Measurements of Traversing,*	*Identification of aerial photographs*
S-4	SLO-1	*Tacheometric Surveying--Stadia Tacheometry*	*Setting out simple circular curve --Double Theodolite Method*	*Total Station Surveying- Measurements of, Slope*	*GPS Surveying –Measurement of Coordinates*	*Aerial Photo Interpretation Using Photo Interpretation Keys*
	SLO-2	*Tacheometric Surveying--Stadia Tacheometry*	*Setting out simple circular curve --Double Theodolite Method*	*Total Station Surveying- Measurements of, Slope*	*GPS Surveying –Measurement of Coordinates*	*Aerial Photo Interpretation Using Photo Interpretation Keys*
S-5	SLO-1	*Baseline measurement- instruments and accessories Wheelers baseline apparatus*	*Sounding Equipment, Angle measuring instruments Location of Sounding-*	*Coordinate system-Classification, GPS - Fundamentals*	*Scale of an aerial photograph Types of scales*	*Interactions with atmosphere & Earth features*
	SLO-2	*Jardein's Method & Hunter's short base Method*	*Observation from the shore , boat, both shore and boat*	*Space ,Control & User Segments of GPS*	*Overlapping of Aerial Photographs,*	*Platform, Sensors Definition, Types Airborne Platforms*

S6	SLO-1	*Correction Determination of intervisibility of triangulation stations*	*Location by stretched wire across a river*	*Errors in GPS Surveying*	*Measurement of Scale, Flight Planning,*	*Geostationary and Sunsynchronuous Orbits*
	SLO-2	*Axial Signal Correction-Eye and Object Correction*	*Plotting of Sounding - Mechanical method ,*	*GPS Surveying Methods*	*Photo interpretation keys*	*Active and passive remote sensing*
S-7	SLO-1	*Tacheometric Surveying--Tangential Tacheometer*	*Setting out simple circular curve --Single Theodolite Method*	*Total Station Surveying- Measurements of distances &Height*	*Use of Stereoscope for 3-D Viewing*	*Tracing of Landuse and land cover from image*
	SLO-2	*Tacheometric Surveying--Tangential Tacheometer*	*Setting out simple circular curve --Single Theodolite Method*	*Total Station Surveying- Measurements of distances &Height*	*Use of Stereoscope for 3-D Viewing*	*Tracing of Landuse and land cover from image*
S-8	SLO-1	*Tacheometric Surveying--Subtense bar method*	*Contouring*	*Total Station Surveying - Measurements of Traversing,*	*Height determination from a Stereo pair using the Parallax bar*	*Tracing of Landuse and land cover from image*
	SLO-2	*Tacheometric Surveying--Subtense bar method*	*Contouring*	*Total Station Surveying - Measurements of Traversing,*	*Height determination from a Stereo pair using the Parallax bar*	*Tracing of Landuse and land cover from image*
S-9	SLO-1	*Satellite Station Reduction to Centre*	*Graphical Method ,Analytical Method Stream Gauge-Area velocity Method*	*Kinematic Surveying*	*Stereoscopy-Stereoscope and Stereo-photographs*	*Spectral –Radiometric &Temporal resolution Microwave remote sensing*
	SLO-2	*Signals –Luminous and Non-luminous Signals Towers*	*Velocity Measurement using Floats &Current meter Weir method, Chemical Method*	*Static Surveying*	*Photo interpretation keys, Applications of aerial Photos*	*Scanners - Radiometer - RADAR, Applications of Remote Sensing*

Course Code	18CEO304T	Course Name	EMERGING TRENDS IN STEEL DESIGN	Course Category	E	Open Elective Course	L	T	P	C
							2	1	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards		IS : 800-2007, Steel Tables(Revised), IS : 875-Part 1,2 & 3	

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Identify the characteristics of steel connection types and different configurations*
CLR-2 :	*Identifying structural steel connections and appropriate design*
CLR-3 :	*Identify and solve beam-column design, plate and gantry girder*
CLR-4 :	*Solve the basic column base problems and to design the base plates*
CLR-5 :	*Analyze the basic concepts roof types and to design connections for different roof models*
CLR-6 :	*Identify pre-engineered building components, classification of towers and loading combinations*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Accrue the knowledge of steel connections, beam-column joints and plates*	2	85	75	H	M	M	L	-	-	-	-	L	-	-	M	L	-	-
CLO-2 :	*Analyze and Design eccentric and moment resistant connections*	2	85	75	H	H	M	M	-	-	-	-	L	-	-	M	L	-	-
CLO-3 :	*Analyze and Design beam-columns, plate girder and gantry girder*	2	85	75	H	H	M	M	-	-	-	-	-	-	-	M	-	-	-
CLO-4 :	*Accrue the knowledge on Design of column bases and eccentrically loaded base plate*	2	85	75	H	H	M	M	-	-	-	-	L	-	-	M	L	-	-
CLO-5 :	*Analyze and design roof truss and connections of industrial structures*	2	85	75	H	H	M	M	-	-	-	-	-	-	-	M	-	-	-
CLO-6 :	*Accrue comprehensive knowledge in Understanding design principle of pre-engineered buildings and towers*	2	85	75	H	H	M	M	-	-	-	-	L	-	-	M	L	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Steel Design*	*Introduction to Beam-Column*	*Introduction to column bases*	*Structural frames and functions of components*	*Components of pre-engineered buildings*
	SLO-2	*Brief notes on emerging trends in structural steel design*	*Beam-Column configuration*	*Introduction to footing*	*Types of roof trusses for different spans*	*Structural behavior of pre-engineered buildings*
S-2	SLO-1	*Connection types*	*Behaviour of short beam-columns*	*Types of footings*	*Estimation of dead loads, live loads, wind loads*	*Pre-engineered buildings – Design aspects*
	SLO-2	*Connection configuration*	*Behaviour of long beam-columns*	*Design of Slabs*	*Load combinations*	*Pre-engineered buildings – Design aspects*
S-3	SLO-1	*Simple connections*	*Numerical problems on beam-column*	*Design of Slabs – Numerical problems*	*Analysis of roof truss - Principles*	*Connection design - Concept*
	SLO-2	*Simple connection configuration*	*Numerical problems on beam-column*	*Design of Slabs – Numerical problems*	*Analysis of roof truss*	*Connection design*
S-4	SLO-1 SLO-2	*Tutorial 1: Connections*	*Tutorial 3: Beam-Column design*	*Tutorial 5: Column bases, footings and slabs*	*Tutorial 7: Roof truss and load*	*Tutorial 9: Pre-engineered buildings components and connections*
S-5	SLO-1	*Semi-rigid connections*	*Interaction Formula*	*Design of gusseted plate*	*Design of roof truss - Concept*	*Introduction to Plate grider*
	SLO-2	*Semi-rigid connection configurations*	*Principles of Beam-Column*	*Numerical problems on gusseted plate*	*Design of roof truss*	*Components of a plate girder*
S-6	SLO-1	*Rigid Connections*	*Design approach to beam-column*	*Numerical problems on gusseted plate*	*Numerical problems on roof truss design*	*Various sections adopted for plate girders*
	SLO-2	*Rigid connection configurations*	*Design consideration*	*Design of base plate and connections*	*Numerical problems on roof truss design*	*Variations in girder section*
S-7	SLO-1	*Numerical problems on Simple configuration*	*Boundary constraints and restraints*	*Design of base plate and connections – Numerical problems*	*Design of Purlins - Concept*	*Design concept of plate girder*

	SLO-2	*Numerical problems on Simple configuration*	*Introduction to gantry girder*	*Design of base plate and connections – Numerical problems*	*Design of purlins*	*Design of plate girder*
S-8	SLO-1	*Tutorial 2: Connection numerical problems and applications*	*Tutorial 4: Gantry girder*	*Tutorial 6:Plates and connections*	*Tutorial 8: Roof truss and Purlins*	*Tutorial 10: Plate girder*
	SLO-2					
S-9	SLO-1	*Numerical problems on Semi-rigid and rigid configuration*	*Gantry girder - Principles*	*Design applications of gusseted plates*	*Numerical problems on purlins*	*Plate girder - Principles*
	SLO-2	*Numerical problems on Semi-rigid and rigid configuration*	*Gantry girder – Design Concepts*	*Design applications of base plate*	*Numerical problems on purlins*	*Plate girder – Design Concepts*

Course Code	18CEO401T	Course Name	ADVANCED PRESTRESSED CONCRETE STRUCTURES	Course Category	O	Open Elective Course	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	IS 1343: 2012		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Know and utilize the concepts of prestress concrete to analyse prestress concrete sections*
CLR-2 :	*Understand about the importance of short and long term deflections and transfer of prestressing by bond*
CLR-3 :	*Understand about composite section under flexure and shear*
CLR-4 :	*Know about the process of design of pipes, piles and pavements*
CLR-5 :	*Understand to analyzefolded plates and shell*
CLR-6 :	*Make them familiar on continuous beam and concordant cable*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Analyze the prestress concrete sections using different concepts*	*3*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	*H*
CLO-2 :	*Determine short and long term deflections and bond stress in prestressed concrete members*	*3*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	*H*
CLO-3 :	*Determinethe flexural and shear strength of prestressed composite section*	*3*	*75*	*75*	*H*	*H*	-	*H*	-	-	-	-	-	-	-	-	*H*	-	*H*
CLO-4 :	*Design the cylinder and non-cylinder pipe, piles and pavements*	*3*	*90*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	*H*
CLO-5 :	*Design folded plates and shell*	*3*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	*H*
CLO-6 :	*Analyze primary, secondary and resultant moments on continuous beam and identify the concordant cable*	*3*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*PRESTRESSED CONCRETE Introduction - Basic concept – Principle of prestressing – Materials.*	*DEFLECTIONS Reasons to control deflections – Factors influencing deflections – short term deflection – uncracked section - Mohr's theorems*	*COMPOSITE CONSTRUCTION Introduction – composite action - advantages – types of composite construction.*	*DESIGN OF PIPES Design of non-cylinder pipes – losses of prestress.*	*FOLDED PLATES Introduction - types of folded plates –slab action – plate action – Names of methods for analysis.*
	SLO-2	*Forms of steel – systems of prestressing*		*Methods of construction – propped – unpropped construction.*		
S-2	SLO-1	*Types of prestressing – uses of prestressed concrete.*	*Deflection due to different cable profiles*	*Analysis of stresses*	*Example*	*Design example*
	SLO-2	*Materials – concrete strength limitation – requirements of steel for prestressed concrete.*	*Example*	*Example*		
S-3	SLO-1	*Analysis – basic assumptions.*	*Example*	*Examples*	*Example*	*Design example*
	SLO-2	*Concentric and eccentric tendons – resultant stresses – at transfer – at service. Concepts of prestressing – rectangle – symmetrical I-section only.*				
S-4	SLO-1	*Stress concept*	*Prediction of long term deflections - Example*	*Flexural strength of composite section.*	*Design of cylinder pipes Design of shear reinforcement*	*SHELL Introduction –advantages – methods of prestressing – design.*
	SLO-2			*Example*		
S-5	SLO-1	*Stress concept – examples*	*Examples*	*Example*	*Example*	*Design example*
	SLO-2					
S-6	SLO-1	*Stress concept - examples*	*Examples*	*Example*	*DESIGN OF PILES*	*Design example*
	SLO-2					

					Advantages – driving stresses – service load stresses - reinforcements.	
S-7	SLO-1 SLO-2	*Strength concept - examples*	*BOND* *Transmission of prestressing force - transmission length.*	*Shear strength of composite section.*	*Example*	*CONTINUOUS BEAMS* *Advantages – effects of prestressing - primary moment – secondary moment – resultant moment – pressure line.*
S-8	SLO-1 SLO-2	*Load balancing concept – cable profile – reaction – equivalent loads.*	*Example*	*Example*	*DESIGN OF PAVEMENTS* *General features – design of prestress in pavements.*	*Use of theorem of three moments - example*
S-9	SLO-1 SLO-2	*Load balancing concept – examples.*	*Bond stress – example.*	*Example*	*Example*	*Concordant cable profile – examples.*

Course Code	18CEO402T	Course Name	BRIDGE ENGINEERING	Course Category	O	Open Elective Course	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18CEC207T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	IS 456 : 2000, IRC 3-1983, IRC 112:2011, IRC 22: 2015, IRC:83-2018 (Part II)		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Comprehend the principles of bridge engineering*
CLR-2 :	*Acquire knowledge on the various types of IRC (Indian Road Congress) loads*
CLR-3 :	*Understand and evaluate the internal forces due to moving loads*
CLR-4 :	*Get familiarized with the design principles of different types of RCC bridges*
CLR-5 :	*Understand the principles of design of bridge substructure*
CLR-6 :	*Determine the forces in elastomeric bearings.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO - 3
CLO-1 :	*Choose the most appropriate type of bridge for the given conditions*	3	75	60	H	H	-	H	-	-	L	-	-	-	-	L	H	-	-
CLO-2 :	*Calculate the functional dimensions of a bridge across a waterway*	3	75	60	H	H	-	H	-	-	-	-	-	-	-	L	H	-	-
CLO-3 :	*Design slab type and girder type RCC bridges*	3	90	85	H	H	L	H	-	-	-	-	-	-	-	L	H	-	-
CLO-4 :	*Calculate the design forces on substructure*	3	85	80	H	H	L	H	-	-	-	-	-	-	-	L	H	-	-
CLO-5 :	*Design abutments and bridge foundations*	3	75	70	H	H	L	H	-	-	-	-	-	-	-	L	H	-	-
CLO-6 :	*Design Elastomeric bearings*	3	75	60	H	H	L	H	-	-	-	-	-	-	-	L	H	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*FUNDAMENTALS OF BRIDGE ENGINEERING & IRC LOADS* *Hydraulic factors influencing bridge design*	*DESIGN OF RCC SLAB BRIDGES* *Span limitations*	*DESIGN OF RCC T BEAM BRIDGES* *Span limitations*	*DESIGN OF BRIDGE SUBSTRUCTURE* *Abutment – types*	*DESIGN OF BEARINGS* *Definition of bearings*
	SLO-2	*Calculation of linear waterway*	*Analysis of simply supported slab due to concentrated loads – introduction*	*Configuration – spacing of T beams , end overhang*	*Forces affecting the stability of abutments*	*Forces on bearing*
S-2	SLO-1	*Effect of bridge on river regime*	*Effective width method for slab supported on opposite edges only*	*Introduction to Pigeauds method - deck slab supported on T beams*	*Problem solving to determine the stability of abutments*	*Types of bearings*
	SLO-2	*Economic span of bridge*	*Span-wise dispersion*	*Dispersed dimensions of wheel over the slab*	*Piers – types of piers*	*Basis for selection of bearings*
S-3	SLO-1	*Calculation of scour depth*	*Width-wise dispersion*	*Computation of bending moment using the curves for centrally placed wheel load*	*Loads on piers*	*Types of elastomeric bearings*
	SLO-2	*Design loads – IRC Class AA Class A*	*Analysis for bending*	*Design principles for longitudinal T beam girder – Courbon's theory*	*Analysis of piers*	*Behavior of elastomeric bearings under loads*
S-4	SLO-1	*Design loads – IRC Class A and B*	*Analysis for shear*	*Understanding the various terms in the formula and its application*	*Problem solving – preliminary dimensions*	*Dimensions of elastomeric bearings as per IRC: 82*
	SLO-2	*Impact effect*	*Design of slab bridge – computation of dead loads*	*Design of T beam bridge – preliminary dimensions – Class AA trackedload*	*Determination final stresses in the piers*	*Vertical stiffness – shape factor*
S-5	SLO-1	*Longitudinal forces*	*Positioning of IRC Class AA loads – tracked*	*Design of cantilever span*	*Bridge foundations – types*	*Thickness of bearing*
	SLO-2	*Centrifugal forces*	*Analysis for maximum bending moment & Shear force*	*Determination of maximum bending moment in the interior span of the deck slab – Pigeaud's method*	*Well foundations – types*	*Stresses on elastomeric bearings*
S-6	SLO-1	*Types of bridges – suitability of different types of bridges for various spans - slab bridges*	*Positioning of IRC Class AA loads – wheeled*	*Design of deck slab using limit state method*	*Components of well foundations*	*Slip in bearing*

	SLO-2	*Girder bridges*	*Analysis for maximum bending moment & Shear force*	*Analysis of longitudinal girder – dead loads bending and shear*	*Design of well foundations – working stress method*	*Shear deformation in bearing*
S-7	SLO-1	*Continuous bridges – precautions from settlement considerations*	*Positioning of IRC Class A loads*	*Moving loads – bending*	*Pile foundations – pile groups*	*Stability of bearing*
	SLO-2	*Balanced double cantilever bridges*	*Analysis for maximum bending moment & Shear force*	*Moving loads – shear*	*Design principles of pile foundation*	*Uplift at the bearing*
S-8	SLO-1	*Arch bridges*	*Design using Limit state method - for bending moment*	*Computing the design bending and shear forces*	*Design forces*	*Influence of steel plates in the bearing*
	SLO-2	*Fundamentals of analysis using moving loads*	*Design for shear*	*Design of girder using limit state method – bending*	*Design using working stress method*	*Design of bearing – input loads*
S-9	SLO-1	*Determination of absolute maximum reaction*	*Detailing of reinforcement*	*Design for shear*	*Structural detailing*	*Design of bearing for stresses*
	SLO-2	*Determination of absolute maximum shear and bending moment due to moving loads*	*Sketching the cross section to show structural details*	*Detailing with sketches*	*Sketching the cross section to show structural details*	*Check for deformation*

Learning Resources	1. *Johnson Victor .D, "Essentials Of Bridge Engineering", Oxford University Press, Sixth edition, 2018* 2. *Jagadeesh.T.R, Jayaram .M.A, "Design Of Bridge Structures", Prentice – Hall of India Pvt. Course Offering Department	Civil Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Learning of basics of computer programming using C, Java, Python*																		
CLR-2 :	*Description of basic syntax of C, Java, Python programming*																		
CLR-3 :	*Description of Data types, variables and key words*																		
CLR-4 :	*Illustrate the use of reserved words, operators*																		
CLR-5 :	*Understand the need of using statements, Loops in programming*																		
CLR-6 :	*Knowing about numbers, decisions*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understanding of C, Java, Python languages*	*2*	*85*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	-
CLO-2 :	*Writing simple programs by using C, Java, Python programming languages*	*3*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	-
CLO-3 :	*Programming by using data types, variables and key words*	*3*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	-
CLO-4 :	*Express proficiency in using of reserved words and operators*	*2*	*85*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	-
CLO-5 :	*Identify the operations is using statements, loops in programming*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	-
CLO-6 :	*Expertise in making decisions and in using numbers for operation*	*3*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview*	*Data types*	*C programming reserved words*	*If..else statement*	*Loops in Python* *Loops in C?*
	SLO-2	*Introduction to computer program*	*C and Java Data types*	*Java programming reserved words*	*If… else…if statement (if..elseif..else)*	*Numbers*
S-2	SLO-1	*Introduction to computer programming*	*Python Data types*	*Python programming reserved words*	*The switch statement*	*Math operation on Numbers*
	SLO-2	*Uses of computer programs (Advantages of Computer Programs)*	*Variables*	*Operators*	*Decisions in Java, Python (Decisions in C, Java, Python)*	*Numbers in Java, Python*
S-3	SLO-1	*Lab Session 1: Understanding of Computer Hardware and programming environment of C, Java and python Languages.*	*Lab Session 3: Initialization of data types in C, Java and Python .*	*Lab Session 5: Demonstrate the use of reserve words in C, Java, and Python*	*Lab Session 7: Develop a program using Decision statement.*	*Lab Session 9: Develop a program to solve computational problems using Math Operators.*
	SLO-2					
S-4	SLO-1					
	SLO-2					
S-5	SLO-1	*Algorithm*	*Creating variables*	*Arithmetic operators*	*Loops*	*Characters*
	SLO-2	*Basics of Programming*	*Store values in variables*	*Relational operators*	*The while loop*	*Escape sequences*
S-6	SLO-1	*Text editor, Compiler*	*Access stored values in variables*	*Logical operators*	*The do..while loop*	*Characters in Java* *Characters in C?*
	SLO-2	*Interpreter, Online Compilation*	*Variables in Java (Variables in C, Java Family and Python)*	*Operators in Java (Operators in C, Java)*	*The break statement*	*Characters in Java*
S-7	SLO-1	*Lab Session 2: Understanding the concept of Algorithm, Flowchart, Naming the program files, Storing, Compilation, Execution and Debugging.*	*Lab Session 4: Initialization of variables in C, Java and Python .*	*Lab Session 6: Understand and Develop a program to solve simple computational problems using arithmetic operators, relational and logical operators.*	*Lab Session 8: Develop a program using loop statement.*	*Lab Session 10: Understanding of Escape and Character sequences*
	SLO-2					
S-8	SLO-1					
	SLO-2					
S-9	SLO-1	*Basic Syntax of C and Java programming*	*Variabes in Python*	*Operators in Pyhon*	*The continue statement*	*Characters in Python*
	SLO-2	*Simple programs in C*	*Key words*	*Decision statements*	*Loops in Java*	*Characters in Python*

Course Code	18CSO101T	Course Name	IT INFRASTRUCTURE MANAGEMENT	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science& Engg.	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the design factors and challenges in IT Infrastructure Management*
CLR-2 :	*Understand service delivery and associated processes*
CLR-3 :	*Understand storage and security management related to IT Infrastructure*
CLR-4 :	*Understand performance and tuning processes and associated case studies*
CLR-5 :	*Understand the suitable for combinations in information technology, business administration and electronic*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Be able to describe the business value and processes of ICT services in an organization and apply that knowledge and skill with initiative to a workplace scenario*	2	80	85	L	-	L	H	L	-	-	-	H	H	M	L	-	-	-
CLO-2 :	*Be able to investigate, critically analyze and evaluate the impact of new and current ICT services to an organization*	2	75	80	M	-	-	H	H	-	-	-	L	L	L	H	-	-	-
CLO-3 :	*Be able to describe how effective IT Infrastructure Management requires strategic planning with alignment from both the IT and business perspectives in an organization*	2	85	80	M	L	M	H	L	-	-	-	M	H	H	H	-	-	-
CLO-4 :	*Be able to demonstrate the technical and communications skills that contribute to the operation of ICT services in an organization*	2	80	75	M	L	L	L	-	-	-	-	H	H	M	L	-	-	-
CLO-5 :	*Be able to reflect critically on the role of an enterprise architect in an organization*	2	75	85	L	-	L	L	-	-	-	-	L	L	H	L	-	-	-
CLO-6 :	*Be able to synthesize the theoretical, technical and management issues that deliver ICT services to an organization*	2	80	85	H	-	L	L	L	-	-	-	L	L	H	L	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction – IT Infrastructure*	*Service Delivery And Support Process - Intro*	*Storage And Security Management - Intro*	*Performance And Tuning Process*	*Case Studies*
	SLO-2	*Challenges in IT Infrastructure Management*		*Backup and Storage, Archive & Retrieve*		
S-2	SLO-1	*Design Factors for IT Organizations*	*Service Level Management*	*Space Management*	*Introduction on tuning process*	*Asset Network Corporation case*
	SLO-2	*Design Factors for IT Infrastructures*				
S-3	SLO-1	*Determining customer's Requirements,*	*Financial Management*	*Hierarchical space management*	*Difference between Performance and Tuning processes and other Infrastructure processes*	*Radio Shack case*
	SLO-2	*Identifying System Components to manage*				
S-4	SLO-1	*Identifying System Components to*	*IT Service Continuity Management*	*Database & Application protection*	*Definitions*	*Business Process Outsourcing (BPO)*
	SLO-2	*manage*				*Infrastructure Planning and Management*
S-5	SLO-1	*Exist Processes, Data, applications,*	*Capacity Management*	*Disaster Recovery*	*Preferred characteristics*	*e-Commerce Business*
	SLO-2			*Bare Machine Recovery (BMR)*		*Infrastructure Planning and Management*
S-6	SLO-1	*Tools and their integration*	*Configuration Management*	*Data Retention*	*Performance and tuning applied to major resource environments*	*Enron case*
	SLO-2					
S-7	SLO-1	*IT Systems and Service*	*Service desk, Incident management*	*Computer Security*	*Assessing an Infrastructure's*	*Tycocase*
	SLO-2	*Management Process*		*Identity Management*	*performance and tuning process*	

S-8	SLO-1	Information systems Design Process	Availability management,	Access control system	Measuring and streamlining the P and T process	Worldcom case
	SLO-2					
S-9	SLO-1	IT Infrastructure Library	Release Management	Intrusion Detection	Performance tuning recommendations for data and event management	Analyze an information infrastructure – case study
	SLO-2

Duration (hour)		9	9	7	10	10
S-1	SLO-1	*Introduction: Introduction to mobile application development, trends.*	*GUI for Android: Introduction to activities life-cycle*	*Introduction to Different Data persistence schemes*	*Services :introduction to services– localservice,*	*Introduction to Location based services*
	SLO-2					
S-2	SLO-1	*introduction to various platforms,*	*Android v7 supportlibrary form API21 for lower versionsupport*	*Shared preferences*	*remote service and binding theservice,.*	*Google maps V2 services using Google API.*
	SLO-2					
S-3	SLO-1	*introduction to smart phones*	*Intent :intent object*	*File Handling se*	*the communication between serviceand activity, Intent Service*	*Animations and Graphics: Property Animation .*
	SLO-2					
S-4	SLO-1	*Android platform: Android platform,features and architecture,*	*intent filters ,addingcategories*	*Managing data using SQLite databa*	*MultiThreading: Handlers*	*View Animations, DrawableAnimations*
	SLO-2					
S-5	SLO-1	*versions ,comparison added features in each versions.*	*linking activities, user interfacedesign components*	*Content providers:*	*,AsyncTask*	*Media and Camera API: Working withvideo and audio inputs*
	SLO-2					
S-6	SLO-1	*ART(Android Runtime),ADB(AndroidDebug Bridge).*	*Views and View Groups: Basic views,picker views, adapter views, Menu, App Baretc, basics of screen design; differentlayouts.*	*user content provider*	*android network programming:HttpUrlConnection*	*Camera API*
	SLO-2					
S-7	SLO-1	*Development environment/IDE: Android studio and its working environment*	*App widgets.Lollipop Materialdesign: new themes, new widgets,Cardlayouts. RecyclerView*	*Android in build content providers*	*Connecting to REST-based and SOAP based Web services*	*Sensor programming: Motion sensors*
	SLO-2					
S-8	SLO-1	*gradle build system, emulator setup*	*Fragments: Introduction to activities,*		*Broad castreceivers:LocalBroadcastManager,Dynamic broadcast receiver*	*Position sensors, Environmental sensors.*
	SLO-2					
S-9	SLO-1	*Application anatomy: Applicationframework basics: resources layout, values,asset XML representation*	*activities life-cycle.*		*System Broadcast. PendingIntent, Notifications*	*Publishing Android Apps: Guide lines.*
	SLO-2					

		and generatedR.Javafile ,Android manifest file. Creating asimple application.				
S-10					*Telephony Manager:Sending SMS andmaking calls.*	*policies and process of uploading Apps toGoogle play*

Course Code	18CSO103T	Course Name	SYSTEM MODELING AND SIMULATION	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Select a suitable modeling method according to problem area and assignment, and justify their choice.*
CLR-2 :	*Formulate models of a system to describe the system on different levels of abstraction and from different viewpoints.*
CLR-3 :	*Learn and apply the continuous system simulation*
CLR-4 :	*Learn theory and probability concepts in simulation*
CLR-5 :	*Learn the simulation languages and tools*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Implement the appropriate modeling method for the given problem*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Explain the system abstraction in different levels*	*2*	*75*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Apply the models under continuous system simulation*	*2*	*85*	*80*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Analyze the probability concepts for simulating a system*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Apply tools to like GPSS and SIMSCRIPT to check model properties of a system*	*2*	*75*	*85*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to system modelling*	*Continuous System Simulation - Introduction*	*Probability Theory*	*Queueing Theory - Introduction*	*General description of GPSS and SIMSCRIPT*
S-2	SLO-1	*Modeling principles and concepts*	*Numerical solution of differential equations*	*Probability CONCEPTS IN SIMULATION -*	*Arrival Pattern distributions*	*programming in GPSS*
S-3	SLO-1	*Continuous systems and Discrete systems*	*Analog computers*	*Monte Carlo techniques*	*servicing times, queuing disciplines*	*Application of GPSS on specific problem*
S-4	SLO-1	*Modeling, types of models,subsystems*	*Hybrid computers*	*Application of Monte Carlo techniques*	*measure of queues*	*Simulation Programming Techniques*
S-5	SLO-1	*corporate model, system study..*	*continuous system simulation languages CSMP*	*Stochastic variables*	*mathematical solutions to queuing problems*	*Data Structures*
S-6	SLO-1	*System Simulation: Techniques,*	*system dynamic growth models,*	*probability functions*	*Discrete system simulation: Events*	*Implementation of activities*
S-7	SLO-1	*comparison of simulation and analytical methods*	*logistic curves*	*Random Number Generation algorithms*	*Generation of arrival pattern*	*Events and queues, event scanning*
S-8	SLO-1	*types of simulation, distributed log models*	*Illustration of Continuous System Simulation*	*Illustration of Probability concepts*	*Simulation programming tasks*	*Simulation algorithms in GPSS and SIMSCRIPT*
S-9	SLO-1	*cobweb models*	*Case Study*	*Case Study*	*Analysis of simulation output*	*Case Study*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning 1	2	3	PLO 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Be exposed to the context and operation of free and open source software (FOSS) communities and associated software projects.*																		
CLR-2 :	*Be familiar with participating in a FOSS project*																		
CLR-3 :	*Learn scripting language like Python or Perl, Ruby*																		
CLR-4 :	*Learn some important FOSS tools and techniques*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Install and run open-source operating systems.*	*3*	*80*	*70*	*L*	*H*	-	*H*	*L*	-	-	-	*L*	*L*	-	*H*	-	-	-
CLO-2 :	*Gather information about Free and Open Source Software projects from software releases and from sites on the internet.*	*3*	*85*	*75*	*M*	*H*	*L*	*M*	*L*	-	-	-	*M*	*L*	-	*H*	-	-	-
CLO-3 :	*Build and modify one or more Free and Open Source Software packages.*	*3*	*75*	*70*	*M*	*H*	*M*	*H*	*L*	-	-	-	*M*	*L*	-	*H*	-	-	-
CLO-4 :	*Contribute software to and interact with Free and Open Source Software development projects.*	*3*	*85*	*80*	*M*	*H*	*M*	*H*	*L*	-	-	-	*M*	*L*	-	*H*	-	-	-
CLO-5 :	*Identify and apply various linux commands*	*3*	*85*	*75*	*H*	*H*	*M*	*H*	*L*	-	-	-	*M*	*L*	-	*H*	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction-*	*Linux Installation and Hardware Configuration*	*Unix file system, Unix files, i-nodes and structure and file system relatedcomm ands*	*Usage of design Tools like Argo UML or equivalent*	*Open Source Software Development*
	SLO-2	*Open Source, Free Software, Free Software vs. Open Source software*				
S-2	SLO-1	*FOSS examples*	*Boot Process-The Linux Loader (LILO)*	*Shell Programming, Shell as command processor, Shell vari ables*	*Version Control Systems like Git or equivalent*	*Case Study – Libreoffice -Samba*
	SLO-2	*FOSS Characteristics*	*The Grand Unified Boot loader (GRUB)*			
S-3	SLO-1	*FOSS History, Examples*	*Dual-Booting Linux and other Operating System*	*Creating command substitution, Scripts*	*Bug Tracking Systems*	
	SLO-2	*FOSS Copyright*	*Boot-Time Kernel Options*			
S-4	SLO-1	*Guidelines for effectively working with FOSS community*	*Basic Linux Commands*	*Creating commands for Functions, Conditionals*	*Package Management Systems*	
	SLO-2					
S-5	SLO-1	*Benefits of Community based Software Development*	*Linux Commands for operations - redirection, pipes, filters, job control, changing ownership/permission of files/directories*	*Creating commands for loops*	*Introduction to Programming language using Python*	
	SLO-2					
S-6	SLO-1	*Requirements for being open, free software, open source software*	*Advanced Linux Commands like curl, wget, ftp, ssh and grep*	*Customizing environment*	*Basic commands, variables, Decision Making, Lists, Modules, strings, looping,*	*Case Studies : Apache, BSD, Linux, Mozilla (Firefox), Wikipedia, Joomla, GCC,*
	SLO-2					

S-7	SLO-1	*Four degrees of freedom*	*X Windows System Configuration*	*Shell scripting for system configurations*	*conditional statements, classes, Exceptions packages*	*Open Office*
	SLO-1					
S-8	SLO-1	*FOSS Licensing Models*	*System Administration*	*Shell scripting with functions and conditions*		
	SLO-2	*FOSS Licenses – GPL- AGPL- LGPL – FDL*	*Backup and Restore Procedures*			
S-9	SLO-1	*Implications*	*Strategies for keeping a Secure Server*	*Shell scripting with looping*		
	SLO-2

Course Code	18CSO105T	Course Name	ANDROID DEVELOPMENT	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basics of Android devices and Platform.*
CLR-2 :	*Acquire knowledge on basic building blocks of Android programming required for Application development*
CLR-3 :	*Gain knowledge to user interfaces used in android applications*
CLR-4 :	*Acquire knowledge on advanced application concepts like networking, Animations and Google Maps services etc*
CLR-5 :	*Develop and publish Android applications in to Android Market*
CLR-6 :	*Understand the knowledge of JSON and MQTT*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*To exposed to technology and business trends impacting Android Platform*	2	80	85	H	-	L	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Be competent with the characterization and architecture of mobile applications*	2	75	80	L	H	H	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*To understanding enterprise scale requirements of mobile applications*	2	85	80	H	-	H	L	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*To designing and developing mobile applications using one application development framework*	2	80	75	L	L	H	-	-	-	-	-	-	-	M	-	-	-	-
CLO-5 :	*To understand how to handle and share android data*	2	75	85	L	-	H	H	L	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*To develop an android services and to publish android application for use*	2	80	85	H	-	H	-	-	-	-	-	-	-	M	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Creating a new Android Project*	*Hosting a UI Fragment*	*Action Bar and Options Menus*	*Loopers, Handlers, and HandlerThread*	*Introduction to JSON*
	SLO-2	*Defining the Project and SDK setting*	*Creating a UI Fragment*	*Enabling Ancestral Navigation*	*Creating a search interface*	*JSON and Android*
S-2	SLO-1	*Creating an Android Virtual Device (AVD) in Android Studio*	*Adding a UI Fragment to the FragmentManager*	*An Alternative Menu Item*	*Hardware search button*	*Designing JSON and JSON Operation*
	SLO-2	*Android Virtual Device (AVD) in Android Studio*	*The FragmentManager and the fragment lifecycle*	*Saving and Loading Local Files*	*Creating an IntentService*	*Server reachability and Connection & Splash App*
S-3	SLO-1	*Configuring the Android Studio AVD Emulator*	*Creating User Interfaces with Layouts and Widgets*	*Context Menu Resource*	*Delayed Execution with AlarmManager*	*Lazy Loading Images*
	SLO-2	*The Emulator Environment and Toolbar Options*	*XML Layout Attributes*	*Floating Context Menu*	*Broadcast Intents*	*Lazy loading Libraries*
S-4	SLO-1	*Extended Control options*	*the Graphical Layout Tool*	*Contextual Action Mode*	*Waking Up on Boot*	*Lazy loading Archirtecture*
	SLO-2	*Drag and Drop Support*	*Creating a ListFragment*	*Camera I: Viewfinder*	*Filtering Foreground Notifications*	*Handling Image Assets*
S-5	SLO-1	*Configuring Fingerprint Emulation*	*Hosting a Fragment*	*Using the Camera API*	*Receivers and Long-running Tasks*	*Remote Crash Logs and App*
	SLO-2	*Android Studio Apps on a Physical Android Device*	*ListFragment, ListView and ArrayAdapter*	*Camera II: Taking Pictures and Handling Images*	*Browsing The Web & WebView*	*Push Messaging Services*
S-6	SLO-1	*Enabling ADB on Android based Devices*	*Fragment Arguments*	*Updating the Model Layer*	*Custom Views and Touch Events*	*Firebase Cloud Messaging*
	SLO-2	*Android Studio Editor*	*ViewPager*	*Updating CrimeFragment's View*	*Creating BoxDrawingView*	*Open Source Push Messaging with MQTT*

S-7	SLO-1	*Splitting the Editor Window, Code Completion, Statement*	*Dialogs*	*Implicit Intents*	*Handling Touch Events*	*MQTT App and Project*
	SLO-2	*Parameter Information, Parameter Name Hints,*	*Audio Playback Using MediaPlayer*	*Two-Pane Master-Detail Interfaces*	*Tracking the Device's Location*	*Message Brokers*
S-8	SLO-1	*Code Generation*	*Retained Fragments*	*Adding Layout Flexibility*	*Locations and the LocationManager*	*MQTT Broker setup for AWS*
	SLO-2	*Code Folding*	*Rotation and Retained Fragments*	*Activity: Fragment Boss*	*Receiving Broadcast Location Updates*	*Sending Messages with MQTT Web Clients*
S-9	SLO-1	*Quick Documentation Lookup*	*Rotation Handling and onSaveInstanceState(Bundle)*	*Styles And Includes*	*Updating the UI with Location Data*	*Firebase Cloud Messaging*
	SLO-2	*Code Reformatting*	*Localization*	*Cleaning Up with Styles*	*Testing Locations on Real and Virtual Devices*	*MQTT Push Messaging*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Data in data analytics*	*Simple Linear Regression*	*An Overview of Classification*	*Cross-Validation The Validation Set Approach*	*The Basics of Decision Trees-Regression Trees*
	SLO-2	*NOIR classification*	*Estimating the coefficients*	*Logistic Regression - The Logistic Model*	*Leave-One-Out Cross-Validation*	*Classification Trees*
S-2	SLO-1	*Introduction to R*	*Assessing the Accuracy of the Coeﬃcient Estimates*	*Estimating the Regression Coeﬃcients*	*k-Fold Cross-Validation*	*Trees Versus Linear Models*
	SLO-2	*Data types*	*Assessing the Accuracy of the Model*	*Making Predictions*	*Bias-Variance Trade-Oﬀ for k-Fold Cross-Validation*	*Advantages and Disadvantages of Trees*
S-3	SLO-1	*Control structures*	*Libraries for Simple Linear Regression in R*	*Multiple Logistic Regression*	*The Validation Set Approach in R*	*Bagging -Random Forests*
	SLO-2	*Control structures - Using the console*	*Programming in simple linear regression in R*	*Logistic Regression for >2 Response Classes*	*Leave-One-Out Cross-Validation in R*	*Boosting*
S-4	SLO-1	*Objects in R - Numbers, Attributes*	*Multiple Linear Regression - Estimating the Regression Coeﬃcients*	*Linear Discriminant Analysis - Using Bayes' Theorem for Classification*	*k-Fold Cross-Validation .in R*	*Fitting Classification Trees in R*
	SLO-2	*Vectors - create vectors*	*Multiple Linear Regression in R*	*Linear Discriminant Analysis for p = 1*	*The Bootstrap in R*	*Fitting Regression Trees in R*
S-5	SLO-1	*Using [] brackets*	*Extensions of the Linear Model*	*Linear Discriminant Analysis for p>1*	*Linear Model Selection and Regularization-Subset Selection*	*Bagging and Random Forests in R*
	SLO-2	*Vectorized operations*	*Potential Problems*	*Quadratic Discriminant Analysis*	*Stepwise Selection Choosing the Optimal Model*	*Boosting in R*
S-6	SLO-1	*Matrix -building a matrix, Naming dimensions, Colnames and Rownames*	*The Marketing Plan*	*Logistic Regression, LDA,*	*Shrinkage Methods Ridge Regression*	*Principal Components Analysis - What Are Principal Components?*
	SLO-2	*Matrix operations, Visualizing with Matplot()*	*Comparison of Linear Regression with K-Nearest Neighbors*	*QDA, and KNN in R - T*	*The Lasso Selecting the Tuning Parameter*	*More on PCA*

S-7	SLO-1	*Data frame*	*Qualitative Predictors*	*Example using Stock Market Data*	*Dimension Reduction Methods Principal Components RegressionP*	*Principal Components Analysis in R*
	SLO-2	*List*	*Extensions of the Linear Model*	*Logistic Regression in R*	*artial Least Squares*	*More on PCA - Other Uses for Principal Components*
S-8	SLO-1	*Functions*	*Interaction Terms in R*	*Linear Discriminant Analysis in R*	*Best Subset Selection in R*	*Clustering Methods- K-Means*
	SLO-2	*Indexing data*	*Non-linear Transformations of the Predictors in R*	*Quadratic Discriminant Analysis in R*	*Forward and Backward Stepwise Selection in R*	*Hierarchical Clustering*
S-9	SLO-1	*Reading data*	*Qualitative Predictors in R*	*K-Nearest Neighbors in R*	*Choosing Among Models Using the Validation Set Approach and Cross-Validation in R*	*K-Means Clustering in R*
	SLO-2	*Writing data*	*Writing Functions for linear regression in R*	*An Application to Caravan Insurance Data in R*	*Ridge Regression and the Lasso in R*	*Hierarchical Clustering in R*

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards		NIL	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Enrich the students on the basics of solar energy*
CLR-2 :	*Develop the knowledge in wind energy conversion system*
CLR-3 :	*Understand the energy generation by biomass*
CLR-4 :	*Gain knowledge on ocean ,tidal energy*
CLR-5 :	*Acquire knowledge in fuel cell and its types*
CLR-6 :	*Apply the concepts of renewable energy in industrial applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Obtain in depth knowledge on solar applications*	*2*	*80*	*75*	*H*	*M*	*M*	-	-	-	*L*	-	-	-	-	-	*H*	*M*	-
CLO-2 :	*Explain the concepts of wind energy conversion systems and their control*	*3*	*80*	*75*	*H*	*M*	*M*	-	-	-	*L*	-	-	-	-	-	*H*	*M*	-
CLO-3 :	*Summarize the biomass technologies and calculate the power conversion of biomass digestion*	*3*	*80*	*75*	*H*	*M*	-	-	-	-	*L*	-	-	-	-	-	*H*	*M*	-
CLO-4 :	*Interpret the environmental impacts of ocean and tidal energy*	*3*	*80*	*75*	*H*	*M*	-	-	-	-	*L*	-	-	-	-	-	*H*	*M*	-
CLO-5 :	*Summarize the working principle of fuels cells and its types*	*3*	*80*	*75*	*H*	*M*	-	-	-	-	*L*	-	-	-	-	-	*H*	*M*	-
CLO-6 :	*Infer the knowledge about various types of renewable energy systems*	*3*	*80*	*75*	*H*	*M*	*M*	-	-	-	*L*	-	-	-	-	-	*H*	*M*	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Solar radiation*	*Wind energy conversion*	*Biogas*	*Ocean thermal energy conversion*	*Fuel Cell*
	SLO-2	*Beam and diffuse radiation, solar constant, earth*	*Principles of Wind energy conversion*	*Energy from Biomass*	*Principle of OTEC*	*Basics of Fuel cell*
S-2	SLO-1	*Sun angles*	*Nature of the wind*	*Types of biomass*	*Lambert law of absorption*	*Components of fuel cells*
	SLO-2	*Calculation of angle of incidence*	*Factors influencing wind*	*Photosynthesis*	*OTEC power plant*	*Difference between batteries and fuel cell*
S-3	SLO-1	*Attenuation and measurement of solar radiation*	*Wind data and energy estimation- wind speed monitoring,*	*Factors affecting digestion system*	*Open loop system for ocean energy conversion*	*Types of fuel cells*
	SLO-2	*Local solar time, derived solar angles, sunrise, sunset and day length*	*Site selection*	*Classification of biogas plants*	*Closed loop system for ocean energy conversion*	*Ionic conductivity of fuel cell*
S-4	SLO-1	*Flat plate collectors, concentrating collectors*	*Power in the wind*	*Advantages and disadvantages of biogas plants*	*Single basin*	*Electronic conductivity in fuel cell*
	SLO-2	*Solar air heaters, types, solar driers*	*Betz limit*	*Factors affecting bio digestion*	*dual basin ocean energy conversion system*	*Principle of working of fuel cell*
S-5	SLO-1	*Storage of solar energy, thermal storage*	*Components of a wind energy conversion system*	*Biomass as Renewable Energy Source*	*Major problems and operational experience Tidal energy*	*Performance characteristics of fuel cells*
	SLO-2	*Solar pond , solar water heaters*	*Torque on wind*	*Cofiring*	*Site selection of tidal power plant*	*Selection of fuel cells*
S-6	SLO-1	*Solar distillation*	*Wind thrust calculations Repowering concept*	*Dry Process*	*Tide ,Spring tide*	*Fuel cell stack*
	SLO-2	*Solar Pond*	*Horizontal Axis Wind Turbine(HAWT design consideration)*	*Photosynthesis*	*Neap tide, Tidal range*	*fuel cell power plant*
S-7	SLO-1	*Solar heating & cooling of buildings*	*Tip Speed Ratio*	*Energy forming*	*Types of Tidal power plant*	*Cross section of typical PEM fuel cell*
	SLO-2	*Solar still, solar cooker*	*Solidity*	*Pyrolysis*	*Advantages and disadvantages of tidal power plant*	*Storage methods for fuel cells*
S-8	SLO-1	*Photo voltaic. Types of PV cells*	*Types of generators and power converters in WECS*	*Types of Biomass Fuels*	*Wave Energy*	*Challenges and trends in fuel cell*

	SLO-2	*Characteristics and working principles of PV*	*Control schemes for power converters.*	*Biomass power plant*	*Wave Characteristics*	*Efficiency of fuel cell*
S-9	SLO-1	*Maximum power point tracking methods*	*Introduction to grid integration of WECS*	*Biomass cogeneration*	*Different wave energy convertors, Saltor Duck*	*Applications of fuel cell*
	SLO-2	*Net metering concepts*	*Issues in grid integration*	*Digester design*	*Oscillating water column and dolphin types*	*Advantages and disadvantages of fuel cell*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Know the basic amplifier circuits*
CLR-2 :	*Acquire knowledge on different power amplifiers*
CLR-3 :	*Construct different waveform generating circuits*
CLR-4 :	*Discuss the basics of operational amplifiers*
CLR-5 :	*Understand different analog to digital and digital to analog converters*
CLR-6 :	*Design amplifier circuits using transistor and operational amplifiers*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Analyze the amplifier circuits using small signal model and hybrid model*	2	75	75	H	M	-	H	-	-	-	-	-	-	-	-	M	L	-
CLO-2 :	*Recognize the different power amplifiers*	2	75	75	H	M	-	H	-	-	-	-	-	-	-	-	M	L	-
CLO-3 :	*Design oscillators and multivibrators*	3	75	75	H	M	H	M	-	-	-	-	-	-	-	-	M	L	-
CLO-4 :	*Apply different operational amplifiers*	2	75	75	H	-	-	-	-	-	-	-	-	-	-	-	M	L	-
CLO-5 :	*Evaluate filters and converter circuits*	3	75	75	H	L	H	M	H	-	-	-	-	-	-	-	M	L	-
CLO-6 :	*Demonstrate various electronic circuits for real time applications*	2	75	75	H	M	H	H	H	-	-	-	-	-	-	-	M	L	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*BJT -Biasing methods -Base bias, base bias with emitter feedback*	*Power amplifiers – Types. Determination of efficiency for class A and class B power amplifiers*	*Oscillators and classification of oscillators*	*Introduction to Linear Integrated Technology*	*Filters basics and types*
	SLO-2	*Base bias with collector feedback and voltage divider bias*	*Frequency response of RC coupled class A amplifier*	*Design and Analysis of RC Phase shift oscillator.*	*Fabrication process for Integrated Circuits*	*Design of I and II Order LPF*
S-2	SLO-1	*Emitter bias using BJT in CE configuration*	*Frequency response of Transformer coupled class A amplifier*	*Operation of Hartley's oscillator*	*DC characteristics of op amp and input bias current.*	*Design of I Order HPF*
	SLO-2	*Transistor biasing stability using BJT in CE configuration*	*Operation of Class B push pull power amplifier*	*Analysis of Hartley's oscillator*	*Input offset voltage, Thermal Drift*	*Design of II Order HPF*
S-3	SLO-1	*Operation of BJT as an amplifier.*	*Operation of Differential amplifier*	*Operation of Armstrong oscillator*	*AC characteristics of op-amp and Frequency Response characteristics*	*Design of BPF and BRF*
	SLO-2	*CE, CB, CC Amplifier –Evaluation of h parameters*	*Analysis of Differential amplifier*	*Operation of UJT Relaxation oscillator*	*Frequency compensation and Slew rate*	*Switched variable filters and state variable filters*
S-4	SLO-1	*Small signal analysis of CE Amplifier*	*Self – biased active load differential amplifier*	*Operation of Cross coupled Oscillator*	*Inverting amplifier and Non-inverting amplifier*	*Oscillators- Wein bridge Oscillator using IC 741*
	SLO-2	*Small signal analysis of CB and CC amplifier*	*Source degenerated common source amplifier*	*Integrators*	*Summer and Subtractor*	*Amplitude control and Quadrature control Oscillator*
S-5	SLO-1	*Large signal analysis of CE Amplifier*	*Classification of class C power amplifiers (Tuned amplifiers)*	*Differentiators*	*Voltage follower and ac amplifiers*	*Introduction to simple MOSFET based op amp circuits*
	SLO-2	*Large signal analysis of CB and CC amplifier*	*Frequency response of Single , Double and Staggered Tuned Class C power amplifiers*	*Schmitt trigger*	*V to I and I to V converters*	*Analog to Digital converters and classification*
S-6	SLO-1	*JFET - CS Amplifier - Operation*	*Cascode and Cascaded circuits*	*Multivibrator and classification of multivibrators. Operation of Astable Multivibrator.*	*Instrumentation amplifier*	*Counter type ADC*

	SLO-2	*CS Amplifier – small signal analysis*	*Feedback amplifiers - Barkhausen criterion and Types of feedback amplifier*	*Analysis of Astable Multivibrator*	*Log and Antilog amplifiers*	*Sigma Delta type ADC*
S-7	SLO-1	*JFET - CD Amplifier - Operation*	*Analysis of voltage series feedback amplifier*	*Operation of Monostable Multivibrator.*	*Comparators and classification of comparators.*	*Successive approximation type ADC*
	SLO-2	*Small signal analysis of MOSFET*	*Analysis of voltage shunt feedback amplifier*	*Analysis of Monostable Multivibrator.*	*Applications of Comparators*	*Digital to Analog converters*
S-8	SLO-1	*Biasing of MOSFET*	*Analysis of current series amplifier*	*Operation of Bistable Multivibrator.*	*Basics of IC 555 Timer and Pin Details*	*Pulse width modulator DAC*
	SLO-2	*CD Amplifier – small signal analysis*	*Analysis of current shunt feedback amplifier*	*Analysis of Bistable Multivibrator.*	*Astable operation using IC 555 Timer with applications*	*R -2R Ladder DAC*
S-9	SLO-1	*Problems on biasing of circuits*	*Problems on power amplifiers*	*Voltage and time-based circuits.*	*Monostable operation using IC 555 Timer with applications*	*Inverted R-2R Ladder DAC*
	SLO-2	*Problems on hybrid parameters*	*Problems on feedback amplifiers*	*Series and shunt voltage regulator*	*Voltage regulator using IC 723*	*Binary coded DAC*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Importance of materials*	*Types of conducting materials*	*Insulating materials– Ceramic, Mica, Porcelain, Glass, Micanite and Glass bonded mica*	*Concept of superconductors*	*Introduction to Thermoplastics*
	SLO-2	*Classification of electrical and electronic materials*	*Low resistivity materials, High resistivity materials*	*Insulating material applications*	*Meaning of phenomenon of superconductivity*	*Introduction to Rubbers*
S-2	SLO-1	*Scope of electrical and electronic materials*	*Contact materials*	*Polymeric materials – Bakelite, Polyethylene. Natural and synthetic rubber and paper*	*Properties of superconductors*	*Introduction to Thermosets*
	SLO-2	*Requirement of Engineering materials*	*Fusible materials*	*Choice of solid insulating material for different applications*	*Types of superconductors*	*DC and AC properties of plastics*
S-3	SLO-1	*Classification of solids on the basis of energy gap*	*Filament materials*	*Liquid insulating materials requirements*	*Critical magnetic field*	*Mechanical properties and processing of plastic*
	SLO-2	*Types of engineering materials, Levels of material structure*	*Carbon as filamentary and brush material*	*Transformer oil, Bubble theory, Aging of mineral insulating oils.*	*Critical temperature*	*Materials for Opto – Electronic Devices - Introduction*
S-4	SLO-1	*Spintronic and its materials*	*Material for conductors, cables,*	*Gaseous insulating Materials – Air*	*Effects of Isotopic mass on critical temperature*	*Optical phenomena*
	SLO-2	*Ferromagnetic semiconductors, Left handed materials*	*Material for wires, solder, sheathing and sealing*	*Gaseous insulating Materials –Nitrogen, Vacuum*	*Silsbee rule*	*Reflection and Refraction*
S-5	SLO-1	*Conductor materials*	*Introduction to dielectric materials*	*Origin of permanent magnetic dipole, Magnetic terminology,*	*Depth of penetration*	*Transmittivity and Scattering,*
	SLO-2	*Factors affecting conductivity*	*classification of dielectric materials*	*Relation between relative permeability and magnetic susceptibility*	*Coherence length*	*Optical absorption*
S-6	SLO-1	*Thermal conductivity*	*Dielectric constant*	*Classification of magnetic materials - Diamagnetic, Paramagnetism, Ferromagnetism*	*Ideal and Hard superconductors*	*Optical properties of non-metals*

	SLO-2	*Heating effect of current*	*Dielectric strength and Dielectric loss*	*Anti-ferromagnetism and the corresponding materials*	*Mechanism of super conduction*	*Optical properties of metals*
S-7	SLO-1	*Thermoelectric effect*	*Polarization, Mechanisms of polarization*	*Ferrimagnetism and ferrites properties and applications*	*London's theory for Type I superconductors, GLAG theory for Type I superconductors*	*Optical properties of semiconductors*
	SLO-2	*Seebeck effect*	*Comparison of different polarization process*	*Ferrimagnetism and ferrites applications*	*BCS theory, Applications and limitations*	*Penetration depth and absorption coefficient*
S-8	SLO-1	*Thomson effect*	*Factors affecting polarization*	*Soft and hard ferrites. Curie temperature*	*Applications of high temperature superconductors*	*Optical properties of insulators*
	SLO-2	*Thomson effect's application*	*Spontaneous polarization*	*Laws of magnetic materials.*	*Superconducting solenoids and magnets*	*Luminescence*
S-9	SLO-1	*Wiedemann – Franz law*	*Behaviour of polarization under impulse and frequency switching*	*Magnetization curve, Initial and maximum permeability*	*MRI for medical mechanism*	*Opto – Electronic devices, Photoconductivity*
	SLO-2	*Lorentz relation*	*Decay and build-up of polarization under ac field*	*Hysteresis loop and loss, Eddy current loss*	*MRI for medical diagnostics*	*Photoconductive cell*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide an overview on power generation through various methods*
CLR-2 :	*Gain knowledge of power plant measurements and devices*
CLR-3 :	*Categorize the various analyzer In Power Plants*
CLR-4 :	*Get detailed knowledge on Nuclear power plant*
CLR-5 :	*Outline the concept of Renewable energy*
CLR-6 :	*Educate various concept in conventional and non-conventional resources*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Familiarize about different power generation process*	*2*	*80*	*75*	*H*	-	-	-	-	-	*H*	-	-	-	-	-	*H*	*M*	*H*
CLO-2 :	*Understand the various measurement techniques in power plant*	*3*	*80*	*75*	*H*	*M*	-	-	-	-	*M*	*M*	-	-	-	-	*M*	*M*	*M*
CLO-3 :	*Analyze important parameter for control of power plant*	*3*	*80*	*75*	*H*	*M*	-	-	-	-	*M*	*M*	-	-	-	-	*H*	*M*	*M*
CLO-4 :	*Summarize the working of Nuclear Reactor*	*3*	*80*	*75*	*H*	*M*	-	-	-	-	*M*	*M*	-	-	-	-	*H*	*H*	*M*
CLO-5 :	*Employ the acquired knowledge of Renewable energy in power plant*	*3*	*80*	*75*	*H*	-	-	-	-	-	*M*	*M*	-	-	-	-	*H*	*M*	*M*
CLO-6 :	*Gain knowledge on various concepts related to Power Plant Engineering*	*3*	*80*	*75*	*H*	*M*	-	-	-	-	*M*	*M*	-	-	-	-	*H*	*M*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Brief survey of methods of power generation*	*Electrical measurements: Current, Voltage*	*Introduction of Flue gas*	*Basics of Nuclear Engineering*	*Hydro Electric Power Plants*
	SLO-2	*Thermal power*	*Power, Frequency, Power factor*	*oxygen analyzer*	*Layout and subsystems of Nuclear Power Plants*	*Elements of Hydro-electric power plant*
S-2	SLO-1	*Overview of Nuclear*	*Non– electrical parameters: Flow of feed water*	*Analysis of impurities in feed water*	*Fission reactions*	*Types of Dams*
	SLO-2	*Solar and Wind power*	*Flow of feed fuel*	*Analysis of impurities in feed steam*	*Working of Nuclear Reactors*	*classification of Hydro-electric power plants*
S-3	SLO-1	*Importance of instrumentation in power generation*	*Flow of feed air*	*Dissolved oxygen analyzer*	*Classification of Reactors*	*Hydro sources and power plants Energy strategies*
	SLO-2	*Factors affecting power plant*	*Steam pressure*	*Dissolved oxygen analyzer working principle*	*Nuclear reactor control loops*	*Size of the plant and choice of units*
S-4	SLO-1	*Building blocks for all types of power generation plants*	*Steam temperature*	*Methods of measuring dissolved oxygen*	*reactor dynamics*	*Typical Layout and associated components including Turbines*
	SLO-2	*Hydro and Thermal power plant*	*Drum level measurement*	*Chromatography-principles-applications*	*Boiling Water Reactor (BWR)*	*Turbine Governing*
S-5	SLO-1	*Building blocks for all types of power generation plants*	*Radiation detector*	*Types of Chromatography- Gas Chromatography*	*Pressurized Water Reactor (BWR)*	*Comparison of hydro and steam power plant*
	SLO-2	*Nuclear- Solar power*	*Smoke density measurement*	*Liquid Chromatography*	*CANada Deuterium-Uranium reactor (CANDU), Breeder*	*Cost of Hydroelectric Power Plant*
S-6	SLO-1	*Building blocks for all types of power generation plants-wind power*	*Dust monitor*	*PH meter*	*Gas Cooled Reactor*	*Principle, Construction and working of Wind energy*
	SLO-2	*Tidal power plant*	*flame monitoring*	*PH meter-design and working principle*	*Liquid Metal Cooled Reactor*	*Principle, Construction and working of tidal energy and Types of tidal power plants*
S-7	SLO-1	*Details of boiler process*	*speed vibration*	*Classifications of Analyzer*	*Economics of Nuclear Power Plants*	*Solar Photo Voltaic cell (SPV)*

	SLO-2	*P&I diagram of boiler*	*shell temperature*	*Fuel analyzer*	*Nuclear power plant in India*	*Solar thermal power systems use concentrated solar energy*
S-8	SLO-1	*Piping diagram of boiler*	*pedestal vibration*	*Portable fuel property analyzer*	*Uranium Enrichment*	*Geo Thermal power plants - types*
	SLO-2	*Instrumentation diagram of boiler*	*shaft vibration*	*Natural Gas analyzer*	*instrumentation diagram of different types of nuclear power plant*	*Biogas Photosynthesis and origin of biogas energy*
S-9	SLO-1	*Power plant performance efficiency*	*eccentricity measurement*	*Pollution monitoring instruments*	*Control Safety measures for Nuclear Power plants*	*Biogas energy resources*
	SLO-2	*Cogeneration system*	*temperature monitoring & control*	*Pollution control technologies*	*Waste Disposal Options for Coal and Nuclear Power Plants*	*Fuel Cell power systems*

Learning Resources	1. *K. Krishnaswamy, M. Ponnibala, Power Plant Instrumentation, PHI Learning Pvt Ltd.,2013.* 2. *Philip Kiameh, Power Plant Instrumentation and Controls, McGraw-Hill Professional, 2014.* 3. *David Lindsley, Power-plant Control and Instrumentation: The Control of Boilers and HRSG Systems, IET, London, 2000.*	4. *G. F. Gilman, Jerry Gilman, Boiler Control Systems Engineering, ISA, 2010.* 5. *G.R.Nagpal, Power Plant Engineering,khanna Publisher ,2005* 6. *M.M. El-Wakil, Power Plant Engineering, Tata McGraw – Hill Publishing Company Ltd., 2010*

Learning Assessment											
	Bloom's Level of Thinking	Continuous Learning Assessment (50% weightage)								Final Examination (50% weightage)	
		CLA – 1 (10%)		CLA – 2 (15%)		CLA – 3 (15%)		CLA – 4 (10%)#

Course Code	18EEO305T	Course Name	ELECTRICAL DRIVES	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Enrich the students on the basics of electric drives*
CLR-2 :	*Learn the concepts of DC motor drives and its speed control*
CLR-3 :	*Familiarize the power electronic based speed control of induction motor drives*
CLR-4 :	*Get an idea of speed control of synchronous motor*
CLR-5 :	*Understand the basic of digital speed control techniques*
CLR-6 :	*Get an idea about selection of drives and control schemes*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Acquire knowledge on the concept of electric drives*	*2*	*80*	*75*	*H*	*L*	*L*	*L*	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-2 :	*Analyze the concept & characteristics of dc motors*	*3*	*80*	*75*	*H*	*M*	*M*	*M*	*M*	-	-	-	-	-	-	-	*M*	*M*	-
CLO-3 :	*Interpret of speed-control of induction motors*	*3*	*80*	*75*	*H*	*M*	*M*	*M*	*M*	-	-	-	-	-	-	-	*M*	*M*	-
CLO-4 :	*Get detailed knowledge on synchronous motor drives*	*3*	*80*	*75*	*H*	*M*	*M*	*M*	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-5 :	*Apply the digital speed control techniques for various drives*	*2*	*80*	*75*	*H*	*M*	*L*	*L*	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-6 :	*Apply the drives and control schemes for real time applications*	*3*	*80*	*75*	*H*	*M*	*M*	*M*	*M*	-	-	-	-	-	-	-	*M*	*M*	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Electric drives - Advantage of electric drives*	*DC Motor Drives:-Introduction*	*Induction motor drives-Introduction*	*Synchronous motor drives – introduction*	*Digital technique in speed control*
	SLO-2	*Block diagram of electric drives*	*DC motor and their performance*	*Advantages and Disadvantages*	*Synchronous Motor Drives*	*Advantages of digital techniques*
S-2	SLO-1	*Selection of motor power rating*	*Braking methods*	*Stator control of IM*	*Speed control of synchronous motors*	*Limitations of digital techniques*
	SLO-2	*Thermal Modeling*	*Ward Leonard drives*	*Stator voltage control*	*Synchronous motors – Frequency control*	*Speed control system with multirate sampling*
S-3	SLO-1	*Thermal model of motor for heating and cooling*	*Transformer fed DC drive*	*Stator Frequency control*	*Synchronous motors – Start with Prime mover & damper winding*	*Microprocessor based control - introduction*
	SLO-2	*Thermal model of motor for heating and cooling - derivation*	*Uncontrolled rectifier fed DC drive*	*Stator Frequency control – advantages and disadvantages*	*Synchronous motors –damper winding*	*Microprocessor based control of DC drive*
S-4	SLO-1	*Classes of motor duty cycle*	*Single phase half controlled rectifier fed DC drives - operation*	*V/F control*	*Voltage Source Inverter fed synchronous motor*	*Microprocessor based control of induction motor drive*
	SLO-2	*Determination of motor rating*	*Single phase half controlled rectifier fed DC drives - derivation*	*Closed loop V/F control*	*Chopper fed VSI with synchronous motor*	*Microprocessor based control of synchronous motor drive*
S-5	SLO-1	*Control of electric drives*	*Single phase fully controlled rectifier fed DC drive- operation*	*Cycloconverter - introduction*	*Current Source Inverter fed synchronous motor*	*Selection of drives for paper mill*
	SLO-2	*Modes of operation*	*Single phase fully controlled rectifier fed DC drive- derivation*	*Cycloconverter fed induction motor drive*	*Chopper fed CSI with synchronous motor*	*Control schemes for paper mill*
S-6	SLO-1	*Speed control of electric drives*	*Chopper - introduction*	*VSI Inverter fed induction motor drives*	*Cycloconverter fed synchronous motors*	*Selection of drives for steel rolling mill*
	SLO-2	*Drive classifications*	*Chopper controlled DC drives*	*Comparison: VSI and CSI*	*Limitations - Cycloconverter fed synchronous motors*	*Control schemes for steel rolling mill*
S-7	SLO-1	*Closed loop control of drives*	*Time ratio control*	*Rotor control*	*Self control*	*Selection of drives for lift*
	SLO-2	*Speed, torque and current control*	*Current limit control*	*Rotor resistance control*	*Separate control*	*Control schemes for lift*
S-8	SLO-1	*Multiquadrant operation of electrical drive*	*Single, two quadrant operations*	*Slip power recovery schemes*	*Open loop operation of synchronous drive*	*Selection of drives for crane*

	SLO-2	*Torque equation for rotating system*	*Four quadrant operation*	*Static Kramer & static scherbius scheme*	*Closed loop operation of synchronous drive*	*Control schemes for crane*
S-9	SLO-1	*Speed torque characteristics*	*Simulation of 1-phase rectifier fed DC motor*	*Simulation of three phase VSI using SPWM*	*Closed loop operation of power factor control*	*FPGA based control of electric drives*
	SLO-2	*Applications of electric drives*	*Simulation of 3-phase rectifier fed DC motor*	*Simulation of three phase VSI using pulse generator*	*Applications synchronous drive*	*Application of Digital technique in speed control*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Outline the concepts of world energy scenario in industries*
CLR-2 :	*Describe the basics of electrical system*
CLR-3 :	*Impart knowledge on various methods of improving energy efficiency in industries*
CLR-4 :	*Give an overview about the energy policies, energy planning and policy making in India*
CLR-5 :	*Provide an understanding of the basics of energy conservation method and energy auditing in industries*
CLR-6 :	*Create overall structure of energy conservation starting from environmental aspects to energy management systems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Gain knowledge of world energy scenario*	2	75	75	H	-	-	-	-	-	-	-	-	-	-	-	L	L	L
CLO-2 :	*Understand the concepts of electrical system*	3	75	75	H	-	-	-	-	-	-	-	-	-	-	-	M	M	M
CLO-3 :	*Assess the energy efficiency in industrial system*	3	75	75	H	-	-	-	-	-	H	H	-	-	-	-	M	H	M

CLO-6 :	*Implement energy conservation methods and laws to save energy*	3	75	75	H	-	-	-	-	-	M	H	M	M	-	-	M	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Energy classificatios*	*Introduction Electrical Systems*	*Air condition and refrigeration*	*Introduction to energy policy*	*Investment - need, appraisal and criteria*
	SLO-2	*Power Past & Present scenario of World*	*Electrical network types and classifications*	*Diesel Generator*	*National energy policy in the last plan periods*	*Financial analysis techniques*
S-2	SLO-1	*Sectorial energy consumption*	*HT supply*	*Energy Efficiency in Building*	*ISO-50001, PDCA, PAT scheme*	*Simple payback period*
	SLO-2	*domestic, industrial and other sectors*	*LT supply*	*Energy Efficiency in Building*	*BEE & State Development Agencies & EESL Programmes*	*Return on investment*
S-3	SLO-1	*energy needs of growing economy, energy intensity*	*Transformers and its operation*	*Savings opportunities in HVAC*	*Municipal & Agriculture DSM Initiatives*	*Net present value, internal rate of return, cash flows*
	SLO-2	*long term energy scenario, energy pricing*	*Types of transformer*	*Fans and blowers*	*Energy use and Energy supply*	*Net present value, internal rate of return, cash flows*
S-4	SLO-1	*energy security, energy conservation*	*Cables – and its construction*	*Conservation opportunities*	*Overview of renewable energy policy and the Five Year Plan programme*	*Risk and sensitivity analysis*
	SLO-2	*energy conservation importance, energy strategy for the future*	*Types and Cable Sizing*	*Pumps - CASE STUDY*	*Standards and Labelling Programme EEC initiatives in Other Sectors*	*Financing options*
S-5	SLO-1	*National Energy consumption Data*	*Concept of Capacitors*	*Control strategies*	*Basic concept of Input-Output analysis*	*Energy performance contracts and role of Energy Service Companies (ESCOs)*
	SLO-2	*Energy Pricing*	*Types of Capacitors*	*Conservation opportunities*	*Concept of energy multiplier and Implication of energy multiplier for analysis of regional and national energy policy Organizational structure*	*Energy Monitoring*
S-6	SLO-1	*Environmental aspects associated with energy utilization*	*Power Factor Improvemen*	*Cooling Tower -performance*	*key developments and changes in India's energy policies and planning in the context of energy efficiency and environmental concerns*	*Targeting: Defining monitoring & targeting*

	SLO-2	*Environmental aspects associated with energy conservation*	*Harmonics*	*Efficient system operation*	*key developments and changes in India's energy policies and planning in the context of energy efficiency and environmental concerns*	*Targeting: Defining monitoring & targeting*
S-7	SLO-1	*Energy Auditing: Needs, Types,*	*Electric Motors – Motor Efficiency Computation*	*Efficient system operation*	*regulatory frameworks and reforms across various energy sectors*	*elements of monitoring & targeting*
	SLO-2	*Methodology and Barriers*	*Energy Efficient Motors*	*Validation of energy saving using application software*	*regulatory frameworks and reforms across various energy sectors*	*Data and information-analysis, techniques*
S-8	SLO-1	*Role of Energy Managers*	*Illumination – Lux, Lumens*	*Energy saving opportunities*	*Energy Policies success stories, failures*	*Energy consumption*
	SLO-2	*Needs of Energy Managers*	*Types of lighting, Efficacy*	*Energy saving opportunities*	*Energy saving potential of technology*	*Production, cumulative sum of differences (CUSUM).*
S-9	SLO-1	*Instruments for energy auditing*	*LED Lighting And types*	*Assessment of cooling towers*	*Energy tariffs and Energy Instrument*	*Energy Management Information Systems (EMIS)*
	SLO-2	*Energy conservation*	*Scope Of Encon In Illumination*	*Assessment of cooling towers*	*CASE STUDY for energy tariffs in industry*	*Energy Management Information Systems (EMIS)*

Course Code	18EEO307T	Course Name	ELECTRIC POWER UTILIZATION AND ILLUMINATION	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Outline the basic concepts of conventional and modern electric heating methods used for various applications*
CLR-2 :	*Impart knowledge on fundamentals of illumination technology and design the lighting schemes*
CLR-3 :	*Educate the students on electroplating , electrodeposition and electroforming*
CLR-4 :	*Enumerate the concept of electric traction systems and braking methodologies*
CLR-5 :	*Understand and analyze the working of electric-hybrid vehicles and design the illumination schemes for smart building .*
CLR-6 :	*Create a deep knowledge on the electric power utilization and model the illumination schemes*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understand electric heating, welding and implement the modern methodologies for various applications*	2	80	75	M	M	M	-	-	-		-	-	-	-	-	M	M	-
CLO-2 :	*Gain knowledge on basic laws of illumination and design the lighting system*	3	80	75	H	H	H	H	M	-	M	M	-	-	-	-	M	M	M
CLO-3 :	*Apply the various process like electroplating, electrolysis and electroforming for modern applications*	2	80	75	M	M	M	M	M	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Interpret the design of electric traction systems*	3	80	75	H	H	H	H	-	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Obtain an in depth knowledge on the concepts of electric, hybrid vehicles and model the lighting schemes for smart building*	3	80	75	H	H	M	M	-	-	-	M	-	-	-	-	M	M	M
CLO-6 :	*Design a illumination schemes for buildings along with a in depth knowledge of power utilization concepts*	3	80	75	H	H	M	M	M	-	M	M	-	-	-	-	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Principle of heating, modes of transfer*	*Review of laws of illumination*	*Fundamental principles of extraction*	*Electric Traction*	*History of electric and hybrid vehicles*
	SLO-2	*Methods of Electrical Heating*	*Luminous efficacy*	*Refining of metals*	*Traction Principles*	*Vehicle motion*
S-2	SLO-1	*Types of electric furnance: resistance*	*Lighting Calculations*	*Electroplating concepts*	*Types of traction systems*	*Dynamic equation for the vehicle*
	SLO-2	*Arc, dielectric furnance*	*Lighting sources and its types*	*Methods of electroplating*	*Services and supply systems for traction*	*Configuration of electrical vehicles*
S-3	SLO-1	*Microwave, induction heating*	*Lighting sources in domestic application*	*Estimation of power and current for depositing metals*	*Traction motor characteristics*	*Tractive effort, force and gear ratio for electric vehicle*
	SLO-2	*Eddy current heating*	*Street Lighting*	*Factors affecting electro deposition process*	*equation of train motion*	*Transmission requirement for electric cars*
S-4	SLO-1	*Types of welding: Arc*	*Industrial lighting*	*Electrolysis process and its chemistry*	*Speed time curve*	*Vehicle performance analysis*
	SLO-2	*Resistance welding*	*Indoor lighting*	*Electrodes,*	*Energy and specific energy consumption*	*Energy consumption*
S-5	SLO-1	*Air conditioning working*	*Outdoor lighting*	*Cell.potential, Emf of Galvanic cell*	*Quantitative analysis of speed time curve*	*Drives for Electric cars*
	SLO-2	*Different types of Air conditioning system*	*Design of lighting*	*Nernst equation*	*Quantitative analysis of energy consumption for drives used in traction*	*Braking*
S-6	SLO-1	*Heating of buildings.*	*light pollution and light trespass*	*Concept of equilibrium in electrochemical cells*	*Quantitative analysis of specific energy consumption*	*Control equipments of electric car*
	SLO-2	*Power supply for heating and welding*	*photometry Energy consideration*	*Faradays law of electrolysis*	*Tramways*	*Auxillary equipments*
S-7	SLO-1	*comparison of types of heating and welding*	*IES,ANSI STANDARDS for Lighting schemes*	*Electroforming process*	*Railways trolley buses*	*Introduction to smart buildings*
	SLO-2	*Quantitative analysis of Electric heating*	*Polar curves of different types of sources*	*Modern applications of electroplating,*	*Riding index*	*Design of lighting schemes in smart building*
S-8	SLO-1	*Quantitative analysis of welding*	*Rousseau's Construction*	*Applications of Electrolysis and Electroforming*	*Quantitative analysis of Riding index*	*Intelligent illuminance control in smart building*
	SLO-2	*Modern trends in electric heating*	*Quantitative analysis of illumination*	*Applications of Electroforming*	*Disadvantages of conventional traction over modern days drive*	*Quantitative analysis of electric vehicle tractive force calculations*

S-9	SLO-1	*Modern trends in welding process*	*Energy efficient*	*Difference between electroplating electroforming and electrolysis*	*Introduction to green energy for traction*	*Quantitative analysis on gear ratio*
	SLO-2	*Applications of heating and welding*	*Lighting scheme of the building using simulation tools*	*Electroplating design tools*	*Pros and cons of electric and non electric traction system*	*Quantitative analysis on efficiency calculations*

Course Code	18EEO308T	Course Name	ELECTRICAL POWER SYSTEM	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamentals of power stations*
CLR-2 :	*Understand economics of power generation*
CLR-3 :	*Acquire knowledge on AC power supply schemes and insulators*
CLR-4 :	*Understand the basics of substations*
CLR-5 :	*Understand the design of cables and protection equipments*
CLR-6:	*Acquire knowledge of transmission lines and cables*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understand the various aspects of power station*	1	75	75	H	-	-	-	-	-	-	-	-	-	-	-	M	-	-
CLO-2 :	*Execute the performance of transmission lines*	2	75	75	H	L	-	-	-	-	M	-	-	-	-	-	M	-	-
CLO-3 :	*Summarize the AC power supply schemes and DC power transmission*	2	75	75	H	L	-	-	-	-	-	-	-	-	-	-	M	-	-
CLO-4 :	*Analyse the transmission substation and grounding*	2	75	75	H	M	-	-	-	-	-	-	-	-	-	-	M	-	-
CLO-5 :	*Enrich the types of cables and protection equipments*	1	75	75	H	H	-	-	-	-	-	-	-	-	-	-	M	-	-
CLO-6 :	*Understand the supply systems, design of transmission lines and cables*	2	75	75	H	H	-	-	-	-	M	-	-	-	-	-	M	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Importance of Electrical Energy*	*Structure of Electric Supply System*	*Typical AC power supply scheme*	*Introduction to substation*	*Underground cables*
	SLO-2	*Generation of Electrical Energy*	*Variable load on power station*	*Types of power transmission*	*Classification of substation*	*Construction of cables*
S-2	SLO-1	*Sources of Energy*	*Types of loads*	*Comparison of DC and AC transmission*	*Comparison between outdoor and indoor sub stations*	*Properties of insulation materials*
	SLO-2	*Comparison of Energy Sources, Units of Energy*	*Load curves and selection of generating units*	*Advantages of high transmission voltage*	*Step up substation*	*Insulation materials for cables*
S-3	SLO-1	*Relationship among energy units*	*Base load and peak load on power station*	*Limitations of high transmission voltage*	*Primary grid substation*	*Classification of cables*
	SLO-2	*Arrangement of Steam Power Station*	*Methods of meeting the load*	*Elements of a transmission line*	*Secondary substation*	*Switchgear*
S-4	SLO-1	*Choice of site and Equipment's of Steam Power Stations*	*Economics of power generation*	*Economics of power transmission,*	*Distribution substation*	*Essential features of switchgear*
	SLO-2	*Hydro – electric Power Station*	*Cost of electrical energy*	*Economic choice of conductor size*	*Symbols for equipment in sub station*	*Faults in power system*
S-5	SLO-1	*Choice of site and Equipment's of Hydro Power Stations*	*Objective of tariff*	*Economic choice of Transmission voltage*	*Equipments in a substation*	*Circuit breakers*
	SLO-2	*Diesel Power Station*	*Characteristics of tariff*	*Requirements of satisfactory electric power*	*Key diagram of a substation*	*Arc phenomenon*
S-6	SLO-1	*Nuclear Power Plant*	*Types of tariff*	*Main components of overhead lines*	*Need for grounding*	*Types of circuit breakers*
	SLO-2	*Connected load, Maximum demand, Average load*	*Types of power factor tariff*	*Conductor materials*	*Grounding equipments*	*Need for Fuses*
S-7	SLO-1	*Calculation of Load duration curve, Types of loads*	*Power factor*	*Line supports*	*System grounding*	*Characteristics of fuse element*
	SLO-2	*Load curves and selection of generating units*	*Power triangle*	*Types of Insulators*	*Neutral grounding*	*Fuse element materials*
S-8	SLO-1	*Energy, power, efficiency calculations of conventional power plant*	*Disadvantages of low power factor*	*Factors affecting Transmission*	*Advantages of neutral grounding*	*Types of Fuses*

	SLO-2	*Basic layout of sustainable energy resources –Photovoltaic system*	*Causes of low power factor*	*Constants of a transmission line*	*Voltage surge*	*Low voltage fuses*
S-9	SLO-1	*Wind energy*	*Power factor improvement- static capacitor*	*Resistance of a transmission line*	*Causes of over voltages*	*High voltage fuses*
	SLO-2	*Different operating voltages of generation, transmission and distribution*	*Synchronous condenser*	*Inductance of a transmission line*	*Internal causes of overvoltages*	*Difference between a fuse and circuit breaker*

Course Code	18ECO101T	Course Name	SHORT RANGE WIRELESS COMMUNICATION	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/ Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Overview of different modulation scheme and wireless system*
CLR-2 :	*understand the various components used to implement a short-range radio system.*
CLR-3 :	*Analysis of the various kinds of transmitters and receivers used for Short range Wireless Communication.*
CLR-4 :	*know about regulations and standards of ISM band communications*
CLR-5 :	*Design and analysis of short-range radio like UWB and Visible light.*

Course Learning Outcomes (CLO):	*The purpose of this course is to :*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*cover the various forms of signals used for information transmission and modulation, and overall wireless system properties.*	2	80	70	L	-	-	-	-	-	-	-	-	-	-	-	-	H	-
CLO-2 :	*present various component types that can be used to implement a short-range radio system.*	2	85	75	-	-	M	L	-	-	-	-	-	-	-	-	H	-	-
CLO-3 :	*describe the various kinds of transmitters and receivers.*	2	75	70	-	-	H	M	-	-	-	-	-	-	-	-	-	H	-
CLO-4 :	*covers regulations and standards of ISM band communications*	2	85	80	M	-	-	-	-	-	-	-	-	-	-	-	M	-	-
CLO-5 :	*covers some of the most important new developments in short-range radio like UWB and Visible light.*	2	85	75	-	-	L	M	-	-	-	-	-	-	-	-	-	-	H

Duration (hour)		Wireless Systems	Baseband Coding basics	RF transceivers	Wireless standards	Optical wireless Technologies
		9	9	9	9	9
S-1	SLO-1	*Introduction to wireless systems*	*Types of Antennas-Dipole, groundplane, loop*	*RF Receivers- Introduction*	*Technical Background to the WPAN Concept - Regulation and Standardization Issues*	*Fundamentals of UROOF Technologies*
	SLO-2	*Reasons for the Spread of Wireless Applications*	*Helical, Patch antennas*	*RF Source-Frequency control*	*European Consortium: Overview*	*Conversion from RF to Optical Domain*
S-2	SLO-1	*Characteristics of Short-range Radio*	*Antenna Characteristics-Impedence, directivity and gain, Effective area*	*Modulation types*	*Millimeter-Wave Applications and Services - PAN scenarios in the IST Magnet project*	*Conversion from Optical to RF Domain*
	SLO-2	*Wireless Applications*	*Polarization, Bandwidth, Antenna factor*	*Amplifiers*	*Typical LDR services connected to the IST-FP6 MAGNET project*	*Optical Microwave Mixing Used for UWB Over Systems*
S-3	SLO-1	*Elements of Wireless Communication Systems-Transmitter*	*Baseband Data Format and Protocol - Radio Communication Link Diagram*	*Impedance matching in transmitter and receivers*	*Frequency Regulation and Standardization Issues - Optional UM4 usage models issued from the IEEE802.15.3c TG*	*Integrated UROOF Transceiver (IUT)*
	SLO-2	*Elements of Wireless Communication Systems-Receiver*	*Code Hopping*	*Filtering*	*Flexible antenna gain, 60 GHz regulation status for wireless transmissions.*	*Mixed Wireless-wired UROOF Channel, Carrier-to-noise Ratio*
S-4	SLO-1	*Wireless Local Area Networks (WLAN)-WIFI*	*Baseband Coding-Digital systems*	*SAW band pass filter matching*	*Channel Propagation Characterization and Modeling- 60 GHz Propagation Measurements*	*Laser and Photodetector Noise Baseline,*
	SLO-2	*Network Architecture*	*Wireless Microphone System*	*Tuned Radio Frequency (TRF)*	*Propagation Channel Characterization*	*Clipping Distortion Implication , Latency*
S-5	SLO-1	*Bluetooth Transceiver*	*RF Frequency and Bandwidth-factors*	*ASH Receiver*	*Multipath Propagation Modeling*	*Modelling the Propagation through the Fibre*
	SLO-2	*Bluetooth Modes*	*Propagation characteristics*	*Super regenerative Receiver –Block diagram*	*France Telecom Propagation Channel Models*	*Analysis of UWB Technologies for UROOF- Comparing UWB Technologies for Radio-over- fibre*

S-6	SLO-1	*Zigbee Architecture, Frame Structure*	*Modulation types*	*Super regenerative Receiver – Operation*	*MSK-Based System for LOS Gb/s Communications*	*MB-OFDM Over Multimode Fibre*
	SLO-2	*Applications and conflicts*	*Modulation for digital event communication*	*Super heterodyne Receiver-Block diagram*	*System architecture for an MSK-based system to operate in a LOS channel.*	*All-optical Generation of Ultra-wideband Impulse Radio*
S-7	SLO-1	*Ultra-wideband Technology-Bit Sequence detection*	*Continuous Digital Communication*	*Super heterodyne Receiver- Operation*	*OFDM-Based System for NLOS Gb/s Communications*	*Operation Principles and Theoretical Approach*
	SLO-2	*UWB Block Diagram*	*Advanced Digital Modulation*	*Direct Conversion Receiver- Block diagram*	*System architecture for an OFDM-based system to operate in a NLOS channel.*	*VLC Link –Transmitter*
S-8	SLO-1	*Wireless Modules-Japan,UK,USA*	*Spread Spectrum-DHSS*	*Direct Conversion Receiver- Operation*	*System Design Aspects-Channel Plan*	*The VLC Channel*
	SLO-2	*Wireless Modules-Austria, Honeywell, Norway*	*Spread Spectrum-FHSS*	*Digital Receivers-Software radio*	*60 GHz Channel Characteristics, Baseband Modulation: OFDM versus Single Carrier*	*Receiver, Modulation*
S-9	SLO-1	*FCC Regulations-Terms and definitions*	*RFID-transceiver*	*Software radio operation*	*60 GHz Analog Front-End Architectures*	*Potential Applications*
	SLO-2	*Nomenclature for defining Emission, modulation and transmission*	*Design issues for RFID*	*Repeaters*	*Multiple Antenna Technologies*	*Challenges*

Course Code	18EC0102J	Course Name	ELECTRONIC CIRCUITS AND SYSTEMS	Course Category	O	Open Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/ Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide a basis for understanding semiconductor material, how a pn junction is formed and its principle of operation*
CLR-2 :	*Describe the basic structure, operation and characteristics of transistors BJTs and FETs, and discuss their use as a switch and an amplifier*
CLR-3 :	*Learn the basics of op-amp: the principle, operation, characteristics and fundamentally important circuits*
CLR-4 :	*Describe and analyze the basic operation of sinusoidal oscillators and use a 555 Timer in an oscillator application.*
CLR-5 :	*Learn the fundamentals of analog and digital communication, networking, radio transmission and mobile telephones*
CLR-6 :	*Encourage the learner to assemble and test real circuits in the laboratory*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the operation, characteristics, parameters and specifications of semiconductor diodes and demonstrate its important applications*	*1*	*80*	*70*	*L*	*L*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Review the transistor (BJT & FET) construction, operation, characteristics and parameters, as well as its application in amplification and switching.*	*1*	*80*	*70*	*L*	*L*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Identify different configurations of op-amp analyze the parameters of op-amp and observe the frequency response of operational-amplifier.*	*1*	*80*	*70*	*L*	*L*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Understand & demonstrate different applications based on operational-amplifier and special linear ICs*	*1*	*80*	*70*	*L*	*L*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Understand the basic concepts and techniques of telecommunication systems and networks*	*1*	*80*	*70*	*L*	*L*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Understand how circuit behavior can be studied with a computer, using a circuit simulation software*	*2*	*90*	*80*	-	-	*H*	-	*H*	-	-	-	-	*L*	-	*M*	*L*	-	-

		Active Discrete Components & Circuits – I	Active Discrete Components & Circuits – II	Linear Integrated Circuits	Oscillators and Timers	Telecommunications
Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Conduction in semiconductors*	*JFETs: Structure & Operation*	*Introduction to Op-amp*	*RC Phase-Shift oscillator Operation*	*Analog & Digital Communication: Stages in telecommunication systems*
	SLO-2	*Conduction in diodes*	*Characteristics & Parameters*	*Basic op-amp and its characteristics*	*& Design*	*Carriers and Modulation*
S-2	SLO-1	*Basic operation of PN junction diode*	*JFET Biasing (Voltage-Divider Biasing)*	*op-amp modes*	*Wein bridge Oscillator operation*	*Carriers and Modulation*
	SLO-2	*VI Characteristics of diode*	*CS-JFET Amplifier operation*	*parameters*	*& Design*	*Pulse Modulation*
S 3-4	SLO-1 SLO-2	*Lab-1: VI Characteristics of PN Junction Diode*	*Lab-4: Design & Analysis of CE BJT Amplifier*	*Lab-7: Negative Feedback op-amp circuits*	*Lab-10: Analysis & Design of RC Oscillators*	*Lab-13: Demonstration of AM & FM*
S-5	SLO-1	*Applications of diode: HWR & FWR*	*MOSFETs: Structure*	*Op-amp circuits: Scale changer, adder, subtractor*	*LC oscillators operation: Hartley Oscillator*	*Pulse Modulation*
	SLO-2	*Clippers & Clampers*	*Operation*	*HWR & FWR*	*Colpitts Oscillator*	*Digital Transmission, Frequency Division MultiplexingTime Division Multiplexing*
S-6	SLO-1	*Basic operation of Zener diode and its VI characteristics*	*Characteristics*	*Clipper &Clamper*	*555 Timer IC: Basic Operation*	*Networks: RS-232, circuit switching*
	SLO-2	*Zener diode as a voltage regulator*	*Parameters*	*Log & Antilog amplifiers*	*Astable Operation*	*Message switching, TCP/IP*
S	SLO-1	*Lab-2: VI Characteristics of Zener Diode*		*Lab-8: Op-amp Circuits-I*		

7-8	SLO-2		*Lab-5: Design & Analysis of CS-JFET Amplifier*		*Lab-11: 555 Timer Operation & Applications*	*Lab-14: Demonstration of Pulse Modulation*
S-9	SLO-1	*BJTs: Structure & Operation*	*MOSFET as an amplifier*	*Instrumentation amplifier*	*Monostable Operation*	*Radio Transmission: Electromagnetic Spectrum, ground waves, sky waves*
	SLO-2	*Characteristics & Parameters*	*MOSFET as a switch*	*Comparator*	*Applications of 555 Timer*	*antennas, directional transmissions,*
S-10	SLO-1	*CE BJT amplifier operation*	*MOSFET Biasing (Voltage-Divider Biasing)*	*Comparator applications*	*Applications of 555 Timer*	*Transmitters, Receivers*
	SLO-2	*Differential amplifier operation*	*CS-MOSFET amplifier operation*	*Schmitt trigger*	*Voltage-Controlled Oscillators*	*Mobile telephones*
S 11-12	SLO-1 SLO-2	*Lab-3: Applications of PN Junction diode and Zener diode*	*Lab-6: Design & Analysis of CS-MOSFET Amplifier*	*Lab-9: Op-amp Circuits-II*	*Lab-12: VCO Operation*	*Mini Project / Model Practical Examination*

Course Code	18ECO103T	Course Name	MODERN WIRELESS COMMUNICATION SYSTEM	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn to analyze the transmission of various wireless communication systems*
CLR-2 :	*Understand the fundamentals of various networks in wireless communication*
CLR-3 :	*Understand the techniques involved in personal communication services.*
CLR-4 :	*Introduce various wireless systems for 3G and future communication*
CLR-5 :	*Learn to analyze wireless networks for short range communication*
CLR-6 :	*Understand the Fundamentals, Techniques and Networks of Wireless Communication Systems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Discuss the fundamentals of transmission in wireless systems*	*2,3*	*80*	*75*	-	-	-	*H*	-	-	-	-	-	-	-	-	*H*		
CLO-2 :	*Provide an overview of various approaches to communication networks*	*2,3*	*80*	*85*	-	-	-	*H*	-	-	-	-	-	-	-	-	-	-	*H*
CLO-3 :	*Study the numerous different-generation technologies with their individual pros and cons*	*2,3*	*85*	*85*	-	-	-	*H*	-	-	-	-	-	-	-	-	*M*	-	*H*
CLO-4 :	*Discuss about the principles of operation of the different access technologies like FDMA, TDMA, SDMA and CDMA and their pros and cons.*	*2,3*	*85*	*80*	-	-	-	*H*	-	-	-	-	-	-	-	-	*M*	-	*H*
CLO-5 :	*Learn about the various mobile data services and short range networks.*	*2,3*	*85*	*80*	-	-	-	-	-	-	-	-	-	-	-	-	-	-	*H*
CLO-6 :	*Gain knowledge on Fundamentals, Techniques and Networks of Wireless Communication Systems*	*2,3*	*85*	*80*	-	-	-	-	-	-	-	-	-	-	-	-	*H*	-	-

Duration (hour)		Transmission Fundamentals	Network Concepts	Personal Communication Services	3G and Beyond	Mobile Data Services and Short- Range Network
		9	9	9	9	9
S-1	SLO-1	*Cellphone Generations*	*Communication Networks*	*Personal communication Introduction, HSCSD, GPRS, D-AMPS, CDMA One, CDMA Two, Packet Data Systems*	*3G Introduction*	*Mobile Data Services Introduction Messaging, wireless web, WAP, site design Short-Range Wireless Networks: Unlicensed spectrum, WLANs, cordless telephony, IrDA, Bluetooth Smart Phones: Future phones, mobile OSs, smart phone applications.*
	SLO-2	*1G and 2G*	*LANs*	*GSM*	*IMT-2000 Introduction*	*Data Services*
S-2	SLO-1	*2.5G*	*MANs*	*GSM*	*IMT-2000*	*Messaging*
	SLO-2	*3G*	*WANs*	*HSCSD*	*IMT-2000*	*Wireless web*
S-3	SLO-1	*4G Transmission Introduction*	*Circuit switching*	*HSCSD*	*W-CDMA Introduction*	*WAP*
	SLO-2	*4G Transmission Fundamentals*	*Packet switching*	*GPRS*	*W-CDMA*	*Site design*
S-4	SLO-1	*Time domain concepts*	*ATM Cellular Networks Introduction*	*GPRS*	*CDMA 2000 Introduction*	*Short-Range Wireless Networks*
	SLO-2	*Frequency domain concepts*	*Cells*	*D-AMPS*	*EDGE*	*Unlicensed spectrum*
S 5-6	SLO-1 SLO-2	*Radio Media*	*Duplexing*	*D-AMPS*	*EDGE*	*WLANs*
S-7	SLO-1	*Analog Vs Digital*	*Multiplexing*	*CDMA Introduction*	*Wi-Fi Introduction*	*Cordless telephony*
	SLO-2	*Channel capacity*	*Voice coding*	*CDMA One*	*Wi-Fi*	*IrDA*
S-8	SLO-1	*Transmission media*	*Multiple Access Techniques: FDMA*	*CDMA One*	*WiMAX Introduction*	*Bluetooth Smart Phones*
	SLO-2	*Signaling Schemes*	*TDMA, SDMA*	*CDMA Two*	*WiMAX*	*Future phones*
S-9	SLO-1	*Carrier-based signaling,*	*CDMA*	*CDMA Two*	*OFDM*	*Mobile OSs*
	SLO-2	*Spread-spectrum signaling*	*Spectral efficiency*	*Packet Data Systems*	*MIMO*	*Smart phone applications*

Course Code	18ECO104J	Course Name	AUDIO AND SPEECH SIGNAL PROCESSING	Course Category	O	Open Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To explore about Speech signal processing*
CLR-2 :	*To explore about the human auditory system*
CLR-3 :	*Feature Extraction of Speech signal using Time characteristics*
CLR-4 :	*Frequency characteristics of Speech signal*
CLR-5 :	*Provide a foundation for developing applications in this field.*
CLR-6 :	*Understand the concept of speech processing both in time and frequency domain*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understand the functioning of the human vocal and auditory systems in terms of signal processing*	*1*	*90*	*68*	*H*		*H*		*H*				-	-	-	-	*M*	*H*	
CLO-2 :	*Analyze the function of feature extraction in speech and audio signal processing using Time Domain Characteristics*	*2*	*85*	*67*	*H*			*H*				*M*	-	-	-	-	*M*		*H*
CLO-3 :	*Understand the frequency characteristics of speech signal*	*2*	*85*	*68*	*H*		*H*			*M*		*M*	-	-	-	-		*H*	*H*
CLO-4 :	*Understand the Digital models for speech signal*	*1&2*	*85*	*65*	*H*		*H*	*H*					-	-	-	-	*H*	*M*	
CLO-5 :	*Understand the elements of music*	*2&3*	*85*	*66*			*H*		*H*			*H*	-	-	-	-	*H*		*H*
CLO-6:	*Understand Speech signal processing in time and frequency domain and their models.*	*1,2,3*	*85*	*68*	*H*		*H*			*M*		*H*	-	-	-	-		*M*	*M*

		Basic Audio Processing	Human auditory system	Speech Signal Analysis in Time Domain	Speech Signal Analysis in Frequency Domain	Speech and Audio processing applications
Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Introduction to Digital audio*	*Human auditory system*	*Speech signal analysis*	*Short Time Fourier analysis*	*Introduction to Speech recognition*
	SLO-2	*Capturing and converting sound*	*Human auditory system*	*Speech signal analysis*	*Short Time Fourier analysis*	*Introduction to Speech recognition*
S-2	SLO-1	*Sampling of sound wave*	*simplified model of cochlea*	*Segmental, sub-segmental levels*	*Filter bank analysis*	*Complete system for an isolated word recognition with vector quantization /DTW*
	SLO-2	*Handling audio in MATLAB*	*simplified model of cochlea*	*Suprasegmental levels*	*Formant extraction and Pitch extraction*	*Complete system for an isolated word recognition with vector quantization /DTW*
S 3-4	SLO-1 SLO-2	*Lab 1: Read & write a speech signal, Record a speech signal, playback, convert into a wave file, plot the speech signal, and spectrogram plot.*	*Lab 4: Short-term energy of a speech signal*	*Lab 7: Estimation of pitch period using simplified inverse filter tracking (SIFT) algorithm*	*Lab 10: Phoneme-level segmentation of speech*	*Lab 13: Compute pitch period and fundamental frequency for speech signal*
S-5	SLO-1	*Normalization*	*Sound pressure level and loudness*	*Time domain parameters of speech signal*	*Homomorphic speech analysis*	*Complete system for speaker identification, verification*
	SLO-2	*Audio processing*	*Sound pressure level and loudness*	*Time domain parameters of speech signal*	*Cepstral analysis of Speech*	*Introduction to speech enhancement*
S-6	SLO-1	*Segmentation*	*Sound intensity and Decibel sound levels*	*Methods for extracting the parameters Energy*	*Formant and Pitch Estimation*	*Introduction to speech enhancement*
	SLO-2	*Analysis of window sizing*	*Sound intensity and Decibel sound levels*	*Average ,Magnitude*	*Linear Predictive analysis of speech*	*Speech enhancement using spectral subtraction method*
S 7-8	SLO-1 SLO-2	*Lab 2: Convert into a wave file, plot the speech signal, and spectrogram plot*	*Lab 5: Short-time Fourier transform magnitude spectrum*	*Lab 8: Estimation of pitch period using harmonic product spectrum*	*Lab 11:To study the quantization and aliasing effect of speech signal*	*Lab 14: Short term speech analysis*

S-9	SLO-1	*Visualization*	*Concept of critical band*	*Zero crossing Rate*	*Autocorrelation method, Covariance method*	*Introduction to Text to speech conversion*
	SLO-2	*Sound generation*	*Uniform filter bank , Non- uniform filter bank*	*Silence Discrimination using ZCR and energy*	*Solution of LPC equations*	*Introduction to Musical instrument classification*
S-10	SLO-1	*Speech production mechanism, Charistics of speech*	*Mel scale and bark scale,*	*Short Time Auto Correlation Function*	*Durbin's Recursive algorithm, Application of LPC parameters*	*Musical Information retrieval.*
	SLO-2	*Understanding of speech*	*Speech perception: vowel perception*	*Pitch period estimation using Auto Correlation Function*	*Pitch detection using LPC parameters, Formant analysis*	*Sample Programs*
S 11-12	SLO-1 SLO-2	*Lab 3:Cepstrum smoothed magnitude spectrum*	*Lab 6: (i)Linear prediction magnitude spectrum, (ii) (ii) Estimation of formant frequencies using linear prediction*	*Lab 9: Pitch and duration modification using time-domain pitch synchronous overlap and add (TD-PSOLA) method*	*Lab 12:: Speech signal to symbol transformation using wavesurfer*	*Lab 15: Study of Praat*

Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand what is Sound Navigation and Ranging (SONAR) and how it can be used in underwater applications.*
CLR-2 :	*Study about Ocean Acoustic Processing and sound wave propagation and analyze sea floor characteristics and ocean sounds.*
CLR-3 :	*Understand about Underwater reverberation and how types of noises affects the underwater acoustics signal data analysis.*
CLR-4 :	*Study about Acoustic transducers.*
CLR-5 :	*Know which transducers can be used for underwater applications.*
CLR-6 :	*Understand the basic theory and signal processing application for underwater communication and navigation.*

		Learning			Program Learning Outcomes (PLO)

		Sound Navigation and Ranging (SONAR)	Ocean Acoustic Processing and sound wave propagation	Reverberation and Noises	Acoustic Transduction	SONAR Application
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to SONAR equation,*	*Processing ocean sound-Sampling rules*	*Reverberation-Scattering, back scattering strength and target strength*	*Piezoelectric transducer-Introduction*	*Echo sounder*
	SLO-2	*Source Intensity, Source Directivity*	*Spatial sampling and Temporal sampling*	*Surface and bottom scattering*	*Piezoelectric transducer-33-Mode longitudinal vibrator*	*Echo Sounder*
S-2	SLO-1	*Transmission loss*	*Filter operations-Finite Fourier transformation*	*Volume scattering, bottom scattering, reverberation target strength*	*Piezoelectric transducer-33-Mode longitudinal vibrator*	*Sub-bottom profiling*
	SLO-2	*Transmission loss*	*Filter operations-Time domain view of Band pass filtering. convolution operations, frequency domain*	*Calculation of reverberation for use in the sonar equation, Volume reverberation level*	*Electrostrictive transducers*	*Fishing sonars*
S-3	SLO-1	*Target Strength*	*Gated Signals-Dependence of Spectrum on ping carrier periodicity*	*Reverberation frequency spread and Doppler gain potential-Power spectral density of a CW pulse*	*Electrostrictive transducers*	*Side scan terrain mapping sonar*
	SLO-2	*Reflection Intensity Loss Coefficient*	*Power spectra of random signal-Signal having random characteristics, Spectral density,*	*Environmental frequency sampling*	*Magnetostrictive transducers*	*Side scan terrain mapping sonar*
S-4	SLO-1	*Sea-floor Loss,*	*Radom signal simulations-Intensity spectral density, Spectral smoothing*	*Frequency spreading due to transmitter and receiver motion*	*Magnetostrictive transducers*	*Acoustic positioning and navigation*
	SLO-2	*Sea-surface Loss*	*Matched filters and autocorrelation*	*Frequency spreading due to target, important observation with respect to reverberation*	*Electostatic Transducers*	*Acoustic positioning and navigation*

S-5	SLO-1	*Noise, Reverberation*	*Sounds in the oceans-natural physical sounds and biological sounds*	*Noise-Ambient noise models*	*Electostatic Transducers*	*3D Imaging Processing-data model*
	SLO-2	*Active and Passive Sonar Equations*	*Sound propagation in the ocean and underwater acoustic channel-Sound wave and vibration, velocity of sound*	*Ambient noise-seismic noise, ocean turbulence, shipping noise*	*Variable Reluctance Transducers*	*3D Imaging Processing-acquisition of 3D information*
S-6	SLO-1	*Passive Sonar Equations, Signal-to-Noise Ratio*	*Sound propagation in the ocean and underwater acoustic channel-Sound wave velocity of sound*	*Wave noise, thermal noise*	*Variable Reluctance Transducers*	*3D Imaging Processing-matrix approach and real time systems*
	SLO-2	*Signal Excess, Figure of Merit*	*Wave and ray theories of underwater sound fields*	*Rain noise, temporal variability of ambient noise, depth effects of noise*	*Moving coil transducers*	*3D Imaging Processing-Image representation, Acoustic image processing*
S-7	SLO-1	*Active SONAR target strength*	*Wave and ray theories of underwater sound fields*	*Under ice noise*	*Moving coil transducers*	*3D Imaging Processing-Segmentation and reconstruction of underwater tubular structures*
	SLO-2	*Active SONAR- reverberation, detection threshold*	*Wave and ray theories of underwater sound fields*	*Spatial coherence of ambient noise*	*Equivalent circuits-Basics Circuit Resonance*	*3D Imaging Processing-Segmentation and reconstruction of underwater tubular structures*
S-8	SLO-1	*Active Sonar Sources- Source Level, Cavitation*	*Sound absorption in sea water and its characteristics*	*Self-noise-Flow noise*	*Circuit Q and Bandwidth*	*Acoustic communication-Cross attributes of the received signal*
	SLO-2	*Near-Field Interactions Explosive Sources*	*Upper boundary of acoustic channel*	*Self-noise – Flow noise*	*Transducers as projectors-principle*	*Acoustic communication-channel transfer function*
S-9	SLO-1	*Physics of Shock Waves in Wate, Bubble Pulses*	*Lower boundary of acoustic channel and its characteristics*	*Self noise-turbulent noise coherence*	*Transducers as Hydrophones-principles of operations*	*Acoustic communication-combating multipath*
	SLO-2	*Pros and Cons of Explosive Charges, Parametric Acoustic Sources*	*sound field in shallow water*	*Self noise-strumming noise*	*Transducers as Hydrophones-simplified equivalent circuit*	*Acoustic communication-diversity reception, equalization*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Analyze the basic laws and theorems of light associated with the optical fiber communication and the classification of optical fibers*
CLR-2 :	*Address concepts related to transmission characteristics such as attenuation and dispersion.*
CLR-3 :	*Explore the fundamentals of optoelectronics display devices, Sources and Detectors*
CLR-4 :	*Gain to information on Optical modulators and amplifiers*
CLR-5 :	*Illustrate the integration methods available for optoelectronic circuits and devices*
CLR-6 :	*Utilize the basic optical concepts applied in various engineering problems and identify appropriate solutions*

Duration (hour)		Introduction to Optical Fibers	Transmission Characteristics of Optical Fibers	Display Devices, Light Sources and Detection Devices	Optoelectronic Modulators and Switching Devices	Optoelectronic Integrated Circuits
		9	9	9	9	9
S-1	SLO-1	*Evolution of fiber optic system*	*Attenuation – Absorption, Attenuation units*	*Display devices – Photo luminescence*	*Analog and Digital Modulation*	*Optoelectronic integrated circuits - Introduction*
	SLO-2	*Elements of an optical fiber transmission link*	*Attenuation – Scattering losses*	*Cathode luminescence*	*Electro optic modulators – Electro optic effect – Longitudinal electro optic modulator*	*Need for Integration - Hybrid and Monolithic Integration*
S-2	SLO-1	*Elements of an optical fiber transmission link*	*Attenuation – Bending losses, microbending and macro bending losses*	*Electro luminescence*	*Electro optic modulators – Transverse electro optic modulator*	*Hybrid and Monolithic Integration*
	SLO-2	*Advantages of fiber optic system*	*Attenuation - Core cladding losses*	*Injection luminescence*	*Acousto optic modulators – Transmission type – Raman Nath modulator*	*Materials and processing of OEICs*
S-3	SLO-1	*Characteristics and behavior of light*	*Signal distortion in optical waveguides*	*Light source materials*	*Acousto optic modulators – Reflection type – Bragg modulator*	*Application of optoelectronic integrated circuits*
	SLO-2	*Total internal reflection*	*Types of dispersion-Intramodal and Intermodal dispersion*	*Surface emitting LEDs*	*Solving Problems*	*Slab and Strip Waveguides*
S-4	SLO-1	*Acceptance angle*	*Material dispersion*	*Edge emitting LEDs*	*Optical switching and logic devices – self-electro-optic-device*	*Integrated transmitters and receivers – Front end photo receivers*
	SLO-2	*Numerical aperture, Critical angle*	*Material dispersion, Waveguide dispersion*	*Quantum efficiency and LED power – Internal quantum efficiency derivation*	*Optical switching and logic devices – Bipolar controller modulator*	*Integrated transmitters and receivers – photoreceiver noise and bandwidth considerations*
S-5	SLO-1	*Solving Problems*	*Waveguide dispersion*	*Quantum efficiency and LED power – External quantum efficiency and total LED power*	*Optical switching and logic devices- tunable threshold logic gate – Switching speed and energy.*	*Integrated transmitters and receivers – PIN-HBT photoreceivers*

	SLO-2	*Solving Problems*	*Signal distortion in single mode fibers*	*Solving Problems*	*Optical Amplifiers – General applications of optical amplifiers*	*Integrated transmitters and receivers – OEIC transmitters – equivalent circuit for integrated receivers*
S-6	SLO-1	*Ray optics*	*Polarization mode dispersion*	*Semiconductor laser diode*	*Semiconductor optical amplifiers – Basic configuration*	*Integrated transmitters and receivers – Complex circuits and arrays*
	SLO-2	*Types of rays*	*Polarization mode dispersion, Intermodal dispersion*	*Modes and threshold condition*	*Semiconductor optical amplifiers – Optical gain - Limitations*	*Integrated transmitters and receivers - optical control and microwave oscillators*
S-7	SLO-1	*Optical fiber modes*	*Intermodal dispersion*	*Photo detection principle*	*Erbium doped fiber amplifiers – energy level diagram and amplification mechanism*	*Guided wave devices – Waveguide and couplers*
	SLO-2	*Optical fiber configurations*	*Solving Problems*	*PIN Photodiode*	*Erbium doped fiber amplifiers – EDFA configuration*	*Guided wave devices – Active guided wave devices*
S-8	SLO-1	*Single mode fibers*	*Solving Problems*	*PIN photodiode - Avalanche Photodiode*	*Solving Problems*	*Guided wave devices – Mach Zehnder Interferometers*
	SLO-2	*Multimode Fibers*	*Pulse Broadening in Graded Index Waveguides*	*Avalanche Photodiode*	*Solving Problems*	*Active couplers*
S-9	SLO-1	*Step Index Fibers*	*Mode Coupling*	*Noise mechanism in photodetectors*	*Fiber Raman Amplifiers – Configuration – Forward pumping*	*Active Couplers*
	SLO-2	*Graded Index Fibers*	*Design Optimization of Single Mode Fibers*	*Solving Problems*	*Fiber Raman Amplifiers – Backward pumping*	*Active Couplers*

Course Code	18ECO109J	Course Name	EMBEDDED SYSTEM DESIGN USING RASPBERRY PI	Course Category	O	Open Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understanding the programing of python for Raspberry Pi*
CLR-2 :	*Applying python programming on GPIO and interfacing motors using Raspberry Pi*
CLR-3 :	*Applying python programming on GPIO switch and keyboard*
CLR-4 :	*Create insights to the concepts and programming of motion detection ,GPS programming, light sensor ,gas detection*
CLR-5 :	*Analyze and understand the working principle and data sheet of temperature sensor, gas sensor ,ADC, ultrasonic rangefinder, Acceleration and light sensor*
CLR-6 :	*Utilize the technology of node js ,cloud service and MQTT Protocol for moving sensor data to web*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Apply python for Raspberry Pi*	2	80	70	H	H	-	-	H	-	-	-	-	-	-	-	H	-	-
CLO-2 :	*Analyze data sheet and functioning of sensors*	2	85	75	H	H	H	H	H	-	-	-	-	-	-	-	-	-	H
CLO-3 :	*Apply python programming on GPIO of Raspberry Pi and interfacing of sensor*	2	75	70	H	H	H	H	-	-	-	-	-	-	-	-	H	-	-
CLO-4 :	*Apply python programming on GPIO of Raspberry Pi to interfacing of actuators*	2	85	80	H	H	H	H	H	-	-	-	-	-	-	-	H	-	-
CLO-5 :	*Apply python programming on GPIO of Raspberry Pi to interfacing input and display device*	2	85	75	H	-	H	H	-	-	-	-	-	-	-	-	H	-	-
CLO-6 :	*Apply technology of node js ,cloud service and MQTT Protocol for IOT application*	2	80	70	H	-	H	-	H	-	-	-	-	-	-	-	-	-	H

Duration (hour)		Basic python programming	Programming interrupts –Motor control, switches and keyboard interface	Sensor interface and programming	Temperature sensor and display interface programming	Publishing sensor data on web service
		12	12	12	12	12
S-1	SLO-1	*Python Basics- Editing Python Programs with IDLE, Variables, displaying Output, Reading User Input , Arithmetic, Creating Strings*	*Programming with Interrupts*	*Detecting Movement-PIR sensor*	*Measuring Temperature Using a Digital Sensor*	*publish sensor data on web service-building a home security dash board*
	SLO-2	*Concatenating (Joining) Strings, Converting Numbers to Strings, Converting Strings to Numbers ,Find the Length of a String, Find the Position of One String Inside Another, Extracting Part of a String, Replacing One String of Characters with Another Inside a String ,Converting a String to Upper- or Lowercase*	*Programming with Interrupts*	*Data sheet analysis of PIR sensor*	*Data sheet analysis Digital Temperature Sensor*	*publish sensor data on web service-building a home security dash board*
S-2	SLO-1	*Running Commands Conditionally, Comparing Values, Logical Operators,*	*Controlling GPIO Outputs Using a Web Interface*	*Adding GPS to the Raspberry Pi*	*Measuring Distance-ultrasonic rangefinder*	*MQTT Protocol*
	SLO-2	*Repeating Instructions an Exact Number of Times ,Repeating Instructions Until Some Condition Changes , Breaking Out of a Loop, Defining a Function in Python*	*Controlling GPIO Outputs Using a Web Interface*	*Data sheet analysis of GPS*	*Data sheet analysis ultrasonic rangefinder*	*MQTT Protocol- installation and setting account ,token creation ,reading sensor data and pushing to thingsboard*
S-3-4	SLO-1	*Lab 1: Arithmetic and string*	*Lab 7: Programming on interrupts*	*Lab 13: Programming on PIR sensor*	*Lab 19: Programming on Digital Temperature Sensor*	*Lab 25: Publish sensor data on web service*
	SLO-2	*Lab 2: Loop*	*Lab 8: Programming on Web Interface*	*Lab 14: Programming on GPS*	*Lab 20: Programming on ultrasonic rangefinder*	*Lab 26: Publish sensor data on web service*

S-5	SLO-1	Creating a List , Accessing Elements of a List, Find the Length of a List , Adding Elements to a List , Removing Elements from a List,	Controlling Servo Motors using PWM	Using Resistive Sensors	Logging to a USB Flash Drive	basic of java scripts –node.js
	SLO-2	Creating a List by Parsing a String, Iterating over a List, Enumerating a List, Sorting a List, Cutting Up a List. Applying a Function to a List	Controlling the Speed of a DC Motor	Measuring Light	Logging to a USB Flash Drive	Modules-HTML module
S-6	SLO-1	Creating a Dictionary ,Accessing a Dictionary, Removing Things from a Dictionary,	Controlling the Direction of a DC Motor	Detecting Methane	Using a Four-Digit LED Display	Modules –file –event
	SLO-2	Iterating over Dictionaries	Using a Unipolar Stepper Motor	Data sheet analysis of gas sensor	Displaying Messages on an I2C LED matrix with data sheet discussion	Modules –file –event
S 7-8	SLO-1	Lab 3: Program on list	Lab 9: Programming on Stepper Motor	Lab 15: Programming on light sensor	Lab 21: Programming on Four-Digit LED Display	Lab 27: Programming on node js HTML module
	SLO-2	Lab 4: Program on Dictionary	Lab 10: Programming on DC Motor	Lab 16: Programming on Gas sensor	Lab 22: Programming on I2C LED matrix	Lab 28: Programming on node js file and event module
S-9	SLO-1	Controlling Hardware-Connecting an LED-Controlling the Brightness of an LED	Using a Bipolar Stepper Motor	Measuring a Voltage using MCP3008 And data sheet of MCP3008	Displaying Messages on an Alphanumeric LCD	LED blinking using node.js
	SLO-2	a Buzzing Sound	Building a Simple Robot Rover	Using Resistive Sensors with an ADC	Displaying Messages on an Alphanumeric LCD	LED blinking using node.js
S-10	SLO-1	Switching a High-Power DC Device Using a Transistor	Digital Inputs-Connecting a Push Switch-Toggling with a Push Switch-Using a Two-Position Toggle or Slide Switch	Measuring Temperature with an ADC	Cloud service for IOT	building java script client using MQTT broker
	SLO-2	Switching a High-Power Device Using a Relay	Using a Rotary (Quadrature) Encoder and Using a Keypad	Measuring Acceleration and data sheet discussion of Acceleration sensor	Cloud service for IOT	building java script client using MQTT broker
S 11,12	SLO-1	Lab 5: LED blinking and Brightness control	Lab 11: Programming on Switch	Lab 17: Programming on ADC	Lab 23: Programming on an Alphanumeric LCD	Lab 29: Programming on LED blinking using node.js
	SLO-2	Lab 6: Switching a High-Power DC Device	Lab 12: Programming on Keypad	Lab 18: Programming on Measuring Acceleration	Lab 24: Programming on an Alphanumeric LCD	Lab 30: Building java script client using MQTT broker

							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards		Nil	

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the tools available for 3D printing*
CLR-2 :	*Familiarize with 3D design software and hardware*
CLR-3 :	*Understand the 3D design criteria and its limitations.*
CLR-4 :	*Learn the contemporary technology available for 3D design and printing*
CLR-5 :	*Understand various post processing methods involved in 3D printing technology*
CLR-6 :	*Develop the skillset on 3D component design and development using contemporary commercial software and hardware available.*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Apply the 3D printing tools for components design*	*1*	*80*	*60*	*M*				*M*										
CLO-2 :	*Able to optimistically select the 3D design software and hardware for the given problem*	*1*	*80*	*60*	*M*				*H*										
CLO-3 :	*Capability to solve 3D design components design problems*	*2*	*75*	*60*	*M*			*M*										*M*	
CLO-4 :	*Choose the contemporary technology available for 3D design and printing*	*3*	*80*	*60*			*M*											*M*	*L*
CLO-5 :	*Apply various post processing methods involved in 3D printing technology*	*2*	*80*	*60*		*H*													
CLO-6 :	*Ability to develop the skillset on 3D component design and development using contemporary commercial software and hardware available.*	*2*	*80*	*60*											*M*			*M*	

Duration (hour)		Introductions to 3D design tools	Three-dimensional (3D) Modeling	3D Design Fundamentals and Projects	3D Printing and its Technologies	Post Processing - Product Visualization and Print Cleaning
		12	12	12	12	12
S-1	SLO-1 SLO-2	*Introduction to Maya GUI - Object creation workflow, Constructing object primitives to scale and with accuracy*	*An overview of CAD software packages - Introduction to Fusion 360 - Drawing based workflow, Drawing constraints - Surfacing operations.*	*The good, the bad, and the ugly of design*	*History of 3D printing - Overview of 3D Printing technologies*	*Workflows for printing*
S-2	SLO-1 SLO-2	*Duplication and arrayed duplication - Grid and point/vertex snapping*	*Moving Parts and Articulation Hinges - Ball and sockets*	*Prominent Designers*	*Selective Laser Sintering (SLS) Direct Metal Laser Sintering (DMLS)*	*Software and Drivers - Formats for Printing (SLA, OBJ, CAD, etc.)*
S 3-4	SLO-1 SLO-2	*Understanding NURBS: NURBS Surfaces advantages, Similarities and differences between NURBS and CAD drawings Curve and surface construction*	*Creating a part negative, Creating Text in Maya the proper way (NURBS Curves, surface lofts, conversion to polygon) Painterly tools (Sculpt Geometry Tool, etc.)*	*Franchises Success stories, Pop culture*	*Vacuum forming - Resin casting - Injection Molding - Terms and standards for injection molding systems*	*Post and Export Print Lab setup*
S-5	SLO-1 SLO-2	*Understanding 3D geometry - Modeling workflows for Polygons - Additive vs. Subtractive Tools - Mesh editing*	*Flexibility and elasticity, Locks, bolts, and fasteners Threading (taps and dies)*	*Early decision making criteria*	*Fused Deposition Modeling (FDM) - Stereolithography (SLA)*	*Cleanup and airtight modeling*
S-6	SLO-1	*Best Practices for constructing printable polygon meshes*	*Interfacing, support, and reinforcement*	*Knowing the product*	*Laminated Object Manufacturing (LOM) - Electron Beam Melting (EBM)*	*Loading models and arranging print stage*
	SLO-2	*Fundamental Structure - Combining, merging, and sewing up polygon meshes*				

S 7-8	SLO-1	*Best Practices for constructing printable polygon meshes - Fundamental Structure - Combining, merging, and sewing up polygon meshes*	*How the modeling software packages differ from CAD packages, Sketch/drawing based workflows, Similarities and differences between CAD and NURBS.*	*Brainstorming and critique in the early design phase Group critiques of in-progress projects*	*Printing Resolutions and Tolerances Materials Properties (Temperature, Flexibility, Strength, Brittleness)*	*Printing - Removing support material*
	SLO-2					
S-9	SLO-1	*Understanding two-manifold vs. non-manifold geometry*	*Form and function visualizing the assembly process*	*Early decision-making criteria Knowing the product Vision and Reality*	*3D Printing (3DP) – Selective laser melting (SLM)*	*Special topics – 3D Scanners and its types*
	SLO-2	*Exporting geometry - Laying out a simple model on a stage for print*				
S-10	SLO-1	*Hollow forms and the importance of reducing volume Cost of size, cost of volume, cost of detail, cost of time State table*	*Complex interactions and motorizations*	*Calculating the total cost Progress checks and group critiques of in-progress projects*	*Final cleanup and processing of files for printing*	*Reverse engineering, Concepts and its hardware and software*
	SLO-2					
S 11-12	SLO-1	*Clean and uniform topology, Illustrator, IGES, and other import/export pipelines*	*Broad overview of manufacturing techniques Molding, sculpting, lathing, lofting, welding, cutting, drilling, gluing, etc*	*Brainstorming and critique in the early design phase Group critiques of in-progress projects*	*Planning for injection molding - 3D Printing for injection molding*	*High speed machining*
	SLO-2

Course Code	18ECO126T	Course Name	SPORTS BIOMECHANICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECE267J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamental muscle action and locomotion in biomechanical point of view*
CLR-2 :	*Get an idea about the movement patterns and causes of movements*
CLR-3 :	*Understand the qualitative and quantitative analysis of sports movements*
CLR-4 :	*Acquire an idea about the basic concept of jumping & aerial movement and throwing & hitting*
CLR-5 :	*Get an idea about the injury prevention, rehabilitation and special Olympic sports*
CLR-6 :	*Get an overall idea about the applications of biomechanics in sports*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Illustrate the muscle action in sport and locomotion*	*1*	*80*	*70*	*M*												*L*		
CLO-2 :	*Analyze the movement patterns and its causes*	*1,2*	*80*	*70*	*M*												*M*		
CLO-3 :	*Describe the Qualitative and Quantitative analysis of sports movements*	*2*	*80*	*70*	*M*												*M*		
CLO-4 :	*Analyze the movement of action such as jumping, throwing, hitting and aerial movement*	*2*	*80*	*70*			*L*										*L*	*L*	*L*
CLO-5 :	*Identify the injury scenario and special Olympic sports*	*2*	*80*	*70*													*L*	*L*	*L*
CLO-6 :	*Outline the major concepts in sports biomechanics*																		

Duration (hour)		Muscle Action in Sport and Exercise and locomotion- Biomechanical view	Movement patterns and its causes	Qualitative and Quantitative analysis of sports movements	Jumping and Aerial Movement, Throwing and Hitting	Injury Prevention, Rehabilitation and Special Olympic Sports
		9	9	9	9	9
S-1	SLO-1	*Introduction to Biomechanics*	*Introduction to Movement patterns*	*Introduction to Analysis of Sport Movements*	*Introduction to Aerial movement*	*Mechanisms of Musculoskeletal Injury*
	SLO-2	*Applications of Biomechanics*	*Defining human movements*	*A structured analysis framework*	*Types of Aerial Movement - Rotation during flight, Motion of the mass centre*	*Musculoskeletal Loading During Landing*
S-2	SLO-1	*Neural Contributions to Changes in Muscle Strength*	*Fundamental movements-Walking, Running*	*Preparation stage*	*Types of Aerial Movement : Somersaulting, Twisting,*	*Sport-Related Spinal Injuries and their Prevention*
	SLO-2	*Mechanical Properties and Performance in Skeletal Muscles*	*Fundamental movements-Throwing, Jumping*	*Observation stage*	*Control of aerial movement*	*Sport-Related Spinal Injuries and their Prevention*
S-3	SLO-1	*Muscle-Tendon Architecture*	*qualitative and quantitative movement*	*Evaluation and diagnosis stage*	*Introduction : High Jump*	*Impact Propagation and its Effects on the Human Body*
	SLO-2	*Athletic Performance*	*Comparison of qualitative and quantitative movement analysis*	*Intervention stage – providing appropriate feedback*	*Techniques of Jumping - Skating, Springboard and Platform Diving*	*Impact Propagation and its Effects on the Human Body*
S-4	SLO-1	*Eccentric Muscle Action in Sport and Exercise*	*Movement patterns-geometry of motion*	*Identifying critical features of a movement*	*Determinants of Successful Ski-Jumping Performance*	*Neuromechanics of the Initial Phase of Eccentric Contraction*
	SLO-2	*Stretch–Shortening Cycle of Muscle Function*	*Fundamentals of movement*	*Identifying critical features of a movement*	*Determinants of Successful Ski-Jumping Performance*	*Induced Muscle Injury*
S-5	SLO-1	*Biomechanical Foundations of Strength*	*Linear motion and the centre of mass*	*The use of videography in recording sports movements*	*Principles of Throwing*	*Manual Wheelchair Propulsion*
	SLO-2	*Power Training*	*The geometry of angular motion and the coordination of joint rotations*	*The use of videography in recording sports movements*	*The Flight of Sports Projectiles*	

S-6	SLO-1	*Factors Affecting Preferred Rates of Movement in Cyclic Activities*	*Forces in sport*	*Recording the movement*	*Javelin Throwing: an Approach to Performance Development*	*Sports after Amputation*
	SLO-2	*The Dynamics of Running*	*Combinations of forces on the sports performer*	*Experimental procedures -Two dimensional videography*		
S-7	SLO-1	*Resistive Forces in Swimming*	*Momentum and the laws of linear motion*	*Experimental procedures -Three dimensional videography*	*Shot Putting*	*Biomechanics of Dance*
	SLO-2	*Propulsive Forces in Swimming*	*Force–time graphs as movement patterns*	*Data processing*	*Hammer Throwing: Problems and Prospects*	
S-8	SLO-1	*Performance-Determining Factors in Speed Skating*	*Determination of the centre of mass of the human body*	*Projectile motion*	*Hammer Throwing: Problems and Prospects*	*Biomechanics of Martial arts*
	SLO-2	*Cross-Country Skiing: Technique*	*Fundamentals of angular kinetics and Generation and control of angular momentum*	*Linear velocities and accelerations caused by rotation*	*Hitting*	
S-9	SLO-1	*Cross-Country Skiing: Equipment*	*Measurement of force*	*Rotation in three-dimensional space*	*Kicking*	*Biomechancis of YOGA*
	SLO-2	*Factors Affecting Performance*	*Measurement of pressure*	*Rotation in three-dimensional space*	*Simple concept problems*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the importance of micro system technology*
CLR-2 :	*Learn the operating principle of various micro sensors and actuators*
CLR-3 :	*Impart the applications of various micro fabrication techniques*
CLR-4 :	*Understand the differences and need for microfabrication*
CLR-5 :	*Operate MEMS design tools to design simple micro devices*
CLR-6 :	*Understand recent developments and challenges in MEMS*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Appreciate the fundamental concepts in MEMS technology*	2,3	80	80	H	-	-	-	-	H	-	-	-	-	-	H	H	-	H
CLO-2 :	*Understand the fabrication and machining techniques of MEMS devices*	1,2	80	80	H	-	-	-	-	H	-	-	-	-	-	H	-	-	H
CLO-3 :	*Familiarize with the concepts of packaging of MEMS devices*	1	80	80	H	-	-	H	-	H	-	-	-	-	-	H	H	-	H
CLO-4 :	*Appreciate the significance of micro fabrication processes*	3	80	80	H	-	-	H	-	-	-	-	-	-	-	H	-	-	H
CLO-5 :	*Design and Simulate simple structures using MEMS software*	3	80	80	H	-	H	H	H	-	-	H	H	-	-	H	H	-	H
CLO-6 :	*Analyze recent trends and developments in MEMS technology*	3	80	80	H	-	-	H	-	-	-	-	-	-	-	H	H	-	H

		Introduction	Fabrication overview	Micromachining	Bonding & Sealing	Recent trends
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to MEMS and Brief recap of Macro devices*	*Introduction to Micro fabrication process*	*Introduction of micro machining(MMC) process*	*Introduction to MEMS packaging*	*Introduction to design tools and simulation*
	SLO-2	*Microelectronics and Micro systems*	*Significance of each technique*	*Significance of MMC*	*Challenges in packaging*	*FEM analysis*
S-2	SLO-1	*Scaling laws in geometry*	*Process Description of Photolithography*	*Bulk MMC process – merits and demerits*	*Different levels of Packaging*	*Design of a silicon die for a micro pressure sensor*
	SLO-2	*Silicon as ideal material and as substrate*	*Implementation of Photolithography*	*Sequence of steps*	*Die, device and system level*	*Simulation in software*
S-3	SLO-1	*Si wafer production*	*Process Description of CVD*	*Significance of Isotropic etching*	*Differences in IC packaging technology and MEMS packaging*	*Application of MEMS in automotive industry*
	SLO-2	*Cz process*	*Implementation, merits and demerits of CVD*	*Anisotropic etching*		*Airbag deployment*
S-4	SLO-1	*Sequential steps in wafer processing*	*Process Description of PVD*	*Surface MMC process*	*Die Preparation*	*Optical MEMS Application*
	SLO-2		*Implementation, merits and demerits of PVD*	*Sequence of steps*	*Plastic encapsulation and its significance*	*Micro mirrors*
S-5	SLO-1	*Chemical and mechanical properties of Si and compounds*	*Process Description, implementation of Ion implantation*	*Challenges in surface MMC*	*Types of wire bonding Thermo compression type*	*Micro fluidics Application*
	SLO-2	*Chemical and mechanical properties of Polymers, Quartz and GaAs*	*Oxidation process*	*Interfacial & Residual stresses*	*Thermo sonic, Ultra sonic type*	*Lab on chip module*
S-6	SLO-1	*Chemical, Biomedical type Micro sensors*	*Diffusion process*	*LIGA process- description merits and demerits*	*Types of surface bonding – Adhesive*	*IR and Gas sensing*
	SLO-2	*Piezoelectric type of Micro sensors*	*Wet etching methods*	*Implementation*	*soldering, SOI type of bonding*	*Thermal sensors*
S-7	SLO-1	*Thermal, SMA, Piezoelectric actuators*	*Properties of etchants*	*Process Design-block diagram and description*	*Anodic bonding and lift off process*	*Micro power generation*

	SLO-2	*Electro static type Micro Actuators*	*Dry etching methods*	*Electro-mechanical design, Thermo-electric design*	*Precautions to be taken*	*Micro TEG*
S-8	SLO-1	*Micro devices- operation of Micro gears and micromotors*	*Production of plasma*	*CAD- block diagram description and implementation*	*Types of sealing- Micro shells, Hermetic sealing*	*Chemical sensors*
	SLO-2	*Micro devices –operation of Micro valves and pumps*	*Etch stop methods*		*Micro 'O' rings,Reactive seal*	*Micro humidity sensors*
S-9	SLO-1	*Case study*	*Case study*	*Case study*	*Selection of packaging materials*	*Micro pressure sensors*
	SLO-2				*Material requirements*	*Paper MEMS*

		Basic concepts of robotics	End effectors and transformation techniques	Sensors and system controllers	Work cell design layouts and interfacing	Robot programming languages and applications
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic concepts of robotics (Laws of robotics, robotic systems), RIA definition*	*End effectors-Introduction, classification.*	*Sensor devices*	*Robot cell lay outs*	*Robot language, classification.*
S-2	SLO-1	*Robot anatomy (Robot configurations, Robot motions, Joint notation scheme) , Manipulators*	*Mechanical, Magnetic grippers.*	*Types of sensors (contact, position and displacement sensors)*	*Robot work cell design and control*	*Programming methods, off and on line programming.*
S-3	SLO-1	*Precision movement (Spatial resolution, accuracy, repeatability) Work volume, robot specifications*	*Vacuum and adhesive gripper*	*Force and torque sensors*	*Multiple robots*	*Lead through method, powered and Manual lead through and Teach pendent method.*
S-4	SLO-1	*Types of Robot drives - electric drives*	*Gripper design and Gripper force analysis*	*Proximity and range sensors, acoustic sensors.*	*Machine interface*	*VAL systems and language, Simple program.*
S-5	SLO-1	*Hydraulic and pneumatic drives*	*Orientation of wrist*	*Robot vision systems, Sensing and digitizing.*	*Safety considerations in cell design*	*Application of Robots, Material handling, Constrains, Machine loading and unloading.*
S-6	SLO-1	*Basic robot motions, Point to point control and continuous path control.*	*2D transformation (scaling, rotation, translation)*	*Image processing and analysis.*	*Interlocks in work cell*	*Assembly Robot, Assembly operation, RCC device, Benefits- Inspection robot, used in Quality control.*
S-7	SLO-1	*Forward and inverse kinematics for 2DOF manipulator*	*3D transformation (scaling, rotation, translation)*	*Robot control system - Unit control system*	*Types of work cell controllers*	*Welding and Spray painting Robots, features, sensors, Advantages*
S-8	SLO-1	*Forward and inverse kinematics for 3DOF manipulator*	*Homogeneous transformations*	*Adaptive and Optimal control*	*Robot cycle time analysis*	*Mobile and microbots, types, mobility and application.*
S-9	SLO-1	*Machine intelligence*	*Coordinate frames - Description of Objects in Space*	*Basic Relationship Between Pixels*	*Error detection and Error recovery*	*Search techniques in AI and robotics*

		Solar Energy	Wind Energy	Ocean, Hydro and Geothermal Energy	Biomass	Direct Energy Conversion Systems
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Solar energy, Solar radiation and its measurements*	*Wind energy, Basic principle and Components of wind energy conversion system*	*Wave characteristics and wave energy conversion systems*	*Biomass,Sources of biomass*	*Basics of direct energy conversion systems, thermo electric and thermionic power generations*
S-2	SLO-1	*Types of solar thermal collectors*	*Wind data, site selection and energy estimation*	*Tidal energy and its types*	*Pyrolysis, combustion and gasification process*	*Fuel cell principles and its classification*
S-3	SLO-1	*Solar thermal applications for water heaters, solar stills and solar pond*	*Types of Horizontal axiswind turbine such as Single blade, Two blades,*	*Estimation of energy and power in single basin tidal system*	*Updraft and downdraft gasifier*	*Types - Phosphoric acid, polymer electrolyte membrane fuelcell, molten carbonate fuel cell and solid oxide fuel cell*
S-4	SLO-1	*Solar thermal applications for refrigeration and air conditioning system*	*Types of Horizontal axis wind turbine such as Multi blades, Dutch and Sail type*	*Ocean thermal energy conversion for open system*	*Fluidized bed gasifier*	*Fuel cell conversion efficiency and applications*
S-5	SLO-1	*Solar thermal applications for solar dryer, solar cookers and solar furnaces*	*Vertical axis wind turbinesuch as Savonius Rotor, Darrieus Type*	*Ocean thermal energy conversion for closed system.*	*Fermentation and digestion process*	*Open cycle magneto hydrodynamic power generation*
S-6	SLO-1	*Drawbacks/Real field issues in solar thermal systems, sensible and latent heat thermal energy storage systems to avoid day night issues*	*Design consideration of horizontal axis wind turbine*	*Hydro power plants for small, mini and micro system*	*Fixed and floating digester biogas plants*	*Closed cycle magneto hydrodynamic power generation*
S-7	SLO-1	*Solar thermal power generation systems*	*Aerofoil theory, Analysis of aerodynamic forces acting on the blade*	*Exploration of geothermal energy.*	*Design considerations of digester*	*Hydrogen energy: properties and its production methods*
S-8	SLO-1	*Solar photovoltaic systems: basic working principle, componentsand its applications*	*Performance of wind turbines*	*Geothermal power plants*	*Operational parameter of biogas plants, Economics of biomass power generation*	*Electrolysis, thermo-chemical, fossil fuels and solar energy methods*

S-9	SLO-1	*Performance assessment of any one solar thermal and electric systems*	*Hybrid energy systems (solar and wind),environmental issues of wind energy*	*Challenges, availability, geographical distribution, scope*	*Sources and production of biodiesel and ethanol*	*Hydrogen storage, transportation and applications*

		Energy transfer in buildings	Passive solar heating & Cooling	Lighting systems of buildings	Heat control & ventilation	Green buildings
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Concepts of energy efficient buildings*	*General principles of passive solar heating*	*Introduction to lighting systems of buildings*	*Introduction to heat control and ventilation*	*Introduction to green building*
S-2	SLO-1	*Conventional versus Energy Efficient buildings*	*Key design elements of passive heating*	*Glazing materials: Sources and concepts of optical materials*	*Design parameters influencing thermal design of buildings*	*Green building features and green construction materials*
S-3	SLO-1	*Climate and its influence in building design for energy requirement, Thermal properties of building materials*	*Direct solar heat gain by Trombe mass walls*	*Concepts of day lighting*	*Heat transmission through building sections*	*Green building rating tools*
S-4	SLO-1	*Codes and standards for the energy efficient buildings-ECBC codes*	*Passive cooling and its Key design elements, ventilation*	*Components of daylight factors and Recommended daylight factors*	*Effect of heating with orientation of buildings*	*Integrated ecological design, Sustainable site and landscaping*
S-5	SLO-1	*Energy balance for cooling and heating of buildings*	*Water walls, evaporative cooling*	*Day lighting analysis*	*Ventilation requirements for heat control in buildings*	*Indoor air quality, Water and waste management systems*
S-6	SLO-1	*Calculation of heating load, Heat losses and Internal heat sources*	*Convective air loops and solar chimney effects*	*Electrical lighting and Illumination requirement*	*Standards for ventilation*	*Green Globe, LEED, GRIHA, IGBC codes & certifications*
S-7	SLO-1	*Calculation of cooling loads of the building*	*Predicting ventilation in buildings, window ventilation calculations*	*Selection of luminaries and performance parameters*	*Ventilation designs, Energy conservation measurement*	*Standards for green building certifications*
S-8	SLO-1	*Low and zero energy buildings*	*Thermal insulation, load control, air filtration,*	*Electric lighting control for day lighted buildings*	*Natural ventilation methods*	*Economics, managing initial costs of green buildings*
S-9	SLO-1	*Future building design aspects*	*Odor removal and heat recovery in large buildings*	*Comparison of day and electrical lighting*	*Forced ventilation methods*	*Environment benefits of green buildings*

							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards	Yes		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Be familiar with the Objectives, Characteristics, Necessity, Scope, Applications of OR and LPP in simplex and to determine what resources are assigned to get most optimum output*
CLR-2 :	*Be familiar with the Applications of LPP in in determining resource allocation in existing business structures and in the decision making process of replacing a used equipment*
CLR-3 :	*Be familiar with the scheduling and operational problems in manufacturing, service and distribution*
CLR-4 :	*Know the waiting line models and all aspects of managing a company's inventories*
CLR-5 :	*Determine how decisions are made given unknown variables and an uncertain decision environment framework and how and why people make decisions*
CLR-6 :	*Familiar with resource management techniques and its applications in industries*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Understand the Concepts of Linear programming technique*	*1&2*	*90*	*85*	*M*	*H*	-	*M*	-	*L*	-	-	-	-	*M*	-	*H*	*H*	*M*
CLO-2 :	*Learn the applications of Transportation and Replacement models*	*1*	*90*	*85*	*M*	*H*	-	*M*	-	*L*	-	-	-	-	*M*	-	*H*	*H*	*M*
CLO-3 :	*Study the various Techniques of scheduling and sequencing*	*1*	*90*	*85*	*M*	*H*	-	*M*	-	*M*	-	-	-	-	*L*	-	*H*	*H*	*M*
CLO-4 :	*Gain detailed knowledge of Inventory control and Queuing theory*	*1&2*	*90*	*85*	*M*	*H*	-	*M*	-	*M*	-	-	-	-	*H*	-	*H*	*H*	*M*
CLO-5 :	*Understand the techniques involved in Decision theory and Game theory*	*1&2*	*90*	*85*	*M*	*H*	-	*L*	-	*M*	-	-	-	-	*M*	-	*H*	*H*	*M*
CLO-6 :	*Learn resource management techniques to manage resources multiple departments and projects*	*1&2*	*90*	*85*	*M*	*H*	-	*M*	-	*M*	-	-	-	-	*M*	-	*H*	*H*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Operation Research and decision making- Development, Definition, Characteristics, Necessity, Scope, Applications, Advantages, Limitations*	*Assignment models [Balanced, Unbalanced, Maximization]*	*Problem of Sequencing, Processing 'n' jobs through two and three machines.*	*Introduction – Necessity for Maintaining Inventory, Inventory Costs – Types- Variables in an inventory problem – Lead time, Reorder Level, EOQ*	*Steps in Decision theory approach - Decision making Environments - Making under conditions of Certainty, Uncertainty, Conditions of Risk*
S-2	SLO-1	*Objectives, Phases, Types of mathematical models in OR and constructing the model. Linear Programming - Requirements, Assumptions, Advantages, Limitations, Applications*	*Assignment models - Travelling Salesman Problem (Shortest Cyclic Route Models)*	*Problem of Sequencing, Processing 'n' jobs through two and three machines.*	*Deterministic Inventory Models – Purchasing model with no shortages, Manufacturing model with no shortages*	*Steps in Decision theory approach - Decision making Environments - Making under conditions of Certainty, Uncertainty, Conditions of Risk*
S-3	SLO-1	*Formulation of linear programming problem, Simplex method - Graphical method of Solution*	*Transportation problem – Assumption, Definition, Formulation and Solution - North west corner method, Least cost method, Vogel's approximation method.*	*Project - Planning, Scheduling, Controlling – Network Analysis – Constructing a project network - Fulkerson's Rule*	*Purchasing model with shortages, Manufacturing model with shortages*	*Decision making conditions – problems*
S-4	SLO-1	*Simplex method - Analytical - Canonical and Standard forms of LPP*	*Transportation problem – MODI method*	*Network computations – Earliest Completion time of a project and Critical path, Floats*	*Multi item deterministic model, safety stock, storage quantity discount*	*Decision trees. - Utility Theory*
S-5	SLO-1	*Artificial Variables Techniques - Big M- method*	*MODI method [balanced in transportation model]*	*Programme Evaluation Review Technique*	*Problems in Multi item deterministic model*	*Problems in Decision trees*

S-6	SLO-1	*Artificial Variables Techniques - Two Phase method*	*MODI method [Unbalance in transportation model]*	*Total Slack, Free Slack, Probability of achieving completion date*	*Queuing Models - Elements - Kendall's Notation – Poisson arrivals and exponential service times*	*Theory of Games , Characteristics Game models -Definition - Rules - Pure Strategy*
S-7	SLO-1	*Problems in Artificial Variables Techniques*	*Replacement Model, Replacement of items that deteriorate, Gradually, Fail suddenly*	*Cost Analysis - Crashing the network*	*Waiting time, Idle time cost, Single channel problem*	*Optimal solution of two person zero sum games, mixed strategies*
S-8	SLO-1	*Sensitivity analysis – Change in objective function*	*Group Replacement policy analysis - Problems*	*Resource Scheduling - Advantages, Limitations*	*Multi-channel problem*	*Graphical solution of (2xn) and (mx2) games*
S-9	SLO-1	*Sensitivity analysis – Change in the availability of resources*	*Group Replacement policy analysis - Problems*	*Vehicle routing problems*	*Poisson arrivals and service time*	*Solution of (mxn) games by linear programming*

Course Code	18MEO105T	Course Name	MATERIALS MANAGEMENT	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To Understand the principles of materials Management*
CLR-2 :	*To Acquire knowledge on Inventory control and materials forecasting*
CLR-3 :	*Be familiar with the Material planning and control*
CLR-4 :	*Be familiar with the Storage and distribution*
CLR-5 :	*To attain the knowledge about material accounting and budgeting*
CLR-6 :	*Be familiar with the basic aspects of Material Management, Inventory control procedures, Codification of materials, Online material management system.*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understand the Materials management and to recognize the relationship with other functional areas and acquire the knowledge on inventory control and material forecasting*	*1&2*	*90*	*85*	*H*						*M*								
CLO-2 :	*Acquire knowledge on Inventory control and materials forecasting*	*1*	*90*	*85*	*H*						*M*								
CLO-3 :	*Appreciate the Job evaluation and understand the need of scheduling*	*1*	*90*	*85*	*H*						*M*					*L*			
CLO-4 :	*Understand the theory behind the Project management and acquire the knowledge about MRP, Storage design and storage system and layout*	*1&2*	*90*	*85*	*H*										*L*				
CLO-5 :	*Obtained the knowledge about Materials management controls, Budgetary control*	*1&2*	*90*	*85*	*M*									*L*					
CLO-6 :	*Recognize the use of materials management, acquire knowledge on the inventory management and control procedures, Codification of materials, Online material management system,Purchasing policies and procedures*	*1&2*	*90*	*85*	*M*						*M*								

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*History and development of material management, Policy manual: A to Z items*	*Materials forecasting, Selection of inventory control, BOM*	*Codification of materials Storage systems and equipment*	*Purchasing policies and procedures*	*Performance indicators*
S-2	SLO-1	*Concept and details of integrated materials and management systems*	*Spare parts managements and techniques*	*Storage design, Stores layout*	*Legal aspects of purchasing*	*Materials management controls*
S-3	SLO-1	*Important and scope of materials management*	*Inventory control systems, Lead time analysis, Optimum order quantity*	*Storage systems and equipments*	*Selection of sources of supply*	*Budgetary control*
S-4	SLO-1	*Materials purchase policy and economic ordered quantity*	*Types of Lead time; Administrative lead time, Supplier lead time, Transport lead time*	*Stores preservation*	*Vendor evaluation and rating*	*Computer in materials management, Computer revolution, Software and hardware, Materials information system*
S-5	SLO-1	*Purchasing cycle, A to Z purchase order*	*Flow charting techniques to reduce various types of lead time*	*Stores procedures Stock valuation and verification*	*Vendor development, Price and Cost analysis*	*Reports and information needs, Application and limitations of computers in materials management*
S-6	SLO-1	*Functions of Materials Intelligence (MIS)*	*Aggregate inventory management*	*Ware housing Distribution management*	*Ethical buying, Ethical concept in buying*	*Store functions, types of Sores, sore identification systems*
S-7	SLO-1	*Specification and Standardization in Materials Management*	*Problems in Inventory control*	*Store accounting*	*Purchasing organisations, Purchasing cycle and contracts*	*Store accounting, sore records, Legal aspects of sore keeping*
S-8	SLO-1	*Make or buy decision, buying process*	*Materials requirement planning*	*Material handling system and equipments*	*Sourcing supplier evaluation*	*Online material management system*
S-9	SLO-1	*Purchasing cycle and economic ordered quantity*	*Supply chain Management*	*Need for inventory, Inventory cost, Inventory control measures(ABC, XYZ analysis)*	*Legal aspects of purchasing*	*Coding of materials, material purchasing policies and procedures*

		Basics of Pollution and Prevention	Air Pollution	Water Pollution	Biological Treatment	Solids disposal
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Environment and environmental pollution from chemical process industries, characterization of emission and effluents*	*Sources and formation of Sulfur oxides (SOx); nitrogen oxides (NOx), carbon monoxide*	*Biological uptake of pollutants*	*Anaerobic degradation of organic matter*	*Solids waste disposal – composting process and its phases*
	SLO-2	-	*total suspended particulate matter, respirable particulates*			
S-2	SLO-1	*environmental Laws, rules and standards for ambient air*	*photo-chemical oxidants. Other pollutants*	*effect of pollutants on land, vegetation, animals and human health*	*Trickling filter – Process description*	*Sanitary landfill- Principle and process*
S-3	SLO-1	*noise pollution- effects, control*	*Green house effect,green house gases: CO_2, CH_4, N_2O, CFCs,*	*bio-deterioration, bioaccumulation*	*aerobic treatment – aeration units*	*gasification process.*
	SLO-2	-	*water vapor concentration, alternatives for CFCs, global warming and climate change*	-		
S-4	SLO-1	*Process modification: alternative raw material, recovery of by product*	*ozone layer depletion- ozone depleting processes, ozone hole,*	*bio-magnification and eutrophication*	*biochemical kinetics: Hydraulic detention time, Mean residence time*	*Upward, Downward, cross draft gasifier*
	SLO-2		*environmental effects and strategies for ozone layer protection,*			
S-5	SLO-1	*recycle and reuse of waste, energy recovery and waste utilization*	*acid rain-sources and impact*	*infectious microbial agents in water system*	*Types of activated sludge process*	*Incineration and Pyrolysis*
	SLO-2					
S-6	SLO-1	*Material and energy balance for pollution minimization.*	*wet gas scrubbing techniques*	*consequences on human health.*	*Tapered aeration*	*Quantum and nature of solid waste*
	SLO-2					
S-7	SLO-1	*Water use minimization*	*gaseous emission control by absorption and adsorption methods*	*Physical treatment- pre-treatment*	*Stepped aeration*	*bio methanation -phases involved and factors*
	SLO-2					

S-8	SLO-1	*Fugitive emission, effluents and leakages*	*Design of cyclones, Electrostatic Precipitation*	*solids removal by settling and sedimentation*	*sludge separation*	*Pelletization, landfill and gas recovery*
	SLO-2					
S-9	SLO-1	*Pollution control through housekeeping and maintenance..*	*fabric filters and absorbers*	*filtration and centrifugation*	*Aerobic treatment units (ponds,lagoons, oxidation ditch)*	*municipal solid waste disposal- Best management practices for containers*
	SLO-2			*coagulation and flocculation.*

CLO-5 :	*Acquire knowledge on Micro/Nano Robotics manufacturing and control techniques*	*1*	*90*	*85*	*H*	*L*	*M*	*M*	*H*							*M*	*H*	*L*	*H*
CLO-6 :	*Learn Micro/Nano Sensors, Actuators, Manipulators and Manufacturing Techniques*	*1&2*	*90*	*85*	*H*	*L*	*M*	*M*	*H*							*M*	*H*	*L*	*H*

		Fundamentals of Robotics and Nanotechnology	Micro/Nano Sensors	Micro/Nano Actuators	Micro/Nano Manipulators	Micro/Nano Robotics manufacturing and control techniques
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction-History of Robotics*	*Far field and Near filed Imaging sensors*	*Bending type Piezoelectric actuators*	*SPM Probes and Micro nano grippers*	*CAD models and CAD models of nanostructures*
S-2	SLO-1	*Robot Anatomy and Work Volume*	*Position and Capacitive sensors*	*Unimorph, Bimorph and stack type actuators*	*Atomic manipulation using STM*	*Micro nano assembly and Self assembly*
S-3	SLO-1	*Robot Drive Systems*	*Linear Variable Differential Transformer*	*Piezo tube and Thin film types ZnO*	*Optical Tweezers*	*Precision micro/nanoparticle assembly using SEM*
S-4	SLO-1	*End Effectors and Robotic Sensors*	*Interferometric sensors*	*Surface acoustic waves and Elecrostatic actuators*	*Dielectrophoresis*	*Guided Self Assembly*
S-5	SLO-1	*Actuators and Power transmission system*	*Accelerometers and Gyroscopes*	*Thermal and Ultrasonic actuators*	*Bio manipulation*	*Automated manipulation of nanoparticles*
S-6	SLO-1	*Importance of Nanotechnology-History of Nanotechnology*	*Force, Pressure Sensors*	*Electro and Magnetostrictive based actuators*	*Slip motion (nanomanipulation)*	*Micro Mechanical Flying robot*
S-7	SLO-1	*Opportunity at the nano scale-length and time scale in structures*	*Chemical and Flow sensors*	*Shape memory alloy actuators*	*Carbon nanotube manipulation using nanoprobes*	*Kinematics and Dynamics of Robot*
S-8	SLO-1	*Nano device structures*	*Strain gauge and Deflection based AFM*	*Polymer actuators, Dielectric elastomers*	*High density data storage using nanoprobes*	*Kinematics and Dynamics of Robot*
S-9	SLO-1	*Overview of Nano robotics system Components*	*Visual force sensing, Bending imaging and Tactile sensors*	*CNT actuators and Bimolecular Motors*	*Simple case study*	*Teleoperation based, Task based and automatic control robot*

Learning Resources	1. *Norio Taniguchi, "Nanotechnology", Oxford university press, Cambridge, 1996.* 2. *Ning Xi, Guangyoung Li, "Introduction to Nanorobotic Manipulation & Assembly" Artech House press 2012* 3. *Elwenspoek.M and Wiegerink.R., "Mechanical Microsensors", Springer-Verlag Berlin, 2001.*	4. *Fatikow.S. Course Code	18MEO108T	Course Name	AUTOMATIC CONTROL SYSTEMS	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department		Mechanical Engineering	Data Book / Codes/Standards		NIL

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the history of control systems, relevance of input and output transfer function.*
CLR-2 :	*Impart the knowledge on principles involved in modeling various mechanical and state space representations of systems.*
CLR-3 :	*Gain knowledge on steady state and transient state response and stability criterion*
CLR-4 :	*Know application of various tools used for stability analysis of various systems*
CLR-5 :	*Understand upon Discrete control systems and Z transformations*
CLR-6 :	*Impart knowledge on developing a system and studying on the stability of the system using various tools*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*model systems that are applied to the reality*	1& 2	80	85	H	H	H	M	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*understand response analysis*	1	80	85	H	M	H			-	-	-	-	-	-	-	-	-	-
CLO-3 :	*understand the basic tools of analysis and stability*	1	80	85	H	H	H	M	M	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*understand the basic tools of analysis and stability*	1&2	80	85	H	M	-	-	M	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*understand basic concepts in digital controls*	1&2	80	85	H	H	-	M		-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Understand the systems and their model creation and utilization of various tools in analyzing the responses of various realistic systems*	1&2	80	85	H	M	M	M	-	-	-	-	-	-	-	-	-	-	-

		Introduction	Modeling systems	Analysis of system status - stability	Tools for Analysis of stability	Discrete Control systems
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Controls – definition – need for control – examples*	*Principles of modeling – common aspects of all mechanical systems – components – common features*	*Transient analysis*	*Routh criteria for stability*	*Discrete control systems – concepts – back ground - introduction*
S-2	SLO-1	*necessity of controls for engineers*	*Development of model – Mechanical systems*		*Root locus – background*	
S-3	SLO-1	*History of control systems*	*Development of model – Electrical systems*	*Steady state analysis*	*Root locus – construction – simple systems*	*Basic components of discrete systems – quantization and errors*
S-4	SLO-1	*Theory, design and engineering*	*Development of model – Electrical systems*		*Root locus – complex systems*	
S-5	SLO-1	*Basic open loop system,*	*Linearization of nonlinear systems*	*Error identification – analysis*	*Bode plots – concept – simple systems*	*Concepts behind Z-transforms – basic functions -*
S-6	SLO-1	*Concept of feedback, closed loop system*	*State space representation – relationship to transfer function*			
S-7	SLO-1	*Relevance of relationship between input – output – transfer function*	*Use of state space representation*	*Position – velocity – acceleration error constants*	*Construction of bode plots*	*Impulse sampling and data hold In Discrete Control systems*
S-8	SLO-1	*Block diagram - drawing handling - components*	*Summarizing system modeling*			
S-9	SLO-1	*Historical examples of control systems*		*Routh criteria for stability*	*Introduction to compensation and design of control systems*	

Learning Resources	1. *Automatic control systems , Benjamin kuo, Wiley publication , Ninth edition ,2014* 2. *Modern control engineering, Ogata.K, Prentice Hall, Fifth Edition, 2010* 3. *Discrete time control systems, Ogata.K, Prentice Hall, 1995*	4. *Control Systems, Gopal, Tata McGraw-Hill 3rdedition , 2007.* 5. *Modern Control Engineering, Nagrath& Gopal, New Age International,2014* 6. *Control Systems, A. Ambikapathy, Khanna Publishing House,2018.* 7. *V.I. Goerge, Digital Control Systems, Cengage, 2014.*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Impart the knowledge of neural network and fuzzy systems*
CLR-2 :	*Understand the various neural network algorithms*
CLR-3 :	*Initialize fuzzy logic and neuro fuzzy logic techniques*
CLR-4 :	*Familiarize with fuzzy algorithms*
CLR-5 :	*Enhance the knowledge of fuzzy & neural in various applications*
CLR-6 :	*Familiarize with genetic algorithm*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Acquire basic understanding of the various algorithms involved in Neural Networks & Fuzzy Systems*	1,2	90	85	H	L	M	H	M						L	H	H	H	-
CLO-2 :	*Acquire basic understanding of the various learning methods and methodologies*	1,2	90	85	H	L	H	H	H						M	M	H	H	-
CLO-3 :	*Understand various fuzzy algorithms*	1,2	90	85	H	M	H	H	H						L	H	H	H	-
CLO-4 :	*Analyze how to apply the concept of fuzzy & neural in mechanical applications*	2,3	90	85	H	H	H	H	H	M		M	M			H	H	H	-
CLO-5 :	*Application of neural and neuro fuzzy concepts*	2	90	85	H	H	H	M	M			M			M	H	H	H	-
CLO-6 :	*Acquire knowledge of Genetic Algorithm*	1,3	90	85	H	L	H	H	H				M		M	H	H	H	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Neural networks - Biological foundations*	*Learning Algorithms:Learning process – Supervised and unsupervised learning*	*Introduction to Fuzzy Logic: Fuzzy sets – Definition, Basic set – Theoretic operations for fuzzy sets*	*Fuzzy Logic and Control System: Fuzzy logic controller logic*	*Neuro-Fuzzy Logic Control –Optimization of membership function*
S-2	SLO-1	*ANN models, Types of activation functions*	*Error-correction learning*	*Fuzzy Relations on sets and fuzzy sets, Compositions of fuzzy relations*	*Fuzzification interface*	*Rules base of fuzzy logic controller using neural networks*
S-3	SLO-1	*Introduction to network architectures*	*Hebbian learning & Boltzmann learning*	*Properties of the Min-max Composition*	*Knowledge base and Decision making*	*Type A - Membership Model*
S-4	SLO-1	*Single layered systems*	*Single layer and multilayer preceptors*	*Fuzzy conditional statements*	*Defuzzification interface*	*Type A - Membership Model*
S-5	SLO-1	*Multilayer feed forward network(MLFFN)*	*Least mean square algorithm*	*Fuzzy rules*	*Fuzzy controller - Types*	*Type B – Membership Model*
S-6	SLO-1	*Radial basis function network(RBFN)*	*Back propagation algorithm*	*Fuzzy analysis – Fuzzy functions on fuzzy sets*	*The Mamdani Controller*	*Type B – Membership Model*
S-7	SLO-1	*Recurring neural network(RNN)*	*Applications in forecasting*	*Integration of fuzzy functions*	*The Sugeno Controller*	*Adaptive fuzzy systems*
S-8	SLO-1	*Advanced neural network – Hopfield nets algorithm*	*Applications in pattern recognition*	*Fuzzy Graphs*	*Application of fuzzy logic – Crane control*	*Adaptive neuron-fuzzy inference system (ANFIS)*
S-9	SLO-1	*Bumptree network algorithm*	*Applications in other engineering problems*	*Fuzzy Differentiation*	*Application of fuzzy logic – Control of a Model Car*	*Empirical research on aggregators*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the basis of latest technology of sensors used in robots*
CLR-2 :	*Be familiar with the concept Different sensing variables that are used as input to robots for sensing*
CLR-3 :	*Impart the knowledge on various vision sensors applied in robots , vision systems and their overview*
CLR-4 :	*Various methods used in robot programming*
CLR-5 :	*Different types of grippers and gripping methods*
CLR-6 :	*Understand various sensors used in robots and various programming methods in robotics, application of various grippers and their design concepts*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the application of sensors in robotics*	1& 2	80	70	H	M	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Recognize the application of various inertial sensors, displacement measurement sensors, force and touch sensors in robotic applications*	1	80	70	H	L	M	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Understand various miscellaneous sensors and recognize the importance of telepresence and related technologies*	1	80	70	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Understand the controlling methodologies for a robot using vision sensor modules, and be able to understand robot vision locating position. Application of End effector camera sensor in robotics.*	1&2	80	70	H	M	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Recognize the various Control Computer configurations, Vision Sensor modules, Software Structure, Vision Sensor software structures and integration of all together for specific applications*	1&2	80	70	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Various sensors and their working principles in various robotic application, especially inertial sensors, force and other touch related sensors, miscellaneous sensors, vision sensors, telepresence and related technologies*	1&2	80	70	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		10	10	10	10	10
S-1	SLO-1	*An Introduction to sensors and Transducers, History and definitions*	*Position sensors – Optical, non-Optical*	*Different sensing variables*	*Introduction to vision sensor, working and principles of vision sensing*	*Control Computer for robot, Speciation's, Hardware requirements*
S-2	SLO-1	*Smart Sensing, working of a smart sensor, networking of smart sensors*	*Contact, non-contact type sensors position sensing*	*Smell and smart e-nose sensors*	*classification of vision sensors*	*Vision Sensor modules*
S-3	SLO-1	*AI sensing, Need of sensors in Robotics*	*Range Sensing, types and classification based on the Distance measurement technique*	*Heat or Temperature Humidity classification of RTD and Thermocouples Non-contact-based temperature measurement Pyrometry and Active, passive type of IR devices*	*Considerations for camera , and camera specifications*	*Software Structure,*
S-4	SLO-1	*Case study on AI*	*Touch and Slip sensors application in grippers as a feedback device*	*Light sensors and application of light sensors in robotic interlocks eg (as an interlock switch during power failure)*	*Integration of vision sensors to robot controller*	*Vision Sensor software,*
S-5	SLO-1	*Classification of various sensors*	*Sensors types of touch and slip sensors , tactile sensors*	*Speech or Voice recognition Systems,*	*End effector camera Sensor.*	*Robot programming,*
S-6	SLO-1	*Based on operation principle*	*Force sensors and their application in fixed robots*	*Speaker dependent voice recognition systems Speaker independent voice recognition system*	*Calibration of vision sensors*	*Handling, Gripper, classification of grippers based on operation*
S-7	SLO-1	*Based on application*	*Torque Sensors and associated circuitry used for torque sensors*	*Discrete speech recognition, Continuous speech recognition, Natural language processing system*	*Robot Control through Vision sensors*	*Gripping methods, accuracy*

S-8	SLO-1	*Sensors in mobile and fixed robot configurations*	*Velocity sensors*	*Case study on voice recognition system (eg. siri, Google talk)*	*Robot vision locating position,*	*A Case study-01*
S-9	SLO-1	*Application of sensors in various robots*	*Accelerometers*	*Need for telepresence*	*Robot guidance with vision system*	*A Case study-02*
S-10	SLO-1	*Case study on fixed robot configurations and mobile robot configurations*	*Proximity Sensors*	*Telepresence and related technologies.*	*End effector camera Sensor*	*A Case study-03*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Work measurement and its Techniques*	*Plant location and site selection.*	*Introduction to work design, Work design for increased productivity*	*Objectives and Functions of PPC*	*Types of Wages and salary administration*
S-2	SLO-1	*Production study and Time study.*	*Types, need, factors influencing the plant layout.*	*The work system, design Introduction to job design.*	*Aspects of product development and design*	*Meaning principles in wage fixation, Techniques used of wage fixation*
S-3	SLO-1	*Standard time, Rating factors and Work sampling.*	*Tools and techniques for developing layout, process chart, flow diagram, string diagram, Template and Scale models.*	*Environmental factors and organizational factors*	*Introduction to Process Planning and types, Principles of Standardization*	*Method of Job evaluation*
S-4	SLO-1	*Techniques of Work study*	*Layout Planning and procedure involved in creating layout*	*Behavioral factors influencing effective job design.*	*Break even analysis*	*Steps involved in merit rating of employee*
S-5	SLO-1	*Human factors of Work study*	*Construction and Improvement algorithms-Automated Layout Design Program (ALDEP)*	*Ergonomics, Objectives system approach of ergonomic model*	*Introduction to Group Technology. and various types*	*Various Methods of wage payment*
S-6	SLO-1	*Method study, Techniques and procedures of improving Productivity.*	*Construction and Improvement algorithms-Computerized Relative Allocation of Facilities Techniques(CRAFT)*	*Man machine system, Production and Productivity*	*Method of finding optimum Batch size. Equipment.*	*Types, Advantages and disadvantages of Incentive scheme*
S-7	SLO-1	*Motion economy principles.*	*Introduction and procedure on Assembly and line balancing*	*Definition of production and function*	*ABC analysis.*	*Productivity base incentives*
S-8	SLO-1	*Charging Techniques*	*Material Handling, scope and importance. Types of material handling systems.*	*Type of production systems*	*Introduction to Value Engineering and its importance, Case studies*	*Case Example of Evaluation of incentive scheme*
S-9	SLO-1	*SIMO chart, Ergonomics and Industrial design.*	*Methods of material handling*	*Definition of productivity and productivity measurement.*	*Types of cost-Cost of production and Labour cost-Simple problems*	*Importance of Environmental pollution and control*

CLO-6 :	*Recognize the use of production management, acquire knowledge on the inventory management and work study, job evaluation and scheduling, study the total quality management on production process.*	*1*	*90*	*85*	*H*	*M*	-	-	-	-	-	-	*M*	-	-	-	-	-	*M*

		Introduction to Production Management	Inventory Management and Work Study	Job Evaluation and Scheduling	Project Management and MRP	Total Quality Management
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*History and development of production management*	*Inventory Control and cost, procurement and purchasing methods*	*Job evaluation: objectives, methods and factors affecting wage structure.*	*Project Management Phases and Project Appraisal*	*Quality management systems and Factors controlling quality*
S-2	SLO-1	*Functions and scope of different types of production processes*	*Warehousing Procedure and records in stock control, stores management*	*Types of wages, methods of wage system and characteristics*	*PERT and CPM*	*Impact of poor quality, challenges and Quality cost*
S-3	SLO-1	*Relationship of production management with other functional areas*	*Method Study and Means of increasing productivity*	*Value analysis and value engineering*	*Material requirement Planning (MRP)*	*Quality Assurance and Quality Circle*
S-4	SLO-1	*Capacity planning and its types*	*Charts and diagrams used in method study*	*Aggregate planning and strategies*	*Manufacturing resources Planning (MRP II)*	*Statistical Process Control and Control Charts with examples*
S-5	SLO-1	*Capacity decisions and their importance, Capacity planning strategies: types*	*Role of work study and human factors in work study*	*Forecasting and its methods*	*Enterprise Resource Planning (ERP)*	*Total Quality Management*
S-6	SLO-1	*Rooting, Techniques of rooting*	*Objectives and basic procedure for work study*	*MPS and Scheduling, Related Problems*	*Logistics: types and strategies*	*Just in Time with Case Study*
S-7	SLO-1	*Location planning: factors, types of planning, location models*	*Factors affecting work study*	*Scheduling principles, inputs, strategies, sequence and Assumptions, Case study*	*Supply chain Management*	*Six Sigma*
S-8	SLO-1	*Layout planning: factors and types*	*work measurement, objectives and techniques of work measurement*	*Gantt chart and Johnson's algorithm*	*Objectives and Decision Phases of Supply chain Management*	*Maintenance management and its types*
S-9	SLO-1	*Productivity management: definition, productivity index*	*Problems in Inventory control & work study*	*Problems in Gantt chart and Johnson's algorithms*	*Roles and Development in Supply chain Management*	*Effects of maintenance, Reliability and Replacement Techniques*

Course Code	18MEO113T	Course Name	DESIGN OF EXPERIMENTS	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards		Statistical data books	

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Be familiar with necessity, fundamentals and potential practical problemsin design of experiments*
CLR-2 :	*Be familiar with methodology used for design of experiments*
CLR-3 :	*Be familiar with robust design concepts with case studies*
CLR-4 :	*Be familiar with the concept of response surface design*
CLR-5 :	*Be familiar with the concepts of confounding and analysis of variance (ANOVA)*
CLR-6 :	*Be familiar with how the analysis of the data from the experiment should be carried out.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)
CLO-1 :	*Understand the basics and potential practical problems in design of experiments*	*1, 2*	*90*	*85*
CLO-2 :	*Understand and apply various methodology for design of experiment to evaluate case studies*	*1, 2 & 3*	*85*	*80*
CLO-3 :	*Apply the concept of robust design to evaluate case studies*	*1, 2 & 3*	*85*	*80*
CLO-4 :	*Expose the concepts of response surface design to evaluate experimental problems*	*1, 2 & 3*	*85*	*80*
CLO-5 :	*Apply the concept of confounding and ANOVA to evaluate case studies*	*1, 2 & 3*	*90*	*85*
CLO-6 :	*Construct optimal or good designs for a range of practical experiments and describe how the analysis of the data from the experiment should be carried out*	*1, 2 & 3*	*90*	*85*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction in Design of experiments (DOE)*	*Need for DOE methodology*	*Introduction to Robust design, Loss functions*	*Background of response surface design*	*Introduction and uses of confounding*
S-2	SLO-1	*The fundamental and potential practical problems in experimentation*	*Barriers in the successful application of DOE*	*Eight steps in Taguchi methodology*	*Multiple Responses and Contour profile of response surface plot*	*2^3 factorial experiment with complete confounding*
S-3	SLO-1	*Statistical thinking and its role within DOE*	*Practical methodology of DOE and Analytical tools for DOE*	*Orthogonal array, Selecting the interaction, Linear graphs*	*Creation of response surface designs*	*2^3 factorial experiment with partial confounding*
S-4	SLO-1	*Basic principles of DOE and Degrees of freedom*	*The confidence interval for the mean response*	*S/N ratio: Larger-the-better, Smaller-the-better, Nominal-the-best*	*Central composite designs (Rotatable central composite design)*	*Confounding in the 2^n series and examples*
S-5	SLO-1	*Selection of quality characteristics for experiments*	*Introduction to Screening design*	*Analyze the data, factor effect diagram*	*Central composite designs (Rotatable central composite design)*	*Confounding of 3^n factorial and examples*
S-6	SLO-1	*Understanding key interaction in processes*	*Geometric and non-geometric P-B design*	*Levels of parameters*	*Box-Behnken design with case studies*	*ANOVA (One-way and two-way, higher-way ANOVA)*
S-7	SLO-1	*An alternative method for calculating two-order interaction effect*	*Introduction of full factorial design, Basic concepts of 2^2, 2^3 and 2^k designs*	*Confirmation test*	*Random factor models and its industrial application , Random Effects Models*	*MANOVA and ANCOVA overview*
S-8	SLO-1	*Synergistic interaction, Antagonistic interaction*	*Solving Case studies on Full factorial design with statistics software*	*Augmented design with simple case studies*	*Two Factor Factorial with Random Factors*	*Solving Case studies on ANOVA with statistics software*
S-9	SLO-1	*Synergistic interaction versus Antagonistic interaction*	*Solving Case studies on Full factorial design with statistics software*	*Solving case studies on robust design with statistics software*	*Two Factor Mixed Models with random factors*	*Regression Models and Regression Analysis*

		Introduction to control systems	System Modeling	System response	Stability Analysis	State space analysis of MIMO systems
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Brief Review, Basic terminologies and examples, Classical-Modern-Robust-Automatic control systems, Concepts of Feedback: Closed-loop and open-loop control systems, Design and compensation of control systems (Design procedure)*	*Modeling in state space: State, State variables, State vector, State space, State equations for a MIMO system*	*Transient and steady state response, Standard test signals- Mathematical expressions- type and order of a system*	*Complex s-plane, Routh's stability criterion*	*MIMO System analysis: state-space approach*
S-2	SLO-1	*Brief Review, Basic terminologies and examples, Classical-Modern-Robust-Automatic control systems, Concepts of Feedback: Closed-loop and open-loop control systems, Design and compensation of control systems (Design procedure)*	*Modeling in state space: State, State variables, State vector, State space, State equations for a MIMO system*	*First order Systems: Unit step response and Unit ramp response, Concepts of time constant and its importance in speed of response*	*Complex s-plane, Routh's stability criterion*	*MIMO System analysis: state-space approach*
S-3	SLO-1	*Modeling of control systems using linear differential equations, Transfer function expressions (with note on convolution integral), Block diagrams*	*State space representation of dynamic systems – nth order systems of linear differential equations, State space models for mechanical systems: Examples from mechanical, electrical, liquid-level, thermal systems*	*First order Systems: Unit step response and Unit ramp response, Concepts of time constant and its importance in speed of response*	*Analysis of control systems by Root-Locus method: concepts and procedure, Design of Lead-Lag compensation based on Root-Locus approach*	*State space representation in controllable, observable, diagonal and jordan canonical forms, order reduction and solution of state equations*
S-4	SLO-1	*Modeling of control systems using linear differential equations, Transfer function expressions (with note on convolution integral), Block diagrams*	*State space representation of dynamic systems – nth order systems of linear differential equations, State space models for mechanical systems: Examples from mechanical, electrical, liquid-level, thermal systems*	*Second order systems: Servo system and Servo system with velocity feedback*	*Analysis of control systems by Root-Locus method: concepts and procedure, Design of Lead-Lag compensation based on Root-Locus approach*	*State space representation in controllable, observable, diagonal and jordan canonical forms, order reduction and solution of state equations*

S-5	SLO-1	*Basic Control action: Types of controllers, Principles of pneumatic, hydraulic and electronic controllers*	*State space representation of dynamic systems – nth order systems of linear differential equations, State space models for mechanical systems: Examples from mechanical, electrical, liquid-level, thermal systems*	*Second order systems: Servo system and Servo system with velocity feedback*	*Analysis of control systems by Root-Locus method: concepts and procedure, Design of Lead-Lag compensation based on Root-Locus approach*	*Controllability and observability, Kalman and Gilbert test*
S-6	SLO-1	*Basic Control action: Types of controllers, Principles of pneumatic, hydraulic and electronic controllers*	*State space representation of dynamic systems – nth order systems of linear differential equations, State space models for mechanical systems: Examples from mechanical, electrical, liquid-level, thermal systems*	*Second order systems: Servo system and Servo system with velocity feedback*	*Stability: Polar, Bode and Nyquistplots*	*Controllability and observability, Kalman and Gilbert test*
S-7	SLO-1	*Basic Control action: Types of controllers, Principles of pneumatic, hydraulic and electronic controllers*	*State space representation of transfer function systems*	*Controller errors, Higher order systems, Effects of proportional-integral-derivative control actions on the system response*	*Stability: Polar, Bode and Nyquistplots*	*Pole placement approach to the design of control systems, State observers, Design of servo systems*
S-8	SLO-1	*Tuning of PID controller: Ziegler-Nichols rules*	*State space representation of transfer function systems*	*Controller errors, Higher order systems, Effects of proportional-integral-derivative control actions on the system response*	*Lead-Lag compensation based on frequency response approach*	*Pole placement approach to the design of control systems, State observers, Design of servo systems*
S-9	SLO-1	*Tuning of PID controller: Ziegler-Nichols rules*	*Linearisation of a non-linear system*	*Controller errors, Higher order systems, Effects of proportional-integral-derivative control actions on the system response*	*Lead-Lag compensation based on frequency response approach*	*Pole placement approach to the design of control systems, State observers, Design of servo systems*

Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the purpose of facilities planning process*
CLR-2 :	*Acquire knowledge on requirements and relationships of facilities planning*
CLR-3 :	*Be familiar with the facility design*
CLR-4 :	*Acquire knowledge on strategies adopted for designing a facility*
CLR-5 :	*Attain the knowledge about material handling and facility layout design*
CLR-6 :	*Be familiar with the basic aspects of evaluating, selecting maintaining in facilities planning and Industrial Acts and safety*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Understand the basic concepts in facilities planning process*	*1&2*	*90*	*85*	*H*					*M*						*L*			
CLO-2 :	*Acquire knowledge on requirements and relationships of facilities planning*	*1*	*90*	*85*	*M*														
CLO-3 :	*Understand facility design for various functions and acquire knowledge about strategies adopted for designing a facility*	*1*	*90*	*85*	*H*		*H*	*M*										*L*	
CLO-4 :	*Acquire knowledge on material handling and facility layout design*	*1&2*	*90*	*85*	*H*		*H*	*M*		*M*						*L*		*L*	
CLO-5 :	*Recognize the basic aspects of evaluating, selecting and maintaining in facilities planning*	*1&2*	*90*	*85*	*M*			*M*		*M*									
CLO-6 :	*Evaluate the existing facility, modify to meet the requirements and understand Industrial Acts and safety.*	*1*	*90*	*85*	*M*					*M*						*M*			

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Definition, Significance and objectives of facilities planning*	*Department planning*	*Material Handling, Principles and classification*	*Facility design for various functions*	*Introduction to Facilities plan Evaluating. Facilities plan evaluation procedure, Factors to evaluate facility planning*
S-2	SLO-1	*Facilities planning process*	*Activity relationship*	*Designing material handling systems, Estimating material handling costs, Safety consideration*	*Warehouse operation and location problems*	*Qualitative Evaluation Techniques*
S-3	SLO-1	*Strategic Facilities Planning*	*Flow patterns*	*Layout Planning Models and Basic layout types*	*Nature of Location Decision, Need for facility location planning*	*Efficiency indices, Cost of Evaluation of Layout*
S-4	SLO-1	*Developing facilities planning strategies*	*Planning and measuring*	*Layout procedures, Algorithmic approaches and Pair-wise exchange method*	*General procedures and actors influencing location decisions, Facility Location Models*	*Facilities plan selection, Steps and involved in Facilities plan selection*
S-5	SLO-1	*Nature of Location Decision, Need for facility location planning*	*Space requirements*	*graph based approaches blocplan, logic, multiple approach*	*Economics and cost analysis, Rural and urban location pattern*	*Facility plan preparing, Importance of facility preparing*
S-6	SLO-1	*General procedures and Factors influencing location decisions, Facility Location Models*	*Personnel requirements*	*Multi floor facility layout, Developing layout alternatives*	*Manufacturing systems and Services*	*Facilities plan implementing and facility plan maintaining*
S-7	SLO-1	*Influence of product*	*Employee, facility interface, Multi-facility location problem, Euclidean-distance location problem, Minimax location probem.*	*Computer assisted layout planning*	*Fixed automation system and Flexible manufacturing system*	*Necessity of Industrial acts, The Indian Factories Act 1948, The industrial Dispute act1947, The minimum Wage Act 1948.*
S-8	SLO-1	*Process and schedule design*	*Restrooms, food services, health services*	*ALDEP, CORE LAP, CRAFT , PLANET , MAT*	*Reduction in work in process, Just-in-time manufacturing*	*Introduction to Industrial safety, Investigation and analysis of accidents, Safety devices Causes and sources of accidents.*

S-9	SLO-1	*Facilities design and procedure*	*Office facility planning*	*Commercial facility layout packages*	*Facilities planning trends*	*Safety devices, Causes and sources of accidents.*

CLO-6 :	*Create a document addressing the principles for developing and implementing a successful occupational health and safety program and evaluation of a work site*	*1&2*	*90*	*85*	*H*	*M*	*H*		*H*	*M*	*H*	*L*	*H*	*H*	*M*	*H*			

		Accident Prevention	Safety in Material Handling	Safety in Chemical Industries	Environmental Impact Assessment	Regulations for Health, Safety and Environment
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Definitions and theories of accident, reportable and non-reportable accidents, unsafe act,unsafe condition and dangerous occurrence*	*General safety consideration in material handling*	*Safety in the design process of chemical plants*	*Evolution, Concepts, Methodologies, Screening, Scoping and Checklist of EIA*	*Factories act and rules, Workmen compensation act*
S-2	SLO-1	*Theories and principles of accident causation*	*Ropes, Chains, Sling, Hoops, Clamps*	*Safety in operational and maintenance of chemical plants*	*Rapid and Comprehensive EIA*	*Indian explosive act*
S-3	SLO-1	*Cost of accidents, Accident reporting and investigations, accident reports- Class exercise with case study.*	*Arresting gears and Prime movers*	*Exposure of personnel*	*Legislative and environmental clearance procedure in India*	*Gas cylinder rules*
S-4	SLO-1	*Safety committees and their need, types and advantages*	*Ergonomic consideration in material handling*	*Operational activities and hazards*	*Prediction tools for EIA*	*Environmental pollution act*
S-5	SLO-1	*Safety education and training and their importance*	*Design, installation, operation andmaintenance of Conveying equipment.*	*Safety in storage and handling of chemicals and gases*	*Assessment of Impact of air, water and soil*	*Indian petroleum act and rules*
S-6	SLO-1	*Various training methods*	*Hoisting, traveling and slewing mechanisms*	*Hazards during transportation and Pipeline transport*	*Assessment of Impact of noise, biological and Socio cultural environment*	*Oil industry safety directorate (OISD)*
S-7	SLO-1	*Accident prevention and Motivating factors of safety suggestion schemes*	*Selection, operation and maintenance of industrial trucks*	*Safety in chemical laboratories*	*Public participation*	*Indian Electricity act and rules*
S-8	SLO-1	*Safety performance*	*Selection, operation and maintenance of Mobile cranes and Tower crane*	*Specific safety consideration for cement, paper and pharmaceutical*	*Resettlement and Rehabilitation*	*Mines act and rules, Manufacture, Storage and Import of Hazardous Chemical rules 1989*
S-9	SLO-1	*Definitions connected with measuring safety performance as per Indian and International standards*	*Storage and Retrieval of common goods of various shapes and sizes in a general store of a big industry.*	*Specific safety consideration for petroleum, petro -chemical, rubber, fertilizer and distilleries*	*Documentation of EIA*	*Indian motor vehicles act and rules*

		Introduction To Ai	Problem Solving Agents	Knowledge Organisation, Communication	Programming Language	Expert Systems
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*History, Definition of AI*	*Problem Definition, formulating problems and Searching for solutions*	*Knowledge organization, manipulation and knowledge acquisition*	*Introduction to python its syntax*	*Introduction to Expert Systems*
S-2	SLO-1	*Emulation of human cognitive process*	*Measuring problem, solving performance with examples*	*Indexing and Retrieval techniques*	*Input, output statements*	*Basic Activities of an expert system*
S-3	SLO-1	*Semantic nets*	*Search /Strategies: Uninformed or Blinded search Breadth first search.*	*Integration of knowledge in memory organization systems*	*Numeric functions*	*Interpretation, Prediction and Diagnosis*
S-4	SLO-1	*An abstract view of modeling*	*Uniform cost search: Depth first search, Depth limited search*	*Matching Techniques: Need for matching and Matching problem*	*Input statements for declaration of variables, Output statements for declaration of variables*	*Design, Planning and Monitoring*
S-5	SLO-1	*Elementary knowledge*	*Iterative deepening, Depth first search and Bi-directional search*	*Partial matching, Fuzzy matching and RETE matching algorithm*		*Debugging, Repair, Instruction and Control*
S-6	SLO-1	*Computational logic*	*Comparing uniformed search strategies and Informed search strategies*	*Natural language processing: Overview of linguistics*	*Interaction functions*	*Basic aspect of expert system*
S-7	SLO-1	*Analysis of compound statements using simple logic connectives*	*Heuristic information and Hill climbing methods*	*Basic semantic analysis and Representation structures*	*recursion functions*	*Acquisition module frames of expert systems, Knowledge base*
S-8	SLO-1	*Predicate logic*	*Best First Search; Greedy Best First Search, Branch-and- Bound Search*	*Natural language generation.*	*Property list and arrays*	*Production rules , Semantic net and Inference engine*
S-9	SLO-1	Simple exercises	Optimal search and A* algorithm and iterative deepening A*	Bayesian Networks and Bayesian Inference		Backward chaining and forward chaining

Course Code	18MEO118T	Course Name	MICROCONTROLLER AND ITS APPLICATIONS IN ROBOTICS	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mechanical Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Acquire the fundamental concepts of microcontroller.*
CLR-2 :	*Learn to program the microcontroller using assembly language.*
CLR-3 :	*To expose interfacing of microcontroller with the external world using a high level language.*
CLR-4 :	*To introduce students to an open source microcontroller and its programming.*
CLR-5 :	*To enable students with the Design of Microcontroller based circuits based on applications on robotics.*
CLR-6 :	*Impart the Knowledge about the concepts and selection of microcontroller to its application.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the fundamental concepts of microcontroller.*	1	90	85	M	-	M	-	-	-	-	-	-	-	-	-	L	L	L
CLO-2 :	*Program the microcontroller using assembly language.*	1	90	85	H	M	M	L	L	-	-	-	-	-	-	-	H	H	L
CLO-3 :	*Interface I/O modules with microcontroller from external world.*	1	90	85	H	M	M	M	M	-	-	-	-	-	-	-	H	M	L
CLO-4 :	*Demonstrate a fundamental knowledge of open source microcontroller and learnt to program it.*	2	90	85	H	H	M	M	H	-	-	-	M	-	-	-	H	H	L
CLO-5 :	*Demonstrate microcontroller based circuit for engineering applications.*	3	90	85	H	M	H	H	H	-	-	-	H	-	-	-	H	M	L
CLO-6 :	*Select suitable microcontroller to meet specific requirements.*	3	90	85	H	M	H	M	L	-	-	-	L	-	-	-	H	M	L

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Data representation and Numbering system and its types are binary, decimal, hexadecimal systems*	*Introduction to Assembly language*	*Introduction to External world interfacing with microcontroller, Analog signals and Digital signals*	*Introduction to open source microcontroller*	*Application of Microcontroller in various fields*
S-2	SLO-1	*Data conversion from hexadecimal to decimal and decimal to binary, binary addition and subtraction*	*Instruction sets with syntax and examples.*	*Analog to digital conversion and its types*	*Open Hardware platform basic knowledge of its hardware and its software environments*	*Advancement in Microcontroller*
S-3	SLO-1	*Introduction and history description about microcontrollers*	*Timers and its types*	*Digital to Analog conversion and its types*	*Variables ,Digital inputs with programs*	*Study and Design a Home security system using microcontroller*
S-4	SLO-1	*Specification and Internal architecture of 8051*	*TCON,TMOD*	*Analog inputs are mechanical switches ,relays*	*Digital Outputs with programs*	*Study and Design a Elevator system*
S-5	SLO-1	*Pin description of 8051*	*Delay program with and without timer*	*Digital outputs are LED,7 segment display and LCD interfacing*	*Reading analog signals and PWM signal generation with programs*	*Study and Design a Sensor guided mobile robot using ultrasonic sensor*
S-6	SLO-1	*Various Addressing modes of 8051 are immediate, register, direct*	*Interrupts and its Types*	*DC Motor Interfacing*	*Conditional statements are if ,else and nested if with programs*	*Study and Design a Tic Tac Toe playing robot*
S-7	SLO-1	*Indirect, Relative, Indexed and Absolute addressing modes*	*Programming using Interrupts*	*Stepper Motor Interfacing*	*Looping statements are for ,while and Do while with programs*	*Study and Design a Line following robot as a maze solver using microcontroller*
S-8	SLO-1	*Difference between microcontroller with microprocessor*	*I/O Ports and its 3 modes of operation*	*Servo Motor Interfacing*	*Functions and recursive function with programs*	*Study and Design a Unmanned Aerial Vehicle using microcontroller*
S-9	SLO-1	*Selection criterion for choosing microcontroller*	*Serial communication and its modes, SCON*	*Digital inputs -Keypad and its interfacing*	*Continuous Serial monitoring and hardware interrupt with programs*	*Study and Design a Soccer playing robot using microcontroller*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Be familiar with the working of a machinery and need for machine maintenance*
CLR-2 :	*Be familiar with the reason for Failure and capable of doing failure analysis*
CLR-3 :	*Be familiar with the basics of Signal analysis and Machinery condition monitoring*
CLR-4 :	*Be familiar with Instrumentation systems*
CLR-5 :	*Be capable of Machine Testing and Analysis*
CLR-6 :	*Be familiar of industrial practices in machine troubleshooting*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Acquire knowledge on basic components and working of a machine*	*1& 2*	*90*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*M*	-	-
CLO-2 :	*Appreciate the process of monitoring the conditions of a machine*	*1*	*90*	*85*	*H*	-	*H*	-	*H*	-	-	-	*M*	-	-	-	-	*H*	*H*
CLO-3 :	*Understand the techniques in wear and debris analysis, vibration analysis and signal analysis*	*1*	*90*	*85*	*H*	*M*	*H*	*H*	*M*	-	-	-	-	-	-	-	-	*H*	*H*
CLO-4 :	*Understand the various tools used for monitoring the condition of machine*	*1&2*	*90*	*85*	*H*	-	*H*	-	*H*	-	-	-	-	-	-	-	*H*	*H*	-
CLO-5 :	*Understand the process of thermography and non- destructive techniques*	*1&2*	*90*	*85*	*H*	-	-	-	*M*	-	-	-	-	-	-	-	*H*	-	*H*
CLO-6 :	*Acquire skills in fault finding and diagnosis*	*1&2*	*90*	*85*	*H*	*M*	-	*M*	-	-	-	-	*H*	-	-	*H*	*H*	*H*	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Failures and failure analysis*	*Principles of Maintenance*	*Time Domain Signal Analysis*	*Data Recording and Transmission*	*Fans, Blowers, Compressors, Pumps and Turbines*
S-2	SLO-1	*Failure concepts and characteristics*	*Failure Modes Effects*	*Frequency Domain Signal Analysis*	*Vibration Transducers, Vibration Monitoring*	*Contaminant Analysis, Oil Analysis*
S-3	SLO-2	*Fault detection sensors*	*Criticality Analysis*	*Computer Aided Data Acquisition - Basics*	*Basics of Noise and Noise Monitoring*	*Fault Detection in Motors and Transformers*
S-4	SLO-1	*Data processing*	*Fault Diagnostics*	*FFT Analysis*	*Numerical problems in Noise Vibration*	*Motor Current Signature Analysis*
S-5	SLO-1	*signal analysis*	*Fault Prognostics*	*Modulation and Sidebands*	*Numerical problems in Data Acquisition*	*wear and debris Analysis*
S-6	SLO-1	*Condition based maintenance principles*	*Basics of Machinery Vibration*	*Envelope Analysis*	*Unbalance Detection, Field Balancing*	*Thermography and Ultrasonics*
S-7	SLO-2	*Fault analysis planning and system availability*	*Engineering Applications of Vibration*	*Cepstrum Analysis*	*Misalignment Detection, Cracked Shaft Detection*	*Acoustic Emission and Eddy Current Testing*
S-8	SLO-2	*Reliability/failure concepts*	*Rotor dynamics*	*Order Analysis*	*Looseness and Rub Detection, Ball and Journal Bearings*	*Radiography,Dye Penetrant Test, Visual Inspection*
S-9	SLO-1	*Application of diagnostic maintenance to specific industrial machinery and plants*	*Fault findings in rotor machines*	*Examples on signal processing in MATLAB*	*Gear Fault Detection*	*Case studies on failure and fault detection*

Course Offering Department	Mechanical Engineering		Data Book / Codes/Standards		NIL

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Be familiar with the sensors and Image acquisition system*
CLR-2 :	*Be familiar with the basics of image processing in Frequency domain*
CLR-3 :	*Be familiar with the image enhancement and compression*
CLR-4 :	*Know the existing vision systems*
CLR-5 :	*Practice the tasks inany one of image processing software like MATLAB or OpenCV*
CLR-6:	*Be Familiar with components of machine vision, image processing and its applications in industries*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the basic concepts of digital image processing.*	1&2	90	85	H	L	M	M	H	L	-	-	L	M	-	-	H	H	M
CLO-2 :	*Learn the image fundamentals and mathematical transforms necessaryfor image processing*	1&2	90	85	H	H	M	M	H	-	-	-	-	M	-	-	H	H	M
CLO-3 :	*Study the various image enhancement and compression techniques*	1	90	85	H	L	L	M	H	-	-	-	-	M	-	-	H	H	M
CLO-4 :	*Understand the existing machine vision systems and technique for template matching and feature extraction*	1&2	90	85	H	L	L	M	H	-	-	-	-	-	-	M	H	H	M
CLO-5 :	*Application of Machine Vision in experimental mechanics and basics of 3D Vision*	1&2	90	85	H	L	M	M	H	M	M	-	-	-	-	M	H	H	M
CLO 6:	*Learn machine vision components and basics of Image Processing*	1&2	90	85	H	L	M	M	H	M	-	-	-	M	-	-	H	H	M

		IMAGE ACQUISITION AND FUNDAMENTALS OF IMAGEPROCESSING	IMAGE TRANSFORMS AND EDGE DETECTION	IMAGE ENHANCEMENT AND COMPRESSION	MACHINE VISION AND 3D VISION	MACHINE VISION APPLICATIONS
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Elements of visual perception, structure of eye*	*The Basics of Intensity Transformations and Spatial Filtering*	*Histogram modification and specification techniques*	*Review of existing vision systems*	*Digital Image Correlation DIC*
S-2	SLO-1	*Introduction to image processing, classification of image,*	*One-dimensional discrete fourier transform (DFT)*	*Image smoothing, Low pass filtering, Ideal low pass filter,*	*Binary and Gray vision system Vision system*	*DIC in sheet metal forming, experimental mechanics*
S-3	SLO-1	*Fundamental steps involved in image processing, sourceof image*	*Two- dimensional discrete fourier transform (DFT)*	*Butterworth low pass filter*	*Image Analysis methods, Feature extraction*	*Stereo vision in experimental mechanics*
S-4	SLO-1	*Image acquisition and digitization ,sensing*	*Cosine and Sine transform and their properties*	*Image sharpening, Butterworth filters*	*Image interpretation Segmentation*	*Electronic and automotive Industrial Applications*
S-5	SLO-1	*Illumination and its types*	*Hadamard and Haar transform and their properties*	*Generation of spatial masks from frequency domain specification,*	*Template Matching*	*Camera Calibration*
S-6	SLO-1	*CCD and CMOS Cameras*	*Slant, KL, SVD transforms and their properties*	*Basic steps in frequency domain filtering*	*Classification of 3-D Vision Techniques*	*Dimensional measurements in machine vision*
S-7	SLO-1	*Representing Digital Images, Spatial and IntensityResolution, Image Interpolation*	*Edge detection and their techniques, Roberts operator,*	*Nonlinear filters, function, Max filter, Min filter*	*Photometric stereo*	*Assembly Inspection*
S-8	SLO-1	*Problems on quantization and sampling*	*Problems based on FFT,DFT*	*Run length coding*	*Structured Light Reconstruction*	*Food processing Industrial applictaions*
S-9	SLO-1	*Practice on reading image and exercise on spatial resolution and sampling in MATLAB or Open CV*	*Practice on image transformation in MATLAB or Open CV*	*Practice on image filtering in MATLAB or Open CV*	*Assignments on feature extraction in MATLAB/Open CV*	*Practice on photometric stereo MATLAB Or Open CV*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Department of Mechanical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*develop appropriate skills on systemic thinking on how to identify and formulate a problem, evaluate the conceptual design by using scientific, engineering and managerial tools, and to understand the current trend for the problem.*
CLR-2 :	*rationalize the product design problem by selecting appropriate design variables, parameters and constraints from the published article*
CLR-3 :	*subdivide a complex system into smaller disciplinary models, analyze the output and reintegrate them into an overall system model and optimize the output*
CLR-4 :	*apply Multi objective optimization for the output to reintegrate them into an overall efficient system model*
CLR-5 :	*take on the challenges of team work, prepare a presentation in a professional manner.*
CLR-6 :	*understand how the various multi-disciplinary fields interact and integrate in real life situations. Develop appropriate skills on systemic thinking , evaluate the conceptual design by using scientific, engineering and managerial tools, analyze and interpret the data, considering safety, socio-politico-cultural, risks and hazards, disposal, regional and national laws, costing and financial model and undertake documentation with a presentation.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*develop appropriate skills on systemic thinking on how to identify and formulate a problem, evaluate the conceptual design by using scientific, engineering and managerial tools, and to understand the current trend for the problem.*	*2*	*80*	*70*	*H*	*H*	*M*	*M*	*M*	-	-	-	-	-	-	-	*H*	*H*	*H*

		Introduction to Mechatronics	Mechanical and Actuation Systems	Data Acquisition and Control	Modelling and Simulation	Case Studies
Duration (hour)		7	10	10	8	10
S-1	SLO-1	*Definition of mechatronics*	*Fundamental laws governing mechanical systems*	*Sensors in mechatronics systems*	*Significance of modeling*	*Modelling of a serial robot manipulator*
	SLO-2	*Evolution of mechatronics systems*	*Actuation subsystem in Mechatronics systems*	*Sensor characteristics*	*Example*	*Need of model based design for the system under consideration*
S-2	SLO-1	*Multidisciplinary nature of modern machines and their design challenges*	*Kinematic chains, transmission elements*	*Sensor signal types*	*Model-In-Loop(MIL) simulation*	*Benefits of model based design*
	SLO-2	*Example*	*Types, purpose and examples*	*Analog and digital signals*	*Example*	*Understanding the system under consideration*
S-3	SLO-1	*Traditional vs mechatronics approaches*	*Gears*	*Motion encoder, types*	*Software-In-Loop(SIL) simulations*	*Mechanical and electronics description*
	SLO-2	*Example*	*Types, selection criteria, nomenclature*	*Specifications and selection criteria*	*Example*	*Mathematical description of the model*
S-4	SLO-1	*Mechatronics design process*	*Lead screws and belt drives*	*Incremental optical encoder*	*Virtual Prototyping- a critical aspect of mechatronics approach*	*Mathematical modeling- derivation*
	SLO-2	*Need for design tools integration*	*Types, selection criteria, nomenclature*	*Quadrature decoding - Hardware method*	*Example*	*Control strategy*
S-5	SLO-1	*Review of key elements of mechatronics systems*	*Mechanical aspects of actuator selection*	*Quadrature decoding - Software method*	*Real-time (RT) simulations*	*Analysis of performance*
	SLO-2	*Example*	*Types of actuators*	*Absolute encoder decoding*	*Example*	*Analysis of performance*
S-6	SLO-1	*Role of mechatronics engineer.*	*Comparison of electrical, pneumatic and hydraulic actuators*	*Elements of a data acquisition system*	*concurrent development of subsystems*	*Modelling of a active suspension*
	SLO-2	*Various steps for design*	*Special purpose actuators*	*Signal conditioning systems*	*Example*	*Need of model based design for the system under consideration*
S-7	SLO-1	*Various Mechatronics systems*	*Example circuit design of a servo pneumatic actuation system*	*Analog to digital conversion*	*Real-time Hardware-In-Loop simulation (HIL)*	*Benefits of model based design*

	SLO-2	*Various Mechatronics systems*	*Case study*	*Computer hardware aspects of data acquisition*	*Example*	*Understanding the system under consideration*
S-8	SLO-1		*Step motors, types*	*Introduction to state space modelling*	*Running the controller model and plant model on real-time target*	*Mechanical and electronics description*
	SLO-2		*Construction and selection criteria*	*Modelling of a DC motor*	*V&V using HIL RT model.*	*Mathematical description of the model*
S-9	SLO-1		*Electronic drives for electrical actuators*	*Introduction to PID Control*		*Mathematical modeling- derivation*
	SLO-2		*Types, pupose and selection criteria*	*Derivation*		*Control strategy*
S-10	SLO-1		*DC motor drives - any one type*	*State space model of a speed control of a DC motor*		*Analysis of performance*
	SLO-2		*AC motor drives - any one type*	*Derivation*		*Analysis of performance*

Course Code	18MHO102T	Course Name	Model Based System Design	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mechatronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the processes, methods, and practices of model-based systems engineering(MSBE)*
CLR-2 :	*Comprehend the conflicting requirements of complex engineering systems and their life cycle stages through some relevant case studies and relate the need for model based system engineering*
CLR-3 :	*Define and develop requirements, architectures, behavior, specifications, verifications, and tests that represent engineering systems using model-based systems engineering.*
CLR-4 :	*Analyze systems using model-based systems engineering approaches that lead to better and increased design metrics of systems*
CLR-5 :	*Apply the knowledge of model based system engineering for creating models using SysML diagrams that accurately represent views of engineering systems and analyze the same for improving the performance.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Ability to describe the processes, methods, and practices of model-based systems engineering*	2	75	70	H	H	M	H	M	-	-	-	-	-	-	H	H	H	H
CLO-2 :	*Recognize the conflicting requirements of complex engineering systems and their life cycle stages through some relevant case studies and relate the need for model based system engineering*	3	75	70	H	H	M	H	M	-	M	-	-	-	-	H	M	M	M
CLO-3 :	*Develop and relate requirements, architectures, behavior, specifications, verifications, and tests that represent cyber-physical systems using model-based systems engineering methods.*	3	75	70	H	H	M	H	M	-	M	M	-	-	M	H	M	M	M
CLO-4 :	*Demonstrate analysis of systems using model-based systems engineering approaches that lead to better and increased design metrics of systems*	3	75	70	H	H	M	H	M	-	M	M	-	-	M	H	M	M	M
CLO-5 :	*Apply the knowledge of model based system engineering to create effective models using SysML diagrams that accurately represent views of engineering systems and analyze the same for improving the performance.*	3	75	70	H	H	M	H	H	-	M	M	-	-	M	H	M	M	M

		Foundations to Model Based System Engineering(MSBE)	Modeling, Analysis and Management of System Requirements	Modeling and Simulation of Structures and Behaviors of Systems	Definition of Cyber Physical Systems and Components	Verification and Validation
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of complex engineering systems*	*Requirement of engineering artifact modeling*	*Multidisciplinary design modeling requirements*	*Definition of components and systems*	*V&V techniques overview*
	SLO-2	*Motivation for system engineering/ model based system engineering (MBSE)*	*Requirement of engineering artifact modeling*	*Multidisciplinary design modeling requirements*	*Definition of components and systems*	*V&V techniques overview*
S-2	SLO-1	*The system engineering process*	*Eliciting Requirements*	*Structural modeling*	*Assigning behaviors to components*	*Verification techniques: software engineering techniques*
	SLO-2	*Typical application of system engineering process*	*Eliciting Requirements*	*Structural modeling*	*Assigning behaviors to components*	*Formal verification technique*
S-3	SLO-1	*Multidisciplinary systems engineering team*	*Requirement modeling*	*Structural modeling using SysML*	*Incorporating images in to the model*	*Program analysis technique*
	SLO-2	*System engineering practice through standards*	*Requirement modeling*	*Structural modeling using SysML*	*Incorporating images in to the model*	*V&V of engineering design models*
S-4	SLO-1	*Contrasting document based approach and model based approach*	*Requirements management*	*Behavioral model using states and transitions*	*Allocation*	*V&V of engineering design models- Tool support*
	SLO-2	*Contrasting document based approach and model based approach- introduce SysML diagrams and MSBE tool*	*Requirements management*	*Behavioral model using states and transitions*	*Allocate activity partition*	*Automatic approach for synergistic verification and validation*
S-5	SLO-1	*Modeling principles- Model and MSBE method definition*	*Requirements Diagram, Traceability Hierarchy Diagram*	*Behavioral model in SysML*	*Unit, dimension and data types*	*Synergistic verification and validation methodology*

	SLO-2	*The purpose for modeling a system*	*Requirements Diagram, Traceability Hierarchy Diagram*	*Behavioral model in SysML*	*Adding constraints*	*Dedicated V&V approach for system engineering*
S-6	SLO-1	*Model validation*	*Hazard analysis and threat modeling*	*Ensuring consistency*	*Activity diagrams*	*Verification and validation of behavioral diagrams*
	SLO-2	*Model metrics*	*Hazard analysis and threat modeling*	*Solving inconsistency*	*Interaction diagrams*	*Verification and validation of behavioral diagrams*
S-7	SLO-1	*Introducing the concept of architectures*	*Creating requirements models of systems using SysML in different contexts and views*	*The relationship between behavioral diagrams and structure level*	*Case study: MBSE approach for Elevator*	*Probability model checking of SysML activity diagrams*
	SLO-2	*Requirements*	*Creating requirements models of systems using SysML*	*The relationship between behavioral diagrams and structure level*	*Case study: MBSE approach for Elevator*	*Probability model checking of SysML activity diagrams*
S-8	SLO-1	*System's life cycle*	*Creating requirements models of systems using SysML in different contexts and views*	*Identifying complexity through different levels of abstraction and refinement*	*Case study: MBSE approach for ATM*	*Performance analysis of time-constrained activity diagrams*
	SLO-2	*System's life cycle*	*Creating requirements models of systems using SysML in different contexts and views*	*Identifying complexity through different levels of abstraction and refinement*	*Case study: MBSE approach for ATM*	*Performance analysis of time-constrained activity diagrams*
S-9	SLO-1	*Design and integration process*	*The SysML Use Case Diagram*	*Independent views of the same system*	*Case study: MBSE approach for automobile*	*Case study –Demonstration of V&V*
	SLO-2	*Types of systems*	*SysML Blocks and Block definition diagram*	*Concluding remarks*	*Case study: MBSE approach for automobile*	*Case study –Demonstration of V&V*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department		Mechatronics Engineering	Data Book / Codes/Standards	Nil	

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Introduce the various architectures of industrial robot*
CLR-2 :	*Introduce the vector transformation applied to robotics*
CLR-3 :	*Introduce the forward and inverse kinematics applied to serial manipulator robot*
CLR-4 :	*Emphasize on the various actuators and transmission element used in robot.*
CLR-5 :	*Introduce the parallel configuration of robot and its kinematics computation.*
CLR-6 :	*To define various control strategy used in manipulator robotics*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Understand the architecture and basic technical terms used in robotics*	2	80	70	H	M	M	H	M	-	-	-	-	-	-	H	H	-	-
CLO-2 :	*Apply vector transformation in robotics*	2	80	70	H	H	M	H	M	-	-	-	-	-	-	H	H	-	-
CLO-3 :	*Abilityto compute the forward and inverse kinematics of serial manipulator*	2	80	70	H	H	M	H	M	-	-	-	H	-	-	H	H	-	-
CLO-4 :	*Understand the various actuators and transmission elements used in robot.*	2	80	70	H	H	H	H	M	-	-	-	M	-	-	H	H	-	-
CLO-5 :	*Understand the parallel configuration of robot, their kinematics computation.*	2	80	70	H	H	M	H	M	-	-	-	M	-	-	H	H	-	-
CLO-6 :	*Implement various control and trajectory planning algorithm*	2	80	70	H	H	M	H	M	-	-	-	M	-	-	H	H	-	-

		Introduction to Robotics	Transformations	Kinematics	Introduction to robot sensors and control	Parallel Manipulator and industrial work cell
Duration (hour)		7	7	11	10	10
S-1	SLO-1	*Definition of Robot, Laws of Robotics,*	*Description of point in space*	*Introduction to manipulator kinematics*	*Basic actuators and transmission elements*	*Introduction to parallel manipulator*
	SLO-2	*Basic terminologies used in robotics*	*Description of body in space*	*Forward and inverse kinematics*	*Mathematical model of DC motor*	*Advantage of parallel manipulator over serial manipulator*
S-2	SLO-1	*Classification based on application*	*Translation and Rotation*	*Forward Kinematics of RR planar manipulator- geometric approach*	*Harmonic Drives*	*Degree of freedom of parallel manipulator using Gruebler equation*
	SLO-2	*Classification based on work volume*	*Derivation of rotation matrix to represent frame orientation in XYZ axes*	*Inverse Kinematics of RR planar manipulator- geometric approach*	*Computation of reduction ratio of harmonic drive and its advantage*	*Problem on finding degree of freedom of planar and spatial mechanism*
S-3	SLO-1	*Definition – precision, repeatability and accuracy*	*various rotation representation and their difference*	*DH formulation*	*Force sensor*	*Types of parallel manipulator*
	SLO-2	*Co-ordinate systems used in robotics, Degree of freedom with examples*	*Euler angle, fixed angle , arbitrary axis representation*	*Difference between modified and standard DH convention with example of RR planar manipulator*	*Various tactile sensors- principle and working*	*Examples*
S-4	SLO-1	*Links and various joints in robotics*	*Properties of rotation matrix*	*Forward kinematics of 3R spatial articulated arm*	*Slip sensor*	*Kinematics of parallel manipulator*
	SLO-2	*Anatomy of Robot*	*Homogeneous transformation*	*Derivation of final DH matrix for 3R spatial articulated arm*	*Slip sensor*	*Concept of inverse and forward kinematics*
S-5	SLO-1	*RPY wrist*	*Case study- problems on pure rotation (current and fixed axis)*	*Forward kinematics of 4 DOF SCARA robot*	*Vision system for robot*	*Inverse kinematics of planar parallel manipulator*
	SLO-2	*Configuration space and operational space*	*Case study –problem on rotation and translation*	*Derivation of final DH matrix for 4 DOF SCARA robot*	*Vision architecture block diagram*	*Derivation*
S-6	SLO-1	*Robot data sheet interpretation*	*Operators and mapping*	*Forward kinematics of RPY wrist*	*Introduction-trajectory planning. joint space and Cartesian space planning*	*Inverse kinematics of spatial parallel manipulator*

	SLO-2	*Important terms and finding in datasheet of manufacturer*	*Case study - operators and mapping*	*Derivation of final DH matrix for RPY wrist*	*Choice of joint space and Cartesian space trajectory planning*	*Derivation*
S-7	SLO-1	*Robot End-effector*	*Compound transformation*	*Inverse Kinematics - closed loop form*	*Cubic polynomial trajectory planning*	*Robot work cell layout*
	SLO-2	*Types of gripper*	*Case Study – compound Transformation*	*Computation method and issues*	*Problem on cubic polynomial trajectory planning*	*Classification of robot work cell*
S-8	SLO-1			*Inverse kinematics of a 3 DOF spatial articulated arm*	*Robot position control*	*Multiple robot*
	SLO-2			*Numerical*	*Position control of one DOF link*	*Work cell control*
S-9	SLO-1			*Velocity kinematics introduction and Jacobian*	*Robot force control*	*Safety monitoring*
	SLO-2			*Understanding and deriving Jacobian matrix elements*	*Case study- force control (peg in a hole)*	*Error detection and recovery*
S-10	SLO-1			*Derivation of Jacobian matrix for RR planar manipulator*	*Hybrid force/position control*	*Robot Cycle time analysis*
	SLO-2			*Concept of singularity for manipulator*	*Case Study of hybrid force/position control*	*Criteria for selection of robot work cell*
S-11	SLO-1			*Computing Jacobian for RRR spatial manipulator*		
	SLO-2			*Computing singularity for a RRR spatial manipulator*

Course Code	18NTO302T	Course Name	SOLID STATE ELECTRONIC DEVICES	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Nanotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Realize the basics of solid state physics with particular emphasis on semiconductors.*
CLR-2 :	*Provide in-depth understanding of diodes, acquire knowledge of various types and operation of diodes.*
CLR-3 :	*Develop key understanding related to basics of transistors along with processes involved in working of transistors*
CLR-4 :	*Understand the important ingredient towards technological application of transistors, specifically, field effect transistors*
CLR-5 :	*Get acquainted with various solid state devices and application.*
CLR-6 :	*Develop idea about few exemplary real commonly used electronic devices.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Appreciate the importance of “solid state devices” for the advancement of technology*	2	80	75	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Analyze diodes and understand its significance in technological application*	2	80	70	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Obtain the knowledge on the transistors and its working principles*	2	75	70	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Achieve knowledge about variety of transistors and difference between various transistors*	2	80	75	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Evaluate the working principles of existing devices based on solid state electronics*	2	80	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Get an idea of future device application in advancing the existing technology for power efficient devices*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Brief introduction to crystal structure in solids*	*Basic structure of p-n junction*	*Basics of Bipolar transistors*	*Introduction to Field Effect Transistors (FET)*	*Introduction to light emitting diode (LED)*
	SLO-2	*Electronic band structure*	*Current transport in p-n junction diode*	*Usefulness of transistors*	*Working principle of FET*	*Working principle of LED*
S-2	SLO-1	*Detailed discussion on energy bands in solids*	*I-V Characteristics, Zero applied bias: Electric field*	*Theory of operation and action of PNP*	*Junction FET*	*Different useful materials for LED*
	SLO-2	*Discussion on band structure calculation*	*Built-in potential, junction capacitance, Diffusion capacitance*	*NPN transistors*	*Theory of operation and current equation*	*Multilayers heterojunctions for LED*
S-3	SLO-1	*Elemental and compound semiconductors*	*Generation-recombination currents*	*Description of majority and minority carrier distribution*	*Introduction of Metal semiconductor FET (MOSFET)*	*Photodiodes-current and voltage in an illuminated junction*
	SLO-2	*Doping in semiconductors, Shallow and deep levels*	*Junction breakdown mechanisms*	*Terminal currents in transistors*	*Application of MOSFET*	*Exemplary description of photodiodes*
S-4	SLO-1	*Carrier statistics, Carrier transport, Carrier mobility*	*Introduction of Zener diode*	*How transistors can be used for amplification?*	*Metal oxide semiconductor FET (MOSFET): working principle*	*Photodetectors-noise*
	SLO-2	*Scattering mechanisms*	*Unique features associated with Zener diode*	*Transistor as amplifier*	*Application of MOSFET*	*Bandwidth of photodetectors*
S-5	SLO-1	*Non-equilibrium conditions, Quasi Fermi levels*	*Heterojunctions: Band alignments*	*What makes transistors to work as switch?*	*Details of VI Characteristics of MOSFET*	*Semiconductor lasers*
	SLO-2	*Recombination processes*	*Energy band diagrams of heterojunctions*	*Application of transistor as switch*	*Qualitative description of VI characteristics of MOSFET*	*Population inversion at a junction*
S-6	SLO-1	*Understanding current density*	*Formation of two dimensional electron gas*	*How transistors can be used for switching?*	*Depletion and enhancement types - threshold voltage*	*Detailed description of emission spectra for p-n junction lasers*
	SLO-2	*Mathematical description of continuity equations*	*Qualitative description of two dimensional electron gas*	*Summary of transistor application*	*Gate capacitance inversion and accumulation layers*	*Quantitative interpretation of emission spectra for p-n junction lasers*
S-7	SLO-1	*Surface recombination*	*Metal-semiconductor contacts*	*Open-circuited transistors-biasing in active region,*	*Complementary MOSFET*	*Heterojunction lasers-materials for semiconductor lasers*

	SLO-2	*Surface states*	*Schottky barrier diode*	*Ways to bias a transistors*	*Significance of CMOSFET*	*Semiconductor laser applications*
S-8	SLO-1	*Excitons in semiconductors*	*Fermi level pinning*	*Detailed description of Schottky transistors*	*Introduction to high electron mobility transistor (HEMT)*	*Introduction to Solar cells*
	SLO-2	*How to estimate carrier concentration?*	*C-V characteristics of a Schottky diode*	*Working principles of Schottky transistors*	*Ways to achieve HEMT*	*Relevance of semiconducting materials in solar cell application*
S-9	SLO-1	*Discussion on Hall effect measurements*	*Current transport processes*	*Detailed description of Optical transistors*	*Working principle of charge coupled devices (CCD)*	*Transistors as building block of memory devices*
	SLO-2	*Discussion on fractional quantum Hall effect*	*I-V characteristics*	*Application of Optical transistors*	*Interpretation of information obtained from CCD*	*Advanced solid state memory devices*

Learning Resources	1. *Solid State Electronic Devices, by Streetman and Ben Garland, Prentice Hall, 2000* 2. *Physics of Semiconductor Devices, by S. M. Sze and Kwok. K. Ng, John Wiley & Sons, Inc., 2007*	3. *Art of Electronics, by Horowitz and Hill, Cambridge University Press, 2nd ed., 1989*

Learning Assessment

Course Code	18NTO303T	Course Name	MICRO AND NANOELECTRONICS	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Nanotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the physical effects of semiconductor-semiconductor junction, its electrostatics, and device operation*
CLR-2 :	*Learn methodology of lithography and etching to pattern materials at micro and nanoscale*
CLR-3 :	*Acquire knowledge of VLSI design and fabrication*
CLR-4 :	*Get acquainted with CMOS fabrication rules*
CLR-5 :	*Learn integrated circuit passive and component fabrication processes*
CLR-6 :	*Introduce next generation printed electronics technology*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Apply working of semiconductor devices in its large scale operation*	2	80	75	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Pattern diverse materials using lithography techniques to enhance the device density on chip*	2	80	70	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Design the VLSI components*	2	75	70	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Fabricate small-scale devices and chip level device space management*	2	80	75	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Imagining importance of nanoscale devices*	2	80	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Envision low cost production of electronic devices using printed technology*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Fundamentals of Electronic Devices*	*Need and basics of lithography*	*History of complementary metal-oxide-semiconductor (CMOS)*	*Integrated circuit fabrication technology*	*Overview of flexible electronics*
	SLO-2	*Overview of semiconductor Physics*	*Optical lithography*	*CMOS processing: LOCOS and STI isolation*	*Moor's law and scaling*	*Advantages of printing*
S-2	SLO-1	*Intrinsic semiconductors*	*Optical lithography controls*	*Layout design rules*	*Passive component fabrication*	*Requirements of printing*
	SLO-2	*Extrinsic semiconductors*	*Photo-mask making*	*Rules for: well, transistor, contact, via, etc.*	*Fabrication of integrated resistor*	*Printing tools*
S-3	SLO-1	*p-n junction formation*	*Working concept and controls of e-beam lithography*	*MOSIS Scalable CMOS Design Rules*	*Fabrication of integrated capacitor*	*Types of fluids for ink*
	SLO-2	*Charge distribution and Fermi level in p-n junction*	*Resolution of electron beam lithography*	*Micron design rules*	*Fabrication of integrated inductor*	*Properties of fluids in printing processes*
S-6	SLO-1	*Depletion region capacitance*	*Wet etching mechanism and disadvantages*	*CMOS integrated inverter working principle*	*Self-aligned gate*	*Working principle of flexographic printing (FP)*
	SLO-2	*Depletion region width and its bias dependence*	*Wet etching of silicon, silicon dioxide and metal*	*IV characteristics of inverter*	*fabrication of NMOS with polysilicon self-aligned gate*	*Advantages and disadvantages of FP*
S-7	SLO-1	*Metal-Oxide-Semiconductor (MOS) capacitor*	*Types of dry etching*	*CMOS fabrication process*	*3D transistors requirements*	*Working principle of gravure printing (GP)*
	SLO-2	*Operation of MOS capacitor*	*Ways of plasma generation for etching processes, Sputter etching*	*CMOS integrated inverter design rules*	*FinFET technology*	*Advantages and disadvantages of GP*
S-8	SLO-1	*Operation of MOSFETs in linear region*	*Capacitively coupled plasma*	*CMOS process enhancement*	*Integrated memory devices*	*Working principle of screen printing (SP)*
	SLO-2	*Operation of MOSFETs in saturation region*	*Reactive ion etching*	*Enhancement for transistor and interconnect*	*Dynamic RAM (DRAM) fabrication*	*Advantages and disadvantages of SP*
S-9	SLO-1	*Sub threshold region*	*Inductively coupled plasma*	*Manufacturing issues*	*Challenges for nanoelectronics*	*Working principle of inkjet printing (IP), Advantages and disadvantages*

	SLO-2	*MOSFET scaling*	*Deep reactive ion etching and bosh process*	*Yield management*	*Requirements of nanoelectronics*	*Future of printed low-cost electronics*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Nanotechnology in environmental and health effects*	*Nanomaterials for Environmental Protection*	*Identification and characterization of Hazardous waste*	*Environmental Nano Remediation Technology*	*Sustainable Nanotechnology*
	SLO-2	*Environmental pollutants in air*	*Nanotechnology processes*	*Nano Pollution*	*Thermal methods*	*Application of industrial ecology to nanotechnology*
S-2	SLO-1	*Environmental pollutants in water*	*Nano Engineering materials for Pollution Prevention*	*Air/Gas Contaminants*	*Physical methods*	*Fate of nanomaterials in environment*
	SLO-2	*Environmental pollutants in soil*	*Green Chemistry*	*Water Contaminants*	*Chemical methods*	*environmental life cycle of nano materials*
S-3	SLO-1	*Hazardous and toxic wastes*	*Energy efficient resources and materials*	*Soil Contaminants*	*Biological Methods*	*environmental impacts of nano materials*
	SLO-2	*Challenges to occupational health*	*Nanotechnology products- Nanomaterials*	*Identification and Characterization of Organic and inorganics*	*Nano Filtration methods for treatment of waste water*	*health impacts of nano materials*
S-4	SLO-1	*Challenges to occupational hygiene*	*Nanodevices and nanosystems*	*Identification and Characterization of Organic and inorganics*	*removal of organics & inorganics and pathogens*	*toxicological threats*
	SLO-2	*Toxicity of nanoparticles*	*Synthesis of nanomaterials by Physico-chemical approaches*	*Nanomaterials-Remediation*	*removal of inorganics*	*eco-toxicology*
S-5	SLO-1	*Effects of inhaled nanosized particles*	*Bio-nancomposites*	*Nano Membranes*	*removal of pathogens*	*exposure to nano particles – biological damage*
	SLO-2	*Skin exposure to nanoparticles*	*Nanoparticles and Microorganisms*	*Nano Meshes*	*Nanotechnology for water 5 remediation and purification*	*threat posed by nano materials to humans*
S-6	SLO-1	*Impact of CNTs on respiratory systems*	*Microbial Synthesis of Nanomaterials*	*Nano Fibres*	*Treatment of hi-tech industrial waste waters using nano particles/ modified structures/devices*	*environmental reconnaissance and surveillance*
	SLO-2	*Hazards of exposure to nanoparticles*	*Biological Methods for Synthesis of nano-emulsions using bacteria*	*Nano Clays and Adsorbents, Zeolites, Nano Catalysts, Carbon Nano Tubes,*	*Treatment of hi-tech industrial waste waters using modified structures*	*Corporate social responsibility for nanotechnology*
S-7	SLO-1	*Risks of exposure to nanoparticles*	*Fungi and Actinomycetes*	*Bio Polymers*	*Treatment of hi-tech industrial waste waters using dyes*	*Combining Life Cycle and Risk Assessment*

	SLO-2	*Screening of nanomaterials for understanding potential effects to human health and the environment*	*Different plants based nanoparticle synthesis*	*Single Enzyme Nanoparticles*	*Groundwater remediation*	*Proposed Solutions to prevent toxicology*
S-8	SLO-1	*Mapping of the environmental fate of nanomaterials*	*Plants based nanoparticle synthesis*	*Bio Metallic Iron Nanoparticles*	*Surface water treatment*	*Safety measurements*
	SLO-2	*Relationships between key properties of nanomaterials and their environmental fate*	*Nano composite biomaterials – Fibres*	*Nano SemiConductors*	*Titanium dioxide*	*Education and understanding of sustainable nanotechnology*
S-9	SLO-1	*Transport and transportation of nanomaterials*	*Devices and Structures*	*Photo catalysis*	*Challenges*	*Applications of nanotechnology for sustainability*
	SLO-2	*Bio-distribution and toxicity of nanomaterials*	*Nano Bio systems.*	*Nano-sensors*	*Environmental Benefits of nanomaterials*	*Nanomaterials in future - implications.*

Course Code	18NTO306T	Course Name	NANOSCALE SURFACE ENGINEERING	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Nanotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Obtain vast knowledge on Surface and Interfaces and its structure*
CLR-2 :	*Understand the process involved in surface and Interfaces*
CLR-3 :	*Understand the Diffusion process involved in surface and related laws*
CLR-4 :	*Describe the laws related to surface phenomena*
CLR-5 :	*Gain knowledge on Surface Analysis Techniques*
CLR-6 :	*Understand the principles of XPS, UPS and ISS*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Apply the concept of Surface crystallography to understand the surface structure*	2	80	75	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Able to analyze surface related process and its measurements*	2	80	70	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Apply the concept of Fick's law to have clear a understanding on surface diffusion process*	2	75	70	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Analyze the different mechanisms involved in surface diffusion and kinetics*	2	80	75	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Utilize the Photoelectron spectroscopic and Secondary electron techniques to understand the properties of surface*	2	80	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Analyze different types of metal and semiconducting surfaces and its properties*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to surfaces and interfaces and its related terms and definitions*	*Adsorption and desorption: Definition & Concept*	*Concept of Random-walk motion*	*Surface specificity*	*Nanoscale Characterization for Surfaces*
	SLO-2	*surface energy, surface tension and surface states*	*Various types of adsorption and desorption*	*Basic equations -random-walk motion*	*Spectrum of secondary electrons*	*Scanning tunneling microscopy (STM) – historical perspective and theory*
S-2	SLO-1	*Some basic concepts of bulk crystallography : Direct lattices and directions*	*Basics of adsorption kinetics*	*Fick's laws: Definition and its explanation*	*Photoelectron spectroscopy - Physical process: photoemission, spectral feature*	*STM: electron tunneling*
	SLO-2	*Symmetry groups and planes*	*Concept of coverage dependence*	*Fick's laws: Definition and its explanation*	*Photoelectron spectroscopy -depth specificity*	*STM imaging*
S-3	SLO-1	*Structure of the unit cell, Primitive cell in bulk crystals.*	*Coverage dependence derivation*	*Tracer diffusion*	*Photoelectron spectroscopy (XPS and UPS) - compositional information*	*Scanning tunneling spectroscopy*
	SLO-2	*Concept of ideal crystal and of ideal crystal*	*Langmuir Isotherm*	*Chemical, diffusion*	*Photoelectron spectroscopy (XPS and UPS) - elemental sensitivity*	*STM: Instrumentation*
S-4	SLO-1	*Surface structure and surface order*	*Temperature dependence Kinetics*	*Intrinsic diffusion*	*Photoelectron spectroscopy (XPS and UPS) - chemical-state information*	*Semiconductor surfaces*
	SLO-2	*Surface crystallography*	*Temperature dependence derivation*	*Mass transfer diffusion*	*Photoelectron spectroscopy (XPS and UPS) -spectral resolution and depth profiling*	*Semiconductor surfaces: Si (111)*
S-5	SLO-1	*Surface Crystallography of a plane,*	*Angular dependence Kinetics*	*Anisotropy of surface diffusion*	*Photoelectron spectroscopy (XPS and UPS) -Modular instrumentation: excitation sources*	*Semiconductor surfaces: Si (100)*
	SLO-2	*And its point and space group symmetry*	*Kinetic energy dependence Kinetics*	*Anisotropy of surface diffusion*	*Energy analyzers and detectors*	*Semiconductor surfaces: GaAs (110)*
S-6	SLO-1	*Unit mesh transformation approach*	*Thermal deposition*	*Atomistic mechanisms of surface diffusion and its types*	*Auger Electron spectroscopy (AES): physical process: photoemission*	*Photo induced process*

	SLO-2	*Wood notation description*	*Theory of Desorption kinetics*	*Atomistic mechanisms of surface diffusion: hopping mechanism*	*Ion Scattering Spectroscopy (ISS): physical process: photoemission*	*Different types involved in Photo induced process*
S-7	SLO-1	*Unit mesh transformation approach*	*Thermal desorption spectroscopy: Basic working Principle*	*Atomistic mechanisms of surface diffusion: Vacancy mechanism*	*Spectral feature and depth Specificity*	*Metal – semiconductor surfaces*
	SLO-2	*Matrix notation and classification of overlayer meshes*	*Thermal desorption spectroscopy: Instrumentation*	*Atomistic mechanisms of surface diffusion: Atomic exchange mechanism*	*AES and ISS: compositional information*	*Analysis of Metal – semiconductor surfaces properties*
S-8	SLO-1	*Electronic structure (for three dimension)*	*Adsorption Isotherms: A detailed study*	*Atomistic mechanisms of surface diffusion:Tunneling mechanism*	*AES and ISS:elemental sensitivity*	*Alkali – metal – semiconductor interfaces*
	SLO-2	*Density of States (Surface states)*	*Various types of Adsorption Isotherms*	*Atomistic mechanisms of surface diffusion:Tunneling mechanism*	*AES and ISS: chemical-state information & spectral resolution and depth profiling*	*Analysis of Alkali – metal – semiconductor interfaces properties*
S-9	SLO-1	*Surface states structure (for two dimension)*	*Non-Thermal desorption*	*Nucleation and Equilibration via Surface Diffusion*	*AES and ISS: excitation sources*	*Growth of trivalent metals on Si (001)*
	SLO-2	*Surface electronic structure (for two dimension)*	*Types of Non-Thermal desorption*	*Experimental study of surface diffusion*	*AES and ISS: energy analyzers and detectors*	*Analysis of Growth of trivalent metals on Si (001) properties*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire knowledge on nanoelectronics and its importance*
CLR-2 :	*Introduce the concept of molecular and optical computing*
CLR-3 :	*Understand about biocomputers and related nanomachines*
CLR-4 :	*Learn basics and advancements of quantum computing*
CLR-5 :	*Understand the architecture of processing in nanosystems*
CLR-6 :	*Gain knowledge on soft computing and neural networks*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Apply the basic concepts in nanocomputing*	2	80	75	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Explain major advances in molecular and optical computing*	2	80	70	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Recognize the evolution and advancements of biocomputers*	2	75	70	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Utilize the knowledge in quantum computing*	2	80	75	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Get familiarized with designing of parallel information processing machines*	2	80	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Apprehend the importance of soft computing*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*History of computing*	*Molecular computing*	*Biological networks and neurons*	*Quantum computers-Bit and Qubit*	*Parallel Architectures for Nanosystems-Architectural principles*
	SLO-2	*Nanocomputing*	*Brief background of molecular electronics*	*Function of neuronal cell*	*Coherence and entanglement*	*Mono and multiprocessor systems*
S-2	SLO-1	*Transistors inside the Machine*	*Origin of molecular computing*	*Biology-inspired concepts*	*Quantum parallelisms*	*Some considerations to parallel processing*
	SLO-2	*Quantum computers*	*Molecular computing architecture*	*Biological Neuronal cells on silicon*	*Classical gates*	*Influence of delay time*
S-3	SLO-1	*Nanocomputing technologies*	*Some techniques of molecular computing-Adleman's landmark experiment*	*Modeling of neuron cells by VLSI circuits*	*Reversible operations*	*Power dissipation and Parallelism*
	SLO-2	*From Microelectronics to Nanoelectronics*	*DNA computation in ciliates-Bacteriorhodopsin*	*Neuronal networks with local adaptation*	*Beyond Classical Gates-Superposition*	*Architecture for processing in Nanosystems-Classic systolic arrays*
S-4	SLO-1	*From Nanoelectronics to Nanoelectronics computers*	*Challenges of molecular computing-Reliability, Efficiency and Scalability*	*Distributed data processing*	*Sqrt(NOT) operation*	*Processor with large memories*
	SLO-2	*Alternative to Transistor technology – quantum computing*	*Encoding problem-Error-preventing codes*	*Biocomputers – biochemical computers*	*Quantum algorithms-Necessity of quantum software in Conjunction with the hardware*	*Processor array with SIMD and PIP architectures*
S-5	SLO-1	*Nanoinformation processing - Prospects and challenges*	*Building and programming molecular computers*	*Biomechanical computers*	*Searching by using Sqrt (NOT)*	*Reconfigurable computers*
	SLO-2	*Digital signals and gates*	*Optical computing- Introduction*	*Bioelectronic computers*	*Hardware challenges to large Quantum Computers*	*Teramac concept as a prototype*
S-6	SLO-1	*Silicon nanoelectronics-short channel effects*	*Current use of optics for computing*	*Engineering biocomputers*	*Ion traps-Solids*	*Soft computing*

	SLO-2	*Leakage current in scaled devices-process variation*	*Advantages of optical methods over electronic ones*	*DNA computer*	*NMR in organic liquids-Optics*	*Methods of soft computing -Fuzzy systems*
S-7	SLO-1	*Carbon nanotube electronics*	*Some roles of optics – 2D array mapping*	*Information processing with chemical reactions*	*Fabrication Challenges*	*Evolutionary algorithms*
	SLO-2	*Band structure of carbon nanotubes-Carbon Nanotube properties*	*Garbage free operations*	*Peptide computing*	*Testing and architectural challenges*	*Connectionistic systems*
S-8	SLO-1	*Carbon nanotube field effect transistors*	*Optical computing paradigms*	*Development of a peptide computer*	*Quantum dot cellular automata*	*Computational Intelligence systems*
	SLO-2	*Simulation of Schottky barrier carbon nanotube FETs*	*Ultrafast pulse shaping -Tb/sec data speeds*	*Nanomachines*	*Computing with QCA*	*Characteristics of neural networks in nanoelectronics*
S-9	SLO-1	*MOSFET like carbon nanotube FETs*	*Role of non-linear materials in Nanocomputing: Need for new materials*	*Wetware computer*	*QCA clocking*	*Local processing*
	SLO-2	*Simulation of MOSFET characteristics*	*Advance in Photonic switches*	*Parallel processing*	*QCA design rules*	*Self organization*

Course Code	18NTO402T	Course Name	NANO AND MICRO ELECTROMECHANICAL SYSTEMS	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department		Nanotechnology	Data Book / Codes/Standards	Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire knowledge on MEMS and NEMS fundamentals*
CLR-2 :	*Understand different principles involved in MEMS devices*
CLR-3 :	*Describe construction and function of MEMS actuators*
CLR-4 :	*Gain knowledge on the material requirement for different actuation mechanisms*
CLR-5 :	*Gain knowledge on individual sensing and Micromechanical components and their integration*
CLR-6 :	*Understand the basic microsystem and MEMS fabrication process technologies*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Apply the principles of sensing and actuation to design NEMS and MEMS devices*	*2*	*80*	*75*	*H*	*M*	*H*	*H*	*H*	*M*	*M*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*H*
CLO-2 :	*Analyze the suitability of a actuation mechanism for a particular application*	*2*	*80*	*70*	*H*	*M*	*M*	*H*	*M*	*M*	*M*	*H*	*M*	*H*	*M*	*H*	*M*	*M*	*M*
CLO-3 :	*Utilize the suitable material properties to design a MEMS structure*	*2*	*75*	*70*	*H*	*M*	*H*	*H*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-4 :	*Apply a suitable microsystem technology to create different nano and micro mechanical structure*	*2*	*80*	*75*	*M*	*H*	*H*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-5 :	*Design high aspect ratio structure and integration with microsystem technologies*	*2*	*80*	*70*	*H*	*M*	*H*	*H*	*H*	*M*	*M*	*H*	*M*	*H*	*M*	*H*	*H*	*H*	*H*
CLO-6 :	*Utilize the different sensing and actuation concepts to design a lab-on-chip*	*2*	*80*	*75*	*H*	*M*	*M*	*H*	*H*	*M*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*M*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Micro- and nanoelectromechanical systems*	*Photolithography*	*SensingPrinciples*	*Magnetic materials used in MEMS*	*Principles of MOEMS technology*
	SLO-2	*MEMS and NEMS: An overview*	*Structural and sacrificial materials*	*Actuation Principles*	*MagneticProperties used in MEMS*	*Applications of MOEMS*
S-2	SLO-1	*Nanoelectromechanical Systems*	*Thin film deposition*	*Components: Beam*	*Magnetic sensing and detection*	*Properties of Light*
	SLO-2	*Scaling Laws*	*Physical Vapor Deposition , Chemical Vapor Deposition techniques*	*Cantilever, microplates*	*Magneto resistive sensor*	*Light modulators*
S-3	SLO-1	*Modeling*	*Impurity doping*	*Capacitive effects*	*Hall Effect based sensors*	*Beam splitters*
	SLO-2	*The input-output concept*	*Etching (Wet and Dry)*	*Piezo elements*	*Magnetodiodes, Magntotransistor*	*Micro lens*
S-4	SLO-1	*Sensors and Actuators*	*Bulk micromachining*	*Strain Measurements*	*Magnetic actuation Principles*	*Micro mirror,Digital micromirror device*
	SLO-2	*Energy Domains and Transducers*	*Surface micromachining*	*Pressure and flow measurements*	*Essential magnetic actuation concepts*	*Optical switch, Wave guide and tuning*
S-5	SLO-1	*Sensors considerations*	*Wafer bonding*	*MEMS Gyroscopes*	*Magnetic MEMS actuators*	*Properties of fluid*
	SLO-2	*Actuator considerations*	*Lithographie, Galvanoformung, Abformung (LIGA) Process*	*Shear modepiezo actuators*	*Bidirectional Microactuators*	*Fluid actuation methods*
S-6	SLO-1	*Mechanical MEMS*	*MEMS Integration*	*Gripping piezo actuators*	*RF based communication systems*	*Dilectrophoresis, Electrothermal flow*
	SLO-2	*Thermal MEMS*	*Packaging considerations*	*Strain Measurement*	*RF MEMS*	*thermo capillary effect*
S-7	SLO-1	*Micro-Opto-Electro-Mechanical Systems (MOEMS)*	*Basic Modeling elements: Mechanical*	*Thermal sensors and actuators*	*MEMS inductor*	*Micropumps: design consideration*
	SLO-2	*Magnetic MEMS, Radio-Frequency MEMS*	*Basic Modeling elements: Electrical systems*	*Thermal basics*	*MEMS Varactors*	*Lab-on-chip*
S-8	SLO-1	*Microfluidic systems*	*Basic Modeling elements: Fluid systems*	*Thermocouples*	*MEMS Tuner/filter*	*IC technology*
	SLO-2	*Bio-Chemo devices*	*Basic Modeling elements: Thermal systems*	*Thermoresistors*	*MEMS Resonators*	*MEMS Fabrication versus IC fabrication*
S-9	SLO-1	*MEMS Architectures*	*Translational pure mechanical systems*	*Actuators based on thermal expansion*	*MEMS Switches*	*IntegratingIC and MEMS*
	SLO-2	*NEMS Architectures*	*Rotational pure mechanical systems*	*Applications of thermal actuators*	*MEMS Phase shifter*	*Future prospects*

Pre-requisite Courses		Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Nanotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Familiarize with the concept of research ethics*
CLR-2 :	*Understand the concept of academic plagiarism*
CLR-3 :	*Understand the concept of Good, Bad science and pseudoscience*
CLR-4 :	*Gain knowledge on research methodology*
CLR-5 :	*Learn the process of scientific writing*
CLR-6 :	*Understand the principles of research Design*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Apply the scientific concepts of ethics and plagiarism*	2	80	80	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Acquire the knowledge of global and national research ethics*	2	80	75	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Ability to appreciate the importance of honesty and integrity in academic life*	2	80	80	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Apply scientific research methodology for real life problems*	2	75	70	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Utilize the method of scientific writing*	2	75	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Utilize the methods of data analysis in various applications*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction – ethics*	*Research and ethics*	*Good science vs. Bad science*	*Research design*	*Scientific Writing*
	SLO-2	*Scientific ethics*	*Scientific misconduct*	*Pseudoscience*	*Design of the apparatus*	*Authenticity, accuracy*
S-2	SLO-1	*Code of ethics*	*Forms of misconduct*	*Ways of identification*	*Design issues and remedies*	*Originality of the work*
	SLO-2	*Ethics for Engineering*	*Cheating*	*Curiosity and research*	*Design methodology*	*Title preparation*
S-3	SLO-1	*Standards of ethical conduct*	*Plagiarism*	*Empiricism*	*Experimentation – sampling*	*List of authors and addresses*
	SLO-2	*Ethical conduct-expectations and outcome*	*Recognizing plagiarism*	*Rationalism*	*Experimentation –measurements*	*Abstract writing*
S-4	SLO-1	*National research ethics*	*Self-plagiarism*	*Intuition, authority*	*Replication of the data*	*introduction writing*
	SLO-2	*Global research ethics*	*Ghostwriting and detection*	*Literature review*	*Data analysis*	*Description of methods*
S-5	SLO-1	*Intellectual property rights*	*Honor code system*	*Elementary scientific methods*	*Error identification*	*Description of methodology*
	SLO-2	*Fundamental IP laws*	*academic dishonesty*	*Observations and observational bias*	*Error in measurement*	*Measurements*
S-6	SLO-1	*Patent and copy rights*	*Prejudice*	*Problem identification*	*Classification of errors*	*Description and types of measurements*
	SLO-2	*Authorship and credit*	*Intuition*	*Basic assumptions*	*Errors analysis*	*Analysis of results*
S-7	SLO-1	*Conflict of interest*	*Observation bias*	*Hypothesis*	*Interpretation of the data*	*Explanation of results*
	SLO-2	*Error and negligence*	*Self-misunderstanding*	*Formulation of an hypothesis*	*Test of the hypothesis*	*Result and analysis*
S-8	SLO-1	*Case studies – cloning scandal, miracle drug thalidomide*	*Egoism*	*Hypothesis driven research design*	*Mathematical modeling*	*Discussion and acknowledgement*
	SLO-2	*Case studies –, miracle drug thalidomide*	*Some plagiarism cases in India*	*Verification of Hypothesis*	*Types of mathematical modeling*	*Conflict of interest declaration*
S-9	SLO-1	*Jan HendrikSchön case*	*Recent Plagiarism cases (abroad)*	*Identification of experimental techniques*	*Numerical computation*	*References, paper/poster presentation*
	SLO-2	*The Baltimore affair*	*Consequence of Plagiarism*	*Implementation of the experimental techniques*	*Result presentation*	*Electronic publication*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction: Fundamentals of kinetic theory*	*Micro and nanofluids – An Introduction*	*Introduction to Microscale Viscous Flow*	*Introduction - concepts microfluidic devices*	*Introduction to Electro chemistry*
	SLO-2	*Fundamentals of molecular models*	*Basic concepts in microfluidics & Nanoscale fluidics*	*Structure of flow in a pipe or channel*	*Microfluidic Technology*	*Electrical double layer*
S-2	SLO-1	*Kinetic theory of micro and macroscopic properties*	*Governing equations*	*Posiseuille's equation*	*Fabrication Of A Simple Microfluidic Chip*	*Electro-chemical potential*
	SLO-2	*Molecular models of micro and macroscopic properties*	*Applications- Preparatory concepts*	*Posiseuille flow in a pipe*	*Advantages of microfluidic devices*	*Chemical potential-acid and base*
S-3	SLO-1	*Binary collisions*	*Laws of fluid flows determination of transport properties*	*Velocity in slip flow of gases*	*Fluidic transport mechanisms In Microfluidic Devices*	*Electrolyte & electrical conductivity*
	SLO-2	*Distribution functions*	*Classification of fluid flow*	*Velocity in slip flow of liquids*	*Pressure-driven and electro-kinetically driven flows in Devices*	*Semi-permeable membrane*
S-4	SLO-1	*Boltzmann equation*	*Continuum approximation*	*Theory of flow in a thin film under gravity*	*Scaling of materials*	*Micro and nanofluidics devices*
	SLO-2	*Maxwellian distribution functions*	*Limitations and drawbacks*	*Two and three dimensional approach*	*Silicon materials for the manufacture*	*Applications in different fields*
S-5	SLO-1	*Wall slip effects*	*Kinematics of Microscale Liquid Flow*	*Derivation - thin film under gravity*	*Glass materials for the manufacture*	*Fabrication and design of microfluid device*
	SLO-2	*Accommodation coefficients*	*Derivation of Kinematics of Microscale Liquid Flow*	*Properties of thin film equation*	*Polymers materials for the manufacture*	*Testing of microfluid device*
S-6	SLO-1	*Flow and heat transfer analysis of microscale*	*Liquid flow along surface*	*Developing suction and laminar flows*	*Fluidic structures*	*DNA transport*
	SLO-2	*Couette flows*	*Effect of body forces in liquid flow*	*Flow control*	*Manufacturing a fluidic structure*	*Development of artificial kidney*
S-7	SLO-1	*Pressure driven gas micro- flows*	*Navier- Stokes equation*	*Surface tension driven flow*	*Stacking sequence*	*Electrochemical sensing*
	SLO-2	*Micro flows with wall slip effects*	*Equation's properties*	*And its limitations*	*Stacking - fabrication methods*	*Electrochemical Micro/Nao fluidic devices*
S-8	SLO-1	*Concept of Heat transfer in micro-Poiseuille flows*	*Theory of Two-dimensional Navier- Stokes equation*	*Sedimentation of a solid particle*	*Surface modifications*	*Receptor and Transducer based classification of biosensors*

	SLO-2	*Expression for Poiseuille flows*	*Two-dimensional Navier- Stokes equation in terms of Reynolds Equation*	*Transportation of a solid particle*	*Different techniques involved in Surface modifications*	*Types of Biotransducers*
S-9	SLO-1	*Mechanism of micro flows under compression*	*Navier- Stokes equation for Steady and compressible flow*	*Simple model for blood flow*	*Spotting mechanisms*	*Nanopores and nanopore membrane for biochemical sensing*
	SLO-2	*Compressibility and its effects*	*Steady and incompressible flow Navier-Stokes equation*	*Non-Newtonian properties of blood*	*Detection mechanisms*	*Single Molecule sensing devices*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Review the basic principles and design of photovoltaic cell technology*
CLR-2 :	*Understand the key properties of semiconductors films used in photovoltaic technology*
CLR-3 :	*Review the basic photovoltaic device structure and design*
CLR-4 :	*Develop an understanding of different thin film photovoltaic device technologies and their design*
CLR-5 :	*Gain exposure to the various tools and techniques used in thin film photovoltaics*
CLR-6 :	*Acquire knowledge on advanced concepts explored in thin film photovoltaics*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Differentiate between different types of photovoltaic technologies*	2	80	75	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Interpret important properties of semiconductors relevant to thin film photovoltaics*	2	80	70	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Apply different photovoltaic device design concepts for different applications*	2	75	70	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Appreciate advancement of different types of thin film solar cells*	2	80	75	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Appreciate the advanced concepts and explorations in thin film photovoltaics*	2	80	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Perform thin film photovoltaic device fabrication, testing and calculations*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basics and basic components of PV systems*	*Semiconductor thin films-Optical absorption*	*Different generations of PV*	*Thin film deposition*	*Device architectures*
	SLO-2	*Mechanism of PV*	*Carrier photo generation*	*Thin film solar cells*	*Various techniques*	*Flexible substrates, transparent devices.*
S-2	SLO-1	*Sun as a source of energy*	*Band gap*	*Silicon solar cells*	*Evaporation techniques*	*Multi-junctions*
	SLO-2	*Solar spectrum , air mass*	*Direct Vs Indirect bandgaps*	*Thin film Silicon solar cells*	*Sputtering techniques*	*Tandem solar cells*
S-3	SLO-1	*Solar Cell parameters*	*Carriers*	*Amorphous Silicon based solar cells*	*MBE*	*Bandgap profile optimization*
	SLO-2	*Device testing*	*Carriers transport*	*a-Si and a-Si: H solar cells*	*Laser based techniques*	*Solar spectrum matching*
S-4	SLO-1	*Efficiency measurements*	*Minority carrier transport properties*	*II–VI thin film PV*	*CVD, PECVD*	*Light trapping*
	SLO-2	*FF, V_{OC}, J_{SC} etc for ideal cells*	*Carrier recombination–lifetime and defects*	*Chalcopyrite photovoltaics*	*Spray and Non vacuum routes*	*Antireflection coatings*
S-5	SLO-1	*Non-idealities, Loss mechanisms*	*Band to band and Shockley–Read–hall recombination*	*CdTe/CdS thin film solar cells*	*Techniques to measure thickness*	*Self-cleaning coatings*
	SLO-2	*Optical & electrical loss mechanisms*	*High injection effects*	*Superstrate structure*	*Optical and electronic properties of thin films*	*Plasmonic enhancements*
S-6	SLO-1	*Basics of solar cell device design*	*Surface and interface recombination*	*CuInGaSe2/CdS thin film cell technologies*	*Fabrication process of thin film solar cells*	*Luminescence concentrators*
	SLO-2	*Minimization of losses*	*Implications on device performance*	*Earth abundant alternatives*	*Specific techniques used*	*Up conversion*
S-7	SLO-1	*Lateral design*	*PN homojunctions*	*Thin film solar cells based on Cu2ZnSnS4*	*Established parameters in thin film cell technologies*	*New concepts*
	SLO-2	*Vertical design*	*Carrier transport under broad spectrum illumination*	*other materials*	*Basic characterization tools*	*quantum dots, & wires,*
S-8	SLO-1	*Optical versus electrical tradeoffs*	*Photocurrent and Spectral response*	*3rd generation thin film solar cells: DSSCs*	*Advanced characterization methods for device quality & defects*	*Intermediate band solar cells*

	SLO-2	*Optimization*	*Ideal diodes*	*QDSSCs, heterojunctions*	*Study of interfaces, recombination etc*	*Multiple exciton generation, hot carrier solar cells*
S-9	SLO-1	*Examples of semiconductors in PV*	*Real p-n diodes*	*3rd generation thin film solar cells: organic PV*	*Basics of device modelling*	*Commercial status*
	SLO-2	*Device types in PV*	*Temperature effects*	*Hybrid, perovskite solar cells etc.*	*Simulation softwares*	*Hopes and challenges for thin film PV*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Knowledge and Scientific Understanding of Nature*	*National Nanotechnology Initiative*	*Nanotechnology, Education, and the Fear of Nanobots*	*Societal Implications of Nanotechnology (*	*Public Perceptions of Nanotechnology*
	SLO-2	*Industrial Manufacturing, Materials and Products*	*The Age of Transitions*	*Mathematical Challenges in Nanoscience and Nanotechnology*	*Socio-economic Research on Nanoscale Science and Technology: A European Overview and Illustration*	*Public Awareness of Nanotechnology*
S-2	SLO-1	*Medicine and the Human Body*	*Technological Implications of Nanotechnology: Why the Future Needs Us*	*Implications of Nanotechnology for the Workforce*	*Nanotechnology and Unintended Consequences*	*Public interaction research*
	SLO-2	*Sustainability: Agriculture, Water, Energy, Materials, and Clean Environment*	*Don't Count Society Out - A Response to Bill Joy*	*Societal Impacts of Nanotechnology in Education and Medicine*	*A Cultural Ecology of Nanotechnology*	*Nanotechnological risks*
S-3	SLO-1	*Space Exploration*	*National Needs Drivers for Nanotechnology*	*Technological and Educational Implications of Nanotechnology: Infrastructural and Educational Needs*	*Envisioning and Communicating Nanotechnology to the Public*	*Assessment of Nanotechnological risks*
	SLO-2	*National Security*	*Nanotechnology and Societal Transformation*	*Dynamics of the Emerging Field of Nanoscience*	*Vision, innovation, and policy*	*Importance of Risk communication*
S-4	SLO-1	*Moving into the Market*	*Focus on Economic and Political Implications of Potential Technology*	*Focus on Medical, Environmental, Space Exploration and National Security Implications*	*Challenges for government and universities*	*Problems in Risk communication*
	SLO-2	*The Interactive Process of Innovation and Diffusion*	*Impact of Nanotechnology on the Chemical and Automotive Industries*	*Challenges and Vision for Nanoscience and Nanotechnology in Medicine: Cancer as a Model*	*Environmental Impacts of Nanomaterials*	*Nanotechnology's social impacts*
S-5	SLO-1	*Unintended and Second-order Consequences*	*Information Technology Based on a Mature Nanotechnology: Some Societal Implications*	*Nanotechnology in Medicine*	*Nanoparticle Toxicity and risk*	*A preliminary analysis of nanotechnology in the media*
	SLO-2	*Ethical Issues and Public Involvement in Decision Making*	*Societal Implications of Scaling to Nanoelectronics*	*Lifecycle/Sustainability Implications of Nanotechnology*	*Social impacts of nano biotechnology issues*	*Nanoscience and engineering - Public engagement*

S-6	SLO-1	*Education of Nanoscientists, Nanotechnologists, and Nanofabrication Technicians*	*Future Implications of Nanoscale Science and Technology: Wired Humans, Quantum Legos, and an Ocean of Information*	*Implications of Nanotechnology for Space Exploration*	*Problems of governance of nanotechnology*	*Nanophobia – Fear of Nanotechnology*
	SLO-2	*Education of Social Scientists*	*Implications of Nanotechnology in the Pharmaceutics and Medical Fields*	*Security Aspects of Nanotechnology*	*Negotiations over quality of life in the nanotechnology initiative. Governance*	*Public Engagement with nanotechnology*
S-7	SLO-1	*Social Science Research Approaches and Methodologies*	*We've Only Just Begun*	*Focus on Social, Ethical, Legal, and Cultural Implications*	*Technological revolutions and the limits of ethics in an age of commercialization*	*Nanotechnology: moving beyond risk*
	SLO-2	*Institutional Infrastructure for Societal Implications Research*	*An Economist Õs Approach to Analyzing the Societal Impacts of Nanoscience and Nanotechnology*	*Social Science Research Methods for Assessing Societal Implications of Nanotechnology*	*Regulatory structures and society*	*Communication streams and nanotechnology: interpretation of a nanotechnology*
S-8	SLO-1	*Other Measures*	*The Strategic Impact of Nanotechnology on the Future of Business and Economics*	*Ethical Issues in Nanotechnology*	*Nanotechnology and social trends*	*Individual perspectives of nanotechnology*
	SLO-2	*Specific Areas for Research and Education Investment*	*Nano-Science and Society: Finding a Social Basis for Science Policy*	*Social Acceptance of Nanotechnology*	*Integrative Technology*	*The case of Cold Fusion*
S-9	SLO-1	*Recommendations to Organizations*	*Focus on Science and Education Implications*	*Social, Ethical and Legal Implications of Nanotechnology*	*Institutionalizing Multi-Disciplinary Engagement*	*The case of Recombinant DNA*
	SLO-2	*With an Eye to the Future*	*Implications of Nanoscience for Knowledge and Understanding*	*Envisioning Life on the Nano-Frontier*	*Nano revolution implications for the artist*	*Historical comparisons - for anticipating public reactions to nanotechnology*

Course Code	18NTO407T	Course Name	POLYMER ENGINEERING	Course Category	O	Open Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Nanotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Acquire basic knowledge about the structure and property of polymers*
CLR-2 :	*Impart chemistry aspects on various polymer materials*
CLR-3 :	*Acquaint with various compounding ingredients and mixing equipments*
CLR-4 :	*Understand the principles behind the elasticity of the polymers*
CLR-5 :	*Gain knowledge about reinforcements and effect of nanofillers*
CLR-6 :	*Describe rheological behavior with different modifiers*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Apply the engineering principles underlying the processing of polymer raw materials*	2	80	75	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Extend and apply the knowledge of polymers to materials science and engineering*	2	80	70	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Identify different fillers as reinforcements*	2	75	70	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Illustrate the working of moulding and extrusion techniques*	2	80	75	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Evaluate the mechanical behavior of polymers*	2	80	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Enhance knowledge about the various composite materials*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basics and chemistry of polymeric Materials*	*Mechanical behavior of Polymers*	*Polymer Viscoelasticity and Rheology*	*Reinforced Polymers and Composites*	*Elements of Design*
	SLO-2	*Historical developments in polymeric materials*	*Deformation*	*Definition of elastomers*	*Reinforced plastics*	*Engineering thermoplastics*
S-2	SLO-1	*Monomer & functionality*	*Fracture in polymers*	*Requirements of polymer to be elastomer*	*Nanofillers and reinforcements*	*Thermosets and composites*
	SLO-2	*Oligomer*	*Crack growth*	*Nature of viscoelasticity*	*Effect of reinforcements like calcium carbonate, dolomite, silica glass*	*Compression moulds : positive, semi-positive*
S-3	SLO-1	*Polymer structure*	*Tensile strength,*	*Definition of elastomers*	*Fibrous reinforcements (inorganic and organic)*	*Flash mould with horizontal and vertical flash*
	SLO-2	*Methods of synthesis*	*Flexural strength*	*Classifications of elastomers*	*Glass fiber and boron fiber*	*Injection moulds : Two plate and three plates types*
S-4	SLO-1	*Addition polymerization*	*Impact resistance*	*Stress relaxation*	*Carbon fiber and aramide fibers*	*Joining and fastening*
	SLO-2	*Condensation polymerization*	*Percentage elongation*	*Relaxation and retardation times*	*Compression moulding*	*Post extrusion techniques*
S-5	SLO-1	*Co- polymers*	*Griffin theory*	*The time - temperature superposition principle*	*Classification and characteristics of composite materials*	*Metallization*
	SLO-2	*Cross linked polymers*	*Tear test*	*Dynamic properties*	*Fibrous composite materials*	*electroplating*
S-6	SLO-1	*Crosslinking plasticizers and fillers*	*Fatigue and wear*	*Zener model*	*Laminated composite materials*	*Stamping*
	SLO-2	*Crystallinity*	*Hardness*	*Polymer melt viscosity*	*Particulate composite materials*	*Welding and bonding*
S-7	SLO-1	*Glass transition temperature*	*Compressive strength*	*Plasticizers*	*Combinations of composite materials*	*printing and painting on plastics*
	SLO-2	*Degree of polymerization*	*Time dependent properties*	*Lubricants*	*Strength of composites*	*Cross-linking of thermoplastics materials*
S-8	SLO-1	*Classification of polymers*	*Creep*	*Polymer Rheology*	*Failure modes of long, fibre composites*	*Cellular plastics*
	SLO-2	*Molecular weight*	*Effect of weathering*	*Rheological concepts of polymer solutions and melts*	*Axial tensile failure*	*Compound development*
S-9	SLO-1	Molecular weight distribution.	Stress-strain behavior of polymers	Degradation plasticization	Transverse tensile failure, shear failure	Principles of mixing
	SLO-2	Determination of number and average molecular weight	Mechanical behavior of biomedical polymers	Various rheology modifiers	Applications of fiber reinforced polymer composites	Rubbers, designing for strength

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand various nanotechnology techniques and materials from the point of view of the industry*
CLR-2 :	*Understand the practical and business aspects of nanotechnology*
CLR-3 :	*Understand the concept of self-assembly of carbon nanostructures and various other materials and their applications*
CLR-4 :	*Gain knowledge on material in the nanoscale which can be use in Electronics, Medical, Textiles Industry*
CLR-5 :	*Acquire knowledge on physical properties of nanostructured materials and their size and dimensionality dependence*
CLR-6 :	*Acquire knowledge on the measurement techniques at the nanoscale*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Elucidate on advantages of nanotechnology based applications in each industry*	2	80	75	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Provide instances of contemporary industrial applications of nanotechnology*	2	80	70	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Provide an overview of future technological advancements and increasing role of nanotechnology in each industry*	2	75	70	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Apply the techniques for fabrication of small-scale devices such as micro/nano electromechanical systems etc.*	2	80	75	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Utilize the knowledge on nanomaterial to open a startup company*	2	80	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Apply the techniques for fabrication of nanofiber on advance textiles Industry*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Nano electrical*	*Nanoparticles in bone substitutes*	*Background of TiO_2 as a semiconductor photocatalyst*	*Applications of nanotechnology in the agriculture*	*Nanotechnology and Nanofibers*
	SLO-2	*Nano electronic devices and its advantages*	*Nanoparticles in dentistry*	*Photocatalytic mechanism and general pathway*	*Agriculture chemicals*	*Nanofibre production –electrospinning*
S-2	SLO-1	*Data storage*	*Tissue engineering*	*Photocatalytic kinetics*	*Nanomaterials in plant protection*	*Basic to Electrospinning: Solution surface tension, Polymer solubility, viscosity*
	SLO-2	*Memory devices*	*Regenerative medicine*	*TiO_2nanoparticles for water purification*	*Diagnosis and control of plant diseases*	*Electrospinning parameters: Controlling morphologies of nanofibers*
S-3	SLO-1	*Micromechanical systems*	*Tissue engineering and nanotechnology*	*Photocatalytic degradation of specific waterborne pollutants*	*Potential of nano-fertilizers*	*Electrospun Polycrylonitrile Nanofibers*
	SLO-2	*Nanoelectromechanical systems*	*Incorporated scaffolds for tissue engineering*	*Nanomaterials in water treatment*	*Nano-fertilizers: Nutritional value and health*	*ElectospunTiC/C composite for energy related application*
S-4	SLO-1	*Lasers*	*Nanorobotics in surgery*	*Origin of arsenic in groundwater, Health impacts of arsenic*	*Applications of nanotechnology in food industry*	*Light-emitting polymer nanofiber*
	SLO-2	*Use of lasers in lighting and displays*	*Role of nanoparticles in drug delivery*	*Nanoparticles for treatment of arsenic*	*Protein nanostructures*	*Polymer nanofiber field-effect transistors*
S-5	SLO-1	*Rechargeable batteries*	*Nanoparticles in targeted drug delivery*	*Mechanism of treatment methods of arsenic-contaminated water*	*Engineered nanoparticles in food*	*Multifunctional polymer nanocomposites*
	SLO-2	*Nanostructured electrodes*	*Metal oxide nanocarriers for drug delivery*	*Treatment of arsenic using nanoparticles other than TiO_2*	*Silica (SiO_2) and silicates nanoparticles in food*	*Electrospun carbon nanofiber: electrode material*
S-6	SLO-1	*Basic concepts of fuel cells*	*Silica-based nano drug delivery*	*CNTs in water treatment technology*	*Nanomaterials in active packaging for food preservation*	*Nano finishing in textiles: UV resistant, antibacterial*
	SLO-2	*Different types of fuel cells*	*Polymer based nanomaterials for drug delivery*	*Functionalized graphene for removal of contaminations and water treatment*	*Barrier nanomaterials for food packaging*	*Nano finishing in textiles: hydrophilic, self-cleaning*
S-7	SLO-1	*Photovoltaic cells characterization*	*Cancer diagnostics: nanotechnology*	*Gas-sensor: Techniques used for gas-sensor*	*Nano-enabled indicators of food quality and safety*	*Protective textile against electromagnetic radiation*

	SLO-2	*Nanomaterials and different types of photovoltaic cells*	*Cancer therapy: nanotechnology*	*Conduction mechanism in semiconducting sensing films*	*Challenges of using nanotechnology in agriculture and food sectors*	*Nanotechnology: Self-Cleaning textile*
S-8	SLO-1	*Electric double layer capacitors*	*Nano-sensor in cancer*	*Metal-oxide based gas-sensor devices*	*Nanomaterials in active packaging for food preservation*	*Safety evaluation of nanomaterials in cosmetic products*
	SLO-2	*Capacitance versus pore size*	*Nanoparticle probes and molecular imaging in Cancer*	*Classification of semiconductor sensors*	*Principles of involved nano-enabled sensing*	*Nanomaterial in cosmetic: determination of physicochemical properties*
S-9	SLO-1	*Characterization of nanoparticle coatings*	*Nanomedicine-based use of siRNA in cancer*	*Challenges and opportunities in solid state sensors*	*Nanocomposite with antimicrobial properties*	*Cosmetic formulation: TiO_2 and ZnO Nanoparticles*
	SLO-2	*Nanoparticle coatings:Electrical and electronic applications and nanoparticle coatings for electrical products*	*Magnetic Nanoparticles and cancer*	*Small dimensional toxic gas sensor for air-quality monitoring*	*Nanotechnology for intelligent packaging as food freshness and safety monitoring solution*	*Nanotechnology in shampoos, hair-conditioners: Hair follicle targeting*

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18ASC301J	Course Name	COMPRESSIBLE AERODYNAMICS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18ASC202J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Gas tables		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Identify the different wave types and wave propagation*
CLR-2 :	*Evaluate the change in properties across shock waves and optimize the supersonic vehicle design*
CLR-3 :	*Evaluate the change in properties across expansion waves*
CLR-4 :	*Evaluate and optimize the nozzle flow characteristics.*
CLR-5 :	*Design and Evaluate the duct flow with heat transfer and frictional effect.*
CLR-6 :	*Design and optimize the supersonic nozzle*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the properties of different waves in supersonic flow*	*1*	*90*	*80*	*H*	*M*	*M*	*M*	*M*	-	-	-	-	-	-	*M*	-	*H*	-
CLO-2 :	*Analyze the properties of shock wave*	*2*	*80*	*75*	*H*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	*H*	-	*H*	-
CLO-3 :	*Analyze the properties of expansion wave*	*3*	*80*	*75*	*H*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	*H*	-	*H*	-
CLO-4 :	*Analyze the flow through nozzle*	*3*	*70*	*60*	*H*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	*H*	-	*H*	-
CLO-5 :	*Analyze the heat transfer and frictional effect in flow*	*3*	*80*	*75*	*H*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	*H*	-	*H*	-
CLO-6 :	*Analyze the compressibility effects and design the supersonic nozzle*	*2*	*70*	*60*	*H*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	*H*	-	*H*	-

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to compressible flow*	*Normal shock wave properties – Mach number relation*	*Multiple shock system*	*Numerical problems on Nozzle flow relations*	*Fanno curve*
	SLO-2	*Basic thermodynamic concepts*	*Normal shock wave properties – density relation*	*Numerical problems on multiple shock systems*	*Numerical problems on Nozzle flow relations*	*Numerical problems on Fanno flow*
S-2	SLO-1	*Basic thermodynamic equations*	*Normal shock wave properties – pressure relation*	*The propagating shock wave*	*Numerical problems on Nozzle flow relations*	*Numerical problems on Fanno flow*
	SLO-2	*Momentum and Energy equations for compressible fluid flow*	*Normal shock wave properties – temperature relation*	*Numerical problems on propagating shock wave*	*Rayleigh flow equations – static properties*	*Numerical problems on Fanno flow*
S-3	SLO-1	*Wave propagation*	*Normal shock wave properties – entropy change*	*Governing equation of Prandtl-meyer expansion waves*	*Rayleigh flow equations – stagnation properties*	*Velocity potential equation for compressible flow*
	SLO-2	*Shock formation*	*Hugoniot equation*	*Expression of Prandtl –meyer function*	*variation of flow properties for subsonic flow*	*Small perturbation theory*
S 4-5	SLO-1 SLO-2	*Lab 1: Study of various types of Supersonic wind tunnel.*	*Lab 4: Calibration of supersonic wind tunnel*	*Lab 7: Visualization of shock wave pattern on ramp model using Schlieren flow visualization technique*	*Lab 10: Visualization of shock wave pattern on Diamond Airfoil using Schlieren flow visualization technique*	*Lab 13: Investigation of intersection of right and left running shock waves for various deflection angles using Schlieren flow visualization*
S-6	SLO-1	*types of waves*	*Numerical problems on normal shock*	*Numerical problems on expansion waves*	*variation of flow properties for supersonic flow*	*Small perturbation theory*
	SLO-2	*Speed of sound derivation*	*Numerical problems on normal shock*	*Numerical problems on expansion waves*	*Critical reference states*	*Linearized pressure coefficient*
S-7	SLO-1	*Change in entropy relation*	*Numerical problems on normal shock*	*Shock Expansion theory – flat plate*	*Rayleigh curve*	*Linearized pressure coefficient*
	SLO-2	*Numerical problems on thermodynamic concepts*	*Oblique shock properties*	*Numerical problems on shock expansion theory*	*Numerical problems on Rayleigh flow*	*Prandtl-Glauert compressibility correction*
S-8	SLO-1	*Isentropic relations*	*Θ-β-M relation and graph*	*Shock Expansion theory – Diamond airfoil*	*Numerical problems on Rayleigh flow*	*Supersonic linearized theory*
	SLO-2	*Numerical problems on isentropic relations*	*Supersonic flow over wedges and cones*	*Numerical problems on shock expansion theory*	*Numerical problems on Rayleigh flow*	*Application of Supersonic linearized theory*

S 9-10	SLO-1	Lab 2: Study of various Supersonic flow visualization techniques and its applications.	Lab 5: Mach number distribution of different area ratio C-D nozzles	Lab 8: Visualization of shock wave pattern on wedge model using Schlieren flow visualization technique	Lab 11: Investigation of supersonic flow over different aircraft/ missile models using Schlieren flow visualization technique	Lab 14: Experimental study of supersonic jet
	SLO-2					
S-11	SLO-1	Isentropic relations – stagnation state	Shock polar	Nozzle flow relations: Area – velocity	Fanno flow- equations	Numerical problems on linearized theory
	SLO-2	Numerical problems on isentropic relations	Shock reflections	Supersonic nozzle and diffuser	Fanno flow- equations	Numerical problems on linearized theory
S-12	SLO-1	Isentropic relations – critical state	Shock interactions	Nozzle flow relations: Area – Mach number	variation of flow properties with duct length	Introduction to Method of characteristics
	SLO-2	Numerical problems on isentropic relations	Numerical problems on oblique shock	Nozzle flow relations: Maximum mass flow rate	variation of flow properties for subsonic flow	Method of characteristics
S-13	SLO-1	Characteristic Mach number	Numerical problems on oblique shock	Variation of Pressure and Mach number along the C-D nozzle	variation of flow properties for supersonic flow	Application of Method of characteristics
	SLO-2	Numerical problems on isentropic relations	Numerical problems on oblique shock reflections	Under expansion and over expansion nozzle	Critical reference states	Application of Method of characteristics
S 14-15	SLO-1	Lab 3: Study of SRM supersonic wind tunnel and its instrumentations.	Lab 6: Investigation of starting normal shock wave movement inside Convergent Divergent Nozzle.	Lab 9: Verification of "Three dimensional relieving effect".	Lab 12: Investigation of detached shock wave pattern using Schlieren flow visualization technique	Lab 15: Noise measurement in supersonic jet
	SLO-2

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the art of application of aerodynamics knowledge into an aircraft*
CLR-2 :	*Know the performance of different powerplants at different flight conditions*
CLR-3 :	*Know the various performance parameters of an airplane*
CLR-4 :	*Learn optimizing different performance parameters for maximizing range, endurance and fuel efficiency*
CLR-5 :	*Learn role of performance parameters in various maneuvers of the airplane*
CLR-6 :	*Learn experimental determination of various performance parameters of a real airplane by flight testing*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Estimate and optimize drag polar of an aircraft*	3	85	90	H	M	M	H	L	-	H	-	-	-	-	H	H	H	-
CLO-2 :	*Select optimal powerplant for the required airplane with the desired performance*	3	80	85	M	M	M	M	L	-	H	-	M	-	-	H	H	H	-
CLO-3 :	*Indicate the different flight techniques for optimized steady and accelerated flight performance*	3	75	80	M	H	M	H	M	-	H	-	-	-	-	H	H	H	-
CLO-4 :	*Perform basic calibration of flight instrument data*	3	50	60	M	M	M	M	L	-	L	-	M	-	-	H	H	H	M
CLO-5 :	*Perform conceptual design of any type of airplane*	3	70	70	M	M	H	H	M	M	H	M	H	-	M	H	H	H	-
CLO-6 :	*Determine the drag polar of a real airplane with real flight testing*	3	00	80	M	H	M	M	M	-	-	-	M	M	-	H	-	H	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Forces and moments acting on a vehicle in flight*	*Thrust and propulsive efficiency of air breathing engine*	*Equation of motion for steady level flight*	*Range -Definition and conditions for maximum range for jet driven aircraft*	*Flight instruments- Air Data systems*
	SLO-2	*Coordinate systems*	*Thrust and propulsive efficiency of rocket engine*	*Conditions for maximum velocity in steady level flight*	*Range -Definition and conditions for maximum range for propeller driven aircraft*	*Altitude and speed definitions*
S-2	SLO-1	*Equations of motion of a rigid flight vehicle*	*Trade-off between thrust and propulsive efficiency*	*Conditions for minimum in steady level flight*	*Endurance – Definition and conditions for maximum endurance for jet driven airplane*	*Air speed indicator- construction and working*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving problems*	*Endurance – Definition and conditions for maximum endurance for propeller driven airplane*	*Air speed indicator- speed calibration*
S-3	SLO-1	*International Standard Atmosphere and various layers in ISA*	*TSFC and BSFC*	*Solving problems*	*Solving problems*	*Solving air speed calibration problems*
	SLO-2	*Derivation of hydrostatic equation*	*Variation of Thrust/Power and SFC with respect to velocity and altitude for reciprocating engine*	*Power required vs velocity – Graphical approach and analytical approach*	*Solving problems*	*Solving air speed calibration problems*
S-4	SLO-1	*Derivation of Pressure, Temperature and density in troposphere*	*The propeller – variation of propulsive efficiency with advance ratio*	*Power available and maximum velocity for propeller driven and jet driven aircraft*	*Accelerated flight- Level turn- Equations of motion*	*Altimeter- construction and working*
	SLO-2	*Solving Problems in Gradient layer*	*Constant speed propellers*	*Minimum velocity- Stall and high lift devices*	*Level turn- conditions for turn radius and turn rate*	*Altimeter- altitude corrections*
S-5	SLO-1	*Derivation of Pressure, Temperature and density in Stratosphere*	*Variation of Thrust/Power and SFC with respect to velocity and altitude for turbojet engine*	*Aerodynamic relations associated with maximum efficiency conditions*	*Level turn- constraints on load factor, Constraints on velocity,*	*Solving problems- altimeter*
	SLO-2	*Solving Problems in Iso thermal layer*	*Solving Problems*	*Solving problems*	*Level turn- calculation of minimum turn radius and minimum turn rate.*	*Rate of climb indicator – construction and working*

S-6	SLO-1	*Various types of drags acting on an airplane*	*Variation of Thrust/Power and SFC with respect to velocity and altitude for turbofan engine*	*Rate of climb- equation of motion*	*Solving problems*	*Mach meter- construction and working*
	SLO-2	*Methods to minimize various drags*	*Solving Problems*	*Rate of climb- Graphical approach and hodograph*	*Solving problems*	*Angle of attack indicator- construction and working*
S-7	SLO-1	*Interference Drag and methods to minimize it Drag polar of vehicles in subsonic speed*	*Variation of Thrust/Power and SFC with respect to velocity and altitude for turboprop engine*	*Analytical approach for maximum climb angle*	*Pull-up and pull-down maneuvers*	*Flight determination of drag polar-introduction*
	SLO-2	*Transonic Drag Divergence*	*Solving Problems*	*Analytical approach for maximum rate of climb*	*V-n diagram and its significance*	*Flight determination of drag polar- speed power method*
S-8	SLO-1	*Wave drag and methods to minimize it*	*Thrust available characteristics of different engines*	*Absolute ceiling and service ceiling*	*Takeoff performance – ground roll*	*Flight determination of drag polar- incremental drag method*
	SLO-2	*Solving Problems*	*Selection of Powerplant*	*Solving problems*	*Estimation of takeoff distance*	*Flight determination of drag polar- prop feathered sinks method*
S-9	SLO-1	*Drag polar of vehicles in supersonic speeds*	*Thrust required vs velocity- Graphical approach*	*Gliding flight- Equation of motion, glide hodograph*	*Landing performance – Estimation of landing distance*	*Flight determination of drag polar- incremental power method*
	SLO-2	*Drag polar of vehicles in hypersonic speeds*	*Thrust required vs velocity- Analytical approach*	*Minimum sink rate and minimum glide path angle conditions*	*Methods to minimise landing distance*	*Solving problems*

Duration (hour)		15	15	15	15	15
S-1	SLO-1 SLO-2	*History and evolution of rockets*	*Introduction of chemical propellant*	*Introduction of Solid Propellant Rocket*	*Introduction of Liquid Propellant Rocket*	*Hybrid propellant rocket*
S-2	SLO-1	*Rocket working principle*	*Molecular mass*	*Classifications of Solid Propellant Rocket*	*Classifications of Liquid Propellant Rocket*	*Electrical rockets*
	SLO-2	*Classification of rockets*	*Specific Heat*	*Hardware components and its functions*	*Hardware components and its functions*	*Electro-thermal propulsion system*
S-3	SLO-1	*Rocket equation*	*specific heat ratio*	*Mechanism of burning*	*Propellant feed systems*	*Arc-jet thruster*
	SLO-2	*Numerical Problems on Rocket equation*	*Stoichiometric ratio*		*Pressure feed system*	*Resistojet thruster*
S 4-5	SLO-1 SLO-2	*Lab 1: Study of Piston Engines*	*Lab 4: Determination of convective heat transfer coefficient over a flat plate by forced convection*	*Lab 7: Performance test on a propeller*	*Lab 10: Burning rate measurement of solid propellant by using Window bomb setup*	*Lab 13: Hybrid Rocket motor fuel grain preparation*
S-6	SLO-1	*Mass ratio of rocket*	*mixture ratio and equivalence ratio*	*Ignition system*	*Turbo pump feed system*	*Electro-static propulsion system*
	SLO-2	*NumericalProblems on rocket parameters*	*Energy release during combustion*	*Igniter types*	*Numerical Problemson feed system*	*Electro-magnetic propulsion system*
S-7	SLO-1	*Rocket Nozzles and its Classifications*	*Heat of formation*	*Propellant grain*	*Injector*	*Ion thruster*
	SLO-2	*Nozzle Performance*	*Heat of combustion*	*configuration and applications of propellant grain*	*Types of injector*	*Hall Effect Thruster*
S-8	SLO-1	*Nozzle area ratio- Mass flow rate*	*Criterion for choice of propellant*	*Burn rate*	*NumericalProblems on injector*	*Magneto plasma dynamic thruster*
	SLO-2	*NumericalProblems on nozzle*	*Solid propellants*	*Factors influencing burn rates*		*Pulsed Plasma Thruster*
S 9-10	SLO-1 SLO-2	*Lab 2: Study of jet engines*	*Lab 5: Characteristic plots of a free jet through a non-circular orifice*	*Lab 8: Thrust measurement of a Ramjet engine*	*Lab 11: Thrust measurement on a prepared solid propellant*	*Lab 14: Regression rate measurement of hybrid rocket motor*
S-11	SLO-1	*Characteristic velocity and Thrust coefficient*	*Composition and processing*	*Burn rate index for stable operation*	*Thrust chamber*	*Nuclear rockets*
	SLO-2	*Numerical Problems on nozzle performance*	*Liquid propellants*	*Action time and burn time*	*Cooling of Thrust chamber*	
S-12	SLO-1	*Performance parameters and Efficiencies of rocket*	*Classifications of liquid propellant*	*Design of Solid Propellant rocket*	*Cryogenic propulsion system*	*Solar Propulsion system*

	SLO-2	*Numerical Problems on Performance parameters and Efficiencies of rocket*	*Storability of liquid propellant*		*Special features of cryogenic systems*	
S-13	SLO-1	*Staging and Clustering of rocket*	*Numerical Problems on chemical propellant*	*Numerical Problems on Solid Propulsion system*	*Numerical Problems on Liquid Propulsion system*	*Numerical problems*
	SLO-2	*Numerical Problems on Staging and Clustering of rocket*				
S 14-15	SLO-1	*Lab 3: Determination of convective heat transfer coefficient over a flat plate by natural convection*	*Lab 6: Characteristic plots of a wall jet through a non-circular orifice*	*Lab 9: Solid Rocket motor propellant preparation*	*Lab 12: Study of Liquid propulsion system*	*Lab 15: Thrust measurement of a hybrid rocket*

Course Code	18ASC304J	Course Name	AIRCRAFT STRUCTURES	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18ASC201J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the physical meaning of symmetric bending and unsymmetrical bending*
CLR-2 :	*Know the procedure to fid the shear flow and shear center in open sections subjected to shear loads*
CLR-3 :	*Know the procedure to find the shear flow and shear center in closed sections subjected to shear loads*
CLR-4 :	*Know the procedure to find the shear flow in closed sections subjected to torque*
CLR-5 :	*Understand the buckling analysis of plates*
CLR-6 :	*Learn the experimental procedure of stress analysis in wing and fuselage*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Explain the differences between symmetrical bending and unsymmetrical bending*	2	85	75	H	H	H	H	-	H	H	H	-	-	-	M	M	M	M
CLO-2 :	*Improve the ability in solving geometrical applications of a structure*	2	85	75	H	H	H	H	-	H	H	H	-	-	-	M	M	M	M
CLO-3 :	*Gain the ability to solve the shear flow analysis and shear centre of open section beams*	2	85	75	H	H	H	H	-	H	H	H	-	-	-	M	M	M	M
CLO-4 :	*Solve the shear flow and shear center calculations in closed sections subjected to both shear loads and torsion loads.*	2	85	75	H	H	H	H	-	H	H	H	-	-	-	M	M	M	M
CLO-5 :	*Describe the buckling modes of thin plates for various end conditions*	2	85	75	H	H	H	H	H	H	H	H	-	-	-	M	M	M	M
CLO-6 :	*Describe the stress analysis in wing and fuselage*	2	85	75	H	H	H	H	H	H	H	H	-	-	-	M	M	M	M

		15	15	15	15	15
S-1	SLO-1	*Introduction to symmetrical bending*	*Introduction to thin walled beams*	*Concept of Bredt - Batho theory and assumptions for Engineers Theory of bending.*	*Introduction to thin plates and its application to aircraft structures.*	*Shear distribution for wings*
	SLO-2	*Concept of bending stresses in beams of symmetrical sections*	*Section properties of thin walled beams*	*Derivation of the relation between shear flow and the torque*	*Plate subjected to pure bending.*	*Numerical solving*
S-2	SLO-1	*Symmetrical bending, assumptions*	*Concept of shear flow and the shear centre.*	*Multi cell structure subjected to torque, shear flow determination*	*Flexural rigidity of a plate, anticlastic and synclastic surface*	*Bending moment distribution for wings*
	SLO-2	*Direct stress distribution*	*Introduction to thin walled open section beams, assumptions*	*Numerical solving*	*Plate subjected to bending and twisting*	*Numerical solving*
S-3	SLO-1	*Anticlastic bending, unsymmetrical bending, sign conventions and notation, Resolution of bending moments.*	*General stress, strain and displacement relationship for open thin-walled beams.*	*Shear flow and shear centre etermination, and shear flow distribution for a thin-walled symmetrical (three cell) closed sections subjected to torque.*	*Determination of shear strain for thin plates*	*Shear distribution for fuselage*
	SLO-2	*Derivation for bending stress expression due to bending.*	*Shear flow expression for open sections.*	*Numerical solving*	*Plates subjected to a distributed transverse load*	*Numerical solving*
S-4	SLO-1 SLO-2	*Lab 1: Determination of the position of principal axes of a Z section*	*Lab 4: Verification of principle of superposition (Cantilever beam)*	*Lab 7: Determination of shear center of closed section beam*	*Lab 10: Determination of the buckling stress of a given column*	*Lab 13: Study of free and forced vibration analysis*
S-5	SLO-1	*Position of neutral axis, calculation of section properties, Second moments of area of an inclined thin section and a semicircular section*	*Shear flow of C section*	*Shear flow and shear centre determination, and shear flow distribution for a thin-walled symmetrical (single cell) closed sections subjected to shear force*	*Plate element subjected to bending, twisting and transverse loads.*	*Bending moment distribution for fuselage*
	SLO-2	*Approximations for thin-walled sections*	*Shear flow of C section*	*Derivation of shear flow for closed section*	*Numerical solving*	*Numerical Solving*
S-6	SLO-1	*Bending of symmetric sections with symmetric loads - Numericals*	*Shear center of C section*	*Closed section single cell -shear flow determination*	*Boundary conditions for various types of edge supports*	*Shear resistant web beams.*
	SLO-2	*Numerical solving*	*Procedure of solving shear centre of c section*	*Numerical solving*	*Numerical solving*	*Numerical solving*

S-7	SLO-1	*Bending of symmetric sections with skew loads – Problems.*	*Shear flow distribution for thin walled open sections*	*Closed section two cell structure-shear flow determination*	*Combined bending and in-plane loading of a thin rectangular plate*	*Typical wing structural arrangement, wing strength requirements.*
	SLO-2	*Numerical solving*	*Shear center position for different type of thin walled open section*	*Numerical solving*	*Numerical solving*	*Numerical solving*
S-8	SLO-1 SLO-2	*Lab 2: Verification of Maxwell's reciprocal theorem(Cantilever beam)*	*Lab 5: Verification of principle of superposition (Simply supported beam)*	*Lab 8: Analysis of constant strength beam*	*Lab 11: Determination of the ratio of forces carried by two wires of different materials supported by hinged bar*	*Lab 14:Preparation of a composite laminate*
S-9	SLO-1	*Bending stress determination for symmetrical section with stringers.*	*Shear flow and shear centre determination, and shear flow distribution for thin-walled symmetrical open sections*	*Shear flow and shear centre determination, and shear flow distribution for a thin-walled symmetrical (single cell) closed sections subjected to shear force.*	*Buckling of thin plates*	*Tension (Wagner's) field beam – complete diagonal tension field beams.Derivation*
	SLO-2	*Numerical solving*	*Numerical solving*	*Numerical solving*	*Numerical solving*	*Incomplete diagonal tension field beams*
S-10	SLO-1	*Bending of unsymmetric sections with skew loads - Problems*	*Shear flow and shear centre determination, and shear flow distribution for thin-walled unsymmetrical open sections*	*Shear flow and shear centre determination, and shear flow distribution for a thin-walled symmetrical (two cell) closed sections subjected to shear force.*	*Inelastic buckling of plates*	*Typical wing structural arrangement, wing strength requirements.*
	SLO-2	*Numerical solving*	*Numerical solving*	*Numerical solving*	*Numerical solving*	*Beam theory assumptions, wing stress analysis methods.*
S-11	SLO-1	*Bending stress determination for unsymmetrical section with stringers.*	*Concept of structural idealization.*	*Shear flow and shear centre determination, and shear flow distribution for symmetrical and unsymmetrical (single cell) closed sections with stringers subjected to shear force*	*Local instability and Instability of stiffened panels*	*Shear lag concepts*
	SLO-2	*Numerical solving*	*Determination of boom areas*	*Numerical solving*	*Numerical solving*	*Basic fuselage structure, fuselage stress analysis methods.*
S-12	SLO-1 SLO-2	*Lab 3: Verification of Maxwell's reciprocal theorem(Simply supported beam)*	*Lab 6: Determination of shear center of open section beam*	*Lab 9: Determination of principal axes of a hollow shaft subjected to both bending and torsional loads*	*Lab 12:Determination of hoop stress and longitudinal stress in a thin walled pressure vessel*	*Lab 15:Design aspect of tension field beam*
S-13	SLO-1	*Bending of thin symmetric sections with symmetric loads - Problems*	*Shear flow and shear centre determination, and shear flow distribution for symmetrical open sections with stringers.*	*Shear flow and shear centre determination, and shear flow distribution for symmetrical and unsymmetrical (two cells) closed sections with stringers subjected to shear force.*	*Flexural–torsional buckling of thin-walled columns*	*shear flow distribution in the web of the tapered beam*
	SLO-2	*Numerical solving*	*Numerical solving*	*Numerical solving*	*Numerical solving*	*Calculation of direct stress due to bending in a fuselage*
S-14	SLO-1	*Bending of thin unsymmetric sections with skew loads - Problems.*	*Shear flow and shear centre determination, and shear flow distribution for a unsymmetrical open sections with stringers.*	*Shear flow and shear centre determination, and shear flow distribution for symmetrical and unsymmetrical (three cells) closed sections with stringers subjected to shear force.*	*Estimation of crippling stress using Needham's and Gerard's method.*	*shear flow distribution in the fuselage*
	SLO-2	*Numerical solving*	*Numerical solving*	*Numerical solving*	*Stiffened panel / Sheet effective width concepts*	*Principles of stiffener / web construction*
S-15	SLO-1	*Bending of thin symmetric sections with skew loads - Problems .*	*Walls effective in bending*	*Walls effective in bending*	*Inter rivet and sheet wrinkling failures.*	*Fuselage frames*
	SLO-2	*Numerical solving*	*Walls ineffective in bending*	*Walls ineffective in bending*	*Thin walled column strength, Torsional instability of thin walled columns.*	*Wing ribs*

Pre-requisite Courses	18ASC302T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Know the importance of stability and control of airplane*
CLR-2 :	*Learn the concepts of static stability and dynamic stability of airplane*
CLR-3 :	*Learn longitudinal, lateral and directional stabilities*
CLR-4 :	*Understand control fixed and control free effects*
CLR-5 :	*Learn the criteria for stability and instability*
CLR-6 :	*Learn experimental techniques to measure stability parameters of an airplane using real flight testing*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Determine the degree of stability of any airplane configuration*	5	85	90	H	M	M	H	L	-	H	-	-	-	-	H	H	H	-
CLO-2 :	*Design an airplane for the required degree of stability and maneuverability*	3	80	85	M	M	M	M	L	-	H	-	M	-	-	H	H	H	-
CLO-3 :	*Indicate the different flight techniques for safer flight*	4	75	80	M	H	M	H	M	-	H	-	-	-	-	H	H	H	-
CLO-4 :	*Perform basic calibration of control surfaces*	5	50	75	M	M	M	M	L	-	L	-	M	-	-	H	H	H	M
CLO-5 :	*Identify different instability modes in flight and suggest the correct recovery procedure*	5	80	80	M	M	H	H	M	M	H	M	H	-	M	H	H	H	-
CLO-6 :	*Determine the stability derivatives of a real airplane with real flight testing*	4	00	95	M	H	M	M	M	-	-	-	M	M	-	H	-	H	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic concepts of stability and control*	*Longitudinal control- basics*	*Dynamic stability- basics*	*Construction of stability matrix*	*Lateral- directional equations of motion*
	SLO-2	*Classification of stability- static and dynamic*	*Various factors affecting the design of control surface*	*Rigid body equation of motion for a disturbed flight- Forces*	*Decoupling of longitudinal and lateral modes*	*Spiral approximation- spiral divergence*
S-2	SLO-1	*Longitudinal static stability – basic criteria*	*Control effectiveness- elevator effectiveness*	*Rigid body equation of motion for a disturbed flight- moment*	*Significance of eigen values and eigen vectors of stability matrix*	*Directional divergence*
	SLO-2	*Wing contribution to longitudinal static stability*	*Solving problems*	*Defining equations of motion in inertial frame of reference*	*Solving problems*	*Dutch roll approximation*
S-3	SLO-1	*Tail contribution (Aft tail contribution) to longitudinal static stability*	*Elevator angle to trim*	*Euler angles*	*Solving Problems*	*Routh's criterion*
	SLO-2	*Solving problems*	*Solving problems*	*Orientation and position of the airplane*	*Longitudinal motion-stick fixed*	*Wing stall characteristics*
S-4	SLO-1	*Fuselage contribution*	*Elevator hinge moment*	*Gravitational and thrust forces*	*Second order differential equations*	*Autorotation and its recovery*
	SLO-2	*Power plant contribution*	*Stick free neutral point- definition*	*Small disturbance theory- assumptions*	*Variation of response with damping ratio*	*Spin (stalled) and its recovery*
S-5	SLO-1	*Canard configuration (Forward tail surface) contribution to longitudinal static stability*	*Relation between stick fixed and stick free neutral point*	*Small disturbance theory-linearized longitudinal rigid body equation of motion*	*Pure pitching motion*	*Aeroelastic effects- wing torsional divergence*
	SLO-2	*Stick fixed neutral point- definition*	*Aerodynamic balancing- basics*	*Small disturbance theory-linearized lateral rigid body equation of motion*	*State variable representation of the equations of motion*	*Aeroelastic effects- control reversal*
S-6	SLO-1	*Solving problems*	*Various methods of aerodynamic balancing- Set back hinge, horn balance*	*Aerodynamic force and moment representation by stability coefficient*	*Solving problems*	*Aeroelastic effects- control surface flutter*
	SLO-2	*Basic criteria for longitudinal, roll and directional stability*	*Various methods of aerodynamic balancing- Frise aileron, sealed nose balance and servo tab*	*Derivatives due to the change in forward speed*	*Longitudinal approximations*	*Stick fixed neutral point*
S-7	SLO-1	*Contribution of various components to roll stability*	*Trim tabs*	*Derivatives due to the change in pitching velocity*	*Phugoid and short period oscillations*	*Determination of stick fixed neutral point- parameters*
	SLO-2	*Dihedral effect and roll control*	*Critical conditions of stability and control*	*Derivatives due to the time rate of change of angle of attack*	*Influence of stability derivative on the longitudinal modes of motion*	*Determination of stick free neutral point- parameters*

S-8	SLO-1	*Solving problems*	*Static margin and neutral point- definition*	*Derivatives due to the rolling rate*	*Lateral motion – stick fixed*	*Determination of stick fixed maneuvering point- parameters*
	SLO-2	*Directional stability- basics*	*Stick forces and stick force gradients- definition*	*Derivatives due to the yawing rate*	*Pure rolling motion*	*Determination of stick free maneuvering point- parameters*
S-9	SLO-1	*Various requirements of rudder for directional control*	*Solving problems*	*Solving problems*	*Tutorial*	*Tutorial*
	SLO-2	*Solving problems*	*Solving problems*	*Solving problems*	*Tutorial*	*Tutorial*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn about fundamental laws that govern the orbital dynamics.*
CLR-2 :	*Understand and apply the basic equations of orbital dynamics for different conic orbits.*
CLR-3 :	*Understand the importance of Keplerian orbital elements, Kepler's equation and orbital perturbations.*
CLR-4 :	*Learn the different types of orbit transfers, basics of interplanetary trajectories.*
CLR-5 :	*Study the governing equations of rocket motion, rocket motion under different conditions.*
CLR-6 :	*Understand the fundamentals of ballistic missile trajectory and its governing equations, errors associated during launching of ballistic missiles.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Acquire knowledge of laws applied in orbital dynamics.*	2	85	75	H	M	L	L	-	-	-	-	-	-	-	L	M	M	M
CLO-2 :	*Analyze the properties of conic orbits using the governing equations of orbital mechanics.*	2	90	80	H	H	M	M	L	-	-	-	-	-	-	L	H	H	M
CLO-3 :	*Apply Kepler's equation, earth's oblateness for positioning the satellite at a desired position in orbit.*	2	80	75	H	M	M	M	-	-	-	-	-	-	-	L	M	M	H
CLO-4 :	*Accrue knowledge of different orbit transfers which can be used for many practical missions.*	2	85	75	H	H	M	M	L	-	-	-	-	-	-	L	H	M	M
CLO-5 :	*Apply the governing equations of rocket motion for different conditions.*	2	80	70	H	M	L	L	-	-	-	-	-	-	-	L	M	H	M
CLO-6 :	*Accrue understanding and importance of ballistic missile trajectory and effectively implement its equations by considering the launching errors.*	2	85	75	H	M	M	L	-	-	-	-	-	-	-	L	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Laws of Orbital Dynamics - Newton's Laws of Motion*	*Introduction to Coordinate Systems*	*Introduction to Orbital Maneuver, Impulsive Maneuvers*	*Rockets – Introduction, Tsiolkov sky rocket equation, Rocket Parameters*	*Introduction Ballistic missile and its trajectory*
	SLO-2	*Kepler's Laws, Conic Sections*	*Types of Coordinate Systems*			
S-2	SLO-1	*Structure of Upper Atmosphere*	*Time Systems - Definitions*	*Introduction to Single Impulse Maneuver – Adjustment of Heights, Simple Rotation.*	*Rocket Motion – Introduction, Two Dimensional Rocket Motion*	*Free-Flight Range Equation - Derivation*
	SLO-2	*Multi-Body / N-body problem*	*Orbital Elements - Introduction*			
S-3	SLO-1	*Two Body Problem – Introduction*	*Classical / Keplerian Orbital Elements*	*Introduction to Single Impulse Maneuver – Simple Plane Change, Combined Change of Plane and Height*	*Two Dimensional Equations of Motion of Rigid Rockets – Assumptions, Derivation*	*Flight-Path Angle Equation – Derivation*
	SLO-2	*Two Body Equation of Relative Motion – Assumptions, Significance*		*Introduction to Hohmann Transfer*		
S-4	SLO-1	*Orbit / Trajectory Equation*	*Kepler's Equation – Derivation*	*Hohmann Transfer*	*Rocket motion in Free Space*	*Numerical Problems on Free-Flight Range and Flight-Path Angle Equations*
	SLO-2					
S-5	SLO-1	*Constants of Motion – Introduction*	*Numerical Problems on Kepler's Equation*	*Bi-elliptic Transfer*	*Rocket Motion in Homogeneous Gravitational Field*	*Maximum Range Trajectory*
	SLO-2	*Conservation of Specific Angular Momentum*				*Time of Free-Flight*
S-6	SLO-1	*Conservation of Specific Mechanical Energy – Vis-Viva Equation*	*Types of Satellite Orbits*	*Numerical Problems on Hohmann and Bi-elliptic Transfers*	*Introduction to Vertical Flight Trajectory*	*Effect of Earth Rotation - Compensating for the Initial velocity*
	SLO-2					*Numerical Problems on Initial Velocity Compensation*
S-7	SLO-1	*Relating the Constants of Motion to the Geometry of the Orbit*		*One Tangent Burn Transfer - Introduction*	*Introduction to Constant Pitch Angle and Gravity Turn / Zero-Lift Trajectories*	*Effect of Earth Rotation – Compensating for the Movement of the Target*

	SLO-2	*Proof - Kepler's Second and Third Law*	*Earth's Oblateness and its Effects, Applications – Sun-Synchronous and Molniya Orbits*	*Phasing Maneuvers - Introduction*		*Numerical Problems on the Movement of the Target Compensation*
S-8	SLO-1	*Some Important Properties of Individual Conic Orbits – Circular Orbit, Elliptic Orbit*	*Introduction to Orbital Perturbations – Perturbing Forces, Perturbation Techniques – Definitions of Special and General Perturbations*	*Introduction to Inter-planetary Mission Trajectories*	*Introduction to Multi-Stage Rocket and its Types, Restricted Staging and Optimal Staging - Definitions*	*Effect of Launching Errors on Range – Introduction to Down-Range and Cross-Range Errors*
	SLO-2	*Some Important Properties of Individual Conic Orbits – Parabolic Orbit, Hyperbolic Orbit*

Course Code	18ASC307L	Course Name	AEROSPACE COMPUTATIONAL ANALYSIS LABORATORY	Course Category	C	Professional Core	L	T	P	C
							0	0	2	1

Pre-requisite Courses	18ASC201J ,18ASC301J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Gas Table		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To create 2D Design of aircraft components*
CLR-2 :	*To create 3-Dimensional Design and assembly of typical aircraft & its components.*
CLR-3 :	*To create drafting of aircraft components*
CLR-4 :	*To simulate and evaluate Structural characteristics of beams and aircraft structural components*
CLR-5 :	*To simulate and evaluate aerodynamic properties of Subsonic and supersonic flow over the objects*
CLR-6 :	*To simulate and evaluate Heat transfer and combustion process*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*To familiarize with basic aircraft components*	1	80	75	H	L	M	M	H	-	-	-	-	-	-	H	-	H	-
CLO-2 :	*To familiarize 3-Dimensional Design of typical aircraft & its components.*	3	80	75	H	H	H	H	H	-	-	-	-	-	-	H	-	H	-
CLO-3 :	*To familiarize assembly and drafting of aircraft components*	3	70	60	H	H	H	H	H	-	-	-	-	-	-	H	-	H	-
CLO-4 :	*To familiarize Structural analysis of beams and aircraft structural components*	3	70	60	H	H	H	H	H	-	-	-	-	-	-	H	-	H	-
CLO-5 :	*To familiarize Subsonic and supersonic flow analysis over the objects*	3	70	60	H	H	H	H	H	-	-	-	-	-	-	H	-	H	-
CLO-6 :	*To familiarize Heat transfer and combustion analysis*	3	70	60	H	H	H	H	H	-	-	-	-	-	-	H	-	H	-

Duration (hour)		06	06	06	06	06
S 1-2	SLO-1 / SLO-2	*Lab 1: 2D layout of aircraft wing rib and bulkhead sections*	*Lab 4: Assembly of Typical Aircraft.*	*Lab 7: 2D analysis of subsonic flow over bluff /streamlined body.*	*Lab 10: Simulation of Premixed / Non-Premixed Combustion analysis*	*Lab 13: Heat transfer analysis over a flat plate with natural / forced convection*
S 3-4	SLO-1 / SLO-2	*Lab 2: 3D model of aircraft Wing Structure*	*Lab 5: Drafting of Typical Aircraft.*	*Lab 8: 2D analysis of supersonic flow over bluff /streamlined body.*	*Lab 11: structural analysis of beams*	*Lab 14: Heat transfer analysis over a composite plate with natural / forced convection*
S 5-6	SLO-1 / SLO-2	*Lab 3: 3D model of aircraft fuselage Structure*	*Lab 6: Introduction to CFD and Grid independency study*	*Lab 9: 2D analysis of supersonic flow through C-D Nozzle.*	*Lab 12: Structural analysis of aircraft wing*	*Lab 15: Heat Transfer analysis in a Thin Plate using MATLAB code*

ACADEMIC CURRICULA

Professional Core Courses

AUTOMOBILE ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18AUC301J	Course Name	AUTOMOTIVE ENGINES	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18AUC203T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand various components of the engine and its functions*
CLR-2 :	*Understand the combustion in SI Engine*
CLR-3 :	*Gain knowledge on combustion in CI Engine*
CLR-4 :	*Understand the lubrication, cooling system and able to test the lubricants and fuels used for IC engines*
CLR-5 :	*Understand the turbo, supercharging and scavenging system in IC Engines*
CLR-6 :	*Obtain the knowledge of test engines and can conduct the performance and heat balance test on IC engines using various dynamometers*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the importance of valve timing diagram and firing order*	*1*	*90*	*85*	*H*	*M*	*H*	*M*	*M*	*L*	*M*	*L*	*L*	*L*	*L*	*M*	*M*	*L*	*M*
CLO-2 :	*Understand the combustion phenomena in SI Engines*	*1*	*90*	*85*	*H*	*L*	*L*	*M*	*L*	*L*	*H*	*L*	*L*	*L*	*L*	*H*	*H*	*L*	*M*
CLO-3 :	*Understand the combustion phenomena in CI Engines*	*1*	*90*	*85*	*H*	*L*	*L*	*M*	*L*	*L*	*H*	*L*	*L*	*L*	*L*	*H*	*H*	*L*	*M*
CLO-4 :	*Understand the lubrication and cooling system in IC Engines.*	*2*	*90*	*85*	*M*	*M*	*H*	*H*	*L*	*L*	*M*	*L*	*L*	*L*	*L*	*M*	*L*	*M*	*M*
CLO-5 :	*Understand the turbo, supercharging and scavenging system in IC Engines*	*2*	*90*	*85*	*H*	*M*	*M*	*L*	*M*	*L*	*M*	*L*	*L*	*L*	*L*	*M*	*M*	*M*	*M*
CLO-6 :	*Knowledge about the recent development in the area of engines*	*2*	*90*	*85*	*H*	*L*	*H*	*L*	*H*	*L*	*H*	*L*	*M*	*L*	*L*	*H*	*M*	*M*	*M*

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to engine components*	*Combustion in SI engines*	*Combustion in CI Engines*	*Introduction to Lubrication and Cooling system*	*Supercharging and Scavenging*
	SLO-2	*Constructional details of engine components, function,materials,*	*Stages of combustion, Flame propagation*	*Importance of air motion - Swirl, squish and turbulence*	*Need for cooling system - Types of cooling system*	*Objectives - Effects on engine performance*
S-2	SLO-1	*Valve timing diagram for SI and CI engine*	*Flame velocity and area of flame front*	*Swirl ratio. Fuel air mixing*	*Liquid cooled system*	*engine modification required*
	SLO-2	*Port timing diagram for SI and CI engine*	*Rate of pressure rise - Cycle to cycle variation*	*Stages of combustion*	*Thermosyphon system*	*Thermodynamics of supercharging*
S-3	SLO-1	*Firing order and its significance*	*Abnormal combustion - Theories of detonation*	*Delay period - Factors affecting delay period*	*Forced circulation system*	*Thermodynamics of Turbocharging*
	SLO-2	*Tutorial 1: Comparison of Valve Timing Diagrams for SI and CI engine*	*Tutorial 3: Comparison of SI and CI engine combustion process*	*Knocking in CI engines - methods of controlling diesel knock.*	*pressure cooling system*	*Turbo lag-Windage, losses*
S 4-5	SLO-1 SLO-2	*Lab 1: Valve Timing Diagram for Four Stroke Engine and port Timing Diagram for Two Stroke Engine*	*Lab 3: Performance test on Petrol engine at full throttle and part throttle conditions*	*Lab 5: Study of gasoline and diesel fuel supply system.*	*Lab 7: Test for optimum coolant flow rate in IC engines*	*Lab 9: Energy Balance test on an Automotive Diesel Engine*
S-6	SLO-1	*Intake system components - Discharge coefficient, Pressure drop*	*Introduction to Combustion chambers*	*CI engine combustion chamber.*	*Properties of coolant, additives for coolants*	*Turbo charging methods*
	SLO-2	*Air filter, intake manifold, Connecting Pipe*	*Effect of engine operating variables on combustion*	*Combustion chamber design objectives - open type*	*Need for lubrication system*	*Engine exhaust manifold arrangements.*
S-7	SLO-1	*Exhaust system components*	*Combustion chambers -types*	*Combustion chamber design objectives – divided type*	*Mist lubrication system*	*Classification of scavenging systems*
	SLO-2	*Exhaust manifold and exhaust pipe*	*factors controlling combustion chamber design*	*Induction swirl, turbulent combustion chambers*	*wet sump any dry sump lubrication*	*Mixture control through Reed valve*
S-8	SLO-1	*Spark arresters*	*Gasoline injection system*	*Air cell chamber - M Combustion chamber*	*Properties of lubricants, consumption of oil*	*Induction - Charging Processes in two-stroke cycle engine - Terminologies*

	SLO-2	*Exhaust mufflers, Types, operation*	*Tutorial 4: Combustion chamber designs*	*Diesel injection system*	*Tutorial 8: Lubrication methods*	*Shankey diagram - perfect displacement, perfect mixing.*
S 9-10	SLO-1	*Lab 2: Performance test on constant speed diesel engine*	*Lab 4: Morse test on petrol engines*	*Lab 6: Dismantling, measuring of components and Assembling of a multi cylinder engine.*	*Lab 8: Determination of viscosity of oil by different methods like, Redwood, Say bolt and Engler's Viscometer*	*Lab 10: Performance test on Diesel Engine at full load and part load conditions*
	SLO-2

		Frames, Front and Rear Axles	Drive Line and Final Drives	Steering and Suspension Systems	Transmission System	Brakes, Wheels and Tyres
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Different types of chassis layout- FF, FR,RR and 4WD.*	*Effect of driving thrust and torque reactions.*	*Front wheel geometry - Caster, Camber.*	*Types of clutches, construction and working of single plate.*	*Theory of braking.*
	SLO-2	*Different types of chassis layout- FF, FR,RR and 4WD.*	*Effect of driving thrust and torque reactions.*	*Front wheel geometry - Toe in and toe out, SAI.*	*Multi plate and centrifugal clutch.*	*Stopping distance - Braking efficiency , Numerical analysis.*
S-2	SLO-1	*Types of vehicle body and Classifications.*	*Hotchkiss and torque tube drive.*	*Steering systems - True rolling motion of wheels and Numerical Analysis.*	*Torque capacity of clutch – Numerical Analysis.*	*Drum brakes - Single cam, Double cam.*
	SLO-2	*Types of vehicle body and Classifications.*	*Front wheel drive.*	*Simple problems*	*Simple problems*	*Leading and Trailing shoe types.*
S-3	SLO-1	*Frames- construction, Materials, LoadsActing on frames.*	*Propeller shaft –Construction, Critical Speed.*	*Ackermann and Davis steering Mechanism.*	*Fluid coupling – Construction*	*Disc brakes - Fixed, floating and radial mounted calipers.*
	SLO-2	*Frames- construction, Materials, LoadsActing on frames.*	*Universal joint, Slip joint.*	*Constructional details of steering linkages for rigid front axle.*	*Fluid coupling –Principle of operation.*	*Ventilated discs, cross drilled discs, slotted discs.*
S 4-5	SLO-1 SLO-2	*Lab 1: Study and measurement of various types of vehicle frame, body and driver seat.*	*Lab 4: Dismantling, study and assembling of automobile driveline and differential.*	*Lab 7: Dismantling, study and assembling of automobile suspension system.*	*Lab 10: Calculating the maximum torque carrying capacity of the given clutch using clutch dynamometer.*	*Lab 13: Dismantling, assembling and bleeding of a braking system.*
S-6	SLO-1	*Types of vehicle frames-Ladder frame, Tubular frame.*	*Constant velocity joints.*	*Constructional details of steering linkages for independent front axles.*	*Torque converters - Construction*	*Mechanical and hydraulic brake actuation.*
	SLO-2	*Integral frame, X-frame, Roll-cage frames.*	*Rzeppa and Tripod joints.*	*Steering gear box - Re-circulating ball type,Rack and pinion type, Worm and Nut type.*	*Principle of operation.*	*Pneumatic braking system.*
S-7	SLO-1	*Common vehicle platform- Need.*	*Different types of final drive - Worm and worm wheel, Straight bevel gear.*	*Power assisted steering - Hydraulic and EPS.*	*Hydro kinetic drives - Multistage torque converters.*	*Vacuum assisted hydraulic brakes.*
	SLO-2	*Common vehicle platform- merits and demerits.*	*Spiral bevel gear and hypoid gear final drives.*	*Four wheel Steering.*	*Poly-phase torque converters.*	*Air assisted hydraulic brakes.*

S-8	SLO-1	Case study-Volkswagen PQ platform, Nissan B platform.	Double reduction final drive.	Need for suspension system. Types of suspension - Non independent suspension.	Types of gear boxes - Working of sliding And constant mesh gear boxes.	Need for ABS, ESP, EBD.
	SLO-2	Case study- Nissan B platform.	Twin speed final drive.	Independent suspension - McPherson and Wishbone suspension.	Construction and working of synchromesh gear box and principle of synchronizers	Need for Regenerative braking systems.
S 9-10	SLO-1 / SLO-2	Lab 2: Study of different types of front and rear axles and final drives. Calculation of final drive ratio.	Lab 5: Dismantling, study and assembling of different automobile steering systems.	Lab 8: Dismantling, study and assembling of automobile clutches.	Lab 11: Dismantling, gear ratio calculation and assembling of an automobile transmission.	Lab 14: Study and analysis of the construction of various wheels and tyres.
S-11	SLO-1	Front axle – Live axles, Dead axles.	Differential- Principle.	Types of suspension springs - Leaf spring, Coil spring, Torsion bar, and Rubber springs.	Planetary gear box - construction and working.	Types of Wheels
	SLO-2	Front axle – Drop axles, Push and tag axles.	Differential- Construction details.	Shock absorbers.	Planetary gear box - construction and working.	Dimensions and Constructional details
S-12	SLO-1	Rear axles – Semi, full and three quarter floating.	Differential lock.	Pneumatic suspension systems.	Numerical in Gear box.	Types - Construction - Cross ply, Radial ply,
	SLO-2	Housing types- Split Banjo and Salisbury type.	Differential lock.	Rear axle suspension system - Independent, Trailing Arm.	Automatic transmission - Chevrolet turbo glide - Construction and working..	Types - Construction - Tube and tubeless tyres.
S-13	SLO-1	Multi-link rear axles	Limited slip differential.	De-dion suspension and torsion beam.	Automatic transmission – Chevrolet Power glide - Construction and working..	Tyre designation.
	SLO-2	Multi-link rear axles	Limited slip differential.	Anti-roll bar, Pan hard rod and Radius rod	Hydraulic clutch actuation for Automatic transmission.	Tread patterns.
S 14-15	SLO-1 / SLO-2	Lab 3: CLA-1	Lab 6: CLA-2	Lab 9: CLA-3	Lab 12: CLA-4	Lab 15: University practical examination.

Course Code	18AUC303J	Course Name	AUTOMOTIVE ELECTRICAL AND ELECTRONIC SYSTEMS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To acquire knowledge of about the application of electrical and electronics in automotive systems*
CLR-2 :	*Familiarize the usage of Sensors and actuators in Automobile*
CLR-3 :	*Acquire the fundamental electronics applied vehicle motion control system*
CLR-4 :	*Understanding the working of charging and lighting accessories in automobile*
CLR-5 :	*Know about various Electrical equipment diagnostics and testing methods*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Understanding battery, Cranking motor construction and testing methods.*	2	85	75	H	M	H	L	H	M	M	H	H	M	L	H	H	H	H
CLO-2 :	*Understand the principle of alternator and to test the alternator*	2	80	75	H	M	H	H	H	M	M	H	H	M	L	M	H	H	H
CLO-3 :	*Apply the Electronic Controls in Gasoline Engine*	2	90	85	H	H	H	H	L	M	M	H	M	M	M	H	H	H	M
CLO-4 :	*Understand the basics of Vehicle Motion Control and telemetric system*	2	85	80	H	M	H	H	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Perform OBD II test on vehicle and Program hardware using Lab view*	2	80	75	H	M	M	M	H	H	H	H	H	H	M	H	H	H	H

		Batteries and Starting Systems	Charging System and Lighting Auxiliaries	Electronic Engine Management System	Fundamentals of Vehicle Motion Control	Telematics and Vehicle Diagnostics
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Unit – I Vehicle Batteries types*	*Unit- II Charging system - Introduction*	*Unit –III Introduction – Engine management system*	*Unit – IV Introduction – Vehicle motion control*	*Unit – V Introduction – Telematics*
	SLO-2	*Lead acid battery - Principle*	*Alternator Principle Construction, Working*	*Gasoline Engine Fuel Injector*	*Cruise Control System*	*GPS Navigation*
S-2	SLO-1	*Lead acid battery - Construction, Working*	*Alternator merits over D.C Generator*	*Single point Fuel Injections*	*Adaptive Cruise Control System - Construction*	*GPS Structure*
	SLO-2	*Battery Rating*	*Alternator Charging Circuits*	*Multi Point Fuel Injections*	*Adaptive Cruise Control System - Working*	*Dead Reckoning - Construction*
S-3	SLO-1	*Lead Acid battery Charging methods*	*Rectification of AC to DC*	*Merits of MPFI*	*Throttle Actuator Stepper Motor Based Control*	*Dead Reckoning - Working*
	SLO-2	*Testing Methods*	*Alternator Testing Methods*	*Testing of Fuel Injectors*	*Antilock Braking Mechanism - Construction*	*Inertial Navigation System - Construction*
S 4-5	SLO-1 SLO-2	*Lab 1: Battery Testing –Hydrometer, Load test, Individual Cell voltage test*	*Lab 3: Alternator Testing –Continuity test, Insulation Test, Load test.*	*Lab 5: Study of Lab view Programming*	*Lab 7: PWM Signal generation*	*Lab 9: UART communication for parking sensor*
S-6	SLO-1	*Fault Diagnosis.*	*Mechanical Voltage Regulator - Principle*	*Ignition system- Introduction*	*Antilock Braking Mechanism - Working*	*Inertial Navigation System - Working*
	SLO-2	*Requirement of a starting System*	*Mechanical Voltage Regulator – construction, working*	*Conventional Ignition System*	*Tire Slip Controller*	*Invehicle infotainment systems*
S-7	SLO-1	*Starter motor Construction*	*Electronic Voltage regulator –Principle*	*Electronic Ignition System*	*Merits of ABS*	*ADAS - Introduction*
	SLO-2	*Starter motor Working.*	*Electronic Voltage Regulator – construction, working*	*Programmed ignition system*	*Electronic Suspension System- Construction*	*ADAS features*
S-8	SLO-1	*Starter Drive Mechanism - introduction*	*Lighting Fundamentals*	*Distributor less Ignition System*	*Electronic Suspension System- Working*	*Electronic Control System Diagnostics,*
	SLO-2	*Starter Drive Mechanism - types*	*Lighting Circuit example*	*Waste spark analysis*	*Variable Damping*	*OBDII - Objective*
S 9-10	SLO-1 SLO-2	*Lab 2: Starter Motor –Continuity test, Insulation Test, Load test*	*Lab 4: Study of voltage regulator, solenoids*	*Lab 6: ADC interfacing for IR Sensor*	*Lab 8: H-Bridge Motor speed and position Control*	*Lab 10: Fault Diagnosis using OBD handheld Devices*
S-11	SLO-1	*Bendix drive*	*Conventional Headlamps – Sealed bulb headlamps*	*Digital Engine Control Modes*	*Variable Spring rate*	*Comparison of OBD I and OBD II*
	SLO-2	*Folo-thru drive*	*Conventional Headlamps – Bifilament headlamps*	*EGR Control*	*Merits of Electronic suspension system*	*Diagnostics Fault Codes*

S-12	SLO-1	*Over Running Clutch drive*	*LED Lighting System*	*variable valve timing*	*Electric Power Assisted Steering Mechanism- Construction*	*Introduction to Model-based Sensor Failure Detection*
	SLO-2	*Starter switch*	*Fog lamp*	*Ignition Controlling - Introduction*	*Electric Power Assisted Steering Mechanism- working*	*Model-based Sensor Failure Detection working*
S-13	SLO-1	*Starter Motor Fault Diagnosis*	*Wiper system*	*Closed loop ignition timing*	*Four Wheel Steering*	*Case Study on MAF Sensor calibration*
	SLO-2	*New Developments in Battery Technologies and Starting System*	*Signaling and Warning system*	*Spark Advance Correction Scheme*	*Steer-by-Wire*	*Case Study on MAF Sensor calibration .Cont*
S-14-15	SLO-1 SLO-2	*Lab: Assessment 1*	*Lab: Assessment 2*	*Lab: Assessment 3*	*Lab: Review class*	*Lab: Mini Project*

		Introduction to CAD	Graphics Concepts (2D and 3D)	Software Packages and Recent Technology	FEM Fundamentals	Finite element Analysis
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to CAD*	*Introduction to Coordinate system*	*Introduction to Software Packages*	*FEM Fundamentals - Introduction*	*Finite element Analysis - Introduction*
	SLO-2	*Product life cycle management*	*Model coordinate system,*	*Salient features of Software Packages*	*Degrees of freedom, h-convergence and p-convergence*	*Need for FEA in CAD Environment*
S-2	SLO-1	*Design models – pahl and beitz model*	*World coordinate system and Screen coordinate system*	*Technical comparison, Modules and tools*	*Need for Finite element method*	*Various stages of FEA - Preprocessing,*
	SLO-2	*Shigley model and Ohsuga model*	*Transformations in 2D and 3D*	*Need for data exchange standards and types*	*Nodes, element types*	*Solving and Post-processing*
S-3	SLO-1	*Geometric modelling – Introduction*	*Deriving transformation matrix for translation*	*Structure of STEP file system*	*Types of Constraints*	*Demonstration of the above using any one commercial packages*
	SLO-2	*Wireframe, surface and solid modelling*	*Deriving transformation matrix for scaling*	*Advantages and Disadvantages of STEP file system*	*Types of Boundary conditions*	*Structural analysis of beams and truss*
S 4-5	SLO-1 SLO-2	*LAB 1: Introduction to 2D sketch tool*	*LAB 3 : Introduction to various features for 3D Modelling*	*LAB 5 : 3D modelling of piston and connecting rod*	*LAB 7 : Exercises on Assembly of Knuckle joint*	*LAB 9 : Structural Analysis of trussand beams using ANSYS APDL*
S-6	SLO-1	*Constructive solid geometry*	*Deriving transformation matrix for Reflection*	*Structure of IGES file system*	*Steps in Finite element method*	*Introduction to modal analysis – Free Vibration*
	SLO-2	*Problems on Constructive solid geometry*	*Deriving transformation matrix for Rotation*	*Advantages and Disadvantages of IGES file system*	*Derivation of shape function*	*Forced Vibration*
S-7	SLO-1	*Boundary representation*	*Problems on basic transformations*	*Brief outline of feature technology*	*Solution techniques – Point collocation method*	*Brief outline of kinematic analysis*
	SLO-2	*Problems on Boundary representation*	*Concatenated and Inverse transformation*	*Classification of features*	*Sub domain and Least square method*	*Steps in Kinematic analysis*
S-8	SLO-1	*Operations – Booleans and Extrude*	*Problems on Concatenated and Inverse transformation Visibility techniques – Minimax test*	*Design by features*	*Galerkin method*	*Modelling of Four bar mechanism*
	SLO-2	*Demonstration of boolean and extrude using Solidworks*		*Applications of feature based modelling*	*Derivation of stiffness matrix*	*Kinematic analysis of Four bar mechanism*

S 9-10	SLO-1	*LAB 2 : Exercises on 2D sketch*	*LAB 4 : Exercises on 3D Modelling*	*LAB 6: Exercises on Assembly of Screw jack*	*LAB 8 : Exercises on Assembly of Universal joint*	*LAB 10 : Finite element analysis on connecting rod using ANSYS Workbench*
	SLO-2					
S-11	SLO-1	*Sweep and Revolve*	*Containment test*	*Applying features to various automotive components*	*Tutorial on Finite element problems involving stepped bar*	*Modelling of Single slider mechanism*
	SLO-2	*Demonstration of sweep and revolve using Solidworks*	*Hidden line removal – priority algorithm*	*Advantages and limitations of feature based modelling*	*Interpretation of the results*	*Kinematic analysis of Single slider mechanism*
S-12	SLO-1	*Basic entities – Line*	*Light source and Shading – Constant shading models*	*Introduction to GD & T*	*Tutorial on Finite element problems involving triangular element.*	*Modelling of an automotive components - 1*
	SLO-2	*Circle*	*Gourand and Phong shading models*	*Need of GD&T*	*Interpretation of the results*	*Finite element analysis of an automotive components - 1*
S-13	SLO-1	*Ellipse and*	*Color models – RGB and CMYK model*	*Geometrical tolerance*	*Tutorial on Finite element problems involving springs.*	*Modelling of an automotive components - 2*
	SLO-2	*Parabola*	*Rendering and Animation*	*Dimensional tolerance*	*Interpretation of the results*	*Finite element analysis of an automotive components - 2*
S-14-15	SLO-1	*Lab Assessment 1*	*Lab: Repeat class*	*Lab Assessment 2*	*Lab Assessment 3*	*LAB 11 : Kinematic Analysis of 4-bar mechanism using ANSYS Workbench*
	SLO-2

Course Code	18AUC401J	Course Name	VEHICLE DYNAMICS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Learn about the sources, analysis and solution of problems pertaining to vehicular vibrations.*
CLR-2 :	*Learn about the sources and effects of dynamic forces acting on a vehicle system.*
CLR-3 :	*Acquire fundamental knowledge about ride comfort, vehicle stability issues and formulate fundamental mathematical relations for such issues to achieve a better design of automotive systems.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)
CLO-1 :	*Solve vibration problems with single degree of freedom*	*2*	*90*	*75*
CLO-2 :	*Interrelate the forces generated in the tire with tire slip phenomenon*	*2*	*80*	*80*
CLO-3 :	*Construct a mathematical model for vehicle suspension studies*	*3*	*85*	*80*
CLO-4 :	*Formulate the equation of motion of a vehicle in longitudinal direction*	*3*	*90*	*85*
CLO-5 :	*Predict the directional stability of vehicles based on driving conditions*	*2*	*85*	*80*

Program Learning Outcomes (PLO)

		Basics of Vibration	Tires	Vertical Dynamics	Longitudinal dynamics	Lateral dynamics
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Understand the Basic concepts of vibration*	*Define the co-ordinate system for an automotive vehicle and tire*	*List the methods for assessing human tolerance to vibration*	*List the resistive forces to longitudinal motion of vehicles*	*List the various side forces acting on a vehicle*
	SLO-2	*Classify the types of vibration*	*State the various forces and moments acting in an automotive tire*	*Describe the criteria for ride comfort*	*Explain the resistive forces to longitudinal motion of vehicles*	*Explain the effect of the side forces on the vehicle*
S-2	SLO-1	*Recall harmonic motion principles*	*List the various causes of rolling resistance of tires*	*Categorize the vertical dynamics modeling of vehicles*	*Apply Newton's law of motion for longitudinal dynamics of vehicles*	*Define steady state condition in lateral vehicle dynamics*
	SLO-2	*Explain the procedure for vibration analysis*	*State the expression for rolling resistance of tires*	*Evaluate the equation of motion for the vertical dynamic models*	*Calculate maximum tractive effort from the equation of motion for longitudinal dynamics*	*Judge the steady state handling characteristics of a vehicle based on the value of under steer co-efficient*
S-3	SLO-1	*Express and derive equation of motion for Free vibration of single degree of freedom – damped and undamped*	*Understand the phenomenon of tire slip*	*Design passive suspension system in quarter car model*	*Discuss the components in driveline*	*List the motion variables influenced by steering input*
	SLO-2	*Infer the amplitude decrement factor as logarithmic decrement*	*Recognize the generation of slip angle due to side forces*	*Analyze passive suspension system in quarter car model*	*Apply driveline dynamics in analyzing longitudinal dynamics equation*	*Analyze the influence of steering input on motion variables*
S 4-5	SLO-1 SLO-2	*Lab 1: Analysis of vibration system in Simulink\ Recall the fundamentals of vibration systems Analyze the vibration system in Simulink*	*Lab 4: Magic formula tire model State the magic formula tire model Represent the tire behavior using Magic formula*	*Lab 7: Half car model Recognize half car model of a vehicle Develop half car model in Simulink*	*Lab 10: Braking dynamics analysis using Car Maker Recall braking dynamics equation Analyze braking dynamics using Car Maker*	*Lab 13: Lateral dynamics analysis using Car Maker Recall lateral dynamics fundamentals Analyze lateral dynamics using Car Maker*
S-6	SLO-1	*Express and derive equation of motion for forced vibration of single degree of freedom – damped and undamped*	*Interpret the variation of longitudinal and lateral forces for various slip angles*	*Design semi active and active suspension systems in quarter car model*	*Calculate maximum acceleration for different drives*	*List the various tests to measure the handling characteristics of vehicles*
	SLO-2	*Apply the principle of base excitation to automotive vibration*	*Explain the concept of friction circle in tires*	*Analyze semi active and active suspension systems in quarter car model*	*Calculate reaction forces for different drives*	*Assess the handling characteristics of vehicles through various tests*

S-7	SLO-1	*Express and derive equation of motion for Free vibration of two degree of freedom – damped and undamped*	*Interrelate tractive effort with longitudinal slip of tires*	*Design passive suspension system in half car model*	*Derive an expression for load transfer while braking*	*Recognize the transient state conditions in the dynamic motion of vehicles*
	SLO-2	*Represent simple cases of automotive vibration as two degree of freedom system*	*Illustrate the relation between tractive effort and longitudinal slip of tires*	*Analyze passive suspension system in half car model*	*Derive an expression for load transfer while accelerating*	*Formulate the equation of motion in transient state*
S-8	SLO-1	*Examine automotive vibration problems as multi degree of freedom systems*	*Restate the generation of slip angle in tires*	*Design semi active and active suspension systems in half car model*	*Calculate the load distribution for three wheelers*	*Define the criteria for directional stability of vehicles*
	SLO-2	*Solve the multi degree of freedom system equation of motion for automotive vibrations*	*Diagram the cornering characteristics of tires*	*Analyze semi active and active suspension systems in half car model*	*Calculate the load distribution for four wheelers*	*Analyze the directional stability of vehicles through understeer co-efficient*
S 9-10	SLO-1 SLO-2	*Lab 2: Generation of road profile Identify the statistical method for road profile generation Create Simulink model for road profile generation*	*Lab 5: Quarter Car model Recognize quarter car model of a vehicle Develop quarter car model in Simulink*	*Lab 8: Shock absorber testing Recall the construction of a shock absorber Assess the shock absorber in a test rig*	*Lab 11: Active suspension study in Quanser test rig Recall active suspension concept Assess the active suspension test rig*	*Lab 14: Rollover analysis using Car Maker Recall vehicle roll over concept Analyze vehicle roll over using Car Maker*
S-11	SLO-1	*Understand modelling procedure*	*List the parameters for performance of tires on wet surfaces*	*Design passive suspension system in full car model*	*Predict the driving performance of vehicles from tractive effort value*	*Analyze the stability of a vehicle on a banked road*
	SLO-2	*Study the simulation of dynamic systems*	*Interpret the phenomenon of hydroplaning*	*Analyze passive suspension system in full car model*	*Analyze acceleration and braking performance of vehicles*	*Analyze the stability of a vehicle while taking turn*
S-12	SLO-1	*Show the variation of magnification factor with respect to frequency ratio*	*Demonstrate tire as a brush type model*	*Design semi active and active suspension systems in full car model*	*Diagram the ABS control loop*	*Understand the concept of roll center in vehicle dynamics*
	SLO-2	*Sketch the variation of vibrating system transmissibility with respect to frequency ratio*	*Demonstrate tire as a brush-string type model*	*Analyze semi active and active suspension systems in full car model*	*Illustrate the ABS control cycles with appropriate practical conditions*	*Understand the concept of roll axis in vehicle dynamics*
S-13	SLO-1	*Explain the principle of vibration absorbers*	*Model the tire empirically based on experimental data*	*Apply the PID control strategy to automotive suspension systems*	*Differentiate Traction Control System against ABS*	*Draw the single track model for a vehicle*
	SLO-2	*Classify the vibration measuring instruments*	*Present tire forces and moments as a function of slip phenomenon*	*Apply the skyhook and LQR control strategy to automotive suspension systems*	*Explain typical control situations for TCS action*	*Analyze the dynamics of a vehicle using single track model*
S 14-15	SLO-1 SLO-2	*Lab 3: Assessment 1*	*Lab 6: Assessment 2*	*Lab 9: Assessment 3*	*Lab 12: Repeat Class*	*Lab 15: University exam*

Learning Resources	*1. Mechanical Vibrations, Singiresu S Rao, 6th edition, 2017, Pearson Education, USA* *2. Theory of Ground Vehicles, J.Y. Wong, 4th edition, John Wiley & Sons, New Jersey*	*3. Vehicle Dynamics and Control, Rajesh Rajamani, 2nd edition, 2012, Springer, New York* *4. Simulink Manual/Documentation, Car Maker manual/ Documentation*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Demonstrate the purpose of chassis dynamometers in vehicle testing.*
CLR-2 :	*Understand the procedures involved in HVAC testing and servicing.*
CLR-3 :	*Analyze the various procedures involved in testing the steering and wheel geometry of an automobile.*
CLR-4 :	*Study the procedures involved in measuring the tailpipe emissions of an automobile.*
CLR-5 :	*Analyze the ignition pattern in an automobile.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO – 3
CLO-1 :	*Conduct performance tests on automobiles using chassis dynamometers.*	3	90	90	H	H	M	M	H	H	H	H	H	H	L	H	H	M	H
CLO-2 :	*Perform tests and servicing on automobile HVAC using modern equipment.*	3	90	90	H	H	M	M	H	H	H	H	M	H	L	H	H	M	H
CLO-3 :	*Identify and adjust any deviations in steering and wheel geometry of an automobile using modern tools and equipment.*	3	90	90	H	H	M	M	H	H	H	H	H	H	L	H	H	M	H
CLO-4 :	*Perform tail pipe emission testing and analyze the deviations on emissions in an automobile.*	3	90	90	H	H	M	M	H	H	H	H	M	H	L	H	H	M	H
CLO-5 :	*Interpret the ignition pattern of an automobile to find out any ignition system malfunction.*	3	90	90	H	H	M	M	H	H	H	H	M	H	L	H	H	M	H

Duration (hour)		6	6	6	6	6
S 1-2	SLO-1, SLO-2	*Lab 1: Studying the performance of a two wheeler using Eddy current chassis dynamometer.*	*Lab 4: CLA-1*	*Lab 7: Performing dynamic wheel balancing, tyre removal and fitment on the given LMV tyre.*	*Lab 10: Determination of caster, camber, toe-in and toe-out of the given HMV using computerized wheel alignment system.*	*Lab 13: Analyzing the tail pipe emissions and smoke density of the given automobile using 5-gas analyzer and smoke meter.*
S 3-4	SLO-1, SLO-2	*Lab 2: Studying the performance of a car using a four wheeler chassis dynamometer.*	*Lab 5: Determination of slide slip, suspension efficiency and brake efficiency using car test lane.*	*Lab 8: CLA-2*	*Lab 11: Performing dynamic wheel balancing, tyre removal and fitment on the given HMV tyre.*	*Lab 14: Study of secondary ignition pattern of an automobile using an oscilloscope analyzer.*
S 5-6	SLO-1, SLO-2	*Lab 3: Performing leak check and refrigerant refilling of the HVAC in an automobile.*	*Lab 6: Determination of caster, camber, toe-in and toe-out of the given LMV using 3D computerized wheel alignment system.*	*Lab 9: Performing headlight beam adjustment on the given automobile using computerized headlamp beam tester.*	*Lab 12: CLA-3*	*Lab 15: CLA-4*

ACADEMIC CURRICULA

Professional Core Courses

BIOTECHNOLOGY

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18BTC201J	Course Name	GENE MANIPULATION AND GENOMICS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Discuss the basic concepts and principles of utilization of different expression vectors for cloning from the perspective of engineers*
CLR-2 :	*Demonstrate the different strategies of gene cloning and construction of genomic and cDNA libraries*
CLR-3 :	*Analyse the concepts of structural and functional genomics*
CLR-4 :	*Apply advanced cutting-edge technologies*
CLR-5 :	*Assess the applications of recombinant DNA technology in animals, plants and microbial organisms*
CLR-6 :	*Prepare engineering students to develop the strategies on altering gene expression in vitro and in vivo*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Explain the foundations of modern biotechnology*	1	80	70		L	M	L	M				H			H	H	H	H
CLO-2 :	*Design and conduct experiments involving genetic manipulation.*	2	85	75	H	H	H	H	H				H		H	H	H	H	H
CLO-3 :	*Use versatile techniques in recombinant DNA technology.*	2	75	80	H	M	H	H	H				H		H	H	H	H	H
CLO-4 :	*Describe the steps involved in the production of biopharmaceuticals in microbial and mammalian cell systems.*	2	85	80	H	H	H	H	H		M		H		H	H	H	H	H
CLO-5 :	*Apply modern biotechnology in the different areas like medicine, microbes, environment and agriculture.*	2	80	80	H	M	H	H	H	L	H		H		H	H	H	H	H
CLO-6 :	*Design the cloning experiments using routine and specialized vectors for such applications as plant transformation, protein expression and genomic DNA library construction etc.*	2	80	75	H	H	H	H	H		M		H		H	H	H	H	H

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Overview of cloning*	*DNA Library*	*DNA sequencing*	*Analysis of gene expression*	*Applications of cloning*
	SLO-2	*DNA cloning vectors*	*Preparation of DNA Libraries*	*Principles of DNA sequencing*	*Transcription and translation*	*Medical applications*
S-2	SLO-1	*Cell based DNA cloning*	*Genomic DNA library*	*Sanger's Dideoxy sequencing method*	*Post transcriptional and post translational regulations*	*Human and genetic diseases*
	SLO-2	*Cell free DNA cloning*	*Overlapping and non-overlapping DNA fragments*	*Automated DNA sequencing*	*Methods for protein expression*	*DNA vaccines*
S-3	SLO-1	*Plasmid vectors – pBR322*	*Choice of vectors*	*Next generation sequencing*	*Analysis of gene function*	*Gene therapy*
	SLO-2	*pUC vector*	*Evaluation of genomic DNA library*	*Genome sequencing*	*Factors influencing gene expression*	*Study of gene function in vivo*
S 4-5	SLO-1 SLO-2	*Lab 1: Restriction enzyme digestion of genomic DNA*	*Lab 4: Alkaline Phosphatase treatment for cloning*	*Lab 7: Transformation of recombinant vector in to E.Coli*	*Lab 10: Repeat/Revision of experiments*	*Lab 13: Qualitative and quantitative analyses of RNA*
S-6	SLO-1	*Phage vectors – Lambda insertion*	*cDNA library*	*Emulsion PCR*	*Manipulation of gene expression*	*Embryonic stem cells*
	SLO-2	*Lambda Replacement vector*	*Purification and separation of mRNA*	*Bridge PCR*	*Transcriptomics - Non-coding RNA*	*Applications in Embryonic stem cells*
S-7	SLO-1	*Cosmids*	*cDNA synthesis*	*RNA sequencing*	*Small RNAs, siRNAs*	*Transgenics*
	SLO-2	*M13 vector*	*cDNA library construction*	*Applications of NGS*	*MicroRNAs, lncRNA*	*Methods of producing transgenic mice*
S-8	SLO-1	*Phagemid*	*Evaluation of cDNA library*	*Labeling of nucleic acids*	*Expression in prokaryotic host cells*	*Over-expression*
	SLO-2	*pBluescript*	*Screening libraries*	*Random priming*	*Purification of expressed protein*	*Gene knock-in*
S 9-10	SLO-1 SLO-2	*Lab 2: Restriction enzyme digestion of Vector*	*Lab 5: Preparation of rDNA- Ligation of DNA fragment with cloning vector*	*Lab 8: Screening- Blue white selection*	*Lab 11: Expression in eukaryotic host cells*	*Lab 14: cDNA synthesis*
S-11	SLO-1	*Yeast vectors*	*Polymerase chain reaction (PCR)*	*Nick translation and End labeling*	*Expression in eukaryotic host cells*	*Gene knock-out*
	SLO-2	*Types of yeast vector*	*Semi quantitative PCR*	*RNA labeling*	*Mammalian expression vectors*	*Conditional knock-out*
S-12	SLO-1	*YAC*	*RNA-PCR*	*Non-isotopic labeling*	*Mutagenesis*	*Genome editing*
	SLO-2	*Expression vectors*	*Real time PCR*	*Structural genomics*	*in vitro mutagenesis*	*CRISPER-Cas9*

S-13	SLO-1	*Restriction enzymes*	*Types of qRT-PCR*	*comparative genomics*	*Site directed mutagenesis*	*Guide RNA*
	SLO-2	*Linker and homopolymer tailing*	*Applications of PCR*	*Microarray*	*Methods for site directed mutagenesis*	*Gene inactivation*
S 14-15	SLO-1 SLO-2	*Lab 3: Purification of digested DNA by column purification*	*Lab 6: Preparation of Competent cell*	*Lab 9: Identification of recombinants-isolation of rDNA*	*Lab 12: RNA isolation*	*Lab 15: Quantitative PCR (Real time PCR)*

Course Code	18BTC202J	Course Name	BIOPROCESS ENGINEERING	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15
CLR-1 :	*Demonstrate the various operational modes of bioreactor*																		
CLR-2 :	*Illustrate about the various transport phenomena in bioprocess systems.*																		
CLR-3 :	*Demonstrate the monitoring and control of various process parameters in bioreactors.*																		
CLR-4 :	*Analyze the design and operation of various industrially important bioreactor*																		
CLR-5 :	*Illustrate the various mathematical models of biological systems*																		
CLR-6 :	*Illustrate the transformation of bioprocess engineering approaches from laboratory scale to commercial scale*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Analyze the various operations of the bioreactor and evaluating its performance.*	*2*	*80*	*70*	*H*	*H*	*H*	*H*			*H*		*H*		*H*	*H*	*H*	*H*	*H*
CLO-2 :	*Discuss the fundamental knowledge on mechanisms of oxygen transfer in biological systems.*	*2*	*85*	*75*	*H*	*H*	*H*	*H*			*H*		*H*		*H*	*H*	*H*	*H*	*H*
CLO-3 :	*Illustrate the procedures adopted for monitoring and control of process parameters in bioreactors.*	*2*	*75*	*80*	*H*	*H*	*H*	*M*			*H*		*H*		*H*	*H*	*H*	*H*	*H*
CLO-4 :	*Discuss on the design and operation of bioreactors for the cultivation of microbial, plant and animal cell cultures.*	*2*	*85*	*80*	*H*	*H*	*H*	*H*			*M*		*H*		*H*	*H*	*H*	*H*	*H*
CLO-5 :	*Explain the applicability of modeling preliminaries and software packages in bioprocess.*	*3*	*85*	*80*	*H*	*H*	*H*	*H*	*H*		*M*		*H*		*H*	*H*	*H*	*H*	*H*
CLO-6 :	*Explain the engineering approaches for successful commercialization of bioprocess operations.*	*2*	*80*	*75*	*H*	*H*	*H*	*H*	*H*		*M*		*H*		*H*	*H*	*H*	*H*	*H*

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to ideal reactors*	*Molecular Diffusion*	*Bioreactor Instrumentation and Control*	*Bioreactor configurations for production of metabolites from microbial sources*	*Introduction to mathematical modeling of biological systems*
	SLO-2	*Ideal reactor types*	*Role of Diffusion in Bioprocessing*	*Monitoring of biochemical parameters*	*Stirred tank reactor*	*Approaches to modelling cell growth*
S-2	SLO-1	*Ideal batch reactor - basics*	*Convective Mass Transfer*	*Instrumentation for Measurements of Active Fermentation*	*Packed bed reactor*	*A Model of Cell Growth Dynamics*
	SLO-2	*Performance equation: Ideal batch reactor*	*Oxygen Uptake in Cell Cultures*	*pH, temperature, and DO*	*Fluidized bed reactor*	*Sigle cell model*
S-3	SLO-1	*Ideal continuous reactor - basics*	*Oxygen Transfer in Fermenters*	*Chemical composition and exhaust gas analysis*	*Air lift loop reactor*	*Yeast model*
	SLO-2	*Performance equation: Ideal continuous reactor*	*Measuring Dissolved-Oxygen Concentrations*	*Water purity, pressure and mass*	*Case studies*	*Simulation software packages*
S 4-5	SLO-1 SLO-2	*Lab 1: Batch operation*	*Lab 4: Estimation of K_La by sulphite oxidation method*	*Lab 7: Enzyme Production - Medium optimization by RSM*	*Lab 10: Repeat/Revision of experiments*	*Lab 13: Analysis of various growth kinetic parameters of batch fermentation using Berkley Madonna software*
S-6	SLO-1	*Ideal plug flow reactor - basics*	*Estimating Oxygen Solubility*	*Mass flow rate, volumetric flow rate and broth level*	*Bioreactor configurations for production of metabolites from plant sources*	*Berkley Madonna software*
	SLO-2	*Performance equation: Ideal plug flow reactor*	*Mass-Transfer Correlations*	*Methods for on-line and off-line biomass estimation*	*Different types of bioreactors for plant cells, tissues and organs*	*Continuous fermentation process*
S-7	SLO-1	*Reasons for non-ideality in bioreactors*	*Measurement of K_La*	*On-line analysis of other chemical factors*	*Light Introducing Bioreactors*	*Fed batch fermentation process*
	SLO-2	*Measurement of non-ideality in bioreactors*	*Oxygen-Balance Method and Dynamic Method*	*State and parameter estimation techniques for biochemical process*	*Rotating Drum Bioreactor*	*MATLAB - Basics*
S-8	SLO-1	*Residence Time Distribution - Studies*	*Power correlation analysis for KLa*	*Control system in bioreactor*	*Balloon-type bubble bioreactors*	*Input and Output in MATLAB*
	SLO-2	*Non-ideal bioreactors*	*Oxygen Transfer in Large Vessels*	*Regulatory and multivariable control*	*Scale-up*	*Curve fitting tool*
S 9-10	SLO-1 SLO-2	*Lab 2: Fed batch operation*	*Lab 5: KLa determination by dynamic gassing method*	*Lab 8: Repeat/Revision of experiments*	*Lab 11: Wine production*	*Lab 14: Estimation of bacterial growth kinetic parameter using Curve Fitting tool in MATLAB*

S-11	SLO-1	*Axial Dispersion*	*Regime analysis of bioprocess*	*Computer-based data acquisition*	*Bioreactor configurations for production of metabolites from animal sources*	*Running simulation in MATLAB*
	SLO-2	*Dispersion Model*	*Mechanism of mixing in bioreactors*	*Artificial intelligence for the control of bioreactor systems*	*Cell culture - basics*	*Running simulation in SIMULINK*
S-12	SLO-1	*Application of dispersion model in design of continuous sterilizers*	*Scale-up of bioreactors*	*Application of Computer Control and Sensing Technologies for bioreactor systems*	*Hollow fire reactors*	*Dynamic simulation studies*
	SLO-2	*Tanks-in-Series Model*	*Scale-up of bioreactors based on power consumption – Gassed*	*Flow injection analysis – Introduction*	*Perfusion culture systems*	*Process Flow sheeting*
S-13	SLO-1	*Conversion from Tanks-in-Series Model*	*Scale-up of bioreactors based on power consumption – Ungassed*	*Various transport system - FIA*	*Sedimentation column perfusion systems*	*Examples of various primary metabolites process flow diagram*
	SLO-2	*Summary - Types of models for non-ideal (real) reactors*	*Scale-up of bioreactors based on oxygen transfer*	*FIA applications*	*Bioreactor strategies for maximizing product formation*	*Examples of various secondary metabolites process flow diagram*
S 14-15	SLO-1 SLO-2	*Lab 3: Sterilization kinetics*	*Lab 6: KLa determination by power correlation analysis*	*Lab 9: Monitoring of process and kinetics parameters in enzyme production – Shake flask studies*	*Lab 12: Prediction of flow behavior in fermentation broth*	*Lab 15: Repeat/Revision of experiments*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand animal breeding,controlling characters and disorders*
CLR-2 :	*Develop an understanding about transgenic animals*
CLR-3 :	*Inculcate the understanding of cell culture technique and production of valuable products from them*
CLR-4 :	*Emphasize on animal health thereby improving livestock production*
CLR-5 :	*Develop an understanding of alteration of animal body biological system*
CLR-6 :	*provide a basic understanding of animal biotechnology*

Course Code	18BTC204T	Course Name	PROTEIN ENGINEERING AND PROTEOMICS	Course Category	C	Professional Core	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Distinguish the organizational levels of protein structure.*
CLR-2 :	*Appraise the structure-function correlation in selected proteins.*
CLR-3 :	*Interpret the structural basis of catalytic mechanism of proteolytic enzymes.*
CLR-4 :	*Construct 3D structure of protein from amino acid sequence.*
CLR-5 :	*Discuss on the experimetal techniques available for protein structure characterization.*
CLR-6 :	*Express the structural similarities existing at basal level in a group of proteins with similar functions*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Structure of amino acids*	*Role of Transcription factors in gene expression*	*Types and uses of proteases*	*Difficulties in generating crystals of Protein*	*Introduction to proteomics*
	SLO-2	*Properties of amino acids*	*Significance of TATA-box binding proteins (TBP)*	*Mechanism of action of serine proteases*	*Methods of generating crystals*	*Difference between functional genomics and proteomics*
S-2	SLO-1	*Role of Glycine and Proline in structure determination*	*Structural elucidation of TBP*	*Significance of Catalytic triad in serine proteases*	*Braggs law*	*Importance of sequencing of prtoein*
	SLO-2	*Ramachandran plot and its significance.*	*Nature of interaction between TBP and DNA*	*Importance of oxyanion hole for the catalytic activity*	*Instrumentation setup for diffraction studies*	*Edmund sequencing method*
S-3	SLO-1	*Interactions that stabilize secondary structures*	*Structural elucidation of p53*	*Specificity of Trypsin towards cleavage of lysine and arginine amino acid bonds*	*Phase determination*	*Array based proteomics*
	SLO-2	*Structural features of alpha helix*	*Nature of interaction between p53 and DNA*	*Specificity of Chymotrypsin and subtilisin*	*Role of Fourier transformation to overcome phase problem*	*Two hybrid system*
S-4	SLO-1	*Types of alpha helices*	*Effect of mutations in the DNA binding domain of p53*	*Domains of Immunoglobulin*	*Multi-wavelength Anomalous Diffraction experiments*	*2D gel electrophoresis*
	SLO-2	*Parallel beta-strand structure*	*Effects of mutations in the oligomerization and Nuclear localization region*	*Class-switching in Immunoglobulins*	*Recent advances in diffraction studies*	*Advantages and limitations of 2D gel electrophoresis*
S-5	SLO-1	*Anti-parallel beta-strand structure*	*Structural elucidation of leucine zipper*	*Immunoglobulin fold*	*NMR principle*	*Mass Spectrometry - Principle*
	SLO-2	*Beta turns, loops and other secondary structures*	*Interaction of leucine zipper and DNA*	*Secondary structures in hyper-variable loop region*	*Instrumentation in NMR*	*Instrumental setup in MS*
S-6	SLO-1	*Super-secondary structures*	*Structure-function correlation in actin*	*Structural orientation in antigen binding site*	*NOE & NOE-COSY*	*Ionisation by MALDI*
	SLO-2	*Difference between motiffs & domains*	*Structure-function correlation in myosin*	*Nature of interaction between antigen and antibody*	*Coupling constants*	*Ionisation by ESI & EI*
S-7	SLO-1	*Types of motiffs*	*Role of ATP in muscular contraction*	*Significance of CDR3 loop in antibody*	*Chemical Shifts*	*Time of Flight concept & peptide mass fingerprinting*
	SLO-2	*Types of domains*	*Structural elucidation of GPCR*	*Mechanism of activation of T-Cell*	*Dipolar Coupling constants*	*Tandem MS and MS/MS*

S-8	SLO-1	*Monomeric and polymeric proteins*	*Types of GPCR*	*Prediction of 3D structure from amino acid sequence*	*Isothermal Titration Calorimetry (ITC) Principle*	*SALSA algorithm*
	SLO-2	*hydrophobic collapse & theories of folding*	*Mechanism of activation of GPCR*	*Homology modelling and threading*	*Instrumentation of ITC*	*De novo algorithms*
S-9	SLO-1	*Levinthal paradox*	*Structural elucidation of Tyrosine kinase receptor*	*Enhancing binding affinity of T4 lysozyme*	*Determination enthalpy, entropy and free energy*	*Revision of entire units*
	SLO-2	*Role of chaperons and heat shock proteins*	*Interactions that activate Tyrosine kinase receptor*	*Enhancing stability in T4 lysozyme*	*Prediction of binding energy and multiple binding sites by ITC*	*Revision of entire units*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1:	*Know the importance of bio separation and its recovery economically*																		
CLR-2:	*Learn the separation of product from solid –liquid phase*																		
CLR-3:	*Know the techniques of isolation of bio-products*																		
CLR-4:	*Learn the methods of purification of products*																		
CLR-5:	*Learn the methods of polishing and formulation of products for packaging*																		
CLR-6:	*Familiarize with separation, isolation, purification, polishing and formulation techniques*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1:	*Categories the products into various sectors*	*H*	*80*	*70*	*H*	*H*	*H*	*H*	*L*				*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-2:	*Identify the unit operation for separation*	*H*	*90*	*80*	*H*	*H*	*H*	*H*	*L*				*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-3:	*Adapt the best methods of isolation of products*	*H*	*80*	*80*	*H*	*H*	*H*	*H*	*L*				*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-4:	*Identify the sophisticated equipment for purification*	*H*	*80*	*80*	*H*	*H*	*H*	*H*	*L*				*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-5:	*Know the polishing and formulation of the products*	*H*	*80*	*90*	*H*	*H*	*H*	*H*	*L*				*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-6:	*Acquired knowledge in down streaming of Biomaterials*	*H*	*90*	*90*	*H*	*H*	*H*	*H*	*L*				*H*	*H*	*H*	*H*	*H*	*H*	*H*

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to Bio- separation process*	*Solid –Liquid Separation*	*Isolation of products*	*Purification of products*	*Product Formulation*
	SLO-2	*Importance of bioseparation in biotechnological processes*	*Biomass and particulate debris separation techniques*	*Adsorption-Chemistry of adsorption*	*Diafiltration*	*Crystallization- Basic concepts*
S-2	SLO-1	*Problems and requirements of bio-product purification*	*Flocculation-Pretreatment of broth*	*Batch Adsorption*	*Electro dialysis*	*Crystallization principles*
	SLO-2	*Different sectors of products in biotechnology*	*The electric double layer*	*Problems*	*Isoelectric focusing*	*Batch crystallizers*
S-3	SLO-1	*Engineering analysis in Bio separation- Stages of Bio separation*	*Forces Between Particles and Flocculation by Electrolytes*	*Continuous stirred tank adsorption*	*Electrophoretic separation of protein*	*Continuous crystallizers*
	SLO-2	*Basic principles of Engineering analysis*	*The Schulze–Hardy Rule Flocculation Rate Polymeric Flocculants*	*Fixed bed adsorption*	*Solving Problems*	*Solving Problems*
S-4-5	SLO-1 SLO-2	*Lab1. Cell disruption by Sonication*	*Lab 4. Separation of cells by Flocculation*	*Lab 7. Extraction of protein by aqueous two phase extraction*	*Lab 10. Detection and Estimation of Ethanol by Gas Chromatography*	*Lab 13. Crystallization of bioproducts*
S-6	SLO-1	*Process and product quality*	*Sedimentation Principles*	*Extraction*	*Chromatography principles*	*Crystallizer design*
	SLO-2	*Criteria for process development*	*Sedimentation Methods and coefficients*	*Chemistry of Extraction*	*Instruments and practice*	*Scale-up*
S-7	SLO-1	*Process Economics and Cost analysis*	*Centrifugation*	*Batch Extraction*	*Normal phase chromatography*	*Drying- principles*
	SLO-2	*Solving Problems*	*Tubular centrifuge*	*staged Extraction*	*Reversed phase chromatography,*	*Adiabatic and Conduction drying*
S-8	SLO-1	*Chemical and application range of Bioproducts*	*Disk Centrifuge*	*Differential Extraction- aqueous two phase.*	*Ion exchange chromatography*	*Dryer description and operations-Vacuum shelf dryer*
	SLO-2	*Sectors of Products*	*Ultra Centrifuge*	*Three phase Extraction Super critical Extraction*	*Gel permeation chromatography*	*Batch Vacuum rotary dryer*
S 9-10	SLO-1 SLO-2	*Lab 2. Cell disruption by Enzymatic method*	*Lab 5. Cell separation by Batch Filtration*	*Lab 8. Protein separation by Ultra filtration*	*Lab 11. Protein separation by column chromatography*	*Lab 14. Freeze drying of Biomaterial*
S-11	SLO-1	*Cell disruption methods for intracellular products*	*Filtration*	*Precipitation*	*Bio affinity chromatography*	*Freeze dryer*

	SLO-2	*Physical Cell Disruption*	*Filter Media and Equipment's*	*Precipitation by salt, Non solvents and large scale precipitation*	*Hydrophobic interaction chromatography*	*Spray dryer*
S-12	SLO-1	*Chemical and Enzymatic cell disruption*	*Theory of filtration*	*Cross flow filtration*	*Chiral chromatography*	*Conduction drying*
	SLO-2	*Solving Problems*	*Batch Filtration*	*Micro and Ultra filtration*	*Analysis of purity*	*Problems*
S-13	SLO-1	*Mechanical Cell Disruption*	*Continuous Rotary filters*	*Design of Ultra filtration*	*Scale-up in chromatography*	*Adiabatic drying*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
S14-15	SLO-1 SLO-2	*Lab 3. Cell disruption by High pressure Homogenizer*	*Lab 6. Cell separation by Centrifugation*	*Lab 9. Protein Concentration by salting out method*	*Lab 12. Protein separation by Gel Electrophoresis*	*Lab 15. Drying of Bioproducts*

ACADEMIC CURRICULA

Professional Core Courses

CHEMICAL ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18CHC301T	Course Name	CHEMICAL ENGINEERING THERMODYNAMICS	Course Category	C	Professional Core	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the thermodynamics of mixtures and partial molar properties*
CLR-2 :	*acquire knowledge on fugacity and fugacity coefficient*
CLR-3 :	*Analyze the phase equilibrium for ideal and non-ideal mixtures*
CLR-4 :	*Acquire knowledge on fundamentals of reaction equilibrium and equilibrium constant*
CLR-5 :	*Expose to application of specific topics in phase and reaction equilibrium*
CLR-6 :	*Understand the phase and chemical reaction equilibrium*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*derive the partial molar properties in a mixture*	*1*	*80*	*70*	*H*	*H*											*H*	*L*	
CLO-2 :	*Estimate the fugacity and fugacity coefficient*	*2*	*80*	*70*		*H*	*H*										*H*	*H*	*L*
CLO-3 :	*Estimate the degrees of freedom and intensive variable for phase equilibrium*	*2*	*70*	*65*		*H*	*H*										*H*	*H*	
CLO-4 :	*To find the equilibrium rate constant in a chemical reaction*	*2*	*80*	*70*	*H*	*H*	*L*										*H*	*H*	
CLO-5 :	*Comprehend the phase equilibrium and multi-reaction equilibrium*	*2*	*70*	*65*	*H*	*H*		*L*									*M*	*L*	
CLO-6 :	*Comprehend the applications of phase and reaction equilibrium*	*2*	*75*	*65*	*H*	*H*	*H*	*L*									*H*	*M*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Review of fundamentals laws of thermodynamics and property relations.*	*Fugacity and Fugacity coefficient for pure species*	*Introduction to Phase Equilibrium*	*Introduction to Reaction Equilibrium*	*Reacting systems – Phase rule and Duhem's Theorem*
	SLO-2	*Review of fundamentals laws of thermodynamics and property relations.*	*Fugacity and Fugacity coefficient for pure species*	*Introduction to Phase Equilibrium*	*Introduction to Reaction Equilibrium*	*Reacting systems – Phase rule and Duhem's Theorem*
S-2	SLO-1	*Introduction to solution thermodynamics*	*Fugacity and Fugacity coefficient for species in solution*	*Duhem's Theorem*	*Reaction Coordinate*	*Multi reaction Equilibrium*
	SLO-2	*Introduction to solution thermodynamics*	*Fugacity and Fugacity coefficient for species in solution*	*Duhem's Theorem*	*Reaction Coordinate*	*Multi reaction Equilibrium*
S-3	SLO-1	*Partial molar properties – analytical and graphical*	*Fugacity coefficient correlations*	*VLE – qualitative behavior*	*Criteria for Reaction Equilibrium*	*Multi reaction Equilibrium*
	SLO-2	*Partial molar properties – analytical and graphical*	*Fugacity coefficient correlations*	*VLE – qualitative behavior*	*Criteria for Reaction Equilibrium*	*Multi reaction Equilibrium*
S-4	SLO-1	*Partial molar properties – analytical and graphical*	*Problem solving in fugacity evaluation*	*Simple models of Vapour Liquid Equilibrium*	*Standard Gibbs's Energy change and Equilibrium Constant*	*Applications of Phase Equilibrium*
	SLO-2	*Partial molar properties – analytical and graphical*	*Problem solving in fugacity evaluation*	*Simple models of Vapour Liquid Equilibrium*	*Standard Gibbs's Energy change and Equilibrium Constant*	*Applications of Phase Equilibrium*
S-5	SLO-1	*Problem solving in PMM*	*Ideal Solution Model*	*Problem solving on simple VLE*	*Effect of Temperature on Equilibrium Constant*	*Gamma/Phi formulation of VLE*
	SLO-2	*Problem solving in PMM*	*Ideal Solution Model*	*Problem solving on simple VLE*	*Effect of Temperature on Equilibrium Constant*	*Gamma/Phi formulation of VLE*
S-6	SLO-1	*Chemical potential and applications*	*Ideal Solution Model*	*Vapour Liquid Equilibrium with modified Raoult's Law*	*Evaluation of Equilibrium Constants*	*VLE from cubic equations of state*
	SLO-2	*Chemical potential and applications*	*Ideal Solution Model*	*Vapour Liquid Equilibrium with modified Raoult's Law*	*Evaluation of Equilibrium Constants*	*VLE from cubic equations of state*

S-7	SLO-1	*Ideal-gas mixture model*	*Lewis-Randall Rule*	*VLE from K-values*	*Equilibrium Conversions for single reactions*	*VLE from cubic equations of state*
	SLO-2	*Ideal-gas mixture model*	*Lewis-Randall Rule*	*VLE from K-values*	*Equilibrium Conversions for single reactions*	*VLE from cubic equations of state*
S-8	SLO-1	*Ideal-gas mixture model*	*Excess properties*	*Flash Calculations*	*Problem solving on reaction equilibrium*	*Equilibrium and Stability*
	SLO-2	*Ideal-gas mixture model*	*Excess properties*	*Flash Calculations*	*Problem solving on reaction equilibrium*	*Equilibrium and Stability*
S-9	SLO-1	*Problem solving with ideal gas mixture model*	*Excess Gibbs Energy and Activity coefficient*	*Problem solving*	*Problem solving on reaction equilibrium*	*Applications of Phase Equilibrium*
	SLO-2	*Problem solving with ideal gas mixture model*	*Excess Gibbs Energy and Activity coefficient*	*Problem solving*	*Problem solving on reaction equilibrium*	*Applications of Phase Equilibrium*

Course Code	18CHC302T	Course Name	CHEMICAL REACTION ENGINEERING	Course Category	C	Professional core	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the classifications and kinetics of chemical reactions*
CLR-2 :	*acquire knowledge on design aspects of ideal reactors*
CLR-3 :	*Comprehend size comparison of reactors for single reactions and apprehend performance of multiple reactor system*
CLR-4 :	*Familiarize product distribution and contacting patterns for multiple reactions*
CLR-5 :	*Expose to the concept of thermodynamic aspects of chemical reactions*
CLR-6 :	*understand the kinetics of chemical reaction, design aspects of reactors, multiple reaction kinetics and thermodynamics of reactions*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)
CLO-1 :	*derive the rate equations and calculating kinetic parameters for various types of reactions*	*1*	*80*	*70*
CLO-2 :	*derive performance equations and understand design aspects of ideal reactors*	*2*	*80*	*70*
CLO-3 :	*compare the performance of single reactors and understand multiple reactors system*	*2*	*70*	*65*
CLO-4 :	*identify the favorable conditions and suitable contacting patterns for multiple reactions*	*2*	*80*	*70*
CLO-5 :	*realize the effect of temperature and pressure on chemical reactions*	*2*	*70*	*65*
CLO-6 :	*calculate kinetic parameters, reactor design variables, multiple reactor performance, multiple reaction kinetics and thermodynamic parameters*	*2*	*80*	*70*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Classification of chemical reactions and variables affecting the reaction rate*	*Integrated rate expressions for first order reaction for varying volume systems*	*problems based on plug flow reactor*	*Problems based on reactors of different types in series*	*Favorable contacting patterns for irreversible reaction in series*
	SLO-2	*Rate equation, concentration and temperature dependency of rate equation*	*Integrated rate expressions for zero order reaction for varying volume systems*	*problems based on plug flow reactor*	*Concept of recycle ratio and its relation to flow conditions*	*Series reaction: Quantitative Treatment in Plug Flow or Batch Reactor; derivation of optimum time and maximum concentration of desired product*
S-2	SLO-1	*Concept of constant volume batch reactor and fractional conversion*	*Problems based on varying volume system*	*Relationship between Holding Time and Space Time for Flow Reactors*	*Derivation of performance equation for recycle reactor*	*Quantitative Treatment, Mixed Flow Reactor*
	SLO-2	*Analysis of total pressure data obtained in a constant-volume System*	*Problems based on varying volume system*	*Space time and space velocity calculations*	*Recycle reactor problems*	*Problems based on series reactions*
S-3	SLO-1	*Method of Analysis of kinetic data*	*General aspects of reactor design*	*necessity for size comparison of reactors*	*objectives for analyzing multiple reactions*	*Heats of Reaction from Thermodynamics*
	SLO-2	*Method of Analysis of kinetic data*	*Broad classification of reactor types and applications*	*Comparison of performance of single mixed flow and plug flow reactors for the n^{th} order reactions*	*Qualitative discussion about product distribution in parallel reactions*	*Relation between heats of reaction and temperature*
S-4	SLO-1	*Integrated rate expressions for first order, second order and zero order reactions*	*Characteristics of three types of ideal reactors*	*Plug flow reactors in series and parallel*	*Contacting patterns for parallel reactions in non continuous operations*	*Equilibrium constants from thermodynamics*
	SLO-2	*Integrated rate expressions for first order, second order and zero order reactions*	*Material balance equation for a system with reaction*	*problems based on PFR in series and parallel*	*Contacting patterns for parallel reactions in continuous flow operations*	*Effect of temperature on equilibrium conversion*
S-5	SLO-1	*Problems based on kinetic datas*	*Derivation of performance equation for batch reactor*	*quantitatively evaluating the behavior of a series of 'N' equal-size mixed flow reactors for first order reaction*	*Quantitative Treatment of Product Distribution in parallel reactions*	*Problems based on heat of reaction and equilibrium conversion*
	SLO-2	*Problems based on kinetic datas*	*problems based on batch reactor*	*Effect of number of reactors on the performance*	*Concept of fractional yield and selectivity for parallel reactions*	*Problems based on heat of reaction and equilibrium conversion*
S-6	SLO-1	*Rate expression for First-Order Reversible Reactions*	*problems based on batch reactor*	*Mixed Flow Reactors of Different Sizes in Series – procedure for finding the outlet composition*	*Problems based on parallel reactions*	*General graphical design procedure for reactors*

	SLO-2	*Rate expression for First-Order Reversible Reactions*	*Space time and space velocity concept*	*Problems based on MFR in series*	*Problems based on parallel reactions*	*Optimum Temperature Progression; Operating lines for minimum reactor size.*
S-7	SLO-1	*Empirical Rate Equations of n^{th} Order reactions and calculation of time of complete conversion*	*Derivation of performance equation for mixed flow reactor (MFR)*	*Problems based on MFR in series*	*Problems based on parallel reactions*	*Fractional conversion in adiabatic operations*
	SLO-2	*Empirical Rate Equations of n^{th} Order reactions and calculation of time of complete conversion*	*problems based on mixed flow reactor*	*Problems based on MFR in series*	*Problems based on parallel reactions*	*Fractional conversion in adiabatic operations*
S-8	SLO-1	*Determination of overall order of irreversible reactions from the half – life data*	*problems based on mixed flow reactor*	*Determining the Best System for a Given Conversion using Maximization of Rectangles principle*	*Irreversible first order reaction in series and its rate equation*	*Fractional conversion in Non - adiabatic operations*
	SLO-2	*Problems based on constant volume system*	*nature and conditions for plug flow*	*Reactors of Different Types in Series; Conditions for best arrangement of a Set of Ideal reactors*	*Qualitative Discussion About Product Distribution for series reaction*	*Graphical representation of energy balance equation for adiabatic operation*
S-9	SLO-1	*Problems based on constant volume system*	*Derivation of performance equation for plug flow reactor (PFR)*	*Problems based on reactors of different types in series*	*Qualitative Discussion About Product Distribution for series reaction*	*Problem based on kinetic data for reversible reaction*
	SLO-2	*Introduction to varying volume batch reactor and expansion factor calculation*	*problems based on plug flow reactor*	*Problems based on reactors of different types in series*	*rule governing favorable product distribution for reactions in series*	*Problem based on kinetic data for reversible reaction*

Course Code	18CHC303T	Course Name	MASS TRANSFER APPLICATIONS	Course Category	C	Professional Core	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Understand the basic principles of distillation, methods and types of distillation.*																		
CLR-2 :	*Gain knowledge on the design methods of distillation column.*																		
CLR-3 :	*Analyze the difference between liquid – liquid extraction and leaching.*																		
CLR-4 :	*Have an insight on mechanism of adsorption and crystallization.*																		
CLR-5 :	*Understand the difference between MF,UF,NF and RO.*																		
CLR-6:	*Gain knowledge on the mass transfer process principles*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Calculate product rates and composition based on batch and flash distillation.*	*2*	*80*	*75*	*H*	*H*	*H*	*H*									*H*	*H*	
CLO-2 :	*Apply McCabe Thiele method and determine number of stages in a distillation column.*	*2*	*80*	*75*	*H*	*H*	*H*	*H*									*H*	*H*	*M*
CLO-3 :	*Calculate percentage recovery of solute and number of stages for liquid – liquid extraction operation.*	*2*	*80*	*70*	*H*	*H*	*H*	*H*									*H*	*H*	
CLO-4 :	*Select adsorbents for appropriate applications.*	*2*	*80*	*75*	*H*	*H*	*H*	*H*									*H*	*H*	
CLO-5 :	*Analyze and apply appropriate membrane separation operation.*	*2*	*80*	*75*	*H*	*H*	*H*	*H*									*H*	*H*	
CLO-6:	*Express the knowledge of mass transfer and its applications*	*2*	*80*	*75*	*H*	*H*	*H*	*H*									*H*	*H*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Distillation*	*Design of distillation column - McCabe-Thiele method, Assumptions*	*Introduction to liquid – liquid extraction, General principles of extraction*	*Introduction to adsorption*	*Introduction to membrane separation processes*
	SLO-2	*Principle, Relative Volatility*	*Enriching section operating line*	*Choice of solvent*	*Characteristics of adsorbents*	
S-2	SLO-1	*Equilibrium Curve*	*Stripping section operating line*	*Working principle of extraction equipments: mixer-settlers*	*Commercial adsorbents, preparation*	*Classification of membrane separation processes*
	SLO-2	*Methods of Distillation: without reflux and with reflux, Types of distillation*	*q line*	*Packed tower extractors*	*Application, regeneration*	
S-3	SLO-1	*Flash Distillation*	*Feed conditions*	*Agitated tower extractors*	*Langmuir Adsorption isotherms*	*Membrane modules*
	SLO-2	*Equation of operating line*	*Condensor and reboiler duty*	*Pulsed column extractors.*	*Freundlich Adsorption isotherms*	
S-4	SLO-1	*Problem Solving*	*Reflux ratio, total reflux, minimum reflux and optimum reflux*	*Percentage extraction calculation for single stage operations when liquids are insoluble.*	*Fixed bed adsorbers.*	*Microfiltration and its applications*
	SLO-2	*Problem Solving*	*Fenske's equation*	*Percentage extraction calculation for multistage crosscurrent operations when liquids are insoluble.*		
S-5	SLO-1	*Simple batch Distillation*	*Problem Solving*	*Minimum solvent rate for counter current operations.*	*Introduction to crystallization*	*ultra filtration and its applications*
	SLO-2	*Rayleigh's equation*	*Problem Solving*	*Number of theoretical stages for continuous countercurrent, multistage extraction operation when liquids are insoluble.*	*Yield concept, methods of super saturation. Nucleation and Crystal growth.*	
S-6	SLO-1	*Problem Solving*	*Problem Solving*	*Problem Solving*	*Continuous vacuum crystallizer, construction, working and applications.*	*Nano filtration and its applications*
	SLO-2	*Problem Solving*	*Problem Solving*	*Problem Solving*		
S-7	SLO-1	*Steam Distillation*	*Introduction to Ponchon -Savarit method*	*Problem Solving*	*Draft tube-baffle crystallizer, construction, working and applications.*	*Osmosis – Reverse Osmosis and its applications*
	SLO-2	*Conditions, Applications*		*Problem Solving*		
S-8	SLO-1	*Vacuum Distillation*	*Azeotropic distillation*	*Problem Solving*	*Swenson-walker crystallizer, construction, working and applications.*	*Dialysis - Electro Dialysis and its applications*
	SLO-2	*Conditions, Applications*	*Selection of Entrainer and solvent*	*Problem Solving*		

S-9	SLO-1	*Continuous distillation*	*Extractive distillation*	*Introduction to Leaching, factors affecting leaching.*	*Material and Energy balance calculations in batch crystallizers*	*Ion Exchange principles, types and its applications*
	SLO-2	*Working of a continuous distillation column*	*Comparison of Azeotropic Distillation and Extractive Distillation*	*Bollman extractor*

Course Code	18CHC304T	Course Name	CHEMICAL PROCESS TECHNOLOGY	Course Category	C	Professional Course	L	T	P	C
							4	0	0	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide an overview of the essential features of chemical process industries*
CLR-2 :	*Expose the leaners to read and abstract the process flow diagrams*
CLR-3 :	*Enable the leaners to apply the concept of upstream and downstream processes associated in industrial production processes*
CLR-4 :	*Familiarize the sequence of unit operations and unit processes in converting a raw material into consumer products*
CLR-5 :	*Understand the various raw materials, processing methods and the applications of end products.*
CLR-6 :	*Outline the general principles applied in studying a chemical process industry in which the process industries start with an ore or other raw material and end up with a product of useful to consumers through series of chemical and physical changes*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Realize the role of chemical engineers in process industries*	*1*	*80*	*75*	*M*								*H*	*L*			*M*	*L*	*M*
CLO-2 :	*Represent the process of conversion of raw material into useful products through process flow diagram*	*2*	*80*	*70*	*H*											*H*	*H*	*L*	*M*
CLO-3 :	*Recognize the significance of unit operations and unit processes*	*1*	*80*	*75*	*H*	*L*	*L*										*L*	*L*	*L*
CLO-4 :	*Apply the general principles, read, analyze, abstract and draw the process flow diagrams*	*3*	*80*	*70*	*H*	*L*	*L*										*M*	*L*	*L*
CLO-5 :	*Understand the big picture of chemical industries and the operations carried out in it*	*1*	*80*	*75*	*H*								*H*				*H*	*L*	*M*
CLO-6 :	*Appreciate the importance of chemical engineers role in diverse chemical industries*	*1*	*80*	*75*	*M*	*L*	*L*						*H*	*M*		*L*	*H*	*L*	*M*

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Overview of chemical industry – Global and Indian Scenario*	*Overview of fertilizer manufacturing sectors in India*	*Introduction to natural products industries*	*Overview of the petroleum refineries and its products*	*Introduction to polymer industries*
	SLO-2	*Overview of chemical industry – Global and Indian Scenario*	*Overview of fertilizer manufacturing sectors in India*	*Edible and essential oils*	*Overview of the petroleum refineries and its products*	*Monomers and polymers*
S-2	SLO-1	*Description of block and process flow diagrams in chemicals production*	*Introduction to commercial methods available to produce ammonia and its applications*	*Process description of edible oil extraction*	*Flow sheet of refinery operations*	*Thermosetting and Thermoplastic polymers*
	SLO-2	*Description of block and process flow diagrams in chemicals production*	*Manufacture of synthetic ammonia*	*Process description for extraction and purification of edible oil*	*Pyrolysis, Cracking, Reforming*	*Thermosetting and Thermoplastic polymers*
S-3	SLO-1	*Unit operations involved in chemicals production*	*Nitric acid – commercial methods available to produce nitric acid and its applications*	*Process description for the hydrogenation of edible oil to produce vanaspathi*	*Overview of synthetic organic chemicals*	*Polymerization and various types of polymerization*
	SLO-2	*Unit processes involved in chemicals production*	*Manufacture of nitric acid*	*Process description for the hydrogenation of vegetable oil to produce vanaspathi*	*Overview of synthetic organic chemicals*	*Polymerization and various types of polymerization*
S-4	SLO-1	*Introduction to inorganic chemicals – Chlor-alkali industries*	*Urea - commercial methods available to produce urea and its applications*	*Outline of soaps, detergents and glycerin*	*Introduction to Methane and synthesis gas*	*Polymers and their engineering applications*
	SLO-2	*Applications of different products from Chlor- alkali industries*	*Manufacture of urea*	*Manufacture of soaps and glycerin*	*Steam reforming for synthesis gas*	*Polymers and their engineering applications*
S-5	SLO-1	*Different processes involved in the manufacture of soda ash*	*Overview of phosphorus industries*	*Short notes on detergents*	*Manufacture of Ethylene, acetylene and propylene*	*Polyethylene and its uses*
	SLO-2	*Manufacture of soda ash by Solvay process*	*Phosphate rock and the products from phosphate rock*	*Summary of edible oil, soaps, and detergents*	*Properties and end uses of*	*Manufacture of polyethylene*
S-6	SLO-1	*Processes involved in the manufacturechlorine and caustic soda*	*Manufacture of ammonium phosphate*	*Introduction to pulp and paper industries*	*Manufacture of aromatic compounds BTX*	*Polypropylene and its applications*
	SLO-2	*Manufacture of Chlorine and caustic soda by electrolysis process*	*End uses of ammonium phosphates*	*Introduction to pulp and paper industries*	*Overview of the BTX and their applications*	*Manufacture of polypropylene*

S-7	SLO-1	Mining of sulfur: Frasch Process	Manufacture of diammonium phosphate	Preparation of wood pulp by sulfate (kraft) process	Production of aromatic chemicals - Benzene, toluene, xylene.	Manufacture of Phenol Formaldehyde
	SLO-2	Applications of Sulfur	End uses of diammonium phosphates	Manufacture of Pulp and Paper from Kraft process	Production of aromatic chemicals - Benzene, toluene, xylene.	Overview of polyamides and polyesters
S-8	SLO-1	Introduction to sulfuric acid	Superphosphate and its applications	Chemical recovery from black liquor	Overview of synthetic, intermediate and end chemicals	Manufacture of Polyamides (Nylon 66)
	SLO-2	Various processes involved in sulfuric acid production	Manufacture of Super phosphate	Paper formation in Paper machine section of pulp and paper industry	Overview of synthetic, intermediate and end chemicals	Uses of Nylon 66
S-9	SLO-1	Manufacture of sulfuric acid	Triple super phosphate and its applications	Summary of pulp and paper production	Methanol and its uses	Manufacture of Polyester
	SLO-2	Manufacture of sulfuric acid	Manufacture of Triple super phosphate	Summary of pulp and paper production	Manufacture of Methanol	Uses of polyester
S-10	SLO-1	Introduction to silicate industries	Introduction to Potassium chloride industries	Overview of sugar production	Manufacture of Formaldehyde	Manufacture of Viscose rayon
	SLO-2	Ceramics and Glass products from silicate industries	Introduction to Potassium chloride industries	Manufacture of sugar from cane sugar	Formaldehyde and its uses	End uses of viscose rayon
S-11	SLO-1	Overview of cement and cement industries	Potassium chloride and its uses	Maize and its application	Ethylene dichloride and its applications	About natural and synthetic rubber
	SLO-2	Ore beneficiation for cement industries	Manufacture of potassium chloride	Manufacture of maize	Manufacture of ethylene dichloride	Processes for the production of SBR
S-12	SLO-1	Manufacture of Portland cement	Potassium sulphate and its uses	Summary of edible oil, soaps, pulp and paper and	Manufacture of vinyl chloride	Summary of all the manufacturing processes studied in the course
	SLO-2	Manufacture of Portland cement	Manufacture of potassium chloride	Summary of edible oil, soaps, pulp and paper and	Applications of vinyl chloride	Summary of all the manufacturing processes studied in the course

Course Code	18CHC305L	Course Name	CHEMICAL ENGINEERING LAB II	Course Category	C	Professional Core	L	T	P	C
							0	0	4	2

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Heat and mass transfer data book		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide the students the first hand experience of verifying various theoretical concepts learnt in heat and mass transfer. To Understand heat transfer mechanism, and determine thermal conductivity.*
CLR-2 :	*Determine the heat transfer coefficient in natural and forced convection. Design the double pipe and shell and tube heat exchanger. Determine the effectiveness of the heat exchanger.*
CLR-3 :	*Determine the Stefan-Boltzmann law constant and emissivity of a real surface (gray surface).*
CLR-4 :	*Verify the Rayleigh's equation in simple bath distillation. Determine the vapour efficiency for steam distillation. Determine the VLE data*
CLR-5 :	*Study the drying characteristics. Determine the recovery of solute by simple leaching process. Verify the Freundlich Adsorption isotherm.*
CLR-6 :	*Understand the Equilateral triangular diagram for three component system.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Determine thermal conductivity of a material.*	2	80	75	H	H	M	M									H	H	L
CLO-2 :	*Determine the heat transfer coefficient for natural and forced convection. Determine the effectiveness of a heat exchanger*	2	80	75	H	H	M	M									H	H	L
CLO-3 :	*Determine the Stefan-Boltzmann law constant and emissivity*	2	80	75	H	H	M	M									H	H	L
CLO-4 :	*Verify the Rayleigh's equation. Determine the vapour efficiency*	2	80	75	H	H	M	M									H	H	L
CLO-5 :	*Determine the recovery of solute by leaching. Verify the adsorption isotherm*	2	80	75	H	H	M	M									H	H	L
CLO-6 :	*Draw the equilateral triangular diagram for three component system.*	2	80	75	H	H	M	M									H	H	L

Duration (hour)		12	12	12	12	12
S 1-4	SLO-1	*Introduction to all the experiments*	*Heat transfer by natural convection*	*Determination of emissivity*	*Drying characteristics*	*Verification of Freundlich Adsorption isotherm*
	SLO-2					
S 5-8	SLO-1	*Heat transfer through Composite lagged pipe*	*Shell and tube heat exchanger*	*Stefan-Boltzmann apparatus*	*Estimation of percentage recovery of solute for single stage leaching*	*Phase diagram for three component system*
	SLO-2					
S 9-12	SLO-1	*Heat transfer by forced convection*	*Parallel flow and counter current flow Heat exchanger*	*Verification of Rayleigh equation for simple batch distillation*	*Estimation of percentage recovery of solute for multi stage leaching*	*Determination of vapor efficiency for simple steam distillation*
	SLO-2

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the chemical and physical transport processes and their mechanism.*
CLR-2 :	*Familiarize various aspects of velocity, temperature and a concentration distribution in laminar and turbulent flow.*
CLR-3 :	*To do heat, mass and momentum transfer analysis.*
CLR-4 :	*Analyze industrial problems along with appropriate approximations and boundary conditions.*
CLR-5 :	*Formulate the differential forms of the equations of change for momentum, heat and mass transfer problems for steady-state flows.*
CLR-6 :	*Understand the conservation equations and its application for any process*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Identify and describe mechanisms of transport phenomena in laminar flow systems.*	2	85	75	H			H									H	M	M
CLO-2 :	*Make appropriate connections between the equations of change and physical phenomena in given systems involving momentum.*	2	80	75	H	M		H									H	M	M
CLO-3 :	*Ability to analyze velocity distributions in turbulent flow and industrial problems along with appropriate approximations.*	2	85	75	H	M	M	H	M								H		
CLO-4 :	*Formulate and solve differential equations of heat transfer to calculate temperature distributions.*	2	85	80	H	M	M	H	M								H	M	L
CLO-5 :	*Formulate and solve differential equations of mass transfer to calculate concentration distributions.*	2	85	80	H	M	M	H	M								H	M	M
CLO-6 :	*Apply the conservation equation for the micro and macro systems*	3	80	70	H	M	M	H	M								H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Velocity distribution in laminar flow*	*Equation of change for isothermal process*	*Velocity distribution in turbulent flow*	*Thermal conductivity and the mechanisms of energy transport*	*Diffusivity and the Mechanisms of Mass Transport*
	SLO-2	*Introduction - Generalization of Newton's Law of Viscosity*	*Equation of change for isothermal process*	*Interphase transport in isothermal systems*	*Temperature and pressure dependence of thermal conductivity*	*Fick's law of binary diffusion (Molecular Mass Transport)*
S-2	SLO-1	*Pressure and temperature dependence of viscosity.*	*The equation of continuity*	*Comparisons of laminar and turbulent flows*	*Shell energy balances and temperature distributions in Solids and laminar flow, boundary conditions*	*Temperature and pressure dependence of diffusivities*
	SLO-2	*Shell momentum balances, boundary conditions, introduction to vector analysis*	*The equation of continuity*	*Comparisons of laminar and turbulent flows*	*Shell energy balances and temperature distributions in Solids and laminar flow, boundary conditions*	*Concentration distributions in solids and in laminar flow, boundary conditions*
S-3	SLO-1	*Shell momentum balances and velocity distributions: flow of a falling film.*	*The equation of motion: Eulers equation*	*Time-smoothed equations of continuity for incompressible fluids*	*Heat conduction with an electrical heat source*	*Diffusion through a stagnant gas film*
	SLO-2	*Shell momentum balances and velocity distributions: flow of a falling film.*	*The equation of motion: Eulers equation*	*Time-smoothed equations of continuity for incompressible fluids*	*Heat conduction with an electrical heat source*	*Diffusion through a stagnant gas film*
S-4	SLO-1	*Shell momentum balances and velocity distributions: flow through a circular tube*	*The equations of change in terms of the substantial derivative : Navier Stokes equation*	*Time-smoothed equations of motion for incompressible fluids*	*Heat conduction through composite plane wall*	*Diffusion with a homogeneous chemical reaction*
	SLO-2	*Shell momentum balances and velocity distributions: flow through a circular tube*	*The equations of change in terms of the substantialderivative : Navier Stokes equation*	*Time-smoothed equations of motion for incompressible fluids*	*Heat conduction through composite plane wall*	*Diffusion with a homogeneous chemical reaction*
S-5	SLO-1	*Shell momentum balances and velocity distributions: flow through an annulus*	*Applications of equation of motion*	*Empirical expressions for the turbulent momentum flux*	*Heat conduction through composite cylindrical wall*	*Diffusion and chemical reaction inside a porous catalyst*
	SLO-2	*Shell momentum balances and velocity distributions: flow through an annulus*	*Applications of equation of motion*	*Empirical expressions for the turbulent momentum flux*	*Heat conduction through composite cylindrical wall*	*Diffusion and chemical reaction inside a porous catalyst*

S-6	SLO-1	*Shell momentum balances and velocity distributions: flow of two adjacent immiscible fluids*	*Applications of equation of motion*	*Universal velocity profile for turbulent flow in a tube*	*Heat conduction in a cooling fin*	*Equations of change for multicomponent systems*
	SLO-2	*Shell momentum balances and velocity distributions: flow of two adjacent immiscible fluids*	*Applications of equation of motion*	*Universal velocity profile for turbulent flow in a tube*	*Heat conduction in a cooling fin*	*Equations of change for multicomponent systems*
S-7	SLO-1	*Shell momentum balances and velocity distributions: flow in a narrow slit*	*Solving problem*	*Definition of friction factors*	*The equations of change for non-isothermal systems*	*Analogies between momentum, heat and mass transport*
	SLO-2	*Shell momentum balances and velocity distributions: flow in a narrow slit*	*Solving problem*	*Friction factors for flow in tubes*	*The equations of change for non-isothermal systems*	*Analogies between momentum, heat and mass transport*
S-8	SLO-1	*Solving problem*	*Solving problem*	*Friction factors for flow around spheres*	*Steady state heat conduction problem*	*Solving problem*
	SLO-2	*Solving problem*	*Solving problem*	*Friction factors for flow in a narrow slit*	*Steady state heat conduction problem*	*Solving problem*
S-9	SLO-1	*Solving problem*	*Dimensional analysis of the equations of change*	*Friction factors for packed columns*	*Solving problem*	*Solving problem*
	SLO-2	*Solving problem*	*Dimensional analysis of the equations of change*	*Solving problem*	*Solving problem*	*Solving problem*

Course Code	18CHC307T	Course Name	REACTOR ANALYSIS AND CATALYSIS	Course Category	C	Professional Core	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basics of non ideal flow in reactors*
CLR-2 :	*acquire knowledge on mechanism and rate of solid catalyzed reactions*
CLR-3 :	*assimilate the basics of kinetics of fluid – particle reactions*
CLR-4 :	*Familiarize design aspects of reactors for fluid – particle reactions*
CLR-5 :	*Expose to the catalyst preparation method, properties of catalyst and its determination*
CLR-6:	*understand the performance of non ideal reactor, rate of catalyzed reactions, kinetics of fluid – particle reactions, reactor design and estimation of catalyst properties*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*explain the reasons and calculate extent of deviation from ideal flow behavior*	*1*	*80*	*70*	*H*	*H*											*H*	*L*	
CLO-2 :	*Understand mechanism and derive rate equation for catalytic reactions*	*2*	*80*	*70*	*H*	*H*	*H*										*H*	*H*	
CLO-3 :	*describe models and rate controlling mechanism for fluid – particle reactions*	*2*	*80*	*70*	*H*	*H*	*H*										*H*	*H*	
CLO-4 :	*appreciate designing of heterogeneous non – catalytic reactors*	*3*	*80*	*70*	*H*	*H*	*L*										*H*	*H*	*L*
CLO-5 :	*determine catalyst properties and explain preparation techniques*	*3*	*80*	*70*	*H*	*H*		*L*									*M*	*L*	
CLO-6 :	*calculate conversion in real reactor, rate of solid catalyzed reaction, kinetics of fluid – particle reactions, reactor design variables and properties of catalyst*	*2*	*80*	*70*	*H*	*H*		*L*									*H*	*M*	*L*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Reasons for deviation from ideal flow*	*Problems based on tanks – in – series model*	*Problems based on catalytic reactors*	*Problems based on fluid – particle reaction kinetics*	*Concept of instantaneous reactions – favorable contacting patterns*
	SLO-2	*Residence time distribution (RTD): basics and reasons*	*Problems based on tanks – in – series model*	*Problems based on catalytic reactors*	*Problems based on fluid – particle reaction kinetics*	*Concept of instantaneous reactions – favorable contacting patterns*
S-2	SLO-1	*E curve – methods for finding 'E'*	*characteristics of catalyst and mechanism for the action of a catalyst*	*Importance of fluid – particle reactions*	*factors control the design of a fluid-solid reactor*	*Pertinent properties for a catalyst particle ; General characteristics of catalysis*
	SLO-2	*Concept of tracer and types of input*	*spectrum of kinetic regimes*	*behavior of reacting solid particles*	*types of contacting ingas-solid operations*	*Pertinent properties for a catalyst particle ; General characteristics of catalysis*
S-3	SLO-1	*The pulse experiment*	*Steps in a catalytic reaction*	*Models for fluid – particle reactions*	*Fraction of solid reactant unconverted for mixture of particles of different but unchanging sizes following Plug Flow pattern*	*Determination of surface area by gas adsorption method*
	SLO-2	*The step experiment; concept of F curve*	*Factors affecting rate of each step*	*Steps in shrinking core model for unchanging size spherical particles*	*problems based on plug flow of different size solids*	
S-4	SLO-1	*Conversion in non – ideal flow reactors*	*Rate equation for surface kinetics – single site and dual site mechanism*	*Derivation of rate equation for spherical particles of unchanging size if diffusion through gas film controls*	*Derivation for fraction unconverted for Mixed Flow of Particles of a Single Unchanging Size if gas film resistance is rate controlling*	*problems based on surface area determination*
	SLO-2	*problems based on tracer study data's: development of E curve and calculation of mean time of distribution*				*problems based on surface area determination*
S-5	SLO-1	*problems based on conversion in non – ideal reactors*	*Derivation of reactant concentration for pore diffusion resistance combined with surface kinetics*	*Derivation of rate equation for spherical particles of unchanging size if diffusion through ash layer controls*	*Expression for fraction unconverted for Mixed Flow of Particles of a Single Unchanging Size if surface reaction and ash layer diffusion controls*	*Pore volume distribution by gas desorption method*
	SLO-2	*E curve for ideal PFR and MFR*				*Pore volume distribution by mercury penetration method*
S-6	SLO-1	*Models for non – ideal reactors: dispersion model concepts*	*Effectiveness factor, Thiele modulus and Wagner modulus*		*Derivation for fraction unconverted for mixed flow of a size mixture of particles of*	

	SLO-2		*Derivation of Effectiveness factor for a first order reaction*	*Derivation of rate equation for spherical particles of unchanging size if surface chemical reaction is rate controlling*	*unchanging size if gas film diffusion controls*	*void volume and solid density determination; problems based on void volume and solid density*
S-7	SLO-1	*Parameter estimation using dispersion model*	*Performance equation for plug flow reactor containing porous catalyst particles*	*Problems based on shrinking core model*	*Expression for fraction unconverted for mixed flow of a size mixture of particles of unchanging size if surface chemical reaction and ash diffusion controls*	*Classification of catalysts; Promoters, inhibitors and accelerators*
	SLO-2		*Performance equation for mixed flow reactor containing porous catalyst particles*			
S-8	SLO-1	*Problems based on dispersion model*	*Experimental methods for finding rates of catalytic reactions*	*Reactions involving shrinking spherical particles: factors affecting rate and steps involved*	*Problems based on conversion of a single – sized feed in a mixed flow reactor*	*Catalyst preparation methods*
	SLO-2	*Problems based on dispersion model*	*Experimental methods for finding rates of catalytic reactions*	*Development of rate equation if chemical reaction controls the overall rate*	*Problems based on conversion of a feed mixture in a mixed flow reactor*	
S-9	SLO-1	*Derivation of RTD function equation (E) by tanks – in – series model*	*Problems based on finding the rate of catalytic reactions*	*Derivation of rate equation for shrinking spherical particles if diffusion through gas film controls*	*Problems based on finding the size of a fluidized bed and fluid – particle reactors*	*Types of catalyst poisons*
	SLO-2	*Derivation of RTD function equation (E) by tanks – in – series model*	*Problems based on finding the rate of catalytic reactions*	*Derivation of rate equation for shrinking spherical particles if diffusion through gas film controls*	*Problems based on finding the size of a fluidized bed and fluid – particle reactors*	*Types of catalyst poisons*

Course Code	18CHC308T	Course Name	PROCESS DYNAMICS, CONTROL AND INSTRUMENTATION	Course Category	C	PROFESSIONAL CORE	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the importance of process control in industrial process plants.*
CLR-2 :	*Understand the use of block diagrams & the mathematical basis for the design and stability of control systems*
CLR-3 :	*Understand the application of good instrumentation for the effective design of process control loops for process engineering plants.*
CLR-4 :	*Draw a Process & Instrumentation Diagram and devise simple but effective plant wide control strategies using appropriate methods.*
CLR-5 :	*Design and tune process controllers and specify the required final elements to ensure that well-tuned control is achieved.*
CLR-6 :	*Understand the process dynamics and control in process industries*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Use Laplace method to obtain transfer functions related to the first and higher order system.*	2	85	75	H	H											H	M	
CLO-2 :	*Define linear closed loop control system, controllers, final control elements and use them in the problem solving.*	2	80	70	H	H											H	M	
CLO-3 :	*Analyze stability of open- and closed-loop control systems.*	2	85	80	H	M	M		M								H	M	
CLO-4 :	*Identify possible control schemes in chemical Engineering plants.*	2	90	85			M		M								H	M	M
CLO-5 :	*Understand the instrumentation and automation of modern chemical operation.*	2	80	75				M									H	M	H
CLO-6 :	*Apply and evaluate the various control schemes and systems*	2	75	65	H	M	H	M	L								H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic Concepts of process control, Block diagram*	*Linear closed loop systems*	*Concept of stability*	*Control system with single loops*	*Principles of measurements*
	SLO-2	*Linear open loop systems*	*Controllers and final control element*	*Stability criterion*	*Feedback control systems with examples*	*Classification of process control instruments*
S-2	SLO-1	*Laplace transform of simple functions*	*Principles of pneumatic and electronic controllers*	*Stability for linear system: Routh-Hurwitz stability criterion*	*Control systems with multiple loops*	*Elements of instruments*
	SLO-2	*Laplace transform of derivatives*	*Transfer function of controllers*	*Stability for linear system: Routh-Hurwitz stability criterion*	*Cascade control scheme with example*	*Parts of instruments*
S-3	SLO-1	*Properties of Laplace transform*	*Dynamic behavior of controllers*	*Solving Problem*	*Selective control systems*	*Static characteristics*
	SLO-2	*Physical examples of first-order systems*	*Closed loop response*	*Solving Problem*	*Override control*	*dynamic characteristics*
S-4	SLO-1	*Transfer function approach*	*Servo problem*	*Root locus diagrams*	*Auctioneering Control*	*Temperature measuring instruments*
	SLO-2	*Linearization of nonlinear system*	*Solving Problem*	*Root locus diagrams*	*Split-range control with examples*	*Temperature measuring instruments*
S-5	SLO-1	*Solving Problem*	*Solving Problem*	*Solving Problem*	*Feedforward control scheme with examples*	*Liquid-level measuring instruments*
	SLO-2	*Solving Problem*	*Solving Problem*	*Solving Problem*	*Control of distillation column: control of composition*	*Liquid-level measuring instruments*
S-6	SLO-1	*Response of first-order systems*	*Solving Problem*	*Design of control system using frequency response: Bode diagram-stability criterion*	*Control of distillation column: control of pressure*	*Pressure measuring instruments*
	SLO-2	*Response of first- order systems in series*	*Regulatory problem*		*Introduction to digital control*	*Pressure measuring instruments*
S-7	SLO-1	*Solving Problem*	*Solving Problem*	*phase and gain margins*	*Microprocessor-based controllers*	*Composition measuring instruments*
	SLO-2	*Solving Problem*	*Solving Problem*	*Solving Problem*	*Hardware Components*	*Composition measuring instruments*
S-8	SLO-1	*Higher order systems: Second-order*	*Solving Problem*	*Solving*	*Tasks of a Microprocessor based controller*	*Measurements of viscosity*

	SLO-2	*Transportation lag*	*Solving Problem*	*Solving*	*Special features of Microprocessor based controller*	*Measurements of pH*
S-9	SLO-1	*Solving Problem*	*Mechanism of control valves*	*Ziegler Nichols controller settings*	*Introduction to PLC's*	*Measurements of thermal conductivity*
	SLO-2	*Solving Problem*	*Valve characteristics*	*Solving Problem*	*Introduction to DCS*	*Measurements of humidity of gases*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide the firsthand experience on verifying various theoretical concepts learnt in CRE and Process control.*
CLR-2 :	*Develop the skills in conducting experiments and to verify the theoretical concepts learnt in Chemical Reaction Engineering and Reactor analysis & catalysis courses.*
CLR-3 :	*Evaluate the performance of single and multiple reactors*
CLR-4 :	*Develop the skills in conducting experiments and to verify the theoretical concepts learnt in .process dynamics, control & instrumentation course.*
CLR-5 :	*Understand the flapper- nozzle system and valve characteristics used for control system*
CLR-6 :	*Understand the characteristics of different mode of controllers P,PI,PD,PID, and tuning process*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)
CLO-1 :	*Operate batch and continuous reactors.*	*2*	*80*	*75*
CLO-2 :	*Understand the performance of combined reactor system.*	*2*	*80*	*75*
CLO-3 :	*Understand the non-ideality behavior of the continuous reactors.*	*2*	*80*	*75*
CLO-4 :	*Understand process control concepts while performing the experiments*	*2*	*80*	*75*
CLO-5 :	*study the response of different forcing functions*	*2*	*80*	*75*
CLO-6 :	*Determine the controller tuning parameters*	*2*	*80*	*75*

Course Code	18CHC401J	Course Name	PROCESS EQUIPMENT DESIGN AND DRAWING	Course Category	C	Professional Course	L	T	P	C
							2	0	2	3

Pre-requisite Courses	18CHC207T 18CHC303T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Perry's Chemical Engineers Hand Book		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLR-1 :	*Outline the importance of drawing conventions and representation of equipment's through process flow sheeting, dimensioning and labeling the parts of equipment's*																		
CLR-2 :	*Provide the basics of proportioning, various types of selection of enclosures, flanges, nozzles and supports for process vessels*																		
CLR-3 :	*Recap the unit operations and unit process equipment's and the theoretical design and drawing of reaction/agitated vessels, basket centrifuge, gravity thickener and cyclone separator*																		
CLR-4 :	*Outline the principles of heat transfer and theoretical design and drawing of heat transfer equipment's such as shell and tube heat exchanger, evaporator and crystallizer*																		
CLR-5 :	*Overview of the principles of mass transfer process and theoretical design and drawing of distillation column, absorption column and rotary drier*																		
CLR-6 :	*consolidate the fundamental concepts and theoretical relationships useful in theoretical design and drawing of process equipment applied to chemical process industries*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*																		
CLO-1 :	*Draw the simple process flow sheets and use appropriate dimensioning and labeling the parts of equipment's*	*1*	*80*	*75*	*H*	*M*	*M*	*L*					*M*	*M*		*L*	*H*	*L*	*L*
CLO-2 :	*Choose appropriate enclosures, flanges, nozzles and supports for process vessels*	*2*	*80*	*70*	*H*	*M*	*M*	*M*					*M*	*M*		*H*	*H*	*M*	
CLO-3 :	*Perform the theoretical design and drawing of reaction/agitated vessels, basket centrifuge, gravity thickener and cyclone separator*	*3*	*80*	*75*	*H*	*H*	*M*	*M*					*M*	*M*		*H*	*H*	*M*	
CLO-4 :	*Analyze and theoretically design and draw the heat transfer equipment's such as shell and tube heat exchanger, evaporator and crystallizer*	*3*	*80*	*70*	*H*	*H*	*M*	*M*					*M*	*M*		*H*	*H*	*M*	
CLO-5 :	*Relate the principles of mass transfer and theoretically design and draw the distillation column, absorption column and rotary drier*	*3*	*80*	*75*	*H*	*H*	*M*	*M*					*M*	*M*		*H*	*H*	*M*	
CLO-6 :	*Apply the integrated knowledge acquired in different core chemical engineering courses to theoretically design and draw the chemical process equipment*	*3*	*80*	*75*	*H*	*H*	*M*	*M*					*M*	*M*		*H*	*H*	*M*	

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Drawing conventions, equipment representation dimensioning and labeling the parts*	*Classification of enclosures (heads or cover) used for the pressure vessels*	*Overview of reaction/agitated vessels*	*Drawing of gravity thickener*	*Practice drawing session of single effect evaporator evaporators and crystallizers*
	SLO-2	*Illustrative examples of Drawing conventions*		*Introduction, classification and design consideration of reaction vessel.*		
S-2	SLO-1	*Process flow sheeting*	*Numerical Problem on various types of enclosures*	*Numerical problem on the design of reaction/agitated vessel*	*Practice session for reaction/agitated vessel*	*Theory of crystallizers –Types and their applications.*
	SLO-2	*Illustrative example*				*Numerical problem on the design of crystallizers*
S-3	SLO-1	*General design procedure, materials of construction and design considerations*	*Specification for various types of enclosures*	*Drawing of reaction/agitated vessel*	*Practice session for basket centrifuge*	*Practice drawing session of crystallizers*
	SLO-2					
S-4	SLO-1	*Pressure vessels - classification, applications and design considerations*	*Drawing of various enclosures (heads or covers) used for the process vessels.*	*Introduction to basket centrifuge*	*Practice drawing session for gravity thickener*	*Overview of distillation column, absorption column and rotary drier*
	SLO-2	*Factors influencing the design of vessels, design pressure, design temperature, factor safety and welding joint efficiency*				*Theory and design aspects of distillation column*
S-5	SLO-1				*Outline of Heat exchangers*	

	SLO-2	*Numerical problem on design of pressure vessel subjected to internal pressure*	*Introduction to flanges, nozzles and supports*	*Numerical problem on the design of basket centrifuge*		*Numerical problem on the design of distillation for binary system*
S-6	SLO-1	*Numerical problem on design of pressure vessel subjected to external pressure*	*Selection criteria for flanges, nozzles and supports*	*Drawing of basket centrifuge*	*Principles of heat transfer types of heat exchangers and design procedure for 1-2 shell and tube heat exchanger*	*Drawing and practice session of distillation columnfor binary system*
	SLO-2		*Numerical problem on flanges, nozzles and supports.*	*Drawing of basket centrifuge separator*		
S-7	SLO-1	*Practice session on drawing of pressure vessel subjected to internal pressure*	*Drawing of Flanges, and nozzles*	*Introduction to gravity thickener*	*Numerical problem on design of shell and tube heat exchanger*	*Theory and design aspects of absorption column*
	SLO-2		*Drawing of supports*			
S-8	SLO-1	*Practice session on drawing of pressure vessel subjected to external pressure*	*Practice session on drawing of enclosures (heads or cover)s used for the process vessels*	*Numerical problem on the design of gravity thickener*	*Drawing of 1-2 shell and tube heat exchanger*	*Numericalproblem on the design of absorption column*
	SLO-2					
S-9	SLO-1	*Summary of pressure vessel design*	*Practice session on drawing of flanges and nozzles*	*Practice drawing session of gravity thickener*	*Practice drawing session of 1-2 shell and tube heat exchanger*	*Drawing of absorption column*
	SLO-2					
S-10	SLO-1	*Introduction to various types of enclosures, flanges, nozzles and supports*	*Practice session on drawing of supports*	*Theory on design of cyclone separator*	*Theory of Evaporators – Types and their applications*	*Practice drawing session of absorber*
	SLO-2					
S-11	SLO-1	*Enclosures and their applications with Illustrative examples*	*Practice session on drawing of flanges, nozzles and supports for pressure vessel subjected to internal pressure*	*Numerical problem on the design of gravity thickener*	*Numerical problem on design of single effect evaporator*	*Theory and design aspects of rotary drier*
	SLO-2					*Numerical problem on the design of rotary drier*
S-12	SLO-1	*Classification of enclosures (heads or cover) used for the pressure vessels*	*Summary of enclosures, flanges, nozzles and supports for pressure vessel subjected to internal pressure*	*Drawingof gravity thickener*	*Drawing of single effectevaporator*	*Drawing and Practice drawing session of rotary dryer*
	SLO-2

Course Code	18CHC402T	Course Name	PROCESS ECONOMICS AND PROJECT MANAGEMENT	Course Category	C	Professional Core	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Present the fundamental concepts of time value of money*
CLR-2 :	*Provide the essential features of balance sheet and profit-loss statements applied to a typical process industry*
CLR-3 :	*Impart knowledge on the basics of selection of alternatives in process plants using theoretical economic equations*
CLR-4 :	*Explain concepts of the economic balance applied the cyclic process in the manufacture of chemicals in match mode*
CLR-5 :	*Illustrate the role played by the process engineers in chemical engineering project management*
CLR-6 :	*Present the basic theoretical process engineering economic principles, elementary accounting procedures and project management as applied in chemical process industries*

Course Learning Outcomes (CLO): *At the end of this course, learners will be able to:*		Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Apply the concept of time value of money to solve process economic problems*	*2*	*80*	*75*	*M*	*H*							*M*			*M*	*H*	*H*	*H*
CLO-2 :	*Interpret and explain the balance sheet and profit-loss statement for a typical chemical process industry*	*1*	*80*	*70*	*L*	*M*							*M*		*L*	*M*	*H*	*L*	*M*
CLO-3 :	*Analyze the chemical engineering processes and illustrate the economic principles used in it towards the economic selection of alternatives*	*2*	*80*	*70*	*H*	*H*	*M*						*L*		*L*	*M*	*H*	*H*	*H*
CLO-4 :	*Perform economic balance calculations for batch (or cyclic) processes*	*2*	*75*	*70*	*H*	*H*	*M*						*M*				*H*	*H*	*M*
CLO-5 :	*Explain the importance of project management applied to chemical engineering projects*	*1*	*80*	*75*	*M*	*M*							*H*	*M*	*H*	*M*	*H*	*M*	*M*
CLO-6 :	*Apply the knowledge of economics and management principles, methods and illustrate their applications to chemical engineering*	*2*	*80*	*70*	*M*	*M*							*H*	*M*	*H*	*M*	*H*	*H*	*H*

Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction to time value of money*	*Overview of Balance sheet and cost accounting*	*Economics of selecting alternative*	*Economic balance*	*Project management for chemical engineers*
	SLO-2	*Terminologies used in time value of money and illustrative examples*	*Capital requirements for process plants*	*Various methods in economics of selecting alternatives*	*Illustrative examples of Economic balance applied to process industries*	*Importance of management in practice for chemical engineers*
S-2	SLO-1	*Simple and compound Interest theory and illustrative examples*	*Cost index problems for equipment's and plants*	*Annual cost method and Illustrative example*	*Problem session in single variable economic balance*	*Project, principles and initiation*
	SLO-2	*Nominal and effective interest rates theory and illustrative examples*	*Illustrative example of cost index problems*	*Illustrative example of annual cost method*	*Problem session in single variable economic balance*	*Project strategy and organization*
S-3	SLO-1	*Practice problem session in time value of money*	*Conceptual basis for Balance sheet*	*Practice problem session in annual cost method*	*Problem session in multi variable economic balance*	*Process specification*
	SLO-2	*Practice problem session in various interest rates*	*Illustrative example of preparation of Balance sheet*	*Practice problem session in annual cost method*	*Problem session in multi variable economic balance*	*Process Specification-illustrative example*
S-4	SLO-1	*The concept of equivalence and illustrative examples*	*Practice problem session of balance sheet preparation*	*Present worth method and illustrative example*	*Deriving optimum diameter of pipe for fluid transport using the concept of economic balance*	*Detail design strategy*
	SLO-2	*Theoretical equations for economic studies*	*Practice problem session in balance sheet preparation*	*Illustrative example of Present worth method*	*Practice session for the above mentioned derivation*	*Illustrative example in detailed design strategy*
S-5	SLO-1	*Problems using theoretical equations for economic studies*	*Earnings, process and returns (Income statement)*	*Practice problem session in present worth method*	*Economic balance in batch operations*	*Risk analysis and management*
	SLO-2	*Problems using theoretical equations for economic studies*	*Illustrative example of income statement*	*Practice problem session in present worth method*	*Illustrative example*	*Quantitative test for risk analysis and management*
S-6	SLO-1	*Amortization concept with illustrative example*	*Practice problem session in income statement*	*Replacement: Rate-of-return*	*Economic balance in cyclic*	*Scoping, planning and getting approvals prior to starting physical work*

	SLO-2	*Problem practice session on Amortization*	*Practice problem session in income statement*	*Illustrative example of rate-of- return method*	*Illustrative example*	*Contracting for engineering and construction activities*
S-7	SLO-1	*Concept of Depreciation Types of depreciation problems*	*Concepts of Economic production – break-even analysis*	*Replacement: Pay-out time method*	*Problem practice session on economic balance in cyclic processes for the manufacture of a typical chemical in batches*	*Project execution with regards to health, safety and environment*
	SLO-2	*Illustrative example in depreciation*	*Illustrative example of break-even analysis*	*Illustrative example of pay-out time method*	*Problem practice session on economic balance in cyclic processes for the manufacture of a typical chemical in batches*	*Cost, quality and schedule Illustrative example*
S-8	SLO-1	*Practice problem session in depreciation*	*Practice problem session in break-even Analysis*	*Illustrative example on combination of four methods of economics of alternative selection*	*Economic balance in multiple equipment units and an illustrative example*	*Special features of small projects*
	SLO-2	*Practice problem session in depreciation*	*Practice problem session in break-even analysis*	*Illustrative example on combination of four methods of economics of alternative selection*	*Economic analysis of an operating plant - Appraisal value, earning value, stock and bond Value*	*Illustrative example of salient features of small projects*
S-9	SLO-1	*Concept of depletion Practice problem on depletion*	*Cost accounting - pre construction cost estimation- Allocation of cost*	*Practice problem session in combination of four methods of economics of alternative selection*	*Practice problem session in appraisal value and construction of data sheet for economic analysis of a process plant.*	*Value engineering – Illustrative example*
	SLO-2	*Summary of time value of money*	*Summary of balance sheet and cost accounting*	*Summary of economic selection of alternatives*	*Summary of economic balance and economic analysis of complete process plant*	*Summary of project management applied to chemical engineering*

Course Code	18CHC403J	Course Name	PROCESS MODELING AND SIMULATION	Course Category	C	Professional Core	L	T	P	C
							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the terms involved in Conservation of Mass, Momentum and Energy equations.*
CLR-2 :	*Review the phase equilibrium, Chemical equilibrium and Chemical Kinetics.*
CLR-3 :	*Apply the conservation of mass and energy equation for simple chemical engineering systems.*
CLR-4 :	*provide the training to develop process model equations for Chemical Engineering systems.*
CLR-5 :	*provide training to solve the process model equation using SCILAB and commercial software (Aspen Plus).*
CLR-6 :	*Understand the overview of process modeling*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the modeling concept in Molecular and Convective transport terms.*	2	80	70	H	H	L										H		
CLO-2 :	*Understand the interface and reaction modeling concepts in Chemical Engineering systems.*	2	80	70	H	H	L										H	M	L
CLO-3 :	*Understand the pseudo and unsteady state modeling concepts*	2	75	70	H	H	L										H		
CLO-4 :	*Propose the process modeling equations for simple and complex chemical Engineering systems.*	3	80	70	H	H	L	M									H	M	
CLO-5 :	*Solve the model equations using open source software (SCILAB) and Commercial software (Aspen Plus).*	3	70	60	H	H	L	H									H	M	M
CLO-6 :	*Model a given process and simulate*	2	70	65	H	H	M	M									H	L	M

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Inventory rate equation of the conserved quantities*	*Interphase transport*	*Pseudo-Steady-State Approximation*	*Continuous Stirred Tank Reactor with constant holdup*	*Gravity flow tank*
S-2	SLO-1	*Steady state, Uniform, Equilibrium and Flux with suitable examples*	*Transfer coefficient, diffusivity and flux ratio for the transport of conserved quantities*	*Conservation of chemical species, momentum, energy and total mass for unsteady state*	*Continuous Stirred Tank Reactor with variable holdup*	*Modeling of Ideal Binary Distillation column*
S-3	SLO-1	*Mathematical formulation of the conserved quantities (Mass, Momentum and Energy equations)*	*Rate of generation in mass transport*	*Interacting and non-interacting system using single component*	*Two heated tanks*	*Estimation of boiling point of multicomponent ideal solution*
S-4	SLO-1	*Analogous molecular flux in constitutive equations for mass, momentum and energy*	*Rate of generation in momentum and energy transport*	*Unsteady state mass balance in a mixing tank*	*Gas phase pressurized CSTR*	*Modeling of multicomponent distillation column*
S-5	SLO-1	*Determine the molar flux from the plate surface under steady state*	*Equilibrium conversion for multiple reactions occur simultaneously using SCILAB*	*Unsteady state energy balance around a Continuous Stirred Tank*	*Multi-Component Flash Drum*	*Steady state simulation of multicomponent distillation using Aspen Plus*
S-6	SLO-1	*Identical problem solve using SCILAB code*	*Solve the identical problem using Aspen Plus*	*Solving unsteady state problems without reactions using SCILAB*	*Solve the model equations for multi-component flash drum using SCILAB*	*Dynamic simulation of ideal binary distillation using SCILAB*
S-7	SLO-1	*Determine the wall heat flux and heat transfer coefficient using experimental data*	*Solve the similar problem using Aspen Plus*	*Solving unsteady state problems without reactions using SCILAB*	*Identical problem solve using Aspen Plus*	*Steady state simulation of ideal distillation using Aspen Plus*
S-8	SLO-1	*Convective flux*	*Steady state macroscopic balances*	*Estimate the transient conversion and temperature in batch reactor using SCILAB*	*Non-isothermal CSTR with single reaction*	*Modeling of batch distillation column*
S-9	SLO-1	*Analogous terms in total flux expressions for various types of transport in one-dimension*	*Composition of species in mixing tanks*	*Estimate the transient conversion and temperature in batch reactor using Aspen Plus*	*Modeling of single phase vaporizer*	*Steady state simulation of batch distillation using Aspen plus*

S-10	SLO-1	*Properties estimation using Aspen Plus*	*Steady state energy balance around a continuous stirred reactor*	*Unsteady state steam Heating of a liquid*	*Modeling of mass transfer with reaction*	*Flow sheeting concepts using sequential modular approach*
S-11	SLO-1	*Solve the similar problems using Aspen Plus*	*Problem in continuous stirred reactor with reaction*	*Unsteady single stage solvent extraction*	*Steady state simulation of series of isothermal reactors*	*Demonstrate the simple flow sheet using Aspen Plus*
S-12	SLO-1	*Solve the similar problems using Aspen Plus*	*Solve the similar problems using SCILAB*	*Problem in extraction*	*Steady state simulation of series of non-isothermal reactors using Aspen Plus*	*Demonstrate the chemical plant simulation using Aspen plus*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Acquire skills to comprehend and solve problems in Chemical Process Calculations and Thermodynamics*
CLR-2 :	*Acquire skills to comprehend and solve problems in Mechanical Operations and Fluid Mechanics*
CLR-3 :	*Acquire skills to comprehend and solve problems in Heat Transfer and Mass Transfer*
CLR-4 :	*Acquire skills to comprehend and solve problems in Reaction Engineering and Process Control*
CLR-5 :	*Acquire skills to comprehend and solve problems for competitive examinations in Chemical Engineering*
CLR-6 :	*Acquire skills to comprehend and solve real world problems in the broad domain of Chemical Engineering*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Practice and gain competence to solve problems in Chemical Process Calculations and Thermodynamics*	3	80	75	H	H	H	M	M	L	L	L	L	L	L	L	H	H	M
CLO-2 :	*Practice and gain competence to solve problems in Mechanical Operations and Fluid Mechanics*	3	80	75	H	H	M	M	M	L	L	L	L	L	L	L	H	H	M

ACADEMIC CURRICULA

Professional Core Courses

CIVIL ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18CEC301T	Course Name	HYDROLOGY AND WATER RESOURCES ENGINEERING	Course Category	C	Professional Core	L	T	P	C
							3	1	0	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	18CEE311T, 18CEE312T, 18CEE313T
Course Offering Department	CIVIL ENGINEERING	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Provide knowledge on various processes in the hydrologic cycle*
CLR-2 :	*Address the occurrence, movement and augmentation of groundwater*
CLR-3 :	*Provide deep understanding of various impounding and diversion structures*
CLR-4 :	*Create insights on the importance and characteristics of rivers and reservoirs*
CLR-5 :	*Address concepts related to necessity of irrigation, methods of applying water to the fields and evapotranspiration*
CLR-6 :	*Introduce various hydraulic structures and exploit their practical importance*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Understand the interaction among various processes in the hydrologic cycle*	2	85	80	H	H	M	M	-	-	M	-	-	-	-	-	H	-	-
CLO-2 :	*Intellectualize the basic aquifer parameters and estimate groundwater resources for different hydro-geological boundary conditions*	3	85	75	H	H	-	-	-	-	M	-	-	-	-	-	H	-	-
CLO-3 :	*Understand the importance, features and uses of diversion and impounding structures*	3	80	75	H	-	-	-	-	-	M	-	-	-	-	-	H	-	-
CLO-4 :	*Perceive the importance of rivers, reservoirs and silt control*	2	85	80	H	-	-	-	-	-	M	-	-	-	-	-	H	-	-
CLO-5 :	*Understand the basics of irrigation, soil-water relationships and consumptive use*	2	85	75	H	H	M	M	-	-	M	-	-	-	-	-	H	-	-
CLO-6 :	*Identify the functions and importance of various hydraulic structures*	3	80	75	H	H	-	-	-	-	M	-	-	-	-	-	H	-	-

Duration (hour)		SURFACE WATER HYDROLOGY	GROUND WATER HYDROLOGY	DIVERSION AND IMPOUNDING STRUCTURES	RIVERS AND RESERVOIRS	IRRIGATION AND DISTRIBUTION SYSTEMS
		12	12	12	12	12
S-1	SLO-1	*Introduction, hydrologic cycle*	*Occurrence of ground water, porosity*	*Weirs and barrages*	*Rivers: types and characteristics*	*Irrigation, necessity, advantages and disadvantages*
	SLO-2	*World water balance, applications in engineering*	*Permeability and transmissibility*	*Gravity and non-gravity weirs*	*Classification based on the basis of the topography of the river basin*	*Methods of applying water to the fields*
S-2	SLO-1	*Precipitation, forms and types*	*Zones of subsurface water*	*Diversion head works and its components*	*Classification based on the basis of flood hydrographs*	*Surface, subsurface, sprinkler and drip irrigation*
	SLO-2	*Measurement of precipitation, rain gauge network*	*Movement of groundwater, Darcy's law*	*Functions of weir proper, under sluices, divide wall, fish ladder and canal head regulator*	*Indian rivers and their classification*	*Soil-water-plant relationship*
S-3	SLO-1	*Mean areal depth of precipitation, arithmetic average method*	*Specific yield and specific retention*	*Failure of hydraulic structures*	*Behaviour of rivers: straight reaches, bends and meanders*	*Hygroscopic water, capillary water and gravitational water*
	SLO-2	*Thiessen polygon method and isohyetal method*	*Aquifers and their types*	*Failure by piping and failure by direct uplift*	*Causes of meandering, cutoff*	*Field capacity, permanent wilting point, available moisture, readily available moisture*
S-4	SLO-1	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*
	SLO-2	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*
S-5	SLO-1	*Estimation of missing precipitation*	*Specific capacity and coefficient of storage*	*Bligh's creep theory*	*River training: objectives and classification*	*Depth of water stored in root zone*
	SLO-2	*Optimum raingauge network design*	*Infiltration wells and infiltration galleries*	*Lane's weighted creep theory*	*Types of training works*	*Limiting soil moisture conditions, depth and frequency of irrigation*
S-6	SLO-1	*Probable Maximum Precipitation*	*Open wells and tube wells*	*Khosla's theory*	*Levees, guide banks*	*Crop season, duty and delta*

	SLO-2	*Runoff process, components of stream flow*	*Types of tube wells*	*Khosla's method of independent variables for determination of pressures and exit gradient for seepage below a weir or a barrage*	*Artificial cutoff and pitched island*	*Factors affecting duty and method of improving duty*
S-7	SLO-1	*Factors affecting runoff*	*Yield of an open well, pumping test*	*Design of pucca floor and aprons*	*Groynes: types – normal, attracting and deflecting*	*Consumptive use: estimation by Blaney Criddle method and pan evaporation method*
	SLO-2	*Estimation of runoff, empirical formulae*	*Recuperation test*	*Design of pucca floor and aprons*	*Reservoir: types*	*Canal: types of alignment*
S-8	SLO-1	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*
	SLO-2	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*
S-9	SLO-1	*Infiltration method*	*Steady state flow in wells*	*Dams, function and uses, classification*	*Suitable site for a reservoir and storage zones*	*Distribution systems, channel losses*
	SLO-2	*SCS-CN method of estimating runoff volume*	*Dupuit's equilibrium equation for confined and unconfined aquifers*	*Factors governing the selection of a particular type of dam*	*Storage-discharge relation of a reservoir*	*Design of channels: rigid boundary channels and alluvial channels*
S-10	SLO-1	*Flow duration curve*	*Theim's equation for confined aquifer*	*Selection of dam site, problems in dam construction*	*Reservoir yield, safe yield, design yield, secondary yield and average yield*	*Kennedy's and Lacey's theories of regime channels*
	SLO-2	*Flow mass curve*	*Theim's equation for unconfined aquifer*	*Gravity dams: forces on gravity dams*	*Mass curve and demand curve*	*Water logging: causes, effects and remedial measures*
S-11	SLO-1	*Hydrograph, components of hydrograph*	*Spacing of wells*	*Modes of failure, construction of gravity dams*	*Designing reservoir capacity for a given yield and designing yield from a reservoir of a given capacity*	*Functions and uses of canal regulator and cross regulator*
	SLO-2	*Environmental flows*	*Artificial recharge methods*	*Galleries: functions and types. Earthen dam: types and causes of failure*	*Reservoir sedimentation: pre and post control measures, economic height of dam*	*Functions and uses of canal fall, canal escape and cross drainage works*
S -12	SLO-1	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*
	SLO-2	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Create insights in to different properties of soil*
CLR-2 :	*Deal with the classification and identification of soil*
CLR-3 :	*Understand concept of permeability and seepage of soils*
CLR-4 :	*Analyse the consolidation and compaction effect on soil in lab and field*
CLR-5 :	*Analyse the principles of effective stress in saturated soils, various soil condition the shear strength of the soils*
CLR-6 :	*Utilize the concept of various soil condition and shear strength of the soils in real time applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15

Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction-Definitions: soils*	*Particle size distribution*	*Permeability of Soil-importance*	*Compaction of Soil*	*Introduction- Stresses in soils*
	SLO-2	*Soil mechanics*	*Sieve analysis - problem*	*Introduction to hydraulic head*	*Introduction, theory of compaction,*	*Geostatic stress*
S-2	SLO-1	*Scope of Geotechnical engineering,*	*Plasticity Characteristics of soil*	*Darcy's law - Assumptions.*	*Laboratory determination of optimum moisture content and maximum dry density*	*Total - Effective and Neutral stress,*
	SLO-2	*Basic Definitions and Relationships-*	*Introduction to definitions of: plasticity of soil*	*Determination of coefficient of permeability*	*Standard Proctor test and Modified Proctor test – Problems in compaction*	*Fluctuations of effective stress*
S-3	SLO-1	*Two and three phase system of soil*	*Consistency limits-liquid limit, plastic limit*	*Laboratory method: Constant head method problems*	*Compactive energy –Factors affecting compaction*	*Effective stress in soils saturated by capillary action,*
	SLO-2	*Relationships in terms of weightand volume in phase system – moisture content*	*Shrinkage limit, Determination of: liquid limit*	*Coefficient of permeability*	*CBR of soil – procedure - problem*	*Problems in Geostatic stress – soil condition*
S-4	SLO-1	*Definitions: degree of saturation, void ratio, porosity*	*Determination of plastic limit and shrinkage limit.*	*Falling head method - problems*	*Field compaction methods*	*Problems in Geostatic stress – water table effect*
	SLO-2	*specific gravity, unit weights*	*Indices: Plasticity, liquidity and consistency, flow and toughness*	*Field method: types*	*Factors affecting field compaction*	*Shear Strength- Lab and filed methods*
S-5	SLO-1	*Relationship between bulk and dry density , void ratio- porosity, void ratio*	*Definition: Activity and sensitivity.*	*Pumping-out test – Confined aquifer*	*Consolidation of Soil*	*Shear test: direct shear test*
	SLO-2	*Water content- specific gravity-degree of saturation*	*Classification of Soils*	*Field method - Unconfined aquifer*	*Introduction, comparison between compaction and consolidation,*	*Shear test: merits and demerits - problem*
S6	SLO-1	*Unit weights - specific gravity - void ratio – degree of saturation –*	*Introduction of soil classification system*	*problems in field methods*	*Initial, primary consolidation*	*Unconfined compression test - problem*
	SLO-2	*Moisture content determination – Methods, Determination by oven dry method*	*methods:- particle size classification*	*Permeability in stratified soils*	*Secondary consolidation*	*Triaxial compression tests.*

S-7	SLO-1	*Problems in two phase system.*	*Indian standard soil classification system*	*Flow parallel and perpendicular to bedding plane - problems*	*Spring analogy for primary consolidation,*	*Drainage conditions*
	SLO-2	*Problems in three phase system.*	*Indian Soil classification system cohesive soil, cohesionless soil.*	*Factors affecting permeability of soil*	*Terzaghi's theory of one dimensional consolidation*	*Merits and demerits*
S-8	SLO-1	*Specific gravity – methods,*	*Indian Soil classification system –- Problems*	*Quick sand condition - Seepage Analysis*	*Partial differential equations (no analytical)*	*Drainage conditions- problem*
	SLO-2	*Determination by density bottle method and pycnometer method*	*Problems in BIS system*	*Introduction- seepage pressure.*	*Laboratory tests-*	*Relation between major and minor principal stresses*
S-9	SLO-1	*Field density methods – Determination by core cutter method*	*Soil identification*	*Characteristics of flow nets*	*Determination of coefficient of consolidation*	*Vane shear test. – problem*
	SLO-2	*Sand replacement method.*	*Field identification of soils.*	*Uses and application of flow nets.*	*$\sqrt{t}$ andLog t methods.*	*Factors affecting shear strength*

Dr. P.Selvanambi, Divisional Engineer (Highways), sundariselvam@yahoo.com	*Dr.M.Muttharam, Anna University, muttharam@annauniv.edu*	*Ms.S. Mary Rebekah Sharmila, SRMIST.*
Mr.Lenin K.R., Head –GEOTECH, SECON Private Limited, Bangalore, lenin.kr@secon.in	*Dr.V.Murugaiyan, Pondichery Engineering College, vmurugaiyan@pec.edu*	*Ms.Divya Krishnan K, SRMIST*

Course Code	18CEC303T	Course Name	HIGHWAY ENGINEERING AND DESIGN	Course Category	C	Professional Core Course	L	T	P	C
							2	1	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CIVIL ENGINEERING	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concepts in the geometric design of highway*
CLR-2 :	*Learn the needs and concepts in horizontal and vertical alignment of highway*
CLR-3 :	*Learn various traffic studies required for traffic management*
CLR-4 :	*Learn the design of various infrastructure facilities required for the traffic*
CLR-5 :	*Understand the material requirement of flexible pavement and design the pavement*
CLR-6 :	*Understand the components of rigid pavement and its design*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Design the geometric cross-section of highway*	2	85	80	H	H	M	H	-	-	M	-	-	-	-	-	M	-	-
CLO-2 :	*Design the horizontal and vertical alignment of highway*	2	85	75	H	H	H	H	-	-	M	-	-	-	-	-	M	-	-
CLO-3 :	*Conduct various traffic studies and analysis the volume and speed data*	2	80	75	M	H	L	L	-	-	M	-	-	-	-	-	M	-	-
CLO-4 :	*Plan and design the various infrastructure facilities required for the traffic*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-5 :	*Execute the material and the structural design of flexible pavement*	2	85	80	H	H	M	H	-	-	M	-	-	-	-	-	M	-	-
CLO-6 :	*Execute the material and the structural design of flexible pavement*	2	80	75	H	H	M	H	-	-	M	-	-	-	-	-	M	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Highway Geometric Design Elements of transportation Engineering*	*Extra widening and numerical examples*	*Traffic Facilities Design Traffic signs and*	*Flexible Pavement Component of Flexible pavement*	*Rigid Pavement Components of Rigid pavement*
	SLO-2	*Overviewof the course*	*Method of attaining superelevation in curves*	*Road markings*	*Functions of each component*	*Components of Rigid pavement – Details of joints*
S-2	SLO-1	*Highway planning and Alignment*	*Set back distance and shift in curves with numerical examples*	*Channelization of traffic*	*Materials - Basic properties of bitumen*	*Stresses in Rigid pavement – Temperature stress*
	SLO-2	*Classification of rural and urban roads*	*Reverse curve and compound curve*	*Channelization layouts*	*Binder grade and classification*	*Stresses in Rigid pavement – Temperature stress – numerical examples*
S-3	SLO-1	*Cross sectional elements of roads*	*Design of vertical alignment – summit curve*	*Traffic rotary - design elements capacity of rotary*	*Materials – Soil and aggregate properties*	*Stresses in Rigid pavement – Wheel load stress*
	SLO-2	*Terrain classification and speed and geometric standards for different terrain*	*Design of vertical alignment – summit curve – numerical example*	*Capacity ofrotary*	*Resilient modulus of aggregate and soil*	*Stresses in Rigid pavement – Wheel load stress – Numerical examples*
S-4	SLO-1	*Sight Distance – Stopping sight distance – Concept and derivations*	*Design of vertical alignment – valley curve*	*Rotary design - Numerical Example*	*Materials – Bituminous concrete mix properties*	*Stress combinations and critical stress*
	SLO-2	*Stopping sight distance – Numerical examples*	*Design of vertical alignment – valley curve – Numerical example*	*Rotary design - Numerical Example*	*Materials – Types of bituminous concrete mix*	*Thickness of Rigid pavement*
S-5	SLO-1	*Overtaking sight distance – assumptions and derivations*	*Traffic studies Fundamental traffic parameters - speed, density, volume, travel time*	*Grade separated intersection – Warrants and types*	*Bituminous concrete mix design*	*Design of Joint spacing*
	SLO-2	*Overtaking sight distance – Numerical examples*	*Headway, and spacing -time mean speed, space mean speed – spot speed*	*Layout of grade separated intersection*	*Bituminous concrete mix design*	*Design of Joint spacing – Numerical examples*

S-6	SLO-1	*Overtaking sight distance – Numerical examples*	*Traffic volume study – need and procedure*	*Elementsof traffic signal - headway, saturation flow*	*Flexible pavement design factor – Traffic factor*	*Dowel bar design*
	SLO-2	*Intersection sightdistance*	*Traffic volume calculation and analysis*	*Design principles of a traffic signal – Phase design, cycle time determination, green splitting*	*Traffic– equivalent single wheel load and standard axle load*	*Design of dowel bars – Numerical examples*
S-7	SLO-1	*Horizontal curve – circular curve radius*	*Spotspeed study – need and procedure*	*Two phase signal design – Numerical example*	*Traffic factor - truck factor, vehicle damage factor,number of repetition of standard axle load*	*Check for the adequacy of dowel bars – Numerical example*
	SLO-2	*Super elevation and minimum ruling radius*	*Traffic speed analysis*	*Two phase signal design – Numerical example*	*Number of repetition of standard axle load – Numerical examples*	*Check for the adequacy of dowel bars – Numerical example*
S-8	SLO-1	*Determination of radius and super elevation – numerical example*	*Speed study – Moving observer method*	*Three phase signal design- with exclusive pedestrian phase – Numerical example -*	*Design of flexible pavement – determination of pavement thickness (with unbounded layers)*	*Design of tie bars*
	SLO-2	*Determination of radius and super elevation – numerical example*	*Moving observer method – numerical calculation*	*Three phase signal design- with exclusive pedestrian phase – Numerical example -*	*Design of flexible pavement – determination of pavement thickness (with unbounded layers)*	*Design of tie bars – numericalexamples*
S-9	SLO-1	*Transition curve – length – assumptions and derivations*	*Parking study and demand analysis*	*Signal co-ordination*	*Design of flexible pavement – determination of pavement thickness (with bonded layers)*	*Codal provisions and issues in current design methods*
	SLO-2	*Transition curve – length – Numerical examples*	*Data to be studied in accident spots*	*Signal co-ordination – determination of bandwidth*	*Design of flexible pavement – determination of pavement thickness (with bonded layers)*	*Codal provisions and issues in current design methods*

							0	0	2	1

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn to measure traffic volume count and categorize different mode of traffic at straight road and intersection*
CLR-2 :	*Analyze the travel time and speed characteristics*
CLR-3 :	*Study the parking characteristics*
CLR-4 :	*Measure the properties of bitumen and aggregates*
CLR-5 :	*Learn the proportioning of aggregate*
CLR-6 :	*Measure the volumetric and strength of bituminous mixture*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Evaluate the vehicular composition in the straight road and intersection*	*3*	*90*	*85*	*H*	*M*		-	-	-	-	-	*H*	-	-	-	*H*	-	*H*
CLO-2 :	*Understand the travel time, delay and speed characteristics*	*3*	*85*	*80*	*H*	*M*	-	-	-	-	-	-	*H*	-	-	-	*H*	-	*H*
CLO-3 :	*Apply the effective parking systems*	*3*	*90*	*85*	*H*	*M*	-	-	-	-	-	-	*H*	-	-	-	*H*	-	*H*
CLO-4 :	*Grade the bitumen and select the aggregate for the preparation of bituminous mixture*	*3*	*85*	*80*	*H*	*M*	-	-	-	-	-	-	*H*	-	-	-	*H*	-	*H*
CLO-5 :	*Design the aggregate gradation for bituminous mixture*	*3*	*85*	*80*	*H*	*M*	-	-	-	-	-	-	*H*	-	-	-	*H*	-	*H*
CLO-6 :	*Design the bituminous mixture mix proportion*	*3*	*85*	*80*	*H*	*M*	-	-	-	-	-	-	*H*	-	-	-	*H*	-	*H*

Duration (hour)		6	6	6	6	6
S 1-2	SLO-1 SLO-2	*Determination of Vehicular composition in Straight moving traffic stream*	*Determination of traffic stream parameters by Moving Observer method*	*Determination of the penetration value of bitumen*	*Determination of ductility of bitumen*	*Batching of aggregates*
S 3-4	SLO-1 SLO-2	*Determination of Vehicular turning movement at any intersection*	*Evaluation of on street parking characteristics*	*Determination of softening point of bitumen*	*Determination of specific gravity of bitumen and aggregates*	*Preparation of bituminous mix and measure of mixture volumetric properties*
S 5-6	SLO-1 SLO-2	*Determination of instantaneous spot speed of vehicles*	*Evaluation of off street parking characteristics*	*Determination of viscosity of bitumen*	*Performance grading of bitumen - demo*	*Marshall stability test and design of bituminous mix*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basics of Construction- Unique features of construction*	*Work break-down structure*	*Planning and organizing construction site and resources*	*Resource Planning- Procurement, Identification*	*Quality control: concept of quality, quality assurance*
	SLO-2	*Construction projects types and features, Phases of a project*	*Activity lists*	*Site layout including enabling structures,*	*Types of resources, manpower, Equipment Material, Money, Time*	*Quality gurus*
S-2	SLO-1	*Project Life cycle*	*Estimating durations*	*developing site organization, Documentation at site*	*Systems approach In resource management, Characteristics of resources*	*TQM*
	SLO-2	*Construction project planning and competency skills*	*Sequence of activities, Activity utility data*	*Manpower: planning,*	*Resources Utilization, measurement of actual resources required-Tools for measurement of resources*	*use of manuals and checklists for quality control, role of inspection*
S-3	SLO-1	*Stages of project planning: pre-tender planning*	*Techniques of planning- Bar charts, Gantt Charts.*	*organizing, staffing, motivation*	*Material: Functions of Material Management*	*Basics of statistical quality control*
	SLO-2	*Pre-construction planning,*	*Networks: Basic terminology,*	*Histograms and S-Curves*	*Inventory cost, ABC analysis*	*Cost Of Quality(COQ) y, Quality audits*
S 4-5	SLO-1	*Detailed construction planning*	*AOA, AON*	*Earned Value*	*EOQ Model*	*Failure Mode & Effects Analysis (FMEA)*
	SLO-2	*Agencies involved and their methods of execution*	*Types of precedence relationships, Preparation of CPM networks*	*Supervision, Record keeping,*	*Equipment: Classification of Construction Equipment*	*Risk, Risk Management process*
S-6	SLO-1	*Process of development of plans and schedules*	*Activity on link and activity on node representation,*	*Periodic progress reports, periodical progress meetings*	*Factors Behind the selection of Construction of equipment*	*Risk Identification Process*
	SLO-2	*Role of client and contractor*	*critical and semi Critical paths*	*Updating of plans: purpose*	*Depreciation, Methods of Calculating Depreciation*	*Safety, Health and Environment on project sites*
S-7	SLO-1	*Feasibility study - preliminary analysis - market, technical, financial,*	*Computation of float values*	*Frequency and methods of updating*	*Classes of Labor, Labor Productivity*	*accident Causation Theories*
	SLO-2	*economic and ecological - detailed market and demand analysis- detailed technical analysis*	*Crashing Technique*	*Classification of costs, timecost trade-off in construction projects*	*Cost of Labour, Labour schedule, optimum use Labour*	*accidents; their cause Effects and preventive measures*

S-8	SLO-1	*Time value of money, NPV*	*PERT- Assumptions underlying PERT analysis,*	*Common causes of time and cost overruns*	*Resource Scheduling- Bar chart, line of balance technique*	*Cost of Accidents*
	SLO-2	*Contracts and Types*	*determining three time estimates, analysis,*	*Corrective measures*	*Resource constraints and conflicts*	*Occupational health problems in construction*
S-9	SLO-1	*Important Terminologies: Delays, penalties and liquidated damages; Force Majeure, Suspension and Termination*	*Slack computations*	*Common Good Practices in Construction*	*Resource aggregation, allocation, smoothening and leveling*	*Organizing for safety and health.*
	SLO-2	*Bidding Process*	*Calculation of probability of completion.*	*Basics of Modern Project management systems*	*Resource smoothening problems*	*Safety inspection, Safety Audit*

ACADEMIC CURRICULA

Professional Core Courses

COMPUTER SCIENCE AND ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18CSC301T	Course Name	FORMAL LANGUAGE AND AUTOMATA	Course Category	C	Professional Core	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Utilize the mathematics and engineering principles for the basics of Formal Language*
CLR-2 :	*Acquire knowledge of Automata and minimize with Regular language's*
CLR-3 :	*Acquire knowledge of Context free Grammar and simplify using normal forms*
CLR-4 :	*Gain knowledge to push down automata and apply it with CFL*
CLR-5 :	*Analyze the methods of turning machine*
CLR-6 :	*Analyze and Design the methods of computational complexity*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire the knowledge of mathematics and engineering principles for the basics of Formal Language*	3	80	70	M	H	-	H	L	-	-	-	L	L	-	H	-	-	-
CLO-2 :	*Acquire the ability to identify specification of a Regular language's with Automata*	3	85	75	M	H	L	M	L	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*Acquire knowledge of Context free Grammar and simplify using normal forms*	3	75	70	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-4 :	*Understand the concepts of push down automata and CFL .*	3	85	80	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-5 :	*Apply the knowledge to turning machine and its methods*	3	85	75	H	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-6 :	*Design the computational and acceptor machines using FA, PDA and Turing machines*	3	80	70	L	H	-	H	L	-	-	-	L	L	-	H	-	-	-

Duration (hour)		11	9	9	9	7
S-1	SLO-1	*Introduction to Automaton*	*Grammars: Introduction: Types of Grammar*	*Pushdown Automata: Definitions Moves*	*Turing Machines: Introduction*	*Undecidability :Basic definitions*
	SLO-2	*Mathematical concepts*	*Context Free Grammars and Languages*	*Instantaneous descriptions*	*Formal definition of Turing machines, Instantaneous descriptions*	*Decidable problems,*
S-2	SLO-1	*Formal Languages: Strings, Languages, Properties*	*Derivations*	*Deterministic pushdown automata*	*Turing Machine as Acceptors*	*Examples of undecidable problems and Problems*
	SLO-2	*Finite Representation : Regular Expressions*	*Ambiguity*	*Problems related to DPDA*	*Problems related to turning machine as Acceptors*	*Rice's Theorem*
S-3	SLO-1	*Problems related to regular expressions*	*Relationship between derivation and derivation trees*	*Non - Deterministic pushdown automata*	*Problems related to turning machine as Acceptors*	*Undecidable problems about Turing Machine- Post's Correspondence Problem*
	SLO-2	*Finite Automata :Deterministic Finite Automata*	*Problems related to Context free Grammar*	*Problems related to NDPDA*		*Problems related to Post's Correspondence Problem*
S-4	SLO-1	*Nondeterministic Finite Automata*	*Simplification of CFG : Elimination of Useless Symbols*	*Problems related to DPDA and NDPDA*	*Turing Machine as a Computing Device*	*Properties of Recursive and Recursively enumerable languages*
	SLO-2	*Finite Automaton with €- moves*			*Problems related to turning Turing Machine as a Computing Device*	
S-5	SLO-1	*Problems related to Deterministic and Nondeterministic Finite Automata*	*Simplification of CFG : Unit productions*	*Pushdown automata to CFL Equivalence*	*Problems related to turning Turing Machine as a Computing Device*	*Introduction to Computational Complexity: Definitions*
	SLO-2	*Problems related to Finite Automaton with €- moves*	*Simplification of CFG : Null productions*	*Problems related to Equivalence of PDA to CFG*		*Time and Space complexity of TMs*
S-6	SLO-1	*Equivalence of NFA and DFA*	*Problems related to Simplification of CFG*	*Problems related to Equivalence of PDA to CFG*	*Techniques for Turing Machine Construction*	*Complexity classes: Class P, Class NP*
	SLO-2	*Heuristics to Convert NFA to DFA*				
S-7	SLO-1	*Equivalence of NDFA's with and without €-moves*	*Chomsky normal form*	*CFL to Pushdown automata Equivalence*	*Considering the state as a tuple Considering the tape symbol as a tuple*	*Complexity classes: Introduction to NP-Hardness*

	SLO-2	*Problems related Equivalence of NDFA's with and without €-moves*	*Problems related to CNF*	*Problems related to Equivalence of CFG to PDA*	*Checking off symbols*	*NP Completeness*
S-8	SLO-1	*Minimization of DFA*	*Greiback Normal form*	*Pumping lemma for CFL*	*Modifications of Turing Machine*	
	SLO-2	*Problems related to Minimization of DFA*			*Multi-tape Turing Machine*	
S-9	SLO-1	*Regular Languages : Equivalence of Finite Automata and Regular Languages*	*Problems related to GNF*	*Problems based on pumping Lemma*	*Non-Deterministic Turing Machine*	
	SLO-2	*Equivalence of Finite Automata and Regular Grammars*			*Semi-Infinite Tape Turing Machine*	
S-10	SLO-1	*Problems related to Equivalence of Finite Automata and Regular Languages and Regular Grammars*				
	SLO-2	*Variants of Finite Automata :Two-way Finite Automaton Mealy Machines*				
S-11	SLO-1	*Properties of Regular Languages: Closure Properties*				
	SLO-2	*Set Theoretic Properties & Other Properties*				
	SLO-3	*Pumping Lemma*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the evolution of computer networks using the layered network architecture*
CLR-2 :	*Understand the addressing concepts and learn networks devices*
CLR-3 :	*Design computer networks using subnetting and routing concepts*
CLR-4 :	*Understand the error types , framing, flow control*
CLR-5 :	*Understand the various Medium Access Control techniques and also the characteristics of physical layer functionalities*
CLR-6 :	*Understand basic network administration*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Acquire the basics of computer network and its architecture*	3	80	70	L	H	-	H	L	-	-	-	L	L	-	H	-	-	-
CLO-2 :	*Acquire the knowledge of various networks devices and addressing methods*	3	85	75	M	H	L	M	L	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*Abilty to design the network routing methods*	3	75	70	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-4 :	*Acquire the various error codes and framing concepts*	3	85	80	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-5 :	*Ability to understand the physical layer functions and components*	3	85	75	H	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-6 :	*Ability to design a computer network using a switch and router*	3	80	70	L	H	-	H	L	-	-	-	L	L	-	H	-	-	-

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Evolution of Computer Networks*	*Addressing types*	*Network layer functionalities*	*Introduction- error types*	*Physical layer overview*
	SLO-2	*The Internet today*	*Physical, logical, port, specific addresses*	*Delivery vs Forwarding*	*Detection vs Correction*	*Functionalities*
S-2	SLO-1	*Data communications*	*IPv4 addresses*	*Unicast routing protocols*	*Error detection*	*Analog and digital*
	SLO-2	*Components*	*Notations*	*Intra , inter domain routing*	*Parity*	*Data, signals*
S-3	SLO-1	*Networks*	*Classful addressing*	*Multicast routing protocols*	*CRC*	*Transmission impairment*
	SLO-2	*Physical structures*	*Categories*	*Applications*	*Checksum*	*Attenuation, Distortion, Noise*
S 4-5	SLO-1 SLO-2	*Lab 1: Introduction to Packet racer*	*Lab 4 :IP Addressing and subnetting (VLSM).*	*Lab 7 : Implementation of Static Routing*	*Lab 10: Implementation of EIGRP Configuration*	*Lab 13: Implementation of Single-Area OSPF Link Costs and Interface*
S-6	SLO-1	*Network models*	*Classless addressing*	*Distance vector routing*	*Error correction*	*Performance metrics*
	SLO-2	*Categories of network*	*Prefix usage*	*Node instability issues*	*Hamming code*	*Bandwidth, delay, throughput, jitter*
S-7	SLO-1	*Protocols and standards*	*Network Address Translation(NAT)*	*RIPv1*	*Framing*	*Wireless 802.11*
	SLO-2	*Standards organizations*	*Translation table*	*RIPv2*	*Flow control*	*Addressing mechanism*

S-8	SLO-1	*Layered tasks*	*IPv6 addresses*	*Link state routing*	*Error control*	*Transmission Media*
	SLO-2	*Hierarchy*	*Types, Notation*	*Dijkstra's Algorithm*	*ARQ types*	*Twisted pair, Coaxial, Fibre*
S 9-10	SLO-1 SLO-2	*Lab 2: Implementation of various Topology creation*	*Lab 5: Configuring Interfaces*	*Lab 8: Implementation of Default Routing*	*Lab 11: Implementation of EIGRP Bandwidth and Adjacencies*	*Lab 14 :Implementation of Multi-Area OSPF with Stub Areas and Authentication*
S-11	SLO-1	*OSI model*	*VLSM*	*OSPF*	*Random access*	*IEEE 802.15*
	SLO-2	*Layered approach, Peer-peer approach*	*Masking*	*EIGRP*	*ALOHA*	*Architecture*
S-12	SLO-1	*Layers in the OSI model*	*CIDR*	*Path vector routing*	*CSMA/CD*	*IEEE 802.15.4*
	SLO-2	*Comparison of layers*	*Address aggregation*	*Stabilized routing table creation for AS*	*CSMA/CA*	*Architecture*
S-13	SLO-1	*TCP/IP protocol suite*	*Networking devices*	*BGP*	*Controlled access*	*IEEE 802.16*
	SLO-2	*Comparison with OSI moldel*	*Router, Switch, hub, Bridges*	*BGP Sessions*	*Channelization*	*Architecture*
S 14-15	SLO-1 SLO-2	*Lab 3: Implement the categories of network(LAN,MAN,WAN)*	*Lab 6: Basic Router Configuration, Creating Passwords*	*Lab 9: Implementation of RIPv1, v2*	*Lab 12:Implementation of EIGRP Authentication and Timers*	*Lab 15 : Redistribution Between EIGRP and OSPF*

Course Code	18CSC303J	Course Name	DATABASE MANAGEMENT SYSTEMS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamentals of Database Management Systems, Architecture and Languages*
CLR-2 :	*Conceive the database design process through ER Model and Relational Model*
CLR-3 :	*Design Logical Database Schema and mapping it to implementation level schema through Database Language*
CLR-4 :	*Familiarize queries using Structure Query Language (SQL) and PL/SQL*
CLR-5 :	*Familiarize the Improvement of the database design using normalization criteria and optimize queries*
CLR-6 :	*Understand the practical problems of concurrency control and gain knowledge about failures and recovery*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	100	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Acquire the knowledge on DBMS Architecture and Languages*	3	80	70	H	M	L	L	-	-	-	-	L	L	L	H	-	-	-
CLO-2 :	*Apply the fundamentals of data models to model an application's data requirements using conceptual modeling tools like ER diagrams*	3	85	75	H	H	H	H	H	-	-	-	H	H	H	H	-	-	-
CLO-3 :	*Apply the method to convert the ER model to a database schemas based on the conceptual relational model*	3	75	70	H	H	H	H	H	-	-	-	H	H	H	H	-	-	-
CLO-4 :	*Apply the knowledge to create, store and retrieve data using Structure Query Language (SQL) and PL/SQL*	3	85	80	H	H	H	H	H	-	-	-	H	H	H	H	-	-	-
CLO-5 :	*Apply the knowledge to improve database design using various normalization criteria and optimize queries*	3	85	75	H	H	L	M	L	-	-	-	M	M	M	L	-	-	-
CLO-6 :	*Appreciate the fundamental concepts of transaction processing- concurrency control techniques and recovery procedures.*	3	85	75	H	L	L	L	L	-	-	-	H	L	L	L			

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*What is Database Management System*	*Database Design*	*Basics of SQL-DDL,DML,DCL,TCL*	*Relational Algebra – Fundamental Operators and syntax, relational algebra queries, Tuple relational calculus*	*Transaction concepts, properties of transactions,*
	SLO-2	*Advantage of DBMS over File Processing System*	*Design process*	*Structure Creation, alternation*		
S-2	SLO-1	*Introduction and applications of DBMS*	*Entity Relation Model*	*Defining Constraints-Primary Key, Foreign Key, Unique, not null, check, IN operator*		*Serial izability of transactions,*
	SLO-2	*Purpose of database system*				*testing for serial inability, System recovery,*
S-3	SLO-1	*Views of data*	*ER diagram*	*Functions-aggregation functions*	*Pitfalls in Relational database, Decomposing bad schema*	*Concurrency Control*
	SLO-2			*Built-in Functions-numeric, date, string functions, string functions, Set operations,*	*Functional Dependency – definition, trivial and non-trivial FD*	
S 4-5	SLO-1	*Lab 1: SQL Data Definition Language Commands on sample exercise* ** The abstract of the project to construct database must be framed*	*Lab4 Inbuilt functions in SQL on sample Exercise.*	*Lab 7 : Join Queries on sample exercise.* ** Frame and execute the appropriate DDL,DML,DCL,TCL for the project*	*Lab10: PL/SQL Procedures on sample exercise.* ** Frame and execute the appropriate Join Queries for the project*	*Lab 13: PL/SQL Exception Handling* ** Frame and execute the appropriate PL/SQL Procedures and Functions for the project*
	SLO-2					
S-6	SLO-1	*Database system Architecture*	*Keys , Attributes and Constraints*	*Sub Queries, correlated sub queries*	*closure of FD set , closure of attributes*	*Two- Phase Commit protocol, Recovery and Atomicity*
	SLO-2				*irreducible set of FD*	
S-7	SLO-1	*Data Independence*	*Mapping Cardinality*	*Nested Queries, Views and its Types*	*Normalization – 1Nf, 2NF, 3NF,*	*Log-based recovery*
	SLO-2					
S-8	SLO-1	*The evolution of Data Models*	*Extended ER - Generalization,*	*Transaction Control Commands*	*Decomposition using FD- dependency*	*concurrent executions of transactions and*
	SLO-2		*Specialization and Aggregation*	*Commit, Rollback, Save point*	*preservation,*	*related problems*
S 9-10	SLO-1	*Lab 2: SQL Data Manipulation*	*Lab 5: Construct a ER Model for the*	*Lab 8: Set Operators & Views.*	*Lab 11: PL/SQL Functions*	*Lab 14: PL/SQL Trigger*

	SLO-2	Language Commands * Identification of project Modules and functionality	application to be constructed to a Database	* Frame and execute the appropriate In- Built functions for the project	* Frame and execute the appropriate Set Operators & Views for the project	* Frame and execute the appropriate PL/SQL Cursors and Exceptional Handling for the project
S-11	SLO-1	Degrees of Data Abstraction	ER Diagram Issues	PL/SQL Concepts- Cursors	BCNF	Locking mechanism, solution to concurrency related problems
	SLO-2		Weak Entity			
S-12	SLO-1	Database Users and DBA	Relational Model	Stored Procedure, Functions Triggers and Exceptional Handling	Multi- valued dependency,	Deadlock
	SLO-2				4NF	
S-13	SLO-1	Database Languages	Conversion of ER to Relational Table	Query Processing	Join dependency and 5NF	two-phase locking protocol, Isolation, Intent locking
	SLO-2					
S 14-15	SLO-1 SLO-2	Lab 3: SQL Data Control Language Commands and Transaction control commands to the sample exercises * Identify the issues that can arise in a business perspective for the application	Lab 6: Nested Queries on sample exercise * Construction of Relational Table from the ER Diagram	Lab9: PL/SQL Conditional and Iterative Statements * Frame and execute the appropriate Nested Queries for the project	Lab 12: PL/SQL Cursors * Frame and execute the appropriate PL/SQL Conditional and Iterative Statements for the project	Lab 15 : * Frame and execute the appropriate PL/SQL Cursors and Exceptional Handling for the project * Demo of the project

Course Code	18CSC304J	Course Name	COMPILER DESIGN	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18CSC301T	Co-requisite Courses	Nil	Progressive Courses	
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Utilize the mathematics and engineering principles for the Design of Compilers*
CLR-2 :	*Acquire knowledge of Lexical Analyzer from a specification of a language's lexical rules*
CLR-3 :	*Acquire knowledge of Syntax Analyzer for parsing the sentences in a compiler grammar*
CLR-4 :	*Gain knowledge to translate a system into various intermediate codes*
CLR-5 :	*Analyze the methods of implementing a Code Generator for compilers*
CLR-6 :	*Analyze and Design the methods of developing a Code Optimizer*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLR-1 :	*Utilize the mathematics and engineering principles for the Design of Compilers*	3	80	70	H	H	H	H	M	L	L	L	M	M	L	H	H	H	H
CLR-2 :	*Acquire knowledge of Lexical Analyzer from a specification of a language's lexical rules*	3	85	75	H	H	H	H	M	L	L	L	M	M	L	H	H	H	H
CLR-3 :	*Acquire knowledge of Syntax Analyzer for parsing the sentences in a compiler grammar*	3	75	70	H	H	H	H	M	L	L	L	M	M	L	H	H	H	H

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Compilers – Analysis of the source program*	*Syntax Analysis Definition - Role of parser*	*Bottom Up Parsing*	*Intermediate Code Generation*	*Code optimization*
	SLO-2	*Phases of a compiler – Cousins of the Compiler*	*Lexical versus Syntactic Analysis*	*Reductions*	*Intermediate Languages - prefix - postfix*	*Introduction– Principal Sources of Optimization*
S-2	SLO-1	*Grouping of Phases – Compiler construction tools*	*Representative Grammars*	*Handle Pruning*	*Quadruple - triple - indirect triples Representation*	*Function Preserving Transformation*
	SLO-2	*Lexical Analysis – Role of Lexical Analyzer*	*Syntax Error Handling*	*Shift Reduce Parsing*	*Syntax tree- Evaluation of expression - three-address code*	*Loop Optimization*
S-3	SLO-1	*Input Buffering*	*Elimination of Ambiguity, Left Recursion*	*Problems related to Shift Reduce Parsing*	*Synthesized attributes – Inherited attributes*	*Optimization of basic Blocks*
	SLO-2	*Specification of Tokens*	*Left Factoring*	*Conflicts During Shift Reduce Parsing*	*Intermediate languages – Declarations*	*Building Expression of DAG*
S 4-5	SLO-1 SLO-2	*Lab 1 - Implementation of Lexical Analyzer*	*Lab 4Elimation of Ambiguity, Left Recursion and Left Factoring*	*Lab 7 - Shift Reduce Parsing*	*Lab 10-Intermediate code generation – Postfix, Prefix*	*Lab 13 Implementation of DAG*
S-6	SLO-1	*Finite automation - deterministic*	*Top down parsing*	*LR Parsers- Why LR Parsers*	*Assignment Statements*	*Peephole Optimization*
	SLO-2	*Finite automation - non deterministic*	*Recursive Descent Parsing, back tracking*	*Items and LR(0) Automaton, Closure of Item Sets,*	*Boolean Expressions, Case Statements*	*Basic Blocks, Flow Graphs*
S-7	SLO-1	*Transition Tables*	*Computation of FIRST*	*LR Parsing Algorithm*	*Back patching – Procedure calls*	*Next -Use Information*

	SLO-2	*Acceptance of Input Strings by Automata*	*Problems related to FIRST*	*Operator Precedence Parser Computation of LEADING*	*Code Generation*	*Introduction to Global Data Flow Analysis*
S-8	SLO-1	*State Diagrams and Regular Expressions*	*Computation of FOLLOW*	*Computation of TRAILING*	*Issues in the design of code generator*	*Computation of gen and kill*
	SLO-2	*Conversion of regular expression to NFA – Thompson's*	*Problems related to FOLLOW*	*Problems related to LEADING AND TRAILING*	*The target machine – Runtime Storage management*	*Computation of in and out*
S 9-10	SLO-1 SLO-2	*Lab 2 conversion from Regular Expression to NFA*	*Lab 5 -FIRST AND FOLLOW computation*	*Lab 8- Computation of LEADING AND TRAILING*	*Lab 11 Intermediate code generation – Quadruple, Triple, Indirect triple*	*Lab 14 : Implementation of Global Data Flow Analysis*
S-11	SLO-1	*Conversion of NFA to DFA*	*Construction of a predictive parsing table*	*SLR Grammars*	*A simple Code generator*	*Parameter Passing.*
	SLO-2	*Simulation of an NFA*	*Predictive Parsers LL(1) Grammars*	*SLR Parsing Tables*	*Code Generation Algorithm*	*Runtime Environments*
S-12	SLO-1	*Converting Regular expression directly to DFA*	*Transition Diagrams for Predictive Parsers*	*Problems related to SLR*	*Register and Address Descriptors*	*Source Language issues*
	SLO-2	*Minimization of DFA*	*Error Recovery in Predictive Parsing*	*Construction of Canonical LR(1) and LALR*	*Generating Code of Assignment Statements*	*Storage Organization*
S-13	SLO-1	*Minimization of NFA*	*Predictive Parsing Algorithm*	*Construction of LALR*	*Cross Compiler – T diagrams*	*Activation Records*
	SLO-2	*Design of lexical analysis (LEX)*	*Non Recursive Predictive Parser*	*Problems related to Canonical LR(1) and LALR Parsing Table*	*Issues in Cross compilers*	*Storage Allocation strategies*
S 14-15	SLO-1 SLO-2	*Lab 3 Conversion from NFA to DFA*	*Lab 6 Predictive Parsing Table*	*Lab9 Computation of LR(0) items*	*Lab 12 : A simple Code Generator*	*Lab 15: Implement any one storage allocation strategies(heap, stack, static)*

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to AI-AI techniques*	*Searching techniques- Uniformed search-General search Algorithm*	*Knowledge and reasoning-Approaches and issues of knowledge reasoning*	*Planning- Planning problems, Simple planning agent*	*Expert system-Architecture*
	SLO-2	*Problem solving with AI*	*Uniformed search Methods-Breadth first search*	*Knowledge base agents-Logic Basics*	*Planning languages*	*Pros and Cons of expert system*
S-2	SLO-1	*AI Models, Data acquisition and learning aspects in AI*	*Uniformed search Methods-Depth first search*	*Logic-Propositional logic-syntax ,semantics and inferences*	*Blocks world ,Goal stack planning*	*Rule based systems*
	SLO-2	*Problem solving- Problem solving process, Formulating problems*	*Uniformed search Methods-Depth limited search*	*Propositional logic- Reasoning patterns*	*Mean Ends Analysis*	*Frame based expert system*
S-3	SLO-1	*Problem types and characteristics*	*Uniformed search Methods- Iterative Deepening search*	*Predicate logic – Syntax and semantics, instance and is relationship*	*Non-linear Planning*	*Case study*
	SLO-2	*Problem space and search*	*Bi-directional search*	*Unification and Resolution*	*Conditional planning, Reactive planning*	*Case study*
S 4-5	SLO-1 SLO-2	*Lab 1: Implementation of toy problems*	*Lab4: Implementation and Analysis of DFS and BFS for an application*	*Lab 7: Implementation of unification and resolution for real world problems.*	*Lab 10 :Implementation of block world problem*	*Natural language processing-Levels of NLP*
S-6	SLO-1	*Intelligent agent*	*Informed search- Generate and test, Best First search*	*Knowledge representation using rules*	*Learning- Machine learning*	*Syntactic and Semantic Analysis*
	SLO-2	*Rationality and Rational agent with performance measures*	*Informed search-A* Algorithm*	*Knowledge representation using semantic nets*	*Goals and Challenges of machine learning*	*Information retrieval*
S-7	SLO-1	*Flexibility and Intelligent agents*	*AO* research*	*Knowledge representation using frames*	*Learning concepts, models*	*Information Extraction*

	SLO-2	*Task environment and its properties*	*Local search Algorithms-Hill Climbing, Simulated Annealing*	*Inferences*	*Artificial neural network based learning- Back propagation*	*Machine translation*
S-8	SLO-1	*Types of agents*	*Local Beam Search*	*Uncertain Knowledge and reasoning- Methods*	*Support vector machines*	*NLP Applications*
	SLO-2	*Other aspects of agents*	*Genetic Algorithms*	*Bayesian probability and belief network*	*Reinforcement learning*	*NLP Applications*
S 9-10	SLO-1 SLO-2	*Lab 2: Developing agent programs for real world problems*	*Lab 5: Developing Best first search and A* Algorithm for real world problems*	*Lab 8: Implementation of knowledge representation schemes - use cases*	*Lab 11: Implementation of learning algorithms for an application*	*Lab 14:Implementation of NLP programs*
S-11	SLO-1	*Constraint satisfaction problems(CSP)*	*Adversarial search Methods- Game playing-Important concepts*	*Probabilistic reasoning*	*Adaptive learning*	*Advance topics in Artificial Intelligence- Cloud Computing and intelligent agent*
	SLO-2	*Crypto arithmetic puzzles*	*Game playing and knowledge structure*	*Probabilistic reasoning over time*	*Multi agent based learning*	*Business intelligence and analytics*
S-12	SLO-1	*CSP as a search problem-constrains and representation*	*Game as a search problem-Mini max approach*	*Forward and backward reasoning*	*Ensemble learning*	*Sentiment Analysis*
	SLO-2	*CSP-Backtracking, Role of heuristic*	*Mini max Algorithm*	*Other uncertain techniques-Data mining*	*Learning for decision making*	*Deep learning Algorithms*
S-13	SLO-1	*CSP-Forward checking and constraint propagation*	*Alpha beta pruning*	*Fuzzy logic*	*Distributed learning*	*Deep learning Algorithms*
	SLO-2	*CSP-Intelligent backtracking*	*Game theory problems*	*Dempster -shafer theory*	*Speedup learning*	*Planning and logic in intelligent agents*
S 14-15	SLO-1 SLO-2	*Lab 3: Implementation of constraint satisfaction problems*	*Lab 6: Implementation of mini max algorithm for an application*	*Lab 9: Implementation of uncertain methods for an application*	*Lab12: Development of ensemble model for an application*	*Lab 15: Applying deep learning methods to solve an application.*

ACADEMIC CURRICULA

Professional Core Courses

ELECTRICAL & ELECTRONICS ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18EEC301J	Course Name	CONTROL SYSTEMS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Educate the students on mathematical model of a physical system.*
CLR-2 :	*Provide knowledge on time domain response and stability of a system.*
CLR-3 :	*Explain the concept of frequency domain using mathematical and graphical approach*
CLR-4 :	*Design various controller / compensator to meet system requirement.*
CLR-5 :	*Understand the concept of state space analysis.*
CLR-6 :	*Gain knowledge on the design, control and analysis of physical system.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Interpret a physical system in s domain representation.*	3	75	75	H	H	M	M	-	-	-	-	M	M	-	-	M	H	-
CLO-2 :	*Analyze the use of time domain specification and stability in real time application.*	3	75	75	H	H	M	H	M	-	-	-	M	M	-	-	H	H	-
CLO-3 :	*Apply various techniques to understand the frequency response of a system*	3	75	75	H	H	H	H	M	-	-	-	M	M	-	-	H	H	-
CLO-4 :	*Articulate the concept of tuning and design a controller for the given system.*	3	75	75	H	H	H	H	M	-	-	L	M	M	-	-	H	H	L
CLO-5 :	*Comprehend the state and test the controllability, observability of a system.*	3	75	75	H	H	M	M	M	-	-	-	M	M	-	-	M	H	-
CLO-6 :	*Analysis the system stability and performance of physical system.*	3	75	75	H	H	H	H	M	-	-	L	M	M	-	-	H	H	L

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Classification of control systems.*	*Introduction to time domain analysis.*	*Introduction to frequency domain analysis.*	*Need for controller design and in systems*	*State space analysis.*
	SLO-2	*Terminology of automatic control systems.*	*Standard test signals ; Response of first order systems to standard test signals*	*Frequency response plots of dynamic systems.*	*Important for compensation in system.*	*Concepts of state, state variables, state model.*
S-2	SLO-1	*Principles and effects of feed forward control systems.*	*Step response of second order systems in detail*	*Frequency response measurements, Performance specifications in the frequency domain.*	*Effects of P,PI Controller.*	*State differential equation using physical variables;*
	SLO-2	*Principles and effects of feedback control systems.*	*Different damping conditions.*	*Log magnitude and phase diagrams.*	*Effect of PID Controller.*	*State diagram representation.*
S-3	SLO-1	*Transfer functions SISO & MIMO*	*Transient response analysis.*	*Determination of Frequency domain specifications.*	*Classical PID controller*	*Tutorial – State space analysis by using phase variable form.*
	SLO-2	*Transfer functions for simple electrical, mechanical and electro mechanical systems*	*Time domain specification.*	*Phase margin and Gain margin*	*PID controller tuning using Zigler – Nichols tuning rules.*	*Formation of state space equation.*
S 4-5	SLO-1 SLO-2	*Lab 1: Determination of transfer function parameter of DC motor*	*Lab: 4Generating standard test signals.*	*Lab 7: Frequency response characteristics of second order system.*	*Lab 10: Design, determination of transfer function and frequency response for lag, lead network.*	*Lab 13: State space model for classical transfer function and design and tuning a PID controller.*
S-6	SLO-1	*Tutorial: Formation of transfer functions of mechanical translational and rotational system.*	*Steady state response; Steady state error.*	*Stability Analysis using Bode Plots*	*Feedback compensation –Lead compensation*	*Relationship between state equation and transfer functions.*
	SLO-2	*Tutorial: Formation of electrical analogy of mechanical translational and rotational system.*	*Static & dynamic error coefficients*	*Procedure for plotting bode plot. .*	*Lag compensation*	*Conversion of state space to transfer function.*
S-7	SLO-1	*Block diagram algebra.*	*Effects of additional Pole on the Second-Order System Response*	*Tutorial – Bode plot problem*	*Compensator design in frequency domain using bode plot*	*Solution of state equation;*

	SLO-2	*Representation by Signal flow graph*	*Effects of additional Zero on the Second-Order System Response*	*Stability margin on the bode plot.*	*Design procedure.*	*State Transition Matrix and it's Properties*
S-8	SLO-1	*Tutorial: Block diagram reduction direct method..*	*Routh Hurwitz criterion*	*Nyquist (Polar) Plot*	*Tutorial - Compensator design*	*Importance of controllability and observability.*
	SLO-2	*Tutorial: Block diagram reduction use by Mason's gain formula.*	*Stability condition and its limitation.*	*Gain phase plot.*	*Achieved desired system specification.*	*Tutorial: Formation of controllability and observability matrix*
S 9-10	SLO-1 SLO-2	*Lab 2: Determination of transfer function parameter of AC servo motor.*	*Lab 5: Step response characteristics of second order system.*	*Lab 8: Stability analysis of second order system using time and frequency domain approach.*	*Lab 11 Stability analysis of add a pole / zero and lag lead compensator.*	*Lab 14:. Analysis of twin rotor multi input multi output system.*
S-11	SLO-1	*Linear Approximations of Physical Systems.*	*Properties of the Root Loci*	*Nyquist stability criterion*	*Pole zero cancellation design:*	*Pole zero cancellation for uncontrollability system.*
	SLO-2	*Linearization of nonlinear systems*	*Construction of root loci*	*Stability analysis using nyquist plot.*	*Notch filter*	*Design for controllable system.*
S-12	SLO-1	*Poles and zeros of a transfer function*	*Tutorial – Root locus*	*Relations between closed loop and open loop frequency response.*	*Minor loop feedback control.*	*Tutorial –Pole placement of state feedback system.*
	SLO-2	*Graphical evaluation*	*Gain limitation for stability condition.*	*M and N circle*	*Advantages and Applications*	*Design for pole placement approach.*
S-13	SLO-1	*BIBO Stability and its important*	*Effects of adding poles on the root loci.*	*Time response analysis use by Simulink/ program software.*	*Case Study: IEC61131 Standards*	*Case study: State space analysis of electric vehicle charging system.*
	SLO-2	*Location of poles and stability.*	*Effects of adding zeros on the root loci.*	*Frequency response analysis use by Simulink/ program software.*	*Programming language for industrial automation.*	*Analysis the system response.*
S 14-15	SLO-1 SLO-2	*Lab 3: Performance analysis of a motor driving a load through a gear train.*	*Lab 6. Plotting root locus of a transfer function using a simulator tank level estimation control.*	*Lab 9: Modeling and control analysis of simple electric network*	*Lab 12: Effect of feedback on disturbance and PID control design.*	*Lab 15: Design of speed control of DC motor drive.*

Course Code	18EEC302J	Course Name	POWER ELECTRONICS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Emphasize on basics of various power devices*
CLR-2 :	*Furnish adequate knowledge about the application of power devices in rectifier circuits*
CLR-3 :	*Educate the students on various DC-DC converters and their design*
CLR-4 :	*Illustrate the types and working of DC-AC converters*
CLR-5 :	*Describe the classification of AC-AC converters and their working*
CLR-6 :	*Providebasic knowledge on different industrial applications of power electronic converters*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand and analyze the characteristics of different power devices*	2	75	75	H	M	-	-	M	-	-	-	M	M	-	-	M	M	-
CLO-2 :	*Comprehend the operation of AC-DC converters and design a converter of specific range*	3	75	75	H	H	M	M	M	-	-	-	M	M	-	-	M	M	-
CLO-3 :	*Apply the concept of chopper principle and design a DC-DC converter.*	3	75	75	H	H	M	M	M	-	-	-	M	M	-	-	M	M	-
CLO-4 :	*Articulate the concept of DC-AC conversion and model an inverter*	3	75	75	H	H	M	M	M	-	-	-	M	M	-	-	M	M	-
CLO-5 :	*Analyze the function of AC-AC converters*	2	75	75	H	M	-	-	M	-	-	-	M	M	-	-	M	M	-
CLO-6 :	*Acquire and analyze various applications of power electronic circuits*	3	75	75	H	M	M	M	M	-	-	-	M	M	-	-	M	M	-

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to Power processing*	*Single phase full controlled rectifiers with R, RL load*	*Principles of chopper circuits*	*Principles of power VSI and CSI inverters*	*Step down Cycloconverter*
	SLO-2	*Construction - Principle of operation of Power diodes*	*Estimation of average & RMS load voltage, RMS load current and input power factor for full controlled rectifiers*	*Control Strategies in chopper circuits*	*Single phase voltage source inverter under various loading conditions*	*Step up Cycloconverter*
S-2	SLO-1	*Dynamic characteristics of Power diodes*	*Single phase full controlled rectifiers with RLE load*	*Multi- quadrant operation of chopper*	*Working of three phase inverter circuits in 180 degree mode of conduction*	*Three phase to single phase Cycloconverter*
	SLO-2	*Construction - Principle of operation of SCR- Dynamic characteristics of SCR*	*Estimation of average & RMS load voltage*	*Types of commutation*	*Determination of RMS ,average values of line and phase voltage*	*Three phase to three phase cyclo converter*
S-3	SLO-1	*Construction - Principle of operation of TRIAC,GTO*	*Estimation of RMS load current and input power factor*	*Forced commutated chopper :Voltage commutated choppers*	*Working of three phase inverter circuits in 120 degree mode of conduction*	*Introduction to matrix converter*
	SLO-2	*Dynamic characteristics of GTO*	*Problems in rectifier circuits*	*Forced commutated chopper : Current commutated choppers*	*Determination of RMS ,average values of line and phase voltage*	*Operation of matrix converter*
S 4-5	SLO-1 SLO-2	*Lab 1: R-RC Triggering Circuits ; UJT Triggering Circuits; HWR-FWR HWR- FWR*	*Lab 4: Single phase half controlled bridge rectifier with resistive and inductive loads*	*Lab 7: Control of DC Voltage in chopper circuits using Time ratio & pulse width control*	*Lab 10: Three phase DC-AC converter for different types of loads*	*Lab 13: Single Phase cycloconverter*
S-6	SLO-1	*SCR: turn-on, methods*	*Three phase full controlled rectifiers with R load*	*Load commutated chopper*	*Introduction to Current source inverter*	*AC Voltage regulator*
	SLO-2	*SCR: turn-off methods*	*Working of three phase full controlled rectifiers with R load for various firing angle*	*Introduction to isolated and Non-isolated topologies*	*Auto sequential current source inverter*	*Active power line conditioner*
S-7	SLO-1	*Over voltage protection:*	*Three phase full controlled rectifiers with RL load*	*Basic non-isolated topologies: Characteristics of Buck converter*	*Single pulse width modulation technique*	*UPS*

	SLO-2	Over current protection	Working of three phase full controlled rectifiers with RL load for various firing angle	Derivation of voltage gain of Buck converter	Multiple pulse width modulation technique	SMPS
S-8	SLO-1	Gate Protection	Estimation of average & RMS load voltage,	Basic non-isolated topologies: Characteristics of Boost converter	Sinusoidal pulse width modulation technique (Unipolar , bipolar schemes)	HVDC systems
	SLO-2	Design of Snubber circuits	Estimation RMS load current and input power factor	Derivation of voltage gain of Boost converter	Introduction to space vector pulse width modulation	Types of HVDC systems
S 9-10	SLO-1	Lab 2: Characteristics of SCR;TRIAC	Lab 5: Three phase fully controlled rectifier with resistive load	Lab 8:Study of forced commutation techniques using chopper circuits	Lab 11: Generation of PWM signals using Sine PWM technique to trigger switches in a three phase inverter	Lab 14: A.C. voltage controllers with R and RL loads
	SLO-2					
S-11	SLO-1	Construction - Principle of operation of Power MOSFET	Single phase semi converter- Construction, working	Steady-State Equivalent Circuit Modeling of dc-dc converters- Losses and Efficiency	Voltage control of inverters	Tap changing of transformers
	SLO-2	Dynamic characteristics of Power MOSFET	Estimation of average & RMS load voltage of single phase semi converter	Resonant converters	Harmonics study and its reduction techniques	Electronic ballast
S-12	SLO-1	Construction - Principle of operation of Power IGBT	Three phase semi converter –Construction	Characteristics of CUK converter	Multilevel inverters: Introduction, Types	Induction heating
	SLO-2	Dynamic characteristics of Power IGBT	Working of three phase converter for different firing angles	Derivation of voltage gain of CUK converter	Working of cascaded seven level Inverter	Light dimmer
S-13	SLO-1	Loss calculation (Switching, conduction and leakage losses)	Estimation of average & RMS load voltage of three phase semi converter	Characteristics of SEPIC converter	Working of Diode clamped five level Inverter	Role of power converters in PV systems
	SLO-2	Problems in calculation of losses of various power devices	Effect of source inductance in full converter	Derivation of voltage gain of SEPIC converter	Working of flying capacitor five level Inverter	Role of power converters in Electric vehicles
S 14-15	SLO-1	Lab 3: Characteristics of MOSFET, IGBT	Lab 6: Three phase semi converter	Lab 9: : case study : Design and Model a Buck-Boost converter a) using real time software b) using discrete components for specific condition	Lab 12: Case study :Design a Single phase DC-AC converter to drive a 0.5 hp Single phase induction motor	Lab 15: Case study Design and analyze a fully controlled rectifier to feed a --- kW inverter using discrete components
	SLO-2

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Power scenario in India*	*Necessity of power flow studies*	*Symmetrical short circuit on Synchronous Machine*	*Introduction to symmetrical components*	*Introduction to stability studies*
	SLO-2	*Power system components*	*Bus classification*	*Steady state, transient and sub transient reactances*	*Sequence voltages and currents*	*Illustration of steady state stability limit*
S-2	SLO-1	*Per unit representation*	*Formulation of Power Flow problems*	*Study of symmetrical faults in power system*	*Sequence impedances and networks*	*Synchronizing power co-efficient*
	SLO-2	*Single line diagram*	*Power flow solution using Gauss Seidel method (algorithmic steps)*	*Numericals in short circuit in synchronous generator*	*Zero sequence networks*	*Review of mechanics and swing equation*
S-3	SLO-1	*Per unit quantities*	*Handling of Voltage controlled buses*	*Bus Impedance matrix by building algorithm (without mutual coupling) (algorithmic steps)*	*Types of unsymmetrical faults*	*Representation of swing curves*
	SLO-2	*p.u impedance diagram*	*Power flow solution using Gauss Seidel method excluding PV buses (quantitative analysis)*	*Bus Impedance matrix by building algorithm (without mutual coupling) (quantitative analysis)*	*Fault conditions for single line to ground fault*	*Power-Angle equation*
S-4	SLO-1	*Network graph*	*Conditions for PV buses*	*Bus Impedance matrix by building algorithm (including mutual coupling) (algorithmic steps)*	*Fault conditions for line to line fault*	*Equal area criterion*
	SLO-2	*Bus incidence matrix*	*Power flow solution using Gauss Seidel method including PV buses (quantitative analysis)*	*Bus Impedance matrix by building algorithm (including mutual coupling) (quantitative analysis)*	*Fault conditions for double line to ground fault*	*Impact of sudden load increase in synchronous motor*
S-5	SLO-1	*Primitive parameters*	*Impact of acceleration factor in convergence*	*Symmetrical fault analysis using Thevenin's theorem*	*Single line to ground fault and line to line fault in generator terminals*	*Illustrations of equal area criterion under different system conditions*
	SLO-2	*Graph and oriented graph*	*Power flow solution including acceleration factor*	*Symmetrical fault analysis using Thevenin's theorem (numericals)*	*Double line to ground fault in generator terminals*	*Derivation of Critical clearing angle and time*

S-6	SLO-1	*Links and trees*	*Algorithmic steps of Power Flow Solution by Newton Raphson method*	*Derivation of Bus voltages due to current injection*	*Assumptions for system representation*	*Derivation of Critical clearing angle and time (quantitative analysis)*
	SLO-2	*Bus admittance matrix using singular transformation method without mutual coupling*	*Power Flow Solution by Newton Raphson method (quantitative analysis)*	*Calculation of bus voltages and line currents*	*Formation of positive, negative and zero sequence networks*	*Classical step-by-step solution of the swing curve (theoretical approach)*
S-7	SLO-1	*Bus admittance matrix using singular transformation method without mutual coupling (quantitative analysis)*	*Algorithmic steps of Power Flow Solution by Fast Decoupled method*	*Symmetrical fault analysis through bus impedance matrix (theoretical approach)*	*Bus impedance matrices of positive, negative and zero sequence networks*	*Classical step-by-step solution of the swing curve (numerical approach)*
	SLO-2	*Bus admittance matrix using singular transformation method including mutual coupling*	*Power Flow Solution by Fast Decoupled method (quantitative analysis)*	*Symmetrical fault analysis through bus impedance matrix (quantitative analysis)*	*Analyzing Single line to ground fault and line to line fault with fault impedance*	*Algorithmic steps of swing equation using Runga Kutta method*
S-8	SLO-1	*Representation of off nominal transformer*	*Derivation of Power flow in lines*	*Short circuit level /Fault level*	*Analyzing double line to ground fault with fault impedance*	*Numeric solution of swing equation using Runga Kutta method (quantitative analysis)*
	SLO-2	*Numerical problems in off nominal transformer*	*Numerical solution of Power flow in lines*	*Fault level and short circuit MVA (numericals)*	*Analyzing unsymmetrical fault occurring at any point in a power system*	*Algorithmic steps of swing equation using modified Eulers method*
S-9	SLO-1	*Formation of bus admittance matrix for large scale system (Theoretical approach)*	*Derivation of slack bus power and line losses*	*Current limiting reactors*	*Unsymmetrical fault analysis using bus impedance matrices (algorithmic)*	*Numeric solution of swing equation using modified Euler's method*
	SLO-2	*Formation of bus admittance matrix for large scale system (quantitative analysis)*	*Numerical solution of slack bus power and line losses*	*Design of circuit breakers based on fault analysis*	*Unsymmetrical fault analysis using bus impedance matrices (quantitative analysis)*	*Factors affecting transient stability*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the architecture and instruction set of 8051*
CLR-2 :	*Familiarize with the programming modes of the SFRs in8051*
CLR-3 :	*Introduce 8051 programming in C*
CLR-4 :	*Outline the features of PIC microcontroller, its architecture and instruction set.*
CLR-5 :	*Explain the architecture of ARM Processor and its instruction set.*
CLR-6 :	*Acquire knowledge on microcontrollers and their applications.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Summarize and program 8051 microcontrollers*	*1*	*75*	*75*	*H*	*M*	*M*	*M*	*M*	-	-	-	*M*	*M*	-	-	*M*	*M*	-
CLO-2 :	*Program the SFRs according to the given requirements*	*3*	*75*	*75*	*H*	*M*	*M*	*M*	*M*	-	-	-	*M*	*M*	-	-	*H*	*H*	-
CLO-3 :	*Interface the various peripherals with 8051 and program 8051 using C*	*3*	*75*	*75*	*H*	*M*	*M*	*M*	*M*	-	-	-	*M*	*M*	-	-	*H*	*H*	-
CLO-4 :	*Decipher the given problem and develop simple programs using PIC microcontrollers*	*3*	*75*	*75*	*H*	*M*	*M*	*M*	-	-	-	-	*M*	*M*	-	-	*H*	*H*	-

CLO-6 :	*Update their knowledge on microcontrollers and program them for real time applications*	*3*	*75*	*75*	*H*	*M*	*M*	*M*	*M*	-	-	-	*M*	*M*	-	-	*H*	*H*	-

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Evolution of Microprocessors,Microcontrollers and Computers*	*Counters & timers: modes of operation*	*Introduction to interfacing peripheral devices*	*Introduction to PIC 16F84Amicrocontroller*	*The ARM processor -features*
	SLO-2	*Comparison of Microprocessor and Microcontroller*	*TMOD register*	*8255 PPI – Pin diagram and architecture*	*Applications of PIC 16F84A*	*Applications of ARM processors*
S-2	SLO-1	*Overview of 8-bit / 16-bit / 32-bit microprocessors and microcontrollers*	*TCON register*	*8255 PPI – Modes of operation*	*Architecture overview of PIC 16F84A*	*Architecture overview of ARM processor*
	SLO-2	*CISC and RISC architectures*	*Serial data transmission/ reception: modes*	*8279 keyboard interface - Pin diagram and architecture*	*PIC 16F84A - Block diagram*	*ARM processor - Block diagram*
S-3	SLO-1	*8051 – pin diagram*	*SCON register*	*8279 keyboard interface - modes of operation*	*Working register*	*The ARM programmer's model*
	SLO-2	*8051 - Internal Block Diagram*	*PCON register*	*LCD interfacing*	*Status register*	*ARM Current Program Status Register*
S 4-5	SLO-1 SLO-2	*Lab 1: Introduction to 8051 microcontroller*	*Lab 4:Boolean and logical operations (bit & byte level logical operations) using 8051 microcontroller*	*Lab 7:8 bit ADC using 8051 microcontroller*	*Lab 10:: Transfer data serially between two kits*	*Lab 13:DC motor speed measurement and control.*
S-6	SLO-1	*8051 - architecture*	*Internal Interrupts*	*Parallel and serial ADC interface*	*File selection register*	*ARM exceptions*
	SLO-2	*Internal memory organization*	*External Interrupts*	*DAC interface*	*Indirect data addressing register*	*Introduction to Thumb instructions*
S-7	SLO-1	*Register banks, PSW*	*IE register*	*Sensor interfacing*	*memory organization- Program memory*	*Pipeline ARM organization (3,5 stage)*
	SLO-2	*Ports*	*IP register*	*Stepper motor interfacing*	*Data memory*	*ARM instruction set: data processing instructions – arithmetic operations*
S-8	SLO-1	*Classification of instruction set*	*Clock circuit*	*DC motor interfacing and PWM*	*Watch dog timer*	*data processing instructions –bitwise logical, register movement & comparisons operations*
	SLO-2	*Addressing modes*	*RESET circuit*	*RTC interfacing*	*Power down/ sleep mode*	*Data transfer instructions – single load/store*

S 9-10	SLO-1 / SLO-2	*Lab 2:Arithmetic operation using 8051 microcontrollers*	*Lab 5:Square root computation*	*Lab 8:8 bit DAC using 8051 microcontroller*	*Lab 11: Internal interrupt generation*	*Lab 14: Basic ARM ALP(32-bit addition, subtraction, multiplication)*
S-11	SLO-1	*Instruction set - Data transfer,*	*Semiconductor memory -Types*	*Introduction to 8051 programming in C*	*PIC 16F84A parallel ports*	*Data transfer instructions – multiple load/store*
	SLO-2	*Instruction set - Logical operations, data exchange*	*Memory address decoding*	*Data types for 8051 C*	*Clock and oscillator circuits*	*Data transfer instructions –swap*
S-12	SLO-1	*Instruction set - arithmetic operations*	*8031/51 Interfacing with External ROM and RAM*	*I/O programming and logical operations in 8051 C*	*Instruction set – Arithmetic instructions*	*Control flow instructions – Branch, conditional branch*
	SLO-2	*Instruction set – Call, return*	*Pins PSEN, EA*	*Accessing code ROM space in C*	*logic instructions*	*Control flow instructions –jump*
S-13	SLO-1	*Instruction set – bit jump*	*Data memory space*	*Programming timers in 8051C*	*Instruction set – test and skip instructions*	*AMBA bus architecture*
	SLO-2	*Instruction set – byte jump*	*Problems on external memory interfacing*	*Calculation of time delays*	*jump instructions*	*ARM development tools – ARMulator*
S 14-15	SLO-1 / SLO-2	*Lab 3:Sorting data, Code conversion using 8051 microcontroller*	*Lab 6:: Delay generation using an on-chip timer using 8051 microcontrollers.*	*Lab 9:8279 Keyboard &display using 8051 controllers.LCD Display using 8051*	*Lab 12: Stepper motor control using 8051*	*Lab 15:Basic ARM binary sorting*

Course Code	18EEC305T	Course Name	POWER SYSTEM PROTECTION	Course Category	C	Professional Core	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the principles of modern power system protection*
CLR-2 :	*Enumerate the various protection schemes*
CLR-3 :	*Acquire the knowledge of protection of Generator, Transformer and Busbar protection system*
CLR-4 :	*Understand the various types of digital protection and relay coordination*
CLR-5 :	*Describe the protection of switchgears in sub-station and its relay setting calculations*
CLR-6 :	*Gain an overall knowledge of power system protection concepts in various applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Recognize the power system protection basics and standards*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	*M*	-	-	-	-	*M*	*M*	*M*
CLO-2 :	*Employ various protective schemes and needed instruments*	*3*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-3 :	*Explain the various equipment protection and its characteristics*	*3*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-4 :	*Familiarise various relay algorithms and applications of digital protection*	*3*	*80*	*75*	*H*	*H*	-	-	*M*	-	-	-	-	-	-	-	*H*	*H*	-
CLO-5 :	*Analyse the use of protection and switchgears*	*3*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-6 :	*Apply power system protection concepts in real time environment*	*3*	*80*	*75*	*H*	*H*	-	-	*M*	-	-	*M*	-	-	-	-	*H*	*H*	*M*

Duration		9	9	9	9	9
S-1	SLO-1	*Introduction to power system protection*	*Over current protection*	*Transformer protection*	*Introduction to Digital relays - Numerical relays*	*Fuses – Types*
	SLO-2	*Basic requirements*	*Characteristics of over current protection*	*Differential protection*	*Functional blocks of numerical relay*	*Construction of fuse*
S-2	SLO-1	*Main components of protections*	*Over current protection coordination*	*Percentage biased differential protection*	*Numerical over current relay algorithm*	*Fuse characteristics*
	SLO-2	*Functions of protection*	*Relay setting calculation*	*Differential protection scheme for various types of three phase transformé*	*Numerical over current relay Flow chart*	*Applicaion of fuse*
S-3	SLO-1	*IEC – IEEE standards for protection*	*Numerical problems for over current setting*	*Numerical problems for differential protection*	*Numerical differential relay algorithm*	*Theory of current interruption,*
	SLO-2	*ANSI standards for protection*	*Numerical problems for over current setting*	*Numerical problems for differential protection*	*Numerical differential relay Flow chart*	*Arc quenching – Interruption theories*
S-4	SLO-1	*Zone of protection - overlapping*	*Directional over current relay*	*Magnetizing inrush current and harmonics restraint method*	*Numerical distance relay algorithm*	*Recovery and Restriking voltages*
	SLO-2	*Primary – back up protection*	*Charcateristics of directional over current relay*	*Over fluxing protection, Incipient fault protection - Buchholz Relay*	*Numerical distance relay Flow chart*	*RRRV*
S-5	SLO-1	*Unit, Non – Unit protection*	*Principle of distance protection*	*Alternator protection*	*Fibre Optic based relaying*	*Types of circuit breakers -Bulk oil, Minimum oil circuit breakers*
	SLO-2	*Applications of unit, non-unit protection*	*Charcateristics of distance relay*	*stator protection*	*Fibre optic relay Functions - application*	*Functions - applications*
S-6	SLO-1	*Other types of protection schemes*	*Simple impedance, Reactance and Mho relay*	*Rotor protection*	*Wide Area Protection - functions*	*Air break, Air blast circuit breakers*
	SLO-2	*Applications of protection schemes*	*Characteristics of impedance realy*	*Protection against abnormal condition - unbalanced loading, Over-speeding*	*Introduction to simulation of relay coordination*	*Functions - applications*
S-7	SLO-1	*Current Transformer for protection*	*Three step distance protection*	*Loss of excitation*	*Applications of digital signal processing tool for protection*	*Sulphur hexafluoride (SF6) and Vacuum circuit breakers*
	SLO-2	*Characteristics – numerical problems*	*Application of three step distance protection*	*Loss of prime mover*	*Functional blocks DSP*	*Applications of SF6 and vacuum circuit breakers*

S-8	SLO-1	*Voltage Transformer for protection*	*Carrier aided protection*	*Bus bar protection scheme*	*AI techniques to power system protection*	*Comparison of circuit breakers*
	SLO-2	*Characteristics of current transformer*	*Main components of carrier aided protection*	*Types of bus bar protection*	*Applications Of artificial intelligence in protection*	*Testing of circuit breaker*
S-9	SLO-1	*Electromechanical relays – construction*	*Bus bar protection scheme*	*Protection against over voltage - diverters,*	*Digital protection - Introduction to RTDS*	*Circuit breakers rating*
	SLO-2	*Relay operation - application*	*Types of bus bar*	*Lightning arrestor*	*Digital substation*	*Relay setting calculation and its operation*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the control methods of frequency in power system*
CLR-2 :	*Understand voltage control methods in power system*
CLR-3 :	*Formulate the economic operation of power system*
CLR-4 :	*Discuss the different methods to reduce losses and cost in power system*
CLR-5 :	*Develop knowledge on operation and control strategies of power system*
CLR-6 :	*Summarize the operation and control of power system*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)
CLO-1 :	*Analyze frequency control in single area and two area system*	3	75	75
CLO-2 :	*Model excitation systems and develop methods of voltage control*	3	75	75
CLO-3 :	*Examine numerical methods of economic dispatch*	3	75	75
CLO-4 :	*Solve unit commitment and optimal power flow problem*	3	75	75
CLO-5 :	*Analyze the functions of modern energy control centre on monitoring, data acquisition and control*	3	75	75
CLO-6 :	*Evaluate the strategies of operation and control*	3	75	75

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Basic concepts of operation and control of power system*	*Need for voltage control*	*Input-output characteristics of thermal units and Heat rate Curve*	*Statement of Unit Commitment problem*	*Operating strategies*
	SLO-2	*Plant and system level control*	*Requirement of reactive power*	*Input-output characteristics of Cost Curve.*	*Problem constraints*	*Control Strategies under abnormal state*
S-2	SLO-1	*Interaction of AVR and ALFC loops*	*DC Excitation system with amplidyne voltage regulator*	*Optimum generation allocation neglecting network losses and inequality constraints*	*Priority List method*	*Concept of modern control centre: monitoring, data acquisition and control*
	SLO-2	*Speed load characteristics*	*Field controlled alternator rectifier excitation*	*Optimum generation allocation neglecting network losses and inequality constraints-numerical approach*	*Priority List method-numerical approach*	*Introduction to SCADA system*
S-3	SLO-1	*Modelling of speed governing mechanisms*	*Static Excitation systems*	*Optimum generation allocation neglecting network losses and including inequality constraints*	*Dynamic programming to unit commitment problem*	*Components of SCADA system*
	SLO-2	*Regulation of two alternators in parallel*	*Brushless AC Excitation systems*	*Optimum generation allocation neglecting network losses and including inequality constraints- numerical approach*	*Algorithmic steps of Dynamic programming*	*Applications of SCADA in power systems*
S 4-5	SLO-1 SLO-2	*Lab 1: Real time data acquisition of electrical parameters*	*Lab 4: Development of voltage controllers using simulation tool*	*Lab 7: Economic dispatch neglecting losses*	*Lab 10: Unit commitment using priority method*	*Lab 13: Study of SCADA systems*
S-6	SLO-1	*Concept of Control area*	*Schematic diagram of brushless excitation system*	*Loss Coefficients*	*Dynamic programming-numerical approach*	*PLC architecture and communication links*
	SLO-2	*Closing ALFC loop*	*Modelling of AVR and Exciter*	*Transmission line loss formula*	*Lagrange Relaxation method*	*State estimation by weighted least square method*
S-7	SLO-1	*Static response of single area system-uncontrolled case*	*Modelling of synchronous generator*	*Incremental cost of received power*	*OPF problem formulations*	*State estimation by weighted least square method-numerical approach*
	SLO-2	*Dynamic response of single area system--uncontrolled case*	*Static performance of AVR loop*	*Penalty factors*	*Constraints in OPF problem*	*Wide area monitoring systems*

S-8	SLO-1	*Proportional plus integral controller*	*Dynamic response of AVR loop*	*Base point and Participation factor method*	*Gradient method of OPF problem*	*Introduction to phasor measurement units*
	SLO-2	*Static response of single area system-controlled case*	*Stability compensation and stability analysis using Bode Plot*	*Base point and Participation factor method-numerical approach*	*Gradient method of OPF problem-numerical approach*	*Comparison of SCADA with PMU*
S 9-10	SLO-1 SLO-2	*Lab 2: Automatic Load frequency control in single area system using simulation tool*	*Lab 5: Stability analysis of AVR loop*	*Lab 8: Economic dispatch including losses*	*Lab 11: Gradient method of OPF problem*	*Lab 14: State estimation using weighted least square method*
S-11	SLO-1	*Dynamic response of single area system-controlled case*	*IEEE Excitation models*	*Economic dispatch by gradient method*	*Linear programming OPF*	*PMU architecture*
	SLO-2	*Modelling of tie line*	*Voltage drop/rise in transmission lines*	*Economic dispatch by gradient method-numerical approach*	*Newton method of OPF*	*Levels of PDC*
S-12	SLO-1	*Modeling of Two area frequency control*	*Methods of voltage control- shunt capacitors, shunt reactors*	*Objectives and constraints in Security constrained economic dispatch*	*Security Constrained OPF-objectives*	*Mathematical formulation of optimal placement of PMUs*
	SLO-2	*Block diagram representation of two area system*	*Methods of voltage control- FACTS devices*	*Security constrained economic dispatch using linear programming*	*Security Constrained OPF-contraints*	*Optimal placement of PMU using linear programming*
S-13	SLO-1	*Static response of two area system*	*Methods of voltage control- tap changing transformer*	*Economic dispatch added to LFC control*	*Introduction to multi objective OPF*	*Need for Integration of Distributed generation*
	SLO-2	*Dynamic response of two area system*	*Numerical approach in tap changing transformer*	*Hydrothermal scheduling neglecting network losses –long term*	*Formulation of combined active and reactive power dispatch*	*Control and operation of distributed generation*
S 14-15	SLO-1 SLO-2	*Lab 3: Automatic Load frequency control in two area system using simulation tool*	*Lab 6: Study of voltage control techniques*	*Lab 9:Economic dispatch using gradient method*	*Lab 12: Study of numerical methods of OPF problem*	*Lab 15: Performance characteristics of Solar PV system and study of PV emulator*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Acquire skills to solve real world problems in analyzing the electric circuits, analog and digital electronics*
CLR-2 :	*Acquire skills to solve real world problems in electromagnetic theory, power electronics and control system*
CLR-3 :	*Acquire skills to solve real world problems in electrical machines, measurements and Instrumentation*
CLR-4 :	*Acquire skills to solve real world problems in Generation, Transmission and Distribution networks and its analysis*
CLR-5 :	*Acquire skills to solve real world problems in microcontrollers and its applications*
CLR-6 :	*Acquire skills to solve real world problems for competitive examinations in Electrical and Electronics Engineering*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Practice and gain confidence and competence to solve problems in analyzing the electric circuits, analog an ,digital electronics*	3	85	80	H	H	H	H	-	L	L	L	L	L	-	L	H	H	M
CLO-2 :	*Practice and gain confidence and competence to solve problems in electromagnetic theory, power electronics and control system*	3	85	80	H	H	M	M	-	L	L	L	L	L	-	L	H	H	M
CLO-3 :	*Practice and gain confidence and competence in electrical machines, measurements and Instrumentation*	3	85	80	H	H	M	M	-	L	L	L	L	L	-	L	H	H	L
CLO-4 :	*Practice and gain confidence and competence in Generation, Transmission and Distribution networks and its analysis*	3	85	80	H	H	M	M	-	L	L	L	L	L	-	L	H	H	M
CLO-5 :	*Practice and gain confidence and competence in microcontrollers and its applications*	3	85	80	H	H	H	H	-	L	L	L	L	L	-	L	H	H	L
CLO-6 :	*Practice and gain confidence and competence to solve problems for competitive examinations in Electrical and Electronics Engineering*	3	85	80	H	H	M	M	-	L	L	L	L	L	-	L	H	H	L

Duration (hour)		3	3	3	3	3
S-1	SLO-1	*Tutorial on AC and DC circuits*	*Tutorial on Electric Field, Dielectric concepts, Maxwell Equation*	*Tutorial on Transformers, generators and motors*	*Tutorial on ac and dc transmission concepts and distribution systems*	*Tutorial on 8085 microcontroller basic design*
	SLO-2	*Problem Solving*	*Problem Solving*	*Problem Solving*	*Problem Solving*	*Problem Solving*
S-2	SLO-1	*Tutorial on characteristics of diode, amplifiers and OPAMP*	*Tutorial on semiconductor power devices , rectifier and inverter operation*	*Tutorial on bridges and potentiometer*	*Tutorial on per unit quantities and load flow methods*	*Tutorial on microcontroller programming*
	SLO-2	*Problem Solving*	*Problem Solving*	*Problem Solving*	*Problem Solving*	*Problem Solving*
S-3	SLO-1	*Tutorial on combinational and sequential logic circuit*	*Tutorial on Controllers, transient and steady state analysis of LTI systems*	*Tutorial on phase, time and frequency measurement*	*Tutorial on protection methods and circuit breakers*	*Tutorial on interface*
	SLO-2	*Problem Solving*	*Problem Solving*	*Problem Solving*	*Problem Solving*	*Problem Solving*

ACADEMIC CURRICULA

Professional Core Courses

ELECTRONICS AND COMMUNICATION ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18ECC203J	Course Name	MICROPROCESSOR, MICROCONTROLLER AND INTERFACING TECHNIQUES	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18ECC103J	Co-requisite Courses	Nil	Progressive Courses	18ECE204J, 18ECE205J
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand basic architecture of Intel 8086 microprocessor and Intel 8051 Microcontroller*
CLR-2 :	*Familiarize with the programming and interfacing of microprocessors,microcontrollers with memory and peripheral chips*
CLR-3 :	*Interface microprocessor/microcontroller to external input/output devices, perform input/output device programming*
CLR-4 :	*Use computer to write assembly language programs, run them by downloading them to the target microprocessor*
CLR-5 :	*Understand hardware, software interrupts, their applications, properties and interfacing of the parallel and serial ports*
CLR-6 :	*Provide strong foundation for designing real world applications using microprocessors and microcontrollers.*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Recall and apply a basic concept of digital fundamentals to Microprocessor based personal computer system*	*1*	*80*	*70*		*H*			*L*										
CLO-2 :	*Solve basic binary math operations using the microprocessor. / microcontroller*	*2*	*90*	*80*	*M*											*M*			
CLO-3 :	*Demonstrate programming proficiency using the various addressing modes and data transfer instructions of the target microprocessor / microcontroller*	*3*	*90*	*80*		*M*	*H*		*H*										*L*
CLO-4 :	*Distinguish and analyze the properties of Microprocessors & Microcontrollers.*	*1*	*80*	*70*		*M*										*H*			
CLO-5 :	*Train their practical knowledge through laboratory experiments.*	*3*	*90*	*80*		*M*	*M*		*H*					*H*					*H*
CLO-6 :	*Design, program, interface external devices, memory chips, various peripheral chips with microprocessor / microcontroller*	*3*	*90*	*80*			*M*		*H*							*H*	*L*		*M*

		Intel 8086 – Architecture, Signals and Features	Programming with Intel 8086	8086 Interfacing with Memory and Programmable Devices	Intel 8051 – Architecture and Programming	Interfacing of 8051
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction: History of computers, Block diagram of a microcomputer*	*Addressing modes of 8086*	*Semiconductor memory interfacing*	*Introduction: Differences between microprocessor and microcontroller*	*8051 parallel ports, and*
	SLO-2	*Intel 80x86 evolutions*		*Dynamic RAM interfacing*	*Intel's family of 8-bit microcontrollers, and feature of 8051 microcontroller*	*its programming*
S-2	SLO-1	*Features of 8086 microprocessor*	*Instruction Set of 8086: Data Transfer Instructions*	*Programmable Peripheral Interface 8255*	*Architecture of 8051*	*8051 timers, and*
	SLO-2	*Register organization of 8086*	*Example programs*	*Interfacing 8255 with 8086 and programming*		*its programming*
S-3	SLO-1	*Architecture of 8086*	*Data Conversion Instructions, Arithmetic Instructions*	*Interfacing ADC with 8086 and programming*	*Signal descriptions of 8051*	*8051 interrupts, and*
	SLO-2		*Example programs*	*Interfacing DAC with 8086 and programming*		*its programming*
S-4,5	SLO-1 SLO-2	*Lab-1: (a) Learning to Program with 8086 processor kit; Learning the hardware features of the 8086 processor kit*	*Lab-4: General Purpose Programming in 8086*	*Lab-7: Interfacing DAC / ADC with 8086 / 8051*	*Lab-10: Programming timer / counter in 8086 / 8051*	*Lab-13: Simulation of 8051 using Keil Software*
S-6	SLO-1	*Instruction queue and pipelining*	*Logical instructions and Processor control instructions*	*Stepper Motor interfacing*	*Register set of 8051*	*8051 serial port, and*
	SLO-2	*Segmentation of memory used with 8086*	*Example programs*		*Operational features of 8051*	*its programming*
S-7	SLO-1	*Methods of generating physical address in 8086*	*String instructions*	*Programmable Interval Timer 8254*	*Memory and I/O addressing by 8051*	*Interfacing program memory with 8086*
	SLO-2	*Pin signals of 8086: Common signals*	*Example programs*	*Interfacing 8254 with 8086 and programming*	*Interrupts and Stack of 8051*	*Interfacing data memory with 8086*

S-8	SLO-1	*Minimum mode signals*	*Branch Instructions*	*Programmable Interrupt Controller 8259*	*Addressing modes of 8051*	*Interfacing input devices: push-button / matrix keypad*
	SLO-2	*Maximum mode signals*	*Example programs*	*Interfacing 8259 with 8086 and programming*		*Example programs*
S-9,10	SLO-1 SLO-2	*Lab-2: General Purpose Programing in 8086*	*Lab-5: Simulation of 8086 using MASM Software / 8086 Emulator*	*Lab-8: Interfacing DC motor / stepper motor / servo motor with 8086 / 8051*	*Lab-11: Programming interrupts in 8086 / 8051*	*Lab-14: Model Practical Exam*
S-11	SLO-1	*Minimum mode 8086 system, and*	*Assembly Language Programming of 8086*	*Programmable Keyboard / Display Controller 8279*	*8051 Instruction Set: Arithmetic and Logical Instructions*	*Interfacing display devices: LED / 7-segment / LCD displays*
	SLO-2	*Timings*	*Assembly Language Programming of 8086*	*Interfacing 8279 with 8086 and programming*	*Example Programs*	*Example programs*
S-12	SLO-1	*Maximum mode 8086 system, and*	*Stack structure, and*	*Programmable Communication Interface 8251 USART*	*Data Transfer Instructions*	*Interfacing DAC*
	SLO-2	*Timings*	*related programming*	*Interfacing 8251 with 8086 and programming*	*Example Programs*	*Interfacing ADC*
S-13	SLO-1	*Intel 8088 Microprocessor: Pins signals and Architecture*	*Interrupt structure, and*	*DMA Controller 8257*	*Boolean Variable Instructions and Branch Instructions*	*Interfacing DC motor / stepper motor / servo motor*
	SLO-2	*Differences between 8086 & 8088 microprocessors*	*related programming*	*Interfacing 8257 with 8086 and programming*	*Example Programs*	*Example programs*
S-14,15	SLO-1 SLO-2	*Lab-3: General Purpose Programing in 8086*	*Lab-6: Interfacing 8255 with 8086 / 8051*	*Lab-9: General Purpose Programming in 8051*	*Lab-10: Programming serial communication in 8086 / 8051*	*Lab-15: End-Semester Exam*

Course Code	18ECC204J	Course Name	DIGITAL SIGNAL PROCESSING	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18ECC104T	Co-requisite Courses	Nil	Progressive Courses	18ECE243J, 18ECE244J, 18ECE245T
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the operations involved in digital conversion of analog signals.*
CLR-2 :	*Realize a digital filter in direct, cascade and parallel forms. Perform efficient computation of DFT using radix 2 FFT*
CLR-3 :	*Design digital FIR filter using windowing technique and frequency sampling methods.*
CLR-4 :	*Design IIR filters using both direct method and method involving conversion of analog filter to digital filter*
CLR-5 :	*Understand sampling rate conversion and apply it for applications like QMF, sub band coding.*
CLR-6 :	*Utilize the techniques for digital conversions, filter designs and multi rate signal processing to solve real time problems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Acquire knowledge of sampling and quantization and understand the errors that arise due to quantization.*	2	90	70	H	M	-	L	-	-	-	-	-	-	-	-	L	L	M
CLO-2 :	*Understand the concept of DFT and its efficient computation by using FFT algorithm.*	2	95	75	H	M	-	L	-	-	-	-	-	-	-	-	L	L	M
CLO-3 :	*Design FIR filters using several methods*	2	85	70	-	M	H	H	-	-	-	-	-	-	-	-	L	L	H
CLO-4 :	*Design IIR filters using several methods*	2	85	80	-	M	H	H	-	-	-	-	-	-	-	-	L	L	H
CLO-5 :	*Understand the basics of multirate DSP and its applications.*	2	90	75	H	M	-	M	-	-	-	-	-	-	-	-	L	L	M
CLO-6 :	*Apply the concepts of digital filter designs and multi rate signal processing for real time signals*	2	80	70	H	M	-	H	-	-	-	-	-	-	-	-	M	M	H

		Signals and Waveforms	Frequency Transformations	FIR Filters	IIR Filters	Multirate signal Processing
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Basic Elements of DSP*	*Realization of digital filters Direct form of realization*	*Design of Linear Phase FIR filters General consideration*	*Design of digital IIR filters Comparison of FIR and IIR filters*	*Introduction to Multirate signal processing*
	SLO-2	*Advantages and applications of DSP*	*Cascade form of realization*	*Causality, its implication Characteristics of practical frequency selective filters*	*Analog IIR filter design*	*Decimation*
S-2	SLO-1	*Continuous Time vs Discrete time signals*	*Parallel form of realization*	*Frequency response of symmetric FIR filter*	*Properties of Butterworth filters*	*Interpolation*
	SLO-2	*Continuous valued vs discrete valued signals*	*Introduction to DFT*	*N is odd*	*Properties of chebyshev filters Comparison of Butterworth and chebyshev filters*	*Spectrum of interpolated signal*
S-3	SLO-1	*Concepts of frequency in analog signals*	*Computation of DFT*	*Frequency response of symmetric FIR filter*	*Analog IIR filter design*	*Sampling rate conversion by a rational factor I/D*
	SLO-2	*Continuous and discrete time sinusoidal signals*	*Properties of DFT Periodicity, linearity and symmetry properties*	*N is even*	*Design of low pass Butterworth filter*	*Anti-aliasing and anti-imaging filters*
S-4	SLO-1 SLO-2	*Lab 1 :Generation of basic signals*	*Lab 7: Linear convolution*	*Lab 13: Design of digital FIR Low Pass, High Pass filter using rectangular window*	*Lab 19: Design of analog Butterworth filter*	*Lab 25: Interpolation*
S-5	SLO-1 SLO-2	*Lab 2: Unit step, ramp and impulse*	*Lab 8: Circular convolution*	*Lab14: Design of digital FIR Band Pass, Band Stop filter using rectangular window*	*Lab 20: Design of analog Chebyshev filter*	*Lab 26: Effect of interpolation in frequency domain*
S-6	SLO-1	*Sampling of analog signals Sampling theorem*	*Circular convolution*	*Frequency response of anti-symmetric FIR filter*	*Analog IIR filter design*	*Polyphase structure of decimator Polyphase decimation using z transform*
	SLO-2	*Aliasing Quantization of continuous amplitude signals*	*Matrix method and concentric circle method*	*N is odd and N is even*	*Design of low pass Chebyshev filter*	*Polyphase structure of interpolator Polyphase interpolation using z transform*
S-7	SLO-1	*Analog to digital conversion Sample and hold,*	*Efficient Computation of the DFT*	*Design of FIR filters Fourier series method*	*Design of digital filters Impulse invariance method*	*Advantages of multirate DSP*

	SLO-2	Quantization and coding	Divide and Conquer Approach to Computation of the DFT Using FFT	Need for filter design using window Comparison of various windowing techniques	Design of digital filters Bilinear transformation	Applications of multirate DSP
S-8	SLO-1	Oversampling A/D converters	N Point DFT Decimation-in-Time FFT Radix-2 FFT Algorithm	Filter Design using windowing technique	Design of digital filters Impulse invariance method	Practical Applications of multirate DSP
	SLO-2	Digital to analog conversion Sample and hold	N Point DFT Decimation-in-Frequency FFT	Rectangular window	Design of digital filters Bilinear transformation	interfacing of digital systems with different sampling rates
S-9	SLO-1 SLO-2	Lab 3: Generation of waveforms	Lab9: Autocorrelation and cross correlation	Lab 15: Design of digital FIR Low Pass and High Pass filter using Hanning and Hamming window	Lab 21: Design of digital Butterworth filter using impulse invariance method	Lab 27: Decimation
S-10	SLO-1 SLO-2	Lab 4: Continuous and discrete time	Lab10: Spectrum analysis using DFT	Lab 16: Design of digital FIR Band Pass and Band Stop filter using Hanning and Hamming window	Lab 22: Design of digital Butterworth filter using bilinear transformation	Lab 28: Effect of decimation in frequency domain
S-11	SLO-1	Oversampling D/A converters	Radix-2 FFT Algorithm Implementation of FFT Using DIT	Filter Design using windowing technique Hanning window	Design of digital Chebyshev filters	Practical Applications of multirate DSP Sub band coding of speech signals
	SLO-2	Quantization noise	Implementation of FFT Using DIF	Filter Design using windowing technique Hamming window	Impulse invariance method	Filter banks Analysis filter bank
S-12	SLO-1	Errors due to truncation	IDFT	Filter Design using windowing technique	Design of digital Chebyshev filters	Synthesis filter bank
	SLO-2	Probability of error	Using DIT FFT	Black mann window	Bilinear transformation	Subband coding filterbank
S-13	SLO-1	Errors due to rounding	IDFT	Design of FIR filters	Frequency transformation in analog domain	Quadrature Mirror Filter
	SLO-2	Probability of error	Using DIF FFT	Frequency sampling method	Frequency transformation in digital domain	Alias free filter bank
S-14	SLO-1 SLO-2	Lab 5: Study of sampling theorem	Lab 11: Efficient computation of DFT using FFT	Lab 17: Design of digital FIR Low Pass, High Pass, Band pass and band stop filter using Black mann window	Lab 23: Design of digital Cheby shev filter using impulse invariance method	Lab 29: Design of anti-aliasing filter
S-15	SLO-1 SLO-2	Lab 6: Aliasing effects	Lab12: Computation of IDFT	Lab 18: Design of digital FIR filter using frequency sampling method	Lab 24: Design of digital Cheby shev filter using bilinear transformation	Lab 30: Design of anti-imaging filter

Course Code	18ECC205J	Course Name	ANALOG AND DIGITAL COMMUNICATION	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18MAB203T	Co-requisite Courses	Nil	Progressive Courses	18ECC301T, 18ECC302J, 18ECE221T & 18ECE223T
Course Offering Department	ECE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the need for modulation, various Amplitude modulators/demodulators, frequency modulators, demodulators*
CLR-2 :	*Comprehend the radio transmitters, receivers using modulators and demodulators and to analyze the noise performance*
CLR-3 :	*To introduce basics of Digital modulation and detection techniques*
CLR-4 :	*To analyze the pass band data transmission techniques in terms of probability of error*
CLR-5 :	*To introduce basics of spread spectrum techniques and information theory concepts*
CLR-6 :	*Gain hands-on experience to put theoretical concepts learned in the course to practice.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the concepts of analog modulation and demodulation techniques*	*2*	*80*	*70*	*M*	-	-	-	-	-	-	-	-	*H*	-	-	*H*	-	-
CLO-2 :	*Learn the function of radio transmitters and receivers and familiarize with noise performance of various receivers*	*2*	*85*	*75*	-	*M*	*H*	-	-	-	-	-	-	-	-	-	*H*	-	-
CLO-3 :	*Understand various digital modulation schemes and matched filter receiver*	*2*	*75*	*70*	*M*	-	-	-	-	-	-	-	-	-	-	-	-	*M*	*H*
CLO-4 :	*Understand and analyze various digital pass band data transmission schemes*	*2*	*85*	*80*	-	-	-	*M*	-	-	-	-	-	-	-	-	-	*M*	-
CLO-5 :	*Understanding data transmission using spread spectrum and error coding techniques*	*2*	*85*	*75*	-	*H*	-	-	-	-	-	-	-	-	-	-	*M*	-	*H*
CLO-6 :	*Analyze the operation of analog and digital communication systems and take measurement of various communication systems to compare experimental results in the laboratory with theoretical analysis*	*2*	*85*	*75*	-	-	*H*	-	*H*	-	-	-	*H*	-	-	*M*	-	*M*	*H*

		Analog Modulation	Radio Transmitters and Receivers	Digital Modulation System and Baseband Detection	Passband Data Transmission	Spread Spectrum Techniques and Information theory Concepts
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Modulation, Need for Modulation,*	*AM transmitter : Low Level,*	*Pulse modulation systems, Overview of PAM,PWM,PPM*	*Overview of ASK, FSK, PSK*	*Spread spectrum Communications, Frequency Hopping Spread Spectrum (FHSS)*
	SLO-2	*Amplitude Modulation, Types of Amplitude Modulation*	*AM transmitter : High Level Transmitter*	*Pulse modulation systems, Overview of PAM,PWM,PPM*	*Overview of ASK, FSK, PSK*	*Spread spectrum Communications, Frequency Hopping Spread Spectrum (FHSS)*
S-2	SLO-1	*Double sideband Full carrier*	*FM transmitter: Direct Method*	*Pulse modulation systems, Sampling and quantization*	*Generation, Signal Space Diagram and detection of FSK*	*Direct Sequence Spread Spectrum (DSSS)*
	SLO-2	*Double sideband Full carrier*	*FM transmitter: Direct Method*	*Pulse modulation systems, Sampling and quantization*	*Generation, Signal Space Diagram and detection of FSK*	*Direct Sequence Spread Spectrum (DSSS)*
S-3	SLO-1	*Double sideband Suppressed carrier*	*FM transmitter: Indirect Method*	*PCM systems*	*Probability of Error for FSK*	*Direct Sequence Spread Spectrum (DSSS)*
	SLO-2	*Single sideband Suppressed carrier, VSB*	*FM transmitter: Indirect Method*	*Bandwidth of PCM, PCM TDM signal multiplexing, Limitations of PCM system*	*Probability of Error for FSK*	*Code Division Multiple Access of DSSS*
S 4-5	SLO-1 SLO-2	*Lab-1: AM modulator and Demodulator*	*Lab-4: Pre emphasis and De-emphasis*	*Lab-7: DPCM and its Demodulation*	*Lab-10: QPSK Modulation and Demodulation*	*Lab-13: Mini Project*
S-6	SLO-1	*Generation of AM waves: Linear method-Collector modulator*	*Classification of radio receiver, Functions and Characteristics of radio receiver*	*Data formatting*	*Generation, Detection, Signal Space Diagram of PSK*	*Code Division Multiple Access of DSSS*
	SLO-2	*Generation of AM waves: Linear method- Collector modulator*	*Tuned Radio Frequency receiver*	*Data formatting*	*Generation, Detection, Signal Space Diagram of PSK*	*OFDM Communication*
S-7	SLO-1	*Non-linear Modulation-Balanced Modulator*	*Super-heterodyne receiver- AM*	*Differential PCM (DPCM)*	*Probability of Error for PSK*	*OFDM Communication*
	SLO-2	*Non-linear Modulation-Balanced Modulator*	*Super-heterodyne receiver- AM*	*Differential PCM (DPCM)*	*Probability of Error for PSK*	*OFDM Communication*

S-8	SLO-1	Demodulation of AM waves : Linear diode detector	Super-heterodyne receiver- FM	Delta modulation (DM)	Generation, signal space diagram and detection of QPSK	Measures of Information
	SLO-2	Demodulation of AM waves : Linear diode detector	Super-heterodyne receiver- FM	Delta modulation (DM), Noise in DM	Generation, signal space diagram and detection of QPSK	Measures of Information
S 9-10	SLO-1 SLO-2	Lab-2: DSB-SC modulator and demodulator	Lab-5: PAM,PPM,PWM modulation and demodulation	Lab-8: DM and its Demodulation	Lab-11: DPSK Modulation and Demodulation	Lab-14: Model Practical Exam
S-11	SLO-1	Frequency modulation, Types of FM	Sources of Noise	Demodulation and detection process	Probability of Error for QPSK	Source encoding, Shannon's Channel capacity theorem
	SLO-2	Narrow Band FM, Wide Band FM, Phase modulation	Sources of Noise	Demodulation and detection process	Probability of Error for QPSK	Shannon's Channel capacity theorem
S-12	SLO-1	Generation of Narrowband FM	Noise in AM (Envelope Detection),	Maximum likelihood receiver structure, Matched filter receiver	Generation, signal space diagram and detection of π/4 QPSK	Linear block codes
	SLO-2	Generation of Narrowband FM	Noise in AM (Envelope Detection),	Maximum likelihood receiver structure, Matched filter receiver	Generation, signal space diagram and detection of π/4 QPSK	Linear block codes
S-13	SLO-1	Demodulation of FM : Foster seely discriminator	Noise in FM	Probability error of the Matched filter, Inter symbol interference, Eye pattern	Generation, signal space diagram and detection of QAM	Cyclic codes
	SLO-2	Demodulation of FM : Foster seely discriminator	Threshold effect, Pre-emphasis and De-emphasis	Probability error of the Matched filter, Inter symbol interference, Eye pattern	Generation, signal space diagram and detection of QAM	Cyclic codes
S 14-15	SLO-1 SLO-2	Lab-3: FM Modulator and Demodulator	Lab-6: Pulse Code Modulation and Demodulation	Lab-9: PSK Modulation and Demodulation	Lab-12: BER performance analysis of various Modulation Schemes	Lab-15: University Practical Exam

Course Code	18ECC206J	Course Name	VLSI DESIGN	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18ECC103J	Co-requisite Courses	Nil	Progressive Courses	18ECE301J
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Use Verilog HDL as a design-entry language for FPGA in electronic design automation of digital circuits*
CLR-2 :	*Design, construct and simulate VLSI adders and multipliers.*
CLR-3 :	*Understand MOSFET operation*
CLR-4 :	*Implement a given logic function using appropriate logic styles for improved performance*
CLR-5 :	*Understand basic processes in IC fabrication, steps in the fabrication of MOS ICs, and as well the layout design rules.*
CLR-6 :	*Use engineering tools such as HSPICE / Modelsim / Xilinx to design experiments, gain experience with the design and analysis of MOS circuits and systems.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Design and implement digital circuits using Verilog HDL to simulate and verify the designs.*	*3*	*85*	*75*	-	*H*	*H*	-	*H*	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Design general VLSI system components, adder cells and multipliers to address the design of datapath subsystem.*	*3*	*85*	*75*	-	*H*	*H*	-	*H*	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Examine the characteristics of MOS transistors*	*2*	*80*	*70*	*H*	*M*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Examine CMOS inverter and other complex logic gates designed using different logic styles*	*2*	*80*	*70*	-	*L*	*L*	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Explain how the transistors are built, and understand the physical implementation of circuits.*	*2*	*80*	*70*	-	*L*	*L*	-	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Use HSPICE computer analysis program and Verilog HDL for simulation and analysis of MOS circuits and building blocks*	*3*	*85*	*75*	-	-	-	-	-	-	-	-	*H*	*M*	*L*	*M*	-	*L*	*M*

Duration (hour)		Introduction to Verilog HDL & Coding	Subsystem Design	MOS Transistor	CMOS Inverter and Circuit Design Styles	Microelectronic Materials
		15	15	15	15	15
S-1	SLO-1	*Introduction to HDL & Verilog HDL*	*General VLSI System Components: Multiplexers*	*Generic overview of the MOS device: MOS transistor symbols*	*CMOS Inverter Characteristics: Operation and properties of static CMOS inverter*	*Properties of basic materials used in microelectronics: Silicon, Silicon dioxide*
	SLO-2	*Introduction to Verilog HDL, modules and ports*	*Decoders*	*MOS structure: accumulation, depletion, inversion; nMOS transistor: cutoff, linear, saturation regions of operation*	*VTC of static CMOS inverter*	*Polysilicon and Silicon Nitride*
S-2	SLO-1	*Lexical Conventions: White Space and Comments, Operators*	*Comparators*	*MOS Transistor under Static Conditions: The threshold voltage*	*DC Inverter Calculations*	*IC Fabrication: Wafer Formation, Photolithography,Well,Channel Formation*
	SLO-2	*Numbers, Strings, Identifiers, System Names, and Keywords*	*priority encoder*	*Resistive operation*	*Symmetrical Inverter*	*Silicon Dioxide (SiO_2), Isolation, Gate Oxide*
S-3	SLO-1	*Verilog Data Types: Nets, Register Variables, Constants*	*shift and rotate operations*	*Saturation region*	*Inverter switching characteristics*	*Gate, Source/Drain Formations, Contacts and Metallization, Passivation, Metrology*
	SLO-2	*Referencing Arrays of Nets or Regs*	*Adders: Standard adder cells*	*Current-voltage characteristics*	*Output capacitance*	*Recurring Process: Diffusion, Ion Implantation, Deposition, Etching, Planarization*
S-4, 5	SLO-1 SLO-2	*Lab-0: Verilog Operators: Arithmetic, Bitwise, Reduction, Logical, Relational, Shift, Conditional, Concatenation, Expressions and Operands, Operator Precedence*	*Lab-3: Design using FSM and ASM charts*	*Lab-6: Realization of VLSI multipliers - I*	*Lab-9: Design and Analysis of CMOS Inverter using HSPICE*	*Lab-12: Design and Analysis of 4-input Dynamic NAND gate using HSPICE*
S-6	SLO-1	*Verilog modelling: Gate-level modelling*	*Ripple Carry Adder (RCA)*	*Dynamic behavior: MOSFET Capacitances, MOS structure capacitances*	*Secondary Parasitic Effects: Leakage Currents, Parasitic Resistances*	*Simplified CMOS Process flow*
	SLO-2	*Realization of Combinational and sequential circuits*	*Carry Look-Ahead Adder (CLA)*	*Channel capacitance and Junction (or, depletion) capacitances*	*Inverter layout*	
S-7	SLO-1	*Compilation and simulation of Verilog code*	*Carry Select Adder (CSL)*	*Parasitic Resistances, viz., Drain and Source Resistance, Contact Resistance*	*Power-Delay Product: Static Power Consumption*	*Layout design rules: Well rules, transistor rules*

	SLO-2	Test bench	Carry Save Adder (CSA)	Non-ideal I-V effects: Mobility Degradation, Velocity Saturation	Dynamic Power Consumption, Total Power Consumption, PDP	Contact rules, metal rules, via rules and other rules
S-8	SLO-1	Dataflow modelling	Carry Skip Adder (CSK)	Channel Length Modulation, Threshold Voltage Effects	CMOS Circuit Design Styles: Static CMOS logic styles	Gate Layouts
	SLO-2	Realization of Combinational and sequential circuits	Carry Bypass Adder (CBA)	Leakage, Temperature Dependence, Geometry Dependence, Subthreshold Current	CMOS circuits, pseudo-nMOS, tristate circuits, clocked CMOS circuits	Stick diagrams
S-9, 10	SLO-1	Lab-1: Realization of combinational and sequential circuits using gate-level and dataflow modeling	Lab-4: Realization of VLSI adders - I	Lab-7: Realization of VLSI multipliers - II	Lab-10: (a) Design, Analysis of complex CMOS gate using HSPICE (b) Design, Analysis of Pseudo-NMOS gates using HSPICE	Lab-13: Model Practical Examination
	SLO-2					
S-11	SLO-1	Behavioral modelling	Multipliers: Multiplication (unsigned, shift/add multiplication algorithms, multiplication of signed numbers, types of multiplier architectures)	Short-channel MOSFETS: Hot carriers, Lightly-Doped Drain (LDD)	Differential Cascade Voltage Switch Logic (DCVSL), Pass Transistor Logic (PTL)	CMOS Process Enhancements: Transistors (Multiple Threshold Voltages and Oxide Thicknesses, Silicon-on-Insulator, High-k Gate Dielectrics, Higher Mobility, Plastic Transistors,)
	SLO-2	Realization of Combinational and sequential circuits	Braun multiplier	MOSFET scaling	Dynamic CMOS logic styles: Basic dynamic logic	
S-12	SLO-1	Switch-level modelling	Baugh-Wooley multiplier	Short-channel effects: Negative Bias Temperature Instability, oxide breakdown	Signal integrity issues in dynamic design	Interconnects
	SLO-2	Realization of MoS circuits	Wallace Tree multiplier	Drain-Induced Barrier Lowering (DIBL), Gate-Induced Drain Leakage (GIDL), Gate Tunnel Current	Signal integrity issues in dynamic design	Circuit elements
S-13	SLO-1	Design using FSM	Booth multiplier	Tutorials	Domino Logic Circuits: Differential Domino logic, multiple-output domino	Beyond conventional CMOS
	SLO-2	Realization of sequential circuits	Booth multiplier	Tutorials	Compound domino, NORA, TSPC	Tutorials
S-14, 15	SLO-1	Lab-2: (a) Realization of digital circuits using behavioral modeling (b) Realization of MOS circuits using switch-level mdeling	Lab-5: Realization of VLSI adders - II	Lab-8: Realization of RAM & ROM	Lab-11:(a)Design,Analysis of AND/NAND gate in DCVSL using SPICE (b) Design, Analysis of Pass-Transistor gates and CPL gates using HSPICE	Lab-14: End-Semester Practical Examination
	SLO-2

Course Code	18ECC301T	Course Name	WIRELESS COMMUNICATION	Course Category	C	Professional Core	L	T	P	C
							3	1	0	4

Pre-requisite Courses	18ECC205J, 18ECC105T	Co-requisite Courses	Nil	Progressive Courses	18ECE220T
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the elements of Wireless Communication and mobile communications*
CLR-2 :	*Understand the Mobile Radio Wave Propagation - Large Scale Fading*
CLR-3 :	*Analyze how to apply Mobile Radio Wave Propagation - Small Scale Fading*
CLR-4 :	*Study the Capacity and Diversity concepts in wireless communications*
CLR-5 :	*Acquire the knowledge of Wireless System and Standards*
CLR-6 :	*Understand and design various wireless systems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire the knowledge of Wireless communication and basic cellular concepts*	2	75	60	H	-	-	-	-	-	-	-	-	-	-	M	M	-	L
CLO-2 :	*Understand` the essential Radio wave propagation and mobile channel models*	2	75	60	H	H	H	H	-	-	-	-	-	-	-	M	M	-	H
CLO-3 :	*Familiarize about Various performance analysis of mobile communication system.*	2	75	60	H	H	H	-	-	-	-	-	-	-	-	-	-	-	H
CLO-4 :	*Attain the knowledge of Diversity and capacity concepts*	2	75	60	H	H	-	-	-	-	-	-	-	-	-	-	-	-	H
CLO-5 :	*Be familiar with the various standards of Mobile Communication Systems*	2	75	60	H	-	-	-	-	-	-	-	-	-	-	M	M	-	L
CLO-6 :	*Explore the various concepts of wireless communication, its design with respect to fading and link performance*	2	75	60	H	H	H	H	M	-	-	-	-	M	-	M	M	-	H

Duration (hour)		Wireless communication: Mobile communications	Large Scale Fading	Small Scale Fading	Improvement on Link performance	Wireless systems and standards
		12	12	12	12	12
S-1	SLO-1	*Introduction to wireless communication and mobile radio communication*	*Introduction to Radio wave Propagation*	*Introduction Small scale multipath propagation*	*Introduction to diversity, equalization and capacity*	*AMPS Voice modulation Process*
	SLO-2	*Classification of wireless communications - simplex, half duplex, dull duplex*	*Large scale and small scale fading*	*Impulse response model of multipath channel*		
S-2	SLO-1	*Paging and Cordless systems*	*Friis transmission equation- Free space propagation model - pathloss model*	*Impulse response model of multipath channel*	*Space diversity*	*GSM system architecture and its interfaces*
	SLO-2	*Cellular telephone systems*		*Small scale multipath measurements - Direct Pulse measurement*	*Scanning diversity*	
S-3	SLO-1	*Timing diagram - landline to mobile*	*Two Ray model*	*Small scale multipath measurements - Sliding correlator measurement*	*Maximal ratio combiner*	*GSM frame structure*
	SLO-2	*Timing diagram - mobile to mobile*		*Small scale multipath measurements - Swept frequency measurement*	*Equal gain diversity*	
S-4	SLO-1	*Basic antenna parameters, Far field and near field*	*Simplified pathloss model*	*Parameters of mobile multipath channels - Time dispersion and Coherent bandwidth*	*Rake Receiver*	*GSM speech operations input - output*
	SLO-2	*Frequency reuse, sectored and omni-directional antennas*	*Emperical model - Okumara*			
S-5	SLO-1	*Channel assignment strategies*	*Emperical model - Hata model*	*Parameters of mobile multipath channels - Doppler spread and Coherent time*	*Capacity in AWGN*	*Forward CDMA process*
	SLO-2	*Handoff and its types*	*Emperical model - Walfish and bertoni model*			
S-6	SLO-1	*Interference and system capacity*	*Piecewise linear model - log normal model*	*Types of fading: Flat and Frequency selective fading*	*Capacity of flat fading channels*	*Reverse CDMA Process*
	SLO-2					
S-7	SLO-1	*Trunking and Grade of Service*	*Shadowing*	*Types of fading: Flat and Frequency selective fading*	*Equalizer and its mode*	*Multicarrier modulation*
	SLO-2		*Combined pathloss and shadowing*			

S-8	SLO-1 SLO-2	*Cell splitting*	*Outage Probabilty*	*Types of fading: Fast and Slow fading*	*Adaptive equalizer block diagram*	*OFDM Transmitter Block diagram*
S-9	SLO-1 SLO-2	*Sectoring*	*Cell Coverage Area*	*Types of fading: Fast and Slow fading*	*Types of Equalizers - elementary level only*	*OFDM Receiver Block diagram*
S-10	SLO-1 SLO-2	*Microcell zone concepts*	*Solving problems – Brewster angle*	*Ricean distribution*	*Introduction to MIMO antennas*	*Importance of Cyclic Prefix*
S-11	SLO-1 SLO-2	*Umbrella cells*	*Solving problems –empirical model*	*Rayleigh distribution*	*Introduction to MIMO antennas*	*Case study - Modern antennas*
S-12	SLO-1 SLO-2	*Solving Problems*	*Solving problems – friis transmission formula*	*Solving problems – Doppler effect*	*Case study :Recent trends in Diversity and MIMO antennas*	*Case study - Modern antennas*

Course Code	18ECC302J	Course Name	MICROWAVE & OPTICAL COMMUNICATIONS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18ECC205J	Co-requisite Courses	Nil	Progressive Courses	18ECE226T & 18ECE323T
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify Microwave active devices and Microwave generators*
CLR-2 :	*Analyze Microwave passive devices*
CLR-3 :	*Explore Microwave Measurements*
CLR-4 :	*Analyze Optical Fibers Optical Sources, Amplifier and Transmitter Optical Detectors , Receiver and Performance Measurements*
CLR-5 :	*Explore Optical Communication System Design and Concepts*
CLR-6 :	*Analyze Microwave and optical components*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire knowledge on the theory of microwave transmission, microwave generators and associated components.*	2	80	70	H	-	-	L	-	-	-	-	-	-	-	-	-	-	L
CLO-2 :	*Analyse microwave passive devices and components.*	2	80	70	H	M	H	H	-	-	-	-	-	-	-	-	L	-	M
CLO-3 :	*Understand microwave measurements and associated techniques with equipment*	2	80	70	H	M	H	M	-	-	-	-	-	-	-	-	M	-	H
CLO-4 :	*Familiarize with the fundamentals of light transmission through fiber*	2	80	70	H	H	-	M	-	-	-	-	-	-	-	-	L	-	L
CLO-5 :	*Design a basic optical communication system.*	2	80	70	H	H	-	H	-	-	-	-	-	-	-	-	M	-	M
CLO-6:	*Understand working principle of microwave components , Microwave measurements, optical sources, detector and fibers*	2	80	70	H	H	H	H	-	-	-	-	-	-	-	-	M	-	H

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to microwaves and optical communications*	*High frequency parameters: S parameters, S matrix analysis for N-port microwave device*	*Impedance matching.*	*Elements of Optical fiber communication*	*Point-to-Point link –Analog system design considerations and design steps*
	SLO-2					
S-2	SLO-1	*History of Microwave Engineering, Microwave transmission and Applications; Maxwell Equations*	*Directional coupler*	*VSWR and Impedance measurement*	*Functional block diagram of a Transmitter and receiver module*	*Point-to-Point link – Digital system design considerations and design steps*
	SLO-2					
S-3	SLO-1	*Microwave Tubes*	*E and H plane Tee*	*Measurement of Power*	*Optical fiber structure, Light Propagation in Optical fibers: Ray theory , Total Internal reflection, Skew rays*	*Digital Link Design: Link power budget*
	SLO-2	*Klystron amplifier*				
S-4-5	SLO-1	*Lab- 1 Characteristics of Reflex Klystron*	*Lab- 4 Gain and radiation pattern of Horn antenna*	*Lab- 7 Practice session*	*Lab- 10 Measurement of Numerical Aperture, propagation and bending losses of optical fiber*	*Lab- 13 Design of basic Optical Communication system using computational tool*
	SLO-2					
S-6	SLO-1	*Reflex Klystron oscillators*	*Magic Tee*	*Measurement of Frequency and Q factor*	*Optical Sources: Light source materials, LED Structures*	*Rise time budget*
	SLO-2					
S-7	SLO-1	*Magnetron oscillators*	*Microwave Circulators, Isolators*	*Insertion loss measurements*	*LED Characteristics*	*Overview of Analog links: Radio over Fiber;*
	SLO-2					
S-8	SLO-1	*Microwave Bipolar Transistors Field effect transistor*	*Attenuators and Phase Shifters*	*Attenuation measurements*	*Semiconductor Laser Diode, Laser Characteristics*	*Key link parameters*
	SLO-2					
S-9-10	SLO-1	*Lab- 2 Study of power distribution in Directional coupler, E plane, H plane and Magic Tee*	*Lab- 5 Characteristics of filters, Microstrip patch antenna and parallel line coupler*	*Lab- 8 DC characteristics of LED and Laser diode*	*Lab- 11 Analysis of Analog optical link*	*Lab- 14 Practice Session*
	SLO-2					
S-11	SLO-1	*IMPATT, TRAPATT and Tunnel diode*	*Rectangular Waveguides*	*Measurement of Scattering parameters*	*Optical Detectors: PIN and APD photo detector*	*Multichannel System: Need for multiplexing*
	SLO-2					*Operational principles of WDM, DWDM*

S-12	SLO-1 SLO-2	*Gunn diode*	*Rectangular Waveguides*	*Measurement of Scattering parameters*	*Responsivity and efficiency of APD*	*WDM Components: Coupler/Splitter, Fabry Perot Filter*
S-13	SLO-1 SLO-2	*Gunn Oscillation modes*	*Power Dividers*	*Functioning details of Vector Network Analyzer; Signal Analyzer; Spectrum analyzers*	*Fiber attenuation and dispersion*	*WDM Components: Optical MEMS switches*
S-14-15	SLO-1 SLO-2	*Lab- 3 Impedance measurement by slotted line method*	*Lab- 6 Design of RF Filters and Amplifier using computational tool*	*Lab- 9 DC characteristics of PIN and APD photo-diode*	*Lab- 12 Analysis of Digital optical link*	*Lab- 15 Study experiment - Gunn Diode (Microwave) and Optical WDMA (Optical)*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce the basic concepts in the field of computer networks.*
CLR-2 :	*Understand the functional aspects of OSI model architecture.*
CLR-3 :	*Acquire knowledge of the Network Layer protocols*
CLR-4 :	*Analyze the various issues and challenges of Transport Layer.*
CLR-5 :	*Familiarize the various Application Layer Protocols.*
CLR-6:	*Utilize the networking concepts to analyze the performance of Routing protocols.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Understand the basic services and concepts related to internetworking.*	2	80	70	H	-	-	-	-	M	M	-	-	-	-	M	H	M	-
CLO-2 :	*Explain the basic OSI model architecture and its lower layer functions.*	2	85	75	H	-	-	-	-	M	M	-	-	-	-	M	H	M	-
CLO-3 :	*Give an insight of the various Network Layer concepts, mechanisms and protocols.*	2	75	70	H	-	-	-	-	M	M	-	-	-	-	M		M	H
CLO-4 :	*Appreciate the services and techniques of Transport Layer.*	2	85	80	H	-	-	-	-	M	M	-	-	-	-	M	-	H	M
CLO-5 :	*Discuss the various services and protocols in Application Layer.*	2	85	75	H	-	-	-	-	M	M	M	-	-	-	M	H		M
CLO-6 :	*Implement and analyze the various Networking concepts and Routing protocols.*	2	80	70	-	-	-	-	H	-	-	-	-	-	-		M		H

Duration (hour)		Data Communication & Networking Basics	Osi Lower Layers	Network Layer	Transport Layer	Application Layer
		15	15	15	15	15
S-1	SLO-1	*Introduction to Data Communication and Networking*	*Network models*	*Introduction to Network Layer*	*Introduction to Transport Layer*	*Introduction to Application Layer*
	SLO-2	*Data transfer modes-Serial and Parallel transmission*	*OSI layer architecture*	*Need for Internetworking*	*TCP/IP Model*	*Application Layer Paradigms*
S-2	SLO-1	*Protocols & Standards*	*Data Link Layer-Introduction*	*Addressing-Classful*	*User Datagram Protocol(UDP)*	*Client Server Interaction*
	SLO-2	*Layered Architecture*	*Link Layer Addressing*	*Addressing-Classful*	*User Datagram Protocol(UDP)*	*Client Server Interaction*
S-3	SLO-1	*Principles of Layering & Description*	*Error Detection*	*Addressing-Classless*	*Transmission Control Protocol(TCP)*	*SIP*
	SLO-2	*Brief description of concepts in OSI & TCP/IP model*	*Error Detection*	*Addressing-Classless*	*Transmission Control Protocol(TCP)*	*SIP*
S 4-5	SLO-1 SLO-2	*Lab 1: To build and configure a simple network of four nodes connected with point-to-point links.*	*Lab 4: To simulate token ring protocol and to study its performance.*	*Lab 7:To simulate CSMA/CA protocol and to study its performance*	*Lab 10: Implementation and study of Selective Repeat protocol.*	*Lab 13: Create a Socket (TCP&UDP) between two computers and enable file transfer between them.*
S-6	SLO-1	*Switching Types- Circuit- & Packet switching*	*Error Correction*	*Network Layer Protocol-IPV4*	*TCP Services & Features*	*Compression Techniques*
	SLO-2	*Switching Types- Message switching, Comparison of switching types*	*Error Correction*	*Internet Protocol(IP)-IPV4*	*TCP Services & Features*	*Compression Techniques*
S-7	SLO-1	*LAN, MAN & WAN*	*Data link control-LLC*	*Internet Protocol(IP)-IPV6*	*Congestion Control*	*Introduction to Cryptography*
	SLO-2	*LAN, MAN & WAN*	*Data link control-LLC*	*Internet Protocol(IP)-IPV6*	*Congestion Control*	*Types, Attacks and Services*
S-8	SLO-1	*Network topologies-Types*	*Data link control-MAC*	*Routing Protocols- Distance Vector& Link State*	*Congestion Control*	*DES*
	SLO-2	*Comparison of topologies*	*Data link control-MAC*	*Routing Issues-Delivery, Forwarding and Routing*	*Congestion Control*	*DES*
S 9-10	SLO-1 SLO-2	*Lab 2: To simulate star and bus network topologies.*	*Lab 5: Implementation of Error detection and Correction scheme.*	*Lab 8: Implementation and study of stop and wait protocols*	*Lab 11: To configure a network using Link State Routing protocol.*	*Lab 14: Implementation of Data Encryption and Decryption.*

S-11	SLO-1	*IEEE standards for LAN-Ethernet*	*Flow & Error Control Protocol*	*Routing Information Protocol-RIP*	*QOS-Quality of Service*	*RSA*
	SLO-2	*Types of Ethernet*	*Flow & Error Control Protocol*	*Routing Information Protocol-RIP*	*QOS-Quality of Service*	*RSA*
S-12	SLO-1	*Token Bus*	*ARQ Schemes*	*Open Shortest Path First-OSPF*	*Techniques to improve QOS*	*Email*
	SLO-2	*Token Ring*	*ARQ Schemes*	*Open Shortest Path First-OSPF*	*Techniques to improve QOS*	*FTP*
S-13	SLO-1	*FDDI*	*HDLC*	*Border Gateway Protocol-BGP*	*Techniques to improve QOS*	*HTTP*
	SLO-2	*FDDI*	*HDLC*	*Border Gateway Protocol-BGP*	*Techniques to improve QOS*	*SNMP*
S 14-15	SLO-1 SLO-2	*Lab 3: To simulate token bus protocol and to study its performance.*	*Lab 6:To simulate CSMA/CD protocol and to study its performance*	*Lab 9: Implementation and study of Go back N protocol.*	*Lab 12: To configure a network using Distance Vector Routing protocol.*	*Lab 15: Mini Project*

ACADEMIC CURRICULA

Professional Core Courses

MECHANICAL ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18MEC201T	Course Name	MACHINES AND MECHANISMS	Course Category	C	Professional Core	L	T	P	C
							3	1	0	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*understand motion of linked mechanisms in terms of displacement, velocity and acceleration at any point in a rigid link*
CLR-2 :	*be able to synthesis cam profile and to understand the kinematics of gear trains*
CLR-3 :	*understand the Balancing of rotating masses and friction*
CLR-4 :	*Know the concepts of free vibration of single degree of freedom systems.*
CLR-5 :	*Know the concepts of forced vibration of single degree of freedom systems.*
CLR-6 :	*understand the concepts of kinematics and machine dynamics*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*explain the basics of mechanism and perform kinematic analysis.*	1&2	90	85	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*construct various cam profiles based on follower motion and performkinematic analysis and Epicyclic Gear train*	1,2&3	85	85	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*perform balancing of rotating masses and describe friction in machine elements*	1&2	90	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*analyze free vibration single degree of freedom systems.*	1&2	90	85	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*define the concepts of forced vibration and critical speed or whirling of shaft*	1&2	90	90	H	-	H	-	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*apply the concepts of kinematics and machine dynamics in real time applications*	1&2	80	80	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Introduction to mechanism and its elements, Degrees of Freedom, its application in different mechanism*	*circular Cam terminology, types of cams and followers*	*Friction- Introduction, Types of friction, Laws of solid and dry friction, Limiting angle of friction*	*Introduction to vibration terminologies and types of vibration*	*Equation of motion for harmonically excited single Degree of Freedom system*
S-2	SLO-1	*Four Bar Chain, Grashof's law, Kutzback's and Grubler's criterion*	*Types of follower motion and its derivatives, under cutting*	*Friction Clutches- single plate and multiplate Clutches*	*Equation of motion for free un-damped single Degree of Freedom system by Newton's and energy method- Longitudinal vibration*	*Forced vibration –Beating Phenomenon*
S-3	SLO-1	*Kinematic Inversions of kinematic chain: Four bar chain, Single and double slider crank chain*	*Displacement, velocity and acceleration for different follower motion*	*Cone and Centrifugal Clutches*	*Equation of motion for free un-damped single Degree of Freedom system by Newton's and energy method- torsional vibration*	*Forced vibration due to unbalanced rotating and reciprocating masses*
S-4	SLO-1	*Tutorial-simple problems*	*Tutorial-simple problems*	*Tutorial on Clutches*	*Tutorials on single Degree of Freedom un-damped free vibration systems*	*Tutorials on harmonically excited single Degree of Freedom system*
S-5	SLO-1	*Velocity analysis of Four bar and single slider crank mechanism by relative velocity (RV) method*	*construction of circular cam profile for radial follower with different motion*	*Friction in Brakes-Block or shoe brake*	*Equation of motion for free damped single Degree of Freedom systems*	*Forced vibration due to Base excitation by Relative amplitude Method*
S-6	SLO-1	*Acceleration analysis of Four bar mechanism and single slider crank linkages by relative*	*construction of circular cam profile for offset follower with different motion*	*Friction in Brakes-Band brake principle*	*Free vibration with viscous damping*	*Forced vibration due to Base excitation by Absolute Method*
S-7	SLO-1	*Velocity and Acceleration of double slider crank mechanism.*	*basic principles of tangent cam profile*	*Friction in Brakes-Band brake principle*	*Logarithmic decrement*	*Force Transmissibility and vibration isolation*
S-8	SLO-1	*Tutorial on Velocity and Acceleration by relative method*	*Tutorial on cam profile construction*	*Tutorial for Friction Brakes*	*Tutorials on free damped single Degree of Freedom systems*	*Tutorials on Forced vibration due to Base excitation by Absolute and Relative amplitude Method*

S-9	SLO-1	*Velocity and Acceleration of six bar mechanism by relative method*	*Gear terminology, types, law of gearing Tutorial on path of contact, arc of contact, sliding velocity*	*Balancing of rotating masses- Need for balancing, Static and dynamic balancing of rotating masses*	*Torsional system with viscous damping*	*Critical speed or whirling of shaft*
S-10	SLO-1	*Instantaneous center (IC) method, Kennedy's theorem*	*Gear train, types and applications*	*Balancing of several masses rotating in same plane by analytical and graphical methods*	*Torsional Vibration of Two Rotor and three rotor Systems*	*Critical speed or whirling of shaft-with air damping*
S-11	SLO-1	*Velocity analysis of Four bar and single slider crank mechanism by Instantaneous center method*	*velocity ratio, torque calculations in epicyclic gear train*	*balancing of several masses rotating in different planes using couple and force polygon*	*Torsional Vibration of Geared Systems with Two and Three rotor System*	*Critical speed or whirling of shaft-without air damping*
S-12	SLO-1	*Tutorial on Instantaneous center method*	*Tutorials on epicyclic gear train*	*Tutorial on balancing of several masses rotating in same plane and different planes using couple and force polygon*	*Tutorials on Torsional Vibration of Two Rotor and three rotor Systems*	*Tutorials on Critical speed or whirling of shaft-with air damping*

Course Code	18MEC202T	Course Name	HEAT AND MASS TRANSFER	Course Category	C	Professional core	L	T	P	C
							3	1	0	4

Pre-requisite Courses	18MEC101T & 18MEC102T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards	Heat and Mass transfer data book and steam tables		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concept of conduction heat transfer*
CLR-2 :	*Understand the concepts of fins and unsteady state heat transfer*
CLR-3 :	*Understand the concept of convection heat transfer*
CLR-4 :	*Understand the concept of radiation heat transfer*
CLR-5 :	*Understand the phase change heat transfer and mass transfer*
CLR-6 :	*Understand the concepts of heat and mass transfer*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Analyse and evaluate steady state heat conduction in simple and composite systems*	3	90	80	H	H	L	H	L	L	L	L	L	L	L	L	L	H	L
CLO-2 :	*Analyse and evaluate steady state heat conduction in finned systems and unsteady state heat conduction in simple geometries*	3	90	80	H	H	L	H	L	L	L	L	L	L	L	L	L	H	L
CLO-3 :	*Evaluate the heat transfer coefficient under free and forced convection in various geometries and simple design of heat exchangers*	3	90	80	H	H	L	H	L	L	L	L	L	L	L	L	L	H	L
CLO-4 :	*Evaluate surface and gas radiation for black and grey bodies*	3	90	80	H	H	L	H	L	L	L	L	L	L	L	L	L	H	L
CLO-5 :	*Analyse and evaluate heat and mass transfer coefficient for phase change process and mass transfer*	3	90	80	H	H	L	H	L	L	L	L	L	L	L	L	L	H	L
CLO-6 :	*Apply the concepts of heat transfer in real time applications*	3	90	80	H	H	L	H	L	L	L	L	L	L	L	L	L	H	L

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Modes and mechanism of heat transfer in solids, liquids and gases*	*Fins – types,Differential equation,Types of fin boundary conditions*	*Hydrodynamic and thermal boundary layer,Principles and governing equations*	*Basic concepts of radiation ,Laws of radiation*	*Nusselt theory of condensation,Film condensation on a vertical plate and its flow regimes*
S-2	SLO-1	*General conduction equation, boundary and initial conditions*	*Circumferential and longitudinal fins*	*Dimensional analysis for free convection*	*Atmospheric and solar radiation*	*Heat transfer correlations for film condensation,Film condensation inside horizontal tubes*
S-3	SLO-1	*One dimensional steady state heat conduction in plane wall, cylinder and sphere, electrical analogy*	*Fin efficiency,Fin effectiveness*	*Dimensional analysis for forced convection*	*Black body radiation Grey body radiation*	*Dropwise condensation*
S-4	SLO-1	*Tutorial on plane wall, cylinders and spheres*	*Tutorial on fins*	*Tutorial on hydrodynamic and thermal boundary layer*	*Tutorial on laws of radiation*	*Tutorial on Filmwise condensation*
S-5	SLO-1	*One dimensional steady state heat conduction in composite plane wall*	*Unsteady state heat conduction in Lumped heat model*	*Forced convection: Flow over flat plate, cylinders and spheres*	*Shape factor algebra*	*Modes of Boiling*
S-6	SLO-1	*One dimensional steady state heat conduction in composite cylinders*	*Unsteady state heat conduction in semi-infinite solid*	*Forced convection : Internal flow*	*Electrical analogy*	*Pool boiling regimes, Correlations for pool boiling heat transfer*
S-7	SLO-1	*One dimensional steady state heat conduction in composite spheres*	*Unsteady state heat conduction in infinite solid*	*Free convection : Flow over plates, cylinders and spheres*	*Radiation shield*	*Flow boiling regimes*
S-8	SLO-1	*Tutorial on composite systems*	*Tutorial on unsteady state heat conduction*	*Tutorial on free and forced convection*	*Tutorial on shape factor, radiation shield and electrical analogy*	*Tutorial on pool boiling*
S-9	SLO-1	*Critical thickness of insulation for cylinders*	*Numerical solution for one dimensional steady state heat conduction*	*Heat Exchangers – Types, overall heat transfer coefficient, fouling factor*	*Introduction to Solar radiation*	*Diffusion mass transfer – Fick's law of diffusion,Steady state diffusion through plane membrane*
S-10	SLO-1	*Critical thickness of insulation for spheres*	*Numerical solution for one dimensional steady state heat conduction*	*LMTD and Effectiveness – NTU method method of analysis*	*Radiation properties of gases*	*Equimolar counter diffusion,Isothermal evaporation of water vapour into air*

S-11	SLO-1	*One dimensional steady state heat conduction with internal heat generation*	*Numerical solution for two dimensional steady state heat conduction*	*Heat transfer enhancement methods, Selection of heat exchangers*	*Gaseous emission and absorption - water vapour and carbon dioxide*	*Convective mass transfer,Convective mass transfer correlations, Simultaneous heat and mass transfer*
S-12	SLO-1	*Tutorial on critical thickness of insulation and internal heat generation*	*Tutorial on one and two dimensional steady state heat conduction*	*Tutorial on heat exchangers*	*Tutorial on gas radiation*	*Tutorial on diffusion and convective mass transfer*

Course Code	18MEC203L	Course Name	MACHINE DYNAMICS LABORATORY	Course Category	C	Professional core	L	T	P	C
							0	0	2	1

Pre-requisite Courses	Nil	Co-requisite Courses	18MEC201T	Progressive Courses	Nil
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*understand the static and kinematics behavior of machines*
CLR-2 :	*understand the dynamic behavior of machines*
CLR-3 :	*understand the balancing of masses in machines*
CLR-4 :	*understand the effect of centrifugal forces in machine*
CLR-5 :	*understand the free and forced vibration analysis*
CLR-6 :	*acquire the ability to analyze the dynamics behavior of machines*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Draw cam profiles based on follower motion*	3	80	85	H	H	M	M	H	-	-	-	H	-	-	-	-	-	-
CLO-2 :	*Analyze Epicyclic Gear train and Gyroscopic effect*	3	80	85	H	H	M	M	M	-	-	-	H	-	-	-	-	-	-
CLO-3 :	*Do balancing of rotating masses in machines*	3	80	85	H	H	M	M	H	-	-	-	H	-	-	-	-	-	-
CLO-4 :	*Determine the frequency of single degree of freedom systems.*	3	80	85	H	H	M	M	M	-	-	-	H	-	-	-	-	-	-
CLO-5 :	*Find the Critical speed or whirling of shaft*	3	80	85	H	H	M	M	M	-	-	-	H	-	-	-	-	-	-
CLO-6 :	*Do dynamic analysis of machines*	3	80	85	H	H	M	M	M	-	-	-	H	-	-	-	-	-	-

Duration (hour)		6	6	6	6	6
S-1		*Cam and Follower Analysis*	*Dynamic analysis of Proelland porter Governor*	*Measurement of cutting forces using Drill tool Dynamometers*	*Free damped and un-damped torsional vibration of single rotor systems*	*Transmissibility Ratio in Vibrating Systems*
S-2						
S-3		*Dynamic analysis of Gyroscope*	*Dynamic Balancing of massesin machine*	*Measurement of cutting forces using Milling Dynamometers*	*Free & forced vibration of equivalent spring mass system*	*Free and forced transverse vibration analysis for beams*
S-4						
S-5		*Dynamic analysis of Epi cyclic gear trains*	*Measurement of cutting forces using, Lathe tool Dynamometer*	*Free Vibration of helical springs*	*Whirling of shaft*	*Vibration measurement using strain gauge*
S-6

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Upon learning the students shall understand the need of software tools to analyze the Engineering problems.*
CLR-2 :	*Understand and practice structural analysis of components.*
CLR-3 :	*Understand and practice modaland vibrational analysis of components.*
CLR-4 :	*Understand and practice Thermal analysis of components.*
CLR-5 :	*Understand and practice Dynamic analysis of components.*
CLR-6 :	*Simulate any engineering problem numerically.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Learn data exchange standard and integration of FEA with software tools.*	3	85	80	H	H		H	H		H					H			
CLO-2 :	*learnand practice structural analysisof components using software tools.*	3	75	80	H	H		H	H							H			
CLO-3 :	*Earn and practice modal and vibrational analysis of components using software tools.*	3	75	80	H	H		H	H							H			
CLO-4 :	*Learn and practice Thermal analysis of components using software tools.*	3	75	80	H	H		H	H							H			
CLO-5 :	*Learn and practice Dynamic analysis of components of components using software tools.*	3	75	80	H	H		H	H							H			
CLO-6 :	*Practice numerical simulation of any engineering problem using softeare.*	3	75	80	H	H		H	H							H			

Duration (hour)		6	6	6	6	6
S-1, S-2	SLO-1	*Displacement bar structures with different support conditions.*	*Stress and deflection analysis in beams with different support condition.*	*Modal analysis of beam – Finding natural frequency –Cantilever beam, Simply supported beam etc with UDL*	*Dynamic analysis of thin circular cylindrical shell.*	*Thermal analysis – Steady state and Transient - 3D problem.*
S-3, S-4	SLO-1	*Force and stress analysis using link elements in Trusses.*	*Plane stress and Plane strain problems – Simple examples – flat plate with hole, circular disc with hole Tapper plate etc.*	*Modal analysis of beam – Finding natural frequency –Cantilever beam, Simply supported beam etc with UVL*	*Thermal analysis – Steady state and Transient - 1D problem.*	*Kinematic analysis of Four bar mechanism.*
S-5, S-6	SLO-1	*Stress and deflection analysis in beams with different loading condition.*	*Stress analysis of axi -symmetric component.*	*Vibrational analysis - plate with dynamic condition.*	*Thermal analysis – Steady state and Transient - 2D problem.*	*Dynamic analysis of slider crank mechanism.*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Be familiar with standards of measurements and types of measurement errors*
CLR-2 :	*Know the basics of measurement for thread, gear and surface finish*
CLR-3 :	*Be familiar with optical and other non-contact measurements*
CLR-4 :	*Be familiar with working of coordinate measuring machines and alignments of machine tool*
CLR-5 :	*Select the appropriate control chart and sampling plan*
CLR-6 :	*Be familiar with dimensional and form measurements using conventional and coordinate metrology, together with quality control techniques*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the types of measurement errors, design of limit gauges and various comparative measurement methods*	*3*	*90*	*85*	*H*	*H*	*M*	*L*	*L*								*M*	*L*	*L*
CLO-2 :	*Acquire the fundamentals of the gear, thread and surface finish measurements*	*3*	*90*	*85*	*H*	*H*	*M*		*L*								*L*	*L*	*L*
CLO-3 :	*Perceive the knowledge about the optical metrology and non-contact measurement*	*3*	*90*	*85*	*H*	*M*			*H*								*L*	*L*	*L*
CLO-4 :	*Learn the fundamentals of CMMs*	*3*	*90*	*85*	*H*	*M*			*H*								*H*	*L*	*L*
CLO-5 :	*Choose the appropriate control charts*	*3*	*90*	*85*	*H*	*H*	*L*		*M*					*H*		*L*	*H*	*L*	*L*
CLO-6 :	*Choose the types of sampling and methods in acceptance sampling for SQC*	*3*	*90*	*85*	*H*	*H*	*M*		*M*							*L*	*H*	*L*	*L*

		Introduction To Metrology	Measurements Of Screw Thread - Gear Elements – Surface Finish	Optical And Other Non-Contact Measurement Techniques	Coordinate Metrology And Form Measurement; Machine Tool Metrology	Theory Of Control Charts & Acceptance Sampling
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to metrology; Need for inspection; Physical measurements*	*Measurements of various elements of external and internal threads: Measurement of major and minor diameters, pitch and flank angle*	*Principle of light wave interference, light sources, measurements using optical flats*	*Introduction to coordinate metrology; Coordinate metrology versus conventional metrology*	*Definition of quality; Assignable causes and Chance causes; SQC: Benefits and limitations*
S-2	SLO-1	*Methods of measurement; Classification and characteristics of measuring instruments*	*Measurement of effective diameter: two and three wire methods; best size wire; error corrections*	*Types of interferometers: Michelson, Twyman Green Specialization of Michelson*	*Types and construction of CMM; Components: Bearings; Drive systems*	*Theory of Control Charts; Control Charts for Variables: X bar and R charts*
S-3	SLO-1	*Role of NPL; Sources and types of errors*	*Measurements of various elements of spur gears: gear tooth vernier*	*NPL flatness interferometer, The Pitter NPL gauge interferometer*	*Components: Transducers; Probes*	*Control Charts for attributes: P chart, np chart*
S-4	SLO-1	*Statistical treatment of errors; tutorial*	*Constant chord method: derivation and tutorial*	*Laser interferometer, Laser micrometer*	*Measuring accuracy, causes of errors and calibration of CMM: Tutorial*	*Control charts for Non Conformities - C and U chart*
S-5	SLO-1	*Standards of measurements; Classification of standards; Calibration*	*Base tangent method: derivation and tutorial*	*Surface roughness measurement using Lasers*	*Performance of CMM and its applications*	*Basic Concepts of acceptance sampling and OC curve, AQL, LTPD ,AOQL*
S-6	SLO-1	*Limits, fits, and tolerances: tutorial*	*Circular pitch and composite error measurement*	*Measurement of straightness using Autocollimator, Tutorial*	*Overview of alignment tests in machine tools using dial gauge, sprit level, straight edges*	*Tutorial*
S-7	SLO-1	*Interchangeability and Selective Assembly*	*Surface finish: Surface topography definitions*	*Measurement of flatness using Autocollimator*	*Measurement of squareness and parallelism*	*Sampling Plans: Simple*
S-8	SLO-1	*Inspection Gauges, Types of Gauges*	*Measurement of surface finish: measuring instruments*	*Machine vision, Image processing techniques*	*Circularity: tutorial*	*Sampling Plans: Double and Multiple - tutorial*
S-9	SLO-1	*Introduction to Comparators; Mechanical (Sigma), Electrical, and Pneumatic comparators*	*Methods of evaluation of surface finish*	*Edge detection, feature extraction - applications*	*Measurement of cylindrical and conical features, and runout*	*Sequential sampling plans*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards	-		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Be familiar with the concepts of modeling in 2D and 3D*
CLR-2 :	*Be familiar with he Mathematical Representation of curves and surfaces*
CLR-3 :	*Be familiar with the concepts of Computer Graphics*
CLR-4 :	*Be familiar with the basics of CNC machines and manufacturing systems*
CLR-5 :	*Be familiar with the concepts of Computer aided production planning and control*
CLR-6 :	*Be familiar with the concepts of CAD and CAM*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Recognize and analyze the concepts of modeling in 2D and 3D*	3	90	85	H	M	H	L	L	-	-	-	-	L	M	L	H	M	M
CLO-2 :	*Apply the concepts learned in Mathematical Representation of curves and surfaces*	3	90	85	H	M	H	L	L	-	-	-	-	L	M	L	H	M	M
CLO-3 :	*Understand and apply the concepts of Computer Graphics like shading, coloring, clipping, animation and simulation*	3	90	85	H	L	M	H	M	-	-	-	-	L	M	M	H	M	M
CLO-4 :	*Understand and analyze the basics of CNC machines and manufacturing systems*	3	90	85	H	M	L	L	L	-	M	-	-	L	M	H	H	M	H
CLO-5 :	*Apply and evaluate the concepts of Computer aided production planning and control*	3	90	85	H	M	L	L	L	-	M	-	-	L	H	H	H	M	H
CLO-6 :	*Understand, apply and evaluate the concepts of CAD and CAM*	3	90	85	H	M	M	L	L	-	L	-	-	L	M	M	H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Fundamentals of Computer aided design*	*Mathematical representation of lines, circle*	*Cohen Sutherland Clipping Algorithm*	*Fundamentals of CNC machines, Classification, Developments*	*Computer Aided Process Planning (CAPP)*
S-2	SLO-1	*Product Life Cycle*	*Mathematical representation of Hermite curves*	*Shading and its types*	*CNC principles of operation and features*	*Materials Requirement planning with Case study*
S-3	SLO-1	*sequential and concurrent engineering*	*Mathematical representation of Bezier curves, B-spline curves*	*Colouring and its types*	*Machining Centers and its types*	*Management Resource planning with case study*
S-4	SLO-1	*Coordinate Systems, 2D transformations*	*Parametric representation of plane surface and Ruled surface*	*Introduction to Data exchange standards*	*Introduction to Group technology and its types*	*Capacity Planning and Data collection systems*
S-5	SLO-1	*3D transformations*	*parametric representation of Surface of revolution and Tabulated cylinder*	*Data exchange standards: IGES,STEP*	*Part families, coding and classification*	*Shop floor control and monitoring systems*
S-6	SLO-1	*Wire frame modeling and Surface modeling*	*Hidden line removal - Visibility Techniques*	*Data exchange standards: DXF and CALS and GKS*	*Production flow analysis with case study*	*Inventory control and Case study*
S-7	SLO-1	*Solid modeling - Constructive Solid Geometry*	*Priority and Area -oriented Algorithm*	*Animation Types*	*Machine cell design with numerical case study*	*JIT approach and Case study*
S-8	SLO-1	*Solid modeling - Boundary Representation*	*Hidden surface removal algorithms*	*Animation Techniques*	*Introduction to FMS, types, applications and benefits*	*Lean Manufacturing*
S-9	SLO-1	*Feature Entities and Representation*	*Hidden Solid removal algorithms*	*Simulation Technique*	*FMS :components, Layout Configurations and implementation*	*Agile manufacturing*

		FUNDAMENTALS OF MECHANICAL DESIGN	VARIABLE STRESSES ,DESIGN OF SHAFTS,KEYS AND COUPLINGS	DESIGN OF TEMPORARY JOINTS	DESIGN OF PERMANENT JOINTS	DESIGN OF LEVERS AND SPRINGS
Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Introduction to design, types of design.*	*Analysis of variable stresses: Endurance limit.*	*Design of Pin joints- cotter joints , basic concepts and types*	*Riveted joints: Types, materials, arrangement of rivets, terminology of riveted joints*	*Levers: Types, applications and analysis*
	SLO-2	*Criteria for Design based on strength, fatigue, stiffness.*	*Classification of variable stresses, factors influencing the endurance limit and fatigue stress determination.*	*Design of Socket and spigot cotter joint*	*Riveted joints: Types of failures.*	
S-2	SLO-1	*Criteria for Design based on, wear resistance, vibration resistance, heat resistance and reliability.*	*Stress concentration, Methods of reducing stress concentration, Notch sensitivity.theoritical stress concentration factor and fatigue stress concentration factor.*	*Design of Sleeve and cotter joint*	*Strength and efficiency of a riveted joint, Design of riveted joints for non eccentric loads.*	*Design of hand lever,foot lever.*
	SLO-2					
S-3	SLO-1	*Overview of Engineering materials and their properties. Impact stress, Resilience.*	*Variable stresses using Soderberg method, Goodman method.*	*Design of Gib and cotter joint for square rods.*	*Design of riveted joints for pressure vessels.*	*Design of cranked lever, bell crank lever*
	SLO-2	*Principal Stresses and Principal Planes,Application of Principal Stresses in design of machine members.*	*variable stresses using Gerber method.*			
S-4	SLO-1	*Tutorial -Problems on Principal Stresses and Principal Planes.*	*Tutorial -Problems on variable stresses using Soderberg method, Goodman method and Gerber method.*	*Tutorial - problems on cotter joint.*	*Tutorial –Problems on riveted joints for structural applications and pressure vessels.*	*Tutorial – Problems on cranked lever and bell crank lever*
	SLO-2					
S-5	SLO-1	*Theories of failure, Rankine theory, Guests theory, St.Venants theory, Maximum strain energy theory and Distortion energy theory.*	*Types of Shafts, Shafting Materials and working stresses in shafts.*	*Design of Knuckle joint*	*Design of Diamond riveted joint.*	*Design of lever safety valve ,Rocker-Arm*
	SLO-2		*Design of uniform cross sectional Shafts.*			
S-6	SLO-1	*Theories of failure, Rankine theory, Guests theory, St.Venants theory,*	*Design of shaft subjected to combined twisting moment and bending moment.*		*Design of Eccentrically loaded riveted joint.*	*Springs: classification,application,spring materials and their properties.*

	SLO-2	*Maximum strain energy theory and Distortion energy theory.*		*Bolted joints: Design procedure and problems on bolted joints with non eccentric loads,*		Terminology and end conditions of helical compression spring
S-7	SLO-1 SLO-2	*Design of members subjected to combined stresses with eccentric load.*	*Design of shaft subjected to combined twisting moment, bending moment and axial loads.*	*Design of bolted joints for cylinder cover*	*Welded joints: Types and strength calculations*	*Design of circular and non circular wire helical springs for static loadings, Eccentric loading of helical springs,buckling of compression springs*
S-8	SLO-1 SLO-2	*Tutorial –Design of members subjected to combined stresses with eccentric load*	*Tutorial –Problems on Design of shaft.*	*Tutorial –Problems on bolted joints*	*Tutorial - Problems on axially loaded welded joints*	*Tutorial - Problems on helical springs*
S-9	SLO-1	*Eccentric loading in curved beams, crane hooks*	*Design of keys: Types of keys, forces acting on a key*	*Design of bolted joints with eccentric load parallel to axis of bolt and perpendicular to axis of bolt*	*Welded joints subjected to axial loads for unsymmetrical sections*	*Design of concentric helical springs*
	SLO-2		*Couplings: Types of couplings, design of sleeve coupling and clamp coupling.*			*Design of helical springs for fatigue loading*
S-10	SLO-1	*Eccentric loading in frames, clamps*	*Design of Flange coupling*	*Design of bolted joints with eccentric load in the plane containing bolts.*	*Eccentrically loaded linear fillet welded joints.*	*Design of helical torsion springs*
	SLO-2					*Design of Belleville springs*
S-11	SLO-1	*Standardization, interchangeability, fits and tolerances-Terminology of fits and tolerances*	*Design of bushed pin Flexible coupling*	*Design of Power screws; types, working principal and analysis of power screws.*	*Eccentrically loaded circular fillet welded joints.*	*Design of leaf springs, analysis and nipping of leaf springs*
	SLO-2	*Tolerances and their grades, fundamental deviation, Fits and its classifications*			*Welded joint subjected to fatigue loading*	
S-12	SLO-1 SLO-2	*Tutorial –Problems on computation of IT tolerances, fundamental deviations*	*Tutorial – Problems on coupling*	*Tutorial – Problems on bolted joints with eccentric load and Power screws.*	*Tutorial –Problems on eccentrically loaded welded joint.*	*Tutorial –Problems on leaf springs*

Course Code	18MEC209L	Course Name	CAD/CAM LABORATORY	Course Category	C	Professional core	L	T	P	C
							0	0	2	1

Pre-requisite Courses	Nil	Co-requisite Courses	18MEC207T	Progressive Courses	Nil
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn to Modeling of 3D Mechanical Components*
CLR-2 :	*Prepare assembly drawings of joints, couplings and machine elements*
CLR-3 :	*Design and prepare modelling for Jigs and fixtures of given components*
CLR-4 :	*Familiarize CNC Part programming techniques for Lathe operations and milling operations*
CLR-5 :	*Machining of components using CNC Lathe and CNC milling machine*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire knowledge on Modeling of 3D Mechanical Components*	3	90	85	H	-	H	M	H	-	-	-	M	H	-	-	L	-	L
CLO-2 :	*Understand the concepts of assembly drawings of joints, couplings and machine elements*	3	85	80	H	-	H	M	H	-	-	-	M	H	-	-	M	-	L
CLO-3 :	*Acquire knowledge to design and prepare drawing for Jigs and fixtures of given components*	3	85	80	H	-	H	M	H	-	-	-	M	H	-	-	M	-	M
CLO-4 :	*Understand and generate the NC part programming for Lathe and milling operations.*	3	90	85	H	-	H	L	H	-	-	-	-	-	-	-	L	-	M
CLO-5 :	*Acquire Practical knowledge on machining of components using CNC Lathe, Milling.*	3	90	85	H	-	H	M	H	-	-	-	-	-	-	-	L	-	M

Duration (hour)	Modeling of mechanical components	Machine Tool components	Jigs& Fixtures	CNC LATHE	CNC MILLING
	6	6	6	6	6
S 1-2	*Modeling of Simple Mechanical Components and temporary fasteners, Modeling of components with sweep ,variable sweep ,loft and blend feature*	*Assembly modeling for Machine Vice*	*Assembly modelling for lathe, milling and broaching fixtures types*	*CNC Part Program for Facing, Step turning, Taper and Finish Turning using ordinary cycle*	*CNC Part Program for Linear and Circular Interpolation using Milling operation*
S 3-4	*Assembly Modeling of joints and Couplings*	*Assembly modelling for Lathe tail stock*	*Assembly modelling for plate, latch, channel, box, post, pot drill jigs and automatic drill jigs*	*CNC Part Program for Grooving,Threading and Axial Drilling Using canned cycle*	*CNC Part Program for Drilling, Mirroring and Threading Operation.*
S 5-6	*Assembly modeling of Screw jack*	*Assembly modeling of connecting rod*	*Assembly modelling for Grinding, planning, shaping and welding fixtures*	*Machining of components on Turning operation using CNC Lathe*	*Machining of components on Milling operation using Vertical machining Center*

Note: Course committee will follow any 11 experiment

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Design pneumatic circuits for low cost automation*
CLR-2 :	*Design hydraulic circuits for industrial automation*
CLR-3 :	*Design of Electro pneumatics, servo and stepper motor control circuits*
CLR-4 :	*Design logic circuits and execute using PLC*
CLR-5 :	*Implement photo electric and ultrasonic, positional and velocity sensors, Virtual instrumentation and pick and placerobot.*
CLR-6 :	*Design circuits and simulate hydraulics/ pneumatics/ stepper, servo motors for industrial applications.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Acquire knowledge on designing pneumatic circuits.*	3	90	85	H		H										H	M	M
CLO-2 :	*Acquire knowledge on designing hydraulic circuits.*	3	85	80	M		M										M	M	L
CLO-3 :	*Acquire knowledge on designing electro pneumatic circuits, control of stepper and servo motors for various applications.*	3	85	80	M		L										L	M	L
CLO-4 :	*Do PLC ladder logic programming and execute.*	3	90	85	H		M		H								H	L	L
CLO-5 :	*Use photo electric, ultrasonic, positional, velocity sensors for various applications and virtual instrumentation and pick and place robot.*	3	90	85	M		L		H								M	M	L
CLO-6 :	*Design low cost automation and provide solution for industrial and societal needs*	3	85	80	H		M		H								M	M	H

Duration (hour)	Devising and simulation of pneumatic circuits	Designing and simulation of hydraulic circuits	Electro pneumatics, servo and stepper motor control circuits	PLC based ladder logic circuits	Virtual instrumentation and pick & place robot
	10	4	6	4	6
S 1-2	*Continuous reciprocation of double acting cylinder with speed control circuit.*	*Synchronization circuit for two cylinders*	*Electro Pneumatic circuits: Continuous reciprocation of cylinder (with timer and Counter) and Sequencing of two cylinders*	*PLC Controlled Pneumatic / Hydraulic linear actuator Circuits*	*Process control: Temperature/ force/ pressure/ control using virtual instrumentation*
S 3-4	*Sequencing of two cylinders Circuit*	*Force, velocity calculations in hydraulic linear actuation*	*Speed control of AC Servo Motor using open and closed loop control.*	*PLC application circuits: Basic Trainer kit/ Water Level Controller/ Material Handling system*	*Characteristics of inductive, capacitive and photoelectric proximity sensors*
S 5-6	*Cascading circuit for trapped signal- 2 Cylinder*		*Positional control of a stepper motor*	*Study of SCADA and PAC systems*	*Pick and place operation using industrial robot in Teach pendent method / Manual mode*
S 7-8	*Cascading circuit for trapped signal – 3 Cylinder*				*Study of Image Processing Technique*
S 9-10	*Implementation of logic circuits: AND, OR*				

Note: Course committee will follow any 11 experiment

		Classical Compensators Design	PID Controller Design	State Space Modelling and Analysis	Design of State Controllers and Observers	Discrete-time Control System
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Basic elements of automatic control systems, Classification of controlsystems*	*Introduction to active controllers*	*Concepts of state, state variables and state model*	*Concepts of controllability and observability.*	*Introduction to sampled data systems*
	SLO-2	*Review of time and frequency domain specifications of control system in a design perspective*	*Introduction to On-Off, Proportional, PI, PD and PID controllers*	*Generic state space representations for systems of different types- Linear, Nonlinear, time variant and time invariant*	*Problems and illustrations*	*Sample and holdprocess: Zero order and first order hold.*
S-2	SLO-1	*Effect of adding a pole and zero to dynamic systems*	*Transfer function , time and frequency response of PI controller*	*Derivation of linear state space model for mechanical systems*	*Full state feedback controller design- The pole placement techniques*	*Z-transform analysis of sampled data control systems*
	SLO-2	*Introduction to Compensators and types*	*Transfer function , time and frequency response of PD controller*	*Example problems*	*Examples*	*Problems*
S-3	SLO-1	*Pole zero contributions by lead, lag and lead-lag cascade compensators and their effects on compensated systems*	*Transfer function , time and frequency response of PID controller*	*Derivation of linear state space model for electrical systems*	*Full state feedback controller design using transformation method*	*Transfer function of discrete-time systems*
	SLO-2	*Electrical cascade compensating networks- Transfer function, time and frequency response*	*Effect of each term of PID controller on the response of system*	*Example problems*	*Examples*	*Performance of a sampled-datasecond order system.*
S 4-5	SLO-1 SLO-2	*Lab-1:Generate standard test signals: Impulse, step, ramp,parabolic, exponential and sinusoidal functions.*	*Lab-4:Root locus method: Determination of constant gain K,stability analysis*	*Lab-7:Design of controllers (PI, PD, PID) in time domain and frequency domain*	*Lab-10:Modeling in state-space: Determine state transition matrix, controllability and observability of linear systems*	*Lab-13:Discrete-time control systems: Convert a given transfer functions from analog to digital form, determine performance and stability in Z–domain.*
S-6	SLO-1	*Lead compensator design procedure using root locus- qualitative treatment preferably using software tools*	*Model based design of PI controller*	*Derivation of linear state space model for electrical systems*	*Full state feedback controller design using direct substitution method*	*Stability Analysis of discrete-time systems-Jury's stability criteria*
	SLO-2	*Example problems*	*Example- model based design of PI controller for DC motor speed control*	*Example problems*	*Examples*	*Example problems*
S-7	SLO-1	*Lag compensator design procedure using root locus- qualitative treatment preferably using software tools*	*Model based design of PD controller*	*Computation of state transition matrix, properties of statetransition matrix.*	*Full state feedback controller design using Ackerman's formula*	*Digital controller design-Direct digital design technique and conversion by transformation-introduction*

	SLO-2	*Example problems*	*Example- model based design of PD controller for DC motor position control*	*Importance of state trajectory in chaotic systems*	*Examples*	*Mapping between s-plane and z-plane- different transformation techniques to convert analog controller to digital.*
S-8	SLO-1	*Lead compensator design procedure using Bode plot- qualitative treatment preferably using software tools*	*Model based design of PID controller*	*Solution to state equations*	*Full order and reduced order observers*	*Mapping between s-plane and z-plane- different transformation techniques to convert analog controller to digital.*
	SLO-2	*Example problems*	*Example- model based design of PID controller for DC motor speed as well as position control.*	*Example problems*	*Full order observer design using different methods-Design examples*	*Examples*
S 9-10	SLO-1	*Lab-2: Derive transfer functions of electrical, mechanical and electromechanical systems*	*Lab-5:Frequency response analysis: Determine frequencydomain specifications using Bode plot*	*Lab-8:System Identification with Qube servo*	*Lab-11:Design of full state feedback controllers and full order observers.*	*Lab-14:Implement digital compensators through though transformation technique*
	SLO-2					
S-11	SLO-1	*Lag compensator design procedure using Bode plot- qualitative treatment preferably using software tools)*	*Limitations of Basic PID controller- Sensitive to Noise, Integrator wind-up problem.*	*Conversions of transfer function to state space model and vice versa.*	*Integrated full-state feedback and observer*	*Direct digital compensator design by Root locus technique*
	SLO-2	*Example problems*	*A more practical version of PID controller- it's implementation*	*Example problems*	*Examples*	*Direct digital compensator design by Root locus technique*
S-12	SLO-1	*Introduction to lead-lag compensator*	*Empirical procedure for tuning of PID gains*	*Different Canonical forms of representation of state space models*	*Case study: demonstration of integrated full state feedback & observer in simulation*	*Example problems*
	SLO-2	*Comparison- Lead vs Lag compensators, s-domain vs frequency domain design*	*Zeigler-Nichols method based on open loop and closed loop responses. Cohen-coon method*	*Example Problems*	*A case study- demonstration of integrated full state feedback & observer in simulation*	*Example problems*
S-13	SLO-1	*Limitations of passive compensators*	*Comparison between compensators and active controllers*	*Advantages and disadvantages of state space model representation*	*Introduction to optimal control systems*	*Selection of sampling rate, parameters to meet the desired performance of discrete-time control systems*
	SLO-2	*Need for active controllers*	*Limitations of PID controllers- Need for model based controllers.*	*State space model for discrete-time systems*	*Introduction to optimal control systems*	*Example problems*
S 14-15	SLO-1	*Lab-3:Determine time domain specifications for a givensystem: Transient and steady state.*	*Lab-6:Design compensators (lead, lag etc.,) in time domain and frequency domain.*	*Lab-9:Speed and position control of Qube servo*	*Lab-12: Implement Kalman filter*	*Lab-15: Implement digital compensators by direct digital method*
	SLO-2

Course Code	18MHC202J	Course Name	SENSORS AND SIGNAL CONDITIONING	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18MHC103T	Co-requisite Courses	Nil	Progressive Courses	18MHC302J,18MHE402T,18MHE428T
Course Offering Department	Mechatronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Expose the applications of OPAMP in signal conditioning circuits*
CLR-2 :	*Perceive the fundamental knowledge of sensors and their characteristics and know the working principle of sensors for measurement of Force, Displacement*
CLR-3 :	*Know the working principle of sensors for measurement of Position, Distance and Acceleration*
CLR-4 :	*Know the working principle of sensors for measurement of Pressure, Flow and Temperature*
CLR-5 :	*Comprehend about data acquisition systems and applications of sensors*
CLR-6 :	Gain knowledge about different sensors for physical system measurement

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the functioning of OPAMP based signal conditioning circuits*	2	90	85	H	M	L	L	M	-	-	-	-	-	-	L	M	-	M
CLO-2 :	*Identify the different types of sensors, their selection criteria and selection of sensors for measurement of Force and Displacement*	3	90	80	H	M	-	L	M	L	-	-	-	-	L	H	M	M	L
CLO-3 :	*Identify and select sensors for measurement of Position, Distance and Acceleration*	3	85	80	H	L	-	L	M	L	-	-	-	-	L	M	M	H	M
CLO-4 :	*Identify and select sensors for measurement of Pressure, Flow and Temperature*	3	80	80	H	L	-	L	M	L	-	-	-	-	L	M	M	H	M
CLO-5 :	*Understand the working of data acquisition system and applications of sensors in various fields*	3	85	80	H	L	L	L	H	L	-	-	-	-	L	M	H	H	H
CLO-6 :	*Prescribe the type of sensor to measure a specific phenomenon and appropriate signal conditioning circuit*	2	85	80	H	L	L	L	M	L	-	-	-	-	L	M	M	H	M

		Signal Conditioning System	Fundamentals of Sensors, Measurement of Force and Displacement	Measurement of Position, Distance and Acceleration	Measurement of Pressure, Flow and Temperature	Data Acquisition System and Case Studies
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Review of OPAMP*	*Introduction to Sensors and Transducers*	*Working Principle of Eddy Current Sensor*	*Piezoelectric effect*	*Elements of Data Acquisition System*
	SLO-2	*Discussion*	*Classification of Sensors According to Various Physical Quantities*	*Applications of Eddy Current Sensor*	*Working Principle and Applications of Piezoelectric Sensor*	*Elements of Data Acquisition System*
S-2	SLO-1	*Characteristics of Instrumentation Amplifier*	*Working Principle of Strain Gauge*	*Working Principle of Hall Effect Sensor*	*Construction and Working of Bourdon Tubes*	*Multichannel Data Acquisition System*
	SLO-2	*Working of Instrumentation Amplifier*	*Applications of Strain Gauge and Simple Problems*	*Applications of Hall Effect Sensor*	*Types and Applications of Bourdon Tubes*	*Multichannel Data Acquisition System*
S-3	SLO-1	*Design and Analysis of RC Active Low Pass Filter*	*Working Principle and Applications of Load Cell*	*Working Principle and Types of Infra-Red Sensors*	*Working Principle and Applications of Diaphragms*	*Multiplexing*
	SLO-2	*Design and Analysis of Integrator*	*Quarter Bridge, Half Bridge and Full Bridge Configuration of Load Cells*	*Applications of IR Sensors*	*Working Principle and Applications of Bellows*	*DE multiplexing*
S 4-5	SLO-1 SLO-2	*Introduction to the Lab Course Lab 1: Study of Characteristics of Instrumentation Amplifier*	*Lab 4: Study of Characteristics of Load Cell*	*Lab 7: Distance Measurement using IR Sensor*	*Lab 10: Study of Characteristics of Pressure Sensor*	*Lab 13: Introduction to PC Based Data Acquisition System*
S-6	SLO-1	*Design and Analysis of RC Active High Pass Filter*	*Working Principle and Applications of Potentiometer*	*Doppler Effect*	*Working Principle of Flow Sensors*	*Applications of Sensors in Bio Medical Systems*
	SLO-2	*Design and Analysis of Differentiator*	*Working Principle, Types and Applications of Capacitive Sensors*	*Working Principle and Applications of Ultrasonic Sensor*	*Hot Wire Anemometer*	*Discussion*
S-7	SLO-1	*Sampling theorem, Effect of Sampling*	*Working Principle of Magnetic Proximity Switch*	*Working Principle of SONAR*	*Working Principle of Acoustic sensors*	*Applications of Sensors in Aerospace Systems*
	SLO-2	*Quantization, Quantization Error, Digitizing*	*Applications of Magnetic Proximity Switches*	*Working Principle of RADAR*	*Applications of Acoustic sensors*	*Discussion*

S-8	SLO-1	*Aliasing, Sample and Hold Circuit*	*Working Principle of Inductive Proximity Switch*	*Working Principle and Types of Accelerometer*	*Working Principle of Thermocouple*	*Applications of Sensors in Automobile Systems*
	SLO-2	*Simple Problems*	*Applications of Inductive Proximity Switches*	*Applications of Accelerometer*	*Types and Applications of Thermocouple*	*Discussion*
S 9-10	SLO-1 SLO-2	*Lab 2: Study of Characteristics of Active Filters*	*Lab 5: Study of Characteristics of Potentiometer*	*Lab 8: Distance Measurement using Ultrasonic Sensor*	*Lab: 11 Study of Characteristics of Thermocouple and MEMS IC Sensor*	*Lab 14: Repeat Lab Session*
S-11	SLO-1	*ADC: Flash Type*	*Working Principle and Applications of LVDT*	*Inertial Measurement Sensor*	*Working Principle of Thermistor*	*Applications of Sensors in Automobile Systems*
	SLO-2	*ADC: Successive Approximation Type*	*Working Principle and Applications of RVDT*	*Inertial Measurement Sensor*	*Applications of Thermistor*	*Discussion*
S-12	SLO-1	*DAC: Weighted Resistor, R-2R Network*	*Static Characteristics*	*Introduction to Optical Sensors - Photo Diode, Photo Transistor, Opto-Coupler*	*Working Principle of RTD*	*Sensors in Manufacturing*
	SLO-2	*Specifications of ADC and DAC*	*Simple Problems*	*Working Principle of LIDAR*	*Applications of RTD*	*Discussion*
S-13	SLO-1	*Precision Diodes, Half Wave Precision Rectifiers*	*Dynamic Characteristics*	*Working Principle of Optical Encoders*	*Concept of Thermal Mapping*	*Summary of the Course*
	SLO-2	*Full Wave Precision Rectifiers*	*Sensor Calibration*	*Types and Applications of Optical Encoders*	*Applications of Thermal Mapping*	*Discussion*
S 14-15	SLO-1 SLO-2	*Lab 3: Study of Characteristics of Precision Circuits*	*Lab 6: Study of Characteristics of LVDT*	*Lab 9: Position Measurement using Optical Encoders*	*Lab: 12 Study of Characteristics of Thermistor and RTD*	*Lab 15: Model Practical Examination*

Pre-requisite Courses	18MHC101J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mechatronics Engineering	Data Book / Codes/Standards	Approved design data book		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Analyze stress, strain in mechanical components, quantify failure modes in mechanical parts for various load conditions.*
CLR-2 :	*formulate, design and identify torque elements.*
CLR-3 :	*estimate the life of sliding and rolling contact bearings.*
CLR-4 :	*analyze the gear failure modes, evaluate forces and stresses within a gear system.*
CLR-5 :	*select flexible drive systems and design for light, medium and heavy duty applications.*
CLR-6 :	*design, analyze, and select the suitable components for any particular engineering applications.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*design basic mechanical components by considering the stress induced due to different kinds of load.*	3	85	80	H	H	M	M	M	L	M	M	H	M	L	H	M	M	M
CLO-2 :	*select suitable shaft and coupling for the particular engineering applications.*	3	85	80	H	H	H	M	M	L	M	M	H	M	L	H	M	M	M
CLO-3 :	*analyze and select bearing and lubricants for various engineering applications.*	3	85	80	H	H	M	M	M	L	M	M	H	M	L	H	M	M	M
CLO-4 :	*design and analyze various simple gear trains for various power transmission applications.*	3	85	80	H	H	M	M	M	L	M	M	H	M	L	H	M	M	M
CLO-5 :	*design and select suitable flexible drive system for power transmission applications.*	3	85	80	H	H	M	M	M	L	M	M	H	M	L	H	M	M	M
CLO-6 :	*design and analyze the fundamental elements of machine component.*	3	85	80	H	H	H	H	H	L	M	M	H	M	L	H	M	M	M

		Stresses In Machine Parts	Design of Shafts, Springs And Couplings	Design Of Bearings	Design of Gears	Design of Flexible Drives
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to the design process, Materials Selection and its Properties, Preferred Numbers, Fits and Tolerances*	*Introduction to Shafts and Types of Transmission Shafts, Shaft materials*	*Introduction to Bearings, Types of Rolling Contact Bearings*	*Introduction to Mechanical Drives, Types of Gears, Gear materials, Gear Nomenclature*	*Types of Flexible Drives, Belt Materials and Constructions*
	SLO-2	*Equilibrium and Free Body Diagram*	*Shaft Layouts and Shaft design for stress*	*Selection of Bearing Type, Static and Dynamic Load Carrying capacity, Equivalent Bearing Load*	*Contact Ratio, Interference, Undercutting and Backlash*	*Mechanics of Belt Drives, Selection of Belt Drives, Belt Tension*
S-2	SLO-1	*Direct, Bending and torsional stresses*	*Practice 11: Problems on Design of Shaft on Strength basis*	*Load –Life Relationship, Selection of Ball Bearing Life*	*Force Analysis-Spur Gear*	*Flat Belt Drive*
	SLO-2	*Practice1: Problems on Bending and Torsional stresses*		*Practice 15: Problems on Single Row Deep Groove Ball Bearing*	*Design of spur gear based on Lewis and Buckingham equations*	*Practice 28: Problems on Design of Flat Belt Drive*
S-3	SLO-1	*Stresses for Various Load Combinations*	*Practice 12 Problems on Design of Shaft on Torsional Rigidity basis*	*Selection of Taper Roller Bearings*	*Practice 22: Problems on Spur Gear Design Based on Lewis and Buckingham Equations*	*V- Belt Drive*
	SLO-2	*Practice 2:Problems on Various Machine Members Subjected to Various Load Combinations*		*Practice 16: Problems on Taper Roller Bearings*		*Practice 29: Problems on Design of V- Belt Drive*
S-4	SLO-1	*Eccentric Loading*	*Design of Hallow Shaft*	*Design for Cyclic Loads and Speeds*	*Practice 23: Problems on Spur Gear Design Based on Lewis and Buckingham Equations*	*Practice 30: Problems on Design of V- Belt Drive*
	SLO-2	*Practice 3:Problems on Various Machine Members Subjected to Eccentric Loading*	*Practice 13: Problems on Design of Hallow Shaft on Strength and Torsional Rigidity basis*	*Practice 17: Design of Ball Bearings subjected to Cyclic Loads and Speeds*		
S-5	SLO-1	*Lab 1: Part Modelling of a Mechanical Component using CAD tool*	*Lab 4: Part Modelling of a Universal Coupling and its Assembly using CAD tool*	*Lab 7: Part Modelling of a Screw Jackand its Assembly using CAD tool*	*Lab 10: Stress Analysis of an Axis-Symmetric Component using ANSYS*	*Lab 13: Convective Heat Transfer Analysis of a 2D Component using ANSYS*
	SLO-2					
S-6	SLO-1	*Factor of safety for Brittle and Ductile Materials*	*Spring Materials,Stresses in Helical Springs*	*Types of Lubrication, Viscosity Index, Petroff's Equation*	*Helical Gear Nomenclature*	*Chain Drive: Types, Failures, Designation*
	SLO-2	*Significance of Factor of Safety in Machine Design*	*Curvature Effect, Deflection, Compression Springs, Stability*	*Stable and Thick-Film Lubrication*	*Force Analysis- Helical Gear*	*Selection of Chain Drive, Chain Lubrication*
S-7	SLO-1	*Theories of failure*	*Helical Compression Spring Design Against Static Load*	*Design Considerations*	*Design of helical gear based on modified Lewis equations*	*Design of Chain Drive*

	SLO-2	Practice 4: Problems on Theory of failure	Practice 14: Problems on Design of Helical Spring Subjected to Static Load	Hydrostatic Step Bearing and its Energy Losses		Practice 31: Problems on Design of Chain Drive to run a Compressor
S-8	SLO-1	Introduction to Fracture Mechanics, and Fatigue in Metals	Helical Compression Spring Design- Trial and Error method	Practice 18: Problems on Hydrostatic Thrust Bearings	Practice 24: Problems onHelical Gear Design Based on Lewis Equations	Practice 32: Problems on Design of Chain Drive Power Transmission Shaft Applications
	SLO-2	S-N Curve, Fatigue Strength and the Endurance Limit	Practice 14: Problems on Design of Helical Spring based on Trial and Error Method			
S-9	SLO-1	Endurance Limit Modifying Factors, Stress Concentration and Notch Sensitivity	Helical Compression Spring Design Against Fatigue Load	Practice 19: Problems on Hydrostatic Step Bearings	Practice 25: Problems onHelical Gear Design Based on Modified Lewis Equations	Practice 33: Problems on Design of Chain Drive for Drilling Machine Applications
	SLO-2	Practice 6: Problems on Stress Concentration Factors	Practice 14: Problems on Design of Helical Spring Subjected to Fatigue Load			
S-10	SLO-1	Lab 2: Part Modelling of a Mechanical Component using CAD tool	Lab 5: Part Modelling of a Plummer Blockand its Assembly using CAD tool	Lab 8: Stress Analysis of Truss using ANSYS	Lab 11: Stress Analysis of Beams (Cantilever, Simply supported, Fixed ends) using ANSYS	Lab 14: Modal analysis of Spring-Mass system using ANSYS
	SLO-2					
S-11	SLO-1	Practice 7: Infinite Life for Machine Member Subjected to Reversed Load	Design of Keys	Hydrodynamic Theory	Bevel Gear and Its Types	Wire Rope - Types, Construction, Lays of Wire Rope
	SLO-2	Practice 8: finite Life for Machine Member Subjected to Reversed Load	Practice 15: Problems on Design of Keys	Sommerfeld Number, Raimondi and Boyd method	Bevel Gear Nomenclature	Failures in Wire Rope
S-12	SLO-1	Soderberg and Goodman lines, Modified Goodman Diagram,	Design of rigidFlange Coupling	Temperature Rise, Bearing Construction, Bearing Materials	Force Analysis- Bevel Gear	Selection of Wire Rope, Stresses in Wire Rope
	SLO-2	Design for Variable Loading	Practice 16: Problems on Flange Coupling	Selection of Lubricants , Bearing failures	Design of bevel gear based on Lewis and Buckingham equations.	Design of a Wire RopeDrive for Crane Applications
S-13	SLO-1	Practice 9: Problems on Infinite Life for Machine Member Subjected to Fluctuating Load	Design of Flexible Flange Coupling	Practice 20: Problems on Hydrodynamic Bearings	Practice 26: Problems on Bevel Gear Design Based on Lewis and Buckingham Equations	Practice 34: Problems on Expected life of Wire Rope under Dynamic Conditions
	SLO-2		Practice 16: Problems on Flexible Bushed Pin Flange Coupling			
S-14	SLO-1	Practice 10: Problems on Finite Life for Machine Member Subjected to Fluctuating Load	Practice 17: Problems on Flexible Bushed Pin Flange Couplings	Practice 21: Problems on Hydrodynamic Bearings	Practice 27: Problems on Bevel Gear Design Based on Lewis and Buckingham Equations	Practice 35: Problems on Factor of Safety of Wire Rope under Static Conditions
	SLO-2					
S-15	SLO-1	Lab 3: Part Modelling of a Flange Coupling and its Assembly using CAD tool	Lab 6: Part Modelling of a Knuckle Joint and its Assembly using CAD tool	Lab 9: Stress Analysis of a Plate with a Circular hole using ANSYS	Lab 12: Conductive Heat Transfer Analysis of 2D Component using ANSYS	Lab 15: Model Practical Exam
	SLO-2

Course Offering Department	Mechatronics Engineering	Data Book / Codes/Standards	-		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify different power semiconductor devices and utilize them in different converter circuits*
CLR-2 :	*Utilise single phase and three phase converters and Choppers*
CLR-3 :	*Utilise single phase and three phase inverters, AC Voltage regulators and cycloconverters*
CLR-4 :	*Apply converters and choppers to drive DC motors*
CLR-5 :	*Apply Inverters, voltage Regulators and cycloconverters to drive AC motors*
CLR-6 :	*Utilise Power Semiconductor devices for converter circuits, operate DC and AC drives using converters*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Analyze various power semiconductor devices used in Power converters*	3	75	70	H	-	H	L	M	-	M	M	M	M	-	M	-	-	-
CLO-2 :	*Identify working principle of controlled Rectifiers and Choppers*	3	75	70	H	M	H	H	M	-	M	M	M	M	-	M	-	-	-
CLO-3 :	*Identify working principle of Inverters and Cycloconverters*	3	75	70	H	M	H	H	M	-	M	M	M	M	-	M	-	-	-
CLO-4 :	*Operate DC drives using controlled rectifiers and choppers*	3	75	70	H	-	M	H	M	-	M	M	M	M	-	M	-	-	-
CLO-5 :	*Operate AC drives using Inverters and Cycloconverters*	3	75	70	H	-	M	H	M	-	M	M	M	M	-	M	-	-	-
CLO-6 :	*Identify power semiconductor devices, controlled rectifiers, choppers, inverters, cycloconverters for operating electric drives.*	3	75	70	-	-	M	M	M	-	M	M	M	M	-	M	-	-	-

		Semiconductor Devices	Controlled Rectifiers and Choppers	Inverters and AC Chopper	DC Drives	AC Drives
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to power semiconductor devices.*	*Introduction to controlled rectifiers*	*Introduction to inverters*	*Drives: Introduction*	*Induction motor fundamentals*
	SLO-2	*Basic structure and operation of power diode, Types of power diode*	*Types of controlled rectifiers*	*Types of inverters.*	*Electric Drives: Classification*	*Types of Induction motor*
S-2	SLO-1	*Basic structure and operation of power transistor*	*Operation of single phase fully controlled rectifier with R load*	*Operation of 1- phase voltage source inverter.*	*Classes of Duty*	*Speed control of Induction motor : Types*
	SLO-2	*Basic structure and operation of SCR*	*Operation of single phase fully controlled rectifier with RL load*		*Fundamentals of DC motor*	*Stator voltage control.*
S-3	SLO-1	*Characteristics and applications of SCR*	*Operation of single phase fully controlled rectifier with RLE load*	*Operation of 3 - phase voltage source inverter:180° mode VSI*	*Speed control of DC motor : Armature control*	*Variable frequency control.*
	SLO-2	*Basic structure and operation of GTO*	*Operation of single phase half controlled rectifier with RLE load*		*Speed control of DC motor: Field control.*	*VSI fed Induction motor drive*
S-4	SLO-1	*Basic structure and operation of TRIAC.*	*Operation of three phase half wave controlled rectifier with R load for continuous current.*	*Operation of 3 - phase voltage source inverter: 120° mode*	*Operation of Ward Leonard drives.*	*Rotor resistance control.*
	SLO-2	*Characteristics and applications of TRIAC.*	*Operation of three phase fully controlled rectifier with R load for continuous current.*	*Operation of 3 - phase current source inverter*		*Static Rotor resistance control*
S-5	SLO-1	*Basic structure and operation of MOSFET*	*Operation of three phase fully controlled rectifier with RL load for continuous current.*	*Types of ac voltage control: Phase control.*	*Converter fed DC drive: Types, Quadrant operation*	*Slip power recovery scheme:StaticKramers Scheme*
	SLO-2	*Characteristics and applications of MOSFET*	*Dual Converter*	*Types of ac voltage control: Integrated cycle control.*	*Fully controlled converter fed drive*	*StaticScherbius Scheme*
S-6	SLO-1	*Basic structure and operation of IGBT*	*Operation of choppers. Classification of choppers*	*Operation of 1- phase voltage regulator .*	*Semi-converter controlled converter fed drive*	*Fundamentals of synchronous motor*
	SLO-2	*Characteristics and applications of IGBT*	*Control strategies: Methods and Operation*		*Speed torque characteristics*	*Types of synchronous motor*

S-7	SLO-1	*Triggering methods for SCR*	*Operation of A, B types of chopper.*	*Operation of 3 - phase AC voltage controls: With anti parallel SCR configuration, with R load operation.*	*Chopper fed DC drive: types*	*Open loop control.*
	SLO-2		*Operation of C type of chopper.*		*Chopper fed DC drive: operation*	*Closed loop control.*
S-8	SLO-1	*Commutation techniques for SCR.*	*Operation of D type of chopper.*	*1-phase cyclo–converters: Introduction*	*Four quadrant operation of dc drive*	*Variable frequency control: Methods*
	SLO-2		*E type of chopper.*	*1-phase cyclo–converters: Types*		
S-9	SLO-1	*Firing circuits of SCR: R,RC and UJT Firing circuits*	*Multiphase chopper*	*1-phase step up cyclo-converters*	*Closed loop control*	*Voltage source fed synchronous motor.*
	SLO-2		*Applications of choppers.*	*1-phase step down cyclo-converters*		*Current source fed synchronous motor.*

Course Code	18MHC205J	Course Name	MICROCONTROLLERS AND EMBEDDED SYSTEMS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	18MHC108J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mechatronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Familiarize with the functionality of microcontrollers.*
CLR-2 :	*Understand the concepts of microcontroller and its applications to mechatronics systems.*
CLR-3 :	*Understand the fundamentals of embedded systems design with real time system.*
CLR-4 :	*Develop programming skill to design in embedded C.*
CLR-5 :	*Apply knowledge to real-world application.*
CLR-6 :	*To impart knowledge of embedded system and microcontroller programming.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Demonstrate an understanding with the functionality of microcontrollers*	2	85	80	H	-	-	M	-	-	-	-	H	-	-	H	-	-	-
CLO-2 :	*Apply the concepts of microcontroller and its applications to mechatronics systems*	1	85	80	H	-	-	M	-	-	-	-	H	-	-	H	-	-	-
CLO-3 :	*Apply the fundamentals of embedded systems design with real time system.*	1	85	80	H	H	H	H	-	-	-	-	H	-	-	-	-	-	-
CLO-4 :	*Able to program and design using embedded C*	2	85	80	H	-	H	H	M	-	-	-	H	-	-	-	-	-	-
CLO-5 :	*Demonstrate the application of knowledge to real world application*	2	85	80	H	-	H	H	M	-	-	-	H	-	-	-	-	-	-
CLO-6 :	*Demonstrate an understanding on the concept of embedded system and microcontroller programming*	2	85	80	H	H	H	H	M	L	M	L	H	L	M	H	-	-	-

		Microcontroller 8051	ARM7 Controller	Introduction to Embedded Systems	Computing Platform and Design Analysis	Real Time Operating System
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Microcontroller 8051*	*ARM7 Controller*	*Definition, Key Elements Of An Embedded System.*	*DebuggingTechniques/ Challenges*	*Arbitration Schemes*
	SLO-2	*Architecture*	*Architecture*	*Design Metric Challenges*		*Software Architectures*
S-2	SLO-1	*Pin Description*	*Functional Description*	*Cpu Buses*	*Program Design And Analysis*	*Round Robin*
	SLO-2	*FunctionalDescription*		*Memory Devices, I/O Device*	*Components For Embedded Programs*	*Round Robin With Interrupt*
S-3	SLO-1	*Instruction Set Of 8051 Microcontroller.*	*ARM State Instruction*	*Component Interfacing*	*Model Of Programs*	*Function Queue Scheduling, Limitations Of Non-RTOS Embedded Systems*
	SLO-2	*Arithmetic Group*	*Data Transfer Instruction*	*Design With Microprocessors*	*DFG, CDFG*	*Introduction To RTOS And Its Features*
S 4-5	SLO-1	*Arithmetic Operations Using 8051*	*Arithmetic Operations Using ARM7*	*Stepper Motor Interface Using Microcontroller.*	*Keyboard Display Interface Using Microcontroller*	*Traffic Light Control Interface Using Microcontroller*
	SLO-2					
S-6	SLO-1	*Logical Group*	*Data Processing Instruction*	*Processor Technology*	*Assembly, Linking And Loading*	*Shared Data Problems*
	SLO-2	*Data Transfer Group*	*Thumb State Instruction*	*General Purpose Processors*	*Basic Compilation Techniques*	*IssuesIn SDP*
S-7	SLO-1	*Boolean Group*	*Data Transfer Instruction*	*Custom Single Purpose Processors*	*Program Optimization*	*SolutionsOf Shared Data Problem*
	SLO-2	*Branching Group*	*Data Processing Instruction*	*Application Specific Integrated Circuits*		*Semaphores – Introduction*
S-8	SLO-1	*Addressing Modes*	*Addressing Modes*	*IC Technology*	*Performance Analysis - System Level & Program Level*	*Multiple Semaphores; Reentrancy*
	SLO-2		*ARM Operating Modes*	*PLD*		*Semaphore Problems*
S 9-10	SLO-1	*Counting Odd And Even Numbers Using 8051 Microcontroller*	*Code Conversion Using ARM7*	*ADC Interfacing Using Microcontroller*	*PWM Interfacing UsingMicrocontroller*	*Repeat Session*
	SLO-2					
S-11	SLO-1	*Assembly Language Programming*	*Branch, SWI, PSR Instructions*	*VLSI*	*Optimization- Performance, Energy*	*Semaphores & Shared Data Problem*
	SLO-2	*Mnemonics, Op Code*	*Loading Constants, Conditional Execution*	*FPGA*	*Optimization – Power, Program Size*	*Semaphores As A Signaling Device*
S-12	SLO-1	*Programming Of 8051 Using Assembly Language*	*Programming Of ARM7Using Assembly Language*	*Design Technology*	*Program Validation*	*Operating System Services*
	SLO-2			*Hardware / Software Co-Design*	*TestingOf Program*	*Queues , Mailbox*
S-13	SLO-1	*Programming Of 8051 Using Assembly Language*	*Programming Of ARM7 Using Assembly Language*	*Integrated Development Environments*	*Interrupts*	*Pipes , Timer Functions*
	SLO-2			*Tool Chains*	*Interrupt Latency*	*Events*
S 14-15	SLO-1	*Timer/Counter Programs Using 8051 Microcontroller*	*Timer/Counter Programs Using ARM7Controller*	*DAC Interfacing Using Microcontroller*	*LED Display Using Microcontroller*	*Repeat Session*
	SLO-2

Course code	18MHC301J	Course name	MANUFACTURING PROCESSES	Course category	P	Professional core	L	T	P	C
							3	0	2	4

Pre-requisite courses	Nil	Co-requisite courses	Nil	Progressive courses	Nil
Course offering department	Mechatronics engineering	Data book / codes/standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*understand the principle and process of different metal forming process*
CLR-2 :	*Impart knowledge on types and approaches of metal cutting process.*
CLR-3 :	*Gain knowledge in concept of computerized machine tool for metal cutting process.*
CLR-4 :	*Understand the concept of additive manufacturing process.*
CLR-5 :	*familiar in manufacturing metrology*
CLR-6 :	*implement knowledge of manufacturing processes and manufacturing metrology*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Explain the process of different metal forming process.*	1	85	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Distinguish the types and approaches of metal cutting process.*	1	85	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Implement the concept of computerized machine tool for metal cutting process.*	1	85	80	H	-	H	_	H	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Understand the concept of additive manufacturing process.*	2	85	80	H	-	-	H	-	-	H	-	-	-	-	-	-	-	-
CLO-5 :	*acquire knowledge on manufacturing metrology*	2	85	80	H	H	-	H	-	-	_	-	-	-	-	-	-	-	-
CLO-6 :	*impart knowledge of manufacturing processes and manufacturing metrology*	2	85	80	H	H	H	H	-	-	H	-	-	-	-	-	-	-	-

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Casting process: introduction*	*Introduction to metal cutting processes*	*CNC machine tools*	*Additive manufacturing: concept, types.*	*Introduction to manufacturing metrology*
	SLO-2	*Classification of casting process.*	*Cutting tools*	*NC machines*	*Fused deposition method: working principle,*	*Laser metrology and precision instruments*
S-2	SLO-1	*Mould and its types.*	*Classification: single point cutting tool nomenclature*	*DNC machines*	*Advantages, limitations, applications.*	*Types of lasers – laser in engineering metrology*
	SLO-2	*Pattern: types of pattern*	*Multi point cutting tool nomenclature*	*CNC machines: introduction*	*Selective laser sintering process*	*Metrological laser methods for applications in machine systems*
S-3	SLO-1	*Special casting techniques*	*Tool wear*	*Classification of CNC machines.*	*Working principle, advantages, limitations,*	*Interferometry applications – speckle interferometry*
	SLO-2	*Expandable mould casting*	*Tool life, Prediction of tool life*	*Constructional feature of CNC turning centre and*	*Applications.*	*Laser interferometers in manufacturing and machine tool alignment testing*
S 4-5	SLO-1 SLO-2	*Lab – 1: Machining of spur gear using universal milling machine.*	*Lab – 4: Manufacturing a single point cutting tool using tool and cutter grinder.*	*Lab - 6 :Multiple turning with grooving and thread cutting by applying canned cycle using CNC turning centre*	*Lab – 9: Profile cutting by applying Mirroring operation using CNC vertical machining centre.*	*Lab – 11: Profile cutting using Wire cut Electrical Discharge Machine (WEDM).*
S-6	SLO-1	*Investment casting , Shell mould casting,*	*Orthogonal and oblique cutting*	*CNCmachining centre.*	*Stereo lithography process: working principle,.*	*Introduction to co-ordinate measuring system*
	SLO-2	*Permanent mould casting.*	*Mechanics of orthogonal cutting using single point cutting tool*	*Open loopCNC systems, closed loop CNC systems*	*Advantages, limitations, applications*	*Co-ordinate metrology*
S-7	SLO-1	*Die casting and its types*	*Cutting forces in orthogonal cutting, merchant circle analysis.*	*CNC controllers.*	*3d printing technique: working process,*	*CMM configurations , hardware components – software*
	SLO-2	*Centrifugal casting and its types*	*Calculation of various forces involved during orthogonal cutting.*	*Structural members of CNC machines: slide ways, linear motion*	*Advantages, limitations, applications.*	*Probe sensors – displacement devices –*
S-8	SLO-1	*Defects in casting.*	*Problem solving*	*Bearings, ball screws*	*PCB manufacturing process: silicon wafer production process*	*Performance evaluations, applications*
	SLO-2	*Mechanical working of metals*	*Methods to gear generation:*	*Work holding, tool holding devices,*	*Diffusion, masking.*	*Roll of CMM in reverse engineering*

S 9-10	SLO-1 SLO-2	*Lab – 2: Machining of helical gear using gear hobbing machine.*	*Gear shaping*	*Lab – 7: Step turning using CNC turning centre.*	*Lab – 10: Drilling and peck drilling using CNC vertical machining centre.*	*Lab – 12: Pocketing of Linear and Circular profile using CNC vertical machining centre.*
S-11	SLO-1	*Rolling process, Mechanism, types and defects of rolling.*	*Milling*	*Automatic tool changer.*	*Photolithography technique.*	*Opto electronic devices*
	SLO-2	*Joining Process- Welding techniques- Conventional and special Techniques*	*Hobbing process.*	*Feedback devices used in machining centre*	*Etching, cleaning,*	*Ccd, on-line and in-process monitoring in production*
S-12	SLO-1	*Joining Process- Soldering and Brazing*	*Grinding: cylindrical, surface*	*fundamentals of part programming,*	*. Types of pcb: single sided, double sided,*	*Applications.*
	SLO-2	*Forging: mechanism Types, machine used for forging, defects.*	*Centreless grinding process.*	*G and m codes.*	*Multilayer pcb board*	*Image analysis and computer vision*
S-13	SLO-1	*Extrusion: mechanism, classification, defects.*	*Super finishing: lapping.*	*. Types of programming: manual part programming,*	*flexible PCB board*	*image analysis techniques*
	SLO-2	*Drawing: mechanism, tube drawing, deep drawing, defects.*	*Honing, buffing.*	*Canned cycle and subroutines.*	*Inspection of PCB boards.*	*Comparison laser scanning with vision system*
S 14-15	SLO-1 SLO-2	*Lab - 3 : Facing, turning and thread cutting using conventional lathe*	*Lab - 5 :Finishing operation using cylindrical and surface grinding process.*	*Lab – 8 :Multiple turning by applying canned cycle using CNC turning centre.*	*Lab – 13: Extra practice session.*	*Lab – 14 :Model Examination*

		Introduction to mechatronic system design	Mechatronics design concepts	Model based system engineering	Case Study-1	Case Study-2
Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Definition of mechatronics*	*Significance of modeling*	*Motivation for model based system engineering (MBSE)*	*Need of model based design for the system under consideration*	*Need of model based design for the system under consideration*
	SLO-2	*Evolution of mechatronics systems*	*Example*	*System engineering process*	*Benefits of model based design*	*Benefits of model based design*
S-2	SLO-1	*Multidisciplinary nature of modern machines and their design challenges*	*Model-In-Loop(MIL) simulation*	*System lifecycle*	*Understanding the system under consideration*	*Understanding the system under consideration*
	SLO-2	*Example*	*Example*	*Types of systems*	*Mechanical and electronics description*	*Mechanical and electronics description*
S-3	SLO-1	*Traditional vs mechatronics approaches*	*Software-In-Loop(SIL) simulations*	*Modeling ,analysis and management of system requirements*	*Mathematical description of the model*	*Mathematical description of the model*
	SLO-2	*Example*	*Example*	*Modeling ,analysis and management of system requirements*	*Mathematical modeling- derivation*	*Mathematical modeling- derivation*
S 4-5	SLO-1 SLO-2	*Lab 1*	*Lab 4*	*Lab 7*	*Lab 10*	*Lab 13*
S-6	SLO-1	*Mechatronics design process*	*Virtual Prototyping- a critical aspect of mechatronics approach*	*Structural modeling using SysML*	*Detailed modelling procedures and simulation parameters.*	*Detailed modelling procedures and simulation parameters.*
	SLO-2	*Need of design tools integration*	*Example*	*Structural modeling using SysML*	*Simulation methods*	*Simulation methods*
S-7	SLO-1	*Review of key elements of mechatronics systems from integration perspective*	*Real-time simulations (xPC)*	*Behavioral modeling using SysML*	*Key integration issues specific to the system under consideration*	*Key integration issues specific to the system under consideration*
	SLO-2	*Example*	*Example*	*Behavioral modeling using SysML*	*Key integration issues specific to the system under consideration*	*Key integration issues specific to the system under consideration*
S-8	SLO-1	*Role of mechatronics engineer.*	*concurrent development of subsystems*	*Identifying complexities through different levels of abstractions and refinement*	*System integration*	*System integration*
	SLO-2	*Various steps for design*	*Example*	*Identifying complexities through different levels of abstractions and refinement*	*System integration*	*System integration*
S 9-10	SLO-1 SLO-2	*Lab 2*	*Lab 5*	*Lab 8*	*Lab 11*	*Lab 14*

S-11	SLO-1	Types of design (mecahtronics approach)	Real-time Hardware-In-Loop simulation (HIL)	Adding constraints	Control techniques adopted	Control techniques adopted
	SLO-2	Example	Example	Interaction diagrams	Related Control theory	Related Control theory
S-12	SLO-1	integrated product design	Running the controller model and plant model on real-time target	Automatic approach for synergistic verification and validation	Selection of hardware components based on the model based design	Selection of hardware components based on the model based design
	SLO-2	load conditions on mechanisms	V&V using HIL RT model.	Automatic approach for synergistic verification and validation	Selection of hardware components based on the model based design	Selection of hardware components based on the model based design
S-13	SLO-1	Structure and systems	Rapid prototyping of mechatronic products- introduction to precision engineering	Performance analysis	System performance evaluation techniques	System performance evaluation techniques
	SLO-2	Man Machine Interface (MMI).	Example	Performance analysis	System performance evaluation techniques	System performance evaluation techniques
S 14-15	SLO-1 SLO-2	Lab 3	Lab 6	Lab 9	Lab 12	Lab 15: Model Practical Examination

Note: ** List of plants/systems for case study 1,2 and 3 is listed below in the table. Faculty may choose any one plant/system from the list given and continue the same system/plant for the entire case study module

** List of experiments for the lab slots is listed below in the table for mechatronics as well as mechatronics with robotics specialization. Faculty in-charge may choose from the list of experiments to be provided for the various lab slots

.

LIST OF PLANTS/SYSTEMS FOR CASE STUDIES		
CASE STUDY 1	CASE STUDY 2	CASE STUDY 3
Rotary Inverted pendulum	Hybrid Electric Vehicle	Six Degree of freedom serial manipulator
Inverted pendulum on a cart with rotary actuator	Electronic Stability Control (ABS, EBD and ESP)	Six Degree of freedom parallel manipulator
Inverted pendulum with Linear Actuator	Active Suspension	Collision avoidance in mobile robotic systems
Double inverted pendulum	Engine Control System	Multi-rotor aerial vehicles
Ball and Plate Control Systems	Systems for Passenger Safety and Convenience	Haptics based teleoperation of manipulators
Two wheeled Self Balancing Mobile Robot	Cruise control	Cooperative manipulators
Magnetically levitated Systems		Underwater vehicles

LIST OF EXPERIMENTS FOR LABORATORY EXERCISE FOR MECHATRONICS AND MECHATRONICS WITH ROBOTICS SPECILAIZATION	
MECHATRONICS	MECHATRONICS WITH ROBOTICS SPECILAIZATION
Quadrature decoding of incremental encoder	Quadrature Encoder Decoding for Position and Velocity Estimation of a DC Servo Motor
Closed loop position control of DC motor	Mathematical modeling and control of physical system
Open loop control of mobile robot	Physical Modelling of a Differential Drive Robot
Closed loop control of mobile robot with wheel encoders	Closed Loop Control of a Differential Drive Robot with Wheel Encoder and Acoustic Ranging
Mathematical modeling and control of physical system.	Localization and Global Path Planning for a differential drive robot in a occupancy grid
Introduction to physical modeling	Closed loop control of pneumatics
Creating requirements models of systems using SysML in different context and views	Closed control of pneumatics with PLC
MBSE approach for elevator	Introduction to hardware in loop simulation
Localization and Global Path Planning for a differential drive robot in a occupancy grid	Introduction to forward and inverse Kinematics of a serial Manipulator
Introduction to hardware in loop simulation	Introduction to velocity Kinematics of a Serial Manipulator
One degree of freedom pitch control (VTOL).	Trajectory Planning in Joint Space for Serial Manipulator
Control of rotary inverted pendulum	Trajectory Planning in Cartesian Space for Serial Manipulator
Closed loop control of pneumatics	Position Control of Serial Manipulator – Application task
Closed control of pneumatics with PLC	Force/Position Control of Serial Manipulator- Application task

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Mechatronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire skills to solve real world problems in Engineering Graphics Design, Engineering Mechanics and Mechanics of Solids*
CLR-2 :	*Acquire skills to solve real world problems in Machines and Mechanisms, Thermodynamics and Fluid Mechanics*
CLR-3 :	*Solve problems in Manufacturing Technology, Material Technology, Applied Thermal Engineering for Automotive Engineers*
CLR-4 :	*Solve problems in Automotive Engines, Vehicular Structures, Driveline Systems and Automotive Electrical and Electronics Systems*
CLR-5 :	*Acquire skills to solve real world problems in Design of Automotive components and CAD Analysis for Automotive Engineers*
CLR-6 :	*Acquire skills to solve real world problems for competitive examinations in Automobile and Mechanical Engineering*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Practice and gain confidence, competence to solve problems in Engineering Graphics Design, Engineering Mechanics, Mechanics of Solids*	3	85	80	H	H	H	L	L	L	L	L	L	L	L	L	M	L	M
CLO-2 :	*Practice and gain confidence and competence to solve problems in Machines and Mechanisms, Thermodynamics and Fluid Mechanics*	3	85	80	H	H	M	L	L	L	L	L	L	L	L	L	M	M	M
CLO-3 :	*Solve problems in Manufacturing Technology, Material Technology and Applied Thermal Engineering for Automotive Engineers*	3	85	80	H	H	M	L	L	L	L	L	L	L	L	L	M	L	M
CLO-4 :	*Solve problems in Automotive Engines, Vehicular Structures and Driveline Systems and Automotive Electrical and Electronics Systems*	3	85	80	H	H	M	L	L	L	L	L	L	L	L	L	M	M	M
CLO-5 :	*Practice and gain confidence,competence to solve problems in Design of Automotive components, CAD Analysis for Automotive Engineers*	3	85	80	H	H	H	L	L	L	L	L	L	L	L	L	M	L	M
CLO-6 :	*Practice and gain confidence and competence to solve problems in the broad domain of Automobile and Mechanical Engineering*	3	85	80	H	H	M	L	L	L	L	L	L	L	L	L	M	M	M

Duration (hour)		3	3	3	3	3
S-1	SLO-1	*Tutorial on Engineering graphics and design*	*Tutorial on Machines and Mechanisms*	*Tutorial on Manufacturing Technology for Automotive Engineers*	*Tutorial on Automotive Engines*	*Tutorial on Design of Automotive components*

ACADEMIC CURRICULA

Professional Core Courses

NANOTECHNOLOGY

Regulations - 2018

SRM INSTITUTE OF SCIENCE & TECHNOLOGY
(Deemed to be University u/s 3 of UGC Act, 1956)

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18NTC201T	Course Name	NANOPHOTONICS	Course Category	C	Professional Core	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Nanotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the fundamentals of light interaction with nanoscale materials*
CLR-2 :	*Learn the basic concepts of quantum confined materials*
CLR-3 :	*Understand the principles of photonic crystals*
CLR-4 :	*Enrich their knowledge on plasmonics and near field optics*
CLR-5 :	*Familiarize themselves with nanophotonic fabrication*
CLR-6 :	*Understand the various aspects of nanobiophotonics*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Apply the principles of Quantum confinement effects to understand Nanoscale interaction dynamics*	2	80	75	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Utilize the photonic crystals in various applications*	2	80	70	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Explore the principles of plasmonics to study Near field scanning optical microscopy*	2	75	70	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Utilize the Near field scanning optical microscopy in data storage applications*	2	80	75	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Apply fundamental principles of Near field optical chemical vapor deposition technique for fabrication of nanophotonic materials*	2	80	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Utilize the Fluorescence contrast mechanism concepts to analyze the properties of organic materials*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Photons and electrons*	*Quantum confined materials*	*Plasmonics*	*Nanophotonic Fabrication*	*Biophotonics*
	SLO-2	*Similarities and differences*	*Inorganic quantum confined structures*	*Internal reflection*	*Adiabatic nanofabrication*	*Nanobiophotonics*
S-2	SLO-1	*Free space propagation*	*Manifestation of quantum confinement*	*Evanescent waves*	*Non adiabatic nanofabrications*	*The cell and scale*
	SLO-2	*Confinement of photons and electrons*	*Quantum confined Stark effect*	*Plasmons and surface plasmon resonance*	*Conditions for non-adiabatic nanofabrications*	*The cell and constituents*
S-3	SLO-1	*Propagation through a classically forbidden zone - Electrons*	*Dielectric confinement effect*	*Attenuated total reflection*	*Near field optical Chemical Vapour Deposition NFO CVD - Philosophy*	*Origin of contrast mechanisms*
	SLO-2	*Propagation through a classically forbidden zone - Photons*	*Super lattices*	*Grating SPR coupling*	*Near field optical Chemical Vapour Deposition – Design and technique*	*Optical contrast mechanisms*
S-4	SLO-1	*Tunneling Localization under a periodic potential - Electrons*	*Core-shell quantum dots*	*Optical waveguide SPR coupling*	*Near field photolithography - Philosophy*	*Classical contrast mechanisms*
	SLO-2	*Tunneling Localization under a periodic potential - Photons*	*Quantum wells*	*SPR dependencies and materials*	*Near field photolithography design and technique*	*Bright field and dark field contrast*
S-5	SLO-1	*Band gap and cooperative effects of photons*	*Quantum confined structures as lasing media*	*Plasmonics and nanoparticles*	*Self-assembling method*	*Phase contrast*
	SLO-2	*Band gap and cooperative effects of electrons*	*Organic quantum confined structures*	*Near-Field Optics*	*Self-assembling method via optical near field interactions*	*Inter ferrometric contrast*
S-6	SLO-1	*Nanoscale optical interactions*	*Photonic crystals*	*Aperture less near field optics*	*Regulating the size of Nanoparticles*	*Fluorescence contrast mechanism*
	SLO-2	*Axial and lateral nanoscopic localization*	*Important features of photonic crystals*	*Near field scanning optical microscopy (NSOM or SNOM) - Principle*	*Size dependent resonance*	*Confocal Microscopy*
S-7	SLO-1	*Nanoscale confinement of photonic interactions*	*Applications of Photonic crystals*	*Near field scanning optical microscopy design and technique*	*Controlling size of Nanoparticles*	*Nonlinear microscopy based on second harmonic generation*
	SLO-2	*Nanoscale confinement of electronic interactions*	*Dielectric mirrors*	*SNOM Applications*	*Alignment of Size controlled Nanoparticles*	*Coherent anti-stokes Raman scattering (CARS)*

S-8	SLO-1	*Quantum confinement effects*	*Interference filters*	*SNOM based visualization of waveguide structures*	*Controlling position of Nanoparticles*	*Reduction of the observation volume*
	SLO-2	*Nanoscale interaction dynamics*	*Photonic crystal laser, Photonic crystal sensing*	*SNOM based energy transport*	*Alignment of position controlled Nanoparticles*	*Far field method - 4Pi microscopy*
S-9	SLO-1	*Nanoscale electronic energy transfer*	*Photonic crystal fibers (PCFs)*	*SNOM based optical data storage*	*Separation of Nanoparticles*	*Microscopy on a mirror*
	SLO-2	*Cooperative emissions*	*Introduction to Metamaterials*	*SNOM based optical data recovery*	*Alignment of Separated and controlled Nanoparticles*	*Stimulated emission depletion (STED)*

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Biomaterials*	*Structure of membranes*	*Nanodiagnosis*	*Drug delivery systems*	*Biosensor*
	SLO-2	*Surface and bulk properties of bio materials*	*Lipid bilayer*	*Detection of tumors*	*Traditional drug delivery*	*Nanobiosensors design*
S-2	SLO-1	*Nanoceramics*	*Traffic across membranes*	*Detection of plaque*	*Controlled drug delivery*	*optical biosensors based on nanoplasmonics*
	SLO-2	*Polymeric nanoparticles*	*Endocytosis*	*Genetic defects*	*Nanoparticle based drug delivery*	*Nanoimmuno sensors*
S-3	SLO-1	*Hydroxyapatite: Structures, Chemical composition*	*Exocytosis*	*Nano medical devices.*	*Targeted drug delivery to cancer*	*Immuno Fluorescent Biomarker Imaging*
	SLO-2	*Applications of hydroxyapatite*	*Receptor mediated transport*	*In vivo imaging*	*Types of drug targeting*	*Iron Oxide Nanoparticles in Magnetic Resonance Imaging*
S 4-5	SLO-1 SLO-2	*Lab 1:Introduction to Nanobiotechnology laboratory*	*Lab 4: Analysis of antimicrobial activity of nanoparticles*	*Lab 7: Hemocompatability analysis of nanoparticles*	*Lab 10: Fabrication of nanoparticles incorporated scaffolds for tissue engineering*	*Lab 13: Determination of controlled drug release from controlled drug delivery system*
S-6	SLO-1	*Surface modification of biomaterials*	*Active transport*	*Nanotechnology in gene therapy*	*Surface Modified Nanoparticles*	*Nanotechnology in food processing*
	SLO-2	*Surface immobilized biomolecules*	*Passive transport*	*Stem cells*	*Peptide/DNA Coupled Nanoparticles for drug delivery and targeting*	*Food preservation*
S-7	SLO-1	*Interaction of biomaterials with cells*	*Membrane transporters*	*Polymerase chain reaction*	*Lipid Nanoparticles For Drug Delivery and targeting*	*Nanomaterials for food packing*
	SLO-2	*Immune response to biomaterials*	*Membrane proteins and Pumps*	*Enzyme-linked immunosorbent assay(ELISA)*	*Inorganic Nanoparticles For Drug Delivery*	*Delivery of nutraceuticals*
S-8	SLO-1	*Biocompatibility*	*Antibodies*	*DNA profiling*	*Metal/Metal Oxide Nanoparticles for antibacterial/anti-fungal/anti-viral activity*	*Delivery of functional foods*
	SLO-2	*In vitro analysis*	*Monoclonal antibodies*	*Nanoprobes*	*Hyperthermia treatment*	*Nanosensors for food Pathogen Detection*
S 9-10	SLO-1 SLO-2	*Lab 2: Preparation of media, slants and plates for bacterial growth*	*Lab 5: Isolation of Genomic DNA*	*Lab 8: Amplification of DNA by PCR*	*Lab 11: Quantitation estimation of biomolecules*	*Lab 14: Fluorescent imaging of nano-bio interaction*

S-11	SLO-1	*In vivo analysis*	*Nanoimmuno assay*	*Blotting techniques*	*Dental implants*	*Nanotechnology in agriculture*
	SLO-2	*Tissue compatibility*	*Blood-Biomaterial Interactions*	*Western Blotting*	*Regenerative medicine*	*Nanoformulation For The Control Of Plant Disease*
S-12	SLO-1	*Biomolecular motors*	*Interactions with Proteins*	*Surface plasmon Resonance*	*Tissue engineering*	*Nanomaterials for PEST control in PLANTS*
	SLO-2	*Linear motors*	*Cell Adhesion*	*Surface enhanced Raman scattering*	*Nanoparticles and polymeric nanofibers in tissue engineering*	*Nanotechnology and Agricultural Sustainable Development*
S-13	SLO-1	*Rotary motors*	*Biocompatibility*	*Analysis of biomolecular structure by AFM*	*Scaffold design and fabrication*	*Toxicity of nanomaterials*
	SLO-2	*Actin and myocin*	*Safety Testing of Biomaterials*	*Analysis of biomolecular structure by molecular pulling force spectroscopy*	*Controlled release strategies in tissue engineering*	*Environmental risks of nanomaterials*
S 14-15	SLO-1 SLO-2	*Lab 3: Growth of Bacteria by pour plate, spread plate and streak plate techniques*	*Lab 6: DNA fragmentation analysis by Agarose gel electrophoresis*	*Lab 9: Repeat/Revision of the experiments*	*Lab 12: Estimation of drug loading percentage*	*Lab 15: Protein separation by SDS PAGE analysis*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to toxicity*	*Nanoparticles vs. micron-size particle*	*Interaction of nanoparticles with lipid bilayers*	*Methods for toxicity assessment*	*In vivo Analysis*
	SLO-2	*Size-specific behavior of nanomaterials*	*Nanoparticle toxicity*	*Cell-level studies*	*LADMET hypothesis*	*species and strains of animals used in toxicity studies*
S-2	SLO-1	*Challenges in Nanotoxicology*	*Comparison to larger counterparts*	*Nanoparticle-induced membrane permeability*	*Effects of Nanoparticle on the Cardiovascular System*	*Dosing profile for animal models*
	SLO-2	*Entry Routes into the Human Body*	*Requirement for appropriate model*	*Internalization of cation nanoparticles into cells*	*Thrombosis*	*Studies on toxicology*
S-3	SLO-1	*Importance of size and shape of Nano particle*	*Exposure assessment*	*Placental Barrier*	*Cardiac ischemia*	*Histopathology studies*
	SLO-2	*Physicochemical properties of nanomaterials*	*Types of exposure pathways*	*Biological barrier model evaluation of nanoparticle transfer*	*Fibrinolysis*	*metabolism in mouse and rat*
S-4	SLO-1	*Mediators of nano toxicity*	*Significance of Exposure assessment*	*Transport across placental barrier*	*Coagulation*	*Predicting Penetration of nanomaterials*
	SLO-2	*physicochemical properties of Nanomaterials related to toxicity*	*Occurrence of exposure pathways*	*Assessment of placental Transfer*	*Endothelial Dysfunction*	*Fate of Nanoparticles in the Body*
S-5	SLO-1	*Characterization of administered nanomaterials*	*Nature of exposures*	*Biological mechanism of nanoparticle disposition*	*Effect of Nanoparticles on Nervous system*	*Toxicity Mechanisms*
	SLO-2	*Toxicity studies*	*Documentation of toxicity*	*Outline of gene*	*Effect of Nanoparticles on Genotoxicity*	*Mechanisms for Radical Species Production*
S-6	SLO-1	*Nanomaterial characterization after administration*	*Bio-distribution of nanoparticles*	*Cellular interactions*	*Effect of Nanoparticles on carcinogenicity*	*Genotoxicity Mechanisms*
	SLO-2	*Source and types of Nanoparticles-*	*Localization of particles in tissues*	*Nano Biointeractions*	*Mechanism of carcinogenecity*	*Detection of Genotoxicity*
S-7	SLO-1	*Particles due to airpollution*	*Nanoparticles in the environment*	*Toxicity based on route of entry*	*Toxicity caused to Organ by Nanoparticles*	*Characterization of Genotoxicity*
	SLO-2	*Biotoxicity of metal oxide Nanoparticles*	*Nanoparticles in mammalian system*	*Nature of toxicity*	*Effect of nanoparticles on Respiratory system*	*Inflammation analysis*

S-8	SLO-1	*Carbon nanotubes in practice*	*Health threats due to Nanoparticles*	*Toxicodynamics*	*Dermal toxicity analysis*	*Biocompatibility studies*
	SLO-2	*Postproduction processing of carbon nanotubes*	*Nanoparticle translocation in mammalian system*	*Dose vs Toxicity Relationships*	*Hepato toxicity analysis*	*Laws and Regulations Governing Animal Care and Use in Research*
S-9	SLO-1	*Toxicity of Carbon nano tubes*	*Direct vascular effects in mammalian system*	*Toxicokinetics*	*Nephrotoxicity studies*	*Factors Affecting Exposure to Nanomaterials*
	SLO-2	*Body Distribution;Nanoparticles and Cellular Uptake*	*Role of Nanoparticles in Mediating the Adverse Pulmonary Effects*	*Absorption, distribution, metabolism excretion studies (ADME)*	*Assessment of oxidative stress and antioxidant status*	*Elements of a Risk Management Program*

Course Code	18NTC204J	Course Name	NANOELECTRONICS	Course Category	C	Professional Core	L	T	P	C
							3	0	2	4

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Nanotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire knowledge on quantum confinement and low-dimensional nanostructures for use in nanoelectronics*
CLR-2 :	*Understand the key aspects of electron tunneling and its application in the operation of nanodevices.*
CLR-3 :	*Understand the functioning of tunnel junctions in single electron devices*
CLR-4 :	*Understand the concept of molecular electronics for realization of device miniaturization*
CLR-5 :	*Acquire knowledge on the fabrication, characterization and modeling of nanodevices*
CLR-6 :	*Acquire knowledge on designing and fabrication process which is Essential for simulation of nanoelectronic devices.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Acquaint with the fundamentals of nanoelectronics*	1	80	75	H	H	M	M	M	M	H	H	H	H	M	H	H	H	H
CLO-2 :	*Utilize their knowledge on the electron tunneling phenomena in semiconductor nanodevices*	1	80	70	H	H	M	M	M	M	H	H	H	H	M	H	H	H	H
CLO-3 :	*Apply the knowledge on the operation and application perspectives of various tunnel devices*	2	75	70	H	H	H	H	H	H	H	H	M	H	M	H	H	H	H
CLO-4 :	*Analyze the concept of molecular electronics*	2	80	75	M	H	M	M	H	H	H	H	M	H	L	H	M	M	M
CLO-5 :	*Apply their knowledge on the fabrication and modeling of nanodevices*	2	80	80	H	H	H	H	H	H	H	H	H	H	L	H	H	H	H
CLO-6 :	*Demonstrate skills required for using advanced experimental techniques*	2	80	75	H	M	M	H	M	M	M	H	H	H	M	H	H	M	H

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Introduction to nanoelectronics*	*Tunnel effect and tunneling elements*	*Classical and semi-classical transport*	*Introduction to molecular electronics*	*Introduction to computational methods*
	SLO-2	*Review of basic quantum physics*	*Nanoelectronics in tunneling devices*	*Ballistic transport in nanostructures*	*Atomic-scale junctions: an overview*	*Necessity of computational methods*
S-2	SLO-1	*Moore's law and its consequences*	*Tunneling of electrons through a potential barrier*	*Coulomb blockade - an overview*	*Schrodinger equation*	*Molecular wire*
	SLO-2	*Silicon electronics - limitations*	*Electron tunneling–key points*	*Single electron tunneling and Coulomb blockade*	*Self-consistent field*	*Molecular wire conductance*
S-3	SLO-1	*International technology roadmap characteristics (ITRC)*	*Potential energy profiles for material interfaces*	*Coulomb blockade in a quantum dot circuit*	*Molecular functionalities*	*Theoretical aspects on molecular conductance*
	SLO-2	*ITRC and Nanoscale importance*	*Metal-semiconductor and metal-insulator junctions*	*Coulomb blockade in a nano-capacitor*	*Metal-molecule interfaces*	*Computational aspects on molecular conductance*
S 4-5	SLO-1 SLO-2	*Lab 1: Determination of electron concentration versus temperature using MATLAB*	*Lab 4: Four probe resistivity measurement*	*Lab 7: PSpice simulation of FET and its I-V characteristics*	*Lab 10: PSpice simulation of MOSFETs using a simple DC circuit and a CMOS inverter with DC sweep analysis*	*Lab 13: Simulation of diode using TCAD and its characterization*
S-6	SLO-1	*Need for new concepts in electronics*	*Metal-insulator-metal junctions*	*Ballistic transport and the Landauerformula*	*Molecular band Structure*	*Various modeling techniques*
	SLO-2	*Challenges in micro to Nano conversion*	*Metal work function and electron affinity*	*Quantized Conductance*	*Level broadening*	*Monte Carlo method*
S-7	SLO-1	*Dimensionality in materials*	*Tunneling applications*	*Working principle of Single Electron Transistor (SET)*	*Atomistic view of electrical resistance*	*Ab initio simulations*
	SLO-2	*Density of states of materials at nanoscale*	*Field electron emission*	*A single-electron pump and turnstile*	*Conductance of atomic-scale contacts*	*Ab initio simulations: examples and problems*
S-8	SLO-1	*Effect of band gap of material at different dimensions*	*Double barrier tunneling*	*Quantum dot*	*Coherent transport through molecular junctions*	*Multiscale modeling*
	SLO-2	*Length scales of charge scattering*	*Resonant tunneling diodes*	*Quantum-dot cellular automata*	*Non-coherent transport in molecular electronics devices*	*Modeling of nanodevices and applications*

S 9-10	SLO-1	Lab 2: Determination of electron (μn) and hole (μp) mobilities versus doping concentration in semiconductor using MATLAB	Lab 5: PSpice simulation of diode and its I-V characteristics with smoke analysis	Lab 8: Hall effect of semiconductors	Lab 11: PSpice simulation of Zener Diode model and its I-V characteristics	Lab 14: Designing of 2D MOSFET using TCAD
	SLO-2					
S-11	SLO-1	Special dimensionality case of carbon	Tunneling in MOS Transistors	Electron transport in quantum dots	Molecular diodes	TCAD
	SLO-2	Introduction to 0D, 1D, 2D and 3D carbon forms	nel transistor	Electron transport in quantum wires	Conducting mechanism of single-molecule junctions	TCAD: examples and problems
S-12	SLO-1	Nanocomputing	Hot electron effects in MOSFETs	Introduction to spintronics	Single-molecule transistors	NEH DFT
	SLO-2	Device simulation software at nanoscale	Gate-oxide tunneling	Giant magneto resistance	Elastic and inelastic co-tunneling	NEH DFT: examples and problems
S-13	SLO-1	Future Prospects of Nanoelectronic Devices	Principles of scanning tunneling microscopy (STM)	Tunnel magneto resistance	Molecular devices and logic switches	Materials studio
	SLO-2	Progress in Nanoelectronic Architectures	Applications of STM in nanotechnology	Spintronic devices and applications	Interface engineering issues	Future of nanoscale modeling
S 14-15	SLO-1	Lab 3: Determination of Fermi function for different temperature using MATLAB	Lab 6: PSpice simulation of BJT and its I-V characteristics	Lab 9: Repeat/Revision of the experiments	Lab 12: PSpice simulation of a Phototransistor	Lab 15: Repeat/Revision of the experiments
	SLO-2

Course Offering Department	Nanotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Overview the techniques and processes to organize nanoscale materials in device form*
CLR-2 :	*Understand methodology of lithography and etching to pattern materials*
CLR-3 :	*Acquire knowledge of different deposition techniques and ion implantation*
CLR-4 :	*Get acquainted with CMOS fabrication rules*
CLR-5 :	*Introduce next generation printed electronics technology*
CLR-6 :	*Make aware of VLSI technology*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Realizing the technology of Si wafer manufacturing*	2	80	75	H	M	H	H	H	M	M	H	H	H	M	H	H	H	H
CLO-2 :	*Pattern diverse materials using lithography techniques to enhance the device density on chip*	2	80	70	H	M	M	H	M	M	M	H	M	H	M	H	M	M	M
CLO-3 :	*Applying basic diffusion processes importance in semiconductor technology*	2	75	70	H	M	H	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Fabricate small-scale devices and chip level device space management*	2	80	75	M	H	H	M	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Envision low cost production of electronic devices using printed technology*	2	80	70	H	M	H	H	H	M	M	H	M	H	M	H	H	H	H
CLO-6 :	*Imagining importance of nanoscale devices*	2	80	75	H	M	M	H	H	M	M	H	H	H	M	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Importance of micro and nanofabrication techniques in IC: front and back plane*	*Need and basics of lithography*	*Classification of material deposition techniques*	*History of complementary metal-oxide-semiconductor (CMOS)*	*Overview of printing processes*
	SLO-2	*Over view of crystal and lattices*	*Optical lithography*	*Overview of physical and chemical deposition technique*	*Requirements of device isolation*	*Advantages of printing*
S-2	SLO-1	*Classification of grades of silicon*	*Optical lithography controls and mask making*	*Physical vapour deposition*	*Types of isolation*	*Requirements of printing*
	SLO-2	*Production of electronic grade silicon*	*Working concept and controls of e-beam lithography*	*Resistive heating evaporation*	*Local Oxidation of Silicon (LOCOS) and shallow trench isolation (STI) processes for local isolation*	*Printing tools*
S-3	SLO-1	*Czochralski growth technique*	*Resolution of electron beam lithography*	*Electron beam heating evaporation*	*Concept of self-alignment*	*Types of fluids for ink*
	SLO-2	*float zone growth technique*	*X-ray lithography*	*Pulsed laser evaporation*	*MOS fabrication with self-alignment*	*Properties of fluids in printing processes*
S-4,5	SLO-1 SLO-2	*Lab 1:Introduction to the basics of laboratory*	*Lab 4: To perform patterning by photolithography process*	*Lab 7: To deposit Al thin film on the oxidized silicon surface by thermal evaporation*	*Lab 10:To form local anodic oxidation pattern by scanning probe microscopy*	*Lab 13:To perform contact angle measurement of solvents used in printing process*
S-6	SLO-1	*Silicon wafer shaping*	*Stamp based lithography*	*Basics of sputtering*	*Requirement of planarization*	*Working principle of flexographic printing (FP)*
	SLO-2	*Wafer manufacturing steps and inspection*	*Nanoimprint lithography and applications*	*DC and magnetron sources for sputtering*	*Local and global planarization using chemical-mechanical polishing*	*Advantages and disadvantages of FP*
S-7	SLO-1	*Overview of types of epitaxy*	*Etching of silicon*	*Introduction to atomic layer deposition*	*Importance of MOS devices*	*Working principle of gravure printing (GP)*
	SLO-2	*Definition-epitaxy*	*Wet etching mechanism and disadvantages*	*Working principle of atomic layer deposition*	*Concept of well formation with p and n doping*	*Advantages and disadvantages of GP*
S-8	SLO-1	*Comparison of vapour phase epitaxy (VPE), liquid phase epitaxy (LPE) and molecular beam epitaxy (MBE)*	*Types of dry etching*	*Concepts of diffusion*	*Working principle of integrated CMOS inverter*	*Working principle of screen printing (SP)*

	SLO-2	*Working of MBE process*	*Ways of plasma generation for etching processes, Sputter etching*	*Using Fick's diffusion in semiconductor doping*	*Fabrication process of CMOS inverter*	*Advantages and disadvantages of SP*
S-9,10	SLO-1	*Lab 2: To perform wafer cleaning processes followed for VLSI applications*	*Lab 5: To perform wet chemical etching of silicon dioxide*	*Lab 8: To deposit Al thin film on the oxidized silicon surface by e-beam evaporation*	*Lab 11: To design MOS capacitor design layout using 'layout editor'*	*Lab 14: To measure gauge factor of flexible strain gauge*
	SLO-2					
S-11	SLO-1	*General epitaxy growth mechanism*	*Capacitively coupled plasma*	*Process of ion implantation*	*Usage of isolation and biasing of inverter*	*Working principle of inkjet printing (IP)*
	SLO-2	*Epitaxy growth kinetics and examples*	*Inductively coupled plasma*	*Ion implantation tool*	*'Latch up' concept for inverter*	*Advantages and disadvantages of IP*
S-12	SLO-1	*Understanding silicon oxide properties*	*Classification of plasma using its density*	*Fundamentals of ion energy loss and stopping*	*Design rules for CMOS*	*Examples of printed devices*
	SLO-2	*Thermal oxidation furnace*	*High density plasma*	*Damage due to implantation*	*MOSIS specifics for inverter*	*Comparison of printed devices with lithographically fabricated devices*
S-13	SLO-1	*Silicon oxide growth kinetics*	*Reactive ion etching*	*Ion distribution, junction control*	*Introduction to silicon-on-insulator (SOI)*	*Concept of hybrid printed electronics*
	SLO-2	*Thin oxide growth and process of oxidizing polysilicon*	*Deep reactive ion etching and bosh process*	*Carrier recovery using annealing process*	*On chip fabrication processes of passive components*	*Future of printed low-cost electronics*
S-14,15	SLO-1	*Lab 3: To oxidize silicon under O_2 ambient using temperature controlled furnace*	*Lab 6: To perform wet chemical etching of metal films*	*Lab 9: To perform ion beam implantation process and defect analysis using SRIM software*	*Lab 12: To fabricate MOS capacitor and study its I-V characteristics*	*Lab 15: Repeating of experiments*
	SLO-2

Duration (hour)		15	15	15	15	15
S-1	SLO-1	*Importance of polymers: basic concepts*	*Conducting polymers*	*Introduction and additives of composites*	*Metal – Polymer Nanocomposites*	*Metal Matrix Nanocomposites*
	SLO-2	*Classification of polymers on the basis of microstructures & macrostructures*	*Discovery*	*Characteristics of composites*	*Physical and chemical properties of Nanosized metal particles*	*Introduction to metal matrix composites*
S-2	SLO-1	*polymer classifications based on-occurrence, types, process and applications*	*Structural characteristics*	*Classification- particulate, fibrous*	*Metal containing polymers: cryochemical synthesis, structure and physio-chemical properties*	*Reinforcement and matrix materials*
	SLO-2	*Chain structure, configuration and conformation*	*Intrinsic and extrinsic conduction in polymers*	*Laminated and hybrid composites*	*Nanostructured polymer nanoreactors for metal particle formation*	*Mechanism of reinforcement*
S-3	SLO-1	*Homo and heteropolymers - copolymers*	*Charge carriers and conducting mechanism*	*Additives for Composites*	*Metal-polymer nanocomposite synthesis, Ex-situ, In-situ*	*Long fiber, short fiber and particulate*
	SLO-2	*Chemistry of polymerization*	*Chemical and electrochemical methods of synthesis of conducting polymers*	*Catalysts*	*Optically anisotropic metal polymer nanocomposites*	*Interlayer in metal matrix composites*
S 4-5	SLO-1 SLO-2	*Lab 1:Introduction to the basics of Polymer science*	*Lab 4: Preparation of poly vinyl alcohol nanofibers by electro spinning technique*	*Lab 7: Fabrication of polymer thin film composites using phase inversion techniques*	*Lab 10: Preparation of ceramic based nanocomposites*	*Lab 13: Synthesis of particulate reinforced composites*
Coupling Agents	SLO-1	*Molecular solution, Melt and elastomer*	*Synthesis method of polyaniline*	*Accelerators*	*Polymer- Clay Nanocomposites*	*Characterization and relevance to material properties*
	SLO-2	*Crystalline nature of polymers*	*Polypyrrole*		*Synthesis of Nylon 6-clay hybrid (NCH) composites and characterization*	*Ceramic Matrix Nanocomposites*
S-7	SLO-1	*Factors affecting crystallization phenomenon*	*Characterization using UV-Visible and FTIR spectrometer*	*Fillers*	*Crystal structure of NCH and properties of NCH*	*Fibrous monolithic ceramic, fiber reinforced ceramic composites*
	SLO-2	*Glass transition temperature (Tg)*	*Morphological study using SEM and TEM*	*Toughening Agents*	*Polypropylene layered silicate Nanocomposites*	*Whisker reinforced ceramic matrix composite*

S-8	SLO-1	*Melting temperature(Tm)*	*Applications of conducting polymers in corrosion protection*	*Reinforcement Materials*	*Epoxy Nanocomposite*	*Particulate reinforced, graded and layered ceramic composite*
	SLO-2	*Factors affecting Tg and Tm*	*Sensors*	*Fibre Reinforcements*	*Layered silicate Nanocomposites*	*Nanophase ceramic composites*
S 9-10	SLO-1 SLO-2	*Lab 2: Polymerization of Urea-formaldehyde resin*	*Lab 5: Characterization of the fibers prepared using SEM and wettability test*	*Lab 8: Preparation of metal-polymer nanocomposites*	*Lab 11: Morphological characterization of prepared composites using SEM*	*Lab 14: Synthesis of hydrogel using cellulose acetate polymer*
S-11	SLO-1	*Importance of Tg*	*Conducting adhesives*	*Woven and Non-Woven Fabrics*	*Structure, properties and characterization*	*Metal reinforced ceramic matrix nanocomposites*
	SLO-2	*Molecular weight distribution*	*Electro conducting polymers*	*Carbon , Aramid Fibre and Boron Fibres*	*Poly(ethyl acrylate)/bentonite nanocomposites*	*Refractory and special ceramic composites*
S-12	SLO-1	*Degree of polymerization*	*Polymer batteries and electrets*	*Natural Fibres – Cellulose*	*Poly(butylene terephthlate) based Nanocomposites*	*Non-oxide ceramic composites*
	SLO-2	*Reaction kinetics of polymerization*	*Polymers with piezoelectric property*	*Testing of Composites*	*Polymer/calcium carbonate Nanocomposites*	*Machinable Nanocomposite ceramics-Silicon nitride and silicon carbide based ceramics*
S-13	SLO-1	*Dielectric constant*	*Pyroelectric and ferroelectric property*	*Tensile, Impact strength, Compression and Flexural Strength*	*Functional applications of polymer-clay Nanocomposites*	*Functionally graded ceramics- clay Nanocomposites*
	SLO-2	*Polarization; Dissipation factor*	*Photo conducting polymers.*	*Applications of composites*	*Biodegradable polymer categories, properties and drawback*	*Applications of ceramic matric Nanocomposites*
S 14-15	SLO-1 SLO-2	*Lab 3: Interfacial Polymerization of polyamide from Diamine and Diacid Chloride.*	*Lab 6: Fabrication of polymer membrane using phase inversion techniques*	*Lab 9: Repeat/Revision of the experiments*	*Lab 12: Synthesis of Nylon-6 polymer*	*Lab 15: Study of glass transition, melting and crystallization temperature of given materials*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Nanotechnologu	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Acquire skills to develop knowledge in nanotechnology principles*
CLR-2 :	*Acquire skills to understand quantum mechanical concepts of free electron and band theory of solids*
CLR-3 :	*Acquire skills in size effects and reaction kinetics at nanoscale*
CLR-4 :	*Acquire skills in various imaging techniques related to the field of nanotechnology*
CLR-5 :	*Acquire skills in chemistry of biological molecules*
CLR-6 :	*Acquire skills in knowing the electronic property of materials in mesoscopic level*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Practice and gain confidence and competence to solve problems in statistical mechanics & thermodynamics*	3	85	80	H	H	H	L	L	L	L	L	L	L	L	L	M	L	M
CLO-2 :	*Practice and gain confidence and competence to solve many body problems using various quantum phenomenon & assumptions*	3	85	80	H	H	M	L	L	L	L	L	L	L	L	L	M	M	M
CLO-3 :	*Practice and gain confidence and competence to solve problems in biophysical principles and dynamics involved in biological systems*	3	85	80	H	H	M	L	L	L	L	L	L	L	L	L	M	L	M
CLO-4 :	*Practice and gain confidence and competence to solve problems & simulation process involved in nanoelectronics devices*	3	85	80	H	H	M	L	L	L	L	L	L	L	L	L	M	M	M
CLO-5 :	*Practice and gain confidence and competence to solve problems using spectroscopic techniques*	3	85	80	H	H	H	L	L	L	L	L	L	L	L	L	M	L	M
CLO-6 :	*Solve problems in the broad domain of Naotechnology and competitive examinations in Nanoscience & NT*	3	85	80	H	H	M	L	L	L	L	L	L	L	L	L	M	M	M

Duration (hour)		3	3	3	3	3

AEROSPACE ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18ASE201T	Course Name	INDUSTRIAL AERODYNAMICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ASC202J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the application of aerodynamics in fields other than Aerospace*
CLR-2 :	*understand effect of terrain types on the wind flows*
CLR-3 :	*understand the concepts on wind energy and wind turbine aerodynamics*
CLR-4 :	*Understand how buildings are affected by wind flows and how to mitigate the unwanted aerodynamic forces*
CLR-5 :	*Understand how aerodynamics plays a major role in streamlining and drag reduction of automobiles*
CLR-6 :	*Understand the role of aerodynamics in sports balls and vortex induced vibrations*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Understand different aspects of atmosphere and atmospheric boundary layer*	2	80	70	H	M	L	L	-	-	M	-	-	-	-	-	-	M	L
CLO-2 :	*Acquire knowledge on Atmospheric boundary layer in a wind tunnel*	2	80	70	H	M	M	L	-	-	M	-	-	-	-	-	H	M	M
CLO-3 :	*Learn the working principles of wind turbines*	2	80	70	H	L	L	L	-	-	H	-	-	-	-	-	-	M	M
CLO-4 :	*Appreciate the usefulness of drag reduction devices*	2	80	70	H	L	L	L	-	-	-	-	-	-	-	-	H	H	H
CLO-5 :	*Gain knowledge on building aerodynamics*	2	80	70	H	L	M	L	-	-	M	-	-	-	-	-	M	M	M
CLO-6 :	*Acquire comprehensive understanding on sports aerodynamics*	2	80	70	H	M	L	L	-	-	-	-	-	-	-	-	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Aerodynamics / Aviation Aerodynamics / Non-Aviation Aerodynamics*	*Need for renewable energy sources*	*Rolling resistance Vs Air resistance*	*Aerodynamics of race cars*	*Introduction to building aerodynamics*
	SLO-2	*Introduction to Industrial Aerodynamics*	*Wind energy and its importance*	*Need for automotive aerodynamics*	*Ground effects*	*Environmental winds in city blocks*
S-2	SLO-1	*Need for Industrial Aerodynamics*	*Wind turbine and its parts*	*History of Automotive Aerodynamics*	*Down force generation*	*Low-rise buildings (LRB)*
	SLO-2	*Branches of Industrial Aerodynamics*	*Classification of wind turbines*	*Evolution of Automobile styling*	*Frontal and rear wings*	*Roof suction effects*
S-3	SLO-1	*Atmospheric layers*	*Horizontal axis wind turbine (HAWT)*	*Classification of cars*	*Aerodynamic braking - Spoilers*	*High-rise buildings (HRB)*
	SLO-2	*Atmospheric circulations*	*Advantages and disadvantages of HAWT*	*Pressure distribution over cars*	*Aerodynamics of wheels*	*Dynamic loads*
S-4	SLO-1	*Local winds*	*Vertical axis wind turbine (VAWT)*	*Aerodynamic forces on Automobiles*	*Introduction to sports aerodynamics*	*Aerodynamic load mitigation techniques for LRB*
	SLO-2	*Terrain types*	*Advantages and disadvantages of VAWT*	*Lift, Drag and Moments*	*Aerodynamics of Cricket ball*	*Aerodynamic load mitigation techniques for HRB*
S-5	SLO-1	*Atmospheric Boundary Layer (ABL)*	*Wind power, Power coefficient*	*Sources of vortices in automobiles*	*Swing and Spin*	*Flow over a simplified building*
	SLO-2	*Aerodynamic Roughness length*	*Tip speed ratio, Solidity ratio*	*Flow separation and wake dynamics*	*Effect of dimples on golf ball*	*Pressure distribution*
S-6	SLO-1	*Mean velocity profiles*	*1-D Momentum theory*	*Aerodynamic Improvements*	*Vortex shedding*	*Wind loads – TVL Formula*
	SLO-2	*Power-law and Logarithmic law*	*Betz limit*	*Aerodynamics Vs Styling - Limitations*	*Strouhal number*	*Funneling effect*
S-7	SLO-1	*Variation of wind velocity with height in ABL for different terrain types*	*Power losses*	*Aerodynamics of motor bikes*	*Flow induced vibrations*	*Ventilation*
	SLO-2	*Turbulence Intensity and its variation in ABL*	*Energy density of different rotors*	*Aerodynamics of roofless vehicles*	*Fluid-structure interactions*	*HVAC*
S-8	SLO-1	*Need for ABL simulation*	*Aerodynamic power control*	*Aerodynamics of Trucks and Buses*	*Effect of Reynolds number on wake*	*Architectural Aerodynamics*
	SLO-2	*Boundary layer tunnels*	*Methods for power control*	*Aerodynamics of Trains*	*Aerodynamic flutter*	*Wind catchers*
S-9	SLO-1	*Simulation of ABL in a wind tunnel*	*Blade sections - Airfoils*	*Ahmed body – Generic automobile shape*	*Wake galloping*	*Building codes*
	SLO-2	*Methods to produce ABL*	*Wind turbine siting*	*Wind tunnel experiments and simulations*	*Vortex shedding control methods*	*Loads on launch vehicles subjected to winds*

CLO-1 :	*Determine the forces or loads acting on an accelerated airplane.*	2	80	70	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-2 :	*Determine the fixed end moments and plot shear force and bending moment diagram.*	2	85	75	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-3 :	*Determine the deflection of various structures by different energy methods.*	2	75	70	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-4 :	*Determine the buckling load of a column under various end conditions.*	2	85	80	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-5 :	*Application of theorem of three moments to solve for statically indeterminate beams.*	2	85	75	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-6 :	*Apply the concepts of theories of failure to determine the safe design.*	3	80	70	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to limit loads, design loads and factor of safety.*	*Continuous beam concept. Derivation of Clapeyron's equation of three moments.*	*Derivation of Strain Energy stored due to axial, bending and Torsional loads.*	*Introduction to columns and its classification. Buckling load, factor of safety.*	*Introduction to failure theories.*
	SLO-2	*Broad classification of external loads on a conventional aircraft.*	*Application of Clapeyron's equation of three moments to continuous beam with simply supported ends.*	*Strain Energy stored due to shear loads, The theorem of Complementary Energy and Castigliano' s Theorem.*	*Failure of a short and long column, Euler's theory for long columns.*	*Discussion about different materials and its properties*
S-2	SLO-1	*Problems involving accelerated motion of rigid airplane.*	*Problem solving*	*Derivation of Castigliano's theorem I and II, Maxwell's Reciprocal theorem*	*Assumptions followed in Euler's theory for long columns. Different end conditions of a column, concept of buckling stress.*	*Maximum Principal stress theory: Derivation.*
	SLO-2		*Application of Clapeyron's equation of three moments to continuous beam with fixed end supports.*	*Application of Castigliano's theorem – I to find deflection of beams.*	*Derivation of Euler's formula for crippling load when both ends are hinged*	*Maximum Principal stress theory: Problem solving*
S-3	SLO-1	*Landing Gear Structure*	*Problem solving*	*Problem solving*	*Derivation of Euler's formula for crippling load when both ends are fixed*	*Maximum Principal strain theory Derivation.*
	SLO-2	*Problems of Calculating Reactions andLoads on Members of Landing Gear Units*	*Application of Clapeyron's equation of three moments to continuous over-hanging beam.*	*Problem solving*	*Derivation of Euler's formula for crippling load when one end fixed and the other hinged end.*	*Maximum Principal strain theory: Problem solving*
S-4	SLO-1	*Problem solving*	*Problem solving*	*Differences between statically determinate and statically indeterminate structures with examples*	*Derivation of Euler's formula for crippling load when one end fixed and the other I free.*	*Maximum Shear stress theory: Derivation.*
	SLO-2	*Torque link*	*Application of Clapeyron's equation of three moments to continuous beam with one end fixed and other one simply supported end.*	*Application of Castigliano's theorem – II to find deflection of trusses.*	*Limitations of Euler's formula, slenderness ratio and equivalent length of a column.*	*Maximum Shear stress theory: Problem solving*
S-5	SLO-1	*Main forces on the airplane in an accelerated flight condition.*	*Problem solving*	*Problem solving*	*Problems to solve for crippling load using Euler's formula*	*Maximum Strain energy theory : Derivation.*

	SLO-2	*Loads on structural components*	*Derivation for Moment distribution method, stiffness factor, Distribution factor, carry over factor.*	*Problem solving*	*Problems to solve for crippling load using Euler's formula*	*Maximum Strain energy theory : Problem solving*
S-6	SLO-1	*Function of structural components*	*Application of Moment distribution method to continuous beam with simply supported ends.*	*Strain energy methods to find deflection in simply supported beams*	*Derivation: Column with initial curvature*	*Maximum Shear Strain energy theory: Derivation.*
	SLO-2	*Fabrication of structural components*	*Problem solving*	*Strain energy methods to find deflection in cantilever beams*	*Derivation: Column with an Eccentric loading.*	*Maximum Shear Strain energy theory: Problem solving*
S-7	SLO-1	*Safe life and fail-safe structures*	*Application of Moment distribution method to continuous beam with fixed end supports.*	*Unit load method to find member forces in a single redundant trusses/frames.*	*Problem solving*	*Important points from theories of failures used in design*
	SLO-2	*Aircraft inertia loads - Problems*	*Problem solving*	*Problem solving*	*Rankine's formula for columns and associated problems.*	*Problems on thin cylindrical shells on design criterion*
S-8	SLO-1	*Fixed and continuous beam – Introduction, Bending moment diagram for fixed beams*	*Application of Moment distribution method to continuous beam with one end fixed and other one simply supported end.*	*Problem solving*	*Long and short columns - Modes of failure*	*Problems on thick cylindrical shells on design criterion*
	SLO-2	*Slope and deflection for a fixed beam carrying point load at the middle*	*Problem solving*	*Unit load method to find member forces in double redundant trusses/frames.*	*Introduction to Beam columns and its applications*	*Graphical représentation of Maximum Principal stress and strain theory*
S-9	SLO-1	*Slope and deflection for a fixed beam carrying an eccentric point load.*	*Application of Moment distribution method to continuous over-hanging beam.*	*Problem solving*	*Member subjected to combined axial and transverse loads – Point load at the middle and an eccentric load*	*Graphical représentation of Maximum Shear stress and strain energy theory*
	SLO-2	*Slope and deflection for a fixed beam carrying uniformly distributed load over the entire length.*	*Problem solving*	*Problem solving*	*Member subjected to combined axial and transverse loads – Uniformly Distributed Load.*	*Graphical représentation of Maximum Shear strain energy theory*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction-Stress and strain*	*Properties of strain gage system*	*Introduction to resistance strain gage*	*Introduction to photoelasticity*	*NDT method-Introduction*
	SLO-2	*Introduction- Relation between stresses and strains for different materials*	*Basic characteristics of strain gage*	*Principle of operation of the resistance strain gage, Strain sensitivity*	*wave plates, polarized light*	*Classification of flaws, Steps in NDT*
S-2	SLO-1	*Principles of measurements*	*Huggenberger tensometer*	*Materials for resistance strain gage, Advance alloy, Isoelastic alloy, Karma alloy and other materials*	*Stress optic law*	*Fluorescent penetrant technique*
	SLO-2	*Aspects of measurements*	*Advantages and disadvantages, limitations*	*Types of electrical resistance strain gages-Unbonded wire strain gage, Bonded wire strain gage*	*Strain optic law*	*Magnetic particle inspection*
S-3	SLO-1	*Fundamental methods of measurements*	*Diffraction strain gage*	*Types of resistance strain gage-Bonded foil strain gage, Weldable strain gage*	*Plane polariscope , Derivation of intensity of light in circular polariscope*	*Eddy current testing*
	SLO-2	*Generalized measuring system*	*Advantages and disadvantages*	*Strain gage adhesives, Selection, Properties and types*	*Effect of stressed model in plane polariscope*	*Radiography*
S-4	SLO-1	*Accuracy and Precision*	*Interferometric strain gage*	*Mounting methods-Gage installation, Curing*	*Circular polariscope*	*Ultrasonic inspection*
	SLO-2	*Repeatability and Reproducibility*	*Advantages and disadvantages*	*Temperature compensation, Gage sensitivity, Gage factor*	*Derivation of intensity of light in circular polariscope*	*A scan, B scan and C scan*
S-5	SLO-1	*Tolerance and Range*	*Tuckerman strain gage*	*Strain gage circuits, Potentiometer circuit*	*Effect of stressed model in a circular polariscope*	*Thermography*
	SLO-2	*Bias and Linearity*	*Advantages and disadvantages*	*Temperature compensation ,sensitivity and range in potentiometer circuit*	*Explanation of fringe patterns*	*Holography*
S-6	SLO-1	*Sensitivity explanation*	*Capacitance strain gage*	*Wheatstone bridge circuit*	*Compensation techniques- Babinet soleil method of compensation*	*Acoustic emission technique*
	SLO-2	*Numerical solving*	*Advantages and disadvantages*	*Derivation of output voltage*	*Tardy method of compensation*	*Moire method of strain analysis*
S-7	SLO-1	*Hysteresis*	*Inductance strain gage*	*Circuit sensitivity and different arrangements in wheat stone bridge circuit*	*Fringe separation methods-Shear difference method, Interferometer method*	*Methods*

	SLO-2	*Dead space, Threshold and Resolution*	*Advantages and disadvantages*	*Rosette analysis, Different conditions of strain measurements*	*Electrical analogy method, Oblique-incidence method*	*Moire fringe pattern*
S-8	SLO-1	*Error Analysis- Classification*	*Semiconductor strain gage*	*Three element rectangular rosette*	*Fringe multiplication method*	*Physical explanation of moiré fringe pattern*
	SLO-2	*Error analysis- Sources*	*Advantages and disadvantages*	*Delta rosette*	*Explanation of fringe multiplication*	*Brittle coating methods*
S-9	SLO-1	*Error analysis numerical*	*Acoustical strain gage*	*Four element rectangular rosette*	*Properties of photoelastic materials*	*Types of brittle coating methods*
	SLO-2	*Calibration*	*Advantages and disadvantages*	*Tee delta rosette*	*Explanation of different photoelastic materials*	*Advantages and disadvantages of brittle coating methods*

Course Code	18ASE204T	Course Name	COMPOSITE MATERIALS AND STRUCTURES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ASC201J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify Composite materials*
CLR-2 :	*Understand the mechanical behavior of composite materials*
CLR-3 :	*Understand the existing production technologies*
CLR-4 :	*Identifying the selection of materials*
CLR-5 :	*Identify material's Application*
CLR-6 :	*Understand the application of various composites*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Aware of the composite materials and it properties*	*2*	*80*	*70*	*H*	*H*	-	-	-	-	-	-	-	-	-	*M*	*M*	*M*	*M*
CLO-2 :	*Understands application of composite materials in different aircraft components*	*2*	*85*	*75*	*H*	*H*	-	-	*H*	-	-	-	-	-	-	*M*	*M*	*M*	*M*
CLO-3 :	*Identify different treatments to strengthen materials*	*2*	*75*	*70*	*H*	-	*H*	*H*	-	-	-	-	-	-	-	*M*	*M*	*M*	*M*
CLO-4 :	*Understand molding techniques*	*2*	*85*	*80*	*H*	*H*	-	-	*H*	-	-	-	-	-	-	*M*	*M*	*M*	*M*
CLO-5 :	*Understand Various terminologies used in composite Materials*	*2*	*85*	*75*	*H*	-	*H*	-	-	-	-	-	-	-	-	*M*	*M*	*M*	*M*
CLO-6 :	*Understand forming Techniques*	*2*	*80*	*70*	*H*	-	-	-	-	-	-	-	-	-	-	*M*	*M*	*M*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Composite Materials*	*Hooke's law for Isotropic Materials*	*Micro Mechanics*	*Governing differential equation of general laminate*	*Manufacturing of Glass fibers*
	SLO-2	*Natural Composites*	*Numericals solving*	*Micro Mechanics*		*Block diagram of Manufacturing*
S-2	SLO-1	*Basic Definitions*	*Generalized Hooke's law*	*Derivation of Volume Fraction, Mass Fraction*	*Angle ply laminates*	*Manufacturing of Carbon Fibers*
	SLO-2	*Basic Definitions*	*Numericals solving*	*Density and Void Content*	*Cross ply laminates*	*Block diagram of Manufacturing*
S-3	SLO-1	*Introduction to Fibers*	*Hooke's law for 3D Orthotropic Materials*	*Numericals solving*	*Numericals solving*	*Fabrication of Composite Materials*
	SLO-2	*Types of Fibers*	*Hooke's law for 3D Orthotropic Materials*	*Numericals solving*	*Numericals solving*	*Molding Techniques*
S-4	SLO-1	*Matrices*	*Numericals solving*	*Strength of Materials approach*	*Laminate Codes*	*Hand Layup Process*
	SLO-2	*Types of Matrices*		*Evaluation of four Elastic Modulii*	*Laminate Codes*	*Spray layup process*
S-5	SLO-1	*Properties of Fibers*	*Hooke's law for 2D Unidirectional lamina*	*Numericals solving*	*Special cases of laminates*	*Compression Molding*
	SLO-2	*Properties of Matrices*		*Numericals solving*	*ABD Matrix representation*	*Resin Transfer molding*
S-6	SLO-1	*Classification of Composite Materials*	*Numericals solving*	*Elasticity approach to determine Material Properties*	*Maximum Stress failure theory*	*Vacuum Bag and Pressure bag Mödling*
	SLO-2	*Block Diagram of Classification*	*Numericals solving*		*Maximum Strain failure theory*	*Autoclave Processing*
S-7	SLO-1	*Application of Composites*	*Hooke's law for 2D Angle Lamina*	*Macro Mechanics*	*Tsai Hill failure theory*	*Filament winding process*
	SLO-2	*Application of Composites*		*Macro mechanics*	*Tsai wu failure theory*	*Pultrusion Process*
S-8	SLO-1	*Hooke's Law*	*Numericals solving*	*Stress strain relationship with respect to neutral axis and arbitrary axis*	*Basic concept of sandwich construction*	*Types of resins*
	SLO-2	*Basics of Hooke's Law*	*Numericals solving*		*Materials used in sandwich construction*	*Properties and Applications*
S-9	SLO-1	*Numericals solving*	*Numericals solving*	*Experimental characterization of Lamina*	*Failure modes of Sandwich panels*	*Netting Analysis*
	SLO-2

Course Code	18ASE207T	Course Name	FUNDAMENTALS OF COMBUSTION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ASC102J, 18ASC103T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Thermodynamic properties table of C-H-N-O system		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify the chemistry of combustion, the efficiency of burning processes and about pollutant emissions.*
CLR-2 :	*Identify the applications of basic thermal and fluid sciences on Engineering systems.*
CLR-3 :	*Identify the significance of material identification for industrial applications, including burners and engines.*
CLR-4 :	*Create insights to the combustion in engines and gas turbines, controlled experimentation and computational combustion.*
CLR-5 :	*Analyze the principle of normal and microgravity flames for space activities and fire safety.*
CLR-6 :	*Utilize the combustion concepts for the broad understanding of system testing, validation and designing.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Understand the combustion phenomenon and its applications to Aerospace Engineering.*	2	80	70	H	M	L	L	-	-	-	-	-	-	-	H	-	-	-
CLO-2 :	*Comprehend the concept and applications of the fundamental combustion parameters.*	2	80	70	H	M	M	M	-	-	L	-	-	L	-	H	M	M	M
CLO-3 :	*Understand combustion regimes: flame and detonation, premixed and diffusion combustion problems with applications.*	2	80	70	H	M	L	M	-	-	-	-	L	-	-	H	-	-	-
CLO-4 :	*Understand the chemical kinetics, chain reactions and related processes.*	2	80	70	H	M	M	M	-	-	M	M	M	M	L	H	M	M	M
CLO-5 :	*Utilize the physical understanding of flame speed and Numerical modelling of combustion processes.*	2	80	70	H	M	M	M	M	L	L	-	L	M	L	H	M	M	M
CLO-6 :	*Understand normal and microgravity flames and apply the knowledge to Aerospace Engineering Applications.*	2	80	70	H	M	M	M	M	L	L	M	L	M	L	H	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic Concepts: Ideal gases, mass and mole concept, fuel and oxidizer, basics of thermodynamics.*	*Combustion regimes and classification of combustible materials.*	*Introduction to Chemical kinetics, Rate laws, order and molecularity, Forward and Reverse Reactions.*	*Flame classification and structures.*	*Combustion in Normal and microgravity.*
	SLO-2	*Various modes of combustion and their characteristics*	*Flammability limits- Flame stabilization and material identification systems.*	*Energy Release Rates in a Chemical Reaction, Concentration, Law of Mass Action, Arrhenius Law.*	*Laminar flame speed, Factors affecting flame velocity--Methods of measuring flame velocity.*	*Factors affecting heat transfer and flame propagation in normal and low gravity flames.*
S-2	SLO-1	*Combustion and thermo chemistry - Review of property relations.*	*Maxwell equation and parametric analysis of enthalpies and internal energy*	*Variations of Reaction Rate, Temperature and Concentration in a Chemical Reaction with Time.*	*Stability limits of laminar flames.*	*Fire safety, Soot formation and related implications.*
	SLO-2	*Laws of thermodynamics-Reactant and product mixtures.*	*Phase transformation, Clausius Clapeyron equation and Gibbs-Helmholtz equation.*	*Rate of Reactions, Temperature dependence of rate coefficients, Pressure dependence of rate coefficients.*	*Flame propagation through combustible mixtures.*	*Interactive session with demo on practical working of premixed gas burners and candle flames.*
S-3	SLO-1	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
S-4	SLO-1	*Combustion Stoichiometry, Heat of Formation, Reaction, combustion.*	*Combustion products, Flow analysis and approaches.*	*Phase Rule for a System with Chemical Reactions. Thermodynamic Equilibrium Constant for a Gaseous Reaction.*	*Introduction to diffusion flames; appearance, structure, theoretical considerations.*	*Comparison of normal and microgravity experiments.*
	SLO-2	*Lower Calorific Value (LCV) and Higher Calorific Value (HCV), Relationships between Calorific Values, Reaction Enthalpies and Formation Enthalpies*	*Partial differential equations for combustion analysis.*	*Chain Reactions and Methods of Solving Chemical Kinetic Rate Equations.*	*Burning in convective atmospheres and Thermal spontaneous ignition.*	*Flame spread over thin fuels in actual and simulated microgravity conditions.*
S-5	SLO-1	*Thermochemical calculations: Enthalpies, Internal energy, Entropy.*	*Vectors and conservation equations for energy and momentum.*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Chemical reaction and Stoichiometric coefficients, Air-Fuel ratio, Equivalence ratio.*	*Application of Mass Energy and species Conservation.*	*Solving Problems*	*Solving Problems*	*Solving Problems*

S-6	SLO-1	*Calculation of Energy Release for Stoichiometric, oxidizer-rich and fuel rich Explosives.*	*Solving Problems*	*Introduction to diffusion mass transfer.*	*Image processing and combustion experimentation science.*	*Environnemental combustion considérations.*
	SLO-2	*Adiabatic flame temperature calculations: Analysis and practical considerations.*	*Solving Problems*	*Transport properties for gas mixtures.*	*Introduction to computational combustion and relevance.*	*Combustion, heat transfer and emission in industrial applications.*
S-7	SLO-1	*Chemical equilibrium, volumetric and gravimetric analysis.*	*Emission reduction and techniques in combustion instruments.*	*Mass transfer laws, Fick's law of Diffusion.*	*Numerical modeling of flame spreading phenomenon*	*Fire safety aspects of combustion sciences.*
	SLO-2	*Dissociation process and related issues.*	*Aerospace Engineering Applications of fundamental combustion physics.*	*Available and non-available energy of a source and finite body.*	*Numerical modeling of combustion processes.*	*Prospects in Aerospace propulsion and combustion.*
S-8	SLO-1	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
S-9	SLO-1	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*
	SLO-2	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*

Course Code	18ASE208T	Course Name	HEAT TRANSFER	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ASC102J, 18ASC103T	Co-requisite Courses	Nil	Progressive Courses	18ASE307T
Course Offering Department	Aerospace	Data Book / Codes/Standards	Heat & Mass Transfer Data Book, 9th edition by C P Kothandaraman, S Subramanyan		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To familiarize the concept of different modes of heat transfer.*
CLR-2 :	*To familiarize the concept of conduction in plane wall and cylinders*
CLR-3 :	*To familiarize the Utilization of extended surface & Heat Generation*
CLR-4 :	*To familiarize the concept of convection mode and it various applications*
CLR-5 :	*To familiarize the concept of Radiationmode and it various applications*
CLR-6 :	*To solve the heat transfer practical problems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the heat diffusion equation under different coordinates*	2	80	70	H	H	H	-	-	-	-	-	-	-	-	M	M	M	H
CLO-2 :	*Estimate the heat transfer rate in a wall, composite walls and cylindrical objects*	2	85	75	H	H	H	-	-	-	-	-	-	-	-	M	M	M	H
CLO-3 :	*Estimate the size and numbers of extended surface or fin needed for heat transfer*	2	75	70	H	H	H	-	-	-	-	-	-	-	-	M	H	M	M
CLO-4 :	*Estimate the heat transfer rate in forced convection & natural convection*	2	85	80	H	H	H	-	-	-	-	-	-	-	-	M	M	M	H
CLO-5 :	*Estimate the heat transfer rate in Radiation mode*	2	85	75	H	H	H	-	-	-	-	-	-	-	-	L	M	M	M
CLO-6 :	*To solve the heat transfer practical problems*	3	80	70	H	H	H	H	-	-	M	-	-	-	-	L	M	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to heat transfer, Different modes of heat transfer and general principles*	*Conduction with Thermal Energy Generation – Plane wall systems*	*physical mechanism on convection,*	*Laminar convective heat transfer analysis in flows between parallel plates*	*Radiation: Processes, Black body radiation- Stefan Boltzmann law, Planck'slaw& Wein's Displacement law*
	SLO-2	*Solving problems*	*Solving problems*	*classification of fluid flows,*	*Solving problems*	*Solving problems*
S-2	SLO-1	*Introduction to Conduction – Heat diffusion equation Cartesian systems*	*Conduction with Thermal Energy Generation – composite Plane wall*	*Governing equation: Continuity equation*	*Turbulent convective heat transfer analysis in flows between parallel plates*	*Radiation intensity*
	SLO-2	*Heat diffusion equation Cartesian systems - Derivation*	*Solving Problems*	*Governing equation: Momentum Equation*	*Solving problems*	*Solving problems*
S-3	SLO-1	*Heat diffusion equation forCylindrical systems*	*Conduction with Thermal Energy Generation –radial systems*	*Governing equation: Energy Equation*	*Laminar convective heat transfer analysis in flows over a flat plate*	*Radiation properties, kirchoff's law*
	SLO-2	*Heat diffusion equation for Cylindrical systems - Derivation*	*Solving problems*	*Governing equation: Energy Equation*	*Solving problems*	*Solving problems*
S-4	SLO-1	*Heat diffusion equation for Spherical systems*	*Conduction with Thermal Energy Generation – composite radial systems*	*velocity and thermal boundary layer*	*Turbulent convective heat transfer analysis in flows over a flat plate*	*. Radiation shape Factors& Its relations*
	SLO-2	*Heat diffusion equation for Spherical systems - Derivation*	*Solving problems*	*Rayleigh number &Grashoff number*	*Solving problems*	*Solving problems*
S-5	SLO-1	*One-Dimensional, Steady-State Conduction – plane wall*	*Heat Transfer from Extended Surfaces – Rectangular circumferential Fins of Uniform Cross-Sectional Area, Fin Performance, Overall Surface Efficiency*	*Empirical Correlations: External Free Convection Flows over a vertical & horizontal flat plate*	*Laminar convective heat transfer analysis in flows over a circular pipe*	*Concept of black surface -Heat Exchange between two black bodies*
	SLO-2	*Solving Problems*	*Solving problems*	*Solving Problems*	*Solving problems*	*Solving problems*
S-6	SLO-1	*One-Dimensional, Steady-State Conduction – composite walls*	*Heat Transfer from Extended Surfaces – Cylindrical Fins of Uniform Cross-Sectional Area, Fin Performance, Overall Surface Efficiency*	*Empirical Correlations: External Free Convection Flows over a Inclined flat plate*	*turbulent convective heat transfer analysis in flows over a circular pipe*	*Radiation Heat Transfer in a grey surfaces - Net Radiation Heat Transfer between Any Two Surfaces*
	SLO-2	*Solving Problems*	*Solving problems*	*Solving Problems*	*Solving problems*	*Solving problems*
S-7	SLO-1	*One-Dimensional, Steady-State*	*Transient Conduction - The Lumped*	*Empirical Correlations: External Free*	*Laminar convective heat transfer analysis*	*Radiation Heat Transfer in Two-Surface*

		Conduction – Radial systems	*Capacitance Method,*	*Convection Flows over a vertical cylinder*	*in flows in a circular pipe*	*Enclosures*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving problems*	*Solving problems*
S-8	SLO-1	*One-Dimensional, Steady-State Conduction – Spherical systems*	*Transient Conduction - Large walls & long cylinders*	*Empirical Correlations: External Free Convection Flows over a horizontal cylinder*	*turbulent convective heat transfer analysis in flows in a circular pipe*	*Radiation Heat Transfer in Three-Surface Enclosures*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving problems*	*Solving problems*
S-9	SLO-1	*One-Dimensional, Steady-State Conduction – Radial & Spherical systems for Composite*	*Transient Conduction: Semi-infinite solids*	*Empirical Correlations: External Free Convection Flows over a Sphere*	*Laminar &turbulent convective heat transfer analysis in flows in a non-circular pipe*	*Radiation shields*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving problems*	*Solving problems*

Course Code	18ASE209T	Course Name	THEORY OF FIRE PROPAGATION AND SAFETY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ASC102J, 18ASC103T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards			

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify the fire dynamics, the burning processes and implications.*
CLR-2 :	*Identify the engineering applications of basic chemical combustion driven engineering systems.*
CLR-3 :	*Identify the significance of material identification for industrial applications, including burners and engines.*
CLR-4 :	*Create insights to the fires in engines, buildings, forests and compartments.*
CLR-5 :	*Analyze the fire related hazards in practical, functional, engineering, industrial applications.*
CLR-6 :	*Utilize the fire safety principles for system testing, validation and designing.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand fire phenomenon, its applications and safety.*	2	80	70	H	M	L	L	-	-	-	-	-	-	-	H	-	-	-
CLO-2 :	*Comprehend the concept and applications of energy conservation in fires utilizations and apply the same for recent engineering advancement.*	2	80	70	H	M	M	M	-	-	L	-	-	L	-	H	M	M	M
CLO-3 :	*Understand basic knowledge to the physical principles governing fire growth.*	2	80	70	H	M	L	M	-	-	-	-	L	-	-	H	-	-	-
CLO-4 :	*Understand the behavior and chemical reactions related.*	2	80	70	H	M	M	M	-	-	M	M	M	M	L	H	M	M	M
CLO-5 :	*Apply the latest engineering capability in fire detection, prevention systems and life safety*	2	80	70	H	M	M	M	M	L	L	-	L	M	L	H	M	M	M
CLO-6 :	*Understanding prospects of normal and microgravity fire safety for Aerospace Engineering Applications.*	2	80	70	H	M	M	M	M	L	L	M	L	M	L	H	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Fire Science, fires in history, fire losses, fire and combustion.*	*Importance of fire dynamics on a fire strategy.*	*Development and behavior of fire propagation in free and confined atmosphere.*	*Identifying fire spread hazards and risks.*	*Active and Passive Fire Protection Features.*
	SLO-2	*Relevant material properties, combustion and heat transfer.*	*Fundamentals of heat and mass transfer for fire, smoke production and transport.*	*Factors affecting fire growth.*	*Safety and financial implications, developing safe work systems.*	*Fire prevention-handling and storing flammable and combustible liquids/fuels/propellants.*
S-2	SLO-1	*Chemistry and classification of fires- Composition of Combustion- (Flame, heat, fire gases, smoke).*	*Fundamentals of ignition and flame propagation.*	*Buoyant Plumes, Combusting Plumes, Starting plume.*	*Introduction to Fires causes / Explosion hazards in Chemical, Electrical units.*	*Elimination of ignition sources.*
	SLO-2	*Review of Thermodynamics and Fluid Mechanics in fire behavior*	*Role of Material flammability in fire propagation.*	*Fireball, Transient Aspects of Fire Plumes.*	*Finite Real Fire Effects.*	*Fire protection in plants and factories, Fire walls, fire doors.*
S-3	SLO-1	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
S-4	SLO-1	*Heat and mass transfer. Relevance of fire classification and governing dynamics.*	*Parameters affecting ignition, flame spread.*	*Fire spread over liquid and solid fuel surfaces.*	*Fire hazards (health–flammability-reactivity (stability)).*	*Fire prevention/suppression features, Microgravity fires control.*
	SLO-2	*Material Flammability principles, Thermal Ignition.*	*Heat release rate and flame extinction phenomenon.*	*Enclosure fires, Incineration.*	*Air contaminants in fires-toxic effects of fire gases.*	*Fire suppression. Fixed automatic sprinklers. Sprinkler system and design.*
S-5	SLO-1	*Sources of ignition of combustible materials.*	*Explosions and fires –fundamental combustion principles.*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Application of Mass Energy and species Conservation.*	*Egress– principles and calculations.*	*Solving Problems*	*Solving Problems*	*Solving Problems*
S-6	SLO-1	*Rate of burning. Heat transfer from Flames- Ignition temperature.*	*Solving Problems*	*Forest fires Analysis of fire plumes.*	*Smoldering combustion science.*	*Environnemental fire propagation considérations.*
	SLO-2	*Flash point, Fire point, Flash over.*	*Solving Problems*	*Fire safety aspects of plumes.*	*Introduction to smoke formation, composition and movement, hazards.*	*Role of combustion detectors (Fire detection, smoke detection, types of ionization-photo electric-light intensity-*

						scattered light detectors.
S-7	SLO-1	*Components and objectives of a fire safety strategy.*	*Fire safety techniques in combustion instruments.*	*Standardized material flammability testing.*	*Essential conditions for explosion occurrence.*	*Heat detectors. Flame detectors -infra red detector - ultraviolet flame detector).*
	SLO-2	*Fire dynamics process and related issues.*	*Aerospace Engineering Applications of fire dynamics.*	*Solid, liquid and gaseous fuel combustion and its relation to fire safety.*	*Explosion characteristics and Prevention.*	*Portable fire Extinguishers-Types-extinguisher-location, Inspection–testing, principles and calculations.*
S-8	SLO-1	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
S-9	SLO-1	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*
	SLO-2	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*	*Chapter Doubt clarification.*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Aircraft Welding*	*Applications & Advantages of Plastics used in Aircraft.*	*Introduction to Aircraft Assembly and Rigging operations.*	*Inspection of Landing Gear System*	*Introduction to Hazardous Materials*
	SLO-2	*Nomenclature & Types.of Welding*	*Classification & Types of Plastics*	*Rigging Specifications*	*Maintenance of Landing Gear System*	*Types*
S-2	SLO-1	*Equipments used in Welding shop*	*Identification of Clear Plastics*	*Aircraft Leveling Procedure*	*Inspection of Air - conditioning System*	*Flammables - Handling, Storage & Emergency Procedure*
	SLO-2	*Need for Maintenance of Welding Equipments*	*Storage and Protection, Cutting, & Drilling of Plastics*	*Assembly of Major Structural Components*	*Maintenance of Air - conditioning System*	*Corrosives - Handling, Storage & Emergency Procedure*
S-3	SLO-1	*Maintenance of Welding Equipments*	*Forming of Plastics.*	*Assembly of Movable Control Surfaces*	*Inspection of Pressurization System*	*Toxins &Reactives - Handling, Storage & Emergency Procedure*
	SLO-2		*Cementing, Annealing & Cleaning of Plastics*	*Fixed Surface Alignment – Symmetry Check*	*Maintenance of Pressurization System*	*Physical & Biological Hazards*
S-4	SLO-1	*Characteristics of a good weld & Ensuring Quality Weld*	*Installation of Plastic Windows and Windshields*	*Demonstration of Symmetry Check in Cessna Aircraft*	*Inspection of Aircraft Instruments*	*Handling, Storage & Emergency Procedure*
	SLO-2	*Introduction to Non-fusion Welding Process - Soldering & Brazing*	*Inspection of Plastic Components*		*Maintenance of Aircraft Instruments*	*Osha's Hazardous Communication Standards*
S-5	SLO-1	*Requirements & Process*	*Repair of Cracks in Plastics.*	*Effects of Rigging on Flight*	*Testing of Instruments*	*Material Safety Data Sheet*
	SLO-2	*Advantages & Disadvantages.*	*Repair of Holes in Plastics.*	*Checking & Adjusting Dihedral angle.*	*Handling of Instruments*	*Inventory & Labeling*
S-6	SLO-1	*Classification of Damage*	*Introduction to Advanced Composites in Aircraft.*	*Checking & Adjusting Incidence angle.*	*Inspection of Fire Protection Systems*	*Introduction to Troubleshooting Theory*
	SLO-2	*Damage Investigation*	*Advantages of Composites over Metals in Aerospace Applications*	*Alignment Check of Empennage*	*Maintenance of Fire Protection Systems*	*Types*
S-7	SLO-1	*Repair Layout Techniques*	*Equipments used in Composite Fabrication*	*Alignment Check of Wings*	*Inspection of Ice Protection Systems*	*Troubleshooting with Chart*
	SLO-2	*Repair Practices*	*Wet Layup Process of Building Composite Parts.*	*Alignment Check of Engines.*	*Maintenance of Ice Protection Systems*	*Examples*

S-8	SLO-1	*Introduction to Riveting Process in Aviation Industry.*	*Prepreg Process of Building Composite Parts.*	*Demonstration of various checks in Cessna Aircraft*	*Inspection of Water & Waste Systems*	*Troubleshooting without chart*
	SLO-2	*Types & Nomenclature of Rivets*	*Repair of Composite Components*		*Maintenance of Water & Waste Systems*	*Examples*
S-9	SLO-1	*Equipments used for Riveting*	*Special Precautions*	*Need for Balancing Control Surfaces*	*Inspection of Position & Warning Systems*	*Troubleshooting intermittent discrepancies*
	SLO-2	*Installation of Rivets*	*NDT methods in Composite Materials.*	*Procedure for Balancing Control Surfaces*	*Maintenance of Position & Warning Systems*	*Examples*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the advanced concepts in airborne sensors and actuators*
CLR-2 :	*Provide mathematical knowledge for modelling*
CLR-3 :	*Understand the aircraft actuation systems*
CLR-4 :	*Understand the servo components*
CLR-5 :	*Learn the modeling of sensors and actuators*
CLR-6 :	*To solve problems in avionics engineering*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Describe the concepts of airborne sensors and actuators*	*2*	*85*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	*M*	-
CLO-2 :	*To apply mathematical knowledge in modeling of sensors and actuators*	*2*	*85*	*75*	*H*	*H*	*H*	-	-	-	-	-	-	-	-	-	*M*	*M*	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Control Systems*	*Introduction to Root Locus Analysis*	*Bode Diagrams*	*Introduction to time domain and frequency domain design of control system*	*Lyapunov Stability*
	SLO-2	*Open-Loop, Closed-Loop Control, Feedback control system*		*Rules for Constructing the Bode Plots*		
S-2	SLO-1	*Block Diagrams and their Simplification*	*General Rules for Constructing the Root Locus*	*Nyquist Plots*	*PD Controller Design*	*Asymptotic Stability*
	SLO-2			*Rules for Constructing the Nyquist Plots*	*PIController Design*	*Input-Output Stability*
S-3	SLO-1	*Mason's Gain Formula*	*Positive feedback Systems*	*Stability and Relative Stability Analysis*	*PID Controller Design*	*State Transition Matrix*
	SLO-2	*Numerical*				*Controllability and Observability*
S-4	SLO-1	*Mathematical Modeling ofDynamical Systems*	*Root Locus plot for positive feedback system*	*Systems with Transport Lags*	*Lead Compensation*	*The Lyapunov Equation*
	SLO-2				*Lag Compensation*	
S-5	SLO-1	*Modeling in the State Space*	*Negative feedback Systems*	*Gain Margin*	*Lead-Lag Compensation*	*Full-State Feedback Control Designand Pole Placement*
	SLO-2			*Phase Margin*		
S-6	SLO-1	*Transfer Functions*	*Root Locus plot for Negative feedback system*	*Closed-Loop Frequency Response*	*Sensitivity*	*Optimal State Space Control System*
	SLO-2	*ImpulseResponse Functions*				
S-7	SLO-1	*Delay Time, Rise Time, Peak Time, Maximum Overshoot,and Settling Time*	*Parameter Variation*	*Frequency Domain Performance Specifications*	*Complimentary Sensitivity Transfer Functions*	*Linear Quadratic Regulator*
	SLO-2	*Stability Analysis and Routh's Stability Criterion*				
S-8	SLO-1	*Proportional, Derivative, and Integral Control Actions*	*Stability analysis of positive feedback system using root locus*	*Peak Resonance*	*Disturbance Rejection*	*Classical Control Theory*
	SLO-2			*Resonant Frequency*		
S-9	SLO-1	*Steady-State Error Analysis in Feedback Systems*	*Stability analysis of Negative feedback system using root locus*	*Bandwidth*	*Loop Shaping*	*Modern Control Theory*
	SLO-2			Numerical example

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concept of boundary layer and its characteristics.*
CLR-2 :	*Learn basics of incompressible and compressible flat plate boundary layer, importance of shock-wave boundary layer interactions.*
CLR-3 :	*Understand and appreciate the qualitative aspects of hypersonic flow, hypersonic shock-wave and Expansion-wave relations, application of Newtonian theory in hypersonic flow*
CLR-4 :	*Study different classifications and external aerodynamic configurations of missiles.*
CLR-5 :	*Apply cross-flow analysis in the analysis of aerodynamics characteristics of missiles, vortex shedding and flow separation.*
CLR-6 :	*Understand the various aerodynamic launching problems of missiles.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO – 3
CLO-1 :	*Acquire knowledge of boundary layer theory.*	2	85	75	H	M	L	L	-	-	-	-	-	-	-	L	H	M	M
CLO-2 :	*Acquire the fundamental differences between incompressible and compressible boundary layers, importance of boundary layer interaction with shock layer.*	2	80	70	H	M	L	M	-	-	-	-	-	-	-	L	M	H	M
CLO-3 :	*Appreciate the various qualitative aspects of hypersonic flow.*	2	85	75	H	H	M	L	L	-	-	-	-	-	-	L	H	M	M

CLO-5 :	*Acquire basic understanding of cross-flow analysis in study of missile aerodynamics*	2	85	75	H	L	L	L	-	-	-	-	-	-	-	L	M	M	M
CLO-6 :	*Accrue information on aerodynamic launching problems of missiles.*	2	80	75	H	M	L	L	-	-	-	-	-	-	-	L	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Concept of Boundary Layer*	*Qualitative Aspects of Hypersonic Flow – Thin shock layer, Viscous Interaction, High Temperature Shock Layer.*	*Classification of Missiles*	*Aerodynamic Characteristics of Slender and Blunt Bodies*	*Aerodynamic Launching Problems*
	SLO-2	*Boundary Layer Definitions and Characteristics*				*Considerations for Safety of Parent Aircraft*
S-2	SLO-1	*Boundary Layer - Boundary Conditions, Laminar and Turbulent Boundary Layers*	*Qualitative Aspects of Hypersonic Flow – Entropy Layer, Low-Density Flow, High Temperature Effects, etc.*	*External Aerodynamic Configurations of Missiles - Wing Control, Canard Control Tail Control, Tail-Less (or Wing Control), Body Extension*	*Missiles at Small Angles of Attack*	*Considerations for Safety of Parent Aircraft (Air Launch) – Introduction to Missile-Aircraft Collision, Missile Structural Failure*
	SLO-2	*Boundary Layer Thickness - Types*			*Cross-Flow Analysis*	
S-3	SLO-1	*Displacement Thickness of Boundary Layer – Concept, Derivation*	*Aerodynamic heating of re-entry bodies – slender and blunt re-entry vehicles.*	*External Aerodynamic Configurations of Missiles - Nose Flap Control, Dorsal, Jet Control, Wing Arrangements (Monowing, Triform, Cruciform)*	*Total Lift on a Missile Body – Cross-Flow Analysis*	*Launch Boundaries – Introduction to Launch-Aircraft Trajectory, Missile Trajectory, Launch Boundary Determination*
	SLO-2		*Hypersonic Flight Paths – Velocity-Altitude Map*			
S-4	SLO-1	*Momentum Thickness of Boundary Layer – Concept, Derivation*	*Newtonian Theory*	*Forces Acting on Missile during Atmospheric Flight, Effect of Angle of Attack on Aerodynamics Forces and Moments*	*Total Lift on a Slender Wing – Cross Flow Analysis*	*Ground Launch – Problem of Launching Missiles from the Ground*
	SLO-2		*Newton's Sine-Squared Law – Derivation,*			*Sources of Detrimental Effects causing Excessive Missile Dispersion*
S-5	SLO-1	*Incompressible Boundary Layer - Incompressible flow over a flat plate, Governing Equations, Numerical Results.*	*Modified Newtonian Law Mach Number Independence*	*Introduction to Bodies of Revolution – Nose, Mid-Section, Boat-tail*	*Total Lift on a Wing-Body Combination – Cross-Flow Analysis*	*Factors Affecting Missile Launch Dispersion – Launcher Deflection, Tip-Off,*
	SLO-2					
S-6	SLO-1	*Compressible Boundary Layer - Compressible flow over a flat plate, Governing equations*	*Numerical Problems on Newtonian Theory and Exact Shock-Expansion Theory*	*Different Shapes of Missile Fore Bodies – Advantages and Disadvantages*	*Introduction to wing-body interference of missile*	*Factors Affecting Missile Launch Dispersion - Thrust and Fin Malalignment, Wind*
	SLO-2					

S-7	SLO-1	*Boundary Layer Separation – Introduction*	*Hypersonic Similarity Parameter*	*Boat Tail – Introduction and its Importance*	*Flow Separation on a Missile Body at Low and High Angles of Attack*	*Rocket separation – Importance of Rocket Separation, Separation Mechanisms*
	SLO-2			*Base Pressure*		
S-8	SLO-1	*Shock Wave Boundary Layer Interaction*	*Shock wave and Expansion Wave Relations of Inviscid Hypersonic Flows*	*Introduction to Missile Drag – Friction drag, Pressure drag, Induced drag, Interference drag*	*Vortex Shedding – Cross-Flow Regimes of Missile at Different Angles of Attack*	*Impulse Devices for Separation – Stage Ignition, Auxiliary Rockets, Thrust Reversal, Springs*
	SLO-2					
S-9	SLO-1	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*
	SLO-2

Course Code	18ASE304T	Course Name	SPACE MISSION DESIGN & ANALYSIS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ASC306T, 18ASC303J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the space mission profiles and types of space missions*
CLR-2 :	*Understand the mission objectives, constraints, needs, and requirements*
CLR-3 :	*Know the complete set of space systems and various modules of space system and spacecraft*
CLR-4 :	*Know the basics of spacecraft motions and the governing equations of spacecraft motions*
CLR-5 :	*Comprehend the satellite attitude dynamics and reentry vehicle dynamics*
CLR-6 :	*Interpret the interplanetary mission trajectories and associated concepts*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Describe the space mission and the classifications of space mission*	2	85	80	H	-	M	M	-	-	-	-	-	-	-	-	-	L	-
CLO-2 :	*Describe the various aspects space environments, mission objective, needs and design of the space mission*	2	85	80	H	-	-	-	-	-	L	-	-	-	-	-	-	-	-
CLO-3 :	*Explain the importance of the spacecraft systems and instrumentation*	2	80	75	H	L	L	H	-	-	-	-	-	-	-	-	-	M	-
CLO-4 :	*Explain the necessity of Kepler's equations and orbit maneuvers*	2	80	75	H	H	M	M	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Describe the key features reentry flight physics and injection of spacecrafts*	2	80	75	H	M	M	H	-	-	L	-	-	-	-	-	-	L	-
CLO-6 :	*Demonstrate the interplanetary mission profile and the importance*	2	80	75	H	L	M	H	-	-	L	-	-	-	-	-	-	L	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Definition of space mission*	*Requirements, constraints of spacecraft design*	*The N-body problem*	*Basis of launching of a satellite*	*General aspects of interplanetary trajectory*
	SLO-2	*Classification of space missions*	*Design process of spacecraft*	*The N-body problem*	*General aspects of satellite injection*	*Interplanetary Hohmann transfer*
S-2	SLO-1	*Low Earth Orbit mission, medium altitude mission*	*Spacecraft configuration*	*The orbit equation*	*Launch vehicle ascent trajectory*	*Rendezvous opportunities*
	SLO-2	*Geosynchronous Earth Orbit mission, deep space mission*	*Integrating the spacecraft design*	*The energy law.*	*Dependence of orbital parameters on in-plane injection parameters*	*Sphere of influence*
S-3	SLO-1	*Space mission life cycle*	*Spacecraft payload design*	*Revision of circular orbits and elliptical orbits*	*Launch vehicle performance*	*Method of patched conics*
	SLO-2	*Mission objectives*	*Payload sizing process*	*Parabolic trajectories*	*Orbit deviation due to injection errors*	*Planetary departure*
S-4	SLO-1	*Identification of mission needs, requirements, and constraints*	*Mission requirements*	*Hyperbolic trajectories*	*Small injection errors*	*Planetary rendezvous*
	SLO-2	*Mission characterization*	*Observation of payload design*	*Keplers equation*	*Basics of reentry flight dynamics*	*Planetary flyby*
S-5	SLO-1	*Mission evaluation*	*Observation of payload sizing*	*Lamberts problem*	*Fundamentals of entry flight mechanics*	*Design of transfer ellipse*
	SLO-2	*Orbit design*	*Spacecraft subsystems*	*Restricted three body problem*	*Fundamentals of entry heating*	*Design of transfer ellipse*
S-6	SLO-1	*Constellation design*	*Propulsion subsystem selection and sizing*	*The Lagrange coefficients*	*Entry vehicle design*	*Design of departure trajectory*
	SLO-2	*Space environment peculiarities*	*Basic of rocket propulsion and its types*	*The Lagrange coefficients*	*Landing techniques*	*Design of arrival trajectory*
S-7	SLO-1	*Space environment survivability*	*Attitude determination and control*	*Jacobi constants*	*Recovery techniques*	*Gravity assist maneuver*
	SLO-2	*Selection of spacecraft material*	*Telemetry, tracking and command system*	*Introduction to orbit perturbation*	*Reentry errors*	*Establishing planetary orbit*
S-8	SLO-1	*Basic launch vehicle considerations*	*Command and data handling*	*Earth gravity harmonics*	*Overview of existing reentry mission*	*Motion of the Earth-Moon system*
	SLO-2	*Launch systems selection process*	*Power and thermal system*	*Lunisolar gravitational attractions*	*Challenges of existing reentry mission*	*Time of flight*
S-9	SLO-1	*Determining the spacecraft design envelop and environments*	*Guidance and navigation system*	*Radiation pressure effects, atmospheric drag*	*Parametric design of a reentry capsule*	*Time of injection velocity*
	SLO-2	*Payload environments*	*Ground system design*	*Tidal friction effects and Mutual gravitational attraction*	*Planetary entry vehicle optimization*	*Lunar patched conic*

Mr. Amit Palankar, GE aviation, Bangalore, palankr.amit@gmail.com	*Dr. S. Elangovan, Professor and Dean, Dept. Of Aeronautical Engineering, Bharath Institute of Higher Education and Research, subelango@yahoo.co.in*	*Dr. Malaikannan G, SRMIST*

Course Code	18ASE305T	Course Name	VIBRATIONS AND ELEMENTS OF AEROELASTICITY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ASC101T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concept of drawing a vibratory model*
CLR-2 :	*Understand the methods of deriving the equations of motion*
CLR-3 :	*Identify the problems of vibration in aerospace industry*
CLR-4 :	*Know the functioning of various vibration measuring instruments*
CLR-5 :	*Learn the various approximate methods of solving natural frequency of various systems*
CLR-6 :	*Get an idea of the various aero elastic phenomena that arise in real time flight conditions.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Describe the elements of a vibratory model*	2	85	75	H	-	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-2 :	*Describe the equations of motion of any vibratory system*	2	85	75	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-3 :	*Explain the solving methods of approach to any vibration problem*	2	85	75	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-4 :	*Explain the functionality of various vibration measuring instruments*	2	85	75	H	H	-	H	-	-	-	-	-	-	-	M	M	M	M
CLO-5 :	*Describe the various approximate methods in determining the natural frequency of various vibratory systems.*	2	85	75	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-6 :	*Investigate the different aero elastic phenomena for different flight conditions*	2	85	75	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction-Basic Terminology*	*Single degree of freedom system*	*Multi degree of freedom system*	*A three degree of freedom rotor system*	*Introduction to Aeroelasticity*
	SLO-2	*Elements of vibratory system*	*Examples-spring mass system*	*Free body diagram and equations of motion*	*Numerical solving*	*Collar's triangle*
S-2	SLO-1	*Degrees of freedom*	*Solution of equation of motion-Complementary function*	*Natural modes of vibration*	*Vehicle suspension problem*	*Torsional divergence 2D case*
	SLO-2	*Examples of vibratory system*	*Forced damped vibratory system*	*Mode shapes*	*Automobile problem*	*Numerical solving*
S-3	SLO-1	*Simple Harmonic motion-Definition and explanation*	*Numerical solving –solution of equation of motion*	*Principal Coordinates*	*Discrete systems*	*Torsional divergence-finite wing*
	SLO-2	*Sum of harmonic motions-different conditions*	*Numerical solving –solution of equation of motion*	*Principal modes*	*Examples*	*Numerical solving*
S-4	SLO-1	*Numerical solving*	*Solution of equation of motion-Particular Integral*	*Orthogonal condition*	*Rayleigh method of finding the natural frequency*	*Aileron control reversal*
	SLO-2	*Numerical solving*	*Solution of equation of motion-Particular Integral*	*Eigen value problem*	*Numerical Solving*	*Numerical solving*
S-5	SLO-1	*Newton's law*	*Transient motion of damped forced vibration problem*	*Hamilton's principle*	*Semi-definite system*	*Flutter*
	SLO-2	*D'Alembert's principle*	*Numerical solving*	*Vibration of elastic bodies*	*Numerical solving*	*Numerical solving*
S-6	SLO-1	*Equation of motion-Newton's law of motion*	*Logarithmic decrement*	*Lateral Vibration of a string*	*Method of influence coefficient matrix*	*Bufeting*
	SLO-2	*Example*	*Numerical solving*	*Numerical solving*	*Numerical solving*	*Numerical solving*
S-7	SLO-1	*Equation of motion- Energy method*	*Elevator and control tab numerical*	*Longitudinal vibration of rod*	*Dunkerley method*	*Dynamic response*
	SLO-2	*Example*	*Helicopter rotor blade numerical*	*Numerical solving*	*Numerical –cantilever beam*	*Numerical solving*
S-8	SLO-1	*Free Vibrations-Forced Vibrations*	*Springs connected in series*	*Lateral vibration of beam*	*Lagrange's equation*	*Control Effectiveness*
	SLO-2	*Damped vibrations-Undamped vibrations*	*Springs connected in parallel*	*Numerical solving*	*Numerical solving*	*Numerical solving*
S-9	SLO-1	*Periodic vibrations-Aperiodic vibrations*	*Support Excitation*	*Torsional vibration of shaft*	*Holzer method*	*Case studies*
	SLO-2	Numerical Solving	Vibration measuring instruments	Numerical solving	Numerical solving

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Avionics*	*Network Topologies & types of data bus used in Avionics network*	*Introduction to Head Up Display*	*Electromagnetic interference (EMI) and its effect*	*Aluminum wires/cables*
	SLO-2	*Need for Avionics*	*Types Bit encoding & Types of communication Protocol*	*Principle & Optical configuration*	*EMI on current carrying conductor*	*Bonding*
S-2	SLO-1	*Role of Avionics in civil aircrafts*	*Introduction to ARINC 429*	*Functional description of HUD*	*Need for EMI prevention*	*Types of bonding in composite materials*
	SLO-2	*Role of Avionics in Military aircrafts*	*Hardware elements,Word format, Bit encoding and protocols*	*Introduction to Helmet mounted display*	*Shielding, Twisted pairs and bandwidth*	*Lightning protection in composite aircrafts*
S-3	SLO-1	*Top-Down design Procedure for Avionics system Design*	*Introduction to MIL-STD 1553B*	*Optical configurations*	*Radiated EMI*	*Earth Returns*
	SLO-2	*Avionics Design factors*	*Hardware element, Bit encoding*	*Helmet Design factors and Functional description of HMD*	*EMI susceptibility*	*Aircraft manuals*
S-4	SLO-1	*Ilities of Avionics Systems*	*Word format and protocols*	*Introduction to MFD*	*EMI reduction*	*Maintenance manuals*
	SLO-2	*Avionics certification*	*RT-BC, BC-RT & RT-RT protocols*	*Working of MFD*	*Continuing airworthiness*	*Wiring diagram manuals*
S-5	SLO-1	*FTA- Fault tree analysis*	*Introduction to AFDX network*	*Direct voice input techniques and HOTAS*	*Wire and cable installation*	*Circuit Testing*
	SLO-2	*Qualitative and quantitative methods*	*Hardware elements, Protocols*	*FLIR- IR vision*	*Cable definition*	*Avometer and its types*
S-6	SLO-1	*FMEA- Failure mode and effect analysis*	*Ethernet frame format, AFDX frame format*	*Evaluating Avionics cooling requirements*	*Failure modes of wires and cables*	*Bonding meter*
	SLO-2	*Steps in FMEA*	*Difference between CPIOM & GPM*	*Heat transmission in Avionics Rack*	*Wiring procedure*	*oscilloscopes*
S-7	SLO-1	*Pros & cons of FTA & FMEA*	*Trends in Display technologies*	*Avionics cooling specifications*	*Cables and wire looms*	*Automatic Test equipments*
	SLO-2	*Difference between FTA & FMEA*	*CRT construction & working*	*Avionics cooling for Airplanes*	*Current rating of wire looms*	*Built In Test equipment*
S-8	SLO-1	*Avionics Architectures evolution*	*LCD& LED construction and working*	*Avionics cooling for missiles*	*Guidelines for the installation of wire looms*	*Difference between ATE & BITE*
	SLO-2	*A320 & B777 architecture examples*	*Plasma panels And EL panels construction and working*	*Avionics cooling for satellites& Spacecrafts*	*Types of wire looms*	*Centralized Maintenance systems*
S-9	SLO-1	*A380 & B787 architecture examples*	*Comparison of CRT, LCD, LED, Plasma and EL panels*	*Radiation heat transfer in space*	*Hydrolysis in wires and cables*	*Aircraft communication and addressing systems*
	SLO-2	*Attributes of Data bus & transmission classes*	*Capacitive and resistive touch screen technologies*	*Effect of α/e ratio on temperature in space*	*Wire connectors*	*Cost of maintenance*

Pre-requisite Courses	18MAB202T, 18ASE208T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce the students with various techniques of problem solving*
CLR-2 :	*Make the students to understand the governing equations for flow and heat transfer analysis*
CLR-3 :	*Provide sufficient background to the students to gain the ability to discretize fluid flow problems*
CLR-4 :	*Make the students to simulate and analyze fluid flow problems*
CLR-5 :	*Make the students to choose proper numerical schemes fluid flows*
CLR-6 :	*Enable the students to write computer programs for elementary fluid flow/heat transfer problems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)

CLO-1 :	*Understand the governing equations for flow and heat transfer analysis*	2	80	70	H	H	H	H	M	-	-	-	-	-	-	L	L	H	L
CLO-2 :	*Apply discretization techniques to solve the differential equations of fluid flow and heat transfer problems*	2	80	70	H	H	H	H	H	-	-	-	-	-	-	-	M	H	-
CLO-3 :	*Acquire the experience to judge the accuracy of numerical solutions and the numerical uncertainty.*	2	80	70	H	H	H	H	M	-	-	-	-	-	-	L	M	H	-
CLO-4 :	*Analyze convection-conduction problems through numerical algorithms*	2	80	70	H	H	H	H	H	-	M	M	L	L	-	L	M	H	-
CLO-5 :	*Gain fundamental knowledge about numerical code development*	2	80	70	H	M	M	H	M	-	-	-	H	-	-	L	-	H	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*The Three Fundamental Approaches to problem solving - Analytical, Experimental & Numerical*	*Basics of Finite Difference Method*	*Discretization of 1 – D unsteady diffusion Equation*	*Discretization of 1 – D convection diffusion Equation*	*Collocated Grid*
	SLO-2	*Introduction to CFD*	*Finite Difference Approximation of derivatives*			*Staggered Grid*
S-2	SLO-1	*Processes involved in CFD*	*Truncation error*	*Interface conductivity*	*Central differencing scheme*	*Checker-board pressure oscillations*
	SLO-2	*Applications of CFD*	*Order of magnitude of error*	*Nonlinearity*	*Numerical oscillations of Central differencing scheme*	*Basics of Pressure-velocity coupling algorithm*
S-3	SLO-1	*Conservation Principles*	*Basics of Finite volume Method*	*Explicit Approaches*	*Properties of Discretization scheme*	*Discretization of 2D continuity equation*
	SLO-2	*Lagrangian vs Eulerian Approach*	*Integration Over a Control Volume*	*Implicit Approaches*	*Scarborough Criterion*	*Discretization of two-dimensional u-momentum equation*
S-4	SLO-1	*Derivation of continuity equation*	*Discretization of Computational Domain*	*Illustrative example*	*Transportiveness*	*Discretization of two-dimensional v-momentum equation*
	SLO-2		*Discretization of 1 – D diffusion equation*		*Conservativeness*	
S-5	SLO-1	*Derivation of momentum equations*	*Example of numerical solution – 1-D steady Heat conduction problem in a rod*	*Tri – diagonal Matrix Algorithm*	*Assessment of central differencing scheme*	*Pressure correction equation formulation*
	SLO-2					
S-6	SLO-1	*Newton's hypothesis for fluid flow*	*Example of numerical solution – cooling of a circular fin by convective heat transfer*	*Analysis of Numerical oscillations*	*Upwind Differencing Scheme*	*SIMPLE Algorithm*
	SLO-2	*Navier-Stokes equations*			*First order upwind scheme*	*Applications of SIMPLE*
S-7	SLO-1	*Conservation law for Energy equation*		*Stability condition for Explicit Approach*	*Assessment of Upwind Differencing Scheme*	*Overview of other pressure-velocity coupling algorithms*
	SLO-2	*Work done by surface forces & Energy flux due to heat conduction*	*Comparison with analytical solution*	*Stability condition for Implicit Approach*		
S-8	SLO-1	*Derivation of Energy equation*	*Coding using MATLAB*	*Overrelaxation and underrelaxation*	*Overview of other upwind schemes*	*Types of practical boundary conditions*
	SLO-2			*Grid layout-2D domain*		
S-9	SLO-1	*Equilibrium and marching problems*	*Discretization of 2 – D diffusion equation*	*Discretization of 2 – D unsteady diffusion Equation*	*Numerical Diffusion*	*Grid independency Test*
	SLO-2	*Initial and boundary conditions*	*General forms of discretized equations*			*Best practices for CFD solution*

Course Code	18ASE308T	Course Name	ROCKETS AND MISSILES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	*18ASC303J*	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To impart design basics of rockets and missiles systems, their construction and functions.*
CLR-2 :	*To focus on design principles, materials selection, testing and performance assessment.*
CLR-3 :	*To understand aerodynamics, flight dynamics, optimization of performance of multi-stage rockets and separation dynamics.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*To learn about the different systems of rockets and missiles, formulation of the equation of motion and about the advanced rockets for future missions*	2	80	70	H	H	H	H	M	-	-	-	-	-	-	M	H	H	L
CLO-2 :	*To understand the function of the solid propellant propulsion and pyrotechnic systems and the design principles*	2	80	70	H	H	H	H	H	-	M	-	-	M	M	M	H	H	-
CLO-3 :	*To understand the function of the liquid propellant propulsion and control systems and the design principles*	2	80	70	H	H	H	H	M	-	M	-	-	M	M	M	H	H	-
CLO-4 :	*To formulate the equation of motions for a mission and spent stage separation dynamics, understanding the principles of navigation, guidance and control of rockets and missiles, and design of a multistage rocket*	2	80	70	H	H	H	H	H	-	H	-	L	L	H	H	H	H	-
CLO-5 :	*To understand the system design, construction, function, performance and testing aspects. and to familiarize with the selection of suitable materials for different rocket systems*	3	80	70	H	M	M	H	M	L	H	L	H	M	H	H	H	H	L

Duration (hour)		**9**	**9**	**9**	**9**	**9**
S-1	SLO-1	*Introduction*	*Solid propellant rocket fundamentals*	*Liquid propellant rocket fundamentals*	*Multi-staging of rockets*	*Design of prototype rocket*
	SLO-2	*Classification of launch vehicles and missiles*				
S-2	SLO-1	*Different space missions*	*Propellant ingredients, Propellant properties*	*Liquid propellant rocket applications*	*Performance estimation of multi-stage rockets*	*Requirement and design approach*
	SLO-2	*Rocket flight systems*	*Propellant grain processing*	*Liquid propellant rocket types*		
S-3	SLO-1	*Forces and moments acting on a rocket*	*Propellant Grain types, requirements*	*Design of propellant feed system*	*Multi-stage vehicle optimization techniques*	*Product design*
	SLO-2	*Propulsion, aerodynamics*				
S-4	SLO-1	*Gravity, control systems*	*Grain design, properties*	*Gas pressure feed system*	*Flight trajectory optimisation*	*Process planning aspects*
	SLO-2	*Stability analysis*			*Constraints in optimisation*	
S-5	SLO-1	*Inertial and non-inertial frames, coordinate transformation*	*Ballistics of missiles*	*Design of fuel tanks*	*Rocket flight simulation techniques*	*Material selection criteria*
	SLO-2	*Coriolis theorem*		*Turbo-pump design*		*Super alloys, Composites*

S-6	SLO-1	*equations of motion for three dimensional motion through vacuum and atmosphere*	*Burn rate control design and evaluation*	*Liquid propellant rocket engine cycle*	*Stage separation system*	*Test and Qualification*
	SLO-2				*Stage separation dynamics*	
S-7	SLO-1	*Reentry flight dynamics*	*Solid rocket components*	*Cooling systems*	*Separation techniques*	*Types of tests*
	SLO-2				*reentry vehicles landing techniques*	
S-8	SLO-1	*Rocket flight performance dispersion*	*Solid rocket motor design*	*Liquid Slosh, Pogo*	*Navigation, guidance and control systems in launch vehicle*	*Environmental tests*
	SLO-2	*Computation methods*		*Water hammer, Geyser effect*		
S-9	SLO-1	*Introduction to single stage to orbit concepts, reusable launch vehicles*	*Separation systems*	*Thrust vector control (TVC) system*	*Missiles guidance*	*Planning details*
	SLO-2	*Advanced space propulsion systems*	*Pyrotechnic devices*	*Performance improvement of TVC*	*Aerodynamic control systems*	*Concluding a normal and incomplete test*

Course Code	18ASE309T	Course Name	FATIGUE AND FRACTURE MECHANICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ASC304J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concepts of plotting S-N curve, mean stress, stress concentration*
CLR-2 :	*Emphasis the study of low cycle fatigue, load histories, cumulative damage & statistical aspects of fatigue.*
CLR-3 :	*Familiarize with physical aspects, surface effects, temperature effects of fatigue.*
CLR-4 :	*Familiarize with types of fracture, strain energy release rate, theoretical strength of materials.*
CLR-5 :	*Familiarize the various design philosophies, case histories, fatigue resistance of fiber laminates..*
CLR-6 :	*Get a better understanding of solving Fatigue problems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Apply the knowledge to plot S-N curve for various materials.*	2	85	75	H	H	H	-	-	-	-	-	-	-	-	M	M	M	M
CLO-2 :	*Analyze low cycle fatigue & load histories problems.*	2	85	75	H	H	H	-	-	-	-	-	-	-	-	M	M	M	M
CLO-3 :	*Apply the physical aspects of fatigue for solving problems.*	2	85	75	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M
CLO-4 :	*Analyze fracture of various materials*	2	85	75	H	H	H	-	-	-	-	-	-	-	-	M	M	M	M
CLO-5 :	*Analyze the various design philosophies.*	2	85	75	H	H	H	-	-	-	-	-	-	-	-	M	M	M	M
CLO-6 :	*Accrue comprehensive knowledge in fatigue & fracture problems*	2	85	75	H	H	H	H	-	-	-	-	-	-	-	M	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Fatigue & Fracture*	*Low cycle fatigue*	*Structural aspects of fatigue, Crack initiation, slip band crack growth*	*Types of fracture in metals*	*Introduction to various design philosophies*
	SLO-2	*S-N curve*	*High cycle fatigue*	*Structural aspects of fatigue, Crack initiation, slip band crack growth*	*Types of fracture in metals*	*Safe life and fail safe design philosophy*
S-2	SLO-1	*Endurance limit*	*Coffin-Manson's relation*	*Crack growth on planes of high tensile stress, Ultimate fracture*	*Theoretical cohesive strength*	*Infinite life and manage tolerant design philosophies*
	SLO-2	*Effect of mean stress on fatigue*	*Transition life*	*Crack growth on planes of high tensile stress, Ultimate fracture.*	*Theoretical cohesive strength*	*Infinite life and manage tolerant design philosophies*
S-3	SLO-1	*Goodman diagram*	*Solving problems*	*Fatigue crack propagation, Paris law*	*Solving problems*	*Uncertainties, scatter and safety margins*
	SLO-2	*Gerber and Soderberg relations*	*Solving problems*	*Fatigue crack propagation, Paris law*	*Solving problems*	*Uncertainties, scatter and safety margins*
S-4	SLO-1	*Solving problems*	*Cyclic hardening, cyclic softening, cyclic stress strain curve*	*Solving problems*	*Griffith theory of brittle fracture.*	*Some case histories, Improved shoulder fillets*
	SLO-2	*Solving problems*	*Cyclic hardening, cyclic softening, cyclic stress strain curve*	*Solving problems*	*Irwin-Orwin theory.*	*Secondary bending due to non-symmetric holes.*
S-5	SLO-1	*Notches and Stress concentrations*	*Solving problems*	*Size effects on fatigue*	*Solving problems*	*Cracked aircraft wing panel repaired with a poorly designed patch*
	SLO-2	*Notches and Stress concentrations*	*Solving problems*	*Surface effects on fatigue*	*Solving problems*	*Online structural monitoring of the Tsing Ma bridge*
S-6	SLO-1	*Solving problems*	*Strain life equations*	*Surface roughness, surface properties*	*Strain energy release rate*	*Fatigue resistance of fiber-metal laminates, laminated sheet without fibers*
	SLO-2	*Solving problems*	*Solving problems*	*Surface residual stresses*	*Stress intensity factor, Crack deformation modes*	*Fatigue resistance of fiber-metal laminates, laminated sheet without fibers*
S-7	SLO-1	*Neuber's stress concentrations*	*Analysis of load histories*	*Fatigue under combined stresses*	*Solving problems*	*Fiber-metal laminate Arall and Glare, Fiber metal laminate concept*
	SLO-2	*Solving problems*	*Level crossing method*	*Fatigue under combined stresses*	*Solving problems*	*Fiber-metal laminate Arall and Glare, Fiber metal laminate concept*

S-8	SLO-1	*Plastic stress concentration*	*Range counting method, Rain flow method*	*Effects of metallurgical variables on fatigue*	*Fracture toughness and design*	*Fiber-metal laminate Arall and Glare, Fiber metal laminate concept*
	SLO-2	*Solving problems*	*Solving problems*	*Corrosion fatigue, fretting*	*Plane strain toughness testing*	*Fiber-metal laminates as sheet material*
S-9	SLO-1	*Notched S-N curve*	*Cumulative damage, Miner's rule*	*Effect of low temperature fatigue*	*Solving problems*	*Crack growth on Glare*
	SLO-2	*Solving problems*	*Solving problems*	*Effect of high temperature fatigue*	*Solving problems*	*Fatigue properties of Glare components*

Pre-requisite Courses	18ASC103T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	AEROSPACE ENGINEERING	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is :
CLR-1 :	*To have a detailed study of the basics of cryogenic systems and to provide the knowledge of evolution of low temperature science*
CLR-2 :	*To familiarize with various Gas-Liquefaction Systems, Cryo-coolers and gas Refrigeration Systems*
CLR-3 :	*To provide the knowledge of cryogenic insulations and Cryogenic technology*
CLR-4 :	*To gain knowledge about different cryogenic instrumentation and to understand Cryo pumping.*
CLR-5 :	*To provide design aspects of cryogenic storage and transfer lines.*
CLR-6 :	*To understand cryogenic systems, gas liquefaction system and pumping system and applcations*

Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Identify the type ofReciprocating enginefuel metering system and its components used in aircraft.*
CLR-2 :	*Layout the components and accessories of gas turbine engine fuel system.*
CLR-3 :	*Demonstrate the type ofinduction and exhaust system in aircraft engines.*
CLR-4 :	*Identify the electrical systems used in in aircraft engines.*
CLR-5 :	*Identify the various aircraft engine instruments and their functions.*
CLR-6 :	*Utilize the knowledge acquired for design, development & maintenance of aircraft & aero engine systems.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the operation of Reciprocating enginefuel metering system and its components used in aircraft.*	2	80	70	H	-	L	L	L	-	-	-	-	-	-	L	L	M	M
CLO-2 :	*Acquire knowledge on components and accessories of gas turbine engine fuel system.*	2	80	70	H	-	M	L	M	-	-	-	-	-	-	-	M	M	M
CLO-3 :	*Learn the working of induction and exhaust system in aircraft engines.*	2	80	70	H	-	L	L	M	-	-	-	-	-	-	L	M	M	M
CLO-4 :	*Appreciate the need and functions of aircraft electrical systems used in in aircraft engines.*	2	80	70	H	-	L	L	L	-	M	M	-	-	-	L	M	M	M
CLO-5 :	*Gain knowledge on principle and operation of various aircraft engine instruments.*	2	80	70	H	L	L	L	M	-	-	-	-	M	-	L	H	H	M
CLO-6 :	*Acquire comprehensive knowledge of aircraft systems, engine systems and its instrumentation.*	2	80	70	H	L	L	L	M	-	M	M	-	M	-	L	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Reciprocating Engines*	*Introduction to Gas Turbine Engines*	*Introduction to Induction Systems*	*Electrical Power Evolution*	*Introduction to Aircraft Engine Instruments*
	SLO-2	*Design and Construction, modular concept*	*Gas Turbine Enginesmodular concept*	*Reciprocating Engine Induction Systems*	*Aircraft Electrical Systems*	*Reciprocating engine instruments*
S-2	SLO-1	*Fuels and their characteristics for IC engines.*	*Fuels and their characteristics for gas turbine engines*	*Basic Carburetor Induction System*	*Basic Aircraft Electrical Systems*	*Operation of Oil pressure*
	SLO-2	*Contamination of fuels and prevention*	*Contamination of fuels and prevention*	*Induction System Icing,Induction System Filtering*	*Power Generation*	*Oil temperature indicators*
S-3	SLO-1	*Fuel system- Basic Fuel System*	*Turbine Engine Fuel System*	*Supercharged Induction Systems*	*DC Power Generation*	*Operation of Cylinder head temperature (CHT) indicator*
	SLO-2	*Fuel System Requirements*	*General Requirements*	*Operation & Advantages*	*Typical Aircraft DC System*	*Manifold pressure indicator*
S-4	SLO-1	*Fuel Metering Devices for Reciprocating Engines*	*Hydro mechanical Fuel Control*	*Reciprocating Engine Exhaust Systems*	*AC Power Generation*	*Operation of Fuel quantity, Fuel pressure*
	SLO-2	*Fuel/Air Mixtures, Carburetion Principles*	*Hydromechanical/Electronic Fuel Control*	*Exhaust Systems With Turbocharger.*	*Inverters, rectifiers*	*Carburetor temperature, Tachometer indicators*
S-5	SLO-1	*Application of Venturi Principle to Carburetor*	*Operation of Hydromechanical/Electronic Fuel Control*	*Gas Turbine Engines engine inlet systems*	*Transformers, Batteries*	*Introduction to Gas Turbine Engine instruments types*
	SLO-2	*Carburetor Systems,Carburetor Types*	*Introduction to FADEC*	*Compressor Inlet Screens*	*Airplane lighting systems*	*Principle & Operation of Oil pressure*
S-6	SLO-1	*Float-Type Carburetors, Float Chamber Mechanism System*	*FADEC Fuel Control Systems*	*Turboprop and Turboshaft Compressor Inlets*	*Classification of lighting systems*	*Exhaust gas temperature (EGT)*
	SLO-2	*Main Metering,Idling, Accelerating and EconomizerSystem*	*FADEC for an Auxiliary Power Unit*	*Turbofan Engine Inlet Sections*	*External Lighting Systems*	*Turbine inlet temperature (TIT) or turbine gas temperature (TGT)*
S-7	SLO-1	*Pressure Injection Carburetors*	*FADEC Fuel Control Propulsion Engine*	*Gas Turbine Engines Engine Exhaust Systems*	*Internal Lighting Systems*	*Engine pressure ratio (EPR)*
	SLO-2	*Operation of Pressure Injection Carburetors*	*Operation and its Advantages*	*Turbine engine exhaust nozzles*	*Airplane lighting– Power utilization in airplanes*	*Principle & Operation of Fuel quantity, Fuel pressure*

S-8	SLO-1	Manual Mixture Control	Engine Fuel System Components	Thrust Reversers	Ground Power	Fuel flow indicator
	SLO-2	Automatic Mixture Control (AMC)	Main Fuel Pumps, Fuel Heater, Fuel Filters	Afterburning / Thrust augmentation	Emergency Power Generation	Principle & Operation of Tachometer (percent calibrated) N1 and N2 compressor speeds
S-9	SLO-1	Fuel-Injection Systems	Flow Divider,Fuel Pressurizing and Dump Valves	Thrust Vectoring	Ram Air Turbine, Backup Power Converters	Principle & Operation of Torquemeter
	SLO-2	Bendix/Precision Fuel-Injection System	Fuel Spray Nozzles and Fuel Manifolds	Engine noise suppression, Turbine engine emissions.	Permanent Magnet Generators (PMGs)	Torquemeter (on turboprop and turboshaft engines)

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Aerospace Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify the type of rotor, helicopter controls ,gears, bearings and ground handling*
CLR-2 :	*Layout the main rotor system components and its maintenance.*
CLR-3 :	*Demonstrate the engine power transmission to rotors.*
CLR-4 :	*Identify the power plant installation and maintenance*
CLR-5 :	*Identify the various airframe construction and related systems.*
CLR-6 :	*Utilize the knowledge acquired for design, development & maintenance of Helicopter.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understand the helicopter fundamentals and its main components.*	2	80	70	H	-	L	L	L	-	-	-	-	-	-	L	L	M	M
CLO-2 :	*Acquire knowledge on main rotor components and its maintenance.*	2	80	70	H	-	M	L	M	-	-	-	-	-	-	-	M	M	M
CLO-3 :	*Learn the working of helicopter transmission system.*	2	80	70	H	-	L	L	M	-	-	-	-	-	-	L	M	M	M
CLO-4 :	*Acquire knowledge of installation and maintenance of helicopter engines.*	2	80	70	H	-	L	L	M	-	M	M	-	-	-	L	M	M	M
CLO-5 :	*Gain knowledge on helicopter fuselage construction and related systems.*	2	80	70	H	L	L	L	M	-	-	-	-	M	-	L	H	H	M
CLO-6 :	*Acquire comprehensive knowledge of helicopter rotors ,transmission, fuselage and other components and its maintenance activities*	2	80	70	H	L	L	L	M	-	M	M	-	M	-	L	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Helicopters*	*Head maintenance*	*Gradient control boosts*	*Different types of power plant*	*Structural components and materials-Body structure*
	SLO-2	*Evolution of helicopter*	*Blade alignment*	*Maintenance in control rigging*	*Different types of power plant maintenance*	*Bottom structure*
S-2	SLO-1	*Helicopter rotor arrangements*	*Static main rotor balance*	*Inspection in control rigging*	*Maintenance of typical Eurocopter Engine*	*Cabin section*
	SLO-2	*Rigid rotor arrangements*	*Vibration, Tracking methods*	*Engine transmission coupling*	*Tail rotor system*	*Rear section*
S-3	SLO-1	*Semi-rigid rotor arrangements*	*Spanwise dynamic balance*	*Drive shaft*	*Servicing tail rotor track*	*Tail Boom*
	SLO-2	*Helicopter flight controls*	*Blade sweeping*	*Maintenance clutch*	*System rigging*	*Vertical fin*
S-4	SLO-1	*Basic directions ,colour codes*	*Electronic balancing*	*Freewheeling units*	*Rotary wing fuselage structural construction*	*Horizontal stablizer*
	SLO-2	*Ground handling*	*Dampener maintenance*	*Spray clutch*	*Tubular, sheet metal construction*	*Skid gear*
S-5	SLO-1	*Towing*	*Counter weight adjustments*	*Roller unit*	*Bonded construction*	*Antivibration device*
	SLO-2	*Towing precautions*	*Auto rotation adjustments*	*Torque meter*	*Bell-206*	*Special purpose equipments*
S-6	SLO-1	*Helicopter protection*	*Mast& Flight Control rotor*	*Rotor brake*	*Eurocopter BO-105*	*High skid gear*
	SLO-2	*protection equipments*	*Mast Stabilizer*	*Rotor brake maintenance of roller unit*	*Fueslage*	*Floats*
S-7	SLO-1	*Bearing and It's types*	*Mast Dampeners*	*Rotor brake maintenance of torque meter*	*Fuselage maintenance*	*Resque hoists*
	SLO-2	*Bearing installation*	*Swash plate flight control systems collective*	*Vibrations in transmission systems*	*Airframe systems*	*Cargo Hooks*
S-8	SLO-1	*Bearing maintenance*	*Cyclic*	*Mounting systems*	*Stress and loads on airframe*	*Litter Installations*
	SLO-2	*Elastomeric bearings*	*Push-pull tubes*	*Transmissions*	*Wheel*	*Light Installations*
S-9	SLO-1	*Gear, types*	*Torque tubes, bell cranks*	*Fixed wing power plant modifications*	*Skid gear*	*Spray equipment*
	SLO-2	*Gear pattern*	*Mixer box*	*Installation of typical Eurocopter engine*	*Visibility*	*Stabilation devices*

		Introduction to Automotive Engine Components	Manufacturing of Automotive Engine Components	Manufacturing of Air filters and catalytic converter of spark plugs	Manufacturing of glass & rubber processing technology	Manufacturing of Automotive body
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction to automotive engines - parts, Their function requirement,*	*Manufacturing of main bearing – Description, Purpose, Material-Production requirement – Consistent wall thickness, Precise crush height, process requirement*	*Manufacturing of Air filters-Description of Air filters, Functional requirement of air filters*	*Raw material preparation & melting-Properties of glass-Classification of glass for automotive application*	*Automotive materials-Automotive steel grades*
	SLO-2	*Material used in the automotive sector*	*Centrifugal casting Mold material, Consideration for main bearing in centrifugal casting.-Surface finishing for main bearing*	*Materials – Core materials, sealing agents, supporting materials.-Production*	*Glass melting furnace- Pot furnace, Day tank, Continuous tank, Electric furnace*	*High strength &ultra-strength-Stamping aluminum sheet*
S-2	SLO-1	*Manufacturing of an engine block of cylinder head-Functional requirement of an engine block*	*Manufacturing of main bearing cap-Functional requirement*	*Manufacturing of oil filters-Description of oil filters*	*Shaping process in glass working-Shaping of Glass- Spinning, processing, blowing*	*Automotive stamping process & die-Die operations & tooling*
	SLO-2	*cylinder head-Materials used in engine block casting*	*Material requirement – Special treatment materials for cap*	*Functional requirement of oil filters*	*Shaping of flat glass – Rolling, float, Drawing of glass tubs*	*Blank holder-Draw B*
S-3	SLO-1	*Manufacturing process –Low pressure die casting, High pressures die-casting, expendable pattern casting.*	*Production requirement-Process requirement – Hot chamber die casting*	*Manufacturing of oil filters-Materials*	*Forming of glass fibers-Centrifugal spraying*	*Blanking & sharing dies-Binding*
	SLO-2	*Machining–Cutting, Milling, Drilling, Boring, Honing, Reaming*	*Cold chamber die casting-Precision drilling operation*	*Manufacturing of oil filters-Production*	*Drawing of continuous filaments*	*Deep drawing-Coating & lubrication*
S-4	SLO-1	*Quality consideration during manufacturing*	*Vibration damper-Functional requirement, Description of vibration, Material requirement, Production requirement,*	*Manufacturing of ceramic catalytic convertor-Description of ceramic catalytic convertor*	*Heat treatment & finishing-Annealing*	*Advances in metal forming-Hydro forming & extrusion*
	SLO-2	*Possible defects during manufacturing*	*Process description.-Vacuum casting Consideration for casting damper-Why vacuum casting & its advantages*	*Functional requirement*	*Tempered glass*	*Industrial origami : Metal folding – based forming-Flexible stamping procedure*

S-5	SLO-1	Manufacturing of Camshaft-Functional requirement of Camshaft	Piston ring & pin-Description - types-Functional requirement	ceramic catalytic convertor-Material properties	Finishing – Primary design	Automotive TIG welding-Robotic spot welders
	SLO-2	Materials used in Camshaft, Production requirement-Process requirement	Material-Production requirement-Process requirement	Processing – Processing of starting materials, Shaping, sintering, finishing	secondary design considerations in glass processing	Adhesive bonding
S-6	SLO-1	Closed die forging, Impression die forging-forging force	Valves-Description, Functional requirement- Types of valves Monometallic, Bimetal, Stellied welded, Chrome plate, Nitrate	Manufacturing of metallic catalytic convertor-Description of ceramic catalytic convertor	Manufacturing of tires	Advances in automotive welding-Friction the welding
	SLO-2	Finishing operations. Heat treatment	Process – Cutting, Friction welding (Bimetal Special purpose), Upsetting, Forging, Stellied welding, Heat treatment, Grinding	metallic catalytic convertor Functional requirement	The construction of tires	Lack welding-Weld bonding
S-7	SLO-1	Manufacturing of crankshaft-Functional requirement of crankshaft	Automotive springs-Description, Functional requirement- Manufacturing process – Hot rolling, oil tempering, cold oiling,	metallic catalytic convertor Material properties-Need for honey comb structure is metal catalytic convertor	The production of tires	Automotive joining- automotive frame
	SLO-2	Materials used in crankshaft manufacturing	Stress relieving, Coil and grinding, nitriding, slot peering, Strain aging.	Methods of forming honey comb	The process of tires	Set assembling automotive doors
S-8	SLO-1	Production requirement	Inlet Manifold-Description, Functional requirement	Manufacturing of spark plug-Description of ceramic cat com	Performing of components	Final assembly-Installation of trim assembly
	SLO-2	Process requirement	Inlet Manifold Functional requirement	Functional requirement	Building the carcass	Installation of the chases-Final assembly & testing
S-9	SLO-1	Forging, Precision machining	Process Injection molding, Plastic materials,	Spark plug-Material selection	Molding of curing	Ergonomics of the final assembly
	SLO-2	Heat treatment	Injection molding, Injection molds.	Manufacturing of process – Processing of ceramic, forming of electrode, bonding.	Molding process	Mechanical fastening & bolting

Course Code	18AUE322T	Course Name	WELDING AND JOINING TECHNIQUE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire knowledge on fusion welding processes and weld joints*
CLR-2 :	*Select various welding process based on applications.*
CLR-3 :	*List welding parameters and filler metals for various welding process*
CLR-4 :	*Understand advanced welding techniques and its applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Categorize the various types of welding processes.*	*1*	*80*	*75*	*M*	*M*	*M*	*M*	*L*	*L*	*M*	*M*	*M*	*M*	*L*	*L*	*H*	*H*	*H*
CLO-2 :	*Explain various arc welding techniques and its applications*	*2*	*85*	*80*	*H*	*H*	*M*	*L*	*M*	*M*	*M*	*M*	*H*	*L*	*M*	*M*	*M*	*H*	*M*
CLO-3 :	*Determine welding parameters for different types of materials*	*1*	*85*	*80*	*H*	*M*	*M*	*M*	*M*	*L*	*M*	*L*	*M*	*H*	*M*	*H*	*H*	*M*	*H*
CLO-4 :	*Predict the welding process suitable for automotive applications*	*2*	*80*	*75*	*H*	*H*	*L*	*M*	*M*	*H*	*H*	*H*	*M*	*M*	*M*	*M*	*H*	*H*	*H*

		Welding Technology	Fusion Welding Processes	Weldability of metals and Allied Processes	Resistance Welding and Thermo-chemical welding	Solid state and high energy beam Welding
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Classification of fusion welding processes*	*Introduction to Arc Welding*	*Oxygen cutting*	*Spot welding and types of equipment*	*Friction welding*
	SLO-2					*Diffusion joining and process variables and its applications,*
S-2	SLO-1 SLO-2	*Heat source intensity, Heat Input rates*	*Carbon arc welding*	*Flame cut ability of metals, effect of cutting on structure and properties of steel*	*Rocker arm press type welding and it's applications*	*Forge welding*
S-3	SLO-1 SLO-2	*Shielding methods*	*Gas tungsten arc welding*	*Oxygen lancing machine cutting, Powder cutting*	*Seam welding and its applications*	*Ultra sonic welding*
S-4	SLO-1 SLO-2	*Metallurgical effect of weld thermal cycle*	*Gas Metal Arc Welding*	*Welding of different types of materials - carbon and alloy steels.*	*Projection welding and its applications*	*Explosive welding*
S-5	SLO-1 SLO-2	*Residual stresses*	*Plasma arc welding*	*Welding of different types of materials - Cast iron non-ferrous metals and alloys, aluminum.*	*Flash and butt welding applications*	*Laser welding*
S-6	SLO-1 SLO-2	*Formation and Relieving*	*Submerged arc welding*	*Soldering and Brazing: Capillary and welding action*	*Gas welding ,fuel gases and flames*	*Electron beam welding -types of electron gun*
S-7	SLO-1 SLO-2	*Types of weld joints*	*Electro slag welding*	*Soldering and Brazing-Temperature Range*	*Torches, Filler metal and Fluxes*	*Electron beam welding- spot size beam power*
S-8	SLO-1 SLO-2	*Edge preparation, cleaning of edges*	*Arc welding applications*	*Filler Metals and Fluxes*	*Backward and Forward welding and filler rod diameter*	*Operating voltage, pulse technique, deep penetration and applications*
S-9	SLO-1 SLO-2	*Tack welding*	*Arc welding advantages and disadvantages*	*Processes and application, Design and strength of joints*	*Thermit welding*	*Other Joining Techniques for automotive applications*

Learning Resources	1. *Nadkarni. S. V, "Modern Arc Welding Technology", Ador Welding Ltd. Oxford and IBH Publishing, 2008.* 2. *William A. Bowditch, Kevin E. Bowditch, Mark A. 		Metal Cleaning and Surface Treatment	Thermal Spraying Processes	Coatings	Non-Metallic coating oxide and Corrosion	Testing and Selection of coatings
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Need and relevance of surface engineering*	*Classification of Thermal spraying*	*Principles – surface preparation batch coating*	*Plating coating*	*The quality plan, Design*
	SLO-2	*Pre-treatment of coating*	*Thermal barrier and Thermal conductive coatings*	*Continuous coating process*	*Lacquers*	*Testing and inspection of thickness measurement*
S-2	SLO-1	*General cleaning process for ferrous metals*	*Thermal spraying – flame*	*Properties of Coatings*	*Rubbers*	*Adhesion*
	SLO-2	*General cleaning process for non-ferrous metals*	*Arc spraying method*	*Applications of coatings*	*Elastomers*	*Resistance*
S-3	SLO-1	*Selection of cleaning process*	*Plasma Processes*	*surface treatments in wear*	*Vitreous enamels*	*Porosity measurement*
	SLO-2	*Alkaline cleaning*	*HVOF processes*	*Friction control*	*Anodizing phosphating and chromating*	*Selection of coatings*
S-4	SLO-1	*Emulsion cleaning*	*PLV process*	*Thick coatings*	*Application to Aluminium, Magnesium, Tin, Zinc, Cadmium Copper and Silver*	*Industrial applications of engineering coatings*
	SLO-2	*Ultrasonic cleaning*	*Coating production*	*Principles of cementation*	*Phosphating primers*	*Basic mechanisms of wear*
S-5	SLO-1	*Acid bath descaling*	*Spray consumables*	*Cladding*	*Principle of Corrosion*	*Abrasive Wear*
	SLO-2	*Pickling salt bath descaling*	*Principles of electroplating*	*Diffusion coating of C.N. Al, Si, Cr and B*	*Classification of corrosion*	*adhesive wear*
S-6	SLO-1	*Abrasive bath cleaning*	*Technologies used in electroplating systems*	*Corrosion resistant coatings*	*Types of corrosion*	*contact fatigue*
	SLO-2	*Surface treatment of gears*	*Factors affecting the electroplating process*	*Properties of diffusion coatings*	*Factors influencing corrosion*	*fretting corrosion*
S-7	SLO-1	*Short peening*	*Properties and Faraday's Law*	*Application of diffusion coatings*	*Corrosion protection of ferrous and non-ferrous components*	*Salt spray test*
	SLO-2	*Blasting*	*Factors affecting throwing power*	*Nano-engineered coatings*	*Testing and Prevention of Corrosion*	*Humidity test*
S-8	SLO-1	*Machining*	*Electroplating*	*Wear resistant coatings*	*Material selection*	*Porosity test*
	SLO-2	*Boronizing*	*Applications of electroplating*	*Characteristics of Wear resistant coatings*	*Alteration of environment*	*Susceptibility tests for intergranular corrosion Stress*

S-9	SLO-1	*Carbonitriding*	*Non-aqueous*	*Physical vapor deposition*	*surface treatments on Gears*	*Corrosion test*
	SLO-2	*Aluminising*	*Electroless deposition*	*Chemical vapor deposition*	*Corrosion inhibitors*	*Testing wear resistance practical diagnosis of wear*

		Introduction to Manufacturing Operations	Manufacturing System	Supply Chain Management, Production Planning & Control System	Lean Production : JIT, Value Added & Waste Elimination	Agile Manufacturing
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction to Manufacturing Operations*	*Manufacturing System- Definition*	*Supply Chain Management*	*Introduction to various manufacturing techniques*	*Agile Manufacturing*
	SLO-2	*Definition of Manufacturing*	*Material Handling- Definition*	*Importance of supply chain-Definition*	*Introduction to lean production-importance*	*Introduction-Definition-Organize to master change*
S-2	SLO-1	*Alternate Definition of Manufacturing system as Technological*	*Human Resource Manufacturing system in large production system*	*competitive industrial revolution*	*Components of lean production*	*leverage the impact of People & information*
	SLO-2	*Economic Process Comments - Remarks*	*Components of a manufacturing system*	*Relying on Suppliers-downside and upside*	*Minimizing waste, perfect first time quality*	*cooperate to enhance competitiveness-enrich the customers*
S-3	SLO-1	*Manufacturing Industries & Products Manufacturing Categories –Primary – Secondary – Territory*	*Various components- Production machines*	*Supply chain management-Physical supply chain*	*flexible production line, continuous improvement*	*Market force & agility*
	SLO-2	*Continuous & Batch Production – Discrete manufacturing industry. Manufacturing Products – Materials, Typical Product*	*Tools, fixtures & material handling system*	*management philosophy*	*Definitions, Functions, & Principles.*	*Intensifying competition-fragmentation of mass market*
S-4	SLO-1	*Manufacturing Operation-Processing & Assembly operations-Material handling*	*Computer systems to coordinate the manufacturing system*	*Purchasing-changing roles*	*Smart inventory waste minimization*	*cooperative business relationship*
	SLO-2	*Inspection & testing-Coordination & testing-Process, Objective, Working & Stages of operations*	*Human Workers*	*requirement specifications*	*JIT- Concept*	*Changing customer expectation*
S-5	SLO-1	*Product & Production Relationship*	*Classification of Manufacturing systems*	*suppliers, assessment, selection & contracting*	*waste of over production*	*Reorganizing the production system for agility-design*
	SLO-2	*Production quantity & product variety*	*Factors – Types of operation performed*	*managing supplier relationship*	*waste of waiting*	*Reorganizing the production system for agility-product*

S-6	SLO-1	*Complexity of assembled products-Complexity of individual parts*	*number of work stations & layout*	*Material Requirement Planning (MRP) inputs to MRP, Bill of materials,*	*waste of transportation, waste of processing*	*Reorganizing the production system for agility-marketing*
	SLO-2	*Operations, functions, capabilities, limitation & examples*	*level of automation- product variety.*	*Product Structure, working- Examples, output & benefits of MRP*	*waste of motion*	*Reorganizing the production system for agility production operation*
S-7	SLO-1	*Production Concept & Mathematical Models-Production rate*	*Overview of Classification of manufacturing systems*	*Capacity Planning*	*waste of making defective parts*	*Agility versus Mass production*
	SLO-2	*Production capacity-utilization & availability of facility*	*single station*	*Shop Floor Control- order release, scheduling & Progress. Data collection.*	*Objectives of JIT*	*Agility versus Mass production*
S-8	SLO-1	*Manufacturing Lead time-Work in Process*	*Multi station*	*Inventory Control- Order point inventory system*	*Ingredients of JIT*	*Comparison of Lean & agile production*
	SLO-2	*objective, Operations, Functions & examples*	*production lines*	*work in process (WIP) inventory cost*	*Quality & Quantity principles of JIT*	*Comparison of Lean & agile production*
S-9	SLO-1	*Costs of Manufacturing Operations-Fixed & variable cost- Definition, cost equation & application-Direct Labor- Definition, Equation, Application & Examples*	*Learning curves of manufacturing progress-Definition*	*Manufacturing Resource Planning II (MRP II)*	*Primary quantity JIT principles*	*implementation of agile manufacturing*
	SLO-2	*Material & overhead- Factory & cooperate.- Estimating manufacturing Cost & establishing selling price-Cost of Equipment*	*learning rates for typical operations*	*Definition, structure, working & application*	*JIT implementation*	*implementation of agile manufacturing*

Course Code	18AUE325T	Course Name	MANUFACTURING SYSTEMS AND SIMULATION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18AUC201J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide an insight into how simulation modelling can aid in effective decision-making.*
CLR-2 :	*Create Simulation model building aspects of discrete systems (such as Queuing, Inventory and manufacturing) in detail.*
CLR-3 :	*Demonstrate how computer simulation can be used to successfully model, analyze and improve systems under study.*
CLR-4 :	*Perform the statistical analysis of simulation model output.*
CLR-5 :	*Selection of the appropriate simulation software for the different cases.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3

		Introduction to Manufacturing Systems	Manufacturing System Modeling and Simulation	Random Number Generation	Evaluation of Simulation Experiments	Simulation software and Examples
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic concepts and problems concerning systems*	*Basic concepts ofprobability-*	*Properties of random numbers*	*Input modeling, Data collection*	*Programming for discrete event system simulation in GPSS-*
	SLO-2	*Components of Manufacturing systems*	*Discrete versus Continuous Variables*		*Histograms, Selecting the family distribution,*	
S-2	SLO-1	*Systems design: Decision making procedures*	*Probability distribution for discrete variables*	*Techniques for generating random numbers- Linear Congruential Method*	*Selecting input distributions with data*	*GPSS- Single Server Queue simulation*
	SLO-2	*Classifications of Manufacturing systems*	*Probability distribution for continuous variables*		*Quantile-Quantile plots*	
S-3	SLO-1	*Structural, Transformational and procedural aspects of manufacturing*	*Binominal Distribution- to test hypothesis*	*Techniques for generating random numbers- Combined Linear Congruential Generator.*	*Parameter estimation- sample mean and sample variance*	*Simulation of Production systems- Models of Material Handling system.*
	SLO-2				*Suggested estimators*	
S-4	SLO-1	*Modes of production- Batch Production, Cellular, Flexible Manufacturing.*	*Statistical Models- Queueing Systems, Inventory and Supply chain system*	*Techniques for generating random numbers- Random- Number streams*	*Goodness-of-fit tests Chi-square test*	*Simulation of Production systems- Models of Material Handling Equipment.*
	SLO-2		*Reliability and Maintainability*		*Chi-square test with equal probabilities*	
S-5	SLO-1	*Process systems for manufacturing*	*Spread Sheet simulations*	*Tests for random numbers- Frequency Test.*	*Kolmogorov-smirnov goodness of fit test*	*Queueing Systems- Characteristics*
	SLO-2				*p-value and best fits*	
S-6	SLO-1	*Logistic systems- Product-Production Relationship*	*Queueing simulation in a spread sheet*	*Tests for random numbers- Test for Autocorrelation.*	*Selecting input models without data*	*Queueing Systems- Notations*
	SLO-2		*Waiting line models*			
S-7	SLO-1	*Material flow & technological information flow*	*Simulating a single server queue*	*Direct transformation for acceptance and rejection techniques- Poisson Distribution*	*Multivariate and time series input models*	*Project networks*
	SLO-2		*Simulating a queue with two servers*	*Nonstationary Poisson process & Gamma Distribution.*	*Covariance and correlation*	

S-8	SLO-1	*Management and information systems for manufacturing*	*Discrete and Continuous Systems*	*Inverse Transform Techniques- Exponential Distribution, Uniform Distribution*	*Time-series input models*	*Maintenance and replacement systems*
	SLO-2		Discrete- Event system simulation	*Inverse Transform Techniques- Weibull Distribution, Triangular Distribution*		
S-9	SLO-1	*Managerial information flow in manufacturing systems*	*Concepts in Discrete- Event system simulation*	*Inverse Transform Techniques- Emphatical continuous distributions.*	*experimental layout and validation*	*Investment Analysis*
	SLO-2			*Inverse Transform Techniques- Discrete distribution.*

Course Code	18AUE421T	Course Name	ADVANCED MANUFACTURING PROCESS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18AUC201J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire knowledge of various advanced manufacturing processes used in industries*
CLR-2 :	*Understand the various manufacturing process of composite, plastics and glass.*
CLR-3 :	*Acquaint students with the concept of Additive Manufacturing (AM), various AM technologies, selection of materials for AM, modeling of AM processes, and their applications in various fields*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*
CLO-1 :	*Identify the advanced metal forming process and its current role in the industries.*
CLO-2 :	*Choose the manufacturing process for the fabrication of composite, plastics and glass depending on the applications.*
CLO-3 :	*Integrate microelectronic device for Automotive application*
CLO-4 :	*List the low temperature joining and surface treatment process.*
CLO-5 :	*Select economically viable manufacturing process of highly complex parts alternative to conventional manufacturing technologies*

		Advanced Metal Forming Process	Composites, Plastics & Glass: Forming, Shaping & Equipment	Fabrication of Microelectronic Devices	Low Temperature Joining Process & Surface Technology	Additive Manufacturing
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction – why do we need advanced manufacturing process?*	*Introduction to Composites*	*Role of Electronics in Industrial Revolution.*	*Introduction to joining process*	*Introduction to additive manufacturing.*
	SLO-2	*Introduction to powder metallurgy technique.*	*Composites properties and structures.*	*Integration of Electronics in Automotive Industry.*	*Brazing & Soldering methods- torch, furnace, induction, resistance, dip, infrared and applications.*	*Importance of Rapid prototyping.*
S-2	SLO-1	*Need and role of powder metallurgy in Automotive industry.*	*Processing of Polymer Matrix composites- Compression molding, injection molding , hand lay-up method , filament winding*	*Semiconductors & Silicon- Structure, Physical Properties.*	*Adhesion bonding – types of adhesives and adhesives system – Applications*	*RPT – classification based on materials, Advantages*
	SLO-2	*Powder Metallurgy Applications – Automotive parts and components.*	*Processing of Metal Matrix composites. Stir casting process , squeeze casting process/ infiltration , diffusion bonding, powder metallurgy*	*Semiconductors – working and types.*	*Joining of Plastics*	*Liquid based techniques-overview*
S-3	SLO-1	*Production and properties of metal powders.*	*Processing of Ceramic Matrix Composites Chemical vapor infiltration, Sol-gel Process*	*Semiconductors – advantages.*	*Joining of ceramics Joining of glass.*	*Stereo lithography.*
	SLO-2	*Particle size, distribution and shape of metal powders.*	*Composites in Automotive applications.*	*Wafer Formation & preparation*	*Surface Treatment- need, surface structure.*	*Solid Ground Curing technique.*
S-4	SLO-1	*Blending of metal powders and purpose.*	*Shaping of plastics*	*Single Crystal growing Techniques.*	*Mechanical surface treatment – shot peening, laser shot peening*	*Multi Jet Modeling,*
	SLO-2	*Hazards in Blending, Compaction of Metal powders.*	*Injection Molding process.*	*Slicing of wafers Geometry of wafers.*	*Water jet peening,*	*Ballistic particle.*
S-5	SLO-1	*Purpose of Isotactic pressing.*	*Blow Molding process*	*Film Deposition & Oxidation techniques.*	*Ultrasonic peening*	*Shape deposition Manufacturing*
	SLO-2	*Hot & Cold Shaping Process.*	*Rotational Molding process.*	*Physical Vapor Deposition*	*surface rolling - operation*	*Powder based techniques-overview*

S-6	SLO-1	*Metal injection molding, Spray Deposition.*	*Thermoforming process.*	*Chemical Vapor Deposition*	*explosive hardening - operation*	*Selective laser sintering.*
	SLO-2	*Sintering – process, Coining, Forging.*	*Compression molding process*	*Photolithography – Principle and Process.*	*Cladding - process & working*	*Laser engineered net shaping.*
S-7	SLO-1	*Mechanism and Properties of Sintered Parts Secondary & Finishing Operations.*	*Transfer Molding process.*	*Photolithography - Types & working*	*Case hardening - process & working*	*3D printing – introduction*
	SLO-2	*Heat treating, Impregnation, Infiltration & Plating.*	*Economics of Processing Plastics & Composites.*	*Etching – Need, Types, Principle.*	*Hard facing - objective, process & working.*	*3D printing- working and application*
S-8	SLO-1	*Dent Resistance of Sheet metals – dent formation &automotive application.*	*Forming & shaping of Glass- piece ware glass-spinning , pressing , press and blow , blow & blow and casting*	*Etching - Process & Working*	*Spark hardening - objective, process & working*	*Solid based technique-overview*
	SLO-2	*Fabrication of Honey Comb Structure for Catalytic Convertor.*	*Flat and tubular glass- float process , rolling of flat plate , Danner process*	*Diffusion- Principle, Process & Working*	*Thermal spraying – need, materials*	*Fused Deposition Modeling*
S-9	SLO-1	*Super plastic Forming – Super plasticity process, advantages and Properties.*	*Forming of glass fiber- centrifugal spraying, drawing*	*Ion Implantation - Principle, Process & Working*	*Thermal spraying – types*	*Paper Lamination Technology*
	SLO-2	*Diffusion bonding – process – advantages.*	*Strengthening Techniques for Glass*	*A brief outline of Wire Bonding, Packaging, Yield, Reliability*	*Thermal spraying –process- combustion , electrical and cold spraying*	*Laminated object modeling – process*

		Work Study and Ergonomics	Introduction to Process Planning	Cost Estimation	Production Cost Estimation	Estimation of Machining Times & Cost
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Objectives- Work study, Method study*	*Introduction to manufacturing system-Fundamental Concept and Basic Manufacturing process*	*Objectives of cost estimation*	*Estimation of material cost*	*Machine shop operations-Lathe, Drilling*
	SLO-2			*Types of cost estimation*		
S-2	SLO-1	*Basic Procedure for Method Study (Select, Record, Examine, Develop, Define, Install and Maintain)*	*Process planning-Basic concepts, Process selection and analysis*	*Fundamentals of costing and cost accounting methods,*	*Estimation of labor cost*	*Machine shop operations- Milling and Grinding*
	SLO-2					
S-3	SLO-1	*Recording Techniques used in Method Study*	*Details of process plan, process charts and route sheets*	*Components of a Cost Estimate*	*Estimation of Overhead cost*	*Estimation of machining time for basic lathe operation-Turning and Facing*
	SLO-2					
S-4	SLO-1	*Work Measurements, Objectives of work Measurements*	*Process planning methods- manual and computer aided process planning & its approaches*	*Classification of Costing*	*Foundry basics, Methods of casting, Casting tools and accessories*	*Estimation of machining time for Threading and Chamfering*
	SLO-2					
S-5	SLO-1	*Work Sampling, Analytical Estimating*	*Manual process planning-Basic procedure, merits & demerits, applications and comparisons*	*Elements of Cost, Cost of Product*	*Cost estimation in foundry shop- pattern cost, casting cost*	*Estimation of machining time for drilling–sample problems*
	SLO-2					
S-6	SLO-1	*Ergonomics*	*Case study-Preparation of manual process plan for four stroke petrol engine assembly*	*Methods of Cost Estimates*	*Welding, Types of weld joints, Gas welding*	*Estimation of machining time for boring operations –sample problems*
	SLO-2					
S-7	SLO-1	*Ergonomics Principles Applied to Instrument Design and Control*	*Computer aided process planning-Types, Basic procedure, merits, demerits and applications*	*Data Requirements and Sources of information*	*Estimation of Gas welding cost, Gas cutting*	*Estimation of machining time for milling operation-Sample problems*
	SLO-2					
S-8	SLO-1	*Ergonomics Principles Applied to Machines and Controls*	*Process analysis-Break even analysis & It's objectives*	*Types of Cost Estimates, Allowances in Estimation (of Standard Time)*	*Arc welding: Equipments, Cost Estimation*	*Estimation of machining time for Grinding operation-sample problems*
	SLO-2					
S-9	SLO-1	*Ergonomics Principles Applied to Layout of a Work place*	*Statistical process control-Process capability analysis using process control charts*	*Cost Estimation Procedure*	*Cost estimation in Welding shop*	*Case studies: Estimation of cost for a product*
	SLO-2

Course Code	18AUE424T	Course Name	AUTOMOTIVE QUALITY SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Impart the knowledge of quality concepts and quality management systems*
CLR-2 :	*Implement the knowledge of tool and techniques in automotive industries.*
CLR-3 :	*Integrate the idea to work with professional cost accountants to obtain realistic cost estimates*
CLR-4 :	*Collaborate on international quality systems and modern management systems for quality.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Relate the quality concepts and quality production*	*1*	*80*	*75*	*M*	*M*	*M*	*M*	*M*	*H*	*M*	*H*	*M*	*H*	*H*	*H*	*M*	*H*	*H*
CLO-2 :	*Explain quality Management system and different dimensions of quality*	*2*	*85*	*80*	*M*	*H*	*L*	*H*	*M*	*H*	*M*	*H*	*M*	*H*	*H*	*H*	*M*	*H*	*H*
CLO-3 :	*Implement the application of management tools and techniques for process improvement*	*2*	*85*	*80*	*M*	*H*	*H*	*L*	*H*	*H*	*M*	*H*	*M*	*H*	*H*	*H*	*M*	*H*	*H*
CLO-4 :	*Assess Automotive TS16949 quality system practices*	*3*	*85*	*80*	*M*	*H*	*H*	*H*	*H*	*H*	*M*	*H*	*M*	*H*	*H*	*H*	*M*	*H*	*H*
CLO-5 :	*Validate various system analysis measurement and data collection*	*3*	*90*	*85*	*M*	*H*	*H*	*H*	*H*	*H*	*M*	*H*	*M*	*H*	*H*	*H*	*M*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1 / SLO-2	*Basic Concepts of Quality. Quality, classification of quality and services*	*Quality Management Systems-Introduction*	*Modern Management Tools and Techniques*	*ISO TS16949 Scope, application and quality management system*	*Quality Tools and Measurement Systems Analysis*
S-2	SLO-1 / SLO-2	*Quality systems overview*	*Quality Management – A conceptual Frame Work*	*Introduction to Modern Management Techniques*	*Requirements of quality management system*	*Concepts of SPC detection vs. prevention*
S-3	SLO-1 / SLO-2	*Product Quality design*	*Dimensions of Quality*	*5s concepts*	*Advanced Product Quality Planning (APQP)-Focus and benefits*	*Data collection methods*
S-4	SLO-1 / SLO-2	*Quality engineering in design of production processes*	*Costs of Quality*	*Kaizen techniques*	*Advanced Product Quality Planning (APQP)- Different Phases*	*Statistical Tools*
S-5	SLO-1 / SLO-2	*Quality characteristics*	*Quality System Standards*	*Six sigma methodologies*	*Design of Failure Mode Effects Analysis - Types*	*Understanding of measurement systems*
S-6	SLO-1 / SLO-2	*Reliability*	*ISO 9000 clauses*	*Quality circles*	*Design of Failure Mode Effects Analysis-Advantages and Limitations*	*Variable Gauge R&R*
S-7	SLO-1 / SLO-2	*Safety*	*ISO 9000 interpretations*	*Taguchi loss function-Theory*	*Process Failure Mode Effects Analysis*	*Introduction to Hypothesis Testing*
S-8	SLO-1 / SLO-2	*Quality engineering in production*	*ISO TS16949 clauses*	*Taguchi loss function-Applications*	*Production Part Approval Process (PPAP)*	*ANOVA*
S-9	SLO-1 / SLO-2	*Quality engineering in service*	*ISO TS16949 interpretation*	*POKE –YOKE Techniques*	*Single and Multiple Regression*	*Correlation Analysis*

		Industrial Engineering and Management Science	Production And Productivity	Plant Location and Layout	Work Study	Operational Research
Duration (hour)		9	9	9	9	9
S-1	SLO-1 / SLO-2	*Introduction to Industrial Engineering, Concepts*	*Production Concept*	*Factors Governing on plant location*	*Definition concept and need for work study*	*Operational Research concept and defination*
S-2	SLO-1	*History and Development of Industrial Engineering*	*Production function*	*Locational Economics*	*Method Study*	*Methods of Operational Research*
	SLO-2	*Scientific management*	*Production system*	*Rural V/S Urban plant sites*	*Method Study Procedure*	*Linear Programming*
S-3	SLO-1	*Roles of an Industrial Engineer*	*Analysis of Production system*	*Plant layout*	*Process chart symbols*	*Graphical method*
	SLO-2	*Applications of Industrial Engineer*	*Input output model*	*Principles of Plant layout*	*Flow process charts*	*Model problem in Graphical method*
S-4	SLO-1	*Functions of Industrial Engineering department and its organization*	*Productivity*	*Process layout*	*Process charts types*	*Transportation problem*
	SLO-2	*Production Management*	*Productivity model problem*	*Process layout Merits and demerits*	*Flow diagram*	*Transportation problem types*
S-5	SLO-1	*Production Management Versus Industrial Engineer*	*Factors affecting productivity*	*Product layout*	*Steps in flow diagram*	*Vogels approximate method*
	SLO-2	*Operations Management*	*Product design*	*Product layout Merits and demerits*	*Man type flow process chart*	*Model problem in Vogels approximate method*
S-6	SLO-1	*Management science*	*Increasing productivity of Resources*	*Combination layout*	*String diagram*	*North west corner method*
	SLO-2	*Historical Development*	*Work productivity*	*Fixed position layout*	*String diagram construction*	*Model problem I*
S-7	SLO-1	*Tools of management science*	*Model Problem I*	*Flow pattern layout*	*Multiple Activity chart*	*Cost matrix*
	SLO-2	*Simulation model*	*Model Problem II*	*Flow pattern layout types*	*Multiple Activity chart Construction*	*Profit matrix*
S-8	SLO-1	*Managerial economics*	*Productivity measures*	*Work station*	*Operational analysis*	*Profit matrix with equal supply and demand*
	SLO-2	*Managerial Techniques*	*Development of Productivity Measures*	*Work station design*	*Example Operational chart*	*Profit matrix with unequal supply and demand*
S-9	SLO-1	*Managerial Accounting*	*Productivity Measurement system*	*Model Problem I*	*Analysis of motion*	*Degeneracy*
	SLO-2	*Analysis and performance*	*Components of Productivity Measurement system*	*Model Problem II*	*Steps in motion analysis*	*Degeneracy Problem*

		Air Conditioning Fundamentals	Psychrometry	Refrigerant	Fans and Air Distribution	Load Calculation and Applied Psychrometrics
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction to Air Conditioning System*	*Mixing Process*	*Working of Refrigerant in refrigeration system*	*Fan Characteristics*	*Preliminary Considerations*
	SLO-2	*Location of Air Conditioning system In a Car*	*Properties of Moist Air*	*Containers Handling Refrigerants*	*Centrifugal Fans*	*Internal Heat gains*
S-2	SLO-1	*Schematic layout of Refrigeration System*	*Dalton's Law of Partial Pressure*	*Desirable Properties Of Refrigerant*	*Axial Fans*	*Occupancy Load*
	SLO-2	*Mode of heat transfer*	*Psychrometric Properties*	*Selection of Refrigerants*	*Fan Arrangements*	*Lighting Load*
S-3	SLO-1	*Refrigeration cycle*	*Dry Bulb Temperature*	*Thermodynamic Requirements*	*Fan in Series*	*Appliances Load*
	SLO-2	*Terminologies In HVAC: TR, COP*	*Wet Bulb Temperature*	*Freezing Point*	*Fan in parallel*	*Product Load*
S-4	SLO-1	*EER, SEER*	*Specific Humidity*	*Critical Temperature and Pressure*	*Types of Ducts*	*System Heat Gains*
	SLO-2	*Heat Exchanger And Its Types*	*Dew Point Temperature*	*Chemical Requirements*	*Air Flow Through Simple Duct System*	*Supply air duct heat gain and Leakage loss*
S-5	SLO-1	*Direct-Contact Heat Exchangers*	*Relative Humidity*	*Flammability*	*Duct Fittings*	*Heat gain from Air Conditioning fan*
	SLO-2	*Storage Type Exchangers*	*Psychrometric Processes*	*Toxicity*	*Friction Loss In Duct*	*Return air duct heat and Leakage gain*
S-6	SLO-1	*Tubular Heat Exchangers*	*Sensible cooling*	*Action of Refrigerant with water*	*Dynamic Loss In Ducts*	*Safety factor*
	SLO-2	*Shell-and-Tube Exchangers*	*Sensible heating*	*Action of Refrigerant with oil*	*Dampers*	*Cooling Load Estimate*
S-7	SLO-1	*Double-Pipe Heat Exchangers*	*Humidifying*	*Binary Mixtures*	*Indoor Air Distribution*	*Room Sensible Heat*
	SLO-2	*Spiral Tube Heat Exchangers*	*Dehumidifying*	*Classification of Refrigerant Mixtures*	*Static And Velocity Pressures*	*Room Latent Heat*
S-8	SLO-1	*Air Conditioning Components*	*Heating and Humidifying*	*Lubricant in Refrigeration system*	*Fixed Velocity Method*	*Grand total load on Air conditioning system*
	SLO-2	*Compressor*	*Cooling and Dehumidifying*	*Tapping Into The Refrigerant Container*	*Equal Friction Method*	*Heat Balance Method*
S-9	SLO-1	*Condenser*	*Cooling and Humidifying*	*Ambient Conditions Affecting System Pressures*	*Static Regain Method*	*Heat Load Calculation*
	SLO-2	*Evaporator Expansion Valve*	*Heating and Dehumidifying*	*Secondary Refrigerant*	*Static Pressure Calculation*	*Tutorials*

		Performance Parameters	Measurements	Instrumentation	Test facility layout	Data analysis
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Engine performance parameters - Introduction*	*Indicated power measurement*	*Instrumentation and data acquisition - Introduction*	*Test facility layout considerations- fundamentals*	*Validation of data and test results - Introduction*
	SLO-2	*Engine performance parameters - Explanation*	*Frictional power measurement*	*Pressure measurement*	*Test cell - thermodynamic system*	*General principles for data validation in engine testing*
S-2	SLO-1	*Brake power - Calculation*	*Tutorial session*	*The Hall-effect sensor*	*Basics of test cell and control room design*	*Error types*
	SLO-2	*Torque Output - Calculation*	*Tutorial session*	*Shielded-field sensor*	*Ventilation and air conditioning*	*Error Sources*
S-3	SLO-1	*Tutorial session*	*Brake power measurements*	*Crankshaft position sensor*	*Vibration control*	*Combination of errors*
	SLO-2	*Tutorial session*	*Torque and speed measurements*	*Types*	*Test cell noise control*	*Experiment repeatability*
S-4	SLO-1	*Mean effective pressure - Calculation*	*Dynamometer - Introduction*	*Throttle position sensor*	*Cooling circuit requirements*	*Instrument sensitivity*
	SLO-2	*Mechanical efficiency Calculation*	*Mechanical Dynamometer*	*Temperature sensors*	*Installation*	*Experimental precision*
S-5	SLO-1	*Tutorial session*	*Electrical Dynamometer*	*Coolant sensors*	*Exhaust gas system*	*Absolute and relative accuracy*
	SLO-2	*Tutorial session*	*Eddy Current Dynamometer*	*Sensors for Feedback control*	*Installation*	*Traceability*
S-6	SLO-1	*Volumetric efficiency and Fuel-air ratio calculation*	*Measurement of speed*	*Exhaust gas oxygen sensor*	*Electrical system considerations*	*Uncertainty- calibration –definition, importance*
	SLO-2	*Specific fuel consumption calculation*	*Fuel consumption measurement*	*EGO characteristics*	*Layout*	*Calibration - definition*
S-7	SLO-1	*Tutorial session*	*Air consumption measurement*	*Switching characteristics*	*Fuel storage requirements*	*Calibration - importance*
	SLO-2	*Tutorial session*	*Smoke and particulate measurement*	*Knock sensor*	*Fuel supply requirements*	*Calibration techniques for pressure*
S-8	SLO-1	*Heat Balance - Calculation*	*Measurement of exhaust emissions – HC, CO, NOx and* CO_2	*Pressure sensor*	*Fuel treatment systems*	*Calibration techniques for temperature*
	SLO-2	*Brake thermal efficiency - calculation*	*Tutorial session*	*Data Acquisition, Data collection and control systems (EDACS)*	*Input parameters for engine testing*	*Gaussian distribution as a statistical tool*
S-9	SLO-1	*Tutorial session*	*Tutorial session*	*Post processing of data*	*Maintenance of engine test facility*	*Error analysis*
	SLO-2	*Tutorial session*	*Tutorial session*	*Tutorial session*	*Troubleshooting of engine instruments*	*Tutorial session*

Course Code	18AUE333T	Course Name	FUEL TESTING AND STANDARDS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18AUC301J	Co-requisite Courses	NIL	Progressive Courses	
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Learn the sources, composition and properties of automotive fuels*
CLR-2 :	*Gain knowledge on reference and commercial fuels and road map to quality improvement*
CLR-3 :	*Acquire knowledge on the significance of different fuel properties with respect to engine application*
CLR-4 :	*Understand and become familiar with BIS testing standards for gasoline and diesel*
CLR-5 :	*Conceive idea on the testing methods for LPG, CNG and biodiesels*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Understand the sources, composition and properties of automotive fuels and significance of testing fuels*	2	80	75	M	M	L	M	L	H	H	H	M	L	L	M	M	H	H
CLO-2 :	*Acquire knowledge on the specification of reference fuels for testing vehicles, road map and bottle necks in quality improvement*	2	80	75	M	M	L	M	L	H	H	H	M	L	L	M	M	H	H
CLO-3 :	*Learn the significant fuel properties and its implication in engine application*	2	80	75	M	M	L	M	L	H	H	H	M	L	L	M	M	H	H
CLO-4 :	*Gain knowledge on commercial gasoline and diesel fuel testing as specified in BIS*	1	80	75	M	M	L	M	L	H	H	H	M	L	L	M	M	H	H
CLO-5 :	*Gain knowledge on CNG, LPG and biodiesel testing*	1	80	75	M	M	L	M	L	H	H	H	M	L	L	M	M	H	H

		Automotive fuels	Reference and commercial fuels	Fuel Properties	Commercial Gasoline and Diesel fuel testing as specified in BIS	CNG, LPG and Biodiesels testing
Duration (hour)		9	9	9	9	9
S-1	SLO1	*Petroleum - sources and composition*	*Technical specification of fuels - significance*	*Properties of different fuels-Volatility*	*Method to determine Distillation temperatures*	*Method to determine methane and Ethane content*
	SLO2	*Gasoline, Diesel- sources and composition*	*Technical Specification of Reference fuel for testing vehicles -Gasoline*	*Properties of different fuels- Oxidation stability*	*Research Octane Number (RON), Motor Octane Number (MON)*	*C_3 and C_4 content*
S-2	SLO1	*CNG- sources and composition*	*Technical Specification of Reference fuel for testing vehicles - Diesel*	*Properties of different fuels- Octane rating*	*Calorific value, Oxidation Stability*	*Motor Octane number*
	SLO2	*LPG –sources and composition*	*Technical Specification of Reference fuel for testing vehicles -CNG*	*Properties of different fuels- Cetane rating*	*Sulphur content*	*Hydrogen sulphide content(LPG)*
S-3	SLO1	*Alcohols –sources and composition*	*Technical Specification of Reference fuel for testing vehicles - LPG*	*Properties of different fuels- Cetane rating*	*Reid Vapour Pressure*	*Odour, Copper strip corrosion*
	SLO2	*Alcohols –sources and composition*	*Technical Specification of Reference fuel for testing vehicles - Blended fuels*	*Calorific Value*	*Benzene, Aromatic*	*Wobbe Index(CNG)*
S-4	SLO1	*Biodiesels –sources and composition*	*Comparison of the specification of Commercial Gasoline and commercial diesel for different Bharat stage norms,*	*Density*	*Olefin and oxygen content*	*Oxidation Stability*
	SLO2	*Biodiesels –sources and composition*	*Comparison of the specification of Commercial Gasoline and commercial diesel for different Bharat stage norms,*	*Viscosity*	*Method to determine Ash content*	*Low temperature flow properties*
S-5	SLO1	*Reformulated fuels -Types and Use*	*Fuel quality improvement accomplished in India*	*Carbon Residue Etc.*	*Carbon residue*	*Kinematic viscosity*
	SLO2	*Reformulated fuels -Types and Use*	*Fuel quality improvement accomplished in India*	*Characteristic requirements of different fuels in IC engines- Availability*	*Cetane number and Index*	*Cetane number, Copper strip corrosion*
S-6	SLO1	*Additives-Types and Use*	*Fuel quality compliance issues*	*Characteristic requirements of different fuels in IC engines- Fuel economy*	*Distillation temperature*	*Ester content, Mono, Di and Tri-glycerides*

	SLO2	*Hydrogen as IC engine fuel*	*Fuel quality compliance issues*	*Characteristic requirements of different fuels in IC engines- Performance*	*Flash point, Kinematic viscosity*	*Density, Iodine Number*
S-7	SLO1	*Comparison of LPG. CNG, Hydrogen*	*Fuel testing*	*Gasoline quality effects on vehicle emissions,*	*Density, calorific value*	*Structure indices*
	SLO2	*Comparison of LPG. CNG, Hydrogen*	*Presumptive liability*	*Diesel quality effects on vehicle emissions*	*Test for sulphur and water content, sulphated ash*	*Liquid chromatography technique*
S-8	SLO1	*Importance of fuel testing*	*Fuel registration and tracking-A comparison in India, USA and Japan*	*Ultra low sulphur fuels*	*Cold filter plug point ,Cloud point*	*Gas chromatography*
	SLO2	*Need for fuel testing Standards*	*Fuel registration and tracking-A comparison in India, USA and Japan*	*Lubricity characteristics*	*Copper strip corrosion*	*Mass Spectrometry analysis*
S-9	SLO1	*An overview of the different standards available for fuel testing-EN, ASTM, ISO, JIS BIS*	*Inhibiting factors in fuel quality improvement in India*	*Flame characteristics- burning velocity, flame temperature and flammability limit*	*Oxidative stability*	*Photo spectrometry analysis*
	SLO2	*An overview of the different standards available for fuel testing-EN, ASTM, ISO, JIS BIS*	*Inhibiting factors in fuel quality improvement in India*	*Flame characteristics- burning velocity, flame temperature and flammability limit*	*Polycyclic Aromatic Hydrocarbon*	*Photo spectrometry analysis*

Learning Resources	1. *Automotive Fuels Reference Book-Keith Owen, Trevor Coley, Second Edition, Society of Automotive Engineers Inc.,1995* 2. *ALTERNATIVE FUELS Concepts, Technologies and Developments S.S. Thipse, Jaico Publishing House* 3. *Practical Handbook on Fuel Properties and Testing by SajidZaman, Lambert Academic Publishing, 2014.*	4. *Motor Vehicles Act ,2009,India* 5. *ARAI Tap Document –Document on Test Method, Testing Equipments and Related Procedures for Testing Type approval and Conformity of Production (COP),Ministry of Road Transport and High ways* 6. *Biodiesel Production and Properties by AmitSarin, RSC Publishing ,2012*

							3	0	0	3

Pre-requisite Courses	18AUC301J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Gain knowledge about Various exhaust systems.*
CLR-2 :	*Understand various emission norms and control methods*
CLR-3 :	*Gain knowledge about noise pollutions and control methods*
CLR-4 :	*Enlighten the knowledge in Computational analysis.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the History and evolution of Automobile Exhaust System*	1	85	80	H	M	M	H	M	M	H	H	H	M	H	M	H	M	M
CLO-2 :	*Gain familiarity on the emission norms and emission reduction techniques*	1	85	80	H	H	M	M	L	L	M	H	H	M	M	M	H	M	M
CLO-3 :	*Get familiarized with the basics of acoustics, muffler types and characteristic design of mufflers*	2	80	75	H	H	H	H	M	M	M	M	M	H	H	H	H	M	M
CLO-4 :	*Understand the procedures and fundamentals involved in computational fluid dynamic, thermal and structural analysis of vehicle exhaust system*	2	80	75	H	H	H	H	M	M	H	M	H	M	H	H	H	L	H
CLO-5 :	*Understand the fundamentals involved in testing and validation of automotive exhaust system*	2	80	75	H	H	H	H	M	M	M	M	H	H	H	H	H	M	H

		History of Automobile Exhaust Systems	Hot End	Cold End	Computational Analysis (CFD and FEA)	Testing and Validation
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*History and evolution of automobile exhaust system*	*Gasoline engine out pollutants*	*Basics of acoustics, fundamentals of sound, terminologies, noise cancellation.*	*CFD for vehicle exhaust system, governing equation of fluid flow and heat transfer*	*Vehicle noise measurement*
	SLO-2	*History and evolution of automobile exhaust system*	*Diesel engine out pollutants*	*Destructive & constructive interferences*	*CFD for vehicle exhaust system, governing equation of fluid flow and heat transfer*	*Vehicle noise measurement*
S-2	SLO-1	*Basics of exhaust system*	*Emission norms*	*Engine noise introduction, gasoline & diesel engine operation*	*Flow uniformity, pressure loss through exhaust system*	*Operational vibration analysis, experimental modal analysis*
	SLO-2	*Exhaust system from engine head face to tail pipe*	*Converter hot end components*	*Exhaust noise characteristics, vehicle pass by noise, exhaust noise measurement standards*	*Exhaust system, flow eccentricity, hego index, conjugate heat transfer analysis*	*Air leak test, thermal shock tests, thermal fatigue test*
S-3	SLO-1	*Layout of exhaust system*	*Three way catalytic converter, manifold – cone profiles.*	*Types of exhaust noises, pulsation noises, flow noises, booming noises*	*Introduction to finite element analysis*	*Back pressure measurement test*
	SLO-2	*Different components of exhaust system*	*Substrate*	*Shell radiation noises, passive noise reduction techniques*	*Present, past, future features*	*Hot end system*
S-4	SLO-1	*Introduction about air pollution and noise pollution*	*Types of substrate*	*Types of mufflers, reflective, absorptive, hybrid mufflers*	*Introduction to preprocessing 1d, 2d, 3d elements*	*Hot vibration test, cold vibration test*
	SLO-2	*Air pollution and noise control requirements in automobiles*	*Wash coat, mat, types of mats, shell*	*Muffler design constrains, muffler internal design, tri flow muffler, straight through muffler*	*Meshing and processing techniques*	*Flow noise measurement*
S-5	SLO-1	*Hot end components of exhaust system*	*Canning and types of canning*	*Helmholtz resonator, internal resonators*	*Statics of strength of materials*	*Shell deformation test, cold end: biaxial fatigue test*
	SLO-2	*Cold end components of exhaust system*	*Controlled canning, gbd (gab bulk density)*	*Baffle plates, perforations, shells, end plates, pipe diameters*	*Types of analysis*	*Uniaxial fatigue test, salt spray test, condensate water noise test*

S-6	SLO-1	*Manufacturing of exhaust components*	*Temperature sensor, oxygen sensor*	*Absorptive materials, development methodologies, muffler performance parameters, sound transmission loss, insertion loss*	*Modal analysis*	*Transmission loss measurement*
	SLO-2	*Exhaust manifold manufacturing process*	*Thermal management, insulators, heat shields (gasoline \ diesel).*	*Noise reduction, tail pipe noise level, back pressure, vehicle interior noise levels, advanced muffler technologies, cat con integrated muffler*	*Linear static analysis*	*Shell stiffness measurement , glass wool endurance test*
S-7	SLO-1	*Silencer manufacturing process*	*Advancement in substrates, Technology for gasoline engine*	*Variable flow muffler, twin mufflers, active noise cancellation, sporty sound mufflers*	*Introduction to non-linear analysis*	*Resonance frequency measurement*
	SLO-2	*Exhaust system integration*	*Gasoline particulate filter(gpf)*	*Sound engineering, off road, on road, non-road muffler applications examples, manufacturing types & process*	*Dynamic analysis*	*Shell radiation noise measurement*
S-8	SLO-1	*Service of exhaust system*	*Lean NOx trap (INT), Technology for diesel engine*	*Roll and spot welding, lock seaming.*	*Thermal analysis*	*Tail pipe noise measurement*
	SLO-2	*Service of exhaust system*	*Exhaust gas recirculation (EGR)*	*Double seaming, web forming.*	*RLDA & fatigue analysis*	*Tail pipe noise measurement*
S-9	SLO-1	*Replacing of exhaust system*	*Diesel oxidation catalyst (DOC), partial flow filter (PFF), diesel particulate filter (DPF)*	*Clinching, cold metal transfer, hydro forming.*	*Post processing techniques of different analysis*	*Water drainage ability test*
	SLO-2	*Replacing of exhaust system*	*Selective catalytic reduction (SCR), selective catalytic reduction filter (SCRF), global regulations and testing protocols*	*Piercing, stamping, muffler examples.*	*Process flows and targets, case study 1-2-3.*	*Water drainage ability test*

		Introduction	Super charging and turbo charging	Performance characteristics	Feature characteristics	Heat management
Duration (hour)		9	9	9	9	9
S-1	SLO1	*Introduction to super charging*	*Introduction to flow maps of supercharging systems*	*Introduction to thermodynamic issues with turbocharging*	*Introduction to particular features of exhaust turbocharging*	*Charge boosting, exhaust pre-release, turbo-cooling*
	SLO2	*Introduction to compressor mapping*	*Two stroke engines*	*Cylinder release temperature*	*Exhaust manifold arrangements for various firing sequences of engines.*	*miller, two stage, complex, hyper-bar, rotor designs*
S-2	SLO1	*Definitions, survey of supercharging methods,*	*Four stroke engines*	*Mean exhaust temperature*	*Exhaust manifold arrangements for various firing sequences of engines.*	*Types of impellers, bearing arrangements,*
	SLO2	*Petrol engines*	*Interaction between turbocharger and engine.*	*Theoretical aspects of complete extraction of work*	*Constant pressure vs pulse turbocharging*	*types and lubrication on bearings*
S-3	SLO1	*Diesel engines*	*Mechanical supercharging,*	*Expanding from release pressure to ambient pressure*	*Constant pressure vs pulse turbocharging.*	*Examples of supercharged engines of road vehicles (cases),*
	SLO2	*Exhaust turbo charging.*	*Mechanical supercharging,*	*Complete conversion into kinetic energy at ambient pressure.*	*Modified forms of pulse turbocharging.*	*introduction to engine cooling systems, engine coolants,*
S-4	SLO1	*Fundamentals of compressor matching,*	*Exhaust turbo charging*	*Complete conversion into kinetic energy at ambient pressure.*	*Transient response.*	*Heat exchangers, in-vehicle installation, performance curves.*
	SLO2	*compressor power*	*Exhaust turbo charging -operational differences.*	*Compressor power in terms of mean piston pressure*	*Transient response*	*Pressurized engine cooling systems: filling, de- aeration & drawdown accessories.*
S-5	SLO1	*Air consumption*	*Equivalent nozzle area of turbine*	*Compressor power in terms of mean piston pressure*	*Torque characteristics of engines with exhaust turbochargers*	*On-highway cooling system test code, engine cooling systems field test (air-to-boil)*
	SLO2	*Types of compressors*	*Equivalent nozzle area of turbine*	*Numerical -compressor power in terms of mean piston pressure*	*Torque characteristics of engines with exhaust turbochargers.*	*Heat exchanger thermal & pressure cycle durability. Cooling fans*
S-6	SLO1	*Compressor characteristics*	*Pulse turbocharging*	*Numerical problem -compressor power in terms of mean piston pressure*	*Measures to improve acceleration*	*Fan laws, fan characteristics, and system resistance curve*

	SLO2	*Relationship between air consumption and power*	*Pulse turbocharging*	*Difference in fuel consumption between mechanical and exhaust superchargers.*	*Measures to improve acceleration*	*Cooling flow measurement techniques.*
S-7	SLO1	*Numerical problems-calculate air consumption and power*	*Diagram for determination of operating condition of a single stage turbocharger system.*	*Difference in fuel consumption between mechanical and exhaust superchargers.*	*Measures to improve torque characteristics of exhaust turbocharged engines.*	*Cooling system inspection, trouble diagnosis & service.*
	SLO2	*Numerical problems- calculate air consumption and power*	*Diagram for determination of operating condition of a single stage turbocharger system.*	*Effect of cooling the charge air.*	*Measures to improve torque characteristics of exhaust turbocharged engines.*	*Radiator field failures. Introduction to EGR (exhaust gas recirculation) coolers*
S-8	SLO1	*Volumetric efficiency of supercharged four stroke engines.*	*Examples of computed results*	*Effect of cooling the charge air.*	*Altitude de-rating*	*its significance in reduction of vehicle emissions.*
	SLO2	*Numerical problems-calculate volumetric efficiency*	*Examples of computed results*	*Exhaust turbocharger as a means to increase efficiency*	*Altitude de-rating*	*Cycle test-I*
S-9	SLO1	*Computations of gas exchange process*	*Examples of computed results*	*Numerical problem-Exhaust turbocharger as a means to increase efficiency.*	*Effect of supercharging on exhaust emissions of SI engines*	*Cycle test-II*
	SLO2	*Computations of gas exchange process*	*Tutorials onsupercharging systems*	*Numerical problem-Exhaust turbocharger as a means to increase efficiency.*	*Effect of supercharging on exhaust emissions of CI engines*	*Surprise test*

Course Code	18AUE431T	Course Name	DESIGN OF AUTOMOTIVE THERMAL SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18AUC203T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Psychometric chart, Heat and Mass transfer data book, Refrigerant table		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand various thermal systems and its functions*
CLR-2 :	*Solve cooling load calculations and to select different types of fans.*
CLR-3 :	*Understand various types of compressors*
CLR-4 :	*Familiarize with the applications of different fluid systems.*
CLR-5 :	*Understand the concepts to design heat exchangers*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Understand the methodology of a thermal system.*	1	90	85	H	H	M	M	M	L	L	L	L	L	L	M	H	H	H
CLO-2 :	*Analyze a refrigeration problem to carryout necessary calculation*	1	90	85	H	M	M	M	M	L	M	L	M	L	L	H	M	M	M
CLO-3 :	*Identify different air compressor systems and its applications and able to calculate its efficiencies*	1	90	85	H	H	H	H	M	L	M	L	L	L	L	H	M	M	M
CLO-4 :	*List the basic components and analyze the working of fluid transport system*	2	90	85	H	M	H	H	H	L	L	L	L	L	L	M	M	H	M
CLO-5 :	*Able to identify parts of heat exchanger systems and design heat exchangers based on various criteria's*	2	90	85	H	M	H	H	M	L	M	L	L	L	L	H	M	M	H
CLO-6 :	*Apply the design concepts of automotive thermal systems*	2	90	85	H	H	H	H	H	L	L	L	L	L	L	H	H	H	H

Duration (hour)		6	10	10	10	9
S-1	SLO-1	*Introduction to Thermal Systems*	*Introduction to Automotive Air Conditioning*	*Introduction to Air Compressors*	*Introduction to Fluid Transport*	*Introduction to Heat Exchangers*
	SLO-2	*Introduction to Thermal Systems*	*Introduction to Automotive Air Conditioning*	*Introduction to Air Compressors*	*Introduction to Fluid Transport*	*Introduction to Heat Exchangers*
S-2	SLO-1	*System, boundary and surroundings, heat transfer, fluid flow*	*Psychrometric properties*	*Types and classification of compressors*	*Incompressibility and expansion of fluids*	*Functions of radiator, compressor*
	SLO-2	*System, boundary and surroundings, heat transfer, fluid flow*	*Psychrometric properties*	*Types and classification of compressors*	*Incompressibility and expansion of fluids*	*Functions of radiator, compressor*
S-3	SLO-1	*Heat engines – Functions, components, working*	*Use of psychrometric chart*	*Working principle*	*Transmission of forces through fluids, multiplication of forces Fluid power*	*Functions of condenser, evaporator, expansion valve*
	SLO-2	*Heat engines – Functions, components, working*	*Use of psychrometric chart*	*Working principle*	*Transmission of forces through fluids, multiplication of forces Fluid power*	*Functions of condenser, evaporator, expansion valve*
S-4	SLO-1	*Cooling , properties of coolant*	*Refrigerants – Types of refrigerants*	*Reciprocating compressors*	*Applications of fluid power – power brakes, power steering, shock absorber*	*Classification of heat exchangers – According to transfer process*
	SLO-2	*Cooling , properties of coolant*	*Refrigerants – Types of refrigerants*	*Reciprocating compressors*	*Applications of fluid power – power brakes, power steering, shock absorber*	*Classification of heat exchangers – According to transfer process*
S-5	SLO-1	*Coolant recirculation systems*	*Properties and Selection of refrigerants*	*Single and multistage compressors*	*Components of hydraulic and pneumatic systems*	*Number of fluids, surface compactness*
	SLO-2	*Coolant recirculation systems*	*Properties and Selection of refrigerants*	*Single and multistage compressors*	*Components of hydraulic and pneumatic systems*	*Number of fluids, surface compactness*
S-6	SLO-1	*Coolant lubrication systems*	*Factors affecting the air flow*	*Compressors - compression with and without clearance*	*Reservoir, pumps, strainers, filters, valve types, actuators, motors*	*Construction features, flow arrangements, heat transfer mechanisms.*
	SLO-2	*Coolant lubrication systems*	*Factors affecting the air flow*	*Compressors - compression with and without clearance*	*Reservoir, pumps, strainers, filters, valve types, actuators, motors*	*Construction features, flow arrangements, heat transfer mechanisms.*
S-7	SLO-1		*Types of fans*	*Calculations - volumetric, isothermal and isentropic efficiency*	*Accumulators, oil coolers, cooling fan, tubing, piping, hose*	*Selection and design of heat exchangers based on – Types, heat transfer rate*

	SLO-2		*Types of fans*	*Calculations - volumetric, isothermal and isentropic efficiency*	*Accumulators, oil coolers, cooling fan, tubing, piping, hose*	*Selection and design of heat exchangers based on – Types, heat transfer rate*
S-8	SLO-1		*Axial and Centrifugal fans*	*Rotary compressors*	*Fluid transport and power systems*	*Selection and design of heat exchangers based on – cost, pumping power*
	SLO-2		*Axial and Centrifugal fans*	*Rotary compressors*	*Fluid transport and power systems*	*Selection and design of heat exchangers based on – cost, pumping power*
S-9	SLO-1		*Load calculations*	*Comparison between reciprocating and rotary compressors*	*Applications of pneumatic and hydraulic systems*	*Selection and design of heat exchangers based on – size and weight materials*
	SLO-2		*Load calculations*	*Comparison between reciprocating and rotary compressors*	*Applications of pneumatic and hydraulic systems*	*Selection and design of heat exchangers based on – size and weight materials*
S-10	SLO-1		*Winter air conditioning*	*Comparison between centrifugal and axial compressors*	*Advantage and disadvantages of hydraulic systems*	
	SLO-2		*Winter air conditioning*	*Comparison between centrifugal and axial compressors*	*Advantage and disadvantages of hydraulic systems*

Course Code	18AUE433T	Course Name	AUTOMOTIVE EMISSION FORMATION AND CONTROLS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18AUC301J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn about SI engine emission formation*
CLR-2 :	*Provide an insight CI engine emission formation*
CLR-3 :	*Familiarize with the basics of noise pollution*
CLR-4 :	*Create insight on emission measuring instruments*
CLR-5 :	*Learn about noise and vibration measurement*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Comprehend the various emissions from SI engine and its control techniques*	1	80	75	M	M	M	H	H	L	L	M	M	H	H	M	H	H	M
CLO-2 :	*Match the emission reduction techniques from CI engine*	1	85	80	H	M	M	H	M	M	H	M	L	M	H	M	H	H	M
CLO-3 :	*Evaluate the noise pollution formation*	2	80	75	M	H	H	M	H	M	L	H	M	M	M	L	H	M	M
CLO-4 :	*Apply the knowledge on measuring emissions through instruments*	2	80	75	H	H	M	M	H	H	M	M	L	H	M	H	H	M	L
CLO-5 :	*Cognize the noise and vibration measurement*	1	85	80	M	H	H	M	H	M	L	H	M	H	M	L	H	M	L

		SI engine emission	CI engine emission	Noise Pollution	Emission Measurement	Noise measurement
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Emission formation in SI engines (CO, HC)*	*Emission formation in CI engines (HC, CO)*	*Basics of acoustics–fundamentals of sound – terminologies–*	*Principle of operation of emission measuring instruments used in SI and CI engines.*	*Vehicle noise measurement*
	SLO-2	*Emission formation in SI engines (CO, HC)*	*Emission formation in CI engines (HC, CO)*	*Noise cancellation– destructive & constructive interferences*	*Principle of operation of emission measuring instruments used in SI and CI engines.*	*Operational vibration analysis*
S-2	SLO-1	*Emission formation in SI engines (NOx).*	*Emission formation in CI engines (NOx, aldehydes)*	*Engine noise introduction–gasoline & diesel engine operation.*	*Measurement of CO2 and CO by NDIR*	*Experimental modal analysis – air leak test*
	SLO-2	*Emission formation in SI engines (NOx).*	*Emission formation in CI engines (NOx, aldehydes)*	*Exhaust noise characteristics –vehicle pass by noise – exhaust noise measurement standards*	*Measurement of CO2 and CO by NDIR*	*Experimental modal analysis – air leak test*
S-3	SLO-1	*Effect of design variables on emission formation in SI engines*	*Emission formation in CI engines (smoke and particulates)*	*Types of exhaust noises– pulsation noises– flow noises–booming noises*	*Hydrocarbon emission by FID*	*Thermal shock tests – thermal fatigue test*
	SLO-2	*Effect of design variables on emission formation in SI engines*	*Emission formation in CI engines (smoke and particulates)*	*Shell radiation noises–passive noise reduction techniques*	*Hydrocarbon emission by FID*	*Thermal shock tests – thermal fatigue test*
S-4	SLO-1	*Effect of operating variables on emission formation in SI engines*	*Effect of design variables on emission formation in CI engines*	*Types of mufflers –reflective–absorptive – hybrid mufflers –muffler design constrains*	*Chemiluminescentanalyser for NOx*	*Back pressure measurement test–hot end system*
	SLO-2	*Effect of operating variables on emission formation in SI engines*	*Effect of design variables on emission formation in CI engines*	*Muffler internal design–tri flow muffler –straight though muffler*	*Chemiluminescentanalyser for NOx*	*Back pressure measurement test–hot end system*
S-5	SLO-1	*Control techniques -Thermal reactor,*	*Effect of operating variables on emission formation in CI engines*	*Helmholtz resonator – internal resonators – baffle plates– perforations*	*Gas Chromatograph*	*Hot vibration test – cold vibration test*
	SLO-2	*Control techniques -Thermal reactor,*	*Effect of operating variables on emission formation in CI engines*	*shells –end plates–pipe diameters*	*Gas Chromatograph*	*flow noise measurement*
S-6	SLO-1	*Control techniques - exhaust gas recirculation*	*Control techniques, exhaust gas recirculation*	*Absorptive materials –development methodologies*	*Spot sampling*	*Salt spray test – condensate water noise test*
	SLO-2	*Control techniques - exhaust gas recirculation*	*Control techniques, exhaust gas recirculation*	*muffler performance parameters– sound transmission loss –insertion loss*	*Spot sampling*	*Salt spray test – condensate water noise test*

S-7	SLO-1	*Three way catalytic convertor*	*NOx selective catalytic reduction*	*Noise reduction–tail pipe noise level –back pressure –vehicle interior noise levels*	*Continuous indication type smoke meters (Bosch, AVL and Hartridge smoke meters)*	*Transmission loss measurement – shell stiffness measurement – glass wool endurance test*
	SLO-2	*Three way catalytic convertor*	*NOx selective catalytic reduction*	*Advanced muffler technologies–cat con integrated muffler*	*Continuous indication type smoke meters (Bosch, AVL and Hartridge smoke meters)*	*Transmission loss measurement – shell stiffness measurement – glass wool endurance test*
S-8	SLO-1	*Charcoal canister control for evaporative emission*	*Diesel oxidation catalyst catalytic convertor*	*Variable flow muffler –twin mufflers–active noise cancellation–sporty sound mufflers–sound engineering*	*Emission test procedures – FTP*	*Resonance frequency measurement – shell radiation noise measurement*
	SLO-2	*Charcoal canister control for evaporative emission*	*Diesel oxidation catalyst catalytic convertor*	*Off road – on road –non road muffler applications examples –manufacturing types & process*	*Emission test procedures – FTP*	*Resonance frequency measurement – shell radiation noise measurement*
S-9	SLO-1	*Positive crank case ventilation for blow by gas control*	*Diesel particulate filter*	*Roll and spot welding–lock seaming–double seaming –web forming–clinching–cold metal transfer*	*Euro and Bharat norms*	*Tail pipe noise measurement – water drainage ability test.*
	SLO-2	*Positive crank case ventilation for blow by gas control*	*NOx versus particulates –trade off*	*Hydro forming –piercing– stamping–muffler examples*	*Euro and Bharat norms*	*Tail pipe noise measurement – water drainage ability test.*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Evaluate the use of alcohol in SI and CI engine*
CLR-2 :	*Create insight on use of vegetable oil as fuel in CI engine*
CLR-3 :	*Evaluate the use of hydrogen as fuel in SI and CI engine*
CLR-4 :	*Analyze the other gaseous fuels utilization in SI and CI engine*
CLR-5 :	*Create insight on hybrid, solar and electric based vehicles*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Apply the knowledge of using alcohol as fuel*	1	90	85	H	L	L	M	M	H	H	L	L	M	L	H	H	M	L
CLO-2 :	*List the techniques employed to use vegetable oil in CI engine*	1	90	85	H	L	L	M	M	H	H	L	L	M	L	H	H	M	L
CLO-3 :	*Develop system for using hydrogen in engines*	2	90	85	H	M	M	M	H	H	H	L	M	M	L	H	H	M	M
CLO-4 :	*Understand the concepts of biogas, LPG and CNG as fuels in IC engines*	1	90	85	H	L	M	M	M	H	H	L	L	M	L	H	M	H	L
CLO-5 :	*Demonstrate the working of hybrid, solar and electric vehicles*	2	90	85	H	L	M	M	M	H	H	L	L	M	L	H	M	M	M

		Alcohol Fuels	Vegetable Oil	Hydrogen based fuels	Other Gaseous Fuels	Hybrid, solar and Electric vehicles
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Need for Alternate Fuel*	*Various vegetable oils and its properties*	*Hydrogen as fuel in IC engine, hydrogen properties*	*Biogas – Introduction, sources*	*Layout of Electric vehicles, Advantages and limitations*
	SLO-2	*Need for Alternate Fuel*	*Various vegetable oils and its properties*	*Hydrogen as fuel in IC engine, hydrogen properties*	*Biogas – Introduction, sources*	*Layout of Electric vehicles, Advantages and limitations*
S-2	SLO-1	*Properties of alcohol as IC engine fuel*	*Problems of using vegetable oil in CI engine and techniques to overcome*	*Hydrogen production and storage*	*Biogas production*	*System components, Electronic controlled system*
	SLO-2	*Properties of alcohol as IC engine fuel*	*Problems of using vegetable oil in CI engine and techniques to overcome*	*Hydrogen production and storage*	*Biogas production*	*System components, Electronic controlled system*
S-3	SLO-1	*Alcohol use in SI engine – Performance and emission*	*Trans-esterification – Reaction, Process optimization, fuel property variations*	*Problems associated with hydrogen as fuel and its solution*	*Factors affecting biogas production*	*High energy and power density batteries*
	SLO-2	*Alcohol use in SI engine – Performance and emission*	*Trans-esterification – Reaction, Process optimization, fuel property variations*	*Problems associated with hydrogen as fuel and its solution*	*Factors affecting biogas production*	*High energy and power density batteries*
S-4	SLO-1	*Gasohol, Flexible Fuel system, Reformed Alcohol*	*Blending – Diesel, ether based fuels*	*Different methods of using hydrogen in SI and CI engine*	*Biogas usage in CI and SI engine*	*Types of hybrid vehicles*
	SLO-2	*Gasohol, Flexible Fuel system, Reformed Alcohol*	*Blending – Diesel, ether based fuels*	*Different methods of using hydrogen in SI and CI engine*	*Biogas usage in CI and SI engine*	*Types of hybrid vehicles*
S-5	SLO-1	*Alcohol use in SI engine – Performance and emission*	*Fuel Preheating – electric based and waste exhaust heat , emulsification*	*Performance, emission and combustion characteristics*	*Properties of LPG and CNG as fuel in IC engine*	*Hybrid vehicle configuration*
	SLO-2	*Alcohol use in SI engine – Performance and emission*	*Fuel Preheating – electric based and waste exhaust heat , emulsification*	*Performance, emission and combustion characteristics*	*Properties of LPG and CNG as fuel in IC engine*	*Hybrid vehicle configuration*
S-6	SLO-1	*Dual fuel combustion*	*Waste to energy – Waste plastic and tires to fuel*	*Liquid hydrogen and metal hydrides for cars*	*Fuel metering system*	*Solar cell for energy collection*
	SLO-2	*Dual fuel combustion*	*Waste to energy – Waste plastic and tires to fuel*	*Liquid hydrogen and metal hydrides for cars*	*Fuel metering system*	*Solar cell for energy collection*

S-7	SLO-1	*Spark assisted diesel engine*	*Various techniques for conversion of waste solid to fuel*	*Fuel cell : Concept with hydrogen and methanol*	*Combustion characteristics*	*Storage batteries*
	SLO-2	*Spark assisted diesel engine*	*Various techniques for conversion of waste solid to fuel*	*Fuel cell : Concept with hydrogen and methanol*	*Combustion characteristics*	*Storage batteries*
S-8	SLO-1	*Surface ignition, ignition accelerators*	*Performance and emission comparison of vegetable oil and biodiesel*	*Power rating, performance and heat dissipation*	*Effect on performance and emission characteristics*	*Layout of solar powered vehicles*
	SLO-2	*Surface ignition, ignition accelerators*	*Performance and emission comparison of vegetable oil and biodiesel*	*Power rating, performance and heat dissipation*	*Effect on performance and emission characteristics*	*Layout of solar powered vehicles*
S-9	SLO-1	*Alcohol production techniques*	*First to fifth generation biofuels*	*Layout of fuel cell vehicle*	*LPG and CNG vehicle layout*	*Advantages and limitations*
	SLO-2	*Alcohol production techniques*	*First to fifth generation biofuels*	*Layout of fuel cell vehicle*	*LPG and CNG vehicle layout*	*Advantages and limitations*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Design the driveline systems and its components*
CLR-2 :	*Distinguish the design of various flywheel and clutches*
CLR-3 :	*Analyze the stresses and design various gears*
CLR-4 :	*Compare and design different gearboxes*
CLR-5 :	*Design the different braking systems and axles.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Identify the different types power transmission drives*	1,3	90	85	H	M	H	H	M	L	L	L	M	M	L	M	H	H	H
CLO-2 :	*Infer the design of various flywheel and clutches*	1,2	90	85	H	H	H	H	M	M	L	L	M	M	L	M	H	H	H
CLO-3 :	*Classify and design different gears used in transmission systems*	1,3	90	80	H	H	H	H	H	L	L	L	M	M	L	L	H	H	H
CLO-4 :	*Categorize and design different gearbox and shafts*	1,3	80	75	H	H	H	H	H	M	L	L	M	M	L	L	H	H	H
CLO-5 :	*Interpret the design of various braking systems and axles.*	1,4	90	85	H	H	H	H	M	L	L	L	M	M	L	M	H	H	H

Program Learning Outcomes (PLO)

		Design of flexible drives	Design of flywheel and clutches	Design of Spur gear and Helical gear	Design of Gearbox, Propeller shaft and joints	Design of Axles and brakes
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Fllexible drives-Introduction*	*Flywheel and governor*	*Gears-Introduction*	*Gear box, components, requirements,*	*Axles-Types, materials*
	SLO-2	*Comparison of flexible drives with rigid drives*	*flywheel materials*	*Gear terminology and gear trains*	*Gear matching*	*Design requirements of front axle*
S-2	SLO-1	*Belt drives types and construction*	*Torque analysis*	*Design of spur gear, Selection of material*	*Requirements to obtain optimum design*	*Loads on axles*
	SLO-2	*Geometrical relationship*	*Stresses in Solid disc flywheel*	*Beam strength for gear tooth*	*Ray diagram, geometric progression and standard step ratio*	*Design of front axle*
S-3	SLO-1	*Analysis of belt tensions*	*Rimmed flywheel*	*Permissible bending stress*	*Kinematic layout*	*Design of rear axle*
	SLO-2	*Condition for maximum power*	*Stresses in rimmed flywheel*	*Effective load on gear tooth*	*Design of sliding mesh gearbox*	*Solving problems*
S-4	SLO-1	*Pulley design for belt drives*	*Tutorial on flywheel design*	*Estimation of module based on beam strength*	*Design of gearbox*	*Brakes design*
	SLO-2	*Tutorial on belt drives*	*Design considerations of clutches*	*Wear strength of Spur gear*	*Solving problems*	*Energy equations*
S-5	SLO-1	*Introduction of chain drives*	*Torque Transmission Capacity, uniform pressure theory*	*Solving problems*	*Constant mesh gearbox*	*Design of Block brake with short shoe*
	SLO-2	*Advantages of chain drives over belt drives*	*Uniform wear theory*	*Solving problems*	*Speed reducer unit*	*Design of block brake with long shoe*
S-6	SLO-1	*Roller chains*	*Design of single plate clutch*	*Terminology of helical gears*	*Design of propeller shaft for bending and torsion*	*Solving problems*
	SLO-2	*Geometrical relationship*	*Design of multidisc clutch*	*Force analysis of helical gears*	*Design of propeller shaft for bending and torsion*	*Pivoted block brake with long shoes*
S-7	SLO-1	*Polygonal effect*	*Friction materials*	*Force analysis of helical gears*	*Design of propeller shaft for rigidity*	*Solving problems*
	SLO-2	*Power rating for roller chains*	*Design of Cone clutches*	*Beam strength of helical gears*	*Solving problems*	*Internal expanding brakes*
S-8	SLO-1	*Design of sprocket wheels*	*Solving problems*	*Effective load on gear tooth*	*Design of universal joints and CV joints*	*Band brakes design*
	SLO-2	*Design of chain drive*	*Design of centrifugal clutches*	*Wear strength of helical gear*	*Slip joint design*	*Disc brakes design*
S-9	SLO-1	*Chain lubrication*	*Energy equation for clutches*	*Estimation of module based on wear strength*	*Design of final drive and Differential*	*Thermal considerations*
	SLO-2	*Tutorial on chain drives*	*Thermal consideration in clutch design*	*Solving problems*	*Solving problems*	*Solving problems*

		Frames	Steering and brake system	Transmission	Suspensions	Wheels and their tires
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Study of loads Bending case*	*Introduction Steering mechanism*	*Manual Gearboxes - classification Mechanical efficiency*	*Introduction*	*Description Rim characteristics*
	SLO-2	*Torsion case Combined bending and torsion*	*Introduction Steering mechanism*	*Manual automobile gearboxes Manual gearboxes for industrial vehicles*	*Design of leaf Springs*	*Tire characteristics Wheel reference system*
S-2	SLO-1	*Lateral loading*	*Rack and pinion steering box*	*Shifting Mechanisms Internal shifting mechanisms*	*Design of Helical Springs*	*Tire operation On-road driving*
	SLO-2	*Fore and aft loading*	*Screw and sector steering box*	*Shifting Mechanisms External shifting mechanisms*	*Helical Springs in Series and Parallel and design of torsion bar*	*Off-road driving*
S-3	SLO-1	*Frame materials*	*Design Steering column*	*Start-Up Devices Friction clutch*	*Independent suspensions McPherson suspension*	*Rolling radius*
	SLO-2	*Design of frames Moment of inertia of rectangular section.*	*Design Steering column*	*Start-up devices for automatic gearboxes*	*McPherson suspensions for rear axle*	*Rolling radius*
S-4	SLO-1	*Moment of Inertia of a Hollow Rectangular Section.*	*Power steering*	*Synchronizers*	*Double wishbone suspension*	*Rolling resistance Effect of speed, material nature and structure, tread wear*
	SLO-2	*Moment of Inertia of a Hollow Rectangular Section.*	*Design and testing*	*Design criteria of Synchronizers*	*Virtual centres suspensions*	*Effect of operating temperature, inflation pressure and vertical load, tire size, road wheel sideslip angle*
S-5	SLO-1	*Moment of Inertia of a Circular Section*	*Braking system: Introduction*	*Differentials And Final Drives All wheel drive transfer boxes Outline of differential theory*	*Trailing arm suspensions- Semi-trailing arms suspension*	*Static Forces*
	SLO-2	*Moment of Inertia of a Circular Section*	*Car brakes*	*Types of self-locking differentials Differential effect on vehicle dynamics*	*Multilink suspensions*	*Static Forces*
S-6	SLO-1	*Moment of Inertia of Hollow Circular Section*	*Service and secondary systems*	*Shafts And Joints ,Propeller shafts Half shafts*	*Semi-independent suspensions*	*Longitudinal Force*
	SLO-2	*Moment of Inertia of Hollow Circular Section*	*Parking system, Disc brakes Drum brakes Control system components*	*Universal joints Constant speed joints*	*Twist beam suspension*	*Longitudinal Force*
S-7	SLO-1	*Chassis types, introduction -Ladder frames -Cruciform frames*	*Power brakes Vacuum power brake*	*Automatic Gearboxes*	*Rigid axle suspensions - Rigid axles with leaf springs*	*Cornering forces*
	SLO-2	*Torque tube backbone frames- Space frames-*	*Hydraulic power brake*	*Epi-cycloidal car gearboxes*	*Rigid guided axles*	*Interaction between longitudinal and side forces*

S-8	SLO-1	*Integral structures*	*Design and testing braking system mechanics*	*Car CVTs*	*Industrial vehicles suspensions - Pneumatic springs*	*Outline on dynamic behavior*
	SLO-2	*Underbody, Sub-frame, Industrial vehicle frames*	*Mechanical design*	*Car CVTs*	*Front suspension Rear suspensions*	*Outline on dynamic behavior*
S-9	SLO-1	*Structural tasks Structural design*	*Thermal design*	*Design and testing of Gears, Shafts Bearings*	*Design and testing*	*Testing of tires*
	SLO-2	*Structural testing*	*Thermal design*	*Lubricants, Housings and seals*	*Design and testing*	*Testing of tires*

Course Code	18AUE343T	Course Name	VEHICLE DESIGN DATA CHARACTERISTICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18AUC305T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire basic knowledge of the preliminary design concepts involved in designing of a vehicle.*
CLR-2 :	*Acquire the knowledge of Power requirement calculation of the vehicle*
CLR-3 :	*Inferring various characteristics of performance curves*
CLR-4 :	*Interpreting vehicle performance by various factors*
CLR-5 :	*Implementing appropriate gear requirements to meet performance of vehicle*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the basic design principles of vehicle*	1	85	70	H	M	H	H	H	L	M	M	H	M	L	M	H	H	H
CLO-2 :	*Able to draw the performance curves pertaining to vehicle motion*	2	80	75	H	H	H	H	H	L	H	L	H	M	L	L	H	H	H
CLO-3 :	*Familiarize functions of several variables pertaining to vehicular design.*	3	85	70	H	H	H	H	H	L	M	L	H	M	L	M	H	H	H
CLO-4 :	*Critiquing various design variables of engine components*	2	85	65	H	H	H	H	H	L	H	L	H	M	L	H	H	H	H
CLO-5 :	*Able to measure the vehicle performance by several methods*	2	85	75	H	H	H	H	H	L	M	L	H	M	L	H	H	H	H

Duration (hour)		Introduction to Basic Concepts in Vehicular Design	Resistance to Vehicle Motion	Performance Curves – I	Performance Curves – II	Gear Ratios calculations
		09	09	09	09	09
S-1	SLO-1	*Introduction of Designing a Vehicle*	*Calculation, of Air Resistances at Various Vehicle Speeds*	*Calculation of Torque for Different Vehicle Speeds*	*Connecting Rod Length to Crank Radius Ratio*	*Gear Ratios*
	SLO-2	*Assumptions to be Made in Designing a Vehicle*	*Tabulation and Plotting of Curves for Air Resistances at Various Vehicle Speeds*	*Tabulation and Plotting of Torque for Different Vehicle Speeds*	*Calculation of Connecting Rod Length to Crank Radius Ratio*	*Determination of Gear Ratios*
S-2	SLO-1	*Gross Vehicle Weight*	*Tutorial on air resistance*	*Tutorial on torque calculation*	*Calculation of piston velocity*	*Tutorial on gear ratios*
	SLO-2	*Range of Values for Gross Vehicle Weight*	*Calculation, of Rolling Resistances at Various Vehicle Speeds*	*Calculation of Mechanical Efficiency for Different Vehicle Speeds*	*Plotting of Piston Velocity*	*Determination of Acceleration*
S-3	SLO-1	*Tutorial on gross vehicle weight calculations*	*Tabulation and Plotting of Curves for Rolling Resistances at Various Vehicle Speeds*	*Tabulation and Plotting of Mechanical Efficiency for Different Vehicle Speeds*	*Calculation of acceleration*	*Problems on Acceleration*
	SLO-2	*Frontal Area calculations*	*Tutorial on rolling resistance*	*Tutorial on mechanical efficiency calculations*	*Plotting of Acceleration Against Crank Angle*	*Gradability*
S-4	SLO-1	*Range of Values for Frontal Area*	*Calculation of Driving Force*	*Interpolation of Pressure-Volume Diagram*	*Calculation of gas pressure*	*Gradability in Different Gears*
	SLO-2	*Tutorial on frontal area calculations*	*Plotting of Driving Force*	*Pressure-Volume Diagram at various stages*	*Plotting Gas Force, Against Crank Angle*	*Determination of Gradability*
S-5	SLO-1	*Range of Values for Maximum Speed*	*Power Requirement for Different Loads*	*Frictional Mean Effective Pressure*	*Inertial force*	*Problems on Gradability*
	SLO-2	*Range of Values for Maximum Speed*	*Power Requirement for Different Loads*	*Calculation of Frictional Mean Effective Pressure*	*Calculation of inertial force*	*Problems on Gradability*
S-6	SLO-1	*Calculation on maximum speed*	*Tutorial on power requirement for different loads*	*Tutorial on Frictional Mean Effective Pressure*	*Plotting of Inertia Force Against Crank Angle*	*Influence of Gear ratio and Gradability on vehicle performance*
	SLO-2	*Range of Values for Maximum Acceleration*	*Power Requirement for Acceleration*	*Engine Cubic Capacity*	*Resultant force*	*Range of values of gear ratios*
S-7	SLO-1	*Range of Values for Maximum Acceleration*	*Tutorial on power requirement for acceleration*	*Calculation of Engine Cubic Capacity*	*Calculation of resultant force*	*Range of values of Gradability*
	SLO-2	*Calculation on maximum acceleration*	*Tutorial on power requirement for acceleration*	*Typical problems on engine cubic capacity*	*Plotting of Resultant Force Against Crank Angle*	*Determination of vehicle performance parameters*

S-8	SLO-1	*Basics of Automobile Design*	*Maximum Power Calculation*	*Typical problems on engine cubic capacity*	*Turning Moment Against Crank Angle*	*Calculation of vehicle performance*
	SLO-2	*Basics of Automobile Design*	*Maximum Power Calculation*	*Comparison between various performance parameters*	*Calculation of Turning Moment Against Crank Angle*	*Calculation of vehicle performance*

		Introduction to Rapid Prototyping	Liquid Based Additive Manufacturing System	Solid Based Additive Manufacturing System	Powder Based Additive Manufacturing System	Additive Manufacturing Application And Case Studies
Duration (hour)		9	9	9	9	9
S-1	SLO-1 SLO-2	*Overview of subtraction and additive manufacturing History*	*Methods in liquid based process and material used for fabrication*	*Introduction to solid based additive Manufacturing system*	*Methods in powder based process*	*Design for additive manufacturing method and*
S-2	SLO-1	*Need-Classification of additive manufacturing*	*Stereo lithography Apparatus (SLA)-*	*Methods in solid based process and*	*and material used for fabrication*	*special materials*
	SLO-2	*Need-Classification of additive manufacturing*	*Principle, process,*	*material used for fabrication*	*Selective Laser Sintering*	*medical and bio-additive manufacturing*
S-3	SLO-1	*The cost and effects of design changes during conceptual modeling, detail*	*advantages, disadvantages and limitations*	*fused deposition modeling(FDM)- introduction*	*Principles of SLS–process*	*Customized implants and prosthesis: Design*
	SLO-2	*designing, prototyping,*	*Digital light processing -introduction*	*fused deposition modeling(FDM)- principle*	*Process, advantages and*	*and production*
S-4	SLO-1	*manufacturing and product release*	*Digital light processing principle*	*Process*	*Applications*	*Bio-Additive Manufacturing-*
	SLO-2	*Reverse Engineering*	*Process*	*Advantages and dis advantages*	*Selective Laser Melting*	*Computer Aided Tissue Engineering (CATE)*
S-5	SLO-1	*Bench marking*	*Advantages and dis advantages*	*Limitation Limitations*	*Principles of SLS process*	*Advantages and dis advantages*
	SLO-2	*3D scanning, 3D digitizing and Data fitting*	*Limitations*	*Multi jet modelling- Principle*	*Process, advantages and applications*	*Application of RP techniques in Automotive components-*
S-6	SLO-1	*CAD for RPT: CAD model preparation*	*Solid ground curing introduction*	*process, advantages,*	*Selective heat sintering*	*3D printed brake caliper*
	SLO-2	*Part Orientation and support generation*	*Solid ground curing principle*	*disadvantages and limitations*	*Laser Engineered Net Shaping (LENS) -,*	*3D printed food- need and*
S-7	SLO-1	*Model Slicing –Tool path Generation*	*Process*	*Laminated object modeling (LOM)- Principle, process,*	*Principle, process, advantages*	*its limitation*
	SLO-2	*Materials for Additive Manufacturing Technology*	*Advantages and dis advantages*	*advantages, disadvantages and limitations*	*disadvantages and limitations*	*zero-gravity 3D printer*

S-8	SLO-1	*And its classification based on materials*	*Limitations*		*Three Dimensional Printing - Principle, process,*	*Application of RP in Art and jewelry*
	SLO-2	*RPT and its role in modern manufacturing mechanical design*	*Continuous Liquid Interface Production*	*Electron-beam freeform fabrication*	*advantages and applications-*	*Challenges in implementation of RP techniques*
S-9	SLO-1	*-Economics of RP techniques*	*Shape deposition modelling*	*Case studies*	*Electron Beam Melting- Principle, process,*	*Case Studies*
	SLO-2		*Ballistic Particle Manufacturing(BPM)*		*advantages, disadvantages and limitations*

		Fundamentals of vibration and Modelling SDOF systems	Two degree of freedom systems and continuous systems	Modelling of Multi-DegreeofFreedom Systems	Vibration control	Vibration measurement and applications
Duration (hour)		9	9	9	9	9
S-1	SLO-1, SLO-2	*Concept of vibration*	*Two DOF*	*Multi Degree Freedom System*	*Introduction to vibration control*	*Transducers*
S-2	SLO-1	*Classification of vibration*	*Modelling of Two Degree of freedom systems*	*Modeling of Continuous Systems as Multi-degreeofFreedom Systems*	*Specification of Vibration Limits*	*Transducers types and applications*
	SLO-2	*Vibration analysis procedure and elements*	*Modelling of Two Degree of freedom systems*	*Influence Coefficients*	*Static and dynamic balancing*	*Vibration pickups*
S-3	SLO-1	*Harmonic and periodic motions, vibration terminology*	*Free Vibration Analysis of an Undamped System*	*stiffness coefficients*	*Balancing of Rotating Machines*	*Vibrometer*
	SLO-2	*Modelling of single degree of freedom systems*	*Free Vibration Analysis of dampedSystem*	*Flexibility and inertia influence coefficients*	*Field balancing*	*Accelerometer*
S-4	SLO-1	*Vibration model, Equation of motion-Natural Frequency*	*Equations of Motion for ForcedVibration*	*Flexibility Matrixand Stiffness Matrix*	*Whirling of Rotating Shafts*	*Velometer*
	SLO-2	*Energy method, Rayleigh method*	*Forced Vibration with HarmonicExcitation System*	*Flexibility Matrixand Stiffness Matrix*	*Critical Speeds, Stability Analysis*	*Phase Distortion*
S-5	SLO-1	*Principle of virtual work,*	*Forced Vibration with HarmonicExcitation System*	*Eigen Values and Eigen Vectors*	*Balancing of Reciprocating Engines*	*Frequency-Measuring Instruments*
	SLO-2	*Damping models.*	*Coordinate Couplings and Principal Coordinates*	*Eigen Values and Eigen Vectors*	*Control of Natural Frequencies*	*Vibration Exciters*
S-6	SLO-1	*Viscously damped free vibration*	*Vibration of continuous systems*	*Matrix Iteration Method*	*Vibration Isolation*	*Signal Analysis*
	SLO-2	*Special cases: oscillatory, non-oscillatory and critically damped motions.*	*Vibrating string*	*ApproximateMethods*	*Vibration Isolation methods*	*Dynamic Testing of Machines and Structures*
S-7	SLO-1	*Logarithmic decrement, Experimental determination of damping coefficient.*	*Longitudinal vibration of rods*	*Dunkerley, Rayleigh's, and Holzer Method*	*Vibration Absorbers*	*Experimental Modal Analysis*
	SLO-2	*Forced harmonic vibration, Magnification factor.*	*Torsional vibration of rods*	*Geared Systems*	*Dynamic vibration absorbers*	*Measurement of Mode Shapes*

S-8	SLO-1	*Rotor unbalance, Transmissibility*	*Vibration of suspension bridges*	*Eigen Values & Eigenvectors for large system of equations using sub space*	*torsional and pendulum type absorbers*	*Machine Condition Monitoring and Diagnosis*
	SLO-2	*Vibration Isolation*	*Euler equation for beams*	*Solving problems*	*Damped vibration absorbers*	*Machine Condition Monitoring and Diagnosis*
S-9	SLO-1	*Equivalent viscous damping, Sharpness of resonance.*	*Cycle test 2*	*Cycle test 2*	*Cycle test 3*	*Cycle test 3*
	SLO-2	*Cycle test 1*	*cycle test 2*	*cycle test 2*	*Cycle test 3*	*Cycle test 3*

Duration (hour)		9	9	9	9	9
S-1	SLO-1 SLO-2	*Unconstrained Optimization*	*Constrained Optimization*	*Advanced Optimization*	*Fuzzy logic and Neural networks*	*Static and Dynamic Applications*
S-2	SLO-1 SLO-2	*Classification of optimization problems*	*Optimization with equality constraints*	*Multi stage optimization – dynamic programming*	*Fuzzy Set Theory*	*Structural Design applications*
S-3	SLO-1 SLO-2	*General principles of optimization*	*Optimization with inequality constraints*	*Multi stage optimization –stochastic programming*	*Optimization of Fuzzy Systems*	*Design and optimization of shafts*
S-4	SLO-1 SLO-2	*Problem formulation*	*Introduction to Direct methods*	*Multi objective optimization*	*Computational Procedure and Numerical Results*	*Design and optimization of springs*
S-5	SLO-1 SLO-2	*Single variable optimization*	*Introduction to Indirect methods*	*Genetic algorithms*	*Demonstration of Fuzzy logic using Matlab*	*Introduction to Dynamic Applications*
S-6	SLO-1 SLO-2	*Multivariable optimization*	*Indirect methods using penalty functions*	*Simulated Annealing algorithm*	*Introduction to Neural networks*	*Optimum design of single, two degree of freedom systems*
S-7	SLO-1 SLO-2	*Techniques of unconstrained minimization*	*Indirect methods using Lagrange multipliers*	*Problems on Genetic algorithms and Simulated Annealing algorithm*	*Neural-Network-Based Optimization*	*Optimum design of vibration absorbers*
S-8	SLO-1 SLO-2	*Search methods*	*Geometric programming*	*Ant colony Optimization*	*Feedforward networks for Classification and Regression*	*Application of optimization in Mechanisms*
S-9	SLO-1 SLO-2	*Interpolation methods*	*Problems on Geometric programming*	*Particle Swarm Optimization*	*Demonstration of Neural network using Matlab*	*Optimum design of simple linkage mechanisms*

Course Code	18AUE442T	Course Name	MULTIBODY DYNAMICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18MAB202T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the basics of multibody systems*
CLR-2 :	*Analyze kinematic parameters of multibody systems using computational approach*
CLR-3 :	*Solve for dynamics of multibody systems using computational approach*
CLR-4 :	*Model simple mechanisms and write its constraint equations*
CLR-5 :	*Simulate planar and spatial mechanisms using standard MBD package*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*formulate a model and free body diagram of multibody systems*	1	80	70	H	H	H	H	L	L	L	M	L	M	L	H	H	M	M
CLO-2 :	*derive the equations of motion of a multibody system*	2	80	70	H	H	H	H	L	L	L	M	L	M	L	H	H	M	M
CLO-3 :	*incorporate constraints into a multibody system*	2	80	70	H	H	H	H	L	L	L	M	L	M	L	H	H	M	M
CLO-4 :	*simulate the motion of a multibody system with a computer*	3	90	80	H	H	H	H	H	L	L	M	L	M	L	H	H	M	M
CLO-5 :	*interpret and analyze the results of simulation*	3	90	80	H	H	H	H	H	L	L	M	L	M	L	H	H	M	M

		Multibody Systems Introduction	Kinemaic and Dynamic Analysis	Kinematics of Mechanical Systems	Constrained Kinematics	Applications to Simple Mechanisms
Duration (hour)		9	9	9	9	9
S-1	SLO-1 / SLO-2	*Classical approach*	*Position analysis*	*Mechanical joints*	*Kinematics of a point moving on a rigid body*	*Computer formulation of joint constraints*
S-2	SLO-1	*Emergence of computational dynamics*	*Velocity analysis*	*Constraint equation for planar joints*	*Constrained kinematics*	*Computer algorithm*
	SLO-2	*Rigid / flexible multibody systems*	*Acceleration analysis*	*Constraint equation for planar joints*	*Constrained kinematics*	*Computer algorithm*
S-3	SLO-1	*Degrees of freedom*	*Two DOF robot manipulator –kinematic analysis*	*Constraint equation for spatial joints*	*Absolute co-ordinates*	*Flowchart for kinematic analysis*
	SLO-2	*Constrained / unconstrained motion*	*Two DOF robot manipulator –kinematic analysis*	*Constraint equation for spatial joints*	*Driving co-ordinates*	*Flowchart for kinematic analysis*
S-4	SLO-1	*Mechanical joints overview*	*Classical Versus computational approach*	*Mobility criteria*	*Formulation of joint constraints*	*Kinematic modeling and analysis*
	SLO-2	*Prismatic joint*	*General purpose computer program*	*Numerical –slider crank mechanism*	*Ground constraints*	*Kinematic modeling and analysis*
S-5	SLO-1	*Revolute joint*	*Force analysis overview*	*Co-ordinate transformation*	*Revolute and prismatic joint*	*Application to slider crank mechanism*
	SLO-2	*Cylindrical joint*	*Inertia forces*	*Co-ordinate transformation*	*Application to two DOF system*	*Application to slider crank mechanism*
S-6	SLO-1	*Spherical joint*	*Joint forces*	*Rigid body displacement*	*Constraint equations for cams and followers*	*Prescribed rotation of crank shaft*
	SLO-2	*Higher pairs*	*External forces*	*Position equations*	*Constraint equations for gears*	*Prescribed rotation of slider bock*
S-7	SLO-1	*Cam and gear systems*	*Principle of virtual work*	*Velocity equations*	*Computational methods in kinematics*	*Constrained dynamics*
	SLO-2	*Four bar mechanism*	*Use of redundant system*	*Acceleration equations*	*Kinematically driven systems*	*Augmented formulation*
S-8	SLO-1	*Slider crank mechanism*	*Forward dynamics*	*Slider crank mechanism*	*Velocity analysis*	*Embedding technique*
	SLO-2	*Closed chain systems*	*Inverse dynamics*	*Offset slider crank mechanism*	*Computer implementation to simple four bar mechanism*	*Amalgamated formulation*
S-9	SLO-1	*Open chain systems*	*Planar dynamics*	*Singular configuration*	*Computer implementation to simple four bar mechanism*	*Open and closed chains*
	SLO-2	*Robotic manipulators*	*Spatial dynamics*	*Four bar mechanism*	*Numerical based on four bar mechanism*	*Open and closed chains*

Learning Resources	1. *Ahmed A Shabana., "Computational Dynamics ", third edition, Wiley & Sons* 2. *Fundamentals of multibody dynamics : theory and applications, first edition, FaridAmirouche*	3. *Kinematic and dynamic simulation of multibody systems, first edition Garcia De Jalon* 4. *Dynamics of multibody systems by Ahmed A Shabana, third edition*

Course Code	18AUE443T	Course Name	FINITE ELEMENT ANALYSIS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18MEC106T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Predict how a product reacts to real-world forces, vibration, heat, fluid flow, and other physical effects*
CLR-2 :	*Model any physical system in to a finite element model and solve for its field variables*
CLR-3 :	*Solve real world complex problems which cannot be solved by analytical methods*
CLR-4 :	*Practice few commercial standard packages in solving complex problems*
CLR-5 :	*Understand the basics of multibody systems*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Apply finite element technique to Engineering problems*	2	80	70	H	H	M	H	H	M	M	H	M	M	L	M	H	M	M
CLO-2 :	*Improve their ability in solving differential equations for real world problems*	2	70	60	H	H	H	M	H	M	M	H	M	M	L	M	H	M	M
CLO-3 :	*Equip themselves familiar with multi-domain phenomenon like thermo-structural problems*	1	80	70	M	H	H	H	H	M	M	H	M	M	L	M	H	M	M
CLO-4 :	*Familiarize themselves with the applications of finite element method & FEA packages*	3	90	90	M	H	H	M	H	M	M	H	M	M	L	M	H	M	M
CLO-5 :	*Solve kinematic and dynamic problems of multibody systems*	2	70	60	H	M	M	M	H	M	M	H	M	M	L	M	H	M	M

Duration (hour)		History and basics of FEA	One dimensional Problems	Two dimensional Problems	Multidomain Problems	Applications of FEA
		9	9	9	9	9
S-1	SLO-1	*Comparison Of FEA With Exact*	*Elements and node numbering*	*Two dimensional elements*	*Vibration analysis introduction*	*Introduction and basics*
	SLO-2	*Solutions*				
S-2	SLO-1	*Methods of engineering analysis*	*Global and local co-ordinates*	*Plane stress formulation*	*Vibration analysis introduction*	*Roll cage analysis*
	SLO-2	*Numerical methods*	*Natural co-ordinates*	*Plane strain formulation*	*Modal analysis of a structure*	*Roll cage analysis*
S-3	SLO-1	*Types of finite elements*	*Polynomial functions*	*CST element*	*Modal analysis of a structure*	*Rotor thermal analysis*
	SLO-2	*Displacement or shape function*	*Displacement function for 1D bar element*	*Shape function derivation for CST element*	*fluid flow problems*	*Rotor thermal analysis*
S-4	SLO-1	*Material behavior*	*General stiffness matrix derivation*	*Strain displacement matrix for CST element*	*fluid flow problems*	*Hub analysis*
	SLO-2	*Stiffness matrix*	*Stiffness matrix for 1D bar element*	*Stress strain matrix for CST element*	*fluid flow problems*	*Knuckle analysis*
S-5	SLO-1	*Steps involved in FEA –preprocessing and solution*	*Assembly of stiffness matrix*	*Stiffness matrix derivation for CST element*	*Heat transfer problems*	*Brake pedal analysis*
	SLO-2	*Post processing*	*Force vector*	*Temperature effects*	*Heat transfer problems*	*Brake pedal analysis*
S-6	SLO-1	*2D and 3D stress element*	*Spring element*	*LST element*	*Heat transfer problems*	*Bump analysis*
	SLO-2	*Strain-displacement relationships*	*Stiffness matrix for spring element*	*QST element*	*Heat transfer problems*	*Bump analysis*
S-7	SLO-1	*Discretization methods*	*Boundary conditions*	*Axi –symmetric formulation*	*Thermo structural analysis*	*Multbodydynamics applications*
	SLO-2	*Discretization process*	*Imposing boundary conditions to bar element*	*Isoparametric formulation*	*Thermo structural analysis*	*Forward and Inverse dynamics*
S-8	SLO-1	*Rayleigh ritz method*	*Beam element*	*Iso, sub. Super parametric element formulation*	*Thermo structural analysis*	*Planar dynamics*
	SLO-2	*Galerkin method*	*Stiffness matrix derivation of beam element*	*Four noded quadrilateral element*	*Thermo structural analysis*	*Spatial dynamics*
S-9	SLO-1	*Advantages and disadvantages of FEA*	*Truss element*	*1D heat conduction problems*	*Introduction to biomedical and MEMS applications*	*Application Of MBD Technique To Four-Bar Mechanisms*
	SLO-2	*Applications of FEA*	*Stiffness matrix for truss element*	*Derivation of stiffness matrix*	*Introduction to biomedical and MEMS applications*	*Application Of MBD Technique Slider Crank Mechanisms*

		Automotive Sensors	Automotive Actuators	Introduction To Op-Amp	Operational Amplifier Applications	Waveform Generators, A/D And D/A Convertors
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to sensors*	*Basics of actuators and its principles of operations.*	*Introduction – Signal conditioning operations.*	*Applications of operational amplifiers*	*Comparator introduction*
	SLO-2	*Variables to be measured for automotive Engine control applications*	*Variables to be controlled for automotive Engine control applications.*	*Basics of operational amplifier*	*Basics of Instrumentation amplifiers*	*Comparator Applications*
S-2	SLO-1	*Airflow Rate Sensor – Construction and operations*	*Pulse width Modulated signal*	*Ideal operational amplifier Introduction*	*Operational amplifier using diodes- Half wave*	*Regenerative Comparator Introduction*
	SLO-2	*Pressure Measurement – Strain Gauge and MAP sensor*	*H-bridge device for speed and direction control.*	*Ideal operational amplifier characteristics*	*Full wave rectifiers*	*Square Wave Generator*
S-3	SLO-1	*Engine Crank Position sensor - -Magnetic reluctance,*	*Electric motor actuator - DC motor, Brushless DC Motor*	*Operational amplifier- open and closed loop*	*Precision diodes*	*Astable Multivibrator*
	SLO-2	*Hall effect sensor Construction and Operation*	*Stepper Motor mechanism*	*Operational amplifier- Inverting, Non-Inverting amplifier.*	*Sample and Hold circuits*	*Monostable Multivibrator*
S-4	SLO-1	*Optical crank position Construction and Operation*	*Servomechanism*	*Voltage follower*	*Voltage to Current converters*	*Bistable Multivibrator*
	SLO-2	*Throttle angle sensor construction and operations.*	*Engine control actuators -Fuel injector*	*Differential amplifier*	*Current to Voltage converters*	*Introduction to Analog to Digital Converters*
S-5	SLO-1	*Temperature Sensor construction and operations and types.*	*Ignition coil operation*	*Difference mode gain*	*Applications of operational amplifiers as Adder*	*Types of Analog to Digital Converters*
	SLO-2	*Sensors for Engine feedback control - EGO sensor, EGO characteristics*	*EGR Actuator operation*	*Common mode gain*	*Applications of operational amplifiers as Subtractor*	*Direct Type ADC – Flash Type*
S-6	SLO-1	*White Band Lambda sensor*	*Electric actuators- Introduction.*	*Common Mode Rejection Ratio*	*Applications of operational amplifiers as Multiplier*	*Direct Type ADC – Successive approximation type*
	SLO-2	*Magnetostrictive principle and Knock sensor*	*Relays – Construction and Operation*	*Operation amplifier internal circuit*	*Applications of operational amplifiers as divider*	*Numerical Examples for ADC*

S-7	SLO-1	*Oil Pressure sensors*	*Reed switches - Construction and Operation*	*DC characteristics of operational amplifier*	*Applications of operational amplifiers as Differentiator*	*Basics of Digital to Analog Conversion Techniques*
	SLO-2	*Accelerometer construction and operations*	*Actuators applications*	*IC 741 internal circuit Introduction*	*Applications of operational amplifiers as Integrator*	*R-2R Ladder DAC*
S-8	SLO-1	*Gyro sensors construction and operations*	*Electric Power Assisted Steering*	*IC 741 Operations*	*Instrumentation amplifier application*	*Inverted R-2R Ladder DAC*
	SLO-2	*Inertial measurement unit*	*Rain sensing wipers*	*Filters – Introduction*	*Instrumentation amplifier application. Cont*	*Weighted Resistor type DAC*
S-9	SLO-1	*Sensors for climate control*	*Motorized seat position control*	*High pass and low pass Filter*	*Voltage comparator*	*Numerical Examples for weighted resistor*
	SLO-2	*Switches and Knobs*	*Power Window application*	*Band pass Filter*	*Peak detector*	*Numerical Examples for R-2R and Inverted R-2R*

CLO-1 :	*Understand the vehicle motion control and stabilization system*	*2*	*85*	*80*	*H*	*H*	*H*	*H*	*L*	*L*	*L*	*L*	*H*	*L*	*L*	*L*	*H*	*M*	*H*
CLO-2 :	*Know the importance of Driver assistance, security and warning system*	*2*	*85*	*80*	*H*	*H*	*H*	*M*	*L*	*L*	*L*	*H*	*H*	*L*	*L*	*L*	*H*	*M*	*H*
CLO-3 :	*Know the working of the compartment while moving of the vehicle, about the collapsible steering and tillable steering column, about the collision avoidance system, front and rearObject detection.*	*2*	*85*	*80*	*H*	*H*	*H*	*M*	*L*	*L*	*L*	*H*	*H*	*L*	*L*	*L*	*H*	*M*	*H*
CLO-4 :	*Understand the auxiliary systems of chassis.*	*2*	*85*	*80*	*H*	*M*	*H*	*H*	*L*	*L*	*L*	*L*	*H*	*L*	*L*	*L*	*H*	*M*	*H*
CLO-5 :	*Know the various types of safety aspects such as active and passive safety, the active safety components and the working passive safety components such as air bags, seat belts*	*2*	*85*	*80*	*H*	*H*	*H*	*H*	*L*	*L*	*L*	*H*	*H*	*L*	*L*	*L*	*H*	*M*	*H*

		Vehicle Motion Control and Stabilization System	Information, Security and Warning System	Comfort Systems	Chassis Auxiliary System	Safety System
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction*	*Vehicle integration*	*Heating, Ventilation*	*Needs for Auxiliary systems*	*Seat belt, Seat belt tightener system and importance.*
	SLO-2	*Introduction*	*Vehicle integration*	*Heating, Ventilation*	*Needs for Auxiliary systems*	*Seat belt, Seat belt tightener system and importance.*
S-2	SLO-1	*Antilock braking system,*	*And navigation system*	*And Air Conditioning Systems*	*Power Assisted Steering System*	*Collapsible Steering Column,*
	SLO-2	*Stability Control*	*Looking out sensors*	*Principles and working*	*Working principle*	*Air Bags Deployment System*
S-3	SLO-1	*Adaptive cruise control*	*And Looking in sensors,*	*Electronic Outside Rear View Mirror (OVRM)*	*Regenerative Braking System*	*Designing aspects of automotive bumpers*
	SLO-2	*Lane Keep Assist System*	*Intelligent vision system,*	*Rain Sensing Wiper System*	*Principle and operation*	*Designing aspects of automotive bumpers*
S-4	SLO-1	*CollisionWarning*	*Vehicle Integration system.*	*Environment Information System*	*Servo Brake*	*Materials for bumpers.*
	SLO-2	*avoidance system,*	*Global Positioning System.*	*Tilt Able Steering Wheel,*	*Servo Brake*	*Materials for bumpers.*
S-5	SLO-1	*Blind Spot Detection system,*	*Vehicle Navigation System.*	*Garage Door Opening System*	*Vehicle Retarders*	*Steering and mirroradjustment,*
	SLO-2	*Blind Spot Detection system,*	*Road Network*	*Automatic Climate Control*	*Electrical retarders*	*Frontal Object Detection*
S-6	SLO-1	*Driver alertness detection system*	*Onboard Diagnosis System*	*Adaptive Head Light*	*Hydrodynamic retarders*	*Rear Vehicle Object Detection System*
	SLO-2	*Driver alertness detection system*	*Immobilizer*	*Night Vision Assist,*	*Advantages of retarders*	*Anti-roll bar*
S-7	SLO-1	*Electronic Transmission Control System*	*Anti-Theft Alarm System*	*Traffic Jam Assist*	*Hydro Elastic Suspension System*	*Emergency Brake Assist,*
	SLO-2	*Working principle*	*Voice Warning System*	*Hill Start Assist*	*Hydro Elastic Suspension System*	*Emergency Response*
S-8	SLO-1	*Electronic Brake Force Distribution System*	*Keyless Entry System*	*Need for Active suspension*	*Rubber Suspension*	*Child Lock System*
	SLO-2	*Electronic Brake Force Distribution System*	*Central Locking System*	*Need for Active suspension*	*Pneumatic Suspension*	*Child Lock System*
S-9	SLO-1	*Tutorial*	*Tire Pressure Monitoring System*	*Construction of active suspension*	*Drive By Wire System*	*Central locking system*
	SLO-2	*Tutorial*	*Tire Pressure Monitoring System*	*Working of active suspension*	*Brake by wire*	*Central locking system*

Course Code	18AUE352T	Course Name	TWO AND THREE WHEELER TECHNOLOGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Impart knowledge on power plant and different systems in two wheelers*
CLR-2 :	*Know the arrangement of chassis in two wheelers and subsystems like transmission and suspension*
CLR-3 :	*Identify different brakes used in two wheelers and construction of wheels and tires*
CLR-4 :	*Understand Servicing, maintenance and troubleshooting techniques particularly for two wheelers*
CLR-5 :	*Gain knowledge on different types of three wheelers, pickup and delivery vans arrangements*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Classify the different power plants and systems arrangement of petrol and electric vehicles*	*1,2*	*90*	*85*	*H*	*M*	*H*	*H*	*H*	*M*	*M*	*L*	*M*	*M*	*L*	*M*	*H*	*H*	*H*
CLO-2 :	*Distinguish chassis and transmission systems arrangements in two wheelers*	*1,2*	*90*	*85*	*H*	*M*	*H*	*H*	*H*	*L*	*L*	*L*	*M*	*M*	*L*	*M*	*H*	*H*	*H*
CLO-3 :	*Classify different brakes and tires used in two wheelers and their applications*	*1,2*	*90*	*80*	*H*	*M*	*H*	*H*	*H*	*L*	*L*	*L*	*M*	*M*	*L*	*L*	*H*	*H*	*H*
CLO-4 :	*Gain knowledge on different servicing and troubleshooting techniques and case studies of two wheelers*	*1,2*	*80*	*75*	*H*	*H*	*H*	*H*	*H*	*L*	*L*	*L*	*M*	*M*	*L*	*L*	*H*	*H*	*H*
CLO-5 :	*Infer different types of three wheeler arrangements for different applications and case studies on recent models*	*1,2*	*90*	*85*	*H*	*H*	*H*	*H*	*M*	*L*	*L*	*L*	*M*	*M*	*L*	*M*	*H*	*H*	*H*

		Power plant	Chassis and sub systems	Brakes and wheels	Servicing, Maintenance, Trouble Shooting and Case Study of Major Indian Models	Three wheelers
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Power plant components*	*Chassis and sub systems-components*	*Brakes-introduction*	*Servicing-Introduction*	*Three wheelers-types*
	SLO-2	*Two stroke and four stroke SI engines - merits and demerits*	*Types of main frames.*	*Braking systems*	*Service procedure for two wheelers*	*Case study of Indian models*
S-2	SLO-1	*Symmetrical and unsymmetrical port timing diagram*	*Drive from engine to rear wheel*	*Drum brakes-principle, construction and working*	*Service procedure for two wheelers*	*Case study of Indian models*
	SLO-2	*Valve timing diagram.*	*chain drive – shaft drive*	*Disc brakes-principle, construction and working*	*Petrol engine tune up*	*Front engine auto rickshaws*
S-3	SLO-1	*Types of scavenging processes – merits and demerits.*	*Clutch requirements*	*Brake links layout – for front wheels – for rear wheels*	*Petrol engine tune up*	*Front engine auto rickshaws*
	SLO-2	*Scavenging efficiency, scavenging pumps*	*Single plate – multiple plates – centrifugal clutch.*	*Brake adjustment*	*Petrol engine tune up*	*Rear engine auto rickshaws*
S-4	SLO-1	*Fuel systems*	*Transmission (gear box)*	*Need of ABS for two wheelers*	*Preventive and scheduled maintenance in two wheelers*	*Rear engine auto rickshaws*
	SLO-2	*Carburetion, gasoline fuel injection systems. Lubrication systems.*	*gear controls and gear change mechanism*	*Single channel and dual channel ABS*	*Preventive and scheduled maintenance in two wheelers*	*Pickup vans*
S-5	SLO-1	*Ignition system – magneto coil spark ignition system*	*CVT for two wheelers*	*Wheels*	*Troubleshooting and maintenance of two-wheeler transmission*	*Delivery vans*
	SLO-2	*battery coil spark ignition system, electronic ignition system*	*Suspension*	*spokes wheel – cast wheel – disc wheel*	*Troubleshooting and maintenance of two-wheeler transmission*	*Trailers*
S-6	SLO-1	*Starting systems*	*Suspension – for front wheels*	*Tires*	*Troubleshooting of brakes and wheels*	*frames and transmission*
	SLO-2	*Kick starter and electrical systems.*	*Suspension – for rear wheels*	*Tire construction*	*Troubleshooting of brakes and wheels*	*frames and transmission*
S-7	SLO-1	*Electric scooter power plant*	*Telescopic and gas charged suspension*	*Tube and tubeless tires*	*Servicing and case study of major Indian models*	*wheel types*
	SLO-2	*Different types of batteries for electric scooters*	*Shock absorbers*	*Radial ply and cross ply tires*	*Servicing and case study of major Indian models*	*wheel mountings attachment*

S-8	SLO-1	*Different traction motors*	*Panel meters and controls on handle bar*	*Tubes – vulcanizing.*	*Case study of Electric scooters*	*Tyre types.*
	SLO-2	*Different traction motors*	*Panel meters and controls on handle bar*	*Tire requirements of electric vehicles*	*Case study of Electric scooters*	*Brake systems.*
S-9	SLO-1	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*
	SLO-2	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*	*Tutorial*

		Vehicle performance estimation and prediction	Engine performance diagnosis	Vehicle Transmission and control system performance	Operational performance	Vehicle Testing
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Estimate the aerodynamic drag of road vehicles*	*List the reasons for engine leakage*	*Identify the causes of clutch slippage and drag*	*Restate the engine performance parameters*	*Review the fundamentals of acoustics*
	SLO-2	*List the methods of estimation of resistance to vehicle motion*	*Discuss the cylinder leakage test*	*Identify the causes of clutch vibration*	*Discuss the operating characteristics of engines*	*Discuss the human response to sound*
S-2	SLO-1	*List the parameters involved in calculating power required for propulsion*	*Determine and locate the sources of engine noise*	*Recall the working of automatic transmission systems*	*Study the operation of engine at full load conditions*	*Explain the testing procedure for vehicle power*
	SLO-2	*Calculate the power required for propulsion*	*Suggest the methods of reducing noise from the various sources*	*Analyze the performance of automatic transmission systems*	*Study the operation of engine at part load conditions*	*Explain the testing procedure for evaluating fuel consumption*
S-3	SLO-1	*Analyze the power plant characteristics of vehicles*	*Interpret engine oil issues that affect engine performance*	*Analyze the performance of bands*	*Recall the various parameters influencing fuel economy*	*Explain the head light alignment testing*
	SLO-2	*Compare the power plant characteristics with the requirements of transmission system of vehicles*	*Analyze the effect of temperature and its measurement on engine performance*	*Analyze the performance of transmission fluids*	*Predict the influence of various parameters influencing fuel economy*	*Explain the light intensity testing*
S-4	SLO-1	*Study about the various vehicle controls*	*Identify the symptoms of cooling system failure*	*Describe the solenoid valve testing method*	*Recite the various conditions of vehicle running*	*Explain the road testing of vehicles*
	SLO-2	*Sketch the different arrangements in power train configuration*	*Diagnose the cooling system*	*Describe the diagnostic procedure for testing of driveline components*	*Discuss the effects of vehicle conditions on fuel economy*	*Classify and study the different test tracks for vehicle testing*
S-5	SLO-1	*Calculate the vehicle acceleration and maximum speed of vehicles*	*Identify the weak cylinder through power balance test*	*Categorize the various braking arrangements*	*Recall the various tyre and road conditions a vehicle is subjected to*	*Describe the initial inspection procedure in vehicle testing*
	SLO-2	*Estimate the grade ability performance of vehicles*	*Conduct compression test and identify the reasons for power loss*	*Analyze the performance and characteristics of braking systems*	*Predict the effect of various tyre and road conditions on fuel economy*	*Describe the PDI procedure in vehicle testing*
S-6	SLO-1	*List the various drive system of vehicles*	*Understand valve timing test*	*Predict the effect of weight transfer in vehicles*	*List the various traffic conditions*	*Explain the maximum speed estimation procedure*

	SLO-2	*Compare the various drive systems for vehicle requirements*	*Understand clearance test*	*Diagram the various steering system arrangements*	*Study the effect of various traffic conditions and driving habits on fuel economy*	*Explain the maximum acceleration estimation procedure*
S-7	SLO-1	*Study the hill climbing requirements*	*Estimate the intake system performance*	*Evaluate the performance of rigid suspension system*	*Recall the definition of turning circle radius of a vehicle*	*Quote the principles of brake testing of road vehicles*
	SLO-2	*Characterize the vehicle power requirements for hill climbing*	*Estimate the exhaust system performance*	*Analyze the characteristics of rigid suspension system*	*Formulate the turning circle radius test of a vehicle*	*Explain the procedure of brake testing of road vehicles*
S-8	SLO-1	*Define ride characteristics of vehicles*	*Estimate the boost pressure available from a turbocharger*	*Evaluate the performance of independent suspension system*	*Describe the testing of vehicles in a two-wheeler chassis dynamometer*	*Review the basic concepts of vehicle handling*
	SLO-2	*Study the ride characteristics of vehicles on different road surfaces*	*Analyze the effect of waste gate on boost pressure*	*Analyze the characteristics of independent suspension system*	*Evaluate the performance of vehicles in a two-wheeler chassis dynamometer*	*Evaluate the handling characteristics of vehicles on different road surfaces*
S-9	SLO-1	*Analyze the effect of pressure and temperature on power output*	*List the steps in no start diagnosis*	*Evaluate the performance of torsion bar, stabilize and radius bars*	*Describe the testing of vehicles in a four-wheeler chassis dynamometer*	*Review the basic concepts of side slip*
	SLO-2	*Analyze the effect of humidity on power output*	*Explain the scope testing of ignition systems*	*Analyze the characteristics of torsion bar, stabilize and radius bars*	*Evaluate the performance of vehicles in a four-wheeler chassis dynamometer*	*Explain the side slip determination method*

		Overview of tyre technology	Applications of Pneumatic Tyres	Mechanics of Pneumatic Tyres	Tyre Analysis	Tyre Measurement Techniques
Duration (hours)		9	9	9	9	9
S-1	SLO1 / SLO2	*Types-Diagonal- belted bias- radial bias*	*Bicycle Tyres*	*Tyre Axis system*	*Tyre Load Capacity*	*Tyre component Profilometer-Thickness control*
S-2	SLO1	*Industry Standards*	*Two Wheeler – Castoring Trail for Motor cycle*	*Rolling Resistance – Variation of Rolling resistance coeffiecient of bias ply and radial ply tyres with speed*	*TRA Formula , Basic Formula*	*On roll profile thickness measurement*
	SLO2	*Tyre components – Radial Tyre*	*Two Wheeler – Internal heat generation*	*Rolling Resistance – variation with surface textures*	*Constant, Pressure exponent, Section Diameter.*	*On roll profile thickness measurement*
S-3	SLO1	*Tyre Design Process*	*Passenger Car Tyres – Tyre ground Contact area*	*Rolling Resistance – Effect of Tyre diameter*	*Deflection Analysis:*	*Dimension control – length measurement*
	SLO2	*Tyre Design Process*	*Passenger Car Tyres – contact area shape*	*Rolling Resistance – Effect of Tractive and Braking effort*	*Deflection Analysis:*	*Dimension Control – Width measurement*
S-4	SLO1	*Tyre performance criteria outdoor test – Wear rate, Irregular wear*	*Passenger Car Tyres – distribution of ground contact Pressure*	*Tractive Effort and Longitudinal Slip - Behaviour of Tyre under driving torque*	*Deflection Analysis:*	*Tyre piece weight measurement*
	SLO2	*Tyre performance criteria outdoor test - Handling Dry,Wet and Snow*	*Passenger Car Tyres - deflation – effects of run – flat*	*Tractive Effort and Longitudinal Slip - Variation of Tractive effort with longitudinal Slip*	*Deflection Analysis:*	*Tyre colour inspection*
S-5	SLO1	*Tyre performance criteria outdoor test - Ride comfort*	*Truck Tyres Design*	*Tractive Effort and Longitudinal Slip - Behaviour of Tyre under braking torque*	*Sliding Abraration, Tyre Stiffness and Tyre wear*	*Tyre Geometry inspection*
	SLO2	*Tyre performance criteria outdoor test – Noise, Drift/Pull*	*Truck Tyres Design*	*Tractive Effort and Longitudinal Slip - Variation of braking effort with longitudinal Slip*	*Sliding Abraration, Tyre Stiffness and Tyre wear*	*Tyre Geometry Inspection*
S-6	SLO1	*Tyre performance criteria indoor test – High speed*	*Truck Tyres – Tread patterns*	*Cornering Properties - slip angle and cornering force*	*Sliding Abraration, Tyre Stiffness and Tyre wear*	*Tyre Mark Inspection*
	SLO2	*Tyre performance criteria indoor test – Endurance*	*Truck Tyres – Tread patterns*	*Cornering Properties - cornering characteristics of bias and radial ply tyres for cars and trucks*	*Sliding Abraration, Tyre Stiffness and Tyre wear*	*Retrofit- Tyre Geometry line*
S-7	SLO1	*Tyre performance criteria indoor test –Rolling resistance Vs Inflation*	*Truck Tyres – Tread compounds*	*Cornering Properties - Self aligning torque*	*Failure Analysis: Structural Failures*	*Retrofit- Tyre Uniformity line*
	SLO2	*Tyre performance criteria indoor test –Rolling resistance Vs Inflation*	*Truck Tyres – Tread Compounds*	*Cornering Properties – Variation of Self aligning torque with slip angle for bias and radial ply tyres*	*Failure Analysis: Structural Failures*	*Retrofit – Tyre balancing line*

S-8	SLO1	*Technical Test- Force and Moment Properties, Resistitvity, Uniformity*	*Tyres for Agricultural and Earth Movers*	*Cornering Properties – Camber and Camber Thrust*	*Failure Analysis: In service failure modes*	*Non Destructive Testing Methods*
	SLO2	*Technical Test-Flat spotting, Traction*	*Tyres for Agricultural and Earth Movers*	*Cornering Properties – Variation of Camber thrust with normal load and camber angle for car tyres*	*Failure Analysis: In service failure modes*	*X-ray Examination*
S-9	SLO1	*Tyre Manufacturing Process – Compound Preparation, Extrusion process*	*Tyres for Military Vehicle*	*Models for Cornering Behavior of tires - Stretched String model*	*Tyre durability, Servicing, maintenance and safety*	*Shearography*
	SLO2	*Tyre Assembly and Curing*	*Tyres for Military Vehicle*	*Models for Cornering Behavior of tires - Beam on Elastic foundation model*	*Tyre durability, Servicing, maintenance and safety*	*Eddy Current*

Learning Resources	1. *US Department of Transportation., "The Pneumatic Tire",February 2006* 2. *Tom French, "Tyre Technology" Taylor and Francis 2007*	3. *J. Y. Wong, "Theory of Ground Vehicles", 4th Edition"2008* 4. *H. B. Pacejka "Tyre and vehicle dynamics", Second Edition 2006*

							3	0	0	3

Pre-requisite Courses	18AUC302J	Co-requisite Courses	18AUC401J	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide an insight on the problems imposed by racing, race car design and development strategies..*
CLR-2 :	*Understand the aerodynamic requirements in racing vehicles and the purpose of various aerodynamic devices.*
CLR-3 :	*Understand the behavior of a racing vehicle chassis at different conditions.*
CLR-4 :	*Gain knowledge about the concepts of various suspension characteristics of racing vehicles.*
CLR-5 :	*Understand the problems faced in drives and braking systems in motorsports.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Demonstrate their knowledge on the fundamentals of race car design and development.*	2	75	75	H	H	H	M	L	M	L	H	H	H	L	H	H	M	H
CLO-2 :	*Identify the aerodynamic requirements of a race car and characteristics of various aerodynamic devices.*	2	80	80	H	M	H	M	M	M	L	H	M	L	L	H	H	M	H
CLO-3 :	*Interpret the effects of various dynamic conditions on a race car chassis.*	2	80	80	H	H	H	M	L	M	L	H	M	L	L	H	H	M	H
CLO-4 :	*Compare and classify the different types of suspension systems used in racing.*	2	75	75	M	M	M	M	L	M	L	H	M	L	L	H	H	M	H
CLO-5 :	*Identify the appropriate drives and braking systems for the required racing applications.*	2	75	75	M	M	M	M	L	M	L	H	M	L	L	M	H	M	H

		Race Car Design and Development	Race Car Aerodynamics	Race Car Chassis	Race Car Suspension System	Race Car Drives And Braking Systems
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Problems Imposed By Racing*	*Aerodynamic Force And Moment, Race Car Drag Components*	*Conditions For Traversing A 90° Corner*	*Front Suspension- General Design Issues, Camber Effects.*	*Merits Of Front and Rear wheel drive in racing.*
	SLO-2	*Racing Objective*	*Drag Estimation and Drag Improvement*	*Principle Chassis Tuning Items*	*McPherson Struts, SLA Suspension.*	*Four-Wheel Drive In Racing.*
S-2	SLO-1	*"g-g" Diagram*	*Ground Effects in a race car*	*Effects Of High Speed Braking*	*SLA suspension geometry, Instant Axis Concept.*	*Differentials Used In Racing- Open Differentials, Locked (Spool) differentials.*
	SLO-2	*Road car vs race car "g-g" Diagram.*	*Ground Plane Simulation In Race Car Applications.*	*Effects Of High Speed Cornering*	*SLA Rear Suspension, Beam Axle Rear Suspensions, Decoupled Rear Axle Suspension*	*Limited Slip Differential*
S-3	SLO-1	*Constraints And Specifications – Performance and Handling*	*Spoilers, Dams, Wings*	*Effects of Combined Braking Cornering*	*F1 car suspension: Double wishbone and outboard spring*	*Traction Control And Other Electronic Improvements In Racing.*
	SLO-2	*Constraints And Specifications –Structure, weight distribution.*	*Effectiveness Of Wings In Steady State Cornering.*	*Steady State Cornering*	*Top rocker and inboard spring, pull-rod and inboard spring*	*Traction Control And Other Electronic Improvements In Racing.*
S-4	SLO-1	*Driver Accommodation And Safety.*	*High Lift Devices- Flaps And Slats.*	*Acceleration Out Of A Corner*	*Push rod and vertical coil spring, push rod and horizontal coil spring and damper*	*Mechanical Components In Braking System.*
	SLO-2	*Tire and adjustable features.*	*Flow Control Devices- Dams, Fences, Vanes, Skirts, Spoilers.*	*Straight Line Acceleration*	*Push rod and Vertical torsion bar with horizontal damper*	*Mechanical Components In Braking System.*
S-5	SLO-1	*Preliminary Design And Analysis.*	*Vortex Creating Devices- Ledges, Edge, Cusps, Lips.*	*Throttle Behaviour*	*Suspension Springs- Torsion Springs, Coil Springs*	*Limitations And Considerations Of Braking In Racing.*
	SLO-2	*Driver-Vehicle Relationship*	*Pressure Change Creation Devices- Perforations, Vents, Bleeds, Scoops, Seals.*	*Steering Wheel Force And Kick Back*	*Progressive Rate Coil Springs*	*Limitations And Considerations Of Braking In Racing.*
S-6	SLO-1	*Desirable Vehicle Characteristics.*	*Air-Foil Devices- Slats, Flaps, End Plates, Cuffs, Fillets, Trips.*	*Moving CG Position, Ballasts.*	*Installation Consideration*	*Brake Boost in racing*

	SLO-2	*Fundamentals Of Testing*	*Active Flow Control Devices- Internal Airflow, RAM Air Ducted Radiator, Air Entrance Scoop*	*Effect of engine weight reduction on longitudinal CG position.*	*Damping In Racing, Ride/Handling Compromise*	*Effects Of "g" Force On Brake Fluids*
S-7	SLO-1	*Track Test Program Planning*	*Full size wind tunnel testing*	*Roll Center Position Changing Anti-Pitch Geometry*	*Steering Activity, Transient Maneuvering*	*Brake Hydraulics*
	SLO-2	*Test Methodology*	*Full size wind tunnel testing*	*Chassis Steering Axis Geometry, Changing Camber*	*Bump Damping And Rebound Damping*	*Brake Ventilation*
S-8	SLO-1	*General Notes On Development*	*Case study: Chaparral wings*	*Chassis Ride Roll Characteristics*	*Racing damper schematic*	*Brake Distribution*
	SLO-2	*Circular Skid Pad Testing.*	*Case study: Performance benefits from the Chaparral wings.*	*Chassis Track Width , Chassis Ride Spring Rate, Tires And Rims*	*Case study: Penske four-way adjustable damper.*	*ABS In Racing*
S-9	SLO-1	*Case study- 1955 Mercedes W196 Grand Prix car.*	*Case study: Formula Benetton's pressurized, half-scale wind tunnel.*	*Adjusting Roll Stiffness*	*Lateral restraints- Pan hard bar, Watts's linkage.*	*Carbon-Carbon discs.*
	SLO-2	*Case study- 1998 Ferrari F300 Grand Prix car.*	*Case study: Moving ground plane Benetton's wind tunnel.*	*Roll Stiffness Distribution*	*Cam and follower in track, A-arms.*	*Case study: Ferrari F300 two-pedal arrangement for braking.*

		Basics of Vibration Analysis	Vibration Control Techniques	Noise Fundamentals	NVH Measurements	Automotive Noise Sources and Control Techniques
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic concepts*	*Transmissibility Ratio*	*Fundamental of acoustics*	*Vibration and Noise Standards*	*Engine noise- causes*
	SLO-2	*Formulating the equations of motion*	*Transmissibility ratio and its different cases*	*General sound propagation*	*Pass/Drive by noise-test site*	*Methods for control of engine noise-control measures-*
S-2	SLO-1	*Free undamped vibration*	*Vibration isolation*	*Structure borne sound& air borne sound*	*Pass/Drive by noise meteorological condition*	*Mufflers*
	SLO-2	*Free undamped vibration*	*Vibration isolation*	*Structure borne sound& air borne sound*	*Pass/Drive by noise meteorological condition*	*Mufflers*
S-3	SLO-1	*Free damped vibration*	*Tuned viscous dampers*	*Plane wave propagation - wave equation*	*Pass/Drive by noise-constant speed test-wide open throttle test*	*Transmission Noise- control methods*
	SLO-2	*Free damped vibration*	*Tuned viscous dampers*	*Specific acoustic impedance, acoustic intensity*	*Pass/Drive by noise-constant speed test-wide open throttle test*	*Transmission Noise- control methods*
S-4	SLO-1	*Logarithmic decrement*	*Tuned viscous dampers*	*Spherical wave propagation*	*Interior Noise test- standards – test track condition*	*Intake and exhaust noise – attenuation of intake and exhaust noise*
	SLO-2	*Graphical analysis of Logarithmic decrement*	*Tuned viscous dampers*	*Acoustic near and far fields*	*Interior Noise test- standards– vehicle operating condition*	*Intake and exhaust noise – attenuation of intake and exhaust noise*
S-5	SLO-1	*Forced Vibration*	*Untuned viscous dampers*	*The decibel scale, Summation of pure tones*	*Interior Noise test- standards steady speed – Full throttle test –stationery test*	*Control methods dissipative silencers – reactive silencers - resonators*
	SLO-2	*Magnification Factor*	*Untuned viscous dampers*	*Relationship among sound power, sound intensity and sound pressure level*	*Interior Noise test- standards-microphone positions*	*Aerodynamic Noise, its sources and control methods*
S-6	SLO-1	*Magnification Factor Different Cases*	*Untuned viscous dampers*	*Relationship among sound power, sound intensity and sound pressure level*	*Stationery vehicle test- standards*	*Tyre Noise, Brake noise and their control methods*
	SLO-2	*Magnification Factor Different Cases*	*Untuned viscous dampers*	*Relationship among sound power, sound intensity and sound pressure level*	*Stationery vehicle test- test site*	*Tyre Noise, Brake noise and their control methods*

S-7	SLO-1	*Torsional system characteristics and single disc*	*Damping treatments and its significance*	*Decibel addition, subtraction and averaging matrix from element stiffness*	*Stationery vehicle test- preparation of the vehicle*	*Noise control strategy, noise control at source*
	SLO-2	*Torsional system characteristics of two disc*	*Damping treatments and its significance*	*Decibel addition, subtraction and averaging matrix from element stiffness*	*Stationery vehicle test-vehicle operating condition*	*Noise control along the transmission path*
S-8	SLO-1	*Two degree of freedom systems under harmonic force, modal analysis.*	*Free layer damping*	*Anatomy of Human Ear,*	*NVH measurement tools and techniques*	*Barriers, enclosures*
	SLO-2	*Modal analysis.*	*Free layer damping*	*Anatomy of Human Ear,*	*NVH measurement tools and techniques-vibration and noise measurement transducers*	*Resonators*
S-9	SLO-1	*Coordinate coupling*	*Constrained Layer damping*	*Mechanism of hearing*	*Advanced acquisition techniques*	*Industrial noise control measures-*
	SLO-2	*Coordinate coupling*	*Constrained Layer damping*	*Mechanism of hearing*	*Advanced acquisition techniques*	*Green belt development*

		Trends in Automotive Power Plants	Suspension and Brakes	Emission And Noise Pollution Control	Vehicle Operation and Control	Vehicle Automated Tracks
Duration (hour)		9	9	9	9	9
S-1	SLO-1 SLO-2	*Introduction to power plant*	*Introduction to suspension systems*	*Sources of Pollution. Various emissions fro m Automobiles*	*Fundamentals of Automotive Electronics*	*Introduction automated tracks*
S-2	SLO-1	*Lean Burn Engines*	*Interconnected Air And Liquid Suspensions*	*Formation — Effects of pollutants on environment human beings.*	*Introduction to sensors, actuators, Processors*	*Road network*
	SLO-2	*Working principle of lean Burn engines*	*Hydro Elastic Suspension System*	*Emission control techniques*	*Introduction to sensors, actuators, Processors*	*Road network Preparation*
S-3	SLO-1	*Stratified Charged*	*Hydro Gas Suspension*	*Emission standards*	*Sensors : Position, speed,*	*Maintenance Of Proper Road Network*
	SLO-2	*Stratified Charged*	*Closed Loop Suspension*	*Engine Emissions, Types Of Catalytic Conversion-*	*Acceleration/Vibrational , Force/Torque, Flow me ters,*	*Traffic survey*
S-4	SLO-1	*Needs, advantages and dis advantages of Hydrogen Engines*	*Introduction to brakes*	*Charcoal Canister*	*Automotive Actuators*	*proposed road priority index*
	SLO-2	*Hydrogen Engines*	*Modern Rear Wheel Brake*	*CI engine emission and its control*	*Electromechanical actuators*	*Working principle*
S-5	SLO-1	*Need for Hybrid Vehicles*	*Self-Energizing Disc Brake*	*Formation — Smokes, NOx, soot, sulphur particulate*	*Fluid-mechanical actuators*	*Automated highway system*
	SLO-2	*Hybrid Vehicles working principle*	*Indirect Floating Caliper Disc Brake Brake Limiting Device,*	*Control Techniques-Fumigation, EGR, HCCI, Particulate Traps, SCR*	*Computer Control for pollution, noise and for fuel economy*	*Advantages and disadvantages*
S-6	SLO-1	*Concept of electric vehicles*	*Power–Assisted Braking System*	*Sources of Noise*	*Basics of networks*	*National Highway Network With Automated Roads And Vehicles*
	SLO-2	*Electric Propulsion With Cables*	*Power–Assisted Braking System*	*Engine Noise, Transmission Noise, vehicle*	*Examples of networked Vehicles - Bus system*	*National Highway Network With Automated Roads And Vehicles*
S-7	SLO-1	*Fuel cell introduction*	*Constructional Details Anti-Skid System*	*Structural Noise, aerodynamics noise*	*Introduction to Control area network in vehicle*	*Satellite Control Of Vehicle Operation For Safe And Fast Travel*
	SLO-2	*Fuel cell Vehicles*	*Anti-Skid System*	*Exhaust Noise. Noise reduction in Automo biles*	*Control area network in vehicle*	

S-8	SLO-1	Introduction about the Magnetic Track Vehicles	Regenerative Braking	Noise Control Techniques.	Electronic Fuel Injection	Intelligent transportation systems
	SLO-2		Working principle of Regenerative Braking	Silencer Design.		
S-9	SLO-1	Magnetic Track Vehicles.	Constructional Details. Active suspension	Noise Control Techniques.	Electronic Ignition system	Transducers and Operation Of The Vehicle Like Optimum Speed And Direction
	SLO-2

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Impart knowledge on basics of vehicle construction details and its effects.*
CLR-2 :	*Know the various safety concepts used in passenger cars.*
CLR-3 :	*Gain knowledge about various safety systems and its equipment.*
CLR-4 :	*Understand the concepts of vehicle ergonomics.*
CLR-5 :	*Interpret the various automotive comfort features.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Understand the fundamentals of design and construction of vehicle body.*	*1*	*80*	*75*	*H*	*L*	*L*	*M*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*H*	*H*	*L*	*L*
CLO-2 :	*Classify the various safety parameters such as interior and exterior safety concepts.*	*2*	*75*	*70*	*H*	*L*	*M*	*M*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*H*	*M*	*L*
CLO-3 :	*Understand the concepts of active and passive safety systems for real time application.*	*2*	*80*	*77*	*H*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*M*	*H*	*L*	*L*
CLO-4 :	*Implementing the vehicle ergonomics for enhancing the comfort level.*	*3*	*75*	*70*	*H*	*M*	*M*	*M*	*L*	*L*	*M*	*L*	*M*	*L*	*L*	*M*	*H*	*M*	*M*
CLO-5 :	*Describe the different types of comfort and convenience systems.*	*2*	*85*	*80*	*H*	*L*	*L*	*M*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*M*	*H*	*M*	*L*

		Design and Construction of Vehicle Body	Interior and Exterior Safety Concepts	Active and Passive Safety systems	Vehicle Ergonomics	Comfort and Convenience Systems
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction to design and construction of vehicle body*	*Safety concepts- Introduction*	*Introduction to safety systems*	*Introduction to human body*	*Comfort and Convenience Systems- Introduction*
	SLO-2	*Design of the body for Safety. Energy equations, Engine location*	*Active safety, Driving safety, Conditional safety*	*Seat belt, Automatic seat belt fastening system*	*Anthropometrics and its application to vehicle ergonomics*	*Cabin comfort - In-Car air conditioning – overall energy efficiency*
S-2	SLO-1	*Effects of deceleration inside passenger compartment*	*Perceptibility safety*	*Collapsible steering column*	*Cockpit design*	*Air Management, Central and unitary systems, Air flow circuits*
	SLO-2		*Operating safety*	*Tiltable steering wheel*		*Air Cleaning, Ventilation, Air space diffusion*
S-3	SLO-1	*Deceleration on impact with stationary and movable obstacle*	*Passive safety*	*Air bags*	*Driver comfort – seating, visibility*	*Compact heat exchanger design, Controls and Instrumentation*
	SLO-2		*Exterior Safety*	*Electronic systems for activating air bags*		*Compact heat exchanger design, controls and Instrumentation*
S-4	SLO-1	*Concept of crumble zone and safety sandwich construction*	*Interior Safety Systems*	*Frontal design for safety*	*Driver comfort – Seat pan, Back rest, Steering wheel, Head rest and mirrors*	*Steering and mirror adjustment*
	SLO-2			*Collision warning system*		*Central locking system*
S-5	SLO-1	*Active and passive safety*	*Deformation behaviour of vehicle body*	*Causes of rear end collision, frontal object detection*	*Man-Machine system*	*Garage Door Opening System, Tire Pressure Control System, Rain sensor System*
	SLO-2			*Rear vehicle object detection system*	*Psychological factors – stress, attention*	*Environment information System, Automotive lamps, Types, Design, Construction, performance*
S-6	SLO-1	*Characteristics of vehicle structures*	*Speed and acceleration characteristics of passenger compartment on impact*	*Object detection system with braking system interactions*	*Passenger comfort - Ingress and Egress*	*Light signalling devices- stop lamp*
	SLO-2				*Spaciousness*	*Rear position lamp, Direction indicator*
S-7	SLO-1	*Optimization of vehicle structures for crash worthiness*	*Pedestrian safety*	*Anti-lock braking system*	*Ventilation, Temperature control*	*Reverse lamp, Reflex reflector*
	SLO-2		*Human impact tolerance- Determination Of injury thresholds*		*Dust and fume prevention*	*Position lamp, Gas discharge lamp, LED*
S-8	SLO-1	*Types of crash / Roll over tests*	*Severity index, Study of comparative*	*ESP And EBD Systems*	*Interior features and conveniences*	*Adoptive Front Lighting System (AFLS)*

	SLO-2	*Regulatory requirements for crash testing*	*tolerance*	*Adaptive Cruise Control (ACC)*		*Daylight Running Lamps (DRL)*
S-9	SLO-1	*Instrumentation, High speed photography*	*Study of crash dummies*	*Navigation systems, traffic telematics*	*Placement of vehicle controls*	*Role of MCU in security and safety features*
	SLO-2	Image analysis.		*Infrared night vision system*	*Use of Modern technology for the same*	

Learning Resources	1. *Prasad, Priya and Belwafa Jamel, "Vehicles Crashworthiness and Occupant Protection", American Iron and Steel Institute, USA.* 2. *JullianHappian-Smith "An Introduction to Modern Vehicle Design" SAE, 2002*	3. *Bosch - "Automotive Handbook" - 10th edition - SAE publication - 2018.* 4. *"Recent development in Automotive Safety Technology", SAE International Publication. Editor: Daniel J Helt, 2013.* 5. *Keitz H.A.E. "Light Calculations and Measurements", Macmillan 1971.*

Learning Assessment

	Bloom's Level of Thinking	Continuous Learning Assessment (50% weightage)								Final Examination (50% weightage)	
		CLA – 1 (10%)		CLA – 2 (15%)		CLA – 3 (15%)		CLA – 4 (10%)#			
		Theory	Practice	Theory	Practice	Theory	Practice	Theory	Practice	Theory	Practice
Level 1	Remember Understand	*40 %*	-	*30 %*	-	*30 %*	-	*30 %*	-	*30%*	-
Level 2	Apply Analyze	*40 %*	-	*40 %*	-	*40 %*	-	*40 %*	-	*40%*	-
Level 3	Evaluate Create	*20 %*	-	*30 %*	-	*30 %*	-	*30 %*	-	*30%*	-
	Total	100 %		100 %		100 %		100 %		100 %	

CLA – 4 can be from any combination of these: Assignments, Seminars, Tech Talks, Mini-Projects, Case-Studies, Self-Study, MOOCs, Certifications, Conf. Paper etc.,

Course Code	18AUE453T	Course Name	VEHICLE MAINTENANCE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Learn how to maintain the various systems and components in an automobile*
CLR-2 :	*Effectively troubleshoot common problems in an automobile*
CLR-3 :	*Prevent premature failure of components and systems by audio-visual inspection*
CLR-4 :	*Ensure the safety of occupants by preventive maintenance*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand vehicle operation and maintenance principles*	3	90	90	H	H	M	H	H	M	M	L	H	L	L	H	H	H	H
CLO-2 :	*Understand and perform scheduled services*	3	90	90	H	H	M	H	H	M	M	H	H	H	H	H	H	H	H
CLO-3 :	*Handle situations where the vehicle is likely to fail*	3	90	90	H	H	M	M	H	M	M	H	H	H	M	H	H	L	M
CLO-4 :	*Understand maintenance procedures like repairing, overhauling etc.,*	3	90	90	H	H	M	H	H	M	M	L	H	L	H	H	H	H	H

		Maintenance of Workshop Records and Schedules	Powertrain Maintenance	Vehicle Chassis and Body Maintenance	Electrical System Maintenance	Maintenance of Auxiliary Systems
Duration (hour)		09	09	09	09	09
S-1	SLO-1 SLO-2	*Importance Of Maintenance, Scheduled And Unscheduled Maintenance*	*Dismantling Of Engine Components And Cleaning*	*Maintenance And Servicing Of Front Axle*	*Testing Methods For Checking Electrical Components*	*Servicing Of Fuel System Of Different Types Of Vehicles*
S-2	SLO-1	*Requirements Of Maintenance*	*Cleaning Methods*	*Maintenance And Servicing of Rear Axle*	*Checking of Battery*	*Maintenance Of Fuel System Of Different Types Of Vehicles*
	SLO-2	*Preparation Of Check Lists*	*Visual And Dimensional Inspections*	*Maintenance And Servicing of Suspension Systems*	*Checking of Starter Motor*	*Calibration And Tuning Of Engine For Optimum Fuel Supply*
S-3	SLO-1	*Vehicle Down Time*	*Minor And Major Reconditioning Of Various Components*	*Maintenance And Servicing of Braking Systems*	*Checking of Charging System*	*Maintenance of Cooling System*
	SLO-2	*Vehicle Inspection, Inspection Schedule*	*Reconditioning Methods*	*Overhauling of Steering Systems*	*Checking of, DC Generator*	*Water Pump, Radiator*
S-4	SLO-1	*Maintenance Of Records, Reports*	*Engine Assembly*	*Maintenance of Steering Systems*	*Checking of Alternator*	*Thermostat*
	SLO-2	*Log Books, Trip Sheets And Other Forms*	*Special Tools Used For Maintenance And Overhauling*	*Wheel Alignment*	*Checking of Ignition Systems*	*Anticorrosion And Antifreeze Additives*
S-5	SLO-1	*Safety Precautions In Maintenance*	*Engine Tune Up*	*Computerized Alignment*	*Checking of Lighting Systems*	*Maintenance of Lubrication System*
	SLO-2	*Fleet Maintenance Requirement*	*Layout of transmission system*	*Wheel Balancing*	*Fault Diagnosis Of Modern Electronic Controls*	*Different grades of oil*
S-6	SLO-1	*Work Shop Layout*	*Servicing And Maintenance Of Automobile Clutch*	*Troubleshooting Checklist For Front Axle*	*Maintenance Of Modern Electronic Controls*	*lubricant oil additives*
	SLO-2	*Tools And Equipment*	*Servicing And Maintenance Of Gear Box*	*Troubleshooting Checklist For Rear Axle*	*Checking Of Dash Board Instruments*	*Lubricating Oil Changing*
S-7	SLO-1	*Spare Parts And Lubricants Stocking*	*Servicing And Maintenance Of Propeller Shaft*	*Troubleshooting Checklist For Suspension Systems*	*Servicing Of Dash Board Instruments*	*Greasing Of Parts*
	SLO-2	*Manpower, Training*	*Servicing And Maintenance Of Differential System*	*Troubleshooting Checklist For Steering Systems*	*Trouble Shooting On Engine Management System*	*Minor And Major Repairs Of Body Parts*
S-8	SLO-1	*Workshop Management*	*Trouble Shooting Checklist For Engine*	*Body Panel Tools For Repairing*	*Multi-Scanner*	*Maintenance Of Door Locking Mechanism*
	SLO-2	*Warranty*	*Trouble Shooting Checklist For Clutch*	*Body Panel Tools for Tinkering And Painting*	*On Board Diagnosis Using Multi-Scanner*	*Maintenance Of Window Glass Actuating System*

S-9	SLO-1	*Replacement Policy*	*Trouble Shooting Checklist Gear Box*	*Case studies*	*Case-Studies*	*Case-Studies*
	SLO-2		*Case-Studies*			

Learning Resources	1. *John Doke, "Fleet Management", McGraw Hill Co. 1984* 2. *James D Halderman, "Advanced Engine Performance Diagnosis", PHI, 1998*	3. *Tim Gilles, "Automotive service", 5th edition, Delmar CENGAGE Learning, 2009.* 4. *Service manuals.*

Pre-requisite Courses	18AUC302J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Identify different types of vehicle body structures and their details*																		
CLR-2 :	*Know the details of bus bodies, classification and its regulations*																		
CLR-3 :	*Impart knowledge on the concept of car aerodynamics and testing of scale models*																		
CLR-4 :	*Classify different types of commercial vehicles and its types*																		
CLR-5 :	*Understand the various concepts of commercial vehicle aerodynamics*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understand the fundamentals of various automotive body construction details*	*1*	*80*	*75*	*H*	*L*	*L*	*M*	*L*	*L*	*L*	*L*	*M*	*L*	*L*	*M*	*H*	*L*	*M*
CLO-2 :	*Classify the various types of bus body construction and able to identify the body layout.*	*2*	*75*	*73*	*H*	*L*	*M*	*M*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*H*	*M*	*L*
CLO-3 :	*Understand the concepts of car aerodynamics in body engineering for better style and low drag.*	*1*	*80*	*78*	*H*	*H*	*L*	*L*	*L*	*L*	*M*	*L*	*M*	*L*	*L*	*M*	*H*	*L*	*L*
CLO-4 :	*Select a suitable body optimization technique to minimize drag and able to describe the wind tunnel testing procedure*	*2*	*75*	*73*	*H*	*L*	*M*	*M*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*H*	*M*	*L*
CLO-5 :	*Describe the different types of commercial vehicles and its design*	*2*	*85*	*80*	*H*	*L*	*H*	*H*	*L*	*L*	*M*	*L*	*L*	*L*	*L*	*M*	*H*	*L*	*L*
CLO-6 :	*Apply the concept of commercial vehicle aerodynamics for reducing the drag.*	*2*	*75*	*72*	*H*	*L*	*M*	*M*	*L*	*L*	*L*	*L*	*M*	*L*	*L*	*L*	*H*	*M*	*L*

Duration (hour)		Car Body Details	Bus Body Details	Car Aerodynamics	Commercial Vehicle Details	Commercial Vehicle Aerodynamics
		9	9	9	9	9
S-1	SLO-1	*History - Evolution of vehicle body, Importance of vehicle body*	*Introduction to bus bodies*	*Car Aerodynamics - Introduction*	*Commercial vehicles - Introduction*	*Commercial vehicle aerodynamics - Introduction*
	SLO-2	*Car Body Terminologies & types of car bodies*	*Bus body panels & terminologies*	*Importance of Aerodynamics*	*Classification of Commercial vehicle bodies*	*Importance of Commercial vehicle Aerodynamics*
S-2	SLO-1	*Visibility - Forward visibility*	*Classification of bus body*	*Types of Aerodynamic drag*	*LCV – Light commercial vehicles and its types – Pickups and delivery vans*	*Effects of rounding sharp front body edges*
	SLO-2	*Forward vision measurement and Regulations*	*Based on distance travelled by the vehicle*			
S-3	SLO-1	*Driver's Visibility, All round visibility of the vehicle – sensors and its functions*	*Based on capacity of the vehicle*	*Various Aerodynamic forces and moments*	*HCV - Heavy commercial vehicles and its types*	*Effects of various cabs on trailer body*
	SLO-2	*Methods of improving visibility*	*Based on shape and style of the vehicle*			
S-4	SLO-1	*Safety - factors influencing safety in traffic*	*Based on types of metal section used*	*Effect of Aerodynamic forces and moments*	*Dimensions of commercial vehicle driver's seat in relation to various controls*	*Fore body pressure distribution*
	SLO-2	*Classification - Active & Passive safety*	*Bus body regulations*			
S-5	SLO-1	*Active safety - Driving, Conditional, Perceptibility & Operational safety*	*Sequence of bus building operation*	*Various body optimization techniques for minimum drag*	*Constructional details of Tanker body*	*Effect of Cab to trailer body roof height*
	SLO-2	*Passive safety - Interior & Exterior safety*				
S-6	SLO-1	*Safety aspects in design - Bumper end, front end*	*Construction of conventional type of bus body*	*Wind tunnel technology - Principle & Construction details*	*Construction of Tipper body*	*Effects of a cab to trailer body gab seals*
	SLO-2	*Safety aspects in design - Rear end and importance of larger distance*			*Various tipping methods*	
S-7	SLO-1	*Passive Safety devices - Air bag*	*Construction of Integral type of bus body*	*Types of wind tunnels*	*Various Tipping mechanisms*	*Commercial vehicle drag reducing devices*
	SLO-2	*Telescopic/Collapsible Steering column*			*Flat platform and drop side body construction*	*Cab roof deflectors & Corner Vanes*
S-8	SLO-1	*Active Safety devices*	*Comparison of test results of integral and conventional bus.*	*Flow visualization techniques – Smoke method, Tuft method, Oil coating method*	*Segmental design of driver's cab*	*Vortex generators and Diffusers*
	SLO-2	*Modern Painting process of a passenger car body*				*Tractor and Trailer Skirting*

S-9	SLO-1	*Selection of paint and painting process*	*Frame Construction*	*Testing with wind tunnel balance (scale models)*	*Compactness of Driver's cab*	*Effect of Trailer load position on vehicle's drag resistance*
	SLO-2	*Corrosion and Anti corrosion methods*	Double Skin construction			

Learning Resources	1. *Pawloski J, " Vehicle Body Engineering" - Business Books Ltd.,* 2. *Wolf-Heinrich Hucho, "Aerodynamics of road vehicles", 4th edition, 2000.*	3. *John Fenton, "Vehicle Body layout and analysis", Mechanical Engineering Publication Ltd., 1984* 4. *Heinz Heisler, "Advanced Vehicle Technology", 2nd edition, Butterworth – Heinemann, 2002.*

		Introduction to Analog Circuits	Oscillators, Wave Shaping and Multi Vibrator Circuits	Digital Logic Gates and Minimization Techniques	Combinational Circuits	Sequential Circuits and Memory Devices
Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Introduction to Analog circuits*	*Oscillator Introduction*	*AND,OR Logic circuit implementation*	*Introduction to Combinational Circuit*	*Latches, Flip-flops –SR,JK,D,T characteristic table and Equation*
	SLO-2	*BJT Small signal Model*	*Analysis of LC oscillator*	*NOT Logic circuit implementation*	*Half Adder and Full Adder*	*Asynchronous Counters*
S-2	SLO-1	*CMOS Circuit Model*	*Active RC,RL Filters*	*NAND,NOR Logic circuit implementation*	*Half Subtractor and Full Subtractor*	*Synchronous Counters*
	SLO-2	*CMOS Circuit Model*	*RC,RL integrator*	*EXOR, EX-NOR Logic circuit implementation*	*Adder and Subtractor circuit example*	*Programmable Counters*
S 3-4	SLO-1 SLO-2	*Lab 1: basic Digital IC's AND,OR,EXOR,NOT,NOR,NAND*	*Lab 3: Combination Logic Adder, Subtractor*	*Lab 5: Realization of Encoder, Decoder*	*Lab 7: Op-Amp Linear Application :Adder, Subtractor*	*Lab 9: Op-Amp Nonlinear Application : Clipper, Clamper, Peak Detector*
S-5	SLO-1	*Biasing Circuits*	*Differentiator Circuits*	*TTL Logic*	*Carry look ahead adder*	*Registers overview*
	SLO-2	*Biasing Circuits*	*Diode-Clippers*	*CMOS Logic*	*Serial adder/Subtractor*	*Shift Registers*
S-6	SLO-1	*MOS amplifiers*	*Diode Clamper*	*Boolean Postulates*	*BCD addition*	*Universal Shift Register*
	SLO-2	*MOS amplifiers - types*	*Diode Comparator*	*Demorgan's Theorem*	*Multiplexer*	*Sequence Generator*
S 7-8	SLO-1 SLO-2	*Lab 2: Circuit realization of Flip-flops JK , RS , D*	*Lab 4: Circuit realization of Code Converter*	*Lab 6: Circuit realization of MUX,DEMUX*	*Lab 8: Op-Amp Linear Application : Comparator, Differentiator, Integrator*	*Lab 10: Filters Realization*
S-9	SLO-1	*Frequency response of amplifiers*	*UJT-Sawtooth Waveform Generator*	*Min term, Max term*	*Demultiplixer*	*Classification of Memories – RAM,ROM,PROM,EPROM,EEPROM*
	SLO-2	*Frequency response of amplifiers*	*Astable, MonostableMultivibrators*	*POS,SOP form*	*Decoder, Encoder*	*RAM,ROM Organization*
S-10	SLO-1	*Differential amplifiers*	*BistableMultivibrator*	*K-MAP*	*Parity Checker, Parity Generator*	*PLA VS PLD – Combinational Circuit implementation*
	SLO-2	*Differential amplifiers. Cont*	*Schmitt trigger circuits*	*Don't care conditions*	*Code Convertor*	*Introduction to FPGA*
S 11-12	SLO-1 SLO-2	*Lab: Assessment 1*	*Lab: Assessment 2*	*Lab: Assessment 3*	*Lab: Repeat class*	*Lab: Mini Project*

Course Code	18AEE311T	Course Name	PRINCIPLES OF LINEAR SYSTEMS AND SIGNALS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	18AEE211J	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand and classify the signals, their operations and the systems*
CLR-2 :	*Test and execute the continuous time system's response, stability in time domain.*
CLR-3 :	*Formulate and solve the continuous time system equations using Laplace transform.*
CLR-4 :	*Solve and examine the discrete time system using Z transform*
CLR-5 :	*Execute the Fourier series based representation of continuous time signal systems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Acquire the fundamentals of signal operation andbasics of system*	*1*	*90*	*85*	*H*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*L*	*M*	*H*	*M*	*L*
CLO-2 :	*Perform time domain analysis of a continuous time system with various inputs.*	*2*	*85*	*80*	*H*	*H*	*M*	*H*	*M*	*M*	*M*	*L*	*L*	*L*	*L*	*M*	*H*	*M*	*L*
CLO-3 :	*Analyse and examine the Continuous Time System in frequency domain using Laplace transform.*	*2,3*	*85*	*80*	*H*	*H*	*M*	*H*	*M*	*M*	*M*	*L*	*L*	*L*	*L*	*M*	*H*	*M*	*L*

CLO-5 :	*Know the fundamentals involved in continuous time signal analysis*	*2*	*85*	*80*	*H*	*H*	*M*	*H*	*M*	*M*	*M*	*L*	*L*	*L*	*L*	*M*	*H*	*M*	*L*

		Signals and Systems	Time Domain Analysis of Continuous Time Systems	Continuous Time System Analysis Using Laplace Transform	Discrete Time Analysis Using Z-Transform	Continuous Time Signal Analysis
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Size of a signal – Signal Energy*	*System response to internal condition– Zero input response*	*Laplace transform – Inverse Laplacetransform*	*Z-Transform introduction*	*Periodic signal representation by trigonometric Fourier series*
	SLO-2	*Size of a signal –Signal Power*	*System response to internal condition – Zero input response.*	*Properties of the Laplace transform – Time shifting*	*Finding inversetransform*	*Periodic signal representation by trigonometric Fourier series - The Fourier spectrum*
S-2	SLO-1	*Signal Operations –Time shifting, Time scaling*	*Unit Impulse response*	*Properties of the Laplace transform – frequency shifting*	*Properties of Z-transform*	*Periodic signal representation by trigonometric Fourier series - The Fourier spectrum.*
	SLO-2	*Signal Operations – Time reversal, combined operation*	*Impulse response.*	*Properties of the Laplace transform – time differentiation property*	*Z-transform solution of linear difference equations – Zero-state response of LTID system*	*Periodic signal representation by trigonometric Fourier series - Effect of symmetry*
S-3	SLO-1	*Classification of signals –Continuous-Time.*	*System response to external input – Zero state response*	*Properties of the Laplace transform – time integration property.*	*Z-transform solution of linear difference equations – Stability and Inversesystem*	*Periodic signal representation by trigonometric Fourier series - Determining the Fundamental Frequency and Period*
	SLO-2	*Classification of signals –Discrete-time signals*	*System response to external input – Zero state response.*	*Properties of the Laplace transform – Time convolution*	*Z-transform solution of linear difference equations – Stability and Inversesystem*	*Existences and Convergence of Fourier series*
S-4	SLO-1	*Classification of signals –Analog and Digital signals*	*System response to external input – Convolution integral*	*Properties of the Laplace transform – frequency convolution*	*System Realization*	*Existences and Convergence of Fourier series.*
	SLO-2	*Classification of signals –Periodic and Aperiodic signals,*	*System response to external input – Convolution integral*	*Solution of differential and integro - differential equation –Zero state response*	*System Realization.*	*Exponential Fourier series - Exponential Fourier spectra*
S-5	SLO-1	*Classification of signals - Energy and Power signals,*	*System response to external input – Interconnected systems*	*Solution of differential and integro - differential equation –Zero state response.*	*Frequency response of discrete time systems – Periodic nature of frequency response*	*Exponential Fourier series- Exponential Fourier spectra.*

	SLO-2	*Classification of signals –Deterministic and Randomsignals*	*System response to external input – Interconnected system.*	*Solution of differential and integro-differential equation – stability*	*Frequency response of discrete time systems – Periodic nature of frequency response.*	*Exponential Fourier series - Parseval's theorem*
S-6	SLO-1	*Excitation signals- Unit Step function*	*System stability –Internal Asymptoticstability*	*Solution of differential and integro - differential equation – Inverse system*	*Frequency response of discrete time systems – Aliasing andsampling rate*	*LTI System response to periodic inputs*
	SLO-2	*Excitation signals-Unit impulse function and Exponential function*	*System stability –Internal Asymptoticstability.*	*System Realization -Introduction*	*Frequency response of discrete time systems –Aliasing andsampling rate.*	*LTI System response to periodic inputs.*
S-7	SLO-1	*Even functions and Odd functions- Properties*	*Relationship between BIBO and asymptotic stability.*	*System realization - Direct Form I Realization*	*Frequency response from pole-zero location*	*Aperiodic signal representation by Fourier integral*
	SLO-2	*Classification of system – Linear and nonlinear systems,*	*Relationship between BIBO and asymptotic stability.*	*System realization - Direct Form II Realization*	*Frequency response from pole-zero Location.*	*Aperiodic signal representation by Fourier integral.*
S-8	SLO-1	*Classification of system –Time invariant, time varying*	*Dependence of system behavior on characteristics modes*	*Analysis of a simple feedback control system*	*Relationship between Laplace transform and z-transform*	*Relationship between the Fourier and Laplace transform*
	SLO-2	*Classification of system – Instantaneous and dynamic*	*Dependence of system behavior on characteristics modes.*	*Analysis of a simple feedback control system.*	*Relationship between Laplace transform and z-transform.*	*Relationship between the Fourier and Laplace transform.*
S-9	SLO-1	*Classification of system – causal and non-causal system*	*Response time of system –time constant, rise time*	*Frequency response of an LTIC System*	*Bilateral Z-transform -Introduction*	*Properties of Fourier transform*
	SLO-2	*Classification of system –Analog and Digital system*	*Response time of system –resonance Phenomenon.*	*Frequency response of an LTIC system.*	*Bilateral Z-transform -Properties*	*Properties of Fourier transform.*

		Driver and vehicle support systems - Introduction	Automotive Telematics	Automotive safety systems	Automotive comfort systems	Automotive security systems
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Driver information - navigation routing, integrated navigation*	*Global positioning system – Basics and working*	*Active and passive safety systems - Introduction*	*Adaptive cruise control system*	*Anti-theft technologies – mechanical, electromechanical*
	SLO-2	*Real-time traffic, traveller information*	*Geographical information systems - Data representations*	*Active and passive safety systems - Features*	*Active suspension system*	*Anti-theft technologies – Electronic immobilizers*
S-2	SLO-1	*Driver perception - vision enhancement, electronic mirror*	*Geographical information systems - Analysis and modeling*	*Airbag System - components*	*Aadjustable ORVMs*	*Alarm and warning system*
	SLO-2	*Parking and reversing aid, state of the road surface systems*	*geographical information systems – Applications*	*Airbag System - Working*	*Electrical Power assisted steering*	*Stolen vehicle tracking system*
S-3	SLO-1	*Driver convenience-driver identification, hands – free and remote control*	*Signpost navigation system*	*Seat belt tightening system- Block diagram*	*Collapsible and tiltable steering column*	*Remote keyless entry*
	SLO-2	*Driver convenience - automated transactions*	*Dead reckoning navigation system*	*seat belt tightening system- Working*	*Power windows*	*Smart card system*
S-4	SLO-1	*Driver monitoring - driver vigilance monitoring*	*Automotive vision system*	*Forward collision warning system- Block diagram*	*Adaptive lighting system*	*Number plate recoginition*
	SLO-2	*Driver health monitoring*	*Intelligent Speed Adaptation system*	*Forward collision warning system- Working*	*Electrically adjustable seats*	*Security antenna and transponders*
S-5	SLO-1	*General vehicle control - automatic stop and go*	*Fleet Tracking system*	*Child lock and anti-lock braking system- Block diagram*	*Rain sensing Wiper systems*	*Electronic ignition lock*
	SLO-2	*Vehicle Platooning*	*Voice based Turn-by-Turn system*	*Child lock and anti-lock braking system- Working*	*Reverse parking camera*	*Radio security system*
S-6	SLO-1	*Longitudinal control - road and lane departure collision avoidance*	*Smart-phone App Integration*	*Electronic Brake force Distribution system- Block diagram*	*Hands free Bluetooth*	*Fingerprint vehicle unlock*
	SLO-2	*Longitudinal control - road and lane departure collision avoidance Cont.*	*Automotive Collision Notification system*	*Electronic Brake force Distribution system- Working*	*Automatic Temperature control*	*GPS security systems*

S-7	SLO-1	*Lateral control - lane change and merge collision avoidance*	*Integrated theft recovery system*	*Electronic Stability Programme- Block diagram*	*Connected Mobility assistance and telematics*	*Speed governing systems*
	SLO-2	*Lane change and merge collision avoidance .Cont*	*Intelligent Speed Adaptation system*	*Electronic Stability Programme- Working*	*USB charging and navigation systems*	*Vehicle tracking systems*
S-8	SLO-1	*rear-end collision avoidance, \obstacle and pedestrian detection*	*Intelligent Speed Adaptation system .Cont*	*Traction control system - Block diagram*	*Intelligent windshield wipers*	*Anti-hijack system*
	SLO-2	*Intersection collision warning*	*Voice recognition cell phone dialing system*	*Traction control system - Working*	*Intelligent windshield wipers*	*Vehicle Immobilizer*
S-9	SLO-1	*Vehicle monitoring - tachograph*	*Voice recognition cell phone dialing system*	*Lane departure warning system- Block diagram*	*Adaptive climate control*	*Steering-wheel lock*
	SLO-2	*Vehicle monitoring - alerting systems, vehicle diagnostics*	*Emergency calling system*	*Lane departure warning system- Working*	*Adaptive climate control.*	*Vehicle GPS tracking*

		Introduction To Neural Networks	Neural Network Models and Application	Fuzzy Sets And Fuzzy Relations	Embedded Fuzzy Application	Hybrid Fuzzy-Neuro Systems And Hardware Implementation
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction to ANN*	*Neural Network-Feed Forward Application*	*Basic Concepts of Classical Sets*	*Introduction to conventional Control System*	*Introduction to Hybrid Systems*
	SLO-2	*Components of ANN-Connection, weights, biases*	*Neural Network-Back Propagation Network Application*	*Set Operation, Boolean Logic*	*Description, Design and Analysis*	*Fuzzy Neuron Overview*
S-2	SLO-1	*Structure of Neural Network*	*Layers In Neural Network-Single Layer*	*Basics of Fuzzy Sets*	*PID controller*	*Multilayer FNN architectures XOR Problem*
	SLO-2	*Structure of Neural Network.*	*Layers In Neural Network- Multilayer*	*Representation of Fuzzy Sets*	*Introduction to Fuzzy logic Controller (FLC)*	*Types of decision Region*
S-3	SLO-1	*Output of a Neuron*	*XOR Function and Linear Separability*	*Fuzzy Membership Function*	*Fuzzy logic Controller (FLC)-Description, Design*	*FNN Neuron Model*
	SLO-2	*Propagation functions, Learning Rules*	*XOR Function and Linear Separability.*	*Trapezoidal, Gaussian and Its Determination*	*Membership values, Rule table*	*Fuzzy ART, Fuzzy ARTMAP*
S-4	SLO-1	*Supervised and unsupervised learning*	*Threshold Functions-Sigmoid Function, Step Function*	*Fuzzy Set Properties, Operations*	*Membership values invented pendulum case study*	*Fuzzy ARTMAP- Incremental supervised Learning*
	SLO-2	*Reinforced Learning*	*Ramp Function And Linear Function*	*Logic Operation And Algebraic Operations.*	*Fuzzy logic Controller (FLC) – Knowledge base and Defuzzyification*	*Learning Normalized analog input patterns*
S-5	SLO-1	*Perception and Multilayer Perception*	*Function Approximation With Neural Networks*	*Classical Relations And Fuzzy Reasoning overview*	*Implementation of Antilock controller example*	*Neuro-Fuzzy systems*
	SLO-2	*Perception and Multilayer Perception.*	*Function Approximation With Neural Networks.*	*Fundamentals Of Fuzzy Relations*	*Fuzzy logic Controller (FLC) – Analysis with computer aided Tools*	*Neuro-Fuzzy applications*
S-6	SLO-1	*Feed forward Network and Hopfield Network.*	*System Identification With Neural Networks*	*Binary Fuzzy Relation operation*	*Fuzzy based antilock braking system overview*	*Neuro-Fuzzy systems Linguistic Fuzzy Model*
	SLO-2	*Introduction to Neural Network Models*	*Block Box Model Structure*	*Fuzzy Relations introduction*	*Fuzzy based antilock braking system.*	*Fuzzy Membership Fuzzy Rules, Fine-tune Fuzzy Rules*

S-7	SLO-1	*Neural Network Models –Adaline*	*Static Neural Network in system Identification*	*Types Of Fuzzy Relations*	*Performance and robustness of Fuzzy controller*	*Hardware Implementation –Analog Techniques*
	SLO-2	*Neural Network Models –Madaline*	*Dynamic Neural Network in system Identification*	*Membership Matrix*	*Self-Organizing Fuzzy controller*	*Hardware Implementation - Digital Techniques*
S-8	SLO-1	*Neural Network Models –Back propagation Network*	*Model Parameters estimation with Neural Network*	*Union and intersection of Fuzzy Relations*	*Fuzzy logic Controller for Automotive Embedded System applications.*	*Fuzzy Memory and OP-Amp based implementation of basic Neuron Model*
	SLO-2	*Radial basis function Neural Network*	*Control system and Neural Networks*	*Composition of Fuzzy Relations*	*Case study on Fuzzy logic Controller : Automatic Gearboxes*	*Fuzzy Memory and OP-Amp based implementation of basic Neuron Model.*
S-9	SLO-1	*Self-organizing, Recurrent Neural Network*	*Neural Networks in Predictive control*	*Fuzzy Reasoning- Fuzzy If-Then Rules*	*Case study on Fuzzy logic Controller : Four- wheel steering*	*Microcontroller Based Implementation of Fuzzy controller algorithm for automotive air conditioning Case study*
	SLO-2	*Convolution, Modular Neural Network*	*Model Reference Neural Controller*	*Fuzzy If-Then Rules.*	*Case study on Fuzzy logic Controller : Vehicle environment control*	*Microcontroller Based Implementation of Fuzzy controller algorithm for automotive air conditioning. Cont*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand concepts of modeling in 2D and 3D.*
CLR-2 :	*Gain knowledge on computer graphics and Simulation.*
CLR-3 :	*Understand CAD Packages for electronics and recent technologies.*
CLR-4 :	*Use concepts of Computer Graphics in Printed Circuit Boards and Packaging*
CLR-5 :	*Use relevant CAD Standards for Circuit Simulation*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Use and Relate the role of CAD in Electronics and board design.*	1	90	85	H	H	H	H	M	L	L	L	M	M	H	H	L	L	M
CLO-2 :	*Understand the basic Math fundamentals behind CAD software Graphics.*	2	90	85	H	H	H	H	H	M	M	L	H	M	L	M	M	H	M
CLO-3 :	*Design and Execute Circuits Boards Simulations*	2	85	80	H	H	H	H	H	L	M	M	H	M	H	H	H	H	H
CLO-4 :	*Design Models for Electronic Packaging using CAD*	2	85	80	H	H	H	H	H	M	M	H	H	H	M	H	M	H	M

		Introduction	Graphics Concepts and Algorithms	Analog Circuit simulation	CAD for Circuit and Component Analysis	CAD for Printed Circuits Boards and Packaging
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Design process – CAD*	*Introduction to computer Graphics*	*Introduction to simulation*	*Introduction to Circuits*	*Components of a CAD package and its highlights.*
	SLO-2	*Steps and design Process*	*Interactive graphics display*	*Purpose Of Simulation*	*DC Steady State analysis*	*Circuit design with CAD package.*
S-2	SLO-1	*Geometric Modeling Introduction*	*Display devices, Pixels*	*Simulation Examples*	*Simulation Example :Voltage regulator*	*Work layout and component layout*
	SLO-2	*Parametric Representation of Lines and curves*	*Algorithms in computer Graphics*	*Circuit Equation Modulation*	*AC Analysis*	*Process flow-chart.*
S-3	SLO-1	*Parametric Representation of synthetic curves*	*DDA Line Drawing Algorithms*	*Simulation of Modified Nodal analysis method*	*Simulation Example : Cascode amplifiers with Macro Models*	*Printing technologies for Printed Wiring Boards*
	SLO-2	*Geometric Modeling: Entities - Line - Circle - Ellipse - Parabola*	*Bresenham's Line Drawing algorithm*	*Modified Nodal analysis.*	*Cascode amplifiers with Macro Models*	*Semiconductor Packaging Overview*
S-4	SLO-1	*Geometric Modeling: Types – Wireframe modeling.*	*Bresenham's Circle Drawing algorithm*	*Active device Models overview*	*Simulation example : Transient analysis Phase Locked Loop circuit*	*Semiconductor Packages*
	SLO-2	*Geometric Modeling: Types - surface and solid modeling.*	*Point clipping algorithms*	*DC Circuit Simulation Overview*	*Process and device simulation Overview*	*Semiconductor Packages design case study*
S-5	SLO-1	*Solid modeling techniques Overview*	*Cohen Sutherland Line clipping algorithms*	*Newton's Method on DC analysis*	*Process simulation, diffusion, Oxidation, Ion implantation*	*Board-level packaging aspects*
	SLO-2	*Constructive Solid Geometry – Boolean set Operations, Sweep Representation*	*Hidden line removal algorithms*	*AC Circuit Simulation Overview*	*Simulation Example: NMOS Transistor*	*Board-level packaging aspects.*
S-6	SLO-1	*Constructive Solid Geometry – Quad tree Structure.*	*2D and 3D transformations*	*AC Circuit Simulation Example Program*	*Device simulation*	*Packaging Examples Case study*
	SLO-2	*Constructive Solid Geometry- Octree structure*	*Translation, rotation*	*Noise Simulation*	*NMOS IV Curves*	*CAD output files for PCB fabrication*
S-7	SLO-1	*Boundary Representation*	*Scaling – Concatenation.*	*Noise Simulation Example Program*	*Parameters Extraction for analog circuit simulation Overview*	*CAD output files Slandered file format*
	SLO-2	*Feature Based Modelling and Constraint Based Modelling*	*Homogeneous Transformation*	*Transient system Simulation*	*Device Characterization*	*Photo plotting and mask generation.*

S-8	SLO-1	*Parametric Modelling, Extrude, Sweep, Revolve*	*Translation and scaling*	*Verilog-A Overview*	*Least squares curve fitting*	*Photo Mask File Generation.*
	SLO-2	*Parametric Modelling Tools Cont*	*Refection and rotation*	*Verilog-A Example Program*	*Extraction and Optimization*	*Introduction to DFM, DFR , DFT*
S-9	SLO-1	*Feature Manipulation*	*Shear Transformation*	*Fast Simulation Methods*	*MOS DC models*	*DFM, DFR , DFT.*
	SLO-2	*CAD in Assembly and Drafting*	*Concatenated transformation - Inverse transformation*	*General Simulators Overview*	*MOS DC models.*	*Computer-Aided Analysis Application*

Course Code	18AEE316J	Course Name	AUTOMOTIVE MICROCONTROLLERS	Course Category	E	Professional Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	18AEE211J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire the knowledge of 8051 Microcontroller architecture*
CLR-2 :	*Program 8051 using Assembly level programming*
CLR-3 :	*Use the high level programming language for embedded application development*
CLR-4 :	*Get familiarized with the internals of AVR and program it using C language.*
CLR-5 :	*Learn about the special on-chip peripherals available on automotive grade Microcontrollers.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Perform the basic Operations of 8051 Microcontroller*	2	85	75	H	M	H	L	H	M	M	H	H	M	L	H	H	H	H
CLO-2 :	*Carry out basic Operations of 8051 Microcontroller.*	2	80	75	H	M	H	H	H	M	M	H	H	M	L	M	H	H	H
CLO-3 :	*Apply Embedded C Programming in Microcontroller.*	2	90	85	H	H	H	H	L	M	M	H	M	M	M	H	H	H	M
CLO-4 :	*Program ATMEGA328 Microcontroller using Embedded C*	2	85	80	H	M	H	H	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Identify and relate the various Microcontroller in automotive subsistence*	2	80	75	H	M	M	M	H	H	H	H	H	H	M	H	H	H	H

		8051 Architecture	Programming 8051	Introduction to Embedded C	Advanced Virtual Risc (AVR) Microcontrollers	Automotive Grade Processors
Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Introduction to Microprocessors and Microcontrollers and differences*	*Logical Operations-Bit level, Byte Level*	*Program Languages for Embedded system application*	*Introduction to ATMEGA328*	*Introduction to Automotive grade processors*
	SLO-2	*8051 Pin diagram and description*	*Internal RAM Bit address and SFR Bit address*	*Introduction to Higher level programming language*	*ATMEGA328 –Basic Features*	*Automotive grade processors ex: Renesas, Quorivva*
S-2	SLO-1	*8051 internal Architecture*	*Logical Operations-Rotate and swap Operation*	*Advantages of Higher level programming language*	*ATMEGA328 – Core SFR'S and Ports*	*Automotive grade processors : NXP, Infineon*
	SLO-2	*Clock, PC, DP, CPU registers,*	*Arithmetic Operations Incrementing, Decrementing*	*Basics of C program language – Data Types, variables*	*ATMEGA 328-Timer TMR0,TMR1,TMR2*	*Architectural attributes of Automotive grade processors Based on subsystems*
S 3-4	SLO-1	*Lab 1: 8051- Assembly level programming – Basic Arithmetic and logical operations*	*Lab 3: Introduction to Embedded C Programming and IDE-Tool chains - AVR-ATMEGA328 Operation on bits Blinking with Digital Outputs –Delay functions*	*Lab 5: ATMEGA328- Configuring on-chip ADC –Interfacing sensors*	*Lab 7: ATMEGA328- Programming Serial Communication with Interrupts Type1,Type 2*	*Lab 9: Implementing a moving average filter for sensor noise correction*
	SLO-2					
S-5	SLO-1	*Data memory Organization*	*Arithmetic Operations : Addition, Subtraction*	*Keywords, Pointers ,Declarations, Constants and Operators*	*ATMEGA 328-Capture Compare Module-*	*On-chip Peripherals overview*
	SLO-2	*PSW, RAM, ROM, SP, SFR*	*Jumps, Calls and Subroutines*	*Introduction to Datatype conversions*	*ATMEGA 328-CCM in PWM Mode*	*Special On-chip Peripherals for Body and chassis control applications*
S-6	SLO-1	*IO ports, Connecting External Memory, Counters, Timers*	*Interrupts and Return*	*Switch case and If Loop,For Loop and While Loop*	*ATMEGA 328-Interrupts Type1,Type 2*	*On-chip Peripherals for Engine and Power train control*
	SLO-2	*Serial Data Input / output, Interrupts*	*Expanding I/O overview*	*Arrays and pointers*	*ATMEGA 328- Interrupt Model, Interrupts vectors*	*Overview of Automotive communication protocols : CAN, LIN*
S	SLO-1	*Lab 2: 8051-Finding 2's complement of a number*	*Lab 4:ATMEGA328 –EEPROM*	*Lab 6: ATMEGA328-*	*Lab 8: ATMEGA328-Working with RTC and*	*Lab 10:Building an Automotive Embedded*

7-8	SLO-2		Programming	Programming Interrupts and Timers	I2C	application with ATMEGA328
S-11	SLO-1	Addressing Modes of 8051 Microcontroller Overview	Memory Mapped I/O	Functions and Structure	ATMEGA 328-Serial Communication Modules-I2C,SPI	Automotive communication protocols : Flex Ray, MOST
	SLO-2	Immediate and Register Addressing ModesDirect and Register indirect Addressing modes of 8051 Microcontroller	Timing Subroutine-Software and Hardware Delay	Embedded Programming Tool ,IDE with Simulator	ATMEGA 328-Serial Communication Basic Programs	Automotive communication protocols : Ethernet,D2B and DSI
S-10	SLO-1	External memory access of 8051 Microcontroller	Lookup table for 8051 PC,DPTR as Base address	Embedded C Compilers	Analog Modules –A/D converter,Comparator	Introduction to Real-time operating system – for task scheduling activities
	SLO-2	Timer and counter of 8051 Microcontroller	Serial Data Transmission-Polling and interrupt driven for transmission and reception	Data types and libraries in Embedded C	Clock Oscillator ,EEPROM	RTOS Classification - Hard Real-time and Soft Real time
S 11-12	SLO-1 SLO-2	Lab: Assessment 1	Lab: Assessment 2	Lab: Assessment 3	Lab: Review class	Lab: Mini Project

Duration (hour)		Introduction to Feedback Systems	Performance of Feedback Systems	Stability Analysis of Linear System	Frequency Response Analysis of Feedback Systems	Controller Design for Linear Feedback System
		12	12	12	12	12
S-1	SLO-1	*Introduction to Systems and its types*	*Introduction to time response analysis*	*Introduction to the Concept of Stability*	*Introduction to Frequency response*	*Introduction to controllers P,PI,PD,PID*
	SLO-2	*Examples of automotive feedback systems*	*Transient response and steady state response*	*Bounded-input, Bounded-output stability(BIBO)*	*Sinusoidal excitation and response to a system*	*Effect of Proportional, Integral and differentiator constants*
S-2	SLO-1	*ADAS, Engine Management system*	*Sensitivity of a feedback system*	*Routh –Hurwitz stability criterion*	*Introduction to Frequency response plots and performance specification*	*PID design for an automotive feedback system*
	SLO-2	*Linear Time invariant systems*	*Standard test inputs for feedback system analysis*	*Routh –Hurwitz stability - Basic Numerical Problems*	*Bode plot - constant gain*	*Frequency domain interpretation of PID controller*
S 3-4	SLO-1 SLO-2	*Lab 1:Introduction To Matlab Control System Tool Box, Simulink Tool Box*	*Lab 3: Simulation of cruise control example using Matlab Simulink*	*Lab 5: Stability analysis of Second Order UnityFeedback System using Matlab control system toolbox.*	*Lab 7: Determination Of Bode Plot Using Matlab Control System Toolbox for 2nd Order System & Obtain Controller Specification Parameters.*	*Lab 9: Implementantion of Proportional-Integral-Derivative (PID) controller using Matlab Control System Toolbox.*
S-5	SLO-1	*Parameter varying system and Nonlinear system*	*Transient response and steady state response - Numerical Problems*	*Routh – Hurwitz stability - Basic Numerical Problems Cont.*	*Bode plot - differentiator ,integrator and second order term*	*Frequency domain interpretation of PID controller*
	SLO-2	*Impulse response of a system and transfer function representation*	*Time response analysis of a first order prototyping system*	*Routh – Hurwitz stability in controller parameter selection*	*Phase Margin and Gain Margin fundamentals*	*PID Numerical Problems*
S-6	SLO-1	*Transfer function of a D.C motor*	*Time response analysis of First order prototyping system - Numerical Problems*	*Stability analysis of tracked vehicle turning control*	*Procedure to plot bode diagram – Gain margin,Phase margin and stability conditions*	*Lead compensator,Lag compensator*
	SLO-2	*Transfer function of Throttle position sensor, Velocity Sensor,Accelerometer Model*	*Time response analysis - Cruise control model*	*Stability analysis of tracked vehicle turning control Cont.*	*Bode Diagram - Numerical Problems*	*Lead Lag compensators Numerical Examples*
S	SLO-1	*Lab 1: Transfer Function -*	*Lab 4:Simulation of suspension system*	*Lab 6: Determination Of Root Locus Plot*	*Lab 8: Determination Of Nyquist Plot Using*	*Lab 10: Designing Compensators using*

7-8	SLO-2	*DC Motor Speed control Simulink Modeling,*	*System in Matlab Simulink*	*And Controller Specifications Using Matlab Control SystemToolbox*	*Matlab Control System Toolbox.*	*Matlab Simulink*
S-9	SLO-1	*Introduction to Block diagram algebra*	*Time response analysis of second order prototyping system*	*The Root locus procedure for stability analysis*	*.Polar Plot - Overview*	*Design of phase lead and phase lag compensation*
	SLO-2	*Block diagram algebra Numerical examples*	*Time response analysis of second order prototyping system - Numerical Problems*	*Root locus Analysis - Basic Problems*	*.Polar Plot - Numerical Problems*	*Time domain and frequency domain interpretation of design of phase lead and phase lag compensation*
S-10	SLO-1	*Introduction to Signal Flow Graph*	*Complex Plane root location and transient response*	*Root locus Analysis of speed control system*	*Nyquistcriterin for non-minimum phase system*	*Notch Filter*
	SLO-2	*Signal Flow Graph numerical problems*	*Steady state error of feedback control system - Numerical Problems*	*Controller design using root locus for a closed loop control system-Numerical Example*	*Nyquistcriterin for non-minimum phase system*	*Notch Filter Numerical Problems*
S 11-12	SLO-1 SLO-2	*Lab: Assessment 1*	*Lab: Assessment 2*	*Lab: Assessment 3*	*Lab: Review class*	*Lab: Mini Project*

							3	0	0	3

Pre-requisite Courses	18AEE211J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Define and understand the power semiconductor components and its characteristics*
CLR-2 :	*Distinguish and demonstrate the different DC-DC and AC-AC converters topology*
CLR-3 :	*Interpret and relate the operation, characteristics and performance parameters of rectifiers*
CLR-4 :	*Compare and contrast the operation, switching techniques for various types of DC-AC inverters*
CLR-5 :	*Design and develop the motor drives for automotive motor control applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*List and recognize the various power semiconductor devices suitable for motor drive applications*	*1*	*90*	*85*	*H*	*M*	*M*	*M*	*L*	*L*	*L*	*L*	*M*	*M*	*L*	*M*	*H*	*M*	*M*
CLO-2 :	*Identify and solve the DC-DC and AC-AC converters suitable for the desired requirements*	*2*	*90*	*85*	*H*	*H*	*M*	*H*	*M*	*M*	*M*	*L*	*M*	*L*	*M*	*H*	*H*	*H*	*M*

Course Code	18AEE412T	Course Name	STATE SPACE ANALYSIS AND DIGITAL CONTROL SYSTEM	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	18AEE317J	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Define and understand the basics of discrete systems and digital control*
CLR-2 :	*Design and implement digital controllers for discrete time models*
CLR-3 :	*Formulate state space models for dynamics system*
CLR-4 :	*Acquire the fundamentals of pole placement design and state observers*
CLR-5 :	*Explore the techniques involved in optimal control design*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*List and recognize the various discrete systems and digital control*	1	90	85	H	M	M	M	L	L	L	L	M	M	L	M	H	M	M
CLO-2 :	*Identify and solve the various digital controllers for discrete time models*	2	90	85	H	H	M	H	M	M	M	L	M	L	M	H	H	H	M
CLO-3 :	*Experiment on the various state space models for dynamics systems*	2	85	80	H	H	M	H	M	M	M	L	M	L	M	H	H	H	M
CLO-4 :	*Relate and use the pole placement design and state observers*	2	85	80	H	H	M	H	M	M	M	L	M	L	M	H	H	H	M
CLO-5 :	*Investigate and implement the optimal control design*	3	85	80	H	H	H	H	M	H	H	M	M	M	M	H	H	H	H

		Signal Processing in Digital Control	Models of Digital Control Systems and Algorithm	Control System Analysis With State Variable Methods	Pole Placement Design and State Observers	Lyapunov Stability Analysis and Optimal Control
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction Signal Processing*	*Introduction to Z transform*	*Introduction to state space analysis*	*State feedback Overview*	*Basic stability definitions*
	SLO-2	*Control system terminologies*	*Z domain specification*	*State variable representation of system*	*Stability improvement by state feedback*	*Theorems on stability*
S-2	SLO-1	*Classical approach to analog controller design*	*Z-domain description of sampled continuous time plant*	*State variable representation.*	*Introduction to Pole Placement*	*Sign definiteness of functions and matrices*
	SLO-2	*Classical approach to analog controller design. Cont*	*Z-domain description of sampled continuous time plant. Cont*	*State space analysis of systems overview*	*Necessary and sufficient conditions for arbitrary pole-placement*	*Lyapunov Stability Theorems for linear and nonlinear systems*
S-3	SLO-1	*Introduction to digital control system*	*Implementation of Digital controllers*	*State space analysis of systems. Cont*	*Voltage Source Inverters-Single phase inverters*	*Lyapunov's first or indirect method*
	SLO-2	*Configuration of basic digital control system scheme*	*PI,PD,PID controllers*	*Conversion of transfer function to state variable model*	*State regulator design*	*Lyapunov's second or direct method*
S-4	SLO-1	*Basic discrete time signals*	*Tunable PID controller*	*Transfer function to state variable model numerical Examples*	*State regulator design.*	*Lyapunov function candidate and Matrix Equation*
	SLO-2	*Time domain models of discrete time system*	*Tunable PID Speed Control problem*	*Transfer function to state variable model numerical Examples. Cont*	*State observers*	*Parameter Optimization*
S-5	SLO-1	*Transfer function Overview*	*Conversion of Canonical state variable to transfer function model*	*Conversion of Canonical state variable to transfer function model*	*Design of state observers*	*Optimal control examples*
	SLO-2	*Transfer function Models*	*Digital temperature control*	*Conversion of Canonical state variable to transfer function model Numerical Examples*	*State observers for linear systems*	*Performance indices*
S-6	SLO-1	*Transfer function Models.*	*Concepts of controllability*	*State observers for linear systems*	*State observers for non- linear systems*	*Quadratic Performance index*
	SLO-2	*Introduction to Stability analysis*	*Z-plane specification for control system design*	*State observers for linear systems Examples*	*State observers examples.*	*Quadratic Performance index example*
S-7	SLO-1	*Stability on z-plane and the Jury stability criterion*	*Z-plane specification for control system design.*	*Concept of observability Numerical examples*	*Digital control system with state feedback*	*Performance indices examples*

	SLO-2	*Sampling as impulse Modulation*	*Introduction to digital compensator*	*State feedback with integral control*	*State feedback with integral control*	*Quadratic Performance index example State regulator design*
S-8	SLO-1	*Practical aspects on the choice of sampling rate*	*Digital compensator design using frequency response*	*Multivariable control system overview.*	*Dead beat control concept*	*State regulator design through Lyapunov equation*
	SLO-2	*Principles of Discretization*	*Digital compensator design using frequency response.*	*Multivariable control system Numerical Examples*	*Multilevel inverters.*	*Duality and Observability*
S-9	SLO-1	*Routh Stability criterion*	*Digital compensator design using root locus plots*	*Digital state space Models*	*Dead beat control by state feedback and Dead beat observers*	*Optimal state regulator through the matrix riccati equation*
	SLO-2	*Routh Stability criterion-.*	*Digital compensator design using root locus plots.*	*Digital state space Models Examples*	*System identification and adaptive control*	*Optimal digital control systems*

		Model Based Design Approach	Modelling Techniques and development	ECU Architecture and Design	Real-time Simulation	Model Based System Design Application
Duration (hour)		09	09	09	09	09
S-1	SLO-1	*Introduction to design process*	*Introduction to graphical modelling*	*Rapid Prototyping hardware architecture and features*	*Introduction to real-time simulation*	*Introduction to model based system design software tools*
	SLO-2	*Design validation and verification and requirements*	*State Flow Modelling*	*Programming analog ,digital interface*	*Standalone Plant Simulation*	*Overview of Simulink and Sim driveline*
S-2	SLO-1	*Design process implementation*	*State machines Modelling*	*Protocol interface and implementing controller*	*Standalone Controller Simulation*	*Modelling a series hybrid electric vehicle in Sim drive line*
	SLO-2	*Introduction to model based design*	*Algorithmic models*	*ECU Design - Need for ECUs*	*Plant and controller simulation on single target*	*Modelling a series hybrid electric vehicle in Sim drive line.Cont*
S-3	SLO-1	*Model based design in functional level*	*Transfer function modelling*	*Advances in ECUs for automotive application*	*Plant and controller simulation on single target.Cont*	*Driver model in Simulink*
	SLO-2	*Model based design in Architecture level*	*State space modelling*	*Requirements for ECU design*	*RT simulation by Separating the plant from the controller*	*Battery model in Simulink*
S-4	SLO-1	*Model based design in implementation level*	*Event based Modelling*	*Design complexities of ECU*	*Real-time simulation.Cont*	*Modelling electric motor in Simulink*
	SLO-2	*Key barriers in adaptation of model based engineering*	*Statistical modelling for system identification*	*Selection of sensors for ECU design*	*Controller and Plant on real time target*	*Modelling speed tracking controller model in Simulink*
S-5	SLO-1	*Introduction to V-development cycle*	*Mathematical Modelling for automotive applications*	*Selection of interfaces for ECU design*	*Controller and Plant on real time target Cont.*	*Modelling of a single cylinder IC engine in powertrain block set*
	SLO-2	*V-developments cycle significance*	*Simple motor and generator model*	*Selection of actuators for ECU design*	*V and V using HIL RT Model*	*Modelling of a single cylinder IC engine in powertrain block set.Cont*
S-6	SLO-1	*V-development cycle in automotive domain*	*Simple IC engine model, Controller model*	*Selection of actuators for ECU design .Cont*	*V and V using HIL RT Model case study*	*Modeling of an IC engine controller in powertrain block set*
	SLO-2	*Rapid control prototyping*	*IC engine Controller model*	*ECU Hardware -Architecture of an advanced Microcontroller*	*Implementation of communication interfaces*	*Modeling of an IC engine controller in powertrain blockset.Cont*
S-7	SLO-1	*Model-in-loop simulation*	*Quarter car model*	*Overview of on chip peripherals*	*Verification of communication interfaces*	*Virtual modelling of electrified powertrains*

	SLO-2	*Software-in-loop simulation*	*Cruise control model*	*ECU on chip peripherals.Cont*	*A/D Outputs implementation*	*Virtual modelling of electrified powertrains.Cont*
S-8	SLO-1	*Hardware-in-loop simulation*	*Motor model and development.*	*ECU protocol interfaces*	*Control algorithm implementation*	*Development a hybrid vehicle model*
	SLO-2	*Processor in the loop simulation*	*Generator model Development.*	*GPIO on the advanced Microcontroller ECU*	*Timing requirements in control algorithm*	*Development a hybrid vehicle model. Cont*
S-9	SLO-1	*Vehicle in the loop simulation*	*Motor controller model and development.*	*Overview of ECU programming*	*Verification of timing requirements in control algorithm*	*Supervisory logic implementation of Hybrid vehicle.*
	SLO-2	*Constraints in HIL,MIL,SIL,PIL*	*Motor controller model and development. Cont*	*ECU interface challenges*	*Control algorithm optimization*	*HIL simulation of Hybrid vehicle.*

			Electric and Hybrid Power train Technologies	Modelling and Characteristics of EV/HEV Power train Components	Energy Storage	Energy, Power Management Systems And Techniques For EV and HEV
Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Introduction to Battery Electric Vehicles (BEV's) – Power train Configuration, Traction*	*Electric Motor Performance characteristics – Power and torque generation*	*Electro chemical batteries- Electro chemical reactions*	*Power /Energy management controllers*	*Fundamentals of Vehicle Dynamics Control (VDC) Systems –Driver Model*
	SLO-2	*Introduction to Battery Electric Vehicles (BEV's) – Energy sources and storage*	*Electric Motor Performance characteristics – Efficiency, DC Motors*	*Electro chemical batteries- Electro chemical reactions*	*Power /Energy management controllers. Cont*	*Fundamentals of Vehicle Dynamics Control (VDC) Systems –Driver Model*
S-2	SLO-1	*Fuel Cell Electric vehicle (FCEV) technologies*	*Electric Motor Performance characteristics – Induction AC motors, Steady state Performance analysis*	*Battery technologies – Lead acid battery*	*Battery Management system (BMS) for EV and HEV*	*Fundamentals of Vehicle Dynamics Control (VDC) Systems –Vehicle Model.*
	SLO-2	*Fuel Cell Electric vehicle (FCEV) technologies*	*Electric Motor Performance characteristics – Permanent Magnet AC Motors ,BLDC motors*	*Battery technologies –Nickel based batteries*	*Battery Management system (BMS) for EV and HEV*	*Fundamentals of Vehicle Dynamics Control (VDC) Systems –Vehicle Model*
S 3-4	SLO-1 SLO-2	*Lab 1: Introduction Lab*	*Lab 4: Data acquisition using data loggers and virtual instrumentation hardware*	*Lab 7: Testing and validation of Electric Vehicle Battery*	*Lab 10: Direction control of Electric Vehicle motors*	*Lab 13: Revision Lab*
S-5	SLO-1	*Hybrid Electric Vehicles- Degree of Hybridization, Parallel hybrid*	*Battery Performance Characteristics- Battery Capacity, Open circuit terminal voltages*	*Lithium based batteries –Lithium polymer*	*Rule based Control Strategies for HEV and PHEV –Deterministic Rule-based ,Fuzzy rule based control strategies*	*Fundamentals of Vehicle Dynamics Control (VDC) Systems –Environment Model*
	SLO-2	*Hybrid Electric Vehicles-Series Hybrid*	*Battery Performance Characteristics-Charge and Discharge rates*	*Lithium based batteries –Lithium polymer*	*Rule based Control Strategies for HEV and PHEV –Deterministic Rule-based, Fuzzy rule based control strategies.*	*Fundamentals of Vehicle Dynamics Control (VDC) Systems –Environment Model.*
S-6	SLO-1	*Hybrid Electric Vehicles-Power split*	*Battery Performance Characteristics-SOC, SOD, DOD*	*Lithium based batteries –Lithium ion*	*Optimization based Control Strategies – Optimization Problem formulation*	*Working principle of VDC Systems*
	SLO-2	*Hybrid Electric Vehicles-compound Hybrid Configuration*	*Battery Performance Characteristics-Battery Energy Density, power density*	*Lithium based batteries –Lithium ion*	*Optimization based Control Strategies – Optimization Problem formulation.*	*Working principle of VDC Systems.*

S 7-8	SLO-1 / SLO-2	*Lab 2: Introduction to Virtual Instrumentation and Rapid control prototyping hardware*	*Lab 5: Interfacing Analog input ,Signal conditioning using control hardware*	*Lab 8: Testing and Validation of Electric Motor for power assisted Steering system*	*Lab 11: Electronic differential Design for Electric Vehicles*	*Lab 14: Lab Model Examination*
S-9	SLO-1	*Plug-in Hybrid Electric Vehicles (PHEV's)*	*Battery Performance Characteristics-Specific energy and Specific Power*	*Ultra-capacitors –Basic principle, Performance, Ultra High speed flywheels*	*Global Energy/Power Management Optimization*	*VDC System Overview*
	SLO-2	*Hybrid Hydraulic vehicles (HHV)*	*Inverters and Motor drives*	*Ultra-capacitors –Basic principle, Performance, Ultra High speed flywheels*	*Real-time Energy/Power Management Optimization.*	*VDC implementation on Electric and Hybrid Vehicles-structure of the control system*
S-10	SLO-1	*Pneumatic Hybrid Vehicles (PHVs)*	*Inverters and Motor drives*	*Fuel cells –Principle, working , requirements and specifications*	*Optimization techniques*	*VDC implementation on Electric and Hybrid Vehicles-structure of the control system.*
	SLO-2	*Power/Energy Management System*	*Regenerative Braking Characteristics*	*Fuel cells –Principle, working , requirements and specifications*	*Optimization techniques*	*Control system Design and simulation study*
S 11-12	SLO-1 / SLO-2	*Lab 3:Control prototyping using graphical programming methods Control prototyping using graphical programming methods*	*Lab 6: Control of actuators with Rapid control prototyping hardware*	*Lab 9: Speed control for Electric Vehicle motors*	*Lab 12: Revision*	*Lab 15: Evaluation & Discussion*

Learning Resources	1. *Amir Khajepour, M. Course Code	18AEE415T	Course Name	VEHICLE STABILITY AND CONTROL SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18AEE317J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Automobile Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Define the concepts of vehicle stability and fundamentals of vehicle dynamics.*
CLR-2 :	*Design and Develop Vehicle, Road and driver models.*
CLR-3 :	*Understand Longitudinal and Lateral stability control schemes*
CLR-4 :	*Distinguish between the effects of Longitudinal and Lateral stability*
CLR-5 :	*Interpret the relation between vertical dynamics and ride stability control*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Use and Relate fundamental mathematical concepts to create a Vehicle Model*	*1,2*	*90*	*85*	*H*	*H*	*H*	*H*	*M*	*L*	*L*	*L*	*M*	*M*	*H*	*H*	*L*	*L*	*M*
CLO-2 :	*Identify and Optimize parameters like driver behavior and road quality as inputs to check vehicle stability*	*2,3*	*85*	*80*	*H*	*H*	*H*	*H*	*H*	*M*	*M*	*L*	*H*	*M*	*L*	*M*	*M*	*H*	*M*

		Introduction to Vehicle Stability	Vehicle, Road and Driver Modeling	Longitudinal Dynamics and Control	Lateral Dynamics and Control	Vertical Dynamics and Control
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to stability of motion*	*Introduction to Vehicle Modeling*	*Introduction to longitudinal control*	*Automated lane keeping*	*Introduction to Automotive Suspension*
	SLO-2	*Concept and analysis of stability in motion*	*Introduction to Vehicle Modeling*	*Adaptive Cruise Control*	*Steering control for automated lane keeping*	*Passive suspension*
S-2	SLO-1	*Static stability*	*Vehicle Modeling*	*Collision avoidance system*	*Lane keeping with Bicycle model*	*Quarter Car model – passive suspension*
	SLO-2	*Dynamic stability*	*Vehicle Modeling. Cont*	*Automated Highway systems*	*Lane keeping with Bicycle model - state feedback*	*Active suspension system*
S-3	SLO-1	*Mathematical forms for vehicle dynamic equations*	*Friction coefficient*	*Cruise controller design*	*Steady state error from dynamic equation*	*Tradeoffs and Limitation of Active suspension*
	SLO-2	*Mathematical forms for vehicle dynamic equations*	*Calculation of forces*	*PI Controller for first order plant*	*Steady state error from dynamic equation. Cont*	*Performance variable of quarter car suspension*
S-4	SLO-1	*Eigen values*	*Tire modelling*	*PI Controller for second order plant*	*Unity feedback loop system*	*Natural Frequencies for the Quarter Car*
	SLO-2	*Eigen values. Cont*	*Tire Characteristics*	*PID Cruise-controller design for second order actuator*	*Unity feedback loop system. Cont*	*Mode Shapes for the Quarter Car*
S-5	SLO-1	*Routh's stability*	*Effect of Wheel radius*	*Autonomous cruise control –Speed control*	*Loop analysis with a proportional controller*	*Approximate Transfer Functions Using Decoupling*
	SLO-2	*Routh's stability criterion. Cont*	*Effect of Wheel radius. Cont*	*Autonomous cruise control –Headway control*	*Loop analysis with a proportional controller. Cont*	*Approximate Transfer Functions Using Decoupling. Cont*
S-6	SLO-1	*Co-ordinates of vehicle dynamics model*	*Two track models*	*Adaptive cruise control –Cruise control with preview based on onsite information*	*Loop analysis with a lead compensator*	*Verification Using the Complete Quarter Model*
	SLO-2	*Notation of vehicle dynamics model*	*Reduced two track non-linear model*	*Adaptive cruise control –Cruise control with preview based on onsite information*	*Loop analysis with a lead compensator. Cont*	*Verification Using the Complete Quarter Model. Cont*
S-7	SLO-1	*Longitudinal vehicle motion –During acceleration*	*Road Model – Requirements of road model*	*Vehicle Platooning*	*Simulation of performance with Lead compensator*	*Optimal passive Suspension with 2DOF model*

	SLO-2	*Longitudinal vehicle motion –During Braking*	*Course path of a Road Models*	*String stability*	*Simulation of performance with Lead compensator. Cont*	*Optimal active Suspension with 2DOF model. Cont*
S-8	SLO-1	*Vertical vehicle motion*	*Road surface quality*	*ACC –Autonomous control with constant spacing*	*Overview of four wheel steering*	*Linear Quadratic control*
	SLO-2	*One DOF quarter car model*	*Wind Strength - Effects*	*ACC –Autonomous control with constant time gap policy*	*Four wheel steering system numerical example*	*LQR Applications - active suspension*
S-9	SLO-1	*Lateral vehicle motion –Bicycle model*	*Human factors in driver automation*	*String stability of CTG spacing Policy*	*Yaw rate and acceleration response*	*LQR formulation for active suspension design*
	SLO-2	*Bicycle model in steady state cornering*	*Simple PID driver Model*	*String stability of CTG spacing Policy. Cont*	*Lane Change Maneuver – 2WS VS 4WS*	*LQR formulation for active suspension design. Cont*

ACADEMIC CURRICULA

Professional Elective Courses

BIOTECHNOLOGY

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18BTE301T	Course Name	DEVELOPMENTAL BIOLOGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Describe the mechanisms of developmental patterning and organization*
CLR-2 :	*Discuss fertilization, gametogenesis and sex determination*
CLR-3 :	*Compare developmental patterns among metazoan, drosophila and zebrafish*
CLR-4:	*Explain somites and their derivatives.*
CLR-5:	*Describe metamorphosis and organogenesis*
CLR-6:	*Analyze birth defects and endocrine disruptors*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Analyze the mechanisms of cell to cell communication*	*1*	*80*	*80*	*L*	*H*	*H*	*H*		*M*	*L*	*H*	*H*	*H*	*H*	*H*	*L*	*H*	*H*

CLO-4 :	*Recognize the various pathways of organogenesis*	*2*	*85*	*80*	*L*	*H*	*H*	*H*			*H*	*L*	*L*	*H*	*H*	*H*	*M*	*H*	*H*
CLO-5 :	*Discuss about the various endocrine receptors*	*3*	*85*	*75*	*L*	*H*	*H*	*M*		*M*	*H*	*H*	*H*	*L*	*H*	*H*	*H*	*H*	*H*
CLO-6 :	*Explain the concepts of development in health and diseases*	*2*	*80*	*80*	*M*	*H*	*H*	*H*	*L*	*H*	*M*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Mechanisms of Developmental Organization*	*Sex determination*	*Early Development: Cleavage, Gastrulation and Axis formation*	*Building with mesoderm*	*Development in health diseases*
	SLO-2	*The cycle of life*	*Chromosomal sex determination*	*Developmental Patterns among the Metazoa*	*Endoderm*	*Genetic errors of human development*
S-2	SLO-1	*Epigenesis and cleavage*	*Mammalian Pattern of sex determination*	*Early development in the Nematode C. elegans*	*Organogenesis*	*Birth defects*
	SLO-2	*Evolutionary embryology*	*Genetic mechanisms*	*Early Drosophila Development*	*Paraxial mesoderm*	*Endocrine disruptors*
S-3	SLO-1	*Cell Specification:*	*Wnt family and signaling*	*Early Zebrafish Development*	*The somites and their derivatives*	*BPA and reproductive health*
	SLO-2	*Mechanisms of Developmental Patterning*	*Hormonal regulation of sexual phenotype*	*Early Development in Mammals*	*Intermediate and lateral plate mesoderm*	*Cancer*
S-4	SLO-1	*Autonomous and conditional specification*	*Environmental sex determination*	*Building with Ectoderm: The vertebrate nervous system and Epidermis*	*Heart, Blood, and Kidneys*	*Defects in paracrine pathways*
	SLO-2	*Cell identities*	*Gametogenesis*	*Neural tube formation and patterning*	*Development of the tetrapod limb*	*Cancer and stem cell hypothesis*
S-5	SLO-1	*Differential Gene Expression*	*Spermatogenesis*	*Brain growth*	*The endoderm*	*Development and the environment*
	SLO-2	*Mechanisms of Cell Differentiation*	*OOgenesis*	*Neural crest cells*	*The tubes and organs for digestion*	*Diet-induced polyphenisms*
S-6	SLO-1	*Differential RNA processing*	*Fertilization*	*Axonal specificity*	*Organs and tubes for respiration*	*Developmental symbiosis*
	SLO-2	*Cell-to-Cell communication*	*Structure of gametes*	*Ectodermal Placodes*	*Postembryonic development*	*Biotic regulation*
S-7	SLO-1	*Juxtacrine signaling*	*Translocation and capacitation*	*Epidermis*	*Metamorphosis*	*Abiotic regulation*
	SLO-2	*Mechanisms of Morphogenesis*	*Thermotaxis and chemotaxis*	*Cell Signaling*	*The hormonal reactivation and development*	*Symbiotic regulation of development*
S-8	SLO-1	*Cadherins and cell adhesions*	*Fusion of genetic material*	*Fibroblast growth factors*	*Regeneration*	*Development and Evolution*
	SLO-2	*Stem cells: Their potential and their niches*	*Activation of mammalian egg*	*RTK pathway*	*Aging and senescence*	*Developmental mechanisms*
S-9	SLO-1	*Human model systems*	*Flowering*	*The Hedgehog family*	*Differentiation of dermal, ground, and vascular tissues in plants*	*Evolutionary changes*
	SLO-2	*Development in Plants*	*Reproduction in Plants*	*The TGF-β superfamily*	*Techniques in embryology*	*Mechanisms of evolutionary changes*

Learning Resources	1. *Scott F. Gilbert, Michael J. F. Barresi. Developmental Biology, Sinauer Associates-Oxford University Press; 11 edition, 2016* 2. *JMW Slack Essentials of Developmental Biology 3rd Edition Wiley-Blackwell;.2012*

Course Code	18BTE302T	Course Name	CELLULAR AND MOLECULAR NEUROSCIENCE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Recall the brain function from its organization*
CLR-2 :	*Discuss Molecular signaling in neurons*
CLR-3 :	*Compare Neural basis of senses*
CLR-4:	*Explain different methods for studying neuro-immune functions*
CLR-5:	*Describethe cortical structures pertaining to emotions and feelings*
CLR-6:	*Analyze genetic* variation and inheritance pertaining to nervous system disorders

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Analyze the role of genes in brain development and functions*	*1*	*80*	*80*	*L*	*H*	*H*	*H*		*M*	*L*	*H*	*H*	*H*	*H*	*H*	*L*	*H*	*H*
CLO-2 :	*Describe the fundamental organization of brain and its functions.*	*2*	*85*	*75*	*M*	*H*	*H*	*M*			*M*	*H*	*L*	*H*	*H*	*H*	*L*	*H*	*H*
CLO-3 :	*Explain the concepts and experiments in the ion channels and NEUROTRANSMITTERS*	*2*	*75*	*80*	*M*	*H*	*M*	*H*	*M*	*M*		*M*	*H*	*H*	*H*	*H*	*L*	*H*	*H*

CLO-5 :	*Discuss the different methods in the neuroendocrine and immune interactions*	*3*	*85*	*75*	*L*	*H*	*H*	*M*		*M*	*H*	*H*	*H*	*L*	*H*	*H*	*H*	*H*	*H*
CLO-6 :	*Explain the concepts of nervous system disorder and the diseases associated with it*	*2*	*80*	*80*	*M*	*H*	*H*	*H*	*L*	*H*	*M*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Genetics of nervous system*	*Electrical signals*	*Somatic sensory system-Pain*	*Cognition-Speech and Language*	*Diseases and injuries of the nervous system*
	SLO-2	*Advent of genomics in the assembly of brain*	*Long-distance transmission of Electrical signals*	*Touch and Proprioception*	*Overview of cortical structures*	*Alzheimer's disease*
S-2	SLO-1	*Model organisms in neuroscience*	*The ionic basis of resting membrane potential*	*Pain and its pathways*	*Sleep and Wakefulness*	*Hutington's disease*
	SLO-2	*Development of the nervous system*	*Voltage-dependent membrane permeability*	*Visual and Vestibular pathways*	*The circadian cycle of sleep and wakefulness*	*Neuromuscular Disorders: Myasthenia gravis*
S-3	SLO-1	*Molecular basis of neural induction*	*Ion channels and transporters*	*Retinal circuitry*	*Emotions-Memory*	*Basal ganglia disorders: Parkinson's disease*
	SLO-2	*Initial differentiation of neurons and glia*	*Diversity of ion channels*	*Phototransduction*	*Early theories of emotional brain*	*Pharmacological targets of Parkinsons disease*
S-4	SLO-1	*Cellular Components of the Nervous system*	*Synaptic transmission-Neurotransmitters and their receptors*	*Motor neuron circuits-Motor neuron control by the CNS*	*Kluver-Bucy syndrome*	*Spinal Cord Injury*
	SLO-2	*Neurons and Glia*	*Chemical and electrical synapses*	*Motor units*	*Brain reward circuitry*	*Traumatic Brain Injury (TBI)*
S-5	SLO-1	*Organization of nerves*	*Molecular signaling in neurons*	*The Corticospinal and Corticobulbar Tracts*	*Learning*	*chronic traumatic encephalopathy*
	SLO-2	*Pre synaptic terminals*	*Activation of signaling pathways*	*Upper motor neurons*	*Memory consolidation and Priming*	*Stroke*
S-6	SLO-1	*Neural Circuits*	*Second messengers*	*Disorders of basal ganglia*	*Cognition-Speech and Language*	*Blood Supply to Brain*
	SLO-2	*Myotactic reflex*	*Nuclear signaling*	*Molecular mechanisms involved in synapse formation*	*Sex and Sexuality*	*Transient Ischemic Attack*
S-7	SLO-1	*Organization of the Nervous system*	*Synaptic plasticity*	*Molecular basis of trophic interactions*	*Neuroanatomical basis for brain functions.*	*Acute stroke treatment*
	SLO-2	*Divisons of nervous system*	*Short and long-term synaptic plasticity*	*Construction and modification of neural circuits*	*Hypothalamus and endocrine system*	*Prevention of stroke*
S-8	SLO-1	*Central nervous system*	*Synaptic transmission-Neurotransmitters and their receptors*	*Repair and Regeneration in nervous system*	*Hormones of endocrine system and its regulation*	*Dementia*
	SLO-2	*Peripheral nervous system*	*Properties of neurotransmitters*	*Hypoxia/Ischemia in mammalian brain*	*Interactions between neuroendocrine system and immune system*	*Mild cognitive impairment*

S-9	SLO-1	*Structural and Functional analysis of the Nervous system*	*Receptors of neurotransmitters*	*Axon Growth after Brain Injury*	*Neural-Immune interactions in the periphery*	*Alzheimer's dementia*
	SLO-2	*Cellular diversity of nervous system*	*Unconventional neurotransmitters*	*Goat brain dissection*	*Nervous-immune system role in health and disease*	*Prevention and treatment*

Course Code	18BTE303T	Course Name	METABOLIC DISORDERS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18BTC101J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn about the basic principles of metabolic regulation*
CLR-2 :	*Understand the importance of genetics in medicine and in metabolic diseases.*
CLR-3 :	*Learn about the role of enzymes in various metabolic disorders*
CLR-4:	*The common genetic diseases in our society and the reason for it.*
CLR-5:	*Learn about various treatment strategies of metabolic disorders.*
CLR-6:	*Learn about the basic principles of metabolic regulation*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)
CLO-1 :	*understand the metabolic principles*	*2*	*80*	*70*
CLO-2 :	*able to solve the metabolic problems of specific nutrients*	*2*	*85*	*75*
CLO-3 :	*able to apply knowledge in metabolic control*	*2*	*75*	*80*
CLO-4 :	*Know the importance of genetics in medicine and in metabolic diseases.*	*2*	*85*	*80*
CLO-5 :	*Realize how genetic diseases are common in our society and the reason for it.*	*3*	*85*	*80*
CLO-6 :	*Understand the various treatment strategies of metabolic disorders*	*2*	*80*	*75*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Origin of Infection*	*Introduction to pathogenic and non pathogenic bacteria*	*History of viral infections*	*Introduction to Protozoan Diseases*	*Antibacterial: Antibiotics*
	SLO-2	*Evolution of infectious diseases*	*Common bacterial diseases in humans*	*Different Viral diseases*	*Different protozoan diseases*	*Mode of actions of antibiotics*
S-2	SLO-1	*Concept of Infection: Immunity*	*Basic mechanism of Bacterial pathogenesis*	*Viral pathogenesis*	*Severity of protozoan diseases*	*Antibiotic resistance*
	SLO-2	*Immune surveillance*	*Bacterial survival in host cells-Quoram sensing*	*Viral life cycle*	*General mode of action of protozoa*	*MDR and XDR strains*
S-3	SLO-1	*Concept of Infection: Virulence*	*Bacterial virulence factors: Microbial structures*	*Virus genomes and structure*	*Pathogenesis of protozoan diseases: Case study: Plasmodium*	*Antivirals: Vaccines*
	SLO-2	*Concept of Pathogenesis*	*Bacterial virulence factors: Microbial structures: Toxins*	*Host –virus interactions*	*Host response to Prozoan*	*Impact of vaccine in viral disease control*
S-4	SLO-1	*Causative agents of infectious diseases- Virus*	*Host response to Bacterial infection*	*Host Immune reaction against viruses*	*Molecular signaling against Protozoa*	*Challenges in viral vaccine developments*
	SLO-2	*Causative agents of infectious diseases- Bacteria*	*Molecular cell signaling involved in Bacterial diseases*	*Viral evasion of host immune surveillance*	*Hypersensitivity and autoimmunity associated with Protozoan infections*	*Antiviral compounds*
S-5	SLO-1	*Causative agents of infectious diseases- Protozoa and Parasites*	*Host Immune response to bacteria*	*Antiviral pathways*	*General fungal diseases*	*Antimalarial drug development*
	SLO-2	*Causative agents of infectious diseases- Other causative agents*	*Bacterial immune evasion: Molecular Mimicry*	*Mutations in viral genome*	*Mode of action of fungal diseases*	*Mode of action of antimalarial drugs*
S-6	SLO-1	*Disease epidemiology*	*Strategies for antibacterial therapy: Antibiotics*	*Viral diseases and antibody response*	*Immune response against fungal infection*	*Development of Vaccine for Malaria*
	SLO-2	*Steps involved in epidemiology*	*Other antibacterial compounds*	*Vaccine against viral diseases*	*Case study: Candidiasis*	*Challenges for the development of antimalarial drugs*
S-7	SLO-1	*Epidemiological case studies-Bacteria*	*Gut bacteria and their role in pathogenesis*	*Antivirals compounds for viral infections*	*Infection caused by Yeast*	*Infectious diseases and life style*
	SLO-2	*Epidemiological case studies-Bacteria*	*Bacterial vaccines*	*Challenges in vaccine production against certain virtues*	*Mode of action of Yeast infection*	*Beneficial gut microflora*

S-8	SLO-1	*Epidemiological case studies-Virus*	*Case study: E. Coli infection*	*Case study: Influenza*	*Case study: Ring warm*	*Neglected diseases*
	SLO-2	*Epidemiological case studies-Virus*	*Case study: Tuberculosis*	*Case study: Dengue*	*Strategies to combat Protozoan infections*	*Reemerging infectious diseases*

Course Code	18BTE401T	Course Name	CANCER BIOLOGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Describe the genes, risk factors in tumor progression*
CLR-2 :	*Discuss epigenetics, DNA damage and repair in cancer*
CLR-3 :	*Recall the molecular signaling mechanisms in cancer*
CLR-4:	*Explain different methods for studying neuro-immune functions*
CLR-5:	*Describe the role of stem cells in cancer treatment*
CLR-6:	*Analyze the role of nuclear medicine and alkaloids in cancer*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Analyze the role of diet in different forms of cancer*	*1*	*80*	*80*	*L*	*H*	*H*	*H*		*M*	*L*	*H*	*H*	*H*	*H*	*H*	*L*	*H*	*H*
CLO-2 :	*Describe the fundamental assays in hazard identification*	*2*	*85*	*75*	*M*	*H*	*H*	*M*			*M*	*H*	*L*	*H*	*H*	*H*	*L*	*H*	*H*
CLO-3 :	*Explain the concepts and experiments in cancer development*	*2*	*75*	*80*	*M*	*H*	*M*	*H*	*M*	*M*		*M*	*H*	*H*	*H*	*H*	*L*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic concepts of cancer: Oncogenes and tumor suppressor genes*	*DNA structure and stability*	*Signal transduction*	*Stem cells and cancer*	*Cancer therapy and detection*
	SLO-2	*Risk factors, Pathogenesis, treatment and future prospects*	*Spontaneous DNA damage*	*Growth factors and receptors*	*Self- renewal and its molecular mechanisms*	*Modalities of treatment*
S-2	SLO-1	*The cell cycle*	*DNA repair*	*EGF growth factor receptor signaling*	*Hedgehog signaling pathway*	*Nuclear medicine*
	SLO-2	*cyclin and cyclin dependent kinases*	*Clinical applications of DNA repair biomarkers*	*Ras activation*	*Polycomb group proteins*	*Chemotherapeutic agents*
S-3	SLO-1	*Mechanisms of CdK regulation.*	*Epigenetics*	*Activation of MAPK pathways*	*Therapeutic strategies*	*Plant alkaloids*
	SLO-2	*Tumor suppressor genes*	*Epigenome and its implications*	*Oncogenes*	*Tumor micro environment in cancer*	*Antibiotics*
S-4	SLO-1	*Knudson's two-hit hypothesis*	*Carcinogenesis*	*Immune system*	*Macrophages and tumor progression*	*Hormonal agents*
	SLO-2	*P53 and control of cell cycle*	*Causes of cancer*	*Effector mechanisms in cancer immunity*	*SMAD signaling centers*	*Biological therapy*
S-5	SLO-1	*Molecular pathways of p53*	*Cancer risk factors*	*NF-KB signaling pathway*	*Invasion and metastasis*	*Immunotherapy and hematopoietic growth factors*
	SLO-2	*Myc transcription factor*	*Types of carcinogens*	*JAK/STAT and cancer*	*Cell adhesion molecules*	*Cancer prevention and early detection*
S-6	SLO-1	*Powers of Myc oncoprotein*	*Bacteria and cancer*	*Neuroendocrine system*	*Angiogenesis*	*Screening techniques and diagnostic tests*
	SLO-2	*Role of myc oncoprotein in regulating pRb*	*Hormones and cancer*	*Neurotransmitters and GPCR signaling*	*Tumor angiogenesis and neovasculature*	*Imaging and cancer*
S-7	SLO-1	*TGF role in cancer*	*Ecogenetics and cancer risk*	*Estrogen signaling pathways*	*VEGF signal transduction*	*X-Ray CT, MRI, and radio imaging*
	SLO-2	*pRb's role in cancer*	*Mutations*	*Growth factors, and growth factor receptors*	*Angiogenic inhibitors*	*Optical imaging*
S-8	SLO-1	*Tumor suppressor genes*	*Carcinogen metabolism*	*Wnt signaling*	*Vascular targets*	*Tumor vasculature metabolism*
	SLO-2	*Cell cycle and cancer*	*Biotransformation and cancer risk*	*Implications in cancer therapy*	*Pain and physiology of pain perception*	*Contrast agents in cancer molecular imaging*
S-9	SLO-1	*Different forms of cancer*	*Cancer prevention*	*Apoptosis and Cancer*	*Neuropathic cancer pain*	*Bioinformatics for pathway interaction*
	SLO-2	*Diet and cancer*	*Hazard identification assays*	*Bcl-2 and cancer*	*Pain therapy*	*Population screening challenge*

Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Appraise the changes the drug and human system undergoes when consumed*
CLR-2 :	*Demonstrate the parameters that affect the action of drug in human system*
CLR-3 :	*Relate the different type of adverse drug reactions and drug abuse*
CLR-4:	*Explain the mechanism of action, toxicity and uses of antibiotics and anti-tubercular drugs*
CLR-5:	*Describe the regulation of drugs in Indian Government and its initiatives in promoting Indian System of medicine*
CLR-6:	*Distinguish various parameters to be considered during drug discovery process*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)
CLO-1 :	*Select appropriate target, drug-like candidates based on desired pharmacokinetic and pharmacodynamic parameters*	*1*	*80*	*80*
CLO-2 :	*Estimate the dose of drug to be administered for individuals*	*2*	*85*	*75*
CLO-3 :	*Explain the logical usage of drugs and suggest appropriate treatment*	*2*	*75*	*80*
CLO-4 :	*Justify the choice of drugs for microbial infection in an individual*	*2*	*85*	*80*
CLO-5 :	*Underline the significance of stringent laws pertaining to manufacturing, distribution and sale of drugs in India*	*3*	*85*	*75*
CLO-6 :	*Illustrate the process of pre-clinical investigation of drug designing*	*2*	*80*	*80*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic concepts*	*Plateau principle*	*Pharmacovigilance*	*Mechanism of action of Tetracyclines*	*Mechanism of action of Amphoterycin B*
	SLO-2	*Pharmacopoeia and Essential Drugs*	*Target level strategy*	*Casualty assessment*	*Uses, Spectrum of activity, toxicity of Tetracyclines*	*Spectrum of activity and adverse effects of Amphoterycin B*
S-2	SLO-1	*Local routes of drug administration*	*Prolongation of drug action*	*Side, secondary and toxic effects of drugs*	*Mechanism of action of aminoglycoside antibiotics*	*Mechanism of action of Griseofulvin*
	SLO-2	*Systemic routes of drug administration*	*Target delivery devices*	*Accidental overdose of drugs and the treatment*	*Classification, Uses of aminoglycosides*	*Mechanism of action of Imidazoles and Triazoles anti-fungal agents*
S-3	SLO-1	*Influence of pH on transport of molecules across membranes*	*Principles of drug action*	*Drug Intolerance and Drug allergy*	*Mechanism of action of Macrolide antibiotics*	*Indian Drug Regulatory System*
	SLO-2	*Passsive transport and facilitated transport*	*Mechanism of drug action on enzymes*	*Drug abuse and Treatment*	*Classification of Macrolide antibiotics*	*Drug Regulatory body - CDSCO*
S-4	SLO-1	*Absorption of Drugs*	*Mechanism of drug action on Ion channels*	*Classification of anti-microbial agents based on chemical structure*	*Spectrum of activity of Macrolide antibiotics*	*Hierarchy at CDSCO*
	SLO-2	*Bioavailability*	*Mechanism of drug action on transporters*	*Classification of anti-microbial agents based on mechanism of action*	*Uses and toxicity of Macrolide antibiotics*	*Good clinical Practices*
S-5	SLO-1	*Distribution and Redistribution of drugs*	*Action-Effect sequence*	*Drug modification and alteration of target site by microorganisms*	*Treatment of Urinary tract infections*	*Role of Pharmacists in Drug regulation*
	SLO-2	*Tissue storage, placental & brain transport*	*Transducer mechanism*	*Reduction in drug accumulation and alteration of metabolic pathway by microorganisms*	*Structure, adverse effects of Isoniazid*	*Functions of State Drug-Inspectors*
S-6	SLO-1	*Biotransformation of drugs and types*	*Dose-Response Relationship*	*Mechanism of action of Co-trimoxazole*	*Mechanism of action of Isoniazid*	*Functions of CDSCO*
	SLO-2	*Cytochrome P450*	*Therapeutic efficiency*	*Uses and adverse effects of cotrimoxazole*	*Structure, adverse effects of Rifampicin*	*Functions of Central Drug-Inspectors*
S-7	SLO-1	*Non-synthetic biotransformation reactions*	*Synergystic drug action*	*Mechanism of action of Fluoroquinolones*	*Mechanism of action of Rifampicin*	*Ayurvedic Formulary of India*

	SLO-2	*Synthetic biotransformation of drugs*	*Antagonistic drug action*	*Classification, Uses and adverse effects of Fluoroquinolones*	*Structure, Mechanism of action, adverse effects of Pyrazinamide*	*Ayurvedic Dosage Forms*
S-8	SLO-1	*Inhibition of drug metabolism*	*Fixed dose combination of drugs*	*Structure of beta-lactum antibiotics*	*Structure, Mechanism of action, adverse effects of Ethambutol*	*Ayurvedic Pharmacopoeia of India*
	SLO-2	*Induction of microsomal enzymes*	*Factors modifying drug action*	*Classification of beta-lactum antibiotics*	*Tuberculosis in pregnant and lactating women*	*Ayurvedic, Unani, Siddha drugs undertaken by British commission*
S-9	SLO-1	*Routes of excretion of drugs*	*Pharmacogenetics and Pharmacogenomics*	*Uses of beta-lactum antibiotics*	*Tuberculosis in HIV infected individuals in India*	*Indian Government Initiatives to promote Ayurvedic products*
	SLO-2	*Rate of Clearance and Plasma half-life*	*Drug dosage in individuals with hepatic, renal, heart and thyroid problems*	*Adverse effects of beta-lactum antibiotics*	*Mycobacterium Avium Complex infections in India*	*Indian Government Initiatives to promote Unani and Siddha products*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Analyze the databases in bioinformatics*
CLR-2 :	*Use sequence alignment to find similar sequences*
CLR-3 :	*Use alignment to build hierarchical lineages*
CLR-4:	*Apply principles of bioinformatics to build tertiary structures of proteins*
CLR-5:	*Analyze motifs and patterns*
CLR-6:	*Analyze uses of Python programming in Bioinformatics applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Describe the applications of bioinformatics to build databases for universal usage*	*1*	*80*	*80*	*H*	*H*	*H*	*H*		*M*	*L*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-2 :	*Explain the concepts and tools to build alignment between similar sequences of DNA or Protein*	*2*	*85*	*75*	*H*	*H*	*H*	*H*			*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-3 :	*Recognize the pattern of lineages and evolution*	*2*	*80*	*80*	*M*	*H*	*M*	*H*	*M*	*M*		*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-4 :	*Discuss the different methods in the construction the structure of a protein*	*2*	*85*	*80*	*M*	*H*	*H*	*H*			*H*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-5 :	*Analyze the importance of conserved regions in a molecular sequence*	*3*	*85*	*75*	*M*	*H*	*H*	*H*		*M*	*H*	*M*	*H*	*L*	*H*	*H*	*H*	*H*	*H*
CLO-6 :	*Explain the basic concepts and principles of Programming in Python for bioinformatics*	*3*	*80*	*80*	*H*	*H*	*H*	*H*	*L*	*M*	*M*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Bioinformatics significance*	*Introduction on databases & biological databases*	*Sequence alignment*	*Motifs and Patterns prediction*	*Introduction of Python and text editors*
	SLO-2	*Applications of bioinformatics*	*Uses of biological databases*	*Global Pairwise Alignment Algorithm*	*Databases for motif prediction*	*String datatype*
S-2	SLO-1	*Internet basics: Connecting to internet*	*Primary sequence databases, Nucleotide*	*Solving problems*	*Databases for patterns and blocks*	*Tuples datatype*
	SLO-2	*Internet Protocols*	*Protein sequence database*	*Local Pairwise Alignment Algorithm*	*Secondary Database Searching*	*Lists datatype*
S-3	SLO-1	*HTML script*	*Primary structure databases*	*Database searching*	*Secondary structure prediction*	*Flow control: If else*
	SLO-2	*Webpage creation*	*PDB file format*	*BLAST*	*Tools for secondary structure prediction*	*For loop*
S-4	SLO-1	*Human genome project*	*Fasta, GCG, VFF etc..*	*FASTA*	*Specialized secondary structure prediction*	*While loop*
	SLO-2	*Uses of human genome project*	*Secondary databases*	*Multiple Sequence Alignment:*	*Tertiary structure prediction*	*Reading and Writing files*
S-5	SLO-1	*The NCBI data model: Introduction*	*secondary sequence databases*	*Progressive and Iterative Alignment*	*Comparative modelling*	*Modules in Python*
	SLO-2	*SEQ-Ids*	*secondary structure databases*	*Tools for pairwise alignment*	*Abinitio modelling*	*Functions*
S-6	SLO-1	*BIOSEQs and BIOSEQ-SETs*	*SCOP*	*tools for multiple sequence alignment*	*Validation of tertiary structure*	*Regular expressions: Syntax*
	SLO-2	*SEQ-ANNOT and SEQ-DESCR*	*CATH*	*Application of Multiple Sequence Alignment*	*tools for homology modeling*	*Regex examples*
S-7	SLO-1	*Genbank database*	*Composite protein databases*	*Databases Of Multiple Alignment*	*tools for structure validation*	*Biopython*
	SLO-2	*Genbank Flat file*	*Metabolic databases*	*Molecular Phylogeny*	*Structure visualization tools*	*Advantages of python in bioinformatics*
S-8	SLO-1	*Sequence submission to Genbank*	*SNP databases*	*Methods of phylogeny*	*rasmol*	*Components of biopython: Alphabet*
	SLO-2	*Online and offline tools*	*Whole genome , medelian disease databases*	*types of trees*	*Chemical structure building tools*	*Seq, Seq object, SeqUtils*
S-9	SLO-1	*Entrez , INSDC*	*chemical structure databases*	*Tools for phylogeny*	*file formats for small molecules*	*Align and clustalw with Biopython*
	SLO-2	*Other databases in NCBI*	*bibliographic databases*	*PAM and BLOSUM*	*file format conversion tools*	*BLAST Running and Processing with Biopython*

Course Code	18BTE307T	Course Name	DRUG DISCOVERY AND DRUG DESIGNING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards			

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*State the basic concepts of drug discovery and drug design processes*
CLR-2 :	*State the basic concepts of target identification and target characterization*
CLR-3 :	*Explain about the various computational tools in drug discovery*
CLR-4:	*Discuss about the pharmacophore Model and QSAR*
CLR-5:	*Discuss about the quantum mechanics in drug design, De novo and future developments in drug design*
CLR-6:	*Explain the basic concepts of drug discovery and drug design processes and computational tools used in the drug designing.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Explain basic concepts of drug design processes for a various number of drug development scenarios.*	*1*	*85*	*80*	*L*	*H*	*H*	*H*	*H*		*M*	*M*	*H*			*H*	*H*	*H*	*H*
CLO-2 :	*Explain the basic concept of target identification and target characterization*	*1*	*85*	*80*	*L*	*H*	*H*	*H*	*H*		*H*		*H*			*H*	*H*	*H*	*H*
CLO-3 :	*Compare the different computational tools for drug designing and the computer software used in the drug designing.*	*2*	*80*	*70*	*M*	*H*	*H*	*H*	*H*		*H*		*H*			*H*	*H*	*H*	*H*
CLO-4 :	*Explain the basic concepts of pharmacophore Model and QSAR.*	*1*	*80*	*70*	*M*	*H*	*H*	*H*	*H*		*H*		*H*			*H*	*H*	*H*	*H*
CLO-5 :	*Summarize the basic concepts of Quantum Mechanics in drug designing and De nova ligand synthesis.*	*1*	*85*	*80*	*M*	*H*	*H*	*H*	*H*		*H*		*H*			*H*	*H*	*H*	*H*
CLO-6 :	*Summarize the basic concepts in the drug design process and the computational techniques used in the drug design process.*	*1*	*80*	*70*	*M*	*H*	*H*	*H*	*H*		*H*		*H*			*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to the drug discovery process*	*Target Identification: Primary Sequence and Metabolic Pathway,*	*introduction to computational tools in drug discovery*	*what is a pharmacophore Model*	*Quantum Mechanics in drug designing*
	SLO-2	*The sequence of research activities in the development of new drug*	*Crystallography and 2D NMR, Homology Models and Protein Folding in target identification*	*Introduction to Homology Model Building*	*Components of a Pharmacophore Model*	*When quantum mechanics is superior to molecular mechanics?*
S-2	SLO-1	*Terminology related to drug testing: "hits," "leads," "drug candidates," "drugs,"*	*Analysis of Target Mechanism: Kinetics and Crystallography, Automated Crevice Detection,*	*Importance of sequence similarity in homology modeling*	*Creating a Pharmacophore Model from the Active Compounds*	*Quantum Mechanics Algorithms*
	SLO-2	*Criteria that may be necessary to move a compound series onto the lead development stage*	*Transition Structures and Reaction Coordinates.*	*Steps for Building a Homology Model*	*Advantages of pharmacophore searching*	*Quantum Mechanics Software used in drug designing*
S-3	SLO-1	*Compound Testing: Biochemical Assays*	*Introduction to Molecular Dynamics Simulations*	*Homology Model creation*	*Creating a Pharmacophore Model from the Active Site*	*Modeling systems with metal atoms*
	SLO-2	*Compound Testing: Cell-Based Assays,*	*Molecular dynamics in target characterization*	*Homology Model validation*	*Example of Pharmacophore Model from the Active Site*	*Increased accuracy*
S-4	SLO-1	*Compound Testing: Animal Testing*	*Pharmacophore identification*	*Molecular Mechanics: Brief Introduction to Molecular Mechanics*	*Searching Compound Databases*	*Computing reaction paths*
	SLO-2	*alternatives to animal testing*	*Deriving and using 3D pharmacophores*	*How molecular mechanics are utilized in drug design.*	*Reliability of search Results*	*Computing spectra*
S-5	SLO-1	*Compound Testing: Human Clinical Trials*	*The Drug Design Process for a Known Protein Target: The Structure-Based Design Process*	*Force Fields for Drug Design*	*QSAR*	*Structure-based De novo Ligand synthesis*
	SLO-2	*Phases in clinical trials*	*The Drug Design Process for a Known Protein Target: Initial Hits and Compound Refinement, ADMET*	*common force fields and their usage*	*Conventional QSAR versus 3D-QSAR*	*Example of De novo Ligand synthesis*

S-6	SLO-1	*Effect of Molecular Structure on Activity*	*What is Drug Resistance*	*Introduction to Molecular Docking*	*The QSAR Process*	*Nonquantitative predictions*
	SLO-2	*Effect of Molecular Structure on Bioavailability*	*Mechanisms of resistance to the drug*	*Search Algorithms in Molecular Docking*	*Descriptors*	*Quantitative predictions*
S-7	SLO-1	*Drug Side Effects and Toxicity*	*The Drug Design Process for an Unknown Target: The Ligand-Based Design Process*	*The Docking Process: Preparation of Protein and Ligand*	*Automated QSAR Programs*	*Future Developments in Drug Design: Individual Patient Genome Sequencing*
	SLO-2	*Multiple Drug Interactions*	*The Drug Design Process for an Unknown Target: Initial Hits and Compound Refinement, ADMET*	*Setting the Bounding Box*	*QSAR versus Other Fitting Methods*	*Analysis of the Entire Proteome*
S-8	SLO-1	*Metrics for Drug-Likeness*	*Drug Design for Other Targets*	*Docking Options and Running the Docking Calculation*	*The 3D-QSAR Process*	*Drugs Customized for Ethnic Group or Individual Patient*
	SLO-2	*The Lipinski rule of fives*	*Drug design issues that arise in situations other than competitive inhibition of proteins.*	*Analysis of docking Results*	*Criteria are used to construct conformers*	*Application of Genetic Manipulation in drug designing*
S-9	SLO-1	*Exceptions to the Rules*	*Targets inside cells*	*Docking software*	*3D-QSAR Software Packages*	*Cloning and Stem Cells in drug design*
	SLO-2	*Examples of successful drugs that do not obey the "rules."*	*Targets within the central nervous system*	*An important criterion for selecting a docking program.*	*Advantage and disadvantages of 3D-QSAR Software*	*Longevity*

CLO-6 :	*Explain the diseases of cultivable animals and its controlling measures.*	*2*	*80*	*80*	*M*	*H*	*H*	*H*	*H*		*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Zonation of the Sea*	*Toxic marine animals*	*Bioactive compounds*	*Oil spills and accidents*	*Shrimp diseases*
	SLO-2	*Motion of the Ocean*	*Octopus, venomous spines, stings*	*Biopolymers, Omega-3 fatty acids*	*Fate of spilled oil*	*Monodon baculovirus, vibriosis, larval mycosis*
S-2	SLO-1	*Living resources*	*Sources of toxins*	*Free radicals*	*Biosurfactants*	*Fish diseases*
	SLO-2	*Corals, seaweeds and mangroves*	*TTX, conotoxin*	*Antioxidant enzymes, peptides*	*Microbes in biodegradation*	*Rhabdovirus, erythrodermatitis, gill disease*
S-3	SLO-1	*Non-living resources*	*Various effects of toxin*	*Biopolymers*	*Harmful blooms*	*Antibiotics in aquaculture*
	SLO-2	*Oil, gas and salts*	*Intoxication, stings*	*Collagen, gelatin*	*Blue-green algal bloom, red tides*	*Oxytetracycline, enrofloxacin*
S-4	SLO-1	*Economically important animals*	*Puffer fish toxins*	*Anticoagulant substances*	*Marine harmful biotoxins*	*Immunostimulants*
	SLO-2	*FInfishes*	*Tetrodotoxin*	*Heparin*	*Impacts of bloom*	*Objectives and characteristics of immunostimulants*
S-5	SLO-1	*Penaeid shrimps*	*Intoxication of puffer toxin*	*Biomaterials*	*Pesticide pollution*	*Common immunostimulants*
	SLO-2	*Penaeus indicus*	*Pharmacological effects*	*Chitin, Chitosan*	*Organochlorine, organophosphate esters*	*Muramyl dipeptide, levamisole*
S-6	SLO-1	*Non-penaeid shrimps*	*Molluscan venoms*	*Poly unsaturated fatty acids*	*Heavy metal pollution*	*Tools to diagnose the disease*
	SLO-2	*Metapenaeus brevicornis*	*Conotoxin*	*Omega 3-fatty acids*	*Minamata disease*	*Agar gel precipitation, fluorescent antibody test*
S-7	SLO-1	*Marine crabs*	*Pharmacology of conotoxin*	*Applications of Omega 3-fatty acids*	*Chemical and biological modification*	*Water quality management*
	SLO-2	*Portunidae crabs*	*Clinical effects of conotoxin*	*Antiinflammatory, cardiovascular, diabetes*	*Biosorption, factors affecting*	*Temperature*
S-8	SLO-1	*Edible Oysters*	*Seafood poisoning*	*Fat soluble pigments*	*Solid waste pollution*	*Salinity*
	SLO-2	*Oyster reefs*	*Ciguateratoxin*	*Carotenoids*	*Plastic waste degradation*	*Dissolved oxygen, pH*
S-9	SLO-1	*Pearl Oysters*	*Sources of ciguateratoxin*	*Sources of carotenoids*	*Microbes for degradation*	*Nutrients*
	SLO-2	*Pinctada species*	*Jacks, sturgeon, grouper, snappers*	*Micro algae, sponges, mollusks, crustaceans*	*Factors affecting degradation*	*Ammonia*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*History of vaccine development*	*Technology related to monitoring seed lot for better production*	*Types of vaccines*	*Immunomodulators*	*Guidelines for vaccine management*
	SLO-2	*Types of Immunity*	*Temperature Monitoring*	*Vaccine efficacy*	*Innovative methods of delivering immunogens*	*Regulatory issues in vaccine development*
S-2	SLO-1	*Conventional strategies for vaccine improvement*	*Sterilization*	*Inactivated toxins*	*liposomes*	*Regulatory bodies for vaccine management*
	SLO-2	*Current development in vaccines*	*Environmental strategies for better production*	*Inactivated whole bacteria*	*Mechanism of liposome formation*	*Environmental effects of recombinant vaccines*
S-3	SLO-1	*Types of vaccines*	*quality assurance and related areas in vaccine production*	*Inactivated whole virus*	*Classification of liposomes*	*Disease security and biosecurity principles*
	SLO-2	*Live vaccine*	*Analysis of vaccine efficiency*	*Live attenuated bacteria*	*Methods of liposomes preparation*	*Assessing and Monitoring Safety of Vaccines*
S-4	SLO-1	*Attenuated vaccine*	*Vaccine Production techniques*	*Live attenuated viruses*	*Characterisation of liposomes*	*OIE – structure and mission*
	SLO-2	*subunit vaccine*	*growing the microorganisms in maximum titre*	*Subunit vaccines*	*Therapeutic applications of liposomes*	*OIE guidelines for vaccine seed lot management*
S-5	SLO-1	*Peptide vaccine*	*Steps involved in vaccine production*	*Polysaccharide vaccines*	*role of liposomes in delivering vaccines*	*OIE guidelines for the method of vaccine production*
	SLO-2	*killed vaccine*	*Selecting the strain for vaccine production*	*Conjugated vaccines*	*Advantages & disadvantages of liposomes*	*OIE Guidelines for Production facility*
S-6	SLO-1	*Types of adjuvants*	*Culturing bacteria*	*Recombinant DNA vaccines*	*Microspheres*	*Documentation of the manufacturing process*
	SLO-2	*Mode of action of adjuvants*	*Culturing virus*	*Differences between traditional and recombinant vaccine*	*Types of microspheres*	*Guidelines for manufacture of vaccine with an example*
S-7	SLO-1	*PRR ligands*	*Isolation and purification of microbes*	*Edible vaccines*	*Methods of preparing microspheres*	*In process control and batch control*
	SLO-2	*Methods to access vaccine efficacy*	*Inactivation of Microorganism*	*Plasma derived vaccines*	*Characterisation and applications of microspheres*	*organization and responsibilities*
S-8	SLO-1	*Quality control in vaccine production*	*Preservation techniques*	*Virus like particles*	*ISCOMS-Properties of ISCOM based vaccines*	*documentation and evaluation of data*

	SLO-2	Preservation of industrially important microbes	Preservation of industrially important microorganisms	HPV L1 VLP vaccine	Types of ISCOM	Test on final products
S-9	SLO-1	monitoring of microorganisms	Preservation using low temperature	Nanoparticles in vaccine delivery	components of ISCOM	General manufacturing recommendations
	SLO-2	Seed lot systems	freeze drying	Induction of immune responses by nanoparticle based vaccine	Induction of antibody responses by ISCOMs	Final product release tests

Learning Resources	1. *Ronald W. Ellis, "New Vaccine Technologies", Landes Bioscience, 2001.* 2. *Noel Mowat, "Vaccine manual: The production and quality control of veterinary vaccines for use in developing countries", Daya books, 1999.* 3. *Cheryl Barton, "Advances in Vaccine Technology and Delivery", Espicom Business Intelligence, 2009.*

Learning Assessment

	Bloom's Level of Thinking	Continuous Learning Assessment (50% weightage)								Final Examination (50% weightage)	
		CLA – 1 (10%)		CLA – 2 (15%)		CLA – 3 (15%)		CLA – 4 (10%)#			
		Theory	Practice	Theory	Practice	Theory	Practice	Theory	Practice	Theory	Practice
Level 1	Remember Understand	40 %	-	30%	-	30%	-	30%	-	30%	-
Level 2	Apply Analyze	40 %	-	40%	-	40%	-	40%	-	40%	-
Level 3	Evaluate Create	20 %	-	30%	-	30%	-	30%	-	30%	-
	Total	100 %		100 %		100 %		100 %		100 %	

CLA – 4 can be from any combination of these: Assignments, Seminars, Tech Talks, Mini-Projects, Case-Studies, Self-Study, MOOCs, Certifications, Conf. Paper etc.,

Dr. Karthik Periyasamy, Scientist I, Aurozymes Unit, Aurobindo Pharma Limited, Hyderaba, karthikmpk@gmail.com	*Prof. R. B. Narayanan, SVCE, Chennai, rbn@svce.ac.in*	*Dr. Suvankar Ghorai, SRMIST*

Course Code	18BTE404T	Course Name	MOLECULAR BASIS OF DRUG ACTION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards			

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*State the basic knowledge of drug targets and molecular cloning of these targets.*
CLR-2 :	*Discuss the recent advancement and development in human drug target : G-protein coupled receptors.*
CLR-3 :	*Discuss the recent advancement and development in human drug target : ion channels*
CLR-4:	*Discuss the recent advancement and development in human drug target : transporter proteins*
CLR-5:	*Explain how an individual's genetic makeup influences their response to therapeutic drugs.*
CLR-6:	*Discuss about the drug targets and their role in health and disease.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Summaries about the drug targets and method to clone drug targets.*	1	85	80	L	H	H	H	H		M	M	H			H	H	H	H
CLO-2 :	*Explain about G protein coupled receptors.*	1	80	70	L	H	H	H	H		H		H			H	H	H	H
CLO-3 :	*Explain about various ion channels.*	1	80	75	L	H	H	H	H		H		H			H	H	H	H
CLO-4 :	*Explain about various transporters*	1	85	80	L	H	H	H	H		H		H			H	H	H	H
CLO-5 :	*Discuss how an individual's genetic makeup influences their response to therapeutic drugs.*	1	80	70	L	H	H	H	H		H	H	H			H	H	H	H
CLO-6 :	*Summaries about the drug targets and their role in health and disease.*	2	85	80	L	H	H	H	M		H	M	H			H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to molecular pharmacology*	*Introduction to GPCRs and Heterotrimeric G-protein*	*introduction to ion channels*	*introduction Transporter proteins*	*Types of genetic variation*
	SLO-2	*Outline of molecular pharmacology based approaches used to interrogate drug targets.*	*molecular structure of GPCR*	*Classification of ion channels*	*classification of Transporter proteins*	*Thiopurine S-methyltransferase, and Cardiac K+channel polymorphisms*
S-2	SLO-1	*Molecular pharmacology vs traditional pharmacology*	*Classification of GPCR*	*introduction to Voltage-gated ion channels*	*Transporter families of pharmacological interest*	*Polymorphisms affecting drug metabolism*
	SLO-2	*Importance of molecular pharmacology.*	*Activation of GPCR*	*structure of Voltage-gated ion channels*	*The major facilitator superfamily (MFS)*	*Different Scenario how the polymorphisms affecting drug metabolism*
S-3	SLO-1	*Nature of the Drug targets*	*Signal transduction pathways - phospholipase C and adenylyl cyclase*	*Voltage-gated ion channels in health and disease*	*MFS in health*	*Methods for detecting genetic polymorphisms*
	SLO-2	*Future drug targets*	*Measurement of phospholipase C and adenylyl cyclase activation*	*Voltage-gated ion channels and neurotransmission*	*Role MFS in disease*	*PCR-RFLP analysis and Large-scale SNP analysis*
S-4	SLO-1	*Introduction to molecular cloning – from DNA to drug discovery*	*Desensitization and down-regulation of GPCR signalling*	*Voltage-gated ion channels and muscle contraction*	*The neurotransmitter: sodium symporter (NSS)*	*Genetic variation in drug transporters*
