	SLO-2	*The relevance of recombinant DNA technology to pharmacology/drug discovery*	*Role of GPCR phosphorylation in desensitisation*	*Voltage-gated Ca2+ channels*	*Gltph transporters*	*Multi-drug resistance protein MDR1 (P-glycoprotein)*
S-5	SLO-1	*The 'cloning' of drug targets*	*Constitutive GPCR activity*	*Voltage-gated Na+ channels*	*Leucine Transporter(LeuTAa)*	*Multi-drug resistance associated protein (MRP) transporters*
	SLO-2	*Cloning using peptide sequence(s)*	*Promiscuous G-protein coupling*	*Voltage-gated K+ channels*	*NSS in health and disease*	*Organic anion-transporting polypeptide (OATP) transporters*
S-6	SLO-1	*Synthesis of cDNA, and construction of a cDNA library*	*Agonist-directed signalling*	*Other types of voltage-gated ion channels*	*Sodium antiporters*	*Genetic variation in G protein coupled receptors*
	SLO-2	*screening of a cDNA library*	*Allosteric modulators of GPCR function*	*CatSper channels*	*NhaA Na+:H+ antiporter (NhaA) family*	*Genetic variation within the adrenergic receptor family*

S-7	SLO-1	*Cloning using a specific antibody, a functional assay and Polymerase chain reaction.*	*Pharmacological chaperones for GPCRs*	*Ligand-gated ion channels*	*The cell penetrating peptides (CPP)*	*β1-adrenergic receptor single nucleotide polymorphisms*
	SLO-2	*What information can DNA cloning provide?*	*Some key examples of GPCR mutations and their associated disease*	*Pentameric ligand-gated ion channel family*	*CPP in health and disease*	*Are β1AR SNPs risk factors for heart failure?*
S-8	SLO-1	*Pharmacologic profile of the 'cloned' and the 'native' drug target*	*GPCR dimerisation*	*Nicotinic acetylcholine receptors*	*ATPase transporters*	*β2AR SNPs and asthma*
	SLO-2	*'cloned' and the 'native' drug target*	*Methods to study GPCR dimerisation*	*5-HT3 receptor channels and GABAA receptors*	*ATPase transporters in health and disease*	*β2AR SNPs and cardiovascular function*
S-9	SLO-1	*Reverse pharmacology*	*GPCR splice variants 1*	*P2X receptor structure, signalling and pharmacology*	*Role of transporters in drug pharmacokinetics*	*Functional consequences of the Trp64Arg SNP*
	SLO-2	*Reverse pharmacology illustrated on orphan GPCRs*	*Clinical and pathophysiological relevance of GPCR splice variants*	*Therapeutic potential of P2X receptors*	*Role of transporters in cellular homeostasis*	*β3AR Trp64Arg SNP: disease associations*

Course Code	18BTE309T	Course Name	PLANT NUTRITION AND PHYSIOLOGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the food production can be limited by the availability of fresh water and nutrients*
CLR-2 :	*Analyze the role of proton pumps in plant nutrition*
CLR-3 :	*Illustrate the flow of each of the macronutrients from soil into the plant body*
CLR-4:	*Compare and evaluate the symptoms of macronutrient deficiencies*
CLR-5:	*Study the roles of plants and soil microbes on global nutrient cycles*
CLR-6:	*Interpret the plant responses to deficiency, limitation and a toxic level of a micronutrient*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Describe the Plant-water relations, uptake and transport*	*1*	*80*	*80*	*M*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Plant Nutrition*	*Nutrient uptake and transport*	*Overview*	*Potassium*	*Introduction*
	SLO-2	*Water & mineral nutrients*	*Overview*	*Plant nutrient requirements and fertilizers*	*The ashes in the pot, potash*	*Micronutrients and Metals*
S-2	SLO-1	*Mineral nutrients*	*Energizing the membrane*	*Macronutrients - N, P, K, S,Mg, and Ca*	*Potassium uptake and remobilization*	*Nutrients movement*
	SLO-2	*Macronutrients & micronutrients*	*Plasma membrane proton ATPases*	*The most abundant mineral element in a plant*	*Biphasic uptake response*	*The apo- and symplast & membrane transporters*
S-3	SLO-1	*Water uptake and transport*	*Vacuolar pumps*	*Nitrogen metabolism*	*Sulfur*	*Iron*
	SLO-2	*Physical laws*	*Vacuolar H+-ATPase and Vacuolar H+-PPase*	*Uptake, assimilation and remobilization*	*Global cycles and cells*	*Abundant, important, and largely insoluble*
S-4	SLO-1	*Membrane-bound water channels*	*Potassium Uptake*	*Nitrogen regulation*	*Sulfur uptake*	*Copper*
	SLO-2	*Aquaporins*	*Uptake & response*	*Nitrogen sensing, signaling and deficit responses*	*SULTR transporters*	*Critical for aerobic life*
S-5	SLO-1	*Movement of water*	*Potassium Transport*	*Strategies to mitigate the environmental consequences of N fertilizers*	*Sulfur – metabolic regulation*	*Zinc*
	SLO-2	*Water moves through Soil – Plant – Atmosphere Continuum (SPAC)*	*Co-transporters, channels, The guard cell model*	*Field-based practices and breeding*	*Addressing S-deficiency in plants*	*Deficiency common in plants and people*
S-6	SLO-1	*Water uptake in roots*	*Potassium Homeostasis*	*The most diverse set of functions*	*Magnesium*	*Manganese*
	SLO-2	*From soil to stele*	*K+ mobilization is critical for K+ homeostasis*	*Phosphorus*	*Magnesium in rocks and cells*	*Central to the water-splitting, oxygen-evolving reaction*
S-7	SLO-1	*SPAC*	*Sodium Toxicity, Transport, and Tolerance*	*Phosphate acquisition*	*Mg - Uptake and assimilation*	*Zinc: Deficiency common in plants and people, Nickel: Necessary but rarely limiting*
	SLO-2	*Flow of water through the xylem*	*The challenges of soil salinization*	*Mining & foraging*	*MRS/ MGT family*	*Manganese: Central to the water-splitting, oxygen-evolving reaction. Metal tolerance and metal hyper accumulation*

S-8	SLO-1	*SPAC*	*Sodium toxicity and tolerance*	*Phosphate uptake & transport*	*Calcium*	*Toxic metals and metalloids*
	SLO-2	*From leaf to air*	*Halophytes and salt-tolerant plants*	*PHT1 family*	*Low free cytosolic levels*	*Arsenic, Cadmium, Aluminum*
S-9	SLO-1	*Water deficit*	*Ion pumps, channels*	*Strategies*	*Calcium uptake and transport*	*Essential micronutrient*
	SLO-2	*Plant responses*	*Transporters contribute to Na+ tolerance*	*Improve crop plant phosphorus use efficiency*	*Calcium signaling*	*Boron, Silicon, Chlorine, Selenium*

Course Code	18BTE310T	Course Name	PLANT HORMONES AND SIGNALING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Illustrate how plant hormones contribute to their growth, development, reproduction and stress responses*
CLR-2 :	*Understand the fundamental properties, tropic movement and mechanism of actions of auxin*
CLR-3 :	*Interpret the effects of Cytokinin, and its receptor perception & signaling*
CLR-4:	*Study the interaction between Gibberllins receptors and regulation of physiological functions*
CLR-5:	*Interpret the phenotypes of Arabidopsis seedlings mutated in ethylene perception, and reconstruct a genetic pathway from double mutant phenotypes*
CLR-6:	*Illustrate the interactions of the core signaling for controlling the functions of Abscisic acid in plants*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Gain knowledge on major plant hormones*	1	80	80	L	M	H	H	H	M	H	H	H	H	H	H	H	H	H
CLO-2 :	*Explain the history, synthesis, transport and functions of auxin in plant life*	2	85	75	M	M	H	H	H	H	M	H	H	M	H	H	H	H	H
CLO-3 :	*Describe the cytokinin biosynthetic pathway, two methods of analyzing and protein kinase cascade*	2	75	80	M	M	M	H	M	M	H	M	H	M	H	H	H	H	H
CLO-4 :	*Discuss the processes that control the accumulation of bioactive GAs, role of DELLAs and physiological responses*	2	85	80	M	M	H	H	H	M	M	M	H	M	H	H	H	H	H
CLO-5 :	*Gain knowledge the different physiological responses to ethylene*	3	85	75	L	H	M	H	M	M	H	M	H	L	H	H	H	H	H
CLO-6 :	*Explain the ways that ABA affects development of roots, fruits and seeds*	2	80	80	M	M	H	H	L	M	H	M	H	M	H	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*What are phytohormones*	*Historical studies of auxin*	*Overview*	*History and overview*	*Abscisic acid*
	SLO-2	*Types*	*Classical studies*	*The discovery of cytokinins*	*Inhibitor of an inhibitor*	*Plant processes*
S-2	SLO-1	*Overview of hormone action*	*Auxin signaling pathway*	*Cytokinin homeostasis*	*GA synthesis and homeostasis*	*Biosynthesis and homeostasis*
	SLO-2	*Signaling*	*Biosynthesis and homeostasis*	*Structure of major CKs*	*GA deactivation & transport*	*Zeaxanthin epoxidase, NCED, VP14 & CYP707A*
S-3	SLO-1	*Hormones and vegetative developments*	*Tools in auxin research*	*The Agrobacterium tmr gene is a CK biosynthesis gene*	*GA perception and signaling*	*Transport*
	SLO-2	*Auxin & cytokinin*	*Experimental evidences*	*CYP735A*	*GID1 encodes a GA receptor*	*ABA movement*
S-4	SLO-1	*Vegetative development*	*Auxin transport*	*Formation of active CKs*	*GA-regulated growth repressors*	*Perception and signaling*
	SLO-2	*Strigolactones, Gibberellins & Brassinosteroids*	*Polar auxin transport*	*LONELY GUY, IPT over expression*	*DELLA proteins*	*PYR/ RCAR*
S-5	SLO-1	*Hormonal control of reproductive development*	*Chemiosmotic model*	*CK inactivation by conjugation or degradation*	*GA's roles in whole-plant physiology*	*ABI1 encodes a PP2C protein phosphatase*
	SLO-2	*Transition to flowering, development of flowers and fruits*	*Auxin moves through efflux and influx carrier proteins*	*Cytokinin oxidase*	*Response to salt stress, seed germination and Flowering*	*PP2C binds ABA + receptor & SnRK kinase similarly*
S-6	SLO-1	*Reproductive development*	*Types of carrier proteins*	*CK acts as a paracrine and a long-distance signal*	*Ethylene is a gaseous hormone*	*Calcium-dependent protein kinases*
	SLO-2	*Ethylene & Abscisic Acid*	*AUX1 / LAX, ABCB family & PIN family*	*PUP and ENT*	*Triple response*	*Transcription factors are major targets of SnRK2s and CDPKs*
S-7	SLO-1	*Hormonal responses to abiotic stress*	*Auxin perception - receptors*	*CK perception and signaling*	*Ethylene synthesis and homeostasis*	*ABA's roles in the control of guard cell turgor*
	SLO-2	*Abscisic Acid*	*ABP1, TIR1 and AFP protein family of F-box proteins*	*Two-component-like system*	*Burg and Thimann's studies, The Yang cycle*	*SnRK2s and PP2Cs contribute to guard cell responses*
S-8	SLO-1	*Hormonal responses to biotic stress*	*Auxin signaling*	*Downstream of the receptors*	*Ethylene response*	*ABA in whole-plant processes*

	SLO-2	*Jasmonates & Salicylates*	*Aux/IAA proteins, auxin-responsive transcription factors*	*Histidine phosphotransfer proteins (HPTs) and response regulators (RRs)*	*Receptors and downstream signaling*	*drought stress*
S-9	SLO-1	*Hormonal crosstalk*	*Auxin action*	*CK action in whole-plant processes*	*Ethylene's roles*	*surviving extreme desiccation*
	SLO-2	*Cross-talk in defense signaling*	*Whole-plant processes*	*Abiotic and biotic stress responses*	*Whole-plant processes*	*systemic stress responses*

Course Code	18BTE311T	Course Name	PATHOGENESIS - RELATED PROTEINS IN PLANTS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the six different types of pathogens by kingdom and by mode of pathogenicity*
CLR-2 :	*Analyze the role of plant defence proteins against pathogens*
CLR-3 :	*Understand the knowledge about the structural, catalytic mechanism and regulation of PR*
CLR-4:	*Compare and evaluate the plant – insect and other pathogen interactions*
CLR-5:	*Study the roles of PR-Proteins in physiological and developmental processes in plants*
CLR-6:	*Interpret the plant molecular responses to biotic factors*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Describe the three ways that plants defend themselves against pathogens*	1	80	80	M	H	H	H	-	H	H	M	H	H	H	H	H	H	H
CLO-2 :	*Explain the physiological functions of pathogenesis related proteins in plants*	2	85	75	M	-	H	H	-	M	H	H	H	H	H	H	H	H	H
CLO-3 :	*Comprehend the concept of cell wall degrading enzymes produced from plants as a defence*	2	75	80	H	M	-	H	H	H	H	M	H	H	H	H	H	H	H
CLO-4 :	*Discuss the different ways of resistance to pathogens at molecular level*	2	85	80	-	M	H	H	-	H	H	M	H	H	H	H	H	H	H
CLO-5 :	*Explain the importance of PR-Proteins in agriculture crop development*	3	85	75	H	H	H	H	H	H	H	-	H	M	H	H	H	H	H
CLO-6 :	*Gain knowledge about the signals, synthesis, binding to the receptor and role during plant – pathogen interactions*	2	80	80	H	M	H	H	-	H	H	M	H	M	H	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Pathogens make plants sick*	*Introduction*	*Plant chitinases*	*The PR-6 Family*	*PR gene expression*
	SLO-2	*Pathogens include viruses, bacteria, fungi, oomycetes and nematodes*	*PR- 1 Proteins*	*PR-3, 4, 8, 11*	*Proteinase Inhibitors in Plant-Microbe and Plant-Insect Interactions*	*Signals and Putative Receptors that Activate PR Gene Expression*
S-2	SLO-1	*Brief history*	*Characterization*	*Structure of the Proteins*	*Occurrence and Structure*	*Receptors*
	SLO-2	*Plant pathology*	*Acidic and basic proteins*	*PR-3, A Plant-Specific Chitinase Family (Family 19,), Family 18, The Ubiquitous*	*Plant Proteinase Inhibitors with Potential Defensive Capabilities*	*Leucine-rich repeat receptor kinases , LysM receptor proteins*
S-3	SLO-1	*The disease triangle concept*	*Occurrence*	*PR-8/Class III Chitinases, PR-11 Chitinases*	*Proteinases and Proteinase Inhibitors*	*Pathogens Activate PR Genes by Different Pathways*
	SLO-2	*Pathogen, Host, Environment*	*PR - proteins from other organisms & Functions*	*Other Related Proteins, The PR-4 Family*	*Plant–Microbe Interactions*	*Reactive oxygen species (ROS), salicylic acid (SA), ethylene, and jasmonates*
S-4	SLO-1	*Strategies of pathogenicity*	*Expression of PR-1*	*Catalytic Mechanisms and Specificities*	*Proteinases and Proteinase Inhibitors*	*Transcriptional Regulation of PR Gene Expression*
	SLO-2	*Pathogen lifestyles – biotropy, necrotrophy, and hemibiotrophy*	*Pathogens/wounds, salicylic acid, ethylene and other hormones, UV light and developmental stimuli*	*Family 18 & 19 Chitinases*	*Plant–Insect Interactions*	*W-box, GCC box, MRE-like sequence & G-box*
S-5	SLO-1	*Plant immune responses*	*PR-1 promoter analysis*	*Structure and Regulation of the Genes*	*Ribosome inactivating proteins (RIP)*	*GCC box-binding proteins*
	SLO-2	*Pathogen-triggered & Effector-triggered immunity*	*Acidic and basic proteins*	*Chib (PR-8) and Chic (PR-11) Genes*	*Structure*	*EREBP-1, EREBP-2, EREBP-3, and EREBP-4*
S-6	SLO-1	*Pathogen-recognition receptors*	*Introduction*	*Functions of Plant Chitinases*	*RIP*	*Genetic studies of PR gene expression*
	SLO-2	*PTI stimulates production of phytoalexins, reactive oxygen and callose*	*PR-2 – β-1,3-Glucanases*	*Antifungal and other physiological*	*Function, and Engineering*	*SA-inducible promoter-GUS,*
S-7	SLO-1	*Recognition and response to effectors through paired R proteins*	*Structural classes*	*PR-5 - Thaumatin-like proteins*	*Plant defensins*	*Transgenic plants*
	SLO-2	*ETI and biochemical response*	*PR-2 Nomenclature*	*Occurrence, Physico-Chemical properties*	*Introduction*	*Over expression of PR proteins*
S-8	SLO-1	*Induction*	*Biological functions of β-1,3-Glucanases*	*Biological properties*	*Protein Structure*	*PR Proteins*

	SLO-2	*Pathogenesis Related proteins (PR-Proteins)*	*Plant reproductive and defence*	*Taste, Antifungal Activity, TLPs as Anti-Freeze Proteins & TLPs as Inhibitors?*	*Disulfide-linked cysteine residues*	*Antifungal and insecticidal proteins*
S-9	SLO-1	*PRs, and PR like proteins*	*Regulation of β-1,3-Glucanases expression*	*Regulation of TLP Expression*	*Antimicrobial Activities*	*PR proteins in Rice*
	SLO-2	*Occurrence, properties and functions*	*Developmental and hormonal & pathogenic*	*Microbial Infection, Osmotic Stress, Abscisic Acid and Ethylene, Salicylate, Methyl Jasmonate, and Elicitors, Wounding.*	*Structure activity relationships, Mode of action*	*IR72 and IR64*

Course Code	18BTE312T	Course Name	FOOD SCIENCE AND NUTRITION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Identify the need for greater and more efficient utilization of the existing food sources*
CLR-2 :	*Demonstrate nutritional quality and nutritional requirement*
CLR-3 :	*Solve calculate energy requirements of the body*
CLR-4:	*Describe about new trends in nutrition*
CLR-5:	*Design balanced meal preparation*
CLR-6:	*Identify antinutritional factors in food*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Define basic concepts of Food and Nutrition*	2	80	70		H	H			H		H	H				H	H	H
CLO-2 :	*Formulate food with daily dietary allowances*	2	80	70		H	H				H						H	H	H
CLO-3 :	*Identify the scope and prospects of food science in food industries*	2	80	70	M	H	H	M	H		M		H		H		H	H	H
CLO-4 :	*Design diet according to energy requirements of the body*	2	80	70	H		H		H		M		H		H		H	H	H
CLO-5 :	*Design diet for different age group and for people under diseased condition*	3	80	70	H	H	H	H	H		M		H		H		H	H	H
CLO-6 :	*Evaluate food constituents and its importance*	2	80	70	H	H	H	H	H		H	H	H		H	H	H	H	H

Program Learning Outcomes (PLO): columns 1–15 above.

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Food as a source of energy*	*Functions of protein, fat and carbohydrates and their dietary requirements*	*Carbohydrates- dietary requirements and functions, deficiency in diet*	*Function and daily intake of water*	*New trends in nutrition-nutitional value of fast food and junk food*
	SLO-2	*Macro and micro nutrients*	*Sources of Carbohydrates*	*Nutritional significance of carbohydrates ,*	*Daily loss of body water and deficiency of water*	*Probiotics and prebiotics*
S-2	SLO-1	*Carbohydrate, Fat and Protein*	*Classification of Carbohydrates*	*Digestion, metabolism and absorption of carbohydrates*	*Sources of vitamins*	*Antioxidants*
	SLO-2	*Food requirement in human body*	*Polysaccharides –Starch and dietary fibers*	*Nutritional significance of proteins*	*Fat soluble vitamins –A,D,E, and K*	*Nutraceuticals*
S-3	SLO-1	*Planning balanced diets to meet the requirements of different age groups*	*Chemical composition of cereals*	*Animal sources of protein*	*Water soluble Vitamins-B-complex vitamins, Anemia –preventing vitamins and Vitamin-C*	*Fortification*
	SLO-2	*Solving Problems-*	*Nutritional value of cereals*	*Digestion, metabolism and absorption of protein*	*Effect of cooking on vitamins*	*Significance of nutritional labeling*
S-4	SLO-1	*Energy requirements of the body*	*Protein- dietary requirements, functions, and deficiency in diet*	*Nutritional significance of lipids*	*stability of vitamin during food processing*	*Trans fatty acids*
	SLO-2	*Calculations of energy value based on proximate principles*	*Sources of Protein*	*Classification of lipids*	*toxicity due to vitamins*	*Role of photochemical*
S-5	SLO-1	*BMR, Test for basal metabolism and Factors affecting BMR*	*Chemical composition of pulses (grams and dhal)*	*Plant Sources of fat/oil*	*bioavailability of vitamins*	*Naturally occurring food toxicants in foods*
	SLO-2	*Estimation of energy requirements*	*Nutritional value of pulses*	*Marine and animal sources of fat/oil*	*reasons for losses of vitamins in foods*	*protease inhibitors*
S-6	SLO-1	*Instrumental methods to calculate caloric value of food*	*Antinutritional factors in pulses*	*Digestion, metabolism and absorption of fat*	*Role of these constituents in food industry*	*hemagglutinins*
	SLO-2	*RDS's for specific nutrients*	*Chemical composition of oil seeds*	*The food pyramid*	*Mineral in food*	*goitrogens*
S-7	SLO-1	*Dietary allowances fixed by FAO*	*effect of processing on the nutritional value of food grains (cereals and pulses)*	*Therapeutic diets – A brief account.*	*Classification of minerals*	*lathyrogens*

	SLO-2	*Dietary allowances fixed by WHO*	*Chemical composition of cereals*	*Planning of balanced meal*	*Sources of minerals in food*	*toxic amino acids*
S-8	SLO-1	*Recommended dietary allowances for Indians fixed by ICMR*	*Nutritional value of cereals*	*Dietary requirement for different Age group*	*stability status of minerals in food*	*naturally occurring carcinogens in food*
	SLO-2	*comparison of Indian dietary allowances with that of FAO/WHO standards*	*Chemical composition of pulses (grams and dhal)*	*Dietary requirement for women at different stages of life*	*Nutritional value of fruits*	*Carcinogens produced during food processing and storage*
S-9	SLO-1	*Modifying energy content of meals*	*Nutritional value of pulses*	*Meal frequency pattern and variety in balanced diet*	*Nutritional value of vegetables*	*Acrylamide formation in food*
	SLO-2	*Under weight/,overweight/obesity*	*Antinutritional factors in pulses*	*Calculating nutritional value of a recipe*	*Nutritional value of biverages*	*furan formation in food*

Course Code	18BTE405T	Course Name	THERAPEUTIC COMPOUNDS FROM PLANTS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Gain knowledge on historical uses of plants and plant parts as medicines and traditional knowledge*
CLR-2 :	*Understand the techniques involved in Bioprospecting*
CLR-3 :	*Understand the major secondary metabolic pathways that produce pharmaceutically important compounds*
CLR-4:	*understand the structures and roles of the major classes of photochemicals with medicinal properties*
CLR-5:	*Gain insight into engineering for enhanced production of pharmaceutically important metabolites in planta*
CLR-6:	*know the mechanism of action of major known pharmaceutically important compounds in therapeutics*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Identify plants and plant parts used as medicine traditionally*	1	80	80	L		M	H		H	H	H	H	H	H	H	H	H	H
CLO-2 :	*Apply techniques to screen plants for drugs and medicines*	2	85	75	H	H	H	H	H	H	H	H	H	H	H	H	H	H	H
CLO-3 :	*Analyze the secondary metabolic pathways that produce several medicinally important compounds*	2	75	80	H	H	M	H	H	M		M	H	H	H	H	H	H	H
CLO-4 :	*Deduce structure activity relationship*	3	85	80	H	H	H	H	H		L	L	H	H	H	H	H	H	H
CLO-5 :	*Predict the metabolic branch points that can be targeted for engineering*	3	85	75	H	H	H	H	H	H	H	L	H	L	H	H	H	H	H
CLO-6 :	*Explain the mechanism of action of major known pharmaceutically important compounds in therapeutics*	2	80	80	H	H	H	H	H	M	M	M	H	H	H	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Plants vs Medicinal Plants*	*Overview of extraction and purification of Phytoconstituents*	*Primary vs Secondary Metabolism*	*In vitro Synthesis – Advantages and dis advantages*	*Therapeutic Applications of Phytoconstituents*
	SLO-2	*Taxonomy and validation of Herbal Medicine*	*Extraction Techniques*	*Examples of Major Secondary Metabolic Pathways*	*Omics, Systems and Semi synthetic methods*	*Potential drugs available in the market*
S-2	SLO-1	*Traditional Indian Medicine*	*Different Types*	*The Mevalonate Pathway*	*Metabolic Engineering - Strategies*	*Mechanisms of Action*
	SLO-2	*Traditional Chinese Medicine*	*Advantages and Limitations of Extraction Techniques*	*Examples*	*Alteration, Silencing and augmentation of functions*	*Analgesic action of alkaloids (Morphine)*
S-3	SLO-1	*Traditional Knowledge*	*Analytical Techniques - Spectrometry*	*The Shikmate Pathway*	*Pioneering studies microbial synthesis of plant metabolites*	*Antihyperglycemic action of alkaloids (Piperene)*
	SLO-2	*Ethanobotany*	*Purification*	*Examples*	*Reconstitution of metabolic pathways in microbes*	*Anti cancer activity of alkaloids (Berberine)*
S-4	SLO-1	*Quality Assurance of Herbal Medicines*	*Analytical Techniques – Chromatography*	*The Phenyl Propanoid and the Polyketide Pathway*	*Host Selection and Pathway reconstitution*	*Anticancer activity of Vinca alkaloids*
	SLO-2	*Over the Counter Herbal Medicines*	*Bioassay Guided Fractionation*	*Examples*	*Optimization*	*Antibacterial action of alkaloids (ciproflaxicin)*
S-5	SLO-1	*Plant Extracts vs Purified Compounds*	*Identification*	*Biosynthesis of Alkaloids*	*Metabolic Engineering for alkaloid production in Yeast*	*Neurostimulatory effects of alkaloids*
	SLO-2	*Quest for Active Compounds*	*Analytical Techniques –Mass Spectrometry*	*Tissue Cultures for production of metabolites*	*Metabolic Engineering for terpenoid production in Yeast*	*Neuroprotective effects of alkaloids*
S-6	SLO-1	*Modern Approaches*	*Standardization*	*Examples*	*Metabolic Engineering for carotenoid production in Yeast*	*Antiinflammatory mechanism of action of flavanoids*
	SLO-2	*Screening plants for Drugs*	*Clinical Validation*	*Organ Cultures for production of metabolites*	*Metabolic Engineering for caffeine production in Yeast*	*Antimalarial action of Terpenoids (Quinine)*
S-7	SLO-1	*Plant Families associated with Drug Production*	*Example from TIM to clinical trials*	*Examples*	*Other Examples*	*Antimalarial action of Terpenoids (Artemesin)*

	SLO-2	*Drug discovery by relatedness*	*Example from TCM to clinical trials*	*Hairy Root Cultures as a means for enhanced metabolite production*	*Metabolic Engineering in Plants and Plant Cell Cultures*	*Terpenoids against Trypaonosomes*
S-8	SLO-1	*Phytoconstituents*	*Central Drugs Control Standard Organization*	*Manipulation of hairy roots for metabolite production*	*Metabolic Engineering of Terpenoids in Plants*	*Terpenoids against Leishmanias*
	SLO-2	*Alkaloids*	*Drugs Technical Advisory Board (DTAB) and Drugs Consultative Committee (DCC)*	*Production of Gingsenolides*	*Metabolic Engineering of Alkaloids in Plants*	*Ephedra- Use and Misuse*
S-9	SLO-1	*Flavanoids*	*Regulatory Approval*	*In vitro production – Role of Endophytes*	*Metabolic Engineering of Flavanoids in Plants*	*Ginseng – The Panacea*
	SLO-2	*Terpenoids*	*Pharmacovigilence*	*Production of Taxol*	*High throughput methods to identify genes intermediates and pathways*	*Traditional vs Western Medicine*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Describe safety limits of food additives and risk assessment*
CLR-2 :	*Memorize to prepare HACCP based SOP*
CLR-3 :	*Prepare HACCP program to any food industry*
CLR-4:	*Apply quality auditing in the food industries*
CLR-5:	*Describe ISO 9000, ISO 14000, ISO 22000*
CLR-6:	*Employ ISO 22000 in food industry*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Describe about the food safety terms*	2	80	70		H				H		H	H				H	H	H
CLO-2 :	*Identify the issues of food safety and quality*	2	80	70		H	H				H						H	H	H
CLO-3 :	*Explain the process of food safety analysis*	2	80	70	M	H	H	M	H		H		H		H		H	H	H
CLO-4 :	*Describe basic concepts of Food Safety and Quality Management*	2	80	70	H		H		H		M		H		H		H	H	H
CLO-5 :	*Set up and operate HACCP, SOP and ISO 22000 for food industries*	3	80	70	H	H	H	H	H		M		H		H		H	H	H
CLO-6 :	*Practice quality auditing methods in the food industries*	2	80	70	H	H	H	H	H		M		H		H	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Definition of Quality, Dimensions of Quality*	*Safety limits of Food additives*	*Sampling*	*Quality of Foods*	*Seven old and new Quality management tools*
	SLO-2	*Quality Planning, Quality costs*	*Risk assessment and risk benefit Indices of human exposure*	*concept, methods and importance of sampling*	*Quality Standards - mandatory and optional standards*	*Statistical process control*
S-2	SLO-1	*Basic concepts of Food Safety and Quality Management*	*acute toxicity*	*Statistical Process and Quality Control*	*Food Safety Systems*	*Mean & range chart, P chart and C chart*
	SLO-2	*Historical Review, Principles of FSQM*	*mutagenicity and carcinogenicity*	*concept, importance and tools*	*ISO 9000, ISO 14000, ISO 22000*	*Seven deadly wastages*
S-3	SLO-1	*Leadership Concepts*	*reproductive and developmental toxicity*	*Control charts*	*Mechanism of developing and fixing food standards*	*PDCA cycle*
	SLO-2	*Quality Council, Quality Statements*	*teratogenicity, neurotoxicity and behavioral effect, immunotoxicity*	*importance, types, design process control limits*	*Good Manufacturing Practice*	*Quality circle, Quality audit, Internal audit*
S 4-5	SLO-1	*Strategic Planning*	*Determination of the limit for addition*	*Errors in process control*	*HACCP Standards of Weights*	*Continuous improvement of productivity proficiency testing for product quality*
	SLO-2	*Barriers to Food Safety Implementation*	*NOEL – Method of determining toxicity*			
S-6	SLO-1	*Barriers to Food Safety Implementation*	*LD50, FSSAI regulations and GRAS additives.*	*Process Capability.*	*HACCP Standards of Measures*	*Six Sigma Concept*
	SLO-2	*Definition of Quality, Dimensions of Quality*	*Safety limits of Food additives*	*Sampling*	*Quality of Foods*	*Seven old and new Quality management tools*
S-7	SLO-1	*Quality Planning, Quality costs*	*Risk assessment and risk benefit Indices of human exposure*	*concept, methods and importance of sampling*	*Quality Standards - mandatory and optional standards*	*Statistical process control*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Chemical nature of enzymes*	*Basics of enzyme kinetics*	*Production of enzymes on a commercial scale*	*Enzyme immobilization*	*Applications of enzymes - Food processing*
	SLO-2	*Characteristics of enzymes*	*Michaelis Menten Kinetic equation*	*Nature of the extraction medium*	*Advantages and disadvantages*	*Starch and sucrose industries*
S-2	SLO-1	*Enzymes and their actions*	*Significance of Michaelis-Menten Kinetics*	*Extraction of soluble enzymes*	*Physical methods of enzyme immobilization*	*Dairy industries*
	SLO-2	*Mechanism of enzyme action*	*Solving problems in enzyme kinetics*	*Extraction of membrane-bound enzymes*	*Chemical methods of enzyme immobilization*	*Brewing industries*
S-3	SLO-1	*Structural components of enzymes*	*Evaluation of Michaelis-Menten kinetic parameters*	*Technologies for enzyme production*	*Carrier-based immobilization*	*Beverage industries*
	SLO-2	*The active site of an enzyme*	*Line weaver Burk plot, Hanes Woolf plot and Eadie Hofstee plot*	*Recovery and purification methods for enzymes*	*Carrier free immobilization*	*Leather industries*
S-4	SLO-1	*Cofactors and coenzymes*	*Turn over number, Catalytic efficiency*	*Cell disruption*	*Immobilization by using porous support*	*Textile industries*
	SLO-2	*Role of cofactors and coenzymes*	*Enzyme Inhibitors*	*Solid-liquid separation*	*Mass transfer effects and diffusion limitations*	*Detergent industries*
S-5	SLO-1	*Classification of enzymes*	*Types of enzyme inhibition*	*Concentration*	*Immobilization by using non-porous support*	*Pulp and paper industries*
	SLO-2	*Enzyme commission classification of enzymes*	*Competitive inhibition*	*Precipitation*	*Mass transfer effects and diffusion limitations*	*Polymer industries*
S-6	SLO-1	*Oxidoreductase,Transferase, Hydrolase*	*Uncompetitive inhibition*	*Liquid- liquid extraction*	*Stabilization of immobilized enzymes in aqueous environment*	*Analytical applications of enzymes*
	SLO-2	*Lyase, Isomerase, Ligase*	*Noncompetitive inhibition*	*Ion exchange chromatography*	*Stabilization of immobilized enzymes in non-aqueous environment*	*Diagnostic applications of enzymes*
S-7	SLO-1	*Enzyme-substrate complex formation models*	*Substrate inhibition*	*Gel filtration, Affinity chromatography*	*Electrostatic and steric effects in immobilized enzyme systems*	*Role of enzymes - Pharmaceuticals*

	SLO-2	*Lock and Key and Induced fit models*	*Feedback inhibition*	*Criteria of purity – Electrophoresis*	*Analyzing the effectiveness factor of immobilized enzymes*	*Medicine*
S-8	SLO-1	*Mechanisms of enzyme catalysis*	*Enzyme deactivation model*	*Isoelectric focusing, Capillary electrophoresis*	*Applications of immobilized enzyme systems*	*Medical research*
	SLO-2	*Proximity and orientation effects, Conformational distortion*	*Allosteric activation and inhibition*	*Monitoring of purification of enzymes*	*Limitations of immobilized enzyme systems*	*Agriculture*
S-9	SLO-1	*Factors affecting enzyme activity*	*Solving problems in enzyme inhibition*	*Determination of molecular weight of enzymes- MALDI-TOF*	*Solving problems in enzyme immobilization and their kinetics*	*Environment protection*
	SLO-2	*Effect of substrate, enzyme and inhibitor concentration on enzyme activity*	*Solving problems in enzyme inhibition*	*Drying and packing*	*Solving problems in enzyme immobilization and their kinetics*	*Biofuels development*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire knowledge on membrane and its types cum application*
CLR-2 :	*Understand the casting and characterization of membrane*
CLR-3 :	*Analyse the functions of reverse osmosis, Micro and ultra-filtration membranes*
CLR-4:	*Discuss the functions of dialysis and electro dialysis membrane*
CLR-5:	*Discuss the membranes as reactor and distillation of alcohol*
CLR-6:	*Get acquaint on membranes for industrial application*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Apply membranes for bioprocess industries*	2	80	90	M	M	H	M	M						H	H	H	H	H
CLO-2 :	*Demonstrate methods of casting membrane*	2	85	90	M	M	H	M	M						H	H	H	H	H
CLO-3 :	*Utilize the selection of membranes for micro and Macro molecules separation*	2	75	80	M	M	H	M	L						H	H	H	H	H
CLO-4 :	*Apply membrane for dialysis*	2	90	85	M	M	H	M	M						H	H	H	H	H
CLO-5 :	*Demonstrate membrane for distillation and production*	2	80	80	M	M	H	M	M						H	H	H	H	H
CLO-6 :	*Explain membrane in upstream and downstream process economically*	2	80	80	M	M	H	M	H						H	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of membrane separation process*	*Membrane Types, Materials, Preparation and Characterization*	*Reverse Osmosis, Nano filtration, Ultra filtration, and Microfiltration*	*Dialysis, pervaporation and electro dialysis*	*Membrane distillation, Membrane bioreactors and industrial membranes*
	SLO-2	*Equilibrium and rate controlled separation*	*Types of Synthetic Membranes- Micro porous Membranes*	*Concept of osmosis*	*Principles of Dialysis*	*Membrane contactors, Principles*
S-2	SLO-1	*What is membrane?*	*Asymmetric, thin film*	*Determination of osmotic pressure and thermodynamics of osmosis*	*Dialysis membranes*	*Advantages and Disadvantages*
	SLO-2	*Basic principles of Membrane Separation*	*Electrically Charged Inorganic Membrane*	*Phenomena of Reverse osmosis*	*Mass transfer in dialysis*	*Applications*
S-3	SLO-1	*Historical development of Membranes*	*Membrane Modules-Plate and frame, Tubular.*	*Models of Reverse osmosis*	*Design of Dialysis membranes*	*Membrane Distillation*
	SLO-2	*Golden age of Membranes*	*Spiral wound and Hollow fiber*	*Design and operating parameters*	*Applications and its advantages.*	*Mechanism*
S-4	SLO-1	*Classification of Membrane Processes*	*Typical Flow pattern*	*Design of Reverse Osmosis module*	*Principles*	*Membrane recycle bioreactors*
	SLO-2	*Pressure driven, Concentration gradient and Electrical Potential*	*Membrane Material*	*Principles , Transport Mechanism*	*Operation of Pervaporation*	*Plug flow bioreactors*
S-5	SLO-1	*Advantages of Membrane Processes*	*Pore Characterization*	*Mass transfer and Industrial Application of Nano filtration*	*Application of Pervaporation*	*Perstraction*
	SLO-2	*Disadvantages of Membrane Processes*	*General Methods of Membrane Manufacture*	*Process Limitation*	*Design of pervaporation modules*	*Flux and separation in Perstraction*
S-6	SLO-1	*Biotechnology Industry*	*Phase Inversion Method,*	*Basic principles of Ultra filtration Types of Ultra filtration*	*Factors affecting pervaporation*	*Membrane Chromatography*
	SLO-2	*Micro and Macromolecule Separation*	*Track–etching*	*Factors affecting Ultra filtration and membrane flux of ultra filtration*	*Applications*	*Design and application*
S-7	SLO-1	*Chemical and Pharmaceutical Industry*	*Sol-gel Peptisation Method*	*Principles of Microfiltration*	*Principles of Electro dialysis Ion Exchange Membranes*	*Membranes in Wastewater Treatment*
	SLO-2	*Recovery of salt, acid and Bases*	*Interfacial Polymerization*	*Microfiltration Membranes*	*Energy requirements*	*Design and Application*
S-8	SLO-1	*Food and Dairy Industry*	*Melt pressing*	*Mechanism of Transport*	*Current utilization and Efficiency*	*Membrane in Desalination*

	SLO-2	*Dairy, animal Products , Fruits and Vegetables etc.*	*Film Stretching*	*Flow characterization*	*Application*	*Membrane in in Fuel cells*
S-9	SLO-1	*Electrochemical Industry*	*Template Leaching*	*Fouling and applications in Microfiltration*	*Batch electro- dialysis*	*Biomedical application of membranes*
	SLO-2	*Effluent Treatment Plant*	*Ion Exchange Membrane Preparation*	*Energy Consideration and Application*	*Continuous electro- dialysis*	*Blood Oxygenator and Drug Delivery*

Course Code	18BTE315T	Course Name	INDUSTRIAL FERMENTATION TECHNOLOGY	Course Category	E	Professional Elective		L	T	P	C
								3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Analyze the fundamental behind the need of aseptic strain development.*
CLR-2 :	*Explore the importance of Isolation and Screening of Industrially Important Microorganisms*
CLR-3 :	*Decipher an understanding on the production of various primary metabolites from microbial fermentation*
CLR-4:	*Comprehend the importance and production of secondary metabolites with commercial significance*
CLR-5:	*Apprehend the biochemical transformation in the production of recombinant protein with medical importance*
CLR-6:	*Instigate knowledge on food fermentation, food flavourants, preservants and SCP*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)
CLO-1 :	*Accomplish knowledge on improvement of strain development for primary and secondary metabolites*	2	80	70
CLO-2 :	*Explain the upstream and Downstream fermentation process of organic acids and aminoacids*	2	85	75
CLO-3 :	*Describe the industrial scale methodologies for Antibiotic and microbial enzyme production*	3	75	80
CLO-4 :	*Understand enzyme biotransformation biostratergies and recombinant protein production with commercial and medical importance*	3	85	80
CLO-5 :	*Apprehend the food fermentation process and its preservants used for improving the shelf period*	3	85	80
CLO-6 :	*Decipher the availability and application of various food colourants, flavourants and SCP*	2	80	75

CLO-5	H	H	H	H	H		M		H		H	H	H	H	H
CLO-6	H	H	H	H	H		M		H		H	H	H	H	H

Duration (hour)		9	9	9	9	
S-1	SLO-1	*Introduction to industrial fermentations*	*Production of primary metabolites*	*Production of secondary metabolites*	*Recombinant protein production*	*Food fermentations*
	SLO-2	*Chronological Development of the Fermentation Industry*	*Organic acids fermentation*	*Antibiotic production*	*Insulin - Upstream process*	*Cheese and Yogurt fermentation*
S-2	SLO-1	*Isolation and Screening of Industrially Important Microorganisms*	*Citric acid – Upstream process*	*Carbohydrate containing antibiotic: Streptomycin - Upstream process*	*Insulin - Downstream process*	*Sauerkraut and Soy sauce fermentation*
	SLO-2	*Types of fermentation process*	*Citric acid – Downstream process*	*Streptomycin - Downstream process*	*Interferon - Upstream process*	*Food flavoring agents' fermentations*
S-3	SLO-1	*Microbial growth metabolism*	*Lactic acid – Upstream process*	*Macro cyclic lactones: Erythromycin - Upstream process*	*Interferon - Downstream process*	*Mono sodium glutamate fermentation*
	SLO-2	*Microbial metabolites*	*Lactic acid – Downstream process*	*Erythromycin - Downstream process*	*Production of nucleosides and nucleotides*	*γ-decalactone fermentation*
S-4	SLO-1	*Strain development*	*Acetic acid – Upstream process*	*Peptide antibiotic: Bacitracin - Upstream process*	*5' Inosine monophosphate*	*Food preservative fermentation*
	SLO-2	*Improvement of Strains Producing Primary metabolites*	*Acetic acid – Downstream process*	*Peptide antibiotic: Bacitracin - Downstream process*	*5' Guanosine monophosphate*	*Nisin fermentation*
S-5	SLO-1	*Improvement of Strains Producing Secondary metabolites*	*Amino acids fermentation*	*Industrial Enzyme production*	*Enzyme biotransformations*	*Food colorants fermentation*
	SLO-2	*Preservation of Industrially Important Cell Cultures and Microorganisms*	*L-glutamic acid - Upstream process*	*Protease - Upstream process*	*Steroid transformations*	*Monascus pigments fermentation*
S-6	SLO-1	*Inoculum Development*	*L-glutamic acid – Downstream process*	*Protease - Downstream process*	*Antibiotic transformations*	*Carotenoid production*
	SLO-2	*Aseptic Inoculation of Plant Fermenters*	*L-lysine – Upstream process*	*Lipase - Upstream process*	*Biopolymers fermentation*	*Astaxanthin Production*
S-7	SLO-1	*Measuring Process Variables*	*L-lysine – Downstream process*	*Lipase - Downstream process*	*Xanthan gum*	*Production of single cell protein*
	SLO-2	*Product development:*	*L-tryptophan - Upstream process*	*Vitamins production*	*Polyhydroxyalkanoates*	*Bel – symba – pekilo – pruteen processes*
S-8	SLO-1	*Regulation and safety*	*L-tryptophan - Downstream process*	*Cyanaocobalamin - Upstream process*	*Polyhydroxybutyrate*	*Beverages*
	SLO-2	*Use of Process flowcharts*	*Solvents fermentation*	*Cyanaocobalamin - Downstream process*	*Agrochemicals production*	*Brewing process*

S-9	SLO-1	*Use of Process block diagrams*	*Acetone - Butanol – Ethanol - Upstream process*	*Riboflavin - Upstream process*	*Bacillus thuringenesis*	*Wine production*
	SLO-2	*Examples*	*Acetone - Butanol – Ethanol - Downstream process*	*Riboflavin - Downstream process*	*Artemisinin*	*Cider production*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Understanding of Bioreactor Design*	*Air Driven Reactors*	*Solid State Fermentation Bioreactors*	*Sequential Batch ,Biofilm and Trickle flow reactors*	*Bioreactor Modeling, simulation , control and CFD analysis*
	SLO-2	*Basics and importance of bioreactors*	*General features of bubble column and airlift reactor*	*Solid-State Bioreactor Fundamentals: Selection and design of SSF reactors*	*Sequential Batch reactors*	*Modeling and Simulation*
S-2	SLO-1	*Guidelines for bioreactor design*	*Factors influencing mass transfer in bubble column*	*Heat transfer in SSF reactors*	*Bioreactors containing microbial films*	*Types of Modelling*
	SLO-2	*General requirement for Mechanical construction of Bioreactor*	*Flow patterns , liquid mixing and gas dispersion in bubble column, Mass and Heat transfer in bubble column*	*Mass transfer in SSF reactors*	*Completely mixed microbial reactor*	*Types of simulation*
S-3	SLO-1	*Design of thin walled , internal pressure, stirred tank reactor*	*Airlift bioreactors*	*Laboratory and pilot scale of solid state bioreactor*	*Microbial film Bioreactor*	*Steps involved in Modeling*
	SLO-2	*Solving Problems*	*Design and construction of the airlift loop reactor*	*Industrial scale of solid state bioreactor*	*Design and Construction*	*Steps*
S-4	SLO-1	*Development of bioreactors*	*Modeling in Air Lift Reactor*	*Classification of SSF Bioreactor*	*Trickle flow reactor*	*Methods and strategies for bioreactor control*
	SLO-2	*Instrumentations to control a bioreactor*	*Mass and Energy Balance*	*Mode of Operation*	*Design and Construction*	*Control loop*
S-5	SLO-1	*Sensors*	*Hydrodynamics in ALR*	*Un aerated and Unmixed Bioreactor*	*Theory of Trickle flow reactor*	*Analogue and digital control*
	SLO-2	*Probes in bioreactor*	*Three phase flow in ALR*	*Design and Construction*	*Physical model*	*Control algorithm*
S-6	SLO-1	*Common operations of bioreactor*	*Mixing*	*Forcefully – Aerated bioreactors without mixing*	*Mathematical model of Trickle flow reactor*	*Physical control of Bioreactor*
	SLO-2	*Types of Reactor*	*Oxygen transfer in ALR*	*Design and Construction*	*Solving Problems*	*Methods*
S-7	SLO-1	*Performance of Batch Reactor*	*Design of fluidized bed bioreactor*	*Rotating –Drum and Stirred –Drum bioreactors*	*Performance analysis of Trickle flow reactor*	*Computers in control of Bioreactor*
	SLO-2	*Solving Problems*	*Operation of fluidized bed bioreactor*	*Continuously mixed bioreactors*	*High substrate concentration and low substrate concentration*	*Solving Problems*

S-8	SLO-1	*Performance of Continuous reactor*	*Design and operation of inverse fluidized bed bioreactor*	*Mixed ,Forcefully – Aerated Bioreactors*	*Calculation of parameter estimation*	*Control Strategy for Bioreactor*
	SLO-2	*Performance of Continuous reactor with recycle*	*Models in Fluidized bed bioreactor*	*Design and Construction*	*Problems*	*Solving Problems*
S-9	SLO-1	*Fed Batch Reactor*	*Hydrodynamics of fluidized bed rector*	*Intermittently Mixed bioreactors*	*Design method*	*CFD analysis in Bioreactor design.*
	SLO-2	*Solving Problems*	*Solving Problems*	*Design and Construction*	*Calculation procedure and Evaluation of parameter estimation*	*Solving Problems*

Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Illustrate the knowledge on various mathematical models of biological systems.*
CLR-2 :	*Explore the modelling of bioprocess with a view to engineering application.*
CLR-3 :	*Demonstrate the advanced software knowledge for the automation of bioprocess systems.*
CLR-4:	*Demonstrate the Use of Superpro software to design a bioprocess system for the production of bioproducts.*
CLR-5:	*Analyze the solutions of various mathematical problems using MATLAB.*
CLR-6:	*Familiarize the students with the various bioprocess models and softwares.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Describe the fundamental laws and concepts about the mathematical modeling*	2	80	70	H	H	H	H			H		H		H	H	H	H	H
CLO-2 :	*Explain about the various mathematical models in biochemical engineering systems*	2	85	75	H	H	H	H			H		H		H	H	H	H	H
CLO-3 :	*Discuss the application of SuperPro Design for analysis of material and energy balance of biochemical reaction*	3	75	80	H	H	H	M	H		H		H		H	H	H	H	H
CLO-4 :	*Explain the basic concepts of MATLAB, data analysis and interpretation of data*	3	85	80	H	H	H	H	H		M		H		H	H	H	H	H
CLO-5 :	*Explain the basic concepts of SIMULINK, data analysis and interpretation of data*	3	85	80	H	H	H	H	H		M		H		H	H	H	H	H
CLO-6 :	*Accomplish knowledge about the fundamentals of modeling and simulations of bioprocess*	2	80	75	H	H	H	H	H		M		H		H	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Models - Introduction*	*Basic Mathematical Models*	*Introduction to Superpro*	*MATLAB - Introduction*	*Modeling of Batch Culture Using MATLAB – basics*
	SLO-2	*Basic modeling principles*	*Setting up a model*	*Developing a Process Model*	*MATLAB - basics*	*Batch Culture – programme*
S-2	SLO-1	*Introduction of mathematical modeling*	*Continuous flow tanks - enclosed vessel*	*Process design*	*MATLAB - Data analysis*	*Batch Culture – expected outputs*
	SLO-2	*Uses of mathematical modeling*	*Continuous flow tanks - mixing vessel*	*Process Modeling and Simulation*	*Curve fitting - Introduction*	*Modeling of Fed-batch Culture Using MATLAB – basics*
S-3	SLO-1	*Classification of modeling techniques*	*Steam jacketed vessel*	*Process flow diagrams*	*Curve fitting using MATLAB - Theory*	*Fed-batch Culture – programme*
	SLO-2	*Grouping of models into opposite pairs*	*Steam jacketed vessel - open and closed*	*Process flow diagram to produce human insulin*	*Curve fitting using MATLAB – examples*	*Fed-batch Culture – expected outputs*
S-4	SLO-1	*Classification based on Mathematical complexity*	*Batch distillation – basics*	*The β-Galactosidase Process*	*Numerical Integration*	*Modeling of Continuous Culture Using MATLAB – basics*
	SLO-2	*Classification of models according to scale*	*Batch distillation model*	*The Industrial Wastewater Treatment Process*	*Numerical Integration Techniques*	*Continuous Culture – programme*
S-5	SLO-1	*Fundamental laws – Expression and examples*	*Bioprocess modeling*	*Procedures & Operations*	*Trapezoidal Rule*	*Continuous Culture – expected outputs*
	SLO-2	*Energy equations*	*Modelling approaches for biomanufacturing operations*	*Resources*	*Trapezoidal Rule - Problems*	*Process Simulation*
S-6	SLO-1	*Energy equations - expression and examples*	*Types of bioprocess model*	*Scheduling*	*Simpson's Rule*	*Simulink - Introduction*
	SLO-2	*Continuity equations*	*Mathematical models of microbial process*	*Process Properties & Simulation*	*Simpson's Rule - Problems*	*Simulink - basics*
S-7	SLO-1	*Continuity equations – expression and examples*	*Applying mechanistic models in bioprocess development*	*Economics*	*Euler's Method*	*Simulation of gravity flow tank*
	SLO-2	*Transport equations*	*Model formulation for aerobic cultivation of budding yeast*	*Reports*	*Euler's Method - Problems*	*Simulation of three isothermal CSTR*

S-8	SLO-1	*Transport equations expression and examples*	*Parameter identifiable analysis*	*Material-Balance Calculations*	*Runge-Kutta 4th Order Method*	*Simulation by Simulink in Batch Culture*
	SLO-2	*Equations of motion*	*Uncertainty analysis*	*Material-Balance Problems*	*Runge-Kutta 4th Order Method - Problems*	*Simulation by Simulink in fed-batch Culture*
S-9	SLO-1	*Chemical kinetics*	*Metabolic flux modelling (MFM)*	*Energy-Balance Calculations*	*Programming with MATLAB*	*Simulation by Simulink in continuous Culture*
	SLO-2	*Examples*	*MFM as a tool to analyze the behavior of genetically modified yeast strain*	*Energy-Balance Problems*	*Program design and development*	*Expected outputs of Batch, Continuous and Fed-batch fermentation process*

Course Code	18BTE408T	Course Name	BIOPROCESS PLANT DESIGN	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Equip the students with designing aspects for industrial scale fermenter*
CLR-2 :	*Infer various scale up and scale down parameters for good optimization process*
CLR-3 :	*Understand the factors involved in heat and mass transfer studies for controlling process parameters*
CLR-4:	*Envisage the guidelines for plant operation and its risk assessment*
CLR-5:	*Decipher process economics involved in industrial operations*
CLR-6:	*Instigate the production strategies in protein and other metabolites with commercial importance*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Manage Inoculum development and nutritional balance for product conversion.*	2	80	70	H	H	H	H			H		H		H	H	H	H	H
CLO-2 :	*learn about the mass and energy balance of bioprocess*	2	85	75	H	H	H	H			H		H		H	H	H	H	H
CLO-3 :	*develop and optimize the process parameters for the industries*	3	75	80	H	H	H	M	H		H		H		H	H	H	H	H
CLO-4 :	*apply design factors for scale up in the industry*	3	85	80	H	H	H	H	H		M		H		H	H	H	H	H
CLO-5 :	*evaluate the process plant design for regulatory compliance*	3	85	80	H	H	H	H	H		M		H		H	H	H	H	H
CLO-6 :	*design a plant layout for processing of biological materials*	2	80	75	H	H	H	H	H		M		H		H	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Design-Project Procedure*	*Heat and Mass Transfer studies*	*Selection of bioprocess equipment - upstream*	*Plant location and site selection*	*Cash Flow for Industrial Operations*
	SLO-2	*Types of Designs*	*Effect of scale on oxygenation*	*Selection of bioprocess equipment - downstream*	*Plant Layout*	*Cumulative Cash Position*
S-2	SLO-1	*Feasibility Survey*	*mixing and sterilization*	*Specifications of bioprocess equipment*	*Plant operation and control*	*Factors affecting investment and production costs*
	SLO-2	*Flow Diagrams*	*Inoculum development and nutrient availability*	*Mechanical design of reactors*	*Techniques Used in Site and Plant Layout*	*Capital Investments*
S-3	SLO-1	*Process Flow sheeting*	*Bioreactor scale-up*	*Heat transfer equipment*	*Utility supply aspects*	*Estimation of Capital Investment*
	SLO-2	*Equipment Design*	*Scale-up - constant power consumption per volume*	*Heat exchangers and Evaporators*	*Environmental Considerations*	*Cost Indexes*
S-4	SLO-1	*Equipment Selection*	*Scale-up - mixing time*	*Mass transfer equipment*	*Equipment cleaning aspects*	*Cost Factors in Capital Investment*
	SLO-2	*Comparison of Different Design-Projects*	*Scale-up - impeller tip speed (shear)*	*Finite-Stage Contactors*	*Culture cell banks*	*Estimating Equipment Costs by Scaling*
S-5	SLO-1	*Material balance*	*Scale-up - mass transfer coefficients*	*Continuous contactors - Packed towers*	*cGMP guidelines*	*Purchased-Equipment Installation*
	SLO-2	*Material balance calculations*	*Problems*	*Pressure Drop*	*Global Regulatory Environment*	*Methods for estimating capital investment*
S-6	SLO-1	*Examples*	*Scale up of downstream processes*	*Factors Influencing Plate and Column Efficiencies*	*Key Pharmaceutical Regulations Related to Design and Engineering*	*Estimation of Total Product Cost*
	SLO-2	*Problems*	*Adsorption*	*Piping and instrumentation*	*Implications for Performance and Compliance*	*Fixed Charges*
S-7	SLO-1	*Energy balance*	*Adsorption (LUB method)*	*HAZOPS Study*	*Risk Assessments*	*Case study – Commodity chemicals*
	SLO-2	*Energy balance calculations*	*Chromatography*	*Safety checklist for identifying process hazards*	*Validation*	*Cost analysis of enzyme production*
S-8	SLO-1	Examples	Chromatography (constant resolution etc.)	Materials of construction for bioprocess plants	Project Plans	Bioethanol from Corn Stover

	SLO-2	*Problems*	*Filtration (constant resistance etc.) -*	*Classification of stainless steels by alloy content and microstructure*	*Detailed Design Phase*	*Furfural and lignin from Corn Stover*
S-9	SLO-1	*Scale-Up in Design*	*Centrifugation (equivalent times etc.)*	*Low- and high-temperature Materials*	*Process Safety Management*	*Insulin production*
	SLO-2	*Factors in equipment scale-up and design*	*Scale-down related aspects*	*Economics in Selection of Materials*	*Safety Indices*	*Monoclonal Antibody Production*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Environmental pollution-water, air, soil*	*Recent trends in Biological wastewater treatment*	*Xenobiotics and recalcitrants*	*Recent trends in Biodegradation of industrial wastes*	*Waste to Wealth*
	SLO-2	*Perspectives of liquid and solid wastes*	*Aerobic biological treatment technologies*	*Environmental effects of Xenobiotics and recalcitrants*	*Contributions of Biotechnology for the environmental managements and industrial applications*	*Value-added bioproducts from Industrial wastes*
S-2	SLO-1	*Overview of stages of wastewater treatment*	*Anaerobic digestion process*	*Biodegradation of xenobiotics*	*Microbial enzymes for environmental applications*	*Slaughterhouse industry wastes*
	SLO-2	*primary, secondary and tertiary treatment*	*Stages of anaerobic digestion process*	*Mechanisms of Biodegradation of xenobiotics -Reductive/Oxidative/Hydrolytic*	*Advantages of immobile cells or enzymes over free cells and enzymes*	*Recovery of enzymes from slaughterhouse industry waste for industrial applications*
S-3	SLO-1	*Physicochemical technologies for the liquid waste disposal*	*Anaerobic Biological treatment technologies*	*Aliphatic and Hydrocarbons*	*Role of Biocatalysts in pollutant removal*	*Recovery of secondary metabolites from slaughterhouse industry waste for industrial applications*
	SLO-2	*Coagulation, Flocculation, Sedimentation*	*Advantages of anaerobic digestion processes over aerobic digestion processes*	*Biotransformation of Aliphatic and Hydrocarbons*	*Application of Immobilized cells in pollutants removal*	*Leather industry wastes*
S-4	SLO-1	*Chemical precipitation*	*Microbiology of anaerobic digester*	*Aromatic Hydrocarbons*	*Role of Biocatalysts in pollutant removal – Immobilized Enzymes*	*Types of solid wastes generated from leather industry*
	SLO-2	*Pros and Cons of chemical precipitation*	*Factors affecting anaerobic digestion process*	*Biotransformation of Aromatic Hydrocarbons*	*Application of Immobilized enzymes in pollutants removal*	*Recovery of enzymes from leather industry wastes for industrial applications*
S-5	SLO-1	*Filtration processes-mechanisms*	*Attached growth system-Biofilm*	*Polyaromatic hydrocarbons*	*Classification of dyes and their effects on the environment*	*Recovery of secondary metabolites from leather industry wastes for industrial applications*
	SLO-2	*Types of filtration processes*	*Biofilm development process*	*Biotransformation of Polyaromatic hydrocarbons*	*Microbial dye decolourization*	*Plastic wastes*
S-7	SLO-1	*Adsorption processes-Activated carbon technology-applications*	*Biofilm Technologies in environmental pollution management*	*Polycyclic aromatic Hydrocarbons*	*Enzyme based dye decolourization*	*Environmental impacts*

	SLO-2	*Ion Exchange processes-applications*	*Advantages of attached growth system over suspended system*	*Biotransformation of Polycyclic aromatic Hydrocarbons*	*Biodegradation of textile dyes*	*Recycling of plastic wastes*
S-8	SLO-1	*Solid waste disposal-Effects*	*Nutrients removal-Eutrophication*	*Halogenated hydrocarbons*	*Laccases and their role in Bioremediation of Industrial wastes*	*Bioplastics*
	SLO-2	*Secured Landfill, Bacterial and Vermi composting, incineration/pyrolysis*	*Recent advances in Nitrogen removal*	*Biotransformation of halogenated hydrocarbons*	*Heavy metal toxicity to the environment*	*Renewable resources for energy generation*
S-9	SLO-1	*Advanced oxidation processes for recalcitrants treatment*	*Biological Phosphorous Removal*	*Oil pollution and its effect on the environment*	*Microbial heavy metal removal-mechanisms*	*Alternate technologies for Energy recovery*
	SLO-2	*Electrolysis-Cu removal*	*EBPR process-mechanisms*	*Microbial treatment of oil pollution*	*Role of biosurfactants, Extracellular polysaccharides and siderophores in the heavy metal removal*	*Biomass residue as a fertilizer*

Course Code	18BTE318T	Course Name	INDUSTRIAL WASTE MANAGEMENT	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify the relevant information about industrial solid waste reduction and hazardous waste management*
CLR-2 :	*Identify the applications of energy conversion technology*
CLR-3 :	*Demonstrate the state of the art in technology, organizational and legislative developments and practices*
CLR-4:	*Create insights to the waste characterization aspects*
CLR-5:	*Analyze the mass balance and carbon foot print for a given industrial process*
CLR-6:	*Utilize the concepts environmental regulation and inculcate in newly developed treatment technologies*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Formulate an insight into the pollution from major industries including the sources and characteristics of pollutants*	*1*	*80*	*70*	*H*	*H*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*H*	*M*	*H*	*M*	*H*	*H*
CLO-2 :	*Analyze the mode of treatment based on waste characteristics*	*2*	*85*	*75*	*H*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*L*	*H*	*H*	*M*	*H*	*H*
CLO-3 :	*Design of wastewater treatment plants to attain standard limits*	*2*	*75*	*70*	*H*	*H*	*M*	*M*	*M*	*H*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*M*	*H*
CLO-4 :	*Assess the impact of industrial wastes on the environmental compartments (land, water and air)*	*2*	*85*	*80*	*H*	*H*	*M*	*M*	*M*	*H*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*H*	*H*
CLO-5 :	*Analyze and choose approportate strategy to convert waste to economic goods*	*2*	*85*	*75*	*H*	*H*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*H*	*M*	*H*	*H*	*H*	*H*
CLO-6 :	*Develop knowledge on environmental regulations and legal aspects*	*1*	*80*	*70*	*H*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*H*	*M*	*H*	*H*	*M*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to industrial wastes and their impacts-Industrial wastes - Sources*	*Standards for waste disposal & methods of waste reduction –*	*Treatment and disposal of industrial effluents*	*Biodegradation/ Recycling Of Industrial Wastes*	*Environmental Concerns, Legislations And Environmental Impact Assessment*
	SLO-2	*Classification of industrial wastes*	*Standards for disposal of treated effluents, solid wastes and gaseous emissions from different industries*	*Stages of effluent treatment- primary, secondary and tertiary*	*Immobilized cell and enzyme technologies for the effluent treatment*	*Environmental Assessment and Management Systems*
S-2	SLO-1	*Industrial waste generation scenario in India*	*Characteristics of industrial wastewater- COD, BOD and TOC*	*Physicochemical treatment-Coagulation, flocculation and their mechanisms*	*Energy recovery from hybrid treatment technology*	*Applicable federal and provincial environmental regulations*
	SLO-2	*Industrial waste generation scenario in Global context*	*Solids analysis – TDS, TSS and VSS*	*Precipitation –heavy metal removal-Merits and Demerits*	*Case study f sustainable technologies from European Union*	*Environmental impact assessment (EIA) legislation and regulatory framework*
S-3	SLO-1	*Environmental impacts*	*Characteristics of industrial wastewater-, TKN, Ammonia, Chloride, Sulfide and Sulfate*	*Secondary Biological treatment: Aerobic- activated sludge process,*	*Algal based technologies for nutrient and pollutant removal*	*EIA applied to solid and liquid waste management*
	SLO-2	*Threat to biodiversity*	*Metal analysis using AAS and ICP-MS*	*Sequential batch process. fluidized bed reactor*	*Bioreactor designs for algal based wastewater*	*Environmental toxicology assessment and regulations*
S-4	SLO-1	*Toxicity of industrial effluents*	*Removal of heavy metals by physico- chemical process*	*Secondary Biological treatment: Anaerobic-UASB, MBR –Merits and Demerits*	*Bioelectricity production through MFC with leachate and wastewater*	*Management of toxic chemicals*
	SLO-2	*Case studies of industrial toxicity (Bhopal gas leak, Chernobyl etc.)*	*Biological process for heavy metal removal*	*High rate bioreactors*	*Water splitting technologies*	*Nuclear waste management*
S-5	SLO-1	*Functions of Regulatory bodies-State and Central Pollution Control Board*	*Individual and Common Effluent Treatment Plants*	*Reprocessing of bio-sludge for value addition*	*Bioplastic synthesis from the compounds derived from wastewater*	*Effluent control, air pollution control and urban development*
	SLO-2	*Common effluent treatment plants for textile and tannery industry wastewater treatment*	*Case study of Indian industries waste treatment through common effluent treatment process*	*Energy recovery from sludge*	*Polymer synthesis from the compounds derived from wastewater*	*Pollution abatement in national river bodies: Case studies*

S-6	SLO-1	*Selection of candidate technologies for waste treatment based on characteristics*	*Volume and strength reduction*	*Removal of refractory organics-strategies*	*Plastics degrading bacteria*	*Environmental auditing*
	SLO-2	*Rationale for biological treatment over convetional methods*	*Material and process modifications*	*Advanced oxidation processes*	*Phytoremediation for removal of heavy metals*	*ISO 14001:2015 And its implication in environmental assessment*
S-7	SLO-1	*The solid waste landfill*	*4R principles– Recycle, reuse and by-product recovery*	*Photo-oxidation process*	*Bioremediation of hydrocarbon contaminated wastewater of refinery plants through super bugs (GM Pseudomonas putida)*	*Carbon foot print for an industry*
	SLO-2	*Leachate management*	*Waste treatment flow sheets for selected industries such as Textiles, Tanneries, Pharmaceuticals, Electroplating industries,*	*Volatile organic compound (VOC) removal by Evaporation*	*Ocean cleaning for oil spill using super bugs*	*Carbon credit*
S-8	SLO-1	*The process of composting Industrial wastes*	*Dairy, Sugar, Paper, distilleries, Steel plants, Refineries, fertilizer, thermal power plants*	*Air and steam stripping*	*Biosurfactants for bioremediation and biodegradation of various pollutants discharged from industrial waste*	*Occupational Safety and Health Assessment*
	SLO-2	*Vermi-composting and its advantages*	*Hazardous waste management– Physico chemical treatment*	*Adsorption processes (Activated carbon)*	*Mechanism of biosurfactant based technologies for solids reduction in wastewater*	*Waste Hazard identification and problem formulation*
S-9	SLO-1	*Hierarchy of Potential Implementation waste management Strategies*	*Solidification and incineration – Zero discharge*	*Colour removal from wastewater from textile industries*	*Application of nanotechnology for waste degradation*	*Life cycle assessment of industrial wastes*
	SLO-2	*Waste management pyramid*	*Secure land fills*	*Role of microorganisms and enzymes for dye removal*	*Nano-enzymes for pollutant removal*	*Implications of biological agents on environment for pollutant removal*

Course Code	18BTE319T	Course Name	BIOENERGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify the potent biomass resources for energy production*
CLR-2 :	*Identify the applications of energy conversion technology*
CLR-3 :	*Demonstrate the significance of environmental benefits of bioenergy*
CLR-4:	*Create insights to the concepts of sustainable and green technologies*
CLR-5:	*Analyze the important wastes to energy conversion*
CLR-6:	*Utilize the concepts scale up strategies for biomass based energy production*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Formulate the appropriate biofuel production based on available feedstocks*	*1*	*80*	*70*	*H*	*H*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*H*	*M*	*H*	*M*	*H*	*H*
CLO-2 :	*Analyze cell wall components of biomass*	*2*	*85*	*75*	*H*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*L*	*H*	*H*	*M*	*H*	*H*
CLO-3 :	*Apply thermo-chemical conversion process for biomass conversion to produce biofuel*	*2*	*75*	*70*	*H*	*H*	*M*	*M*	*M*	*H*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*M*	*H*

CLO-6 :	*Describe the National policy towards biofuel production and Energy security*	*1*	*80*	*70*	*H*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*H*	*M*	*H*	*H*	*M*	*H*

		Introduction to Sources of energy	First Generation Bioenergy	Second & Third Generation Bioenergy	Fourth generation bioenergy and next generation bio-molecules	Policies and future R&D of biofuels & Bioenergy
Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Non-renewable Resources (Fossil fuel)*	*Sugar and Starch based bioenergy*	*2nd generation (Non-edible lignocellulosics)*	*CO_2 biosequestration and biofuel production strategies*	*Policies and Future R&D of Biofuels & Bioenergy*
	SLO-2	*Alternate and renewable resources (Solar, wind and biomass based)*	*Corn, sugarcane, sugar beets, soybeans, canola oil, fryer grease, and coconut oil*	*Wood bioenergy*	*Use of plants and microalgae for CO_2 sequestration*	*National biofuel policy framework*
S-2	SLO-1	*Bioenergy – Classification (Liquid and gaseous biofuel)*	*Fuel from food crops*	*Pretreatment strategies for biofuel production*	*Synthetic (bio)fuels*	*Evaluation of current and future R&D needs*
	SLO-2	*An overview of bioenergy in Global and national context*	*Consequences for food crops as fuel source*	*Green chemicals for biomass pretreatment*	*Sustainability aspects of synthetic biofuels*	*Focus area such as Mission Innovations India and Horizon 2020*
S-3	SLO-1	*Rationale of biomass power sustainable environment*	*Role of cell wall components (Lignin, cellulose and hemicelluloses) in different plants for ethanol production*	*Rationale for biological pretreatment over physical and chemical modes.*	*Pyrolysis bio-oil/bio-char*	*Legal framework to support sustainable development and increased use of biofuels*
	SLO-2	*Treatment technologies for biomass to useful energy*	*Bottlenecks in biomass conversion to fuels*	*Bioethanol plant design and its components*	*Hydrogenated biodiesels*	*Need for International cooperation and intervention in biofuel sectior in India*
S-3	SLO-1	*Circular & Biobased Economy*	*Recalcitrant lignin and its biochemistry*	*Bio refinery demonstration projects of Bioethanol*	*Pyrolysis diesel*	*Government policies and programs with regard to biofuels*
	SLO-2	*Environment impact over biofuel usage*	*Importance of cellulose and hemicelluloses*	*Sustainable Solid and liquid waste management*	*Comparative analysis of different grades of diesel based on ASTM*	*R and D focus area for biofuel in India*
S-4	SLO-1	*Feedstocks – Food Vs Feed Vs Fuel*	*Conversions Process: Physico-chemical*	*Biomethanation process*	*Dimethyl ether (DME)*	*Investment opportunities on biofuels worldwide*
	SLO-2	*Characteristics for feedstock for bioenergy*	*Constraints of conventional processing technologies*	*Microbiology of anaerobic digestion*	*Bio-synthetic natural gas (SNG)*	*Industrial opportunities of biofuels in India – at a glance*

S-5	SLO-1	*Waste resources – Industrial (solid and liquid) and MSW*	*Biological route and Enzymatic Conversion*	*Biological Processes for Hydrogen Production*	*Comparative analysis of CNG/SNG/bio-gas based on ASTM*	*Economic, Social and Ecological Impacts of Bioenergy*
	SLO-2	*Agro waste resources – Crop residues and by-products*	*Enzymology for conversion of biomass to biofuels – Ligninolytic enzymes (MnP, LiP and laccase)*	*Dark fermentation and algal based technologies*	*Bio-butanol production*	*Comparative analysis of National and Global Levels*
S-6	SLO-1	*Energy crops – Terrestrial*	*Mechanism of depolymerization of lignin by enzymes and whole cells*	*3rd generation biofuel*	*ABE biosynthesis (Acetone Butanol and Ethanol)*	*Current and Emerging Challenges to Bioenergy Development*
	SLO-2	*Energy crops – Aquatic*	*Hexose sugar conversion to ethanol*	*Need for 3rd generation biofuels*	*Bottlenecks in ABE fermentation; Types of feedstocks preferred*	*Impact of solar and wind energy over biomass energy*
S-7	SLO 1	*Potential Benefits of Replacing Fossil Fuels with Biofuel, Biomass and Biogas*	*Pentose sugar conversion to ethanol*	*Genetically modified organisms for improved fuel production*	*Metabolic pathway engineering for ABE biosynthesis*	*Community Participation in Renewable Energy Development*
	SLO 2	*Cradle to grave approach of waste raw materials for bioenergy development*	*By-products of ethanol production and its*	*Case study of insect ruminant biology for biofuel production*	*Case study of GM microbes on ABE fermentation*	*Techno-economic feasibility for biofuel production*
S-8	SLO 1	*Political Drivers for Biofuel Development*	*Inhibitory products of bioethanol production*	*GM plants for enhanced biomass for ethanol production*	*Bio-alkanes and alkenes from waste biomass*	*Combined industrial waste treatment for energy recovery*
	SLO 2	*Consequences of Burning Fossil Fuel*	*Plausible contaminants from bioethanol production and its re-utilization*	*GM based oil crops for biodiesel production*	*Economic advantage of chemicals production from biomass*	*Zero-discharge concept for wastewater from industries and energy recovery process*
S-9	SLO 1	*Mitigation of Global Warming*	*Biodiesel from vegetable oils*	*Hybrid energy system through biomass*	*New energy research Projects in Global context*	*Urban and rural integration system for sustainable waste utilization*
	SLO 2	*Carbon dioxide sequestration Approaches*	*Transesterification process*	*Algal based technologies for biofuel and value added chemical preparation*	*New energy research Projects in Indian context*	*Life-cycle Analysis of Biofuels*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Microbial diversity*	*Extremophiles*	*Environmental Metagenomics*	*Environmental meta proteomics*	*Soil microbiome and biofilms*
	SLO-2	*Microbial existence in the environment*	*Extremophiles-various types*	*Importance of metagenomics in microbial ecology*	*Importance of metaproteomics in microbial ecology*	*The soil microbiome — from metagenomics to metaphenomics*
S-2	SLO-1	*Biodiversity and its relationship with Environment*	*Extremophiles in the environmental management*	*Metagenomics-types, steps*	*Gel-based proteomics: 2-DE*	*Influence of soil structure and connectivity on the soil metaphenome*
	SLO-2	*Classification of microorganisms*	*Role of Acidophilic microorganisms and their biomolecules in Environmental remediation*	*Molecular Diversity and Metagenomics*	*Gel-based proteomics: DIGE*	*Influence of physiological status on the soil metaphenome*
S-3	SLO-1	*Role of microorganisms in the sustainability of biosphere*	*Role of alkalophilic microorganisms and their biomolecules in Environmental remediation*	*Concept of e-DNA (environmental DNA)*	*Gel-based proteomics: BN-PAGE*	*Influence of microbial community interactions on the soil metaphenome*
	SLO-2	*Culturability/unculturability and microbial ecology principles*	*Role of psychrophilic microorganisms in Environmental remediation*	*Diversity of Microbes in different environments*	*Merits and demerits of gel-based proteomic techniques*	*Role of soil microbiome for improving soil health under changing climate*
S-4	SLO-1	*Classification of microorganisms-Bacteria, Yeasts, Moulds, Viruses, Protozoans*	*Role of mesophilic microorganisms and in Environmental remediation*	*Conventional methods to study diversity; Cultured and Uncultured Methods*	*Gel-free proteomics: Isotope-Coded Affinity Tag (ICAT)*	*Biofilm mediated decontamination of pollutants from the environment*
	SLO-2	*Lichens and their role in the biosphere.*	*Role of thermophilic microorganisms in Environmental remediation*	*16S-rDNA sequencing of microbial communities*	*Isobaric Tagging for Relative and Absolute Quantitation (iTRAQ)*	*Role of Biofilms in Bioremediation*
S-5	SLO-1	*Mycorrhiza-types*	*Role of barophilic microorganisms in Environmental remediation*	*Partial community analysis methods - Genetic fingerprinting techniques - T-RFLP*	*Multidimensional Protein Identification Technology -MudPIT)*	*Strategies for Use of Biofilms in Remediation*
	SLO-2	*Mycorrhiza-Environmental applications*	*Role of osmophilic microorganisms in Environmental remediation*	*Partial community analysis methods - Genetic fingerprinting techniques - DGGE*	*Merits and demerits of gel-free proteomic techniques*	*Biofilm Survival Strategies in Polluted Environments*
S-6	SLO-1	*Photosynthetic organisms and their environmental applications*	*Halophiles- types*	*Partial community analysis methods - Genetic fingerprinting techniques RISA*	*Application of gel-free techniques in biological systems*	*Molecular Methods for the Assessment of Microbial Biofilms in Bioremediation*

	SLO-2	*Anoxygenic photosynthetic microbes*	*Halophiles- their biomolecules in Environmental remediation*	*Partial community analysis methods - Genetic fingerprinting techniques LH-PCR microarrays*	*Protein microarrays*	*Detoxification of Hexavalent Chromium from Industrial Wastewater using a Bacterial Biofilm System*
S-7	SLO-1	*General characteristics of purple and green sulphur bacteria.*	*Molecular aspects of extremophiles- Genes, Protein s and Enzymes.*	*Partial community analysis methods - Genetic fingerprinting techniques RAPD*	*Isotope-Coded Protein Label (ICPL)*	*Biofilm-mediated Degradation of PAHs and Pesticides*
	SLO-2	*Oxygenic photosynthetic microbes*	*Perspectives of Archaebacteria in Environment- distinguishing features*	*Partial community analysis methods - Genetic fingerprinting techniques DNA microarrays*	*Combined FRActional DIagonal Chromatography (COFRADIC)*	*Metagenome Analyses of Multispecies Microbial Biofilms*
S-8	SLO-1	*General characteristics of Cyanobacteria and Prochlorales*	*Phylogenetic groups of Archaebacteria, Ecology and habitats of Archaebacteria,*	*Whole community analysis methods: DNA-DNA reassociation,*	*Application of gel-free techniques in biological systems*	*Metagenomic approach for the biofilm community analysis*
	SLO-2	*Methanogens*	*Physiology of Archaebacteria-their role in environmental sustainability*	*Whole community analysis methods: G+C fractionation*	*Mass Spectrometry; Matrix Assisted Laser Desorption and Ionization (MALDI)*	*Metagenomic Approaches for Understanding New Concepts in Microbial Science*
S-9	SLO-1	*Methanogenic-General characteristics and properties*	*Role of Archaebacteria in the environmental pollution management*	*Whole genome sequencing; DNA Microarray Technology*	*Electronspray Ionization (ESI)*	*Accessing the Soil Metagenome for Studies of Microbial Diversity*
	SLO-2	*Methanogens –Environmental applications*	*Magneto tactic bacteria.*	*Next Generation Technology*	*Mass spectrometry data analysis – computational tools.*	*Recent Advances and Perspectives in Metagenomic Studies of Soil Microbial Communities*

S-1	SLO-1	*Principles of bioremediation*	*Bioremediation technologies*	*Bioremediation project management*	*Microbial oxidation of heavy metals*	*Nuclear waste bioremediation*
	SLO-2	*Introduction to Bioremediation: Types of Bioremediation*	*Bioremediation Techniques: bio stimulation & bio augmentation*	*Defining the project and goals*	*Bioleaching*	*Microbes in pollution Remediation*
S-2	SLO-1	*Bioremediation Mechanisms*	*In situ and ex situ remediation technologies : (Bio) venting*	*Site characterization*	*Biomining*	*Heavy metal toxicity in the environment*
	SLO-2	*Microbes for Bioremediation*	*In situ and ex situ remediation technologies : (Bio)sparging*	*Screening and selecting remediation alternatives*	*Microbial sources for the oxidation of minerals from ores*	*Heavy metal bioremediation*
S-3	SLO-1	*Metabolic process involved in bioremediation*	*In situ and ex situ remediation technologies : (Bio)stripping*	*Process design*	*Bio-oxidation mechanisms*	*Various reactors for heavy metal removal*
	SLO-2	*Factors affecting bioremediation*	*In situ and ex situ remediation technologies : (Bio)sorption barriers*	*Remediation field activities- Aerobic Bioremediation*	*Enzymes for heavy metal detoxification*	*Actinides pollutant removal strategeis*
S-4	SLO-1	*Metabolic process involved in bioremediation*	*In situ and ex situ remediation technologies : Biofilters*	*Bioremediation of Surface Soils*	*Bacterial oxidation of pyrite*	*Nuclear waste disposal methods*
	SLO-2	*Limitations of Bioremediations*	*In situ and ex situ remediation technologies : Bioreactors*	*Fate and transport of contaminants in the Vadose zone*	*Siderophores*	*Case studies of nuclear accidents and its further remediation stratgies*
S-5	SLO-1	*Mycoremediation,*	*Use of bioreactors for bioremediation*	*Anoxic/Anaerobic Bioremediation: Anoxic/Anaerobic Environment*	*Bacterial oxidation of chalcopyrite*	*Types of nuclear wastcs and environmental effects*
	SLO-2	*Phytoremediation technologies.*	*Molecular techniques in bioremediation*	*Potential anaerobic Bioremediation*	*Metallothinenis and Biosurfactants from microbial sources and their role in heavy metal removal*	*Natural nuclear wastes*
S-6	SLO-1	*Xenobiotics and recalcitrant Man-made pollution*	*Application, specific advantages and disadvantages of bioremediation technologies,*	*Anoxic/Anaerobic Processes – Fermentation*	*Bacterial oxidation Sphalerite*	*Man-made nuclear wastes*
	SLO-2	*Dyes and Detergents*	*Use of bioreactors for bioremediation.*	*Bioremediation in fresh water and marine systems*	*Heavy metal bioremediation by filamentous fungi*	*In situ disposal strategies*

S-7	SLO-1	*PAH and Aliphatic hydrocarbons*	*Soil bioreactors: Dry and slurry bioreactors*	*Bioremediation in marine systems*	*Microbial Desulfurization of coal*	*Bioremediation of oil/hydrocarbon contaminated sites*
	SLO-2	*Ocean oil spills and its consequences*	*Anaerobic and aerobic bioreactors for ex situ remediation*	*Natural Attenuation process*	*Biosorption by live and dead cells*	*Pathways for hydrocarbon degradation*
S-8	SLO-1	*Heavy metals leach in ground water*	*Composting of recalcitrant wastes*	*Ground water bioremediation*	*Extraction of metals from ores and metal recovery*	*Nuclear waste management by microbial intervention*
	SLO-2	*Antibiotics in wastewater*	*Land farm bioremediation for in situ wastes*	*Water desalination*	*Nano-sponges*	*e-waste management by microbial intervention*
S-9	SLO-1	*Volatile organic compounds (VOCs)*	*Fungal bioremediation*	*Reverse osmosis for toxic pollutant removal*	*Microbial enhanced oil recovery (MEOR)*	*Case studies of e-waste industries*
	SLO-2	*Radioactive compounds*	*Functionality of fungal enzymes*	*Membrane technology for pollutant removal*	*Nano material for metal recovery and treatment*	*Emerging contaminants*

Course Code	18BTE410T	Course Name	ENVIRONMENT BIOSENSORS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamentals of biosensors*
CLR-2 :	*Educate the various types of biosensors*
CLR-3 :	*Identify and choose the biosensor for the environmental monitoring*
CLR-4:	*Apply various types of biosensors for the environmental applications*
CLR-5:	*Design the biosensor based on the pollutant parameters*
CLR-6:	*Apply the biomolecules in the development of biosensors*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Describe the fundamental principles of biosensors*	*1*	*80*	*80*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-2 :	*Explain the biosensor concepts for pollutant monitoring*	*2*	*85*	*75*	*H*	*H*	*H*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-3 :	*Design the biosensors for the detection of emerging contaminants*	*2*	*75*	*80*	*M*	*H*	*M*	*H*	*M*	*M*	*H*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-4 :	*Apply the specific biomolecules for the sensor development for the pollutants monitoring*	*2*	*85*	*80*	*H*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-5 :	*Apply the nanomaterial for the development of environmental biosensors*	*3*	*85*	*75*	*H*	*H*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*M*	*H*	*H*	*H*	*H*	*H*
CLO-6 :	*Understand the importance of novel biosensor development for the environmental applications*	*2*	*80*	*80*	*H*	*H*	*H*	*H*	*H*	*M*	*M*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Short Biosensor History*	*Biotransducers*	*Application of biosensors for Environmental Monitoring- Detection of Organic Compounds*	*DNA, Biological Recognition & Receptor based Sensors*	*Nanotechnology-based Biosensor*
	SLO-2	*Fundamentals of Biosensors*	*Classification of Biosensors*	*Polychlorinated biphenyls (PCB)*	*A Fiber Optic DNA Sensor for Rapid Detection of Environmental E.coli*	*Multi-analyte determination*
S-2	SLO-1	*Components of Biosensor*	*Electrochemical Biosensors*	*Endocrine-disrupting chemicals*	*Application of electrochemical DNA-Biosensor to Environmental problems*	*Miniaturisation*
	SLO-2	*Types of Biosensors*	*Electrochemical Immunosensors*	*Antibiotics*	*Application of nucleic acid based optical bioprobe for environmental and pharmaceutical analysis*	*Mass Production*
S-3	SLO-1	*Characteristics of Biosensor*	*Optical Biosensors*	*Pesticides*	*Lipid-based enzyme electrodes for environmental pollution control- Lipid based sensors for continuous monitoring or rapid screening of environmental pollutants in the field.*	*Network Systems*
	SLO-2	*Biosensor Technologies*	*Electronic Biosensors*	*Hormones*	*Immunochemical assays for pesticides and PCBs*	*Validation*
S-4	SLO-1	*Types of Bioreceptors*	*FET- based Electronic Biosensors*	*Application of Biosensors for Environmental Monitoring- Detection of Inorganic Compounds*	*Direct piezoelectric immunosensor for pesticides*	*Bioengineering (GMO)*
	SLO-2	*Sensing Techniques of Biosensors*	*Piezoelectric Biosensors*	*Heavy Metals*	*Enzyme sensors for detection of pesticides families*	*Biosensors for environmental monitoring- An EPA perspective*
S-5	SLO-1	*Biosensors Development for Environmental Monitoring*	*Gravimetric Biosensors*	*Inorganic phosphate and nitrate*	*Biosensors for water quality and exposure assessment issues*	*Microsystem Technology in Biosensors*
	SLO-2	*Architectural Design*	*Pyroelectric Biosensors*	*Application of Biosensors for Environmental Monitoring- Detection of Biological Compounds*	*Nanomaterials- based biosensor for detection of environmental pollutants*	*Recent biosensors for the detection of pathogens*
S-6	SLO-1	*Bio element and Sensor Element Coupling*	*Impedimetric Biosensors*	*Biosides*	*Recent progress in biosensors for environmental monitoring*	*Recent biosensors for the detection of potentially toxic elements*

	SLO-2	*Various Coupling Mechanisms*	*Amperometric Biosensors*	*Whole cell bacteria detection*	*Application of nucleic acid hybridization for the detection of organisms*	*Recent biosensors for the detection of Toxins*
S-7	SLO-1	*Covalent Fabrication*	*Ion Channel Switch*	*Estimation of Biological Oxygen Demand (BOD)*	*Enzyme-based electrochemical biosensors to detect pharmaceuticals residues in waste water*	*Recent biosensors for the detection of Endocrine disrupting chemicals*
	SLO-2	*Matrix Immobilization*	*Optical Biosensors*	*Microbial Detection*	*Biosensor for the detection of antibiotics residues in milk*	*Recent biosensors for the detection and monitoring of air pollutants*
S-8	SLO-1	*Membrane Encapsulation*	*Microarrays*	*Antibiotic resistant organisms*	*Lipid membranes based biosensor for the rapid detection of toxins*	*Recent biosensors for the detection and monitoring of water pollutants*
	SLO-2	*Physical Adsorption Fabrication*	*Surface Plasmon Resonance*	*Application of Biosensors for Environmental Monitoring- Detection of Air Pollutants*	*Nucleic acid based biosensors for environmental pollution monitoring*	*Future sensing system based on conjugation of biosensor and drones for monitoring remote areas*
S-9	SLO-1	*Nano Biosensors*	*Reagentless Fluorescent (RF) Biosensors*	*Biosensors for direct monitoring and indoor air quality and exposure assessment issues*	*Reporter genes based biosensors for chemical contamination sensing*	*Recent biosensors for the detection of pollutants in effluents*
	SLO-2	*Advantages of nanotechnological approaches to biosensor development*	*Glucose Biosensors*	*Application in Biodefense Biosensing*	*Biosensor for the detection of antibiotics in Poultry effluent*	*Recent biosensor for the detection of contaminants in effluent treatment plant*

Course Offering Department	Biotechnology	Data Book / Codes/Standards			

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide basic knowledge of stem cell specific gene expression in lineage based tissues from the perspective of engineers.*
CLR-2 :	*Identify the role of epigenetic regulation in stem cell proliferation and differentiation*
CLR-3 :	*Deliver the knowledge on signaling molecules and molecular mechanisms that regulate the stem cell proliferation and differentiation.*
CLR-4:	*Analyze transcriptomics and its applications in tissue engineering*
CLR-5:	*Create insights on genome reprogramming.*
CLR-6:	*Utilize the strategies for novel gene editing techniques for tissue engineering*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)
CLO-1 :	*Identify gene regulation in stem cells.*	*2*	*85*	*80*
CLO-2 :	*Analyze gene expression in stem cells and artificial generation of pluripotency.*	*2*	*80*	*75*
CLO-3 :	*Identify the applications of growth factor signaling and their receptor molecules.*	*2*	*80*	*75*
CLO-4 :	*Analyze the regulation of molecules involved in self-renewal of stem cells.*	*2*	*85*	*80*
CLO-5 :	*Discuss stem cell death mechanisms.*	*2*	*85*	*80*
CLO-6 :	*Explain nerve cell regeneration, cell survival and cell death.*	*2*	*80*	*75*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to nucleic acids - genetic material,*	*Overview of Central dogma.*	*Principles of membrane organization membrane proteins*	*Differentiation in Early Development*	*Newborn screening: Neonatal PKU*
	SLO-2	*Structure and physicochemical properties of elements.*	*Characteristics promoter and enhancer sequences.*	*cytoskeletal proteins Extra cellular matrix*	*Potency, Commitment,*	*Cystic fibrosis and sweat tests.*
S-2	SLO-1	*Primary and secondary structure of DNA*	*Transcriptional bubble - prokaryotic and eukaryotic RNA polymerase*	*cell-cell junctions, various types of transport across cell membrane.*	*Polarity and the specification of asymmetric divisions.*	*Prenatal diagnosis of diseases, amniotic fluid*
	SLO-2	*Watson & Crick model*	*RNA synthesis- Fidelity of RNA synthesis. Inhibitors of transcription.*	*Protein sorting and trafficking, cargo proteins.*	*Cellular differentiation of the Nervous system*	*Fetal blood examination.*
S-3	SLO-1	*Hogsteen base pairing, Triple helix, Quadruple helix.*	*Differences in prokaryotic and eukaryotic transcription.*	*Growth factor signaling, cell-cell communication*	*Neuronal and Glial Progenitors in Adult Brain,*	*Karyotyping, Chromosomal abnormalities by cytogenetics.*
	SLO-2	*DNA super-coiling*	*Regulatory elements*	*Mechanism of action of different class of hormones.*	*Epithelial Stem Cells; Adult Progenitor Cells,*	*Restriction fragment length polymorphism (RFLP)*
S-4	SLO-1	*Linking number- satellite*	*Mechanism of transcription regulation.*	*Cell cycle –Molecules controlling cell cycle*	*Mesenchymal Stem Cells, Plasticity*	*Polymerase chain reaction (PCR)*
	SLO-2	*DNA replication*	*Transcription termination.*	*Cancer, role of Ras and Raf Oncogenesis and apoptosis.*	*De-differentiation and redifferentiation*	*Nuclear injection*
S-5	SLO-1	*Meselson & Stahl experiment bi–directional DNA replication*	*Splicing - nuclear export of mRNA - mRNA stability.*	*Cell culture and immortalization of cells and its applications.*	*Cancer cells and cancer stem Cells.*	*stem cell transplantations for sickle-cell anemia, hemophilia,*
	SLO-2	*Proteomics of DNA replication*	*Role of gene expression in microRNA*	*Molecular Basis of Pluripotency*	*Hematopoietic Stem Cells.*	*Stem cell transplantation for cancer (leukemia and myeloma).*
S-6	SLO-1	*Overview of differences in prokaryotic and eukaryotic DNA replication*	*LncRNA, snoRNA, piRNA*	*Induced pluripotency.*	*Stem Cells and tissue engineerings.*	*Muscular dystrophy and stem cell therapy*
	SLO-2	*Role of telomerase in aging and cancer*	*srRNA, siRNA and shRNA.*	*Cell cycle regulators in Stem Cells*	*Embryonic Stem Cells in Tissue Engineering.*	*Stem cell therapy*
S-7	SLO-1	*Mutagens, DNA mutations and their mechanism*	*Genetic code: Elucidation of genetic code*	*Stem Cell Niches,*	*Organ culture*	*Neurodegenerative disease*

	SLO-2	*Telomere replication in eukaryotes DNA Repair.*	*Codon degeneracy, Wobble hypothesis and its importance*	*Change of Phenotype and Differentiation,*	*Characterization and maintenance of murine and human embryonic stem cells,*	*Stem cell transplantation*
S-8	SLO-1	*DNA mismatch, Base-excision*	*Prokaryotic and eukaryotic ribosomes.*	*Aging and stem cell renewal, Quiescent Stem Cells.*	*Differentiation of embryonic Stem Cells*	*Dementia*
	SLO-2	*Nucleotide-excision and direct repair DNA recombination*	*Prokaryotic and eukaryotic translation and post-translational modification*	*Lineage tracing experiments in stem cells*	*Embryonic stem cell cloning*	*Neurodegenerative disease*
S-9	SLO-1	*Homologous, site-specific and DNA transposition*	*Regulation of gene expression with reference to λ phage life cycle.*	*Techniques used to study cells: flow cytometry and Confocal Microscopy.*	*Therapeutic cloning of stem cells*	*CRIPSR/Cas9 system-gene editing*
	SLO-2	*Operon concept - Lac and Trp operon*	*Eukaryotic gene regulation*	*Antibody labeling and Immunohistochemistry*	*Genomic Reprogramming*	*Applications of CRISPR/CAS-9 techniques in regenerative medicine.*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Germ line stem cells*	*cell surface receptor mediated signal transduction*	*Stem cell aging and apoptosis*	*Neural stem cells*	*Regeneration, Stem Cells, and the Evolution of Tumor Suppression*
	SLO-2	*Embryonic fate cell decision*	*Growth factor and receptors*	*Regulation and significance apoptosis in stem cells*	*Neural progenitors*	*Smads - Polycomb genes*
S-2	SLO-1	*Interaction between stem cells and their niche*	*tyrosine kinases Mediated signaling (Ras-Raf-MAP-MEK)*	*Stem cell necrosis*	*The heterogeneity of adult neural stem cells*	*Cellular signaling of Akt/PKB - β-catenin*
	SLO-2	*Transcriptional regulatory circuitry in embryonic stem cells*	*Wnt -signaling*	*Intrinsic - extrinsic pathways of apoptosis*	*Emerging complexity of neural niche*	*Induced pluripotency (iPSc)*
S-3	SLO-1	*Gene expression during development*	*Notch signaling pathways*	*Death ligands, cytokines and tumor necrosis factor*	*Neural stem cell signaling*	*Epithelial-mesenchymal transition (EMT)*
	SLO-2	*Maintenance of totipotency and its factors*	*Hedgehog singling*	*Role of apoptosis in hematopoiesis*	*Neural stem cell homeostasis*	*EMT markers*
S-4	SLO-1	*Pluripotency associated transcription factors*	*Hippo signaling*	*Apoptosis resistance in stem cells*	*Galecitin-1 in neural stem cells*	*Growth factor induced differentiation of stem cells*
	SLO-2	*Tissue specific multipotency*	*Insulin-like growth factor signaling*	*Anti-apoptotic molecules expression in stem cells*	*Human ESC-derived Neural Rosettes and neural stem cell progression*	*Pancreatic stem cells*
S-5	SLO-1	*Stem cells with no tissue specificity*	*NfκB signaling pathways*	*Caspase mediated apoptosis*	*CNS fluids and neuronal differentiation*	*Beta cell differentiation factors and transplantation*
	SLO-2	*Transcriptional network controlling pluripotency in ES cells*	*TGFβ -activing/nodal BMP-signaling*	*Apoptosis transcription factors and regulators*	*Neurotransmitter-induced stem cell differentiation*	*Stem cell therapy for obesity*
S-6	SLO-1	*Alternative splicing in embryonic stem cells*	*FGF signaling pathways*	*Heat shock proteins*	*cholinergic-dopaminergic signals*	*Leukemia, lymphoma and Myeloma*
	SLO-2	*Niche required for inducing stem cell control*	*Hemotopoiesis and signaling molecules*	*Apoptosis intracellular kinases*	*Nerve cell growth factor*	*Bone marrow transplantation*
S-7	SLO-1	*Homeostasis and Feed-back regulation in niche*	*Progenitor cell differentiation factors*	*Apoptosis adaptor proteins*	*Induced regeneration of neuronal cells*	*Cytokine and chemokine therapies*
	SLO-2	*Cytokines and growth factors maintenance of stemness*	*Colony stimulating factor and its receptor signaling pathways*	*Small molecules-induced apoptosis*	*Neurosphere culture*	*Cancer stem cell - cell survival and tumor maintenance*

S-8	SLO-1	*Modeling for stem cell asymmetry*	*Platelet-derived growth factor signaling pathways*	*Inhibitors of apoptosis in cancer stem cells*	*Astrocyte, oligodendrocyte differentiation*	Mechanism of cancer stem cell resistance
	SLO-2	*Pluripotency genes, expression and regulation*	*Role of oncogenes in embryonic stem cells*	*Cellular senescence pathways*	*Glial cell differentiation*	Targeting cancer stem cells
S-9	SLO-1	*Epigenetic changes in DNA*	*Steroid hormone receptor signaling pathways*	*Telomerase in adult and pluripotent stem cells and Telomerase shortening*	*Pathophysiology of neuronal stem cell signaling*	Selective killing of cancer stem cells
	SLO-2	*Epigenetic changes in histones*	*Effects of melatonin and seratonin in stem cells*	*Autoimmune destruction of stem cells*	*Multiple sclerosis, Parkinson's and Alzhimer's*	Nanocarrier mediated drug delivery

Learning Resources	1. *The science of stem cells - Jonathan M.W Slack - Wiley Blackwell - 2018.* 2. *Transcriptional and Translational regulation of stem cells - (Advances in experimental medicine and biology - Gary Hime and Helen Abud, 2013.* 3. *Stem cell regulators (Vitamins and Hormones Book 87) - Gerald Litwack - Academic Press – 2011* 4. *Control and regulation of stem cells- Bruce Stillman, David Stewart, Terri Grodzicker - Cold Spring Harbor Laboratory -2008*

SLO – Session Learning Outcome

Learning Assessment

Course Code	18BTE413T	Course Name	STEM CELL TECHNOLOGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide basic knowledge on embryogenesis from the perspective of engineers.*
CLR-2 :	*Create an interest to know about the different types of stem cells, its isolation, differentiation and transdifferentiation.*
CLR-3 :	*Develop awareness about cancer stem cells, iPSCs and importance of stem cell niches.*
CLR-4:	*Initiate interest on signaling pathways, epigenetics and latest techniques on gene editing.*
CLR-5:	*Generate interest on applications and uses of stem cells and create awareness on ethics and regulations of stem cell research.*
CLR-6:	*Encourage engineering students to develop the strategies for ex vivo for tissue development and disease*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Apply knowledge about embryogenesis, stem cells and its characteristics.*	2	80	70	-	-	H	M	-	-	M	H	-	H	-	H	H	H	H
CLO-2 :	*Gain knowledge on different types of stem cells isolation of ESCs, its specialized functions and transdifferentiation.*	3	85	70	-	-	H	M	-	-	M	H	-	H	-	H	H	H	H
CLO-3 :	*Discuss about cancer stem cells, iPSCs and stem cell niches.*	2	80	75	-	-	H	M	-	-	M	H	-	H	-	H	H	H	H
CLO-4 :	*Identify the role of signaling pathways, epigenetics and genome editing in engineering of stem cells.*	2	80	70	-	-	H	M	-	-	M	H	-	H	-	H	H	H	H
CLO-5 :	*Utilize application of stem cells in tissue engineering, treatment of different diseases & ethics and regulations of stem cell research.*	3	80	70	-	-	H	M	-	-	M	H	-	H	-	H	H	H	H
CLO-6 :	*Apply knowledge on CRISPR/Cas9 gene editing system.*	3	80	70	-	-	H	M	-	-	M	H	-	H	-	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of Stem cells*	*ESCs –IVF, Primate and Mouse ES cells, Markerss*	*Adult stem cells (ASC)-advantages and disadvantages*	*ESC pluripotency and signaling- JAK-STAT pathway*	*Stem Cells in Tissue Engineering*
	SLO-2	*Early development of embryos*	*Nuclear transfer technology in ES cells*	*Sources of ASCs and its properties and its role as specialised cells in differentiation*	*Activin/Nodal/TGFβ Signaling Pathway*	*Therapeutic Applications*
S-2	SLO-1	*Stem Cells in research*	*Human ESCs*	*Transdifferentiation-Definition*	*FGF Signaling Pathway*	*Parkinson's disease*
	SLO-2	*Totipotent, multipotent, oligopotent*	*Isolation and culturing of hESC's*	*Fusion experiments*	*Wnt signaling and Insulin-like growth factors*	*Factors for a Successful Cell Therapy in PD- Problems*
S-3	SLO-1	*"Stemness": Definitions, Criteria*	*Differentiation of stem cells*	*Experiments on transdifferentiation*	*HSC signaling pathways- Notch*	*Autograft, allograft and xenograft-stem cells*
	SLO-2	*Criteria and Standard of stemness*	*Stem Cell Niche in Regenerative Medicine-Stem cells and their niches*	*Intestine-oseophagus cell transition, lens regeneration, liver to pancreas and vice versa*	*Wnt signaling*	*Bone defects-biomaterials- stem cells-osteoprogenitors-osteoblasts*
S-4	SLO-1	*Formation of stem cells*	*Stem Cells derived from early mouse embryos-ES cells*	*Induced pluripotent stem cells (iPSCs)-Methodology*	*TGF signaling*	*Stem Cells for Spinal Cord Injury-Introduction*
	SLO-2	*Embryonic and adult stem cells*	*EC cells*	*Induced pluripotent stem cells (iPSCs)-Applications*	*SMAD signalling*	*Common strategies toward regeneration of the damaged spinal cord.*
S-5	SLO-1	*Potency of Stem Cells*	*EG cells*	*SCNT*	*Epigenetic control of stem cells-experimental background*	*Stem Cell treatment for diabetes-Types of diabetes*
	SLO-2	*Types and classification of stem cells based on potency*	*TS cells*	*Cell fusion, treatment*	*Effects of global histone modifications*	*Development of cell-based therapies for diabetes*
S-6	SLO-1	*Types of stem cells –Embryonic stem cells (ESCs)*	*Systems/models for ES differentiation*	*Cancer stem cells- Isolation*	*DNA methylation in differentiated versus undifferentiated cells*	*Cardiac tissue engineering using stem cells-Methodology*
	SLO-2	*Types of stem cells-Adult stem cells (ASCs)*	*3D bioprinting using stem cells*	*Cancer stem cells -Characterization*	*Effect of TSA on stem cell differentiation*	*Cardiac tissue engineering using stem cells - Applications*
S-7	SLO-1	*Differences between ESCs and ASCs*	*Formation of early extraembryonic lineages*	*Cancer Stem Cells - properties, origin*	*Transcriptional factors network*	*Stem cell treatment for burns*

	SLO-2	*Similarities between ESCs and ASCs*	*Pluripotent cell development*	*Cancer Stem Cells - Theories*	*Effects of histone demethylases*	*Transplantable matrices*
S-8	SLO-1	*Identification and characterization of ESCs at cellular level*	*Formation of somatic lineages—Haematopoietic Lineages*	*CSCs and Metastasis: The Primary TME*	*Epigenetics in somatic cells*	*Ethics of Stem Cell Research- The Ethics of Destroying Human Embryos for Research*
	SLO-2	*Identification and characterization of ESCs at molecular level*	*Formation of somatic lineages—Neuronal Lineages*	*CSCs and Metastasis: Metastatic Niche*	*Epigenetics in iPSCs*	*The Ethics of Using Human Embryonic Stem Cells in Research*
S-9	SLO-1	*Identification and characterization of ASCs at cellular level*	*Therapeutic cloning using ESCs-Disease cell model development*	*Breast cancer metastasis*	*Genome Editing in Stem Cells- ZFN, TALENS*	*Regulations governing Stem Cell research-ICMR, Drugs and Cosmetic Act*
	SLO-2	*Identification and characterization of ASCs at molecular level*	*Reproductive cloning using ESCs*	*Tumor suppressor and Proto-oncogenes*	*CRISPR/CAs9 strategies, Design of DNA donor templates for gene knock-ins*	*Stem Cell as the investigational new drug*

Course Code	18BTE416T	Course Name	TISSUE ENGINEERING FOR REGENERATIVE MEDICINE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechonolgy	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Describe the fundamentals of tissue engineering and tissue repairing from the perspective of engineers*
CLR-2 :	*Express knowledge on clinical applications of tissue engineering*
CLR-3 :	*Identify the basic concept behind tissue engineering*
CLR-4:	*State engineering students to think more on artificially generated tissues for their tissue engineering applications*
CLR-5:	*Discuss the knowledge on 3D-bioprinting*
CLR-6:	*Explain the strategies for innovative bioactive research on tissue engineering*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Apply the components of the tissue architecture*	*1*	*80*	*70*	*H*	*H*	*H*	*M*		*M*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-2 :	*Illustrate the characteristics of stem cells and their relevance in medicine*	*3*	*85*	*75*	*H*	*H*	*H*	*M*			*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-3 :	*Employ an awareness about the properties and broad applications of biomaterials*	*2*	*80*	*70*	*M*	*H*	*H*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-4 :	*Demonstrate the role of tissue engineering and stem cell therapy in organogenesis*	*2*	*80*	*70*	*H*	*H*	*H*	*M*			*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-5 :	*Illustrate the developing methods and new biomaterials for the construction of functional tissue and organ substitute\s*	*2*	*75*	*80*	*H*	*H*	*H*	*M*		*M*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-6 :	*Analyze the testing of biomaterials in vitro and in vivo*	*2*	*80*	*70*	*H*	*H*	*H*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Cellular Basis of Regeneration*	*Tissue types*	*Fundamentals of biomaterials science*	*Introduction to Stem Cells*	*Discussion on Stem cell therapy*
	SLO-2	*Molecular Basis of Regeneration*	*Tissue components*	*Concept of biocompatibility*	*Different types of Stem cells*	*Discussion on Molecular therapy*
S-2	SLO-1	*Introduction to tissue engineering*	*Tissue repair*	*Classes of biomaterials*	*Hematopoietic differentiation pathway of stem cells*	*Therapies for spinal cord injury, muscular dystrophy*
	SLO-2	*Basic definitions used tissue engineering*	*Engineering wound healing*	*Basic properties of Biomaterials*	*Potency of stem cells*	*Orthopedic applications*
S-3	SLO-1	*Current scope of development in tissue engineering*	*Sequence of events of wound healing*	*Disinfection and sterilization of biomaterials*	*Plasticity of stem cells*	*Stem cells and Gene therapy*
	SLO-2	*Use of tissue engineering in therapeutics*	*Three-Dimensional Cell Culture*	*Physico-chemical properties of biomaterials:*	*Sources of embryonic stem cells*	*Tissue engineering of bones*
S-4	SLO-1	*Components used in tissue engineering*	*Organ Culture*	*Mechanical (elasticity, yield stress, ductility, toughness, strength, fatigue, hardness, wear resistance)*	*Sources of hematopoietic and mesenchymal stem cells*	*Tissue engineering of cartilages*
	SLO-2	*Primary cells, cell lines and immortalization of cells*	*Organotypic Culture*	*Tribological (friction, wear, lubricity)*	*Stem Cell markers, FACS analysis*	*Neural tissue engineering*
S-5	SLO-1	*Measurement of tissue characteristics, appearance, cellular component*	*Introduction to Basic wound healing*	*Morphological and texture, Physical (electrical, optical, magnetic, thermical)*	*Differentiation of Stem cell systems- Liver*	*Skin tissue engineering*
	SLO-2	*Cellular fate processes, Cell differentiation, Cell migration*	*Applications of growth factors:*	*Chemical and biological properties*	*Differentiation of neuronal stem cells*	*Cardiovascular tissue Engineering*
S-6	SLO-1	*Direct Cell-Cell contact – Cell junctions in tissues*	*Role of VEGF/angiogenesis*	*Elements in contact with the surface of a biomaterial: blood composition, plasma proteins, cells, tissues*	*Types & sources of stem cell with characteristics:*	*Therapeutic applications*
	SLO-2	*Malfunctions in direct cell-cell contact signaling. Response to mechanical stimuli*	*Different approaches for angiogenesis and its importance*	*Role of Scaffolds in tissue engineering*	*Embryonic stem cells and Adult stem cells*	*Introduction to the basic principles for Biofabrication and 3D printing*
S-7	SLO-1	*Extracellular matrix (ECM) component and their regulation of cell behavior*	*Basic properties of the growth factors*	*Biopolymers*	*Comparison between embryonic and adult stem cells*	*Methods and materials, for Biofabrication and 3D printing*

	SLO-2	*Mechanical measurements of the ECM component*	*Cell-Matrix Interactions*	*Modifications of Biomaterials*	*Bone marrow, primordial germ cells*	*Applications of Biofabrication and 3D printing:*
S-8	SLO-1	*Physical properties of the ECM component*	*Cell-Cell Interactions*	*In vitro testing of biomaterials*	*Cancer stem cells*	*Lab-on-chip, Organ-on-chip*
	SLO-2	*Cell-ECM interactions – Binding to the ECM*	*Telomeres and Self-renewal*	*In vivo testing of biomaterials*	*Induced pleuripotent stem cells*	*Prosthetics and Implants*
S-9	SLO-1	*Modifying the ECM*	*Cell migration*	*Role of Nanotechnology*	*Culture of stem cells*	*Innovative bioactive research*
	SLO-2	*Malfunctions in ECM signaling*	*Control of cell migration in tissue engineering*	*Applications of Biomaterials*	*Immunomodulation of mesenchymal stem cell*	*Regenerative medicine*

Course Code	18BTE417T	Course Name	BIOREACTORS IN TISSUE ENGINEERING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechonolgy	Data Book / Codes/Standards			

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Provide the basic concepts of tissue engineering and bioreactors from the perspective of engineers.*
CLR-2 :	*Identify the 3D- culture of stem cells and organogenesis*
CLR-3 :	*Identify the role of stem cells in clinical applications of different disease conditions.*
CLR-4:	*Identify the safety and efficacy of bioreactors*
CLR-5:	*Create the strategies for designing clinically relevant bioreactors*
CLR-6:	*Identify the usages of bioreactors and their advantages in tissue engineering*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Apply the basic understanding of large scale production stem cells in bioreactors*	1	85	85	H	-	-	H	-	-	-	H	-	-	-	H	H	H	H
CLO-2 :	*Discuss the 3D- culture systems and artificial organs*	2	80	80	M	-	-	M	-	-	-	M	-	-	-	H	H	H	H
CLO-3 :	*Identify the bioreactor based strategies to generate organoids*	2	85	80	H	-	-	M	-	-	-	M	-	-	-	H	H	H	H
CLO-4 :	*Understand the role of bioreactors in the development of drug development and therapy*	2	80	85	M	-	-	M	-	-	-	M	-	-	-	H	H	H	H
CLO-5 :	*Explain the large scale production of stem cells*	2	80	80	H	-	-	H	-	-	-	M	-	-	-	H	H	H	H
CLO-6 :	*Apply the clinical applications of bioreactors*	3	85	85	H	-	-	H	-	-	-	M	-	-	-	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1 SLO-2	*Introduction to tissue engineering – Current scope of development; Cell as therapeutic agents*	*Bioreactors in Tissue Engineering; Tissue formation in Bioreactor systems – Generation of functional tissues*	*Bioreactors- Link between in vitro and in vivo studies*	*Biomaterials: Properties of Biomaterials ,Surface, bulk, mechanical and biological properties*	*Clinical applications - Stem cell therapy, Molecular therapy*
S-2	SLO-1 SLO-2	*cell numbers and growth rates, measurement of cell characteristics morphology, cell viability, motility and functions*	*Principles of functional tissue engineering – Functional tissue engineering and role of Biomechanics in a 3D environment*	*Novel approaches in bioreactor systems for stem cell seeding of vascularized bioscaffolds*	*Scaffolds & tissue engineering, Types of Biomaterials, biological and synthetic materials*	*In vitro organogenesis, Neurodegenrative diseases*
S-3	SLO-1 SLO-2	*Biochemical Basics for Nutrition and Growth of living Cells - Measurement of tissue characteristics, appearance, tissue types*	*Ex vivo engineering of living tissues – generation of mammalian tissue equivalents in vitro – Bioreactors role in tissue engineering of Cartilage*	*Bioreactor-based strategies with reconstructive applications of (Vascularized composite allotransplantation) VCA*	*Biopolymers, Applications of biomaterials,Modifications of Biomaterials*	*spinal cord injury, heart disease, diabetes, burns and skin ulcers*
S-4	SLO-1 SLO-2	*Tissue dynamics and Cell migration cellular component, ECM component, mechanical measurements and physical properties*	*Cardiovascular tissue (Cardiomyocytes, valves), Vascular tissue, musculoskeletal tissue and Skin –Bone*	*Stem cell cultivation in scaffold-bioreactor systems; Physiological biomimicry*	*Role of Nanotechnology. Sensing and Automation in bioreactor systems*	*muscular dystrophy, orthopedic applications*
S-5	SLO-1 SLO-2	*Complexity and organization of the Organ system; Bioreactors; History of Bioreactors*	*microfluidic devices and microbioreactors for stem cell micro environment – Perfusion bioreactors for granulocyte progenitor cell growth; Bioreactor stimulation*	*Understanding Mechanical forces on organs and functional aspects*	*Bioreactors in drug discovery and implant testing; Bioreactors in clinics*	*Stem cells and Gene therapy*
S-6	SLO-1 SLO-2	*Types of Bioreactors – Perfusion Bioreactors for 3D cultures, Spinner Flask Bioreactor*	*Mechanics and Controlled Parameters of Bioreactors – Temperature, pH, Dissolved oxygen (DO), Oxygen Diffusion*	*Control and Feedback Control in Mechatronics for Mechanical Stimulation; Scaffolds and Constructs for Bioreactor Systems (including adapted Fabrication Techniques)*	*Stem cell cultivation in scaffold-bioreactor systems;*	*Physiological models, tissue engineering therapies, product characterization*

S-7	SLO-1	*Rotating Wall Bioreactor, Compression Bioreactor, Strain Bioreactor*	*Nutrient Transport, Waste Removal; Predicting Mechanical Functionality of Engineered Tissues*	*Tissue architecture- Tissue types and Tissue components, Tissue repair*	*Large-scale bioreactor cultivation of pluripotent stem cells*	*components, safety, efficacy. Preservation – freezing and drying*
	SLO-2					
S-8	SLO-1	*static culture, stem cell cultivation in scaffold Bioreactor systems*	*Engineering stem cell niches in bioreactors- Oxygen tension, Scaffold/substrate cues*	*Basic wound healing events, Applications of growth factors*	*Engineering of functional bone tissue from human stem cells*	*Patent protection and regulation of of tissue-engineered products,ethical issues*
	SLO-2					
S-9	SLO-1	*Hydrostatic pressure Bioreactor, Flow Perfusion Bioreactor, Combined Bioreactor*	*Decellularized ECMs, Mechanical forces, Electrical stimulation, Flow shear rate, and paracrine and autocrine factors*	*Role of VEGF. Angiogenesis,Basic properties,Cell-Matrix& Cell-Cell Interactions, Control of cell migration in tissue engineering*	*Miniature bioreactors for precise, systematic studies of stem cell environments*	*Emerging trends in clinically relevant bioreactor design and future direction*
	SLO-2					

Learning Resources	*1. Molecular and cellular tissue engineering (The biomedical hand book, 4th edition), Joseph D. Bronzino and Donald R. Peterson, 2015* *2. Biomaterials science and Tissue engineering: Principles and methods (Cambridge IISc series) - Bikramjit Basu, 2017* *3. 3D Cell culture: Fundamental and applications in tissue engineering and regenerative medicine, Ranjana C. Dutta and Aroop K Dutta, 2018.* *4. Raphael Gorodetsky, Richard Schäfer. Cambridge: RSC publishing, c2011.Stem cell based tissue repair.*

CLO-6 :	*Understand the challenges behind successful transplantation or grafting and the significance of neovascularization*	2	80	75	H	-	M	L	-	-	-	H	-	H	-	M	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Organs and Cells of the Immune System – Primary and Secondary Lymphoid Organs*	*The Complement Cascades*	*Immunobiology of Transplantation*	*Stem cells – types and sources*	*Vascular system*
	SLO-2	*Mucosal and Cutaneous associated lymphoid tissue. (MALT & CALT)*	*The role of Major Histocompatibility Complex in Immune Response*	*Cells and Factors involved in Transplant Acceptance vs. Rejection*	*Stem cells in Regenerative Biology*	*Mechanisms of blood vessel formation*
S-2	SLO-1	*Mucosal Immunity*	*Autoimmune disease*	*Importance of Adaptive immunity functions in Graft Recognition*	*Stem cell Therapy for Skin Burns, Ulcers, Neurodegenerative diseases, Spinal cord injury*	*Hemangiogenesis*
	SLO-2	*Antigens – immunogens, haptens*	*Interpersonal compatibility*	*Importance of Innate immunity functions in Graft Recognition*	*Stem cell Therapy for Ulcers,*	*Lymphangiogenesis*
S-3	SLO-1	*Antibody Structure*	*T lymphocyte recognition restrictions*	*Molecular Aspects of Acute and Chronic Rejection*	*Stem cell Therapy for Neurodegenerative diseases, Spinal cord injury*	*Angiogenic factors and their receptors*
	SLO-2	*Antibody Function*	*Evolutionary diversity*	*The biological basis of Graft Verses Host Disease*	*Immunological considerations and the potential barriers for Stem cell therapy*	*Inflammation*
S-4	SLO-1	*Generation of antibody diversity*	*Basis of self – non-self discrimination and Autoimmune disorders*	*Embryonic stem cells*	*Clinical transplantation, Immune tolerance, Killer Immunoglobulin like receptors in transplantation*	*Angiogenesis*
	SLO-2	*B cell maturation*	*Kinetics of immune response, Hypersensitivity and their types*	*Expression of histocompatibility antigens*	*Immunosuppressive therapy*	*Tissue injury response*
S-5	SLO-1	*B cell activation and differentiation*	*HLA typing*	*T-cell response against u/dhESCs measured by functional assays*	*Significance of acellular grafts in regeneration*	*Importance of Vascularization in Tissue Engineering*
	SLO-2	*T-cell maturation activation and differentiation*	*Immunological considerations for Tissue Engineering*	*Interaction of natural killer cells with hESCs*	*Mast cells in allograft rejection*	*Angiogenesis and Vascular Remodeling*
S-6	SLO-1	*T-cell receptors*	*Stem cell Banking*	*Generation of patient-specific isogenic hESC lines*	*Graft-versus-host disease*	*Organization and Patterning of Endothelial Cells in Engineered Tissues*
	SLO-2	*Functional T Cell Subsets*	*Cell-cell co-operation*	*Immunological Aspects of Allogeneic mesenchymal stem cell therapy*	*Mouse models of graft-versus-host disease*	*Models for studying angiogenesis*

S-7	SLO-1	*Cell-mediated immune responses*	*Hapten-carrier system*	*Autologous Mesenchymal Stem Cell Therapies*	*Cytokines in Graft-versus-Host Disease*	*Blood Capillary analogues*
	SLO-2	*ADCC*	*Types of Tissue injury*	*CML of Haematopoietic stem cells*	*Potential barriers to engraftment of human pluripotent stem cells*	*Role of Vascular endothelial growth factors on Angiogenesis*
S-8	SLO-1	*Cytokines-properties, and receptors*	*Tissue injury and immune responses*	*allogenic transplantation of HSC*	*Cancer Stem Cells in Solid Tumors*	*Signaling pathways of Angiogenesis*
	SLO-2	*Cytokines and therapeutic uses*	*Immunoprophylaxis*	*Graft verses Leukemia*	*Immunologic targeting of cancer stem cell population*	*Micropatterning approaches to microvessel creation*
S-9	SLO-1	*Antigen processing*	*Immunotherapy*	*Targeting Malignant progenitors*	*Opportunities in Engineered tissue grafts*	*Stem cells for vascular regeneration*
	SLO-2	*Antigen presenting cells*	*Current status of Immunotherapy*	*Recent Advances in transplantation*	*Opportunities in Engineered tissue grafts*	*Stem cells and scaffolds for vascular regeneration*

Learning Resources	1. *The Immunological Barriers to Regenerative Medicine. Editors-Paul J. Fairchild, Humana Press 2013* 2. *Stem Cell Transplantation, edited by Carlos López-Larrea, Antonio López Vázquez, Beatriz Suárez Álvarez. Springer 2016* 3. *Vascularization: Regenerative Medicine and Tissue Engineering, edited by Eric M. Brey, CRC Press 2017* 4. *Kuby Immunology. Thomas J. Kindt, Richard A. Goldsby, W.H.Freeman, 2007.*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Categorize the pattern of inheritance in humans*																		
CLR-2 :	*Analyze human genome structure and organization*																		
CLR-3 :	*Use karyotype to analyze human chromosomal aberrations*																		
CLR-4:	*Apply different methods for mapping of genes in humans*																		
CLR-5:	*Compare genetic variations in human population and prenatal diagnosis*																		
CLR-6:	*Illustrate genetic principles in human biology studies*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Describe the human inheritance concepts and associated complications*	*2*	*80*	*70*	*H*	*H*	*H*	*H*		*M*	*L*	*H*	*H*	*H*		*H*	*H*	*H*	*H*
CLO-2 :	*Explain the regulation of human gene expression*	*2*	*80*	*75*	*H*	*H*	*H*	*H*			*M*	*H*	*H*	*H*		*H*	*H*	*H*	*H*
CLO-3 :	*Recognize the nature of human chromosome abnormalities*	*2*	*80*	*70*	*M*	*H*	*M*	*H*		*M*		*H*	*H*	*H*		*H*	*H*	*H*	*H*
CLO-4 :	*Identify the different methods of human disease gene identification*	*2*	*80*	*75*	*H*	*H*	*H*	*H*			*H*	*H*	*H*	*H*		*H*	*H*	*H*	*H*
CLO-5 :	*Discuss the importance of population screening and prenatal diagnosis*	*3*	*85*	*70*	*H*	*H*	*H*	*H*		*M*	*H*	*H*	*H*	*L*		*H*	*H*	*H*	*H*
CLO-6 :	*Appraise the basic concepts of human genetics*	*2*	*80*	*75*	*H*	*H*	*H*	*H*		*H*	*H*	*H*	*H*	*H*		*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Human Genetics – Introduction*	*Human chromosome structure*	*Karyotyping*	*Genetic mapping*	*Genetic testing*
	SLO-2	*Modern Human Genetics*	*Human chromosome organization*	*Chromosome banding*	*Recombination fraction*	*Gene scanning*
S-2	SLO-1	*Monogenic inheritance*	*Mitochondrial genome organization*	*FISH technique*	*Genetic markers*	*Analysing specified sequence changes*
	SLO-2	*Incomplete dominance and Codominance*	*Limited autonomy of mitochondrial genome*	*Chromosome painting*	*Two point mapping*	*MLPA test*
S-3	SLO-1	*Uniparental disomy*	*Protein coding genes*	*Numerical chromosome abnormalities*	*Multipoint mapping*	*DNA profiling*
	SLO-2	*Penetrance, nonpenetrance*	*RNA genes*	*Aneuploidy*	*Fine mapping analysis*	*Applications of DNA profiling*
S-4	SLO-1	*Expressivity*	*microRNAs*	*Structural chromosome abnormalities*	*Segregation analysis*	*Personalized medicine*
	SLO-2	*Mitochondrial inheritance*	*Regulatory RNAs*	*Mosaicism*	*Linkage analysis*	*Drugs for specific genotypes*
S-5	SLO-1	*Late onset diseases*	*Overlapping genes*	*Autosomal abnormalities*	*Association studies*	*Prenatal diagnosis*
	SLO-2	*Disease anticipation, imprinting*	*Genes-within-genes*	*Sex chromosome abnormalities*	*Linkage disequilibrium*	*Cast study: Down syndrome*
S-6	SLO-1	*Heterogeneity, consanguinity*	*Noncoding DNA*	*Human reproductive disorders*	*Positional cloning*	*Population screening*
	SLO-2	*Pleiotropy, mosaicism*	*Satellite DNA*	*Congenital abnormalities*	*Candidate gene testing*	*Ethical implications*
S-7	SLO-1	*Mendelian pedigree patterns*	*Mini- and microsatellite DNA*	*Polyploidy*	*Position independent strategies*	*Pedigree construction*
	SLO-2	*Pedigree analysis*	*Transposon derived repeats*	*Mixoploidy*	*Case studies*	*Proband analysis*
S-8	SLO-1	*Multifactorial inheritance*	*Alternative transcription*	*X-inactivation*	*Duchenne muscular dystrophy*	*Pharmacogenetics*
	SLO-2	*Quantitative traits*	*Long range control of gene expression*	*Mosaicism due to X-inactivation*	*Cystic fibrosis*	*Genetic differences and drug metabolism*
S-9	SLO-1	*Polygenic theory*	*DNA methylation*	*Locus heterogeneity*	*Branchio-oto-renal syndrome*	*Genetic counseling*
	SLO-2	*Gene and genotype frequencies*	*Epigenetics*	*Clinical heterogeneity*	*Crohn disease*	*Importance of genetic counseling*

Course Code	18BTE421T	Course Name	HIGH THROUGHPUT TECHNIQUES IN ADVANCED BIOLOGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*List various high throughput techniques in biology and 2. applying these techniques in their own research*
CLR-2 :	*Describe the basics of genomics and its uses*
CLR-3 :	*Analyse qualitatively and quantitative the expression of protein*
CLR-4:	*Compare the differential expression of proteins and interpret it in biological context*
CLR-5:	*Practice advance high throughput techniques like lipidomics, epigenomics and metabolomics*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Describe the terminology, technology characteristics and stake holder benefits of high throughput technologies*	*1*	*90*	*80*	*H*	*H*	*H*	*H*	*L*	*M*	*L*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-2 :	*Investigate genomic data, interpret the data in the population genetics and evolutionary genetic context*	*2*	*80*	*80*	*H*	*H*	*H*	*H*	*H*	*L*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*	*H*
CLO-3 :	*Measure the expression of genes, develop necessary expertise in using different computation tools*	*2*	*85*	*80*	*M*	*H*	*M*	*H*	*L*	*M*	*L*	*M*	*H*	*H*	*H*	*H*	*H*	*H*	*H*

CLO-5 :	*Distinguish Metabolomics, Epigenomics and lipdomics research and interpreting the data generated*	*3*	*75*	*75*	*H*	*H*	*H*	*H*	*L*	*H*	*H*	*H*	*L*	*L*	*H*	*H*	*H*	*H*	*H*
CLO-6 :	*Analyze high throughput data using software*	*3*	*70*	*75*	*H*	*H*	*L*	*H*	*H*	*L*	*L*	*H*	*M*	*M*	*H*	*H*	*M*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*History of technology advancement in biology*	*Introduction to Genome*	*Browser and databases for transcriptomics*	*Introduction to proteomics*	*Introduction to metabolomics*
	SLO-2	*What is high throughput biology*	*Ultrafine structure of gene*	*Tools for transcriptomics*	*Analytical Techniques in proteomics*	*Secondary metabolites and their role in biology*
S-2	SLO-1	*High content screening and their uses*	*Regulatory Landscapes of Mammalian Genomes*	*Search for transcription factor binding sites*	*Protein information databases*	*Metabolome of plants, animals and microbes*
	SLO-2	*High throughput screening in biology*	*Epigenetic Landscapes of Mammalian Genomes*	*miRNA targets and regulatory motifs*	*SwissPROT and UNIPROT*	*Metabolites and metabolomics*
S-3	SLO-1	*Technology characteristics of high throughput screening*	*Genome sequencing*	*Overview of Non-Coding RNAs*	*Mass spectrometry*	*Target analysis of metabolites*
	SLO-2	*Recent theories on High throughput screening*	*Genome assembly and annotation*	*iCLIP*	*ESI MS-MS*	*Metabolomic finger printing*
S-4	SLO-1	*How high throughput technologies empower the stake holders*	*Application of population genetics in genomics*	*Expressed Sequence Tag(EST) anlysis*	*Mass spectrometry ESI MALDI-TOF*	*Epigenome and Imprinting,*
	SLO-2	*Real world applications*	*Important principles in population genomics*	*Serial Analysis of Gene Expression (SAGE)*	*Peptide mass finger printing database*	*Does epigenetic regulation is an antithesis to Darwin's Theory of evolution?*
S-5	SLO-1	*Scalability of High through put screening*	*Comparative genomics of prokaryotes*	*Ribosome Profiling for ribosome-protected mRNA fragments*	*Targeted Mass spectrometry -Principles*	*Histone modification assay*
	SLO-2	*Evolvabilty of High through put screening*	*Comparative genomics of eukaryotes*	*What are RNA motifs and their relevance*	*Targeted Mass spectrometry - Applications*	*DNA Methylation assay*
S-6	SLO-1	*Exploring and replicating published research work*	*Functional genomics of prokaryotes*	*Experimental techniques 1- Micro array*	*Functional mass spectrometry principles*	*Genome wide assays and their relevance*
	SLO-2	*Reviews and their uses*	*Functional genomics of eukaryotes*	*2. RT-PCR as a validating tool*	*Functional mass spectrometry applications*	*Bisulphate sequencing and Direct detection of methylation*
S-7	SLO-1	*Need of open source research*	*Ecological genomics (Metagenomics) of microbes*	*Importance of reference gene*	*Overview of protein quantitation methods*	*Experimental methods for lipid extraction*

	SLO-2	*Power of open source research*	*Ecological genomics (Metagenomics) higher organisms*	*Analysis of differential gene expression*	*Quantitation of proteins using MS*	*Lipid assays*
S-8	SLO-1	*Comparison of available data quality*	*Pharmacokinetics basics*	*Generation of transcriptional regulatory networks*	*Post translational modification of proteins*	*Lipid detection techniques*
	SLO-2	*Comparison of methods for published data*	*Pharmacogenomics*	*Analysis of transcriptional regulatory networks*	*Analysis of post translational modification of proteins using MS*	*Lipid based imaging techniques*
S-9	SLO-1	*'OMICS' technologies*	*Application of genomics in public health*	*Genetic screens for protein network*	*Protein – Protein interactions*	*Lipid based disorders*
	SLO-2	*Current status of OMICS technologies*	*Application of genomics in industry*	*Understanding signaling pathways*	*Interactomics*	*Lipidomic profiling*

Duration (hour)		10	10	10	10	10
S-1	SLO-1	*Basic concepts of metabolic engineering*	*Overview of metabolic pathways in microbes*	*Metabolic engineering for enhancing product formation*	*Tools for metabolic engineering*	*Important aspects of metabolic engineering*
	SLO-2	*Importance of metabolic engineering*	*Regulation of metabolic pathways*	*Acetone production*	*Classical mutagenesis techniques*	*Metabolic pathway analysis*
S-2	SLO-1	*Overview of cellular metabolism*	*Enzyme mediated pathway regulation*	*Amino acid production*	*Methods for screening mutants*	*Metabolic flux analysis*
	SLO-2	*Energy generation pathways in microbes*	*Mechanisms of enzyme action*	*Engineering pentose metabolism*	*Gene shuffling methods*	*Metabolic flux control*
S-3	SLO-1	*Anaplerotic reactions*	*Transcriptional control of enzyme activity*	*Starch and lignin degradation*	*Gene knockout using CRISPR*	*Methods to calculate metabolic flux*
	SLO-2	*Rate constants and reaction equillibrium*	*Enzyme turnover*	*Vitamin production*	*Cloning and expression of gene clusters*	*Metabolic component analysis*
S-4	SLO-1	*Fuelling reactions – glycolysis*	*Enzyme activity by translational control*	*Polyketide biosynthesis*	*Antisense RNA based methods*	*Linear pathway analysis*
	SLO-2	*Fermentation pathways*	*Reversible inhibition*	*Biopolymer production*	*Directed evolution for improving protein function*	*Branched pathway analysis*
S-5	SLO-1	*Catabolism of fats and amino acids*	*Irreversible inhibition*	*Production of novel compounds using metabolic engineering*	*Artificial chromosomes*	*Structure of a metabolic network*
	SLO-2	*Biosynthetic of polymers*	*Global regulation of metabolic pathways*	*Antibiotics and vitamins*	*Chromosomal engineering strategies*	*Flux distribution*
S-6	SLO-1	*Nucleic acid biosynthesis*	*Allosteric enzymes involved in metabolic regulation*	*Production of pigments*	*RNA engineering technologies*	*Flux analysis of metabolic networks*
	SLO-2	*Amino acid biosynthesis*	*Regulation of enzyme activity using feedback mechanism*	*Biopolymer production*	*Improving translational efficiency*	*Determination of Group Control Coefficient*
S-7	SLO-1	*Active transport*	*Sigmoidal kinetics*	*Pesticide degradation*	*Stimulation of product formation using precursor molecules*	*Thermodynamics of cellular processes*
	SLO-2	*Facilitated diffusion*	*Allosteric regulation of enzyme activity*	*Xenobiotic degradation*	*Multifunctional enzyme systems*	*Thermodynamic feasibility*

S-8	SLO-1	*Cellular energetics,*	*Co-operativity of allosteric enzymes*	*Metabolic engineering of mammalian cells*	*Engineering of secretory processing pathway*	*Metabolic models for growth*
	SLO-2	*yield coefficients*	*Examples of enzyme cooperativity*	*Cell cycle engineering*	*Phenotype microarrays*	*Models for product formation*
S-9	SLO-1	*Primary metabolite production*	*Branch point classification*	*Apoptosis control*	*HighThrougput Mutagenesis*	*Genome scale modeling of cellular metabolism*
	SLO-2	*Secondary metabolite production*	*Coupled reactions*	*Inhibition of cell proliferation*	*High Throughput screening*	*Cell free systems for metabolic engineering*

Course Code	18BTE423T	Course Name	GENETICS OF CROP IMPROVEMENT	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18BTC105J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Genetic Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify the important attributes that demonstrate high yield potential*
CLR-2 :	*Understanding the factors that control crop productivity.*
CLR-3 :	*Analyze Biotic and abiotic stress-plant interactions*
CLR-4:	*Explore plant-microbe beneficial interactions*
CLR-5:	*Analyze metabolic pathways for crop value addition*
CLR-6:	*compare, contrast and distinguish the right molecular strategies for crop improvement*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)
CLO-1 :	*Explain the genetic basis of crop productivity*	*1*	*85*	*75*
CLO-2 :	*Analyze the tools for crop improvement*	*2*	*90*	*80*
CLO-3 :	*Develop tolerance against abiotic stress*	*2*	*75*	*65*
CLO-4 :	*Develop tolerance against biotic stress*	*2*	*75*	*65*
CLO-5 :	*Analyze pathways to engineer value addition*	*3*	*70*	*60*
CLO-6 :	*Develop elite cultivars*	*3*	*70*	*60*

Program Learning Outcomes (PLO)

	1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Traditional breeding*	*Pest tolerance and agriculture sustainability*	*Abiotic stress and agriculture sustainability*	*Photosynthetic efficiency*	*Plant Metabolic Pathways and products*
	SLO-2	*Methods of breeding*	*Pathogens and insect pests*	*Major abiotic stresses*	*Regulation of photosynthesis*	*Signals cascade*
S-2	SLO-1	*Marker assisted breeding*	*Genetics of host-pathogen interactions*	*Biochemical basis of abiotic stresses*	*C3, C4, and CAM*	*Metabolic engineering for value addition*
	SLO-2	*Methods to generate markers*	*signal transduction*	*signal transduction*	*Molecular control of photosynthesis*	*Methods to modify metabolic pathway*
S-3	SLO-1	*Mutation breeding*	*Virulence- Avirulence in host–pathogens interaction*	*drought, salinity*	*Biological Nitrogen Fixation*	*Sugar metabolism*
	SLO-2	*Steps in mutation breeding*	*Molecular mechanism of virulence*	*Regulation of drought response*	*Molecular regulation of N fixation*	*Amino acid pathway*
S-4	SLO-1	*transgenic technology*	*Molecular strategies of pathogen tolerance*	*Temperature*	*Molecular basis of N fixation*	*Vitamin A and carotenoid pathway*
	SLO-2	*Over expression and knock outs*	*Approaches against fungal pathogens*	*Regulation of temperature respose*	*Enzymes involved in N fixation*	*vitamin A fortified rice*
S-5	SLO-1	*Loss of /Gain of function mutants*	*Approaches against bacterial pathogens*	*Stress signal transduction*	*Hormonal in plant growth and development*	*Fortified edible oil*
	SLO-2	*Genetic screens*	*Insect pest resistance*	*Key transcriptional factors in stress response*	*Plant Growth Promoting bacteria*	*Omega fatty acids*
S-6	SLO-1	*RNAi*	*Molecular strategies of insect pest tolerance*	*Reactive oxygen species*	*Phosphorus Solubilizing/Mobilizing bacteria*	*Secondary metabolites*
	SLO-2	*Genome editing*	*Biological control of insect pests*	*Regulation of ROS*	*Molecular basis of P mobilization*	*Industrially and medicinal metabolites*
S-7	SLO-1	*Zinc finger*	*multi-gene pyramiding*	*Molecular strategies for tolerance against abiotic stress*	*Sucrose as a signaling molecule*	*metabolic engineering to remove antinutritional compounds*
	SLO-2	*TALEN*	*Pathogenesis related proteins*	*calcium, nitric oxide and salicylic acid in plant defence*	*Vesicular Arbuscular Mycorrhiza*	*Phytates*
S-8	SLO-1	*CRISPR/Cas*	*Virus resistance*	*synthesis and functions of proline*	*Microbes that mimics stress response*	*Engineering to improve food digestibility*
	SLO-2	*CRISPR/Cas mechanism*	*Strategies of virus resistance*	*synthesis and functions of glycine betaine in stress tolerance*	*Nutrient translocation*	*Engineering for aesthetic value*
S-9	SLO-1	*GMO*	*Molecular methods to generate virus resistance*	*Role of hormones in stress response*	*Applications of plant – beneficial microbe association*	*Applications of metabolic engineering in crop improvement*
	SLO-2	*Regulation and Monitoring GM*	*Applications of genetic engineering in pest tolerance*	*Applications of genetic engineering in abiotic stress tolerance*	*Genetic engineering approaches to enhance plant growth and development*	*Applications of metabolic engineering in agricultural industry*

Course Code	18BTE424T	Course Name	MOLECULAR BIOLOGY OF INFECTIOUS DISEASES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18BTC103J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*State the basics of infectious diseases*
CLR-2 :	*Discuss molecular pathogenesis of bacterial diseases*
CLR-3 :	*Discuss molecular pathogenesis of viral diseases*
CLR-4:	*Explain molecular pathogenesis of parasitic and fungal diseases*
CLR-5:	*Illustrate the molecular pathogenesis of fungal pathogens*
CLR-6:	*Recognize defense mechanisms of infectious microbes*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Describe the basics of molecular pathology of various infectious diseases*	*1*	*80*	*75*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*H*	*M*	*L*	*L*	*H*	*H*	*H*	*H*
CLO-2 :	*Investigate the molecular pathogenesis of bacterial pathogens*	*2*	*80*	*70*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*M*	*L*	*L*	*H*	*H*	*H*	*H*
CLO-3 :	*Investigate the molecular pathogenesis of viral pathogens*	*2*	*80*	*75*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*M*	*L*	*L*	*H*	*H*	*H*	*H*
CLO-4 :	*Examine the molecular pathogenesis of parasitic diseases*	*2*	*80*	*70*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*M*	*L*	*L*	*H*	*H*	*H*	*M*

CLO-6 :	*Recall the defense mechanisms of infectious microbes*	*3*	*90*	*80*	*M*	*M*	*M*	*M*	*H*	*H*	*H*	*M*	*M*	*L*	*M*	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	Historical perspective of infectious diseases	Morphology, pathogenicity of Cholera	Morphology, pathogenicity of HIV	Morphology and lifecycle of Malaria	Hide from immune surveillance
	SLO-2	Disease outbreak	Molecular biology of Cholera	Molecular biology of AIDS virus	Molecular biology of Malaria	Microbe escape mechanism
S-2	SLO-1	Microbial Toxins	Morphology, pathogenicity of Tuberculosis	Morphology and lifecycle of Dengue	Morphology and lifecycle of Wuchereria bancrofti	Antibiotic resistance mechanism
	SLO-2	Types of microbial toxins	Molecular biology of Tuberculosis	Molecular biology of Dengue	Molecular biology of Filariasis	Multiple drug resistance
S-3	SLO-1	Toxin assays	Enteric fever causes	Morphology, pathogenicity of Rabies virus	Morphology , transmission, pathogenesis of Leptospirosis	Evasion of phagocytosis
	SLO-2	Toxin genes	Molecular biology of Enteric Fever	Molecular biology of Rabies	Molecular biology of Leptospirosis	Evasion mechanism of phagocytosis
S-4	SLO-1	Water borne pathogens	Morphology and pathogenesis of Shigella	Structure and pathogenesis of Hepatitis virus	Morphology, pathogenicity of Treponema pallidum	Antigen Hyper variability
	SLO-2	Air borne Pathogens	Bacterial signals and cell responses during Shigella entry into epithelial cells	Molecular biology of Hepatitis	Molecular biology of Syphilis	Antigenic shift and drift
S-5	SLO-1	Soil borne pathogens	Insights into biology of Typhoid Toxin	Pathogenesis of papilloma virus	Fungal pathogens	Secreted modulators
	SLO-2	Pathogens transmitted via animals	Serovars of Salmonella	Molecular biology of cervical cancer	Molecular biology of Aspergillosis	Surface modulators
S-6	SLO-1	Mode of Entry of pathogens	Genetic and Molecular aspects of Helicobacter pyroli	Morphology and pathogenesis of Flu virus	Causes of Athletes foot	Interaction with Toll Like receptors
	SLO-2	Initiation of diseases	Molecular biology of Gastric ulcer	Molecular biology of Flu virus	Molecular biology of Athletes foot	Interference with Cytokines
S-7	SLO-1	General disease symptoms - External	Morphology and pathogenesis of botulism	Morphology and pathogenesis of Polio virus	Morphology , transmission, pathogenesis of Trypanosomia	Complement pathway inhibition
	SLO-2	Disease symptoms - Internal	Mode of action of botulism toxin	Molecular biology of Polio virus	Molecular biology of Sleeping sickness	Defense against competition
S-8	SLO-1	Virulence factors – Cell bound	Morphological identification methods	Genetic screens to understand signaling pathways	Molecular biology of Amoebiasis	Interfering with cell signaling
	SLO-2	Virulence factors - secreted	Culture based identification methods	Virus culturing	Molecular biology of Candidiasis	Examples
S-9	SLO-1	Virulence associated Genes	Serologic diagnostic methods of bacterial diseases	Serologic diagnostic methods of viral diseases	Serologic diagnostic methods of parasitic diseases	Pathogen signaling to repress antimicrobial compound synthesis
	SLo-2	Plasmid borne virulence associated genes	Molecular diagnostic methods of bacterial diseases	Molecular diagnostic methods of viral diseases	Molecular diagnostic methods of parasitic diseases	Pathogen structural barriers

Course Code	18BTE426T	Course Name	GENE THERAPY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18BTC105J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide basic knowledge on gene therapy and its importance.*
CLR-2 :	*Identify an interest to know about the different types of gene therapy, its applications for diseases.*
CLR-3 :	*Develop awareness about the different methods of gene delivery and provide knowledge on vectors.*
CLR-4:	*Initiate interest on latest techniques in genome editing and understand its applications.*
CLR-5:	*Develop interest on applications and uses of gene therapy in treatment of disease.*
CLR-6:	*Prepare engineering students to know the recent advancements in gene therapy.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15

CLO-6 :	*Analyze recent advancements in gene therapy.*	2	80	70	H	-	H	M	-	-	M	H	-	H	-	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Gene therapy*	*Embryo somatic gene therapy - Reproductive cloning*	*Gene delivery-An overview*	*Genome editing-Gene Targeting*	*Stem cells in gene therapy-gene therapy of hematopoietic stem cells*
	SLO-2	*Genes as drugs*	*Embryo somatic gene therapy - Therapeutic cloning*	*Methods of gene delivery*	*Genome editing Processes-Double strand break repair*	*Major Applications Procedures for Gene Transfer into Hematopoietic Stem Cells*
S-2	SLO-1	*Gene therapy – overview*	*Preimplantation genetic diagnosis-History, Indications and applications*	*Direct Inoculation of DNAs*	*Engineered Nucleases*	*Treatment of genetic diseases - gene therapy of cancer- Gene Therapy of Cancer Using Suicide Genes*
	SLO-2	*History of Gene Therapy*	*Preimplantation genetic diagnosis – Techniques and ethical issues*	*Direct Inoculation of RNAs*	*Meganucleases*	*Immunotherapy of Cancer*
S-3	SLO-1	*Types of gene therapy-somatic*	*Prenatal/ fetal gene therapy – Concepts and methods*	*Non-viral methods-Physical methods*	*Zinc Finger Nucleases*	*Treatment of genetic diseases - neurodegenerative disorders- Gene Therapy of Alzheimer's Disease*
	SLO-2	*Types of gene therapy- germ line*	*Prenatal/fetal gene therapy with case study –Tay Sach's disease*	*Non-viral methoods-Chenical methods*	*ZNFs as gene editing tools*	*Treatment of genetic diseases - neurodegenerative disorders- Gene Therapy of Parkinson's Disease*
S-4	SLO-1	*Methods of gene therapy-Ex vivo*	*Postnatal somatic gene therapy*	*Viral Vectors - Retroviral vectors- Structure*	*TALENs as gene editing tools*	*Gene Therapy of Huntington's Disease*
	SLO-2	*Methods of gene therapy- In-vivo*	*Germline gene therapy*	*Retroviral vectors- Mechanism and action Adenoviral vectors-Structure, Mechanism*	*CRISPR/Cas9 as gene editing tools- Introduction and Mechanism*	*Gene Therapy of Spinal Muscular Dystrophy*
S-5	SLO-1	*Vectors for gene therapy-viral*	*Methods of Germline gene therapy*	*Adenoviral vectors-Structure, Mechanism*	*CRISPR/Cas9 as gene editing tools- Applications*	*Gene Treatment of genetic diseases - Retinal Photo transduction and the Visual Cycle*
	SLO-2	*Vectors for gene therapy-non-viral*	*Germline gene therapy-Drawbacks*	*Adenoviral vectors- Advantages and disadvantages*	*Precision and efficiency of engineered nucleases*	*Gene Treatment of genetic diseases - Congenital Retinal degenerations*
S-6	SLO-1	*Diseases with dominant heredity*	*Suicide gene therapy – Current strategies*	*Adeno associated viral vectors-Structure, Mechanism*	*Multiplex automated Genome engineering*	*Gene Therapy of Retinal Neovascularization and Retinoblastoma*

	SLO-2	*Diseases with recessive heredity*	*Suicide gene therapy for Cancer*	*Adeno associated viral vectors- Advantages and disadvantages*	*Types of therapeutic genome modifications- Gene disruption*	*Treatment of genetic diseases - cardiovascular disorders-*
S-7	SLO-1	*Ex vivo gene therapy with case study-SCID (Causes)*	*Secretion gene therapy*	*Herpes simplex viral vectors –Structure*	*Types of therapeutic genome modifications- Non homologous end joining - NHEJ gene correction*	*Gene Therapy of Heart Failure*
	SLO-2	*Ex vivo gene therapy with case study-SCID (Treatment)*	*Immunotherapy*	*Herpes simplex viral vectors – Mechanism and Action*	*Types of therapeutic genome modifications- Non homologous end joining - NHEJ gene addiction*	*Therapeutic Angiogenesis*
S-8	SLO-1	*In vivo gene therapy with case study- Cystic fibrosis (Causes)*	*Gene therapy for infectious diseases- Nucleic acid-based gene therapy (Antisense DNA and RNA, Ribozymes, RNA decoys)*	*Envelope protein pseudo typing of viral vectors*	*Types of therapeutic genome modifications - Homology directed repair - HDR gene correction*	*Gene therapy of HIV infection - Natural History of HIV-1 Infection*
	SLO-2	*In vivo gene therapy with case study- Cystic fibrosis (Treatment)*	*Protein- based assays for gene therapy*	*Replication-competent vectors*	*Types of therapeutic genome modifications - Homology directed repair - HDR gene addition*	*General Considerations Gene Therapy of HIV Infection by Intracellular Immunization*
S-9	SLO-1	*Ethical problems in gene therapy*	*Target pathogens for antimicrobial gene therapy*	*Cis and trans-acting elements*	*Applications of Genome editing*	*Therapy of HIV Infection by Immunotherapy*
	SLO-2	*Social problems in gene therapy*	*Examples of clinical trials for infectious diseases*	*Hybrid vectors*	*Prospects and llimitations of Genome editing*	*Recent advances in gene therapy*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Analyze the genome structure, organization and function across life.*
CLR-2 :	*Analyze about the comparative genomics of organelles and nuclear genomes across life*
CLR-3 :	*Apply different classical methods to study gene expression and whole transcriptome*
CLR-4:	*Compare various NGS techniques to study genome, exome, and transcriptomes.*
CLR-5:	*Infer the basics of metabolic pathways, transcription factors and genome editing.*
CLR-6:	*Analyze the applications of functional genomics in various sectors.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Describe the basics of genome organization across life and study of gene function*	1	75	80	M	H	H	H	H				H			H	H	H	H
CLO-2 :	*Describe the genomics of organelle and nuclear genomes across life*	1	75	80	M	H	H	H	H				H			H	H	H	H
CLO-3 :	*Review the organization of transcriptome and classical methods to study gene expression*	2	70	80	M	H	H	H	H				H			H	H	H	H
CLO-4 :	*Describe about traditional and Next Generation Sequencing (NGS)platforms for the study of genome, exome and transcriptome*	2	60	75	H	H	H	H	H			H	H		H	H	H	H	H
CLO-5 :	*Describe about genes for metabolic pathways, transcription factors, genome editing.*	3	70	80	M	H	H	H	H			H	H			H	H	H	H
CLO-6 :	*Summarize the applications of functional genomics in various sectors.*	3	60	80	M	H	H	H	H		H	H	H		H	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Genome organization in Eukaryotes*	*Genome size, gene content*	*Transcriptome from Eukaryotes*	*DNA Sequencing*	*Study of Gene functions*
	SLO-2	*Structural level organization*	*Gene order*	*Transcriptome from prokaryotes*	*Sanger method of DNA Sequencing*	*Metabolic pathways-KEGG*
S-2	SLO-1	*Genome organization in Eukaryotes*	*Orthologs*	*Gene expression studies with mRNA*	*Automated DNA Sequencing*	*Transcription factors*
	SLO-2	*Sequence level organization*	*Paralogs*	*Gene expression studies with other RNAs*	*Next Generation Sequencing (NGS)*	*Signaling cascades controlled by Transcription factors*
S-3	SLO-1	*Genome organization in Prokaryotes*	*Comparative genomics*	*Classical methods to study gene expression*	*Principle and methodology of NGS Platforms*	*Genome editing*
	SLO-2	*Sequence level organization*	*Comparative genomics of bacteria*	*Northern hybridization*	*Principle and methodology of NGS Platforms*	*Targeted genome Editing*
S-4	SLO-1	*Genetic elements and their organization in Eukaryotes*	*Pangenome-metagenomics*	*Differential Display PCR*	*Third Generation Sequencing methods*	*Tools for genome editing*
	SLO-2	*Genetic elements and regulation of gene expression in eukaryotes*	*Microbiome*	*Serial Analysis of Gene Expression (SAGE)*	*Comparison of high-throughput sequencing methods and applications*	*CRISPR/cas9 genome editing*
S-5	SLO-1	*Genetic elements and their organization in prokaryotes*	*Horizontal gene transfer*	*Reverse transcriptase PCR (RT-PCR) to study gene expression*	*Genome sequencing*	*Genetic variations and diseases*
	SLO-2	*Genetic elements and regulation on gene expression in Prokaryotes*	*Organelle genomes*	*Methodology of RT-PCR*	*Genome assembly*	*Tools to study mendelian diseases*
S-6	SLO-1	*Forward genetics*	*Methods to study organelle genomes*	*Quantitative PCR (real time) to study gene expression*	*Gene Prediction*	*Genomics of monogenic disorders*
	SLO-2	*Classical Forward genetics*	*Comparative genomics of mitochondrial genomes*	*Methodology of realtime-PCR*	*High-throughput RNA sequencing*	*Genomics of polygenic disorders*
S-7	SLO-1	*Functional genomic analysis with Forward genetics*	*Comparative genomics of plastid genomes*	*High-throughput methods to study gene expression*	*RNA sequencing to study genome wide gene expression*	*Genomics in Diagnostics*
	SLO-2	*Methods in Forward genetics*	*Nuclear genomes*	*Study of Gene expression using Microarray*	*Differential gene expression analysis with RNAseq*	*Population genetics*

S-8	SLO-1	*Reverse Genetics*	*Comparative genomics of nuclear genomes*	*Principle of Microarray*	*Small RNA sequencing*	*Evolutionary genetics*
	SLO-2	*Functional genomic analysis with reverse genetics*	*Plant genomes*	*Methodology of Microarray*	*Targeted sequencing*	*Applications of functional genomics in agriculture*
S-9	SLO-1	*Classical Methods in Reverse genetics*	*Animal genomes*	*Study of splice variants*	*Exome sequencing*	*Applications of functional genomics in healthcare*
	SLO-2	*Current methods in Forward and reverse genetics*	*Comparison of plant and animal genomes*	*Correlation of mRNA and protein abundance*	*Amplicon sequencing*	*Applications of functional genomics in prokaryotes*

Course Code	18BTE428T	Course Name	PLANT INTERACTIONS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18BTC108J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Biotechnology	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Relate the signaling mechanisms in the development of a plant's root, shoot, leaf and flower*
CLR-2 :	*Discuss the response of plants to physical stimuli and day-night cycle (circadian rhythm)*
CLR-3 :	*Explain the mechanisms in plant-microbe interaction, biotic and abiotic stresses*
CLR-4:	*Discuss about hyperaccumulators, heavy metal tolerance and phytoremediation*
CLR-5:	*Relate the role of phytochemicals in plants behavior and in facilitating plants growth*
CLR-6:	*Recognize the efforts taken by sessile plants for their survival and avoidance of stress.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)
CLO-1 :	*Describe the perception and responses of plants to environmental stimuli and stress cues*	*2*	*85*	*80*
CLO-2 :	*Design transgenic plants (GMOs) for biotic and abiotic stress tolerance*	*3*	*85*	*80*
CLO-3 :	*Exploit light response plasticity for improved productivity*	*3*	*80*	*75*
CLO-4 :	*Demonstrate how plants compete with themselves and other plants for nutrients and sunlight*	*2*	*75*	*70*
CLO-5 :	*Examine the benefits of intercropping and crop rotation*	*2*	*80*	*75*
CLO-6 :	*Recall what a plant does in the course of its lifetime for better growth and productivity*	*3*	*80*	*75*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Development biology of plants-an overview*	*Plant response to physical and light stimuli-an overview*	*Plant-microbe interaction-an overview*	*Plant adaptation to abiotic stresses-An overview*	*Plant-plant interactions*
	SLO-2	*Signal transduction using G proteins Calcium, MAPK*	*Response to gravity-gravitropism*	*Plant growth promoting rhizobacterium*	*Physiological and molecular response of plant to drought*	*Plant plasticity*
S-2	SLO-1	*One-component sensor regulatory system*	*Response to touch-thigmotropism*	*Root exudates*	*Physiological response to salinity*	*Allelopathy, secondary metabolites*
	SLO-2	*Two-component sensor regulatory system*	*Thigmotropism in shoots*	*Types of root exudates*	*Molecular mechanisms in salt tolerance*	*Volatiles*
S-3	SLO-1	*Stages of embryogenesis*	*Plant herbivory*	*Microbial secretions*	*Physiological response to cold*	*Plant's competitive behavior*
	SLO-2	*Genes in embryogenesis*	*Chemical and mechanical defenses*	*Microbe secreted plant hormones*	*Molecular mechanisms in cold tolerance*	*Behaviour based on memory*
S-4	SLO-1	*Plant growth hormones-auxin, cytokinin and gibberellin*	*Response to light-Phototropism*	*Quorum sensing*	*Physiological response to water logging*	*Co-operative behavior*
	SLO-2	*Ethylene and abscisic acid*	*Five models of auxin distribution in phototropism*	*Plant-microbe interaction*	*Molecular response to water logging*	*Facilitative behaviour*
S-5	SLO-1	*Anatomy of shoot apical meristem*	*Phytochromes-structure*	*Biofilm formation of PGPR*	*Physiological response to heat*	*Below ground competition*
	SLO-2	*Genes in the development of shoot apical meristem*	*Function of phytochromes*	*Biofilm visualization-confocal imaging*	*Molecular response to heat tolerance*	*Kith and Kin recognition*
S-6	SLO-1	*Structure of root apical meristem*	*Cryptochromes-structure*	*Phytopathogens*	*Physiological response to heavy metals*	*Alien recognition*
	SLO-2	*Genes in the development of root apical meristem*	*Function of cryptochromes*	*Phytopathoges of rice, wheat, tomato, onion, spinach*	*Genes involved in heavy metal accumulation, tolerance and resistance*	*Siblings recognition*
S-7	SLO-1	*Parts of a monoecious and dioecious flower*	*Circadian clock*	*Plant immunity*	*Hyperaccumulators*	*Shoot competition*
	SLO-2	*ABC model for flowering-florigenesis*	*Molecular mechanisms of light perception*	*Physical barriers*	*Phytoremediation*	*Root competition*
S-8	SLO-1	*Natural fertilization*	*TOC1, LHY and CCA genes*	*Systemic acquired resistance (SAR)*	*Phenotypic plasticity*	*Shade avoidance*
	SLO-2	*Artificial fertilization-apomixis and parthenocarpy*	*Model of circadian clock in Arabidopsis*	*Hormones in SAR*	*Root plasticity*	*Effect of phytochromes*

S-9	SLO-1	*Hormones in seed dormancy*	*Short day plants*	*Induced systemic resistance (ISR)*	*Soil physical constraints*	*Neighbor signaling as a warning to biotic stresses*
	SLO-2	*Hormones in seed germination*	*Long day plants*	*Hormones in ISR*	*Plant growth in non-conducive soil*	*Neighbor signaling as a warning to abiotic stresses*

ACADEMIC CURRICULA

Professional Elective Courses

CHEMICAL ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18CHE351T	Course Name	RENEWABLE ENERGY ENGINEERING	Course Category	E	Professional Electives	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the importance, availability of renewable energy*
CLR-2 :	*Familiarize various aspects of wind energy*
CLR-3 :	*Familiarize various aspects of equipment's used to collect solar energy and various applications of solar energy*
CLR-4 :	*Familiarize various aspects of Biomass energy and utilization*
CLR-5 :	*Other renewable energy resources and hydrogen energy, storage , transmission, fuel cell*
CLR-6 :	*Expose to alternate energy*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*India's energy demand and supply,management*	*Availability of wind*	*Introduction on sun energy*	*Biomass, Biomass resources*	*Tidal energy*
	SLO-2	*Energy planning*	*Special features of wind energy*	*Solar angles*	*Composition, fuel properties*	*Tidal energy conversion*
S-2	SLO-1	*Energy needs for the future*	*Types of wind mills*	*Solar collectors*	*Biomass conversion technologies*	*Wave energy*
	SLO-2	*Regional prospects and stresses*	*The power from the wind*	*Types of collectors*	*Anaerobic digestion*	*Wave energy operation, applications*
S-3	SLO-1	*Status of global resources*	*Performance of wind mills*	*Flat plate and dish type*	*Direction combustion*	*OTEC*
	SLO-2	*India's renewable resources*	*Modern wind energy generators*	*Types of flat and dish types*	*Pyrolysis*	*Open and closed OTEC Cycles*
S-4	SLO-1	*Energy resources of India ,economic development,*	*Horizontal wind mills*	*Solar concentrators*	*Gasification*	*Geothermal energy*
	SLO-2	*Energy cropping*	*Vertical wind mills*	*Types of concentrators*	*Biogas technology,*	*Geothermal energy conversion*
S-5	SLO-1	*Energy conversion*	*Wind turbines*	*Solar pumping*	*Bioethanol*	*Energy operation, applications*
	SLO-2	*Energy storage*	*Design parameters*	*Problems in collectors*	*Biodiesel Production*	*Energy conversion*
S-6	SLO-1	*Advantages and Disadvantages of Non-Conventional source of energy*	*Design principles of wind turbine*	*Solar refrigeration*	*Community and institutional biogas plants*	*Hydro conversion*
	SLO-2	*Renewable energy resources*	*Horizontal and vertical axis types*	*Solar air cooling, Solar furnaces*	*Family biogas plants*	*Small hydro energy conversion*
S-7	SLO-1	*Potentials of recourses*	*Problems in wind mills*	*Solar power generation*	*Recent Developments in biomass technology*	*Fuel cell*
	SLO-2	*Achievements and applications*	*Problems in wind mills*	*Solar drying, stills and cooking*	*Energy farming*	*Fuel cell technology*
S-8	SLO-1	*Classification of Energy*	*Problems in wind mills*	*Photo voltaic cell principle*	*design consideration*	*Hydrogen energy production ,storage*
	SLO-2	*Classification of Energy resources,*	*Problems in wind mills*	*Photo voltaic cell types*	*Problems in digesters*	*Transmission, distribution*
S-9	SLO-1	*Conservation of energy*	*Wind power farms*	*Photo voltaic cell design*	*Problems in digesters*	*Fuel cell application*
	SLO-2	*Conservation techniques*	*Modern wind farms*	*Photo voltaic cell advancement*	*Applications of reactors*	*Fuel cell types*

Course Code	18CHE352T	Course Name	INTRODUCTION TO BIOCHEMICAL PRINCIPLES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Expose to the importance of biochemical process and products*
CLR-2 :	*Study the different fermentation media*
CLR-3 :	*Teach the principle of sterilization and growth kinetics methods*
CLR-4 :	*Study the stoichiometry and yield coefficient cell growth and product formation*
CLR-5 :	*understand the primary and secondary metabolites production process*
CLR-6 :	*study process flow for manufacture of biochemical products*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO –3
CLO-1 :	*Identify industrial importance microorganism and storage methods in fermentation process*	3	80	75	L	L	L	M			L					M	H	L	L
CLO-2 :	*Student able to select and prepare good media for bio product production process*	3	90	85	L	L	L	M			M					L	H	L	L
CLO-3 :	*Learn the Sterilization methods and determine specific growth rate and monod equation calculation*	2	85	80	H	H	L	M			M					L	H	H	L
CLO-4 :	*Be able to solve elemental balances and product yield in biochemical reaction*	4	80	75	H	H	L	M			M					L	L	H	L
CLO-5 :	*Familiarize to draw flow diagrams of primary and secondary metabolites production processes*	2	90	85	H	L	H	M			L					L	M	M	H
CLO-6 :	*Analyze the design and unit operation involved in the biochemical process*	3	85	80	H	L	H	M			L					L	M	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of biochemical engineering*	*Selection of good medium*	*Sterilization and function*	*Stoichiometry of microbial growth*	*Industrial fermentation process*
	SLO-2	*Classification of biochemical products*	*Medium requirements for fermentation processes*	*Types of Sterilization*	*General biochemical equation*	*Define primary metabolites*
S-2	SLO-1	*History of industrial microbiology*	*Energy source in fermentation media*	*Physical method: heat sterilization*	*Define Degrees of reduction*	*Production of primary metabolites*
	SLO-2	*Comparison of chemical and biochemical Processes*	*Components of fermentation media*	*Heat sterilization: pasteurization methods*	*Solving problem (degrees of reduction)*	*Selection of media and microbes for citric acid production*
S-3	SLO-1	*Block diagram of fermentation process*	*Classification of carbon source*	*Heat sterilization: Autoclave methods*	*Define respirator co efficient*	*Process flow diagram for citric acid production*
	SLO-2	*Upstream fermentation process*	*Carbohydrates: starch and cellulose source*	*Physical method: radiation sterilization*	*Solving problem (Respirator co-efficient)*	*Preparation of media and microbes for acetic acid production*
S-4	SLO-1	*Downstream fermentation process*	*Oil and fats source*	*Chemical method: liquid sterilization*	*Solving problem (Elemental balance)*	*Process flow diagram for acetic acid production*
	SLO-2	*Classification of Microorganisms*	*Nitrogen source and function*	*Chemical method: gas sterilization*	*Solving problem (Elemental balance)*	*Upstream process for amino acid production*
S-5	SLO-1	*Structure and function of microbial cells*	*Minerals source and function*	*Mechanical method: filtrations sterilization*	*Determination yield coefficient of substrate*	*Downstream process for amino acid production*
	SLO-2	*Isolation of micro- organisms-serial dilution method*	*Additives in media preparation*	*Factors affecting sterilization process*	*Solving problem (Yield coefficient of substrate)*	*Selection of media and microbes for ethanol production*
S-6	SLO-1	*Streak plate method*	*Growth factors and additives in media preparation*	*Batch sterilization*	*Determination yield coefficient of biomass*	*Process flow diagram for ethanol production*
	SLO-2	*Preservation of pure culture-storage at reduced temperature*	*Water and its function in media preparation*	*Thermal death kinetics of micro organisms*	*Solving problem (Yield coefficient of biomass)*	*Media preparation and selection of microbes for aceto butanol production*
S-7	SLO-1	*Storage in a dehydrated form*	*Designing of media for fermentation processes*	*Continuous sterilization: Indirect heating method*	*Determination yield coefficient of product*	*Process flow diagram for aceto butanol production*
	SLO-2	*Types of fermentation processes batch fermentation*	*Types of media*	*Continuous sterilization: direct heating method*	*Solving problem (Yield coefficient of products)*	*Define Secondary metabolites*
S-8	SLO-1	*Continuous fermentation*	*Simple and complex media*	*Phases of cell growth in batch cultures*	*Solving problem (Yield coefficient of products)*	*Preparation of media and microbes for Penicillin production*

	SLO-2	*Fed batch fermentation*	*Crude and natural media*	*Growth curve and doubling time calculation*	*Solving problem (Stoichiometric coefficient)*	*Process flow diagram for Penicillin production*
S-9	SLO-1	*Comparison of various fermentation processes*	*Different commercial media and function*	*Monod growth kinetic model*	*Solving problem (Stoichiometric coefficient)*	*Selection of media and microbes for vitamin production*
	SLO-2	*Applications of Biochemical Processes*	*Selection of good antifoaming agent*	*Solving problem (growth rate and monod constant)*	*Solving problem (Stoichiometric coefficient)*	*Process flow diagram for vitamin production*

Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand energy challenges and principles involved in energy engineering*
CLR-2 :	*Familiarize with energy conversion technologies*
CLR-3 :	*Acquire knowledge of nuclear energy, its potential in energy generation and challenges*
CLR-4 :	*Familiarize with energy storage and distribution technologies*
CLR-5 :	*Get exposure to energy conservation methods and awareness of developing technologies*
CLR-6 :	*Exposure to various energy resources, energy conversion and energy storage/distribution technologies*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO –3
CLO-1 :	*Define the importance of energy science and energy technology and their principles*	1	80	75	H	L	L	L		H	H					H	H	L	L
CLO-2 :	*Analyse the various types of energy conversion technologies and powerplants*	2	80	70	H	L	H	M	H	H	M					H	H	L	L
CLO-3 :	*Remember the benefits of nuclear energy and their potential in energy generation*	1	80	75	H	L	H	M	M		H					H	H	H	H
CLO-4 :	*Identify the various the various energy storage and distribution technologies*	2	80	75	M	L	H	M			M					L	H	H	M
CLO-5 :	*Discover the types of energy conservation technologies*	2	80	75	M	M	H	M			H					H	H	M	H
CLO-6 :	*Familiar with the technologies of energy*	2	80	75	H	L	M	M			M					L	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Energy Overview*	*Types of energy conversion plants for various primary energy sources*	*Basics of nuclear fission*	*Energy storage systems*	*Principles of energy conservation*
	SLO-2	*A brief history of energy technology*	*Electrical route and Non-electrical route*	*Basics of nuclear fusion*	*Mechanical energy storage*	*Energy conservation approach*
S-2	SLO-1	*Forms of energy*	*Thermal power plant*	*Concept of binding energy*	*Pumped Hydroelectric Storage*	*Co-generation*
	SLO-2	*Types of energy*	*Coal fire thermal power plant*	*Nuclear fission reactors*	*Compressed Air storage*	*Types of Co-generation*
S-3	SLO-1	*Energy Chains*	*Gas-turbine power plants*	*Components of nuclear reactor*	*Energy storage via Flywheels*	*Waste heat utilization*
	SLO-2	*Energy demand*	*Components of Gas-turbine*	*Types of fission reactor*	*Electrical storage*	*Heat recovery boiler*
S-4	SLO-1	*Supply network*	*Open cycle Gas turbine power plant*	*Pressurized water reactor*	*The lead acid battery*	*Heat Recuperators*
	SLO-2	*Energy Resources*	*Closed cycle Gas-turbine Power plant*	*Benefits of nuclear energy*	*Basic battery theory*	*Classification of heat exchangers*
S-5	SLO-1	*Conventional energy resources*	*Gasification types*	*Nuclear fusion principle*	*Chemical storage*	*Heat Regenerators*
	SLO-2	*Non – Conventional energy resources*	*Integrated Coal Gasification combined cycle power plant*	*D-T fusion reactor*	*Energy storage via hydrogen*	*The Thermal wheel*
S-6	SLO-1	*Renewable Energy resources*	*Principles of MHD power*	*Requirements for nuclear fusion*	*Electro Magnetic Energy storage*	*Heat pumps Operating principles*
	SLO-2	*Non Renewable Energy resources*	*Open Cycle MHD Technologies*	*Ignition temperature, Driven systems and Energy break even condition*	*Thermal Energy storage*	*Applications of Heat pumps*
S-7	SLO-1	*Energy and environment*	*Closed Cycle MHD Technologies*	*Plasma Confinement*	*Sensible Heat storage*	*Heat pipe principle*
	SLO-2	*Climate change*	*Seeded inert gas system*	*Magnetic confinement*	*Latent Heat storage*	*Classification of Heat pipes*
S-8	SLO-1	*Global warming*	*Liquid metal system*	*Thermo Nuclear Function reactors*	*Materials for phase change energy storage*	*Applications of Heat pipes*
	SLO-2	*Effects of green house gases*	*Materials for MHD*	*Tokamak reactor*	*Distribution of energy*	*Stirling Engine*
S-9	SLO-1	*Carbon credit*	*Applications of MHD*	*Methods of plasma heating*	*Gas pipelines*	*General principles of Stirling Engine*
	SLO-2	*Applications of carbon credit*	*Advantages & Disadvantages of MHD*	*Inertial Confinement Fusion*	*Electricity transmission*	*Main components of the Stirling Engine*

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*To familiarize the polymers, polymerization techniques and behavior in polymers*
CLR-2 :	*To familiarize the various types of thermoplastics, thermosetting and elastomers*
CLR-3 :	*To familiarize the various polymer processing techniques for polymers, rubbers and fibers*
CLR-4 :	*To impart knowledge on various testing methods and characterization of polymers*
CLR-5 :	*To impart knowledge on speciality polymers*
CLR-6 :	*Exposure on polymeric materials, processing techniques and testing methods*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO –3
CLO-1 :	*Memorize the basics of polymer science, polymerization and properties*	2	85	75	L	L	L	L								M	H	H	H
CLO-2 :	*Identify various types of thermoplastics, thermosetting and elastomers*	2	80	70	L	L	H	L								M	H	H	L
CLO-3 :	*Recognize the processing methods and techniques of polymers, resins and rubbers*	2	85	80	M	L	H	H								M	H	H	L
CLO-4 :	*Illustrate the various testing methods and characterization of polymers*	3	85	75	H	M	H	H								M	H	M	H
CLO-5 :	*Identify the importance of speciality polymers*	2	80	70	L	L	H	H								L	H	H	M
CLO-6 :	*Know the importance of polymers and their properties, preparation methods, testing and applications*	3	80	75	M	M	M	H								H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Degree of polymerization*	*Thermoplastic Polymers*	*Processing of Thermoplastics and Thermosetting Plastics*	*Polymer Characterization Tests - Melt Flow Index*	*Speciality polymers*
	SLO-2	*Classification of Polymers*	*Commodity plastics -Polyolefins and vinyl polymers*	*Compounding and processing aids*	*Viscosity Test*	*Poly-Electrolytes*
S-2	SLO-1	*Chemistry of Polymerization –Addition Polymerization*	*Acrylic polymers*	*Compression Moulding*	*Thermal Characterization Techniques*	*Ionomers*
	SLO-2	*Free radical polymerization*	*Polystyrene*	*Injection Moulding*	*Thermal Gravimetric Analysis*	*Conducting Polymers*
S-3	SLO-1	*Ionic polymerization*	*Engineering plastics*	*Extrusion Moulding*	*Differential Scanning Calorimetry*	*Electro-Luminescent Polymers*
	SLO-2	*Condensation polymerization*	*Fluorine containing polymers*	*Blow Moulding*	*Thermo mechanical Analysis*	*Electrically conductive Polymers*
S-4	SLO-1	*Coordination polymerization*	*Polyamides*	*Rotational Moulding*	*Morphological properties*	*Thermoplastic Elastomers*
	SLO-2	*Molecular weight*	*Polyesters*	*Transfer Moulding*	*Transmission Emission Microscopy*	*TPEs*
S-5	SLO-1	*Crystallinity in polymers*	*Thermosetting resins*	*Processing of Rubbers –Mastication –Calendaring*	*Transmission Emission Microscopy*	*High Temperature Polymers*
	SLO-2	*Crystallisability and factors*	*Phenolic resins*	*Reaction Injection Moulding*	*X-ray Diffraction*	*Polymer Blends*
S-6	SLO-1	*Spherulites*	*Epoxy resins*	*Solution Casting*	*Mechanical Properties*	*Polymer Composites*
	SLO-2	*Polymer single crystals*	*Polyurethane resins*	*Reinforcing : Hand lay-up technique*	*Tensile Test*	*Nano-Composites*
S-7	SLO-1	*Glass Transition Temperature(Tg)*	*Silicone resins*	*Filament – winding technique*	*Impact Test*	*Interpenetrating Polymer Networks*
	SLO-2	*Factors influencing Glass Transition Temperature*	*Natural rubber – Isoprene rubber*	*Spray up technique*	*Hardness*	*Types of IPNS*
S-8	SLO-1	*Polymerization Techniques – Bulk polymerization*	*Butyl rubber*	*Fibre Spinning*	*Electrical properties – Di-Electric strength*	*Liquid Crystalline Polymers*
	SLO-2	*Solution polymerisation*	*Styrene Butadiene Rubber*	*Fibre drawing and post treatment of fibers*	*Di-Electric Constant*	*Types of LCPs*
S-9	SLO-1	*Suspension polymerisation*	*Chloroprene rubber*	*Elastomer Technology*	*Thermal Properties-Heat deflection temperature*	*Biomedical Polymers*
	SLO-2	*Emulsion polymerisation*	*Nitrile rubber*	*Vulcanization*	*Vicat Softening temperature*	*Applications in medical field*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to the course*	*Catalysis and Green Chemistry*	*Process and operations*	*Case studies*	*Introduction to the economics of green and sustainable chemistry*
	SLO-2	*Green Chemistry-Definition*	*Catalysis and Green Chemistry*	*Industry perception*	*The Kalundborg Model*	*Chemical Manufacturing and Economic Theory*
S-2	SLO-1	*Principles of Green Chemistry and Examples*	*Examples of green catalysis in industrially significant reactions*	*Reactions*	*Ibuprofen: A Green Manufacturing Alternative*	*Plant (Microscale) Scale Economics*
	SLO-2	*Principles of Green Chemistry and Examples*	*Biocatalysis and Green Chemistry*	*Reactor design*	*Supercritical Carbon Dioxide*	*Corporate Economics*
S-3	SLO-1	*Use of Greener Synthetic Pathways*	*Biocatalysis: Advantages Within Industrial Applications*	*Micro-reactors and micromixers*	*The Pharmaceutical Industries and Green Chemistry*	*Macroeconomics*
	SLO-2	*Use of Greener Synthetic Pathways*	*Biocatalysis: Challenges to Make Biocatalysis Industrially Viable*	*Novel processes and routes*	*Sildenafil Citrate*	*Economic Impact of Green Chemistry*
S-4	SLO-1	*Use of Greener Synthetic Pathways*	*Homogenous Biocatalysis in Water-Organic Solvent Mixtures and in Organic Solvents*	*Unit operations*	*Sertraline Manufacture*	*Business Strategies Regarding Application of Green Chemistry*
	SLO-2	*Use of Greener Reaction Conditions*	*Homogenous Biocatalysis in Water-Organic Solvent Mixtures and in Organic Solvents*	*Unit operations*	*The Polymer Industry*	*Incorporation of Green Chemistry in Process*
S-5	SLO-1	*Use of Greener Reaction Conditions*	*Uses of biocatalysts*	*Heat exchangers*	*Pesticides, Antifoulants, and Herbicides*	*Design for Sustainability*
	SLO-2	*Design of Greener Chemicals*	*Uses of biocatalysts*	*Heat exchangers*	*Fire Extinguishers and Flame Retardants*	*Case Studies Demonstrating the Economic Benefits of Green Chemistry and Design*
S-6	SLO-1	*Design of Greener Chemicals*	*Alternate solvents*	*Distillation columns*	*The food and flavor industry*	*Inherent safety; Safe reactor design*
	SLO-2	*Green Engineering - Definition*	*Alternate solvents*	*Absorption towers*	*The surfactant industry*	*Safety management and hazard identification*
S-7	SLO-1	*Principles of Green Engineering*	*Safer/green solvents*	*Bubble columns*	*The semiconductor manufacture industry*	*Issues related to transportation and atmospheric losses*
	SLO-2	*Principles of Green Engineering*	*Water as solvent*	*Membrane processes*	*The dye industry*	*The purification step and associated hazards*
S-8	SLO-1	*Principles of Green Engineering*	*Solvent-free conditions*	*Liquid-liquid centrifuges*	*The textile industry*	*Process variables - Reaction temperature, pressure, concentration, pH*
	SLO-2	*Principles of Green Engineering*	*Ionic liquids*	*Extraction columns*	*The tannery industry*	*Effects of operating costs on safety*
S-9	SLO-1	*Sustainability*	*Supercritical CO_2*	*Reactions with separation processes*	*The sugar and distillery industries*	*Waste and effluent, dust/particle handling*
	SLO-2	*Sustainability*	*Supercritical water*	*Reactions with separation processes*	*The paper and pulp industry*	*Safety and risk assessment*

Learning Resources	1. *Mukesh Doble and Anil Kumar Kruthiventi, "Green Chemistry and Engineering", Elsevier Science and Technology Books, 2007.* 2. *Anne E. Marteel-Parrish and Martin A. Abraham, "Green Chemistry and Engineering - A pathway to sustainability", John Wiley & Sons, 2014.*	3. *Cost of inherent safety and profit-risk model*

Course Code	18CHE356T	Course Name	INDUSTRIAL POLLUTION PREVENTION AND CONTROL	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*know about the industrial activities and fates of industrial contaminants*
CLR-2 :	*know about the environmental regulations*
CLR-3 :	*know about the solid waste and disposal methods*
CLR-4 :	*know about the principles of water treatment*
CLR-5 :	*know about the air pollution control methods*
CLR-6:	*know about the sources and treatment options for environmental issues*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (loom)	Expected Proficiency %)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO –3
CLO-1 :	*Identify the major industries that creates pollutants and how it affects the environment*	*1*	*85*	*75*		*L*		*L*		*H*	*H*		*M*			*H*	*H*	*L*	*L*
CLO-2 :	*Implement the rules and regulations in specific industries*	*1*	*75*	*70*		*H*		*H*	*L*		*H*	*M*	*M*				*H*	*L*	*L*
CLO-3 :	*Identify the solid waste produced and implement the disposal methods*	*1*	*85*	*75*	*M*	*M*	*H*	*M*			*L*					*H*	*M*	*H*	*H*
CLO-4 :	*Identify different water treatment methods used in industry and able to implement the methods wherever necessary*	*1*	*85*	*75*	*H*	*H*	*M*	*M*			*M*	*M*	*L*			*H*	*M*	*H*	*H*
CLO-5 :	*Identify the sources of air pollution and able to control the air pollution*	*1*	*85*	*75*	*H*	*H*	*M*	*M*			*M*	*M*	*L*			*H*	*M*	*H*	*H*
CLO-6 :	*Identify the pollution nature and able to bring the solution*	*1*	*75*	*70*	*H*	*H*	*M*	*M*			*M*	*M*	*L*			*H*	*M*	*H*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction*	*Environmental regulations prevention vs control of industrial pollution.*	*Solid waste and disposal methods sources and types of solid waste*	*Principles of water treatment primary, secondary and tertiary treatments*	*Air pollution control methods introduction to particulate emission control*
	SLO-2	*Introduction*	*Prevention vs control of industrial pollution*	*Sources and types of solid waste*	*Principles of water treatment secondary treatments*	*Gravitational settling chambers-cyclone separators, fabric filters*
S-2	SLO-1	*Industrial activity and environment*	*Prevention vs control of industrial pollution*	*Processing methods, disposal- principle, practices and methods*	*Principles of water treatment secondary treatments*	*Gravitational settling chambers-cyclone separators, fabric filters*
	SLO-2	*Industrial activity and environment*	*Prevention vs control of industrial pollution*	*Processing methods, disposal- principle, practices and methods*	*Principles of water treatment secondary treatments*	*Electrostatic precipitators, wet scrubbers, absorbers control.*
S-3	SLO-1	*Industrial activity and environment*	*Prevention vs control of industrial pollution*	*Processing methods, disposal- principle, practices and methods*	*Principles of water treatment tertiary treatments*	*Control of oxides of nitrogen*
	SLO-2	*Industrial activity and environment*	*Prevention vs control of industrial pollution*	*Processing methods, disposal- principle, practices and methods*	*Principles of water treatment tertiary treatments*	*Control of oxides of nitrogen*
S-4	SLO-1	*Fates of industrial contaminants*	*Environment policies and regulations to encourage pollution prevention*	*Energy from solid waste, waste management hierarchy*	*Principles of water treatment tertiary treatments*	*Control of oxides of nitrogen*
	SLO-2	*Fates of industrial contaminants*	*Environment policies and regulations to encourage pollution prevention*	*Energy from solid waste, waste management hierarchy*	*Principles of water treatment tertiary treatments*	*Control of oxides of nitrogen*
S-5	SLO-1	*Case studies on industrial contaminants*	*Environment policies and regulations to encourage pollution prevention*	*Energy from solid waste, waste management hierarchy*	*Advanced waste water treatments*	*Control of sulphur dioxide*
	SLO-2	*Case studies on industrial contaminants*	*Environment policies and regulations to encourage pollution prevention*	*Energy from solid waste, waste management hierarchy*	*Advanced waste water treatments*	*Control of sulphur dioxide*
S-6	SLO-1	*Industrialization and sustainable development*	*Environment friendly chemical processes*	*Energy from solid waste, waste management hierarchy*	*Advanced waste water treatments*	*Control of sulphur dioxide*
	SLO-2	*Industrialization and sustainable development*	*Environment friendly chemical processes*	*Energy from solid waste, waste management hierarchy*	*Advanced waste water treatments*	*Control of sulphur dioxide*

S-7	SLO-1	*Sustainability strategies*	*Environment friendly chemical processes*	*Energy from solid waste, waste management hierarchy*	*Advanced waste water treatments*	*Control of carbon monoxide and hydrocarbons*
	SLO-2	*Sustainability strategies*	*Environment friendly chemical processes*	*Energy from solid waste, waste management hierarchy*	*Advanced waste water treatments*	*Control of carbon monoxide and hydrocarbons*
S-8	SLO-1	*Barriers to sustainability*	*Regulations for clean environment and implication for industries*	*Hazardous waste, biomedical waste, and nuclear waste.*	*Recovery of metals from process effluents*	*Noise pollution measurements and its control*
	SLO-2	*Barriers to sustainability*	*Regulations for clean environment and implication for industries*	*Hazardous waste, Biomedical waste, and Nuclear waste.*	*Recovery of metals from process effluents*	*Noise pollution measurements and its control*
S-9	SLO-1	*Pollution prevention in achieving sustainability*	*Regulations for clean environment and implication for industries*	*Hazardous waste, Biomedical waste, and Nuclear waste.*	*Recovery of metals from process effluents*	*Noise pollution measurements and its control*
	SLO-2	*Pollution prevention in achieving sustainability*	*Regulations for clean environment and implication for industries*	*Hazardous waste, Biomedical waste, and Nuclear waste.*	*Recovery of metals from process effluents*	*Noise pollution measurements and its control*

Course Code	18CHE357T	Course Name	ENZYME ENGINEERING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the mechanism of enzyme action and learn about the different classes of enzymes*
CLR-2 :	*Understand the kinetics of enzyme action and identify the types of inhibition*
CLR-3 :	*Understand the need for enzyme immobilization and learn the different methods of immobilization*
CLR-4 :	*Analyze the effect of various physicochemical factors on enzyme activity*
CLR-5 :	*Understand the various applications of enzymes*
CLR-6 :	*Appreciate the various mechanisms of enzyme action and its industrial applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (loom)	Expected Proficiency %)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO –3
CLO- 1 :	*Comprehend the basic concepts about enzymes, mechanism of enzyme action, and the classification of enzymes*	*2*	*85*	*80*	*L*	*L*	*M*				*M*		*L*				*M*		
CLO-2 :	*Identify and estimate the kinetic parameters and type of inhibition using various kinetic plots*	*3*	*80*	*75*	*M*	*M*	*M*	*M*									*M*		
CLO-4 :	*Choose the immobilization technique based on the requirements of the process*	*3*	*80*	*75*	*M*	*M*	*M*	*M*			*M*		*M*				*M*		
CLO-4 :	*Identify the circumstances of enzyme deactivation and select the reaction conditions wisely*	*3*	*80*	*75*	*M*	*M*	*M*	*M*	*L*		*M*		*M*				*M*		
CLO-5:	*Discern the practical applications of enzymes*	*2*	*80*	*75*	*M*	*M*	*M*	*H*	*M*		*M*		*H*				*M*	*M*	*M*
CLO-6 :	*Apply the knowledge of enzymes for suitable industries*	*2*	*75*	*70*	*M*	*M*	*H*	*H*	*M*		*M*		*M*				*M*	*M*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	Action of enzymes	Kinetics of enzyme action	Enzyme immobilization technology	Deactivation enzyme kinetics	Application of enzyme in analysis
	SLO-2	Action of enzymes	Introduction to enzyme kinetics	Introduction to immobilization	Deactivation enzyme kinetics	Application of enzyme in analysis
S-2	SLO-1	Classification of enzymes	Kinetics of single substrate reactions	Types of immobilization	Mechanisms of reversible enzyme modulation	Enzyme electrode
	SLO-2	Classification of enzymes	Estimation of Michelis-Menten parameters	Adsorption	Mechanisms of reversible enzyme modulation	Enzyme electrode
S-3	SLO-1	Mechanisms of enzyme action	Kinetics plots	Matrix entrapment	The effect of pH on enzyme activity	Design of enzyme electrodes
	SLO-2	Mechanisms of enzyme action	Problems on M-M kinetics	Encapsulation	The effect of pH on enzyme activity	Design of enzyme electrodes
S-4	SLO-1	Concept of active site	Problems on M-M kinetics	Cross linking	The effect of temperature on enzyme activity	Applications of enzyme electrodes as biosensors in industry
	SLO-2	Concept of active site	Mechanisms of multi-substrate reactions	Covalent binding	The effect of temperature on enzyme activity	Applications of enzyme electrodes as biosensors in industry
S-5	SLO-1	Energetics of enzyme substrate complex formation	Inhibitors	Advantages and disadvantages of different immobilization techniques	Enzyme deactivation	Applications of hydrolytic enzymes
	SLO-2	Energetics of enzyme substrate complex formation	Types of inhibition mechanisms	Advantages and disadvantages of different immobilization techniques	Enzyme deactivation	Applications of hydrolytic enzymes
S-6	SLO-1	Specificity of enzyme action	Competitive inhibition	Immobilization enzyme kinetics	Mechanisms and manifestations of protein denaturation	Applications of hydrolytic enzymes
	SLO-2	Specificity of enzyme action	Uncompetitive inhibition	Immobilization enzyme kinetics	Mechanisms and manifestations of protein denaturation	Applications of hydrolytic enzymes
S-7	SLO-1	Principles of catalysis	Non-competitive inhibition	Effects of external mass-transfer resistance	Deactivation models and kinetics	Applications of non-hydrolytic enzymes
	SLO-2	Principles of catalysis	Comparison of different type of inhibition	Effects of external mass-transfer resistance	Deactivation models and kinetics	Applications of non-hydrolytic enzymes
S-8	SLO-1	Collision theory	Problems on enzyme inhibition	Analysis of intraparticle diffusion and reaction	Mechanical forces acting on enzymes	Applications of non-hydrolytic enzymes
	SLO-2	Collision theory	Problems on enzyme inhibition	Analysis of intraparticle diffusion and reaction	Strategies for enzyme stabilization	Applications of non-hydrolytic enzymes
S-9	SLO-1	Transition state theory	Problems on enzyme inhibition	Simultaneous film and intraparticle mass-transfer resistances	Problems on enzyme de-activation kinetics	Enzymes used in current and developing industry
	SLO-2	Transition state theory	Problems on enzyme inhibition	Simultaneous film and intraparticle mass-transfer resistances	Problems on enzyme de-activation kinetics	Enzymes used in current and developing industry

Course Code	18CHE358T	Course Name	FERTILIZER TECHNOLOGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the importance of fertilizers and growth potential of fertilizer Industries*
CLR-2 :	*Learn the various nitrogen fertilizers production processes*
CLR-3 :	*Familiarize the different phosphate fertilizers and its manufacturing processes*
CLR-4 :	*Understand the Importance of compound fertilizers and production processes*
CLR-5 :	*Learn the process flow diagram of miscellaneous fertilizers*
CLR-6 :	*Identify Biofertilizers*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO –3
CLO-1 :	*Identify the chronological development of fertilizer industry*	2	90	85	L	L	L	L			H		L			M	H	M	L
CLO-2 :	*Recognize the raw materials and processes for manufacture of nitrogenous fertilizers*	2	85	75	M	L	M	L			M		M			M	H	M	L
CLO-3 :	*Understand the block diagram of phosphate fertilizers*	2	85	80	M	L	M	L			M		M			M	M	H	L
CLO-4 :	*Review the flow diagrams of potassium and compound fertilizers*	2	90	80	M	L	L	L			M		M			M	H	H	L
CLO-5 :	*Classify the miscellaneous fertilizers and production process*	2	85	75	M	L	M	L			M		M			M	M	L	H
CLO-6 :	*Develop the application of Biofertilizers*	2	85	80	M	L	M	L			M		M			M	M	L	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of plant nutrients*	*Ammonia- -physical and chemical properties, applications*	*Importance of phosphate fertilizers*	*Overview of potash fertilizers*	*Biofertilizers*
	SLO-2	*Functions of nutrients*	*Feedstock's for Ammonia production*	*Phosphate fertilizers-various types*	*Types of potash fertilizers*	*Importance of Biofertilizers*
S-2	SLO-1	*Classification of soil nutrients-macro and micro nutrients*	*Ammonia production via steam reforming*	*Raw materials selection for Phosphate fertilizers*	*Physical, chemical properties and uses of Potassium Chloride,*	*Types of biofertilizers*
	SLO-2	*Fundamentals of soil nitrogen*	*Reactions involved, advantages and disadvantages*	*Preparation of raw materials - Phosphate Rock, Sulphur, Pyrites*	*Physical, chemical properties and uses of Potassium nitrate, Potassium sulphate*	*Benefits of Biofertilizers*
S-3	SLO-1	*Fundamentals of soil Phosphorus*	*Partial oxidation method for ammonia production*	*Sulphuric acid-Raw material including storage and handling*	*Selection of raw materials for manufacture of potassium chloride*	*Preparation of a Biofertilizers*
	SLO-2	*Fundamentals of soil potassium*	*Storage and Transportation of Ammonia*	*Processes for the production of sulphuric acid*	*Process flow diagram for potassium chloride production*	*Precautions to use Biofertilizers*
S-4	SLO-1	*Need of fertilizer*	*Nitric acid-chemical and physical properties, applications*	*Production processes of Phosphoric acid - Dihydrate processes*	*Production flow sheet for potassium nitrate*	*Fluid Fertilizers*
	SLO-2	*Fertilizer specifications*	*Manufacture of nitric acid Storage and transportation*	*Hemihydrate and recrystalliztion processes*	*Production flow sheet for potassium sulphate*	*Fluid Fertilizers*
S-5	SLO-1	*Classification of fertilizers*	*Production of Ammonium chloride*	*Single super phosphate-Agriculture use*	*Role of compound fertilizers*	*Controlled release fertilizers*
	SLO-2	*Classification of fertilizers*	*Physical and Chemical properties, application*	*Production process for SSP*	*Compound fertilizer production Technology*	*Types of Controlled release fertilizers*
S-6	SLO-1	*Requisite of fertikzers*	*Ammonium sulphate- method of manufacture*	*Selection of raw material & process condition for Triple super phosphate*	*Processes for manufacturing compound fertilizers*	*Environmental issues related to the use of fertilizers*
	SLO-2	*Fertilizer Terminology and defintions*	*Characteristics, specification, storage handling and applications*	*Process flow diagram for TSP*	*Processes for manufacturing compound fertilizers*	*Impact of fertilizer on the Environment*
S-7	SLO-1	*Organic manures versus synthetic fertilizers*	*Feedstock for urea production*	*Raw material and process condition for Ammonium phosphate synthesis*	*Importance of NPK fertilizers*	*Soil and air Pollution from fertilizer industry*
	SLO-2	*Role of organic manures*	*Urea production and storage*	*Manufacture of Ammonium phosphate*	*Process flow sheet for the manufacture of NPK fertilizer using mixed acid route*	*Water pollution from fertilizer industry*

S-8	SLO-1	*Growth of fertilizer Industry in India*	*Methods of Production, characteristics and specification - Ammonium Nitrate*	*Fundamental of Nitro phosphates*	*Nitro phosphate route for NPK fertilizers*	*Fertilizer plants effluent treatment and disposal*
	SLO-2	*Growth of fertilizer Industry in India*	*storage and handling of Ammonium Nitrate*	*Manufacture of nitro phosphates*	*Nitro phosphate route for NPK fertilizers*	*Corrosion problems in fertilizer industries*
S-9	SLO-1	*Location of fertilizer Industry in India*	*Production of calcium Ammonium nitrate(CAN)*	*Other phosphate fertilizers-Enriched super phosphate*	*Advantages of compound fertilizers*	*Case study of selected fertilizer plants with environmental aspects.*
	SLO-2	*Location of fertilizer Industry in India*	*Granulation of CAN*	*Application of super phosphate*	*Application of compound fertilizers*	*Case study*

Learning Resources	1. *Hand book of Fertilizer Association of India, New Delhi, 1998* 2. *Slack A.V., Chemistry & Technology of Fertilizers, Interscience, New York, 1967* 3. *NPTEL Notes-IITM/Fertilizer Technology*

Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the formation and evaluation of crude oil, overview of petroleum refining processes, Distillation*
CLR-2 :	*Understand the Evaluation and testing, properties, Petroleum refining processes*
CLR-3 :	*Understand the Thermal and catalytic cracking, treatment techniques*
CLR-4 :	*Understand the production of fuels, lubricating oil, storage and transportation*
CLR-5 :	*Understand the production of olefin gases, intermediates compounds and important petrochemicals*
CLR-6:	*Understand the overview of petroleum refining process*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Comprehend the potential growth of petrochemical industries, distillation characteristics*	*1*	*75*	*70*	*L*		*L*										*H*	*H*	
CLO-2 :	*Comprehend the thermal properties of petroleum fractions*	*1*	*75*	*70*	*M*		*M*										*H*	*H*	*M*
CLO-3 :	*Comprehend the conversion of petroleum, hydrodesulfurisation*	*1*	*80*	*75*	*H*		*M*										*H*	*H*	
CLO-4 :	*Comprehend the fuel, storage and transportation -characteristics*	*1*	*80*	*75*	*M*		*M*				*L*						*H*	*H*	*M*
CLO-5 :	*Comprehend the flow sheets of important petrochemicals*	*1*	*80*	*75*	*M*		*H*										*H*	*H*	
CLO-6:	*Comprehend the salient features of petroleum engineering*	*1*	*80*	*70*	*H*		*H*				*L*						*H*	*H*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Origin of crude*	*Octane number*	*Thermal cracking*	*Overview of Refinery Products*	*Petro chemicals definition*
	SLO-2	*Origin of crude*	*Cetane number, Diesel index, their determination and importance*	*Thermal cracking in vapor, liquid and mixed phase*	*Refinery Products*	*Overview of petrochemical*
S-2	SLO-1	*Formation*	*Petroleum refining processes*	*Catalytic cracking*	*Production of aviation gasoline*	*Importance and growth potential of petrochemical in india*
	SLO-2	*Formation theories*	*Petroleum Products*	*Houdry fixed bed*	*Properties*	*Petrochemical types*
S-3	SLO-1	*Migration of crude*	*Evaluation of Crude Oil*	*Fluidized bed*	*Motor fuel, kerosene, fuel*	*Reforming and cracking: Cracking of Naphtha*
	SLO-2	*Accumulation of petroleum*	*Testing of Petroleum Products*	*Catalytic bed*	*Diesel oil, tractor fuel and jet*	*Production of C2 and C3 Compounds*
S-4	SLO-1	*Types of crude*	*general processing, topping*	*Reforming process*	*Lubricating oil manufacture*	*Production of intermediate chemicals: Acrylonitrile,*
	SLO-2	*Crude classification*	*vacuum distillations*	*Alkylation process*	*Petroleum waxes and asphalts*	*ethylene oxide*
S-5	SLO-1	*Formation and Evaluation of Crude Oil.*	*Physical properties*	*Conversion of petroleum gases into motor fuel with alkylation*	*Storage of petroleum products*	*Higher olefins*
	SLO-2	*General processing of crude*	*Thermal properties*	*Flow digram*	*Types of storage*	*Benzene*
S-6	SLO-1	*Atmospheric distillation of crude*	*Properties of petroleum fractions*	*Polmerization*	*Tanks*	*Toluene*
	SLO-2	*Flow diagram*	*Thermal properties*	*Hydrogenation and dehydrogenation*	*Bullets*	*Xylene*
S-7	SLO-1	*Distillation condition*	*Flash point, fire point*	*Treatment techniques*	*Special types of spheres*	*Polymerization process*
	SLO-2	*Distillation products*	*Viscosity factor*	*Removal of Sulphur Compounds*	*Transportation of petroleum products,road, rail,*	*Plastics*
S-8	SLO-1	*Vacuum distillations*	*Petroleum refining processes*	*Dewaxing*	*Sea and pipeline;*	*Ethenic polymers*
	SLO-2	*Flow diagram*		*Clay Treatment and Hydrofining*	*Types of transportation*	*Polyvinyl chloride*
S-9	SLO-1	*Primary process*	*Refining flow diagram*	*Desulphurization,*	*Safety norms*	*Synthetic fibers- polyesters- polyesters ribbon,*
	SLO-2	*Secondary process*		*Solvent Treatment Processes*	*Importance of pipeline transportation.*	*Polyethylene Terephthalate*

Course Code	18CHE360T	Course Name	PRINCIPLES OF MEMBRANE SEPARATION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Know about membranes, their nature, characteristics and their role in water purification and other separation processes in industries vis-a-vis conventional separation processes.*
CLR-2 :	*Understand the various methods of preparation of membranes in different configurations and their structural & performance characteristics.*
CLR-3 :	*Understand the principles, mechanism of transport, applications and performance characteristics of pressure driven membrane processes.*
CLR-4 :	*Understand the principles, characteristics and applications of membrane processes driven by electrical and concentration gradients*
CLR-5 :	*Designing of membranebased systems from laboratory studies for various applications including desalination.*
CLR-6	*Understand the potential of membrane process for various applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (loom)	Expected Proficiency %)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO –3
CLO-1 :	*Prepare the membrane and characterize them with respect to their performance.*	*3*	*80*	*75*	*H*	*H*				*M*		*L*					*H*		
CLO-2 :	*know the basic principles, philosophy and process flow diagram for pressure driven membrane processes.*	*2*	*75*	*70*	*H*	*H*	*H*				*M*						*H*		
CLO-3 :	*Use membrane contactors for study of separations based on solvent extraction, gaseous separation, forward osmosis etc.*	*2*	*75*	*70*	*M*	*H*	*H*	*H*	*M*	*M*	*H*	*M*	*H*				*H*		
CLO-4 :	*Appreciate and apply concepts such as hybrid systems, zero liquid discharge, value recovery etc*	*1*	*90*	*80*	*H*	*M*		*H*		*H*	*M*	*M*					*H*	*M*	*M*
CLO-5 :	*Process design of desalination systems for seawater, brackish water and industrial waste water.*	*2*	*80*	*60*	*M*	*H*	*H*			*H*							*H*	*M*	*M*
CLO-6	*Understand the basis of design for different membrane separation process*	*3*	*80*	*70*	*H*	*M*	*H*	*H*	*M*		*M*						*H*	*H*	*M*

Duration (hour)		9	9	9	9	9
S1	SLO-1:	*Definition of membrane - distinguishing features of membrane processes over conventional processes.*	*Pressure driven membrane processes: commonalities and distinguishing features.*	*Pretreatment options – related to recovery and specific flux- selection of High Pressure pump - post treatment systems*	*Deign of module arrangements – controlling parameters – staggered configurations. Concept of Pass and Stage.*	*Forward osmosis for desalination – process principles – membranes used- osmotic pouches – challenges & limitations*
S2	SLO-1:	*Types and classification of membranes. Porous and non-porous; asymmetric/symmetric / composite and TFC*	*Ultra-filtration: features characterization, transport mechanism and operating features*	*Energy recovery systems – cleaning and maintenance aspects*	*Post treatment and cleaning systems.*	*Pervaporation concepts - applications*
S3	SLO-1:	*Structural characterization of membranes: pore size/pore-size distribution, contact angle*	*Principles behind reverse osmosis and nano-filtration: features and characteritics.*	*Applications of MF/UF in waste water treatment – comparison with conventional operations. Design approach for UF*	*High Pressure pump /energy recovery systems*	*Membrane contactors applications in gaseous separation / solvent extraction.*
S4	SLO-1:	*Classification of membrane processes based on driving forces – membrane requirements for each of the processes*	*Definition of SR,Rec and product flux, Performance characteristics of membranes with recovery, feedconc. And temperature of water.*	*Membrane Bio reactors – concept and applications*	*Once through /recycle mode of operation of RO plants*	*Zero liquid discharge -concept – how membrane processes can achieve*
S5	SLO-1:	*Membrane preparation techniques / sheet / tubular / capillary /hollow fibre - assembly as membrane element & modules*	*Transport mechanisms through membranes: Preferential sorption – capillary flow mechanism – concept and transport equations*	*Application of NF and RO – comparison of the processes based on membrane characteristics, operating aspects and performance.*	*Basic concepts of electrically driven membrane processes – membrane characteristics – comparison with pressure driven processes*	*Hybrid membrane systems – an analysis with a case study.*
S6	SLO-1:	*Relative charcteristics of different module configurations and advantages and limitations of the modules during applications.*	*Irreversible thermodynamics model – coupled flow – transport equations*	*.Design of RO /NF systems – approach -basic elements*	*Electro-dialysis – process description- membrane characteristics – EDR - limitations – energy consumption – lack of energy recovery*	*Value recovery – isolation of spent streams at source- techniques like size-enhanced – UF/ combo membrane processes or*

S7	SLO-1:	*Review of solution properties relevant to membrane processes. -colligative, zeta potential, diffusive flow, capillary flow.*	*Solution Diffusion model – concept and equations*	*Feed water characteristics and pretreatment requirements -discussion on fouling, scaling and chemical environments.*	*Electro-electro-dialysis and bipolar electrolysis- process principles – applications-challenges*	*Environmental aspects of membrane processes – concentrate disposal -spent membrane disposal*
S8	SLO-1:	*Definition of osmosis, osmotic pressure and osmotic equilibrium. – problems to illustrate variation of osmotic pressure with temperature and concentration. Relevance of contact angle /zeta potential etc. angle*	*Comparison of three models – use of transport equations for estimating membrane area and solute concentration in the permeate.*	*Preteatment equipments – monitoring aspects of pretreatment performance – SDI ORP*	*Fuel cells / type of membranes used – different types of Fuel Cells - challenges*	*Cost elements and analysis of low temperature desalination systems / opportunity costs / sustainability criteria*
S9	SLO-1:	*Thermodynamic concepts for the mnimum energy for membrane separation estimation of minimum energy based on colligative properties.*	*Laboratory experiments using single element to collect data for designing larger plants. role of each subsystem*	*Flow sheet of SWRO/NF plant. Role of each subsystem. Batch Vs continuous system*	*Membrane distillation- process philosophy for desalination – type of membranes. VMD, AGMD, DCMD*	*Environmental issues – Environmental impact analysis of thermal / membrane desalination plants.*

							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*familiarize Basics of Industrial Safety Management.*
CLR-2 :	*Various aspects of Chemical plant safety*
CLR-3 :	*Various aspects of Industrial accidents and Fire safety*
CLR-4 :	*Hazard identification techniques*
CLR-5 :	*Various aspect of industrial hygiene and Occupational Health hazards, Safety legislation in chemical industries*
CLR-6 :	*Learning Basic Industrial safety Management, Safety of chemical Plants, Identification of Hazards, Industrial Hygiene, Occupational Hazards and safety legislation in Chemical Industries*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (loom)	Learning 2: Expected Proficiency %)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO –3
CLO-1 :	*Know the Basics of Industrial Safety Management.*	2	80	70	L	M	M			L	M		H	H		H	H	M	M
CLO-2 :	*Understand the Various aspects of Chemical plant safety*	3	80	75	M	H				M	H	M	H	H		M	H	M	M
CLO-3 :	*Understand the Various aspects of Industrial accidents and Fire safety*	3	80	75	L	M	M	M		H	H	M	H	H		M	H	M	M
CLO-4 :	*Able to use Hazard identification techniques*	3	85	80	M	M		M	M	M	H						H	M	M
CLO-5 :	*Know the Various aspect of industrial hygiene and Occupational Health hazards, Safety legislation in chemical industries*	3	80	75	L		M	M		L	H		H				H	L	L
CLO-6 :	*Will be able to Control the Accidents in Chemical Industries By applying the acquired knowledge from Course Learning Rationle*	1	75	70	M	H	M	M	M	M	H	M	H	H		H	H	H	M

Duration (hour)		9	9	9	9	9
S1	SLO-1	*INDUSTRIAL SAFETY MANAGEMENT Importance of Safety consciousness in Indian Chemical Industries -*	*- CHEMICAL PLANT SAFETY Chemical process Industries - Setting and Layout of a Chemical plant*	*ACCIDENT AND THEIR PREVENTION Definitions, H. W. Henrich, Frank bird & Multiple Causation theories of accident occurrences, Classification, Causes, Costs*	*HAZARD IDENTIFIATION TECHNIQUES Safety Appraisal - Risk Assessment -Hazard identification techniques with examples such as FMEA, CMA, Fault Tree Analysis*	*INDUSTRIAL HYGIENE AND OCCUPATIONAL HEALTH HAZARDS Concepts - Industrial and Occupational health hazards, Housekeeping, human factors and error, stress at work,*
S2	SLO-1	*Development of Industrial Health and Safety,*	*Safety in transportation, storage and handling of hazardous chemicals*	*Industrial accidents, Principles of Accident prevention, Accident prevention technique*	*Preliminary Hazard Analysis (PHA), Hazard and operability (HAZOP) study*	*Personnel protective equipments, Role of trade unions in Industrial safety and health*
S3	SLO-1	*Safety Organization –Polices- Culture -Planning- Promotion – Inspection –Rules- Responsibility – Supervision,*	*Chemical process hazards and their control - First degree and second degree hazards. Lines of defense*	*Plant and Chemical job safety analysis, Accident proneness vocational guidance*	*Quantitative risk analysis-Out line of methodology, Consequences analysis*	*SAFETY AND LAW Introduction to ILO,*
S4	SLO-1	*Safety Committee – role of safety functionaries*	*High pressure - High temperature operations – Case studies*	*Safety performance measurement tools - FR. SR, (FSI), Safe T-Score, Accident rate per 1000 workers,*	*Quantitative risk analysis-Out line of methodology, Consequences analysis*	*Safety legislation in India, Factories act 1948*
S5	SLO-1	*Safety Committee – role of safety functionaries,*	*Emergency preparation: On-site and Offsite*	*Disabling injury index, Accident Compensation Statutes*	*Calculation of release rates of liquids under ambient pressure and liquids under pressure,*	*Employees welfare and legislation , Provisions relating to safety , health & environment in other important legislations*
S6	SLO-1	*Elements of work place Safety Program,*	*Safety aspects of maintenance in chemical plant*	*Accident Investigation reporting and Analysis*	*Calculation of dispersion of released gases and vapors and platting of equal concentration contours*	*Indian boilers act and regulations, Indian electricity act and rules*
S7	SLO-1	*Economic and Social Benefits from Safety Program*	*Effective steps to implement safety procedures-Periodic Advice and checking to follow safety procedures and rules*	*Case studies*	*Dow (Index) Fire and Explosion Index*	*Indian explosives act and rules, Mines act, Petroleum act and rules*
S8	SLO-1	*Effective Safety Education and Training*	*Safe guarding of Machines – Ergonomics*	*Conditions -Fire triangle- Classification of fires, Common causes of industrial fires, Fire protection systems- prevention*	*Dow (Index) Fire and Explosion Index*	*Environmental protection act.*

S9	SLO-1	*Communication at various levels of production and operation, Safety slogans*	*Proper selection and replacement of handling equipment -Safe handling and operation of materials and machineries*	*Case studies, Safety in Explosive*	*System of Risk Analysis*	*Environmental protection act.*

Course Code	18CHE362T	Course Name	FUNDAMENTALS OF DESALINATION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the relevance of desalination technologies and to realize the application of basic principles of solution chemistry and thermodynamics for understanding the processes of desalination.*
CLR-2 :	*Understand the nature and behavior of the membranes under different imposed parameters and hence to learn the process features and design philosophy of Reverse Osmosis desalination.*
CLR-3 :	*Understand the features of different variants of thermal desalination processes including the role of accessories such as vacuum and control systems, process design philosophy, operational and maintenance aspects.*
CLR-4 :	*To impart knowledge on the use of renewable sources of energy and other desalination processes including those on the Research and Development mode.*
CLR-5 :	*To impart knowledge on decision making synergizing technical, economical and environmental aspects.*
CLR – 6:	*Understanding the comparative challenges and advantages of various desalination process*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO –3
CLO-1 :	*Appreciate the need for desalination and realise the theoretical limitations. Estimate minimum energy requirement based on colligative properties and second law of thermodynamics.*	3	80	75	H	M				M		L					H		
CLO-2 :	*know the basic principles, philosophy and process flow-sheet of RO and thermal desalination processes*	2	75	70	H	M	M										H	M	M
CLO-3 :	*Relate environmental parameters, process requirement, use requirements and economics for final system selection*	2	75	70	H	H	H	M		M	H	L	L				H		
CLO-4 :	*Have awareness about the renewable sources, their limitation and their utilization for desalination*	1	90	80	H	H		M		H	M	L					H	M	L
CLO-5 :	*Realise challenges of the technology and develop new systems for desalination such as forward osmosi/membrane distillation.*	2	80	60	M	H	M										H		
CLO-6	*Select appropriate desalination system depending upon the environment*	2	75	65	H	M	M	H		H	M						H	M	M

Duration (hour)		9	9	9	9	9
S1	SLO-1	*Global and Indian Water Scenario: need for desalination*	*Pressure driven membrane processes- comparative characteristics -structure- operational -applications- transport mechanisms*	*Design and operational aspects of brackish water desalination plants.*	*Post treatment of Thermal plant product / why and how?*	*Comparative analysis of desalination processes – energy, feed quantity, pretreatment , product quality etc.*
S2	SLO 1	*Structural properties of water, solution properties, classification natural water, variation of seawater composition with depth and latitude.*	*Role of UF and NF in water treatment & Desalination*	*Basic components of Thermal desalination – Basic properties of steam – saturated / unsaturated / superheated steam and their applications – definition and meaning of Performance Ratio.*	*Electro-dialysis – process description- membrane characteristics – EDR - limitations – energy consumption – lack of energy recovery*	*Scale up characteristics of Desalination plants / comparative aspects on operational aspects.*
S3	SLO 1	*Types of contaminants in water – Brackish water and industrial water - anthropogenic and geogenic contaminants. Conventional methods of water treatment*	*Fundamentals of reverse osmosis desalination process -transport equations.*	*Variation of Seawater properties such as BPE, boiling point, specific heat etc. with temperature, pressure Corrosion aspects with reference hot seawater*	*Membrane distillation- process philosophy for desalination – type of membranes. VMD, AGMD, DCMD*	*Cost elements membrane based desalination plants / optimization approach – recovery/product quality*
S4	SLO-1	*Meaning and description of desalination - Basic elements of Desalination Energy requirements*	*Basic flow sheet of RO desalination – role of each subsystem.- basic terms Solute rejection/ percent recovery / membrane water flux*	*Flashing / boiling distinction – single effect evaporation – purpose & function of evaporator / condenser. Why PR is <1 for single effect*	*Forward osmosis for desalination – process principles – membranes used- osmotic pouches – challenges & limitations*	*Cost elements of thermal plant using steam – optimization with respect overall cost*
S5	SLO-1	*Meaning of thermodynamic minimum energy requirement- estimation through colligative properties*	*Pretreatment need for RO – unit operation and processes used – Scaling potential -monitoring of pretreatment performance – SDI- ORP*	*Why and how of seawater pretreatment – Scaling potential Why multistage / multi-effect – process requirement: vacuum systems (ejectors), demisters – pumps/limitation of top temperature.*	*Low temperature distillation – waste heat – advantages & limitations – ocean thermal energy desalination – energy consumption – unique features. - example*	*Cost elements and analysis of low temperature desalination systems / opportunity costs / sustainability criteria*

S6	SLO-1	*Concept of Exergy – energy of mixing /de-mixing. Estimation of minimum energy at practical situations.*	*Description of membrane – membrane element – module – array - selection of membrane configuration – performance features. Membrane arrangement – staggered configuration – Staging/Passing*	*MSF – description of the process flowsheet- heat recovery / reject /brine heater: explanation of each sub system. Once through and recirculation systems*	*Solar based desalination systems – solar distillation – solar thermal systems – solar PV -RO*	*Environmental issues – Environmental impact analysis of thermal / membrane desalination plants.*
S7	SLO-1	*Classification of desalination processes based on energy source / driving forces etc.- Basic features*	*Performance characteristics of as a function of temperature, pressure and salinity*	*MED – description – process flowsheet- parallel /series feed flow systems*	*Dual purpose plants – advantages – applications*	*Selection of desalination system – Approach*
S8	SLO 1	*Membrane – definition- types of membranes -*	*High Pressure pump features and selection. Energy recovery systems.*	*Vapor – compression Thermo vapor compression / mechanical vapor compression - specific features*	*hybrid Desalination – meaning and purpose – thermal- RO , NF -RO*	*Case study - for drinking water / industrial grade water*
S9	SLO 1	*Asymmetric/homogenous- membrane preparation techniques and characteristics Membrane configuration/ comparative features*	*Post treatment – need and methods – cleaning in place*	*Comparative features of all the thermal processes – capacity, maintenance, energy / cooling water requirements etc.*	*Design considerations for inland brackish water reverse osmosis plants*	*Challenging desalination systems – freeze desalination – humidification – dehumidification systems*

							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the effect of pollution on human health and the necessity to control the pollutants*
CLR-2 :	*Know how to measure the concentration of the pollutants by models and experiments.*
CLR-3 :	*Different types of pollutants available and their control*
CLR-4 :	*Know how Know how to Control the Oxides of Sulphur, Nitrogen*
CLR-5 :	*Analyze the Effect of Pollutants on Atmosphere*
CLR-6 :	*Realize the effect of pollutants on living things, Control of Pollutants*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO –3
CLO-1 :	*Understand the effect of pollution on human health and the necessity to control the pollutants*	*1*	*80*	*75*						*H*	*H*		*H*	*H*		*M*	*H*	*M*	*M*
CLO-2 :	*Know how to measure the concentration of the pollutants by models and experiments.*	*1*	*75*	*70*	*M*	*M*	*H*	*H*			*H*			*M*			*H*	*M*	*H*
CLO-3 :	*Different types of pollutants available and their control*	*2*	*75*	*70*	*M*	*M*	*H*	*H*		*H*	*H*		*H*			*M*	*H*	*M*	*M*
CLO-4 :	*Know how Know how to Control the Oxides of Sulphur, Nitrogen*	*2*	*80*	*75*	*M*		*H*	*M*		*H*	*H*			*M*		*M*	*H*	*M*	*M*
CLO-5 :	*Analyze the Effect of Pollutants on Atmosphere*	*2*	*80*	*75*	*M*			*H*		*H*	*H*					*M*	*H*	*M*	*M*
CLO-6 :	*Will be able to analyse the effect of pollutants,Types of pollutants,Contolling of pollutants*	*1*	*75*	*70*	*H*	*H*	*H*	*H*		*H*	*H*						*H*	*M*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Air pollution Control : History of Air pollution control : Dirty Air removal or Emission control*	*Air pollution measurements, Emission Estimates : Representative Samples, Concentration determination*	*General ideas in Air Pollution Control: Minimizing Volumetric Flow rate and pressure drop – Efficiency, Penetration, Decontamination factor*	*CONTROL OF OXIES OF SULPHUR, NITROGEN AND HYDROCARBONS, CARBON DI OXIDE*	*EFFECT OF AIR POLLUTANT TO ATMOTSPHERE*
S-2	SLO-1	*History of Air pollution control: One Problem or Family of Problems ? Emission, Transport, Receptors Units and Standards*	*Standard Analytical Methods, Emission factor, Visible emission*	*Homogeneous and Non homogeneous Pollutants, Volume and Composition of Combustion Products*	*Control of Volatile Organic Compounds (VOC): Vapour Pressure, Equilibrium Vapour Content, Evaporation , VOCs, Control Alternatives*	*The motor Vehicle Problem : Overview of the problem of Air Pollution from Motor Vehicles, Internal Combustion Engines,*
S-3	SLO-1	*Air pollution effects : Effect of Air pollution on Human Health Animal Experiments, Regulations to protect Human Health*	*Meteorology for Air pollution Control Engineers : Horizontal Atmospheric motion, Vertical Atmospheric Motion,*	*The nature of Particulate Pollutants : Primary and Secondary Particulates*	*Vapour Pressure, Equilibrium Vapour Content, Evaporation , VOCs, Control Alternatives*	*The motor Vehicle Problem : Overview of the problem of Air Pollution from Motor Vehicles, Internal Combustion Engines,*
S-4	SLO-1	*Effect on Property Effect on Visibility*	*Wind velocity and direction, Temperature Inversions, Fumigations, Stagnations*	*Settling Velocity and Drag forces, Paricle Size Distribution Functions, Behavior of Particles in the Atmosphere*	*Control of Sulfur Oxides : Overview of Sulphur Problem, Removal of reduced Sulphur Compounds from Petroleum and Natural Gas streams*	*Diesel Engines, Gas Turbine Engines*
S-5	SLO-1	*Air pollution Control Laws and regulations*	*Air pollutant Concentration Models: Fixed – Box Models,*	*Control of Primary Particulates : Wall Collection devices, Dividing Collection Devices*	*Control of Sulfur Oxides : Overview of Sulphur Problem, Removal of reduced Sulphur Compounds from Petroleum and Natural Gas streams*	*Diesel Engines, Gas Turbine Engines*
S-6	SLO-1	*Air pollution Control Laws and regulations*	*Diffusion Model*	*Control of Primary Particulates : Wall Collection devices, Dividing Collection Devices*	*Removal of Sulphur dioxide from Rich, Lean Waste Gases Alternatives to "Burn and Then Scrub"*	*Air pollutants and Global Climate : Global Warming,*
S-7	SLO-1	*Air pollution control Philosophies : The Emission Standard Philosophy, Advantages and Disadvantages*	*Long Term Average Uses of Gaussian Plume Models*	*Control of Primary Particulates : Wall Collection devices, Dividing Collection Devices*	*Control of Nitrogen Oxides : Overview of Nitrogen Oxides Problem*	*Air pollutants and Global Climate : Global Warming,*

S-8	SLO-1	*Air pollution control Philosophies. The Air Quality Standard Philosophy, Advantages and Disadvantages*	*Multiple Cell Models, R*	*Control of Primary Particulates : Wall Collection devices, Dividing Collection Devices*	*Control of Nitrogen Oxides : Overview of Nitrogen Oxides Problem*	*Stratospheric Ozone Depletion and Chloroflurocarbons, Acid rains*
S-9	SLO-1	*Emission Tax Philosophy, Cost benefit Philosophy*	*Receptor – Oriented and Source Oriented Air pollution Models*	*Control of Primary Particulates : Wall Collection devices, Dividing Collection Devices*	*Control of Nitrogen Oxide Emissions*	*Indoor Air Pollution : Indoor and outdoor Concentrations, Models, Control of Indoor Air Quality*

Learning Resources	1. *Noel De Nevers "Air Pollution Control Engineering" Internationa Editions 1995 MaGraw – Hill,Inc* 2. *Bhartia.S.C "Environmental Pollution and Control in Chemical Process Industries"* 3. *Perry and Chilton (Editors) "Perry's Chemical Engineer's Hand book*

Learning Assessment

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basic fundamentals of drug chemistry*
CLR-2 :	*Learn the various chemical reactions involved in drug formulation*
CLR-3 :	*Exposure on basic concepts and principles of drug production techniques*
CLR-4 :	*Impart the knowledge of various parameters involved in the formulation and development of various dosage forms*
CLR-5 :	*Familiarize the concept of the pharmaceutical industrial manufacturing practices*
CLR 6 :	*Learn the quality aspects in Pharmaceutical industry*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15

CLO-1 :	*Identify the basic concept of drug formulation and their importance in Pharmaceutical Industry*	2	90	85	L	L	M	L			M		M			M	H	L	L
CLO-2 :	*Recognize the different types of reactions involved in bulk drug production*	2	80	75	L	L	M	M			M		L			M	L	M	L
CLO-3 :	*Review the techniques involved in production of drugs*	2	80	80	M	L	M	L			M		M			M	L	H	L
CLO-4 :	*Implement the methods for drug development*	3	75	70	M	L	M	M			M		M			M	L	H	M
CLO-5 :	*Investigate the production planning, scheduling and quality management*	4	80	75	M	M	H	L			M		M			M	L	M	M
CLO 6:	*Understand the importance of quality attributes of pharmacy products*	3	80	75	L	L	M	L			H		M			M	L	L	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of fine chemicals and bulk drugs*	*Production of fine chemicals*	*Bulk drug production*	*Overview of drug Formulation and Pre-formulation development*	*Overview of production plants*
	SLO-2	*Characteristic features of fine chemicals manufacture*	*Unit operations involved in production*	*Selection of Raw materials for bulk drugs production*	*Solid and Semi-solid dosage forms*	*Types of production plants*
S-2	SLO-1	*Catalysis in fine chemistry*	*Chemical conversion processes for drug formulation*	*Various Bulk drugs*	*Tablet formulation techniques*	*Dedicated and multipurpose plants*
	SLO-2	*Selectivity Engineering*	*Alkylation- reactions involved*	*Production Techniques*	*Compressed tablets*	*Mixed plants*
S-3	SLO-1	*Process development*	*Drug production by Carboxylation*	*Reaction for bulk drugs*	*Capsules*	*Equipments in multipurpose plants-Reactors*
	SLO-2	*Separation methods, Production plants*	*Caboxylation –reactions and process*	*Flow Sheet for bulk drugs*	*Capsules*	*filters ,centrifuges*
S-4	SLO-1	*Concept of fine drugs*	*Condensation*	*bulk drug production*	*Polymers and Powder formulation*	*Driers, extractors*
	SLO-2	*Bulk drugs and their manufacture*	*Cyclisation*	*Equipments for bulk drug production*	*Milling process*	*evaporators*
S-5	SLO-1	*Evolution of process*	*Dehydration*	*Paracetamol*	*Granulation Techniques –Wet Granulation*	*Production cost*
	SLO-2	*Process selection: process profile analysis*	*Esterification*	*Aspirin*	*Dry Granulation*	*capital investment costs, operating costs*
S-6	SLO-1	*Factors influencing Process choice*	*Halogenation*	*Ibuprofen,*	*Coating techniques in drugs*	*Batch process*
	SLO-2	*cleaner and safer technologies*	*Reaction and process involved*	*Diazepam*	*Coating techniques in drugs*	*Designing of batch plants.*
S-7	SLO-1	*waste minimization*	*Oxidation*	*Darvon*	*Topical formulation*	*production planning*
	SLO-2	*The role of catalysis in waste minimization*	*Sulfonation*	*Niacinamide*	*cutaneous and Inhaled*	*production planning*
S-8	SLO-1	*Research in pharmaceutical Industries*	*Complex Chemical conversions*	*Chloramphenicol*	*Polymeric nanoparticles formulation methods*	*Production scheduling*
	SLO-2	*Development strategies in pharmaceutical Industries*	*Complex Chemical conversions*	*Erythromycin*	*Targeting*	*Production scheduling*
S-9	SLO-1	*Basic drug formulation*	*Industrial Fermentation products*	*Antimicrobial agent*	*Microparticles*	*Principles of good manufacturing practices*
	SLO-2	*Radiopharmaceuticals*	*Industrial Fermentation products*	*Antimicrobial agent*	*Microparticles synthesis for drug delivery system*	*Quality control*

Course Code	18CHE365T	Course Name	WASTE WATER TREATMENT	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*study characteristic of waste water*
CLR-2 :	*Familiarize the different conventional wastewater treatment methods*
CLR-3 :	*Introduce students to the unit operations and processes used in the advanced treatment of wastewater.*
CLR-4 :	*Pollution control methods used in a few typical chemical process industries*
CLR-5 :	*Learn issues involved in water reduce, recover and reuse*
CLR-6:	*Get wholesome knowledge of water treatment processes*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (loom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO –3
CLO-1 :	*Examine various characteristic of waste water*	*4*	*80*	*75*	*H*			*M*			*M*					*M*	*H*		
CLO-2 :	*Understand the different conventional treatment process*	*2*	*80*	*70*	*H*			*M*			*M*					*M*			*H*
CLO-3 :	*Review the advanced wastewater treatment process*	*2*	*80*	*75*	*H*			*M*			*M*					*M*	*H*		*H*
CLO-4 :	*Understand the block diagram of various industrial effluent treatment*	*2*	*80*	*75*	*H*			*M*			*M*					*M*	*H*		*M*
CLO-5 :	*Understand the different concept of reduce, recover and reuse of waste water*	*2*	*80*	*75*	*M*			*H*			*M*					*M*	*H*		*M*
CLO-6:	*To select appropriate water treatment system to conserve water*	*2*	*80*	*70*	*H*			*H*			*H*						*H*		*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Waste water sources*	*Philosophy of waste treatment*	*Aim of the advanced wastewater Treatment*	*Water treatment in chemical process industries*	*Volume reduction – concept of water recovery*
	SLO-2	*Industrial waste water*	*Preliminary treatment process*	*Types of advanced wastewater Treatment*	*Characteristics of pulp and paper industry waste water*	*Volume reduction: recycle*
S-2	SLO-1	*Agricultural waste water*	*Primary treatment :- screens filters process*	*Removal of suspended solid*	*Pulp and paper industry waste water treatment process*	*Concept of common effluent treatment plants*
	SLO-2	*Domestic waste water*	*Primary treatment: gravity settling process*	*Coagulation process*	*Characteristics of fertilizer industry waste water*	*Concept of common effluent treatment plants*
S-3	SLO-1	*Quantum of waste water produced by industries*	*Secondary treatment - Aerobic treatment process*	*Flocculation process*	*Fertilizer industry waste water treatment process*	*Philosophy of waste treatment*
	SLO-2	*Comparison of world and Indian scenario*	*Activated sludge treatment process*	*Removal of dissolved solids*	*Physio chemical characteristics of tannery effluent*	*Conventional dilute & disperse*
S-4	SLO-1	*Assessment of waste water composition*	*Different types of activated sludge process*	*Ion exchange treatment process*	*Chrome treat process*	*current philosophy treat and dispose*
	SLO-2	*Types of water pollutants*	*Biological processes in activated sludge process*	*Osmosis and reverse osmosis process*	*Overview of tannery effluent treatment*	*Future philosophy; recover and reuse*
S-5	SLO-1	*Water pollutants effects*	*Attached growth aerobic processes*	*Electro dialysis process*	*Characteristics of petroleum refinery waste water*	*Wealth from waste*
	SLO-2	*waste water sampling*	*Tricking filters process*	*Removal of nitrogen compound in water*	*Overview of refinery effluent treatment*	*Value recovery – need for value recovery*
S-6	SLO-1	*Waste water analysis*	*Rotating biological contactors*	*Phosphate removal from waste water*	*Characteristics of petrochemical effluent*	*Water conservation*
	SLO-2	*Determination of organic content: BOD,COD,DO*	*Anaerobic treatment process*	*Removal of dissolved organic compounds*	*Petrochemical effluent treatment process*	*Types of reuse waste water*
S-7	SLO-1	*Determination of inorganic content*	*Design of Anaerobic digester*	*Adsorption process*	*Characteristics of sugar industry waste water*	*Zero Liquid Discharge*
	SLO-2	*Determination of carbonate ions*	*Mechanism of anaerobic degradation*	*Different membrane processes*	*Overview of sugar effluent treatment process*	*Zero Liquid Discharge*
S-8	SLO-1	*Determination of alkalinity*	*Sludge Treatment: Volume Reduction*	*Membrane treatment: MF, UF and NF*	*Physio chemical characteristics of distilleries effluent*	*Regulations for treatment*

	SLO-2	*Determination of TSS and TDS*	*Sludge Treatment - Dewatering; Sludge drying; Composting*	*Different types of dis infection process*	*Distilleries industry waste water treatment process*	*ALARA concept*
S-9	SLO-1	*Determination of physical characteristics*	*Sludge Treatment: Fluidized bed incineration*	*Dis infection: chlorination process*	*Characteristics of textile industry waste water*	*Pollution control board regulations*
	SLO-2	*Determination of bacteriological measurements*	*Sludge Disposal methods*	*Dis infection: chlorination process uv-treatment*	*Overview of textile effluent treatment process*	*Pollution control board regulations*

Course Code	18CHE366T	Course Name	CHEMICAL PROCESS OPTIMIZATION	Course Category	E	PROFESSIONAL ELECTIVES	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*understand the basic concepts of optimization*
CLR-2 :	*introduce the optimization methods for multivariable functions*
CLR-3 :	*familiarize the single variable function optimization*
CLR-4 :	*introduce the linear programming method and unconstrained optimization*
CLR-5 :	*understand the optimization methods in chemical process*
CLR-6:	*understand optimization techniques for types of functions, linear programming method, unconstrained optimization and optimization of chemical process*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (loom)	Learning 2: Expected Proficiency %)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO –3
CLO-1 :	*remember and recollect the basic concepts of optimization*	2	85	75	H	H	H	H									H	H	L
CLO-2 :	*apply methods for multivariable function optimization*	3	75	70		H	H	H	M								H	M	L
CLO-3 :	*understand the single variable function optimization*	3	85	75	M	H	H	H	M								H	L	L
CLO-4 :	*Solve linear programming and unconstrained optimization problems*	3	85	75		H	H	H	M								H	L	L
CLO-5 :	*calculate optimized conditions for chemical processes*	3	85	75	H	H	H	H	M								L	H	H
CLO-6 :	*calculate optimized variables for different functions, solve linear programming problems and optimized conditions for real chemical processes*	3	85	75	H	H	H	H	M								H	H	L

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Need for optimization*	*Unimodal and multi modal functions*	*Optimization of unconstrained functions*	*Concept and applications of linear programming*	*Heat transfer and energy conservation*
	SLO-2	*Hierarchy of levels of optimization*	*Unconstrained multivariable optimization*	*Newton method of uni – dimensional search*	*Geometry of linear programming problems*	*Optimizing recovery of waste heat*
S-2	SLO-1	*Applications and essential features of optimization problems*	*Random search method grid search method*	*Quasi-newton method*	*Standard form for linear programs*	*Optimal design of a distillation column*
	SLO-2	*Statement of an optimization problem*	*Univariate search*	*Problems based on newton and quasi – newton method*	*Basic linear programming definitions*	*Optimal design of a distillation column*
S-3	SLO-1	*Terms used in optimization*	*Simplex search method nelder – mead method*	*Problems based on newton and quasi – newton method*	*Equivalent systems and elementary operations*	*Optimal pipe diameter*
	SLO-2	*Classification of optimization problems*	*Hooke-jeeves procedure*	*Problems based on newton and quasi – newton method*	*Concept of pivoting and use of pivot operations*	*Optimal pipe diameter*
S-4	SLO-1	*Formulation of the objective functions*	*Steepest descent method*	*Quadratic interpolation method*	*Simplex method for linear programming problems*	*Minimum work of compression*
	SLO-2	*Problem based on objective function formation*	*Steepest descent method*	*Quadratic interpolation method*	*Simplex method for linear programming problems*	*Minimum work of compression*
S-5	SLO-1	*Necessary and sufficient conditions for optimum*	*Conjugate gradient method*	*Cubic interpolation method*	*Problem based on simplex method*	*Modeling chemical reactors*
	SLO-2	*Steps to solve optimization problems*	*Conjugate gradient method*	*Cubic interpolation method*	*Problem based on simplex method*	*Classification of reactors*
S-6	SLO-1	*Problems based on analytical optimization methods*	*Problems based on conjugate gradient method*	*Problems based on cubic and quadratic interpolation method*	*Integer programming method*	*Objective functions for reactors*
	SLO-2	*Problems based on analytical optimization methods*	*Problems based on conjugate gradient method*	*Problems based on cubic and quadratic interpolation method*	*Graphical solution for integer linear programming*	*Objective functions for reactors*
S-7	SLO-1	*Problems based on analytical optimization methods*	*Newton's method*	*Problems based on cubic and quadratic interpolation method*	*Geometric programming method – unconstrained minimization*	*Process simulators and optimization codes*

	SLO-2	*Problems based on analytical optimization methods*	*Problem solving based on newton's method*	*Problems based on cubic and quadratic interpolation method*	*Geometric programming method – unconstrained minimization*	*Process simulators and optimization codes*
S-8	SLO-1	*Classification of models and mathematical forms of models*	*Quasi – newton method*	*Fibonacci method*	*Dynamic programming method*	*Optimization using equation-based process simulators*
	SLO-2	*Classification of models and mathematical forms of models*	*Lagrange multiplier method*	*Fibonacci method*	*Dynamic programming method*	*Optimization using equation-based process simulators*
S-9	SLO-1	*Selecting functions to fit empirical data*	*Problems based on lagrange multiplier method*	*Golden section method*	*Quadratic programming method*	*Optimization using modular-based simulators*
	SLO-2	*Fitting models by least squares*	*Problems based on lagrange multiplier method*	*Golden section method*	*Quadratic programming method*	*Optimization using modular-based simulators*

Course Code	18CHE367T	Course Name	EQUILIBRIUM STAGE OPERATIONS	Course Category	E	Professional elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18CHC303T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to*
CLR-1 :	*Understand fundamental concepts of equilibrium-governed separation processes*
CLR-2 :	*Understand the cascade configurations in chemical process systems*
CLR-3 :	*Acquire knowledge of concepts involved in absorption and distillation*
CLR-4 :	*Acquire knowledge of liquid-liquid extraction and solid-liquid extraction operations*
CLR-5 :	*Understand principles of adsorption and its applications*
CLR-6:	*Understand the concepts underlying equilibrium stage operations in chemical engineering*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (loom)	Learning 2 Expected Proficiency %)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO –3
CLO-1 :	*Explain various equilibrium governed separation processes*	2	80	75	H			M									H		
CLO-2 :	*Analyze cascade configurations for multicomponent separations*	2	75	70	H			M									H		
CLO-3 :	*Perform calculations for absorption and distillation columns*	2	75	75	H	M		M									H	M	
CLO-4 :	*Perform calculations for extraction systems and compare various configurations*	2	80	75	H	H	L	M									H	M	
CLO-5 :	*Perform adsorption bed related calculations*	2	75	70	H		H	M									H	M	
CLO-6:	*Understand and perform calculations in equilibrium stage operations*	2	75	70	H	M	M	M									H	M	

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of different separation processes*	*Typical cascade configurations*	*Equilibrium in a gas-liquid system*	*Liquid-liquid extraction*	*Adsorption, isotherms*
	SLO-2	*Overview of separation processes*	*Hybrid systems*	*Equilibrium in a gas-liquid system*	*Liquid-liquid extraction*	*Isotherms*
S-2	SLO-1	*Characteristics of separation processes*	*General approach to analysis of equilibrium governed operations*	*Stage calculations for absorption and stripping*	*Solvent selection*	*Equilibrium considerations in adsorption*
	SLO-2	*Types of separating agents*	*General approach to analysis of equilibrium governed operations*	*Examples*	*Solvent selection*	*Equilibrium considerations in adsorption*
S-3	SLO-1	*Separation factors*	*General approach to analysis of equilibrium governed operations*	*Batch distillation-binary and multicomponent mixtures*	*Ternary phase diagrams*	*Kinetic and transport considerations*
	SLO-2	*Practice session for separation factors based problems*	*Examples*	*Batch distillation-binary and multicomponent mixtures*	*Problem solving*	*Kinetic and transport considerations*
S-4	SLO-1	*Sequence of separations*	*Mass transfer in stage-wise contact of two phases*	*Continuous multistage distillation of binary mixtures*	*Single stage*	*Adsorption in a fixed bed*
	SLO-2	*Examples*	*Mass transfer in stage-wise contact of two phases*	*Examples*	*Problem solving*	*Adsorption in a fixed bed*
S-5	SLO-1	*Heuristics for separation schemes*	*Mass transfer in stage-wise contact of two phases*	*Multiple feed and product withdrawal*	*Multistage single section cascades*	*Design calculations of fixed bed adsorption*
	SLO-2	*Examples*	*Examples*	*Problem solving*	*Multistage single section cascades*	*Design calculations of fixed bed adsorption*
S-6	SLO-1	*Review of thermodynamics principles, phase equilibrium*	*Stage Calculations for cocurrent, cascades*	*Multicomponent distillation*	*Design calculations*	*Design calculations of fixed bed adsorption*
	SLO-2	*Ideal and non-ideal solutions, activity coefficients*	*Problem solving*	*Key components*	*Problem solving*	*Design calculations of fixed bed adsorption*
S-7	SLO-1	*Simple equilibrium processes*	*Crosscurrent cascades*	*Approximate Methods- fenske-underwood – gilliland method*	*Solid-liquid extraction*	*Problem solving*
	SLO-2	*Single equilibrium stage*	*Crosscurrent cascades*	*Problem solving*	*Solid-liquid extraction*	*Problem solving*
S-8	SLO-1	*Checking phase condition of a mixture*	*Countercurrent Cascades*	*Enhanced distillation- extractive distillation*	*Rate of solid-liquid extraction*	*Ion-exchange*
	SLO-2	*Examples*	*Problem solving*	*Azeotropic distillation, reactive distillation*	*Rate of solid-liquid extraction*	*Ion-exchange*
S-9	SLO-1	*Flash calculations*	*Kremser equation*	*Residue-curve maps*	*Supercritical fluid extraction*	*Chromatography*
	SLO-2	Binary and multicomponent systems flash equations	Problem solving	Residue-curve maps	Supercritical fluid extraction	Chromatography

Course Code	18CHE368T	Course Name	COMPUTATIONAL FLUID DYNAMICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18CHC205T 18CHC207T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards		Nil	

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Discretize the conservation law equations*
CLR-2 :	*Solve the conservation equations by numerical techniques*
CLR-3 :	*Understand fundamentals underlying Computational fluid dynamic simulations*
CLR-4 :	*Understand the flow and temperature field in engineering problems*
CLR-5 :	*Learn to assess the quality of numerical results*
CLR-6 :	*Acquire knowledge to solve computational fluid dynamics related problems*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (loom)	Learning 2: Expected Proficiency %)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO –3
CLO-1 :	*Appreciate role and importance of CFD and learn underlying fundamental principles*	2	80	75	H				L										
CLO-2 :	*Understand CFD solution methodologies, sources of error*	2	75	70	H	M			L										
CLO-3 :	*Apply discretization using Finite difference method approach*	2	75	75	H			L										H	
CLO-4 :	*Apply discretization using Finite volume method approach*	2	80	75	H			L									H		
CLO-5 :	*Apply discretization using Finite difference element approach, TDMA*	2	75	70	H			L											M
CLO-6 :	*Apply computational knowledge in solving transport processes related problems in chemical engineering*	2	75	70	H	M	L	L	L								H	H	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to CFD*	*CFD solution procedure*	*Types of PDEs*	*Finite volume method introduction*	*Finite element method introduction*
	SLO-2	*Applications*	*CFD solution procedure*	*Examples*		
S-2	SLO-1	*CFD solution strategies*	*Physical and computational domains*	*Solution using discretization scheme*	*General representation form of conservation equation*	*Concept of weighted residual approach*
	SLO-2	*CFD solution strategies*	*Physical and computational domains*	*Examples*	*Physical meaning*	*Concept of weighted residual approach*
S-3	SLO-1	*Vector and calculus review for fluid dynamics*	*Boundary conditions*	*Finite difference methods*	*Finite volume method procedure of discretization*	*FEM method of discretization*
	SLO-2	*Derivation and physical meaning of substantial derivative*	*Boundary conditions examples*	*Forward, backward and central difference schemes*	*Finite volume method procedure of discretization*	*FEM method of discretization*
S-4	SLO-1	*Introduction to tensors*	*Types of mesh*	*Converting derivatives to algebraic equations*	*Implementation of boundary conditions-temperature and heat flux*	*FEM application for 1D steady state heat conduction*
	SLO-2	*Problem solving*	*mesh quality parameters*	*Converting derivatives to algebraic equations*	*Examples*	*Problem solving*
S-5	SLO-1	*Types of models*	*Solver settings*	*Converting mixed derivatives to algebraic equations*	*1-D steady state heat conduction with source*	*Implementation of boundary conditions*
	SLO-2	*Types of models*	*Convergence*	*Graphical representation*	*Examples*	*Problem solving*
S-6	SLO-1	*Continuity equation derivation based on different models*	*Types of error*	*General approach to difference equations for uniform grid*	*FVM: 1-D steady state diffusion equation problem without source*	*Solution of system of linear algebraic equations*
	SLO-2	*Derivation*	*Types of error*	*Examples*	*FVM*	*Solution of system of linear algebraic equations*
S-7	SLO-1	*Problem solving*	*Sources of error*	*Polynomial approach for finite difference equations*	*1-D convection and diffusion*	*Tridiagonal matrix algorithm*
	SLO-2	*Problem solving*	*Sources of error*	*Illustrative examples*	*Examples*	*Tridiagonal matrix algorithm*
S-8	SLO-1	*Momentum balance*	*Post processing*	*Implementation of boundary conditions*	*Problem solving*	*Problem solving*
	SLO-2	*Momentum balance*	*Post processing*	*Merits and limitations of FDM*	*Problem solving*	*Problem solving*
S-9	SLO-1	*Navier Stokes equation*	*Examples of CFD solutions*	*Problem solving*	*Problem solving*	*Problem solving*
	SLO-2	*Navier Stokes equation*	*Problem solving*	*Problem solving*	*Problem solving*	*Problem solving*

Course Code	18CHE369T	Course Name	BIOCHEMICAL PROCESS DESIGN	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basic configuration, accessories and types of bioreactor*
CLR-2 :	*Understand the scale-up criteria for bioreactors*
CLR-3:	*Learn the different control requirements of a bioreactor*
CLR-4 :	*Understand the different methods of product recovery and purification*
CLR-5 :	*Understand the process of synthesis of various bioproducts*
CLR-6 :	*Understand the operation of bioreactors*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO –3
CLO- 1 :	*Select the required bioreactor for a given process*	*3*	*80*	*75*	*M*	*L*	*L*	*L*			*M*						*M*		*M*
CLO-2 :	*Formulate the scale-up of bioreactor in industrial processes*	*3*	*75*	*70*	*M*	*M*	*M*	*M*									*M*		*M*
CLO-3 :	*Comprehend the different types of instruments and controllers used in bioprocess industries*	*2*	*75*	*70*	*M*		*M*	*L*	*M*		*M*						*M*		
CLO-4 :	*Analyze the various stages of product recovery*	*4*	*80*	*75*	*H*	*M*	*M*	*M*	*M*		*M*						*M*	*H*	*M*
CLO-5 :	*Appreciate the industrial scale synthesis of various bioproducts*	*3*	*75*	*70*	*H*	*H*	*H*	*H*	*M*		*H*						*M*	*M*	*M*
CLO-6 :	*Apply the knowledge of reactor design for novel products/processes*	*3*	*75*	*70*	*M*	*M*	*M*	*M*	*M*		*M*						*M*	*M*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Bioreactors*	*Biochemical reactor scale-up*	*Instrumentation control of bioreactors*	*Product recovery operation*	*Industrial bioprocess technology*
	SLO-2	*Basic principle of bioreactor*	*Transport phenomena in Bioprocess systems*	*Measurement of physical and chemical parameters in bioreactors*	*Separation of biomolecules*	*Aerobic processes*
S-2	SLO-1	*Components of bioreactor*	*Gas-liquid mass transfer*	*Bioreactor sensor s for temperature control*	*Cell disruption for release of products*	*Production of citric acid*
	SLO-2	*Classification and configuration of bioreactors*	*Determination of oxygen transfer rates*	*Principles of dissolved oxygen measurement and control*	*Cell disruption for release of products*	*Production of penicillin*
S-3	SLO-1	*Analysis of batch bioreactors*	*Measurement of* k_La	*Principles of pH control*	*Mechanical methods of cell disruption*	*Anaerobic bioprocesses*
	SLO-2	*Analysis of batch bioreactors*	*Measurement of* k_La	*Principles of redox measurement and control*	*Enzymatic methods of cell disruption*	*Anaerobic bioprocesses*
S-4	SLO-1	*Analysis of continuous flow bioreactors*	*Key dimensionless groups*	*On-line sensors*	*Chemical methods of cell disruption*	*Production of ethanol*
	SLO-2	*Analysis of continuous flow bioreactors*	*Correlations for mass transfer co-efficients and interfacial area*	*Off-line analytical methods*	*Cells and solid particle separation*	*Production of lactic acid*
S-5	SLO-1	*Analysis of fed-batch bioreactors*	*Overall* k_La *estimates and power requirement for sparged and agitated vessels*	*Measurement of medium properties*	*Filtration*	*Acetone-butanol production*
	SLO-2	*Design of novel biochemical reactors*	*Overall* k_La *estimates and power requirement for sparged and agitated vessels*	*Analysis of cell population composition*	*Filtration*	*Production of biopolymers*
S-6	SLO-1	*Operation of novel biochemical reactors*	*Heat transfer*	*Prevention of foam*	*Centrifugation*	*Production of Xanthan gum*
	SLO-2	*Air-lift loop reactors*	*Heat transfer correlations*	*Determination of biomass*	*Centrifugation*	*Production of Xanthan gum*
S-7	SLO-1	*Fluidized bed biochemical reactors*	*Scaling of mass transfer equipment*	*Application of biosensors*	*Product isolation*	*Production of PHB*
	SLO-2	*Immobilized enzyme reactors*	*Scaling of mass transfer equipment*	*Application of biosensors*	*Product isolation*	*Production of PHB*
S-8	SLO-1	*Design of immobilized enzyme reactors*	*Regime analysis of Biochemical reactor processes*	*Design and operation strategies for batch operation*	*Adsorption*	*Production of single cell protein*
	SLO-2	*Packed bed reactors*	*Regime analysis of Biochemical reactor processes*	*Design and operation strategies for batch operation*	*Liquid-liquid extraction*	*Production of single cell protein*
S-9	SLO-1	*Fluidized bed reactors*	*Scale-up criteria for bioreactors based on oxygen transfer and power consumption*	*Continuous process control*	*Product purification- Chromatography*	*Production of vinegar*
	SLO-2	*Membrane reactors*	*Scale-up criteria for bioreactors based on oxygen transfer and power consumption*	*Continuous process control*	*Product purification- Chromatography*	*Production of vinegar*

Course Code	18CHE371T	Course Name	ELECTROCHEMICAL ENGINEERING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
CLR-1 :	*Understand the concept of electrochemistry*	1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-2 :	*Acquire knowledge on electrochemical processes*																		
CLR-3 :	*Understand the concepts of corrosion and its types*																		
CLR-4 :	*Application of electrochemical concepts on environmental issues*																		
CLR-5 :	*Use of different electrodes and reactors in electrochemical reactor design*																		
CLR -6:	*Expose to the importance of electrochemical process on chemical industries*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (loom)	Expected Proficiency %)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO –3
CLO-1 :	*Derive the relation between emf and rate of reaction*	*2*	*80*	*70*	*M*	*L*	*L*	*L*			*M*		*M*			*M*	*L*	*L*	*L*
CLO-2 :	*Analyze the mass transfer operations in electrochemical process*	*2*	*80*	*70*	*H*	*H*	*H*	*M*			*M*		*H*			*M*	*L*	*M*	*L*
CLO-3 :	*Relate the corrosion phenomenon with electrochemical reactions*	*2*	*75*	*65*	*M*	*L*	*M*	*M*			*H*		*M*			*H*	*L*	*M*	*M*
CLO-4 :	*Able to use electrochemical energy for environmental issues*	*3*	*80*	*75*	*H*	*H*	*H*	*M*			*H*		*H*			*H*	*M*	*L*	*M*
CLO-5 :	*Ability to design the electrochemical reactor*	*3*	*80*	*70*	*H*	*H*	*H*	*H*			*H*		*H*			*H*	*M*	*H*	*H*
CLO-6:	*Design electrochemical process for industrial concerns*	*3*	*70*	*60*	*H*	*H*	*M*	*L*			*H*		*M*			*M*	*L*	*M*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Course introduction*	*Mass transfer in electrochemical systems:*	*Derivation of potential current relations of activities controlled and diffusion controlled corrosion process.*	*Electro deposition*	*Electrodes used in different electrochemical industries*
	SLO-2	*Review basics of electrochemistry*	*Mass transfer in electrochemical systems:*	*Derivation of potential current relations of activities controlled and diffusion controlled corrosion process.*	*Electro deposition*	*Electrodes used in different electrochemical industries*
S-2	SLO-1	*Faraday's law, nernst potential*	*Diffusion controlled electrochemical reaction*	*Potential-ph diagram*	*Electro refining*	*Metals-graphite –lead dioxide –titanium substrate insoluble electrodes*
	SLO-2	*Faraday's law, nernst potential*	*Diffusion controlled electrochemical reaction*	*Potential-ph diagram*	*Electro refining*	*Metals-graphite –lead dioxide –titanium substrate insoluble electrodes*
S-3	SLO-1	*Galvanic cells*	*Importance of convention*	*Forms of corrosion*	*Electroforming*	*Iron oxide –semi conducting type etc.*
	SLO-2	*Galvanic cells*	*Importance of convention*			
S-4	SLO-1	*Polarography*	*Importance of the concept of limiting current*	*Definition, factors and control methods of various forms of corrosion*	*Electro polishing*	*Metal finishing-cell design.*
	SLO-2	*Polarography*	*Importance of the concept of limiting current*	*Definition, factors and control methods of various forms of corrosion*	*Electro polishing*	*Metal finishing-cell design*
S-5	SLO-1	*Electrical double layer*	*Over potential*	*Corrosion control measures industrial boiler water corrosion control*	*Anodizing*	*Types of electrochemical reactors*
	SLO-2	*Electrical double layer*	*Over potential*	*Corrosion control measures industrial boiler water corrosion control*	*Anodizing*	*Types of electrochemical reactors*
S-6	SLO-1	*Role of electrical double layer in electrochemical processes*	*Primary-secondary current distribution*	*Protective coatings*	*Selective solar coatings*	*Batch cell, fluidized bed electrochemical reactor*
	SLO-2	*Role of electrical double layer in electrochemical processes*	*Primary-secondary current distribution*	*Protective coatings*	*Selective solar coatings*	*Batch cell, fluidized bed electrochemical reactor*
S-7	SLO-1	*Electro capillary curve*	*rotating disc electrode*	*Vapor phase inhibitors*	*Primary and secondary batteries*	*filter press cell, Swiss roll cell*

	SLO-2	*Electro capillary curve*	*rotating disc electrode*	*Vapor phase inhibitors*	*Primary and secondary batteries*	*filter press cell, Swiss roll cell*
S-8	SLO-1	*Helmholtz layer*	*Corrosion*	*cathodic protection*	*types of batteries*	*plug flow cell, design equation,*
	SLO-2	*Helmholtz layer*	*Corrosion*	*cathodic protection*	*types of batteries*	*plug flow cell, design equation,*
S-9	SLO-1	*Guoy, Steven's layer, fields at the interface*	*Introduction to corrosion, series and corrosion theories*	*sacrificial anodes –Paint removers*	*Fuel cells*	*Figures of merits of different type of electro chemical reactors.*
	SLO-2	*Guoy, Steven's layer, fields at the interface*	*Introduction to corrosion, series and corrosion theories*	*sacrificial anodes –Paint removers*	*Fuel cells*	*Figures of merits of different type of electro chemical reactors.*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Expose to the importance petrochemical products and feedstock*
CLR-2 :	*Application of different resource for basic petrochemical synthesis process*
CLR-3 :	*Learn the various second generation petrochemical synthesis process*
CLR-4 :	*Understand the process flow diagram of third generation petrochemical process*
CLR-5 :	*Study process flow diagram for polymers production and application*
CLR-6:	*Learn process flow for Agrochemicals and Pharmaceuticals products*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (loom)	Learning 2: Expected Proficiency %)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO –3
CLO-1 :	*Analysis the importance of petrochemicals and growth potential of petrochemical industry*	*5*	*85*	*80*	*L*	*L*	*L*	*L*			*H*					*L*	*H*	*H*	*H*
CLO-2 :	*Develop processes for manufacture of basic petrochemicals from hydrocarbon feedstock*	*2*	*85*	*80*	*H*	*L*	*H*	*M*			*M*					*L*	*H*	*L*	*L*
CLO-3 :	*Familiarize to draw flow diagrams of intermediate petrochemicals production processes*	*2*	*80*	*75*	*H*	*L*	*H*	*M*			*M*					*L*	*M*	*M*	*M*
CLO-4 :	*Ability to draw flow diagram for plastic and resin production process*	*2*	*90*	*85*	*H*	*L*	*H*	*M*			*M*					*L*	*M*	*H*	*M*
CLO-5 :	*Familiarize to drawprocess flow diagram for rubber and fibers production process*	*3*	*85*	*80*	*H*	*L*	*H*	*M*			*M*					*L*	*M*	*H*	*M*
CLO-6:	*Design and analysis the production process for agrochemicals and pharmaceuticals products*	*3*	*90*	*85*	*H*	*L*	*H*	*M*			*M*					*L*	*M*	*M*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Definition of petrochemicals*	*Selection of raw material and process for acetylene synthesis*	*Feed stock and process for acrylonitrile synthesis*	*Classification of industrial important polymers*	*Importance of agrochemicals*
	SLO-2	*History of petrochemical industry*	*Process flow for manufacture of acetylene*	*Process flow for manufacture of acrylonitrile*	*Plastics and its classification*	*Classification of agrochemicals*
S-2	SLO-1	*Overview of petrochemical products*	*Feed stock and process for and process for Ethylene synthesis*	*Selection of raw material and process for ethylene derivative synthesis*	*Selection of raw material and process for polyethylene synthesis*	*Selection of raw material and process for DDT synthesis*
	SLO-2	*Importance of petrochemical*	*Process flow for manufacture of ethylene*	*Process flow for production of ethylene oxide*	*Process diagram for polyethylene production*	*Process flow for production of DDT*
S-3	SLO-1	*Structure of petrochemical industry*	*Application of C1 and C2 petrochemical*	*Industrial application of acrylonitrile*	*Industrial application of polyethylene*	*Feed stock and selection process for parathion synthesis*
	SLO-2	*Feedstock selection for petrochemical*	*Selection of raw material and process for propylene synthesis*	*Selection of raw material and process for propylene oxide synthesis*	*Selection of raw material and process for PVC production*	*Process flow for manufacture of parathion*
S-4	SLO-1	*Petrochemicals from petroleum fractions feedstock*	*Process flow for manufacture of propylene*	*Process flow for manufacture of propylene oxide*	*Process block diagram for PVC production*	*Process flow for manufacture of propylene oxide*
	SLO-2	*Petrochemical industry in india*	*Feed stock and process for butadiene synthesis*	*Raw material and process selection for ethylene chloride synthesis*	*Definition of elastomer and types*	*Importance of detergents*
S-5	SLO-1	*Growth potential of petrochemical in India*	*Process flow for manufacture of butadiene*	*Draw flow diagram for manufacture of ethylene chloride*	*Feed stock and process for synthetic rubber synthesis*	*Classification of detergents*
	SLO-2	*Petrochemical socio-economic Linkage*	*Application of C3 and C4 petrochemical*	*Selection of raw material and process for vinyl acetate synthesis*	*Process flow for manufacture of synthetic rubber*	*Feed stock and process for -anionicdetergents synthesis*
S-6	SLO-1	*Source of petrochemicals*	*Industrial important basic aromatics compounds*	*Manufacture of vinyl acetate*	*Industrial important fibers polymers*	*Block diagram for manufacture of anionicdetergents*
	SLO-2	*Classification of petrochemicals*	*Preparation of raw materials and process for aromatic compound synthesis*	*Feed stock and process for vinyl chloride synthesis*	*Raw material and process condition for nylon synthesis*	*Selection of raw material and process for cationic detergents synthesis*

S-7	SLO-1	*Various petrochemical building block*	*Process flow diagram for manufacture of BTX*	*Process flow for manufacture of vinyl chloride*	*Manufacture of nylon*	*Manufacture of cationic detergents*
	SLO-2	*Petrochemical manufacturing involves building blocks processes*	*Application of BTX petrochemicals*	*Industrial application of ethylene and propylene derivative*	*Industrial application of nylon fibers*	*Raw material and process for non-ionic detergents synthesis*
S-8	SLO-1	*Various basic petrochemicals*	*Industrial important Alcohols*	*Feed stock and process for phenol synthesis*	*Feed stock for polyesters synthesis*	*Process flow for manufacture of non-ionic detergents*
	SLO-2	*Intermediate petrochemical products*	*Process flow for manufacture of methanol*	*Process flow for manufacture of phenol*	*Process flow for manufacture of polyesters*	*Classification of carbon black*
S-9	SLO-1	*Major polymer petrochemical products*	*Process flow for manufacture of ethanol*	*Selection of raw material and process for styrene synthesis*	*Synthetic resins- process for phenol formaldehyde synthesis*	*Various methods of carbon black production*
	SLO-2	*Various uses of petrochemical products*	*Application of methanol and ethanol*	*Process flow for manufacture of styrene*	*Block diagram for manufacture of phenol formaldehyde*	*Application carbon black*

Course Code	18CHE373T	Course Name	FOOD TECHNOLOGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Familiarize general aspects of food industry ,role of chemical engineers in food industry and constituents of food*
CLR-2 :	*Study the unit operations used in food processing*
CLR-3 :	*Know about the food deterioration, preservation and packing method*
CLR-4 :	*Learn the different food products*
CLR-5 :	*Learn about the packing methods and waste disposal*
CLR-6 :	*Production Processing and Preservation of food*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (loom)	Learning 2 Expected Proficiency %)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO –3
CLO-1 :	*Know about the general aspects of food industry ,role of chemical engineers in food industry and constituents of food*	1	80	70	L	M	L	M		L	H	H	L	M			H	L	L
CLO-2 :	*Acquire a knowledge about the different types unit operations used in food processing industry*	1	80	75	M	M	M	M		L	M	M		M			H	M	H
CLO-3 :	*Control the food deterioration by the way of preservation and packing method*	1	80	75	H	H	M	M	M	M	H	M	H	M			H	H	H
CLO-4 :	*Understand the technology involved in different food products*	2	80	70	M	M	M	L		M	H	M	H	M			H	M	H
CLO-5 :	*Apply the knowledge gained to provide suitable packing methods to improve the shelf life of the product and able dispose the waste in properway.*	1	80	75	H	M	M	L	M	M	H	H	M	M			H	H	H
CLO-6 :	*Able to produce process and preserve food products*	1	70	70	H	M	M	M	M	M	H	H	M	M			H	H	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*INTRODUCTION Characteristics of food industry and role of Engineers*	*UNIT OPERATION IN FOOD PROCESSING Material handling; Heat exchanging*	*DETERIORATION AND PRESERVATION Deteriorative factors and their control*	*FOOD PRODUCTS Bakery, confectionary and chocolate products*	*PACKING METHODS AND WASTE DISPOSAL Principles of food packaging-*
S-2	SLO-1	*Constituents of food- Carbohydrates, Proteins*	*Heating, Cooling*	*Kinetics of chemical reactions in foods*	*Bakery, confectionary and chocolate products*	*Requirements of effective food packaging,*
S-3	SLO-1	*Constituents of food- Carbohydrates, Proteins*	*Heating, Cooling*	*Preservation by heat and cold*	*Soft and alcoholic beverages*	*Types of containers,*
S-4	SLO-1	*Fats and Oils and additional food constituents*	*Evaporation, Drying*	*Preservation by heat and cold*	*Soft and alcoholic beverages*	*Food packaging materials and forms,*
S-5	SLO-1	*Nutritive aspects of food constituents*	*Evaporation, Drying*	*Dehydration, concentration*	*Dairy products*	*Food packaging materials and forms*
S-6	SLO-1	*Nutritive aspects of food constituents*	*Forming, Packaging, Controlling*	*Dehydration, concentration*	*Dairy products*	*Package testing, Packages with special features.*
S-7	SLO-1	*Food additives*	*Forming, Packaging, Controlling*	*drying*	*Meat, Poultry and fish products*	*Package testing, Packages with special features.*
S-8	SLO-1	*Quality factors in foods and Quality standards*	*Overlapping unit operations*	*Irradiation, Microwave heating*	*Cereal, grains, pulses*	*Factory Hygiene*
S-9	SLO-1	*Quality factors in foods and Quality standards*	*Energy conservation and new processes*	*Irradiation, Microwave heating*	*vegetables, fruits, and spices*	*Wastewater disposal and pollution control in food industry*

Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Review the Numerical methods for solving the different type of equations.*
CLR-2 :	*Familiarize to solve the non-linear algebraic equation, linear simultaneous algebraic equation, Integration, Ordinary differential equation and partial differential equation using numerical methods.*
CLR-3 :	*Apply the conservation of mass and energy equation for simple chemical engineering systems.*
CLR-4 :	*Analyze the limitations and rate of convergence for different numerical methods.*
CLR-5 :	*Compare the different numerical methods with analytical solution.*
CLR-6:	*Familiarize to solve the mathematical model equation in chemical engineering system*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (loom)	Expected Proficiency %)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO –3
CLO-1 :	*Apply the root finding methods for solving the non-linear algebraic equations in thermodynamics and fluid mechanics.*	*3*	*80*	*70*	*H*	*H*	*L*	*M*											
CLO-2 :	*Analyze the numerical methods for solving the linear simultaneous algebraic equations in chemical reaction engineering and process heat transfer.*	*3*	*80*	*70*	*H*	*H*	*L*	*M*										*L*	
CLO-3 :	*Apply the numerical integration for solving the chemical engineering problems in chemical reaction engineering and mass transfer application.*	*3*	*75*	*70*	*H*	*H*	*L*	*H*										*L*	
CLO-4 :	*Apply the curve fitting methods to get the batch kinetics parameters using batch reactor data.*	*3*	*80*	*70*	*H*	*H*	*L*	*L*

CLO-6:	*Solve any mathematical equations involved in engineering problems*				*H*	*H*	*H*	*H*										*L*	

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Review the root finding methods: Regula-Falsi and Newton Raphson method*	*Review the methods for solving the linear simultaneous algebraic equations*	*Review the methods for solving the Integration equations*	*Review the Taylor series, Euler's method with examples*	*Review the Finite Difference Method for solving the Partial Differential Equations*
S-2	SLO-1	*Review the phase equilibrium in ideal solutions*	*Review the material and energy balance concept without reaction*	*Rate of drying from batch drying data*	*Review the Runga-Kutta method with examples*	*Steady state one dimensional heat transfer problem*
S-3	SLO-1	*Boiling point of ideal solution using thermodynamics iteration method*	*Review of material balance with reaction*	*Determination of drying time from batch drying data using Trapezoidal multistage rule*	*Estimate the concentration of species in unsteady state of mixing tank*	*Unsteady steady state one dimensional heat transfer problem*
S-4	SLO-1	*Boiling point of ideal solution using Newton Raphson method*	*Continuous Stirred Tank reactor with multiple reaction using Gauss-Siedel method*	*Determine the volume of single reactor using Simpson's rule*	*Solve the ODE in batch reactor using Euler's method*	*Steady state two-dimensional heat transfer problem*
S-5	SLO-1	*Dew point of ideal solution using Newton Raphson method and plot the T-x-y diagram*	*Cascade Continuous Stirred Tank Reactors with single reaction using Gauss Elimination method*	*Determine the volume of cascade flow reactors using Trapezoidal Multistage method*	*Solve the ODE in Continuous stirred tank reactor with multiple reaction*	*Convective Diffusion problems*
S-8	SLO-1	*Review the flash vaporization algorithm*	*Review of single and multiple stage liquid – liquid extraction*	*Recap the integral methods to estimate the chemical kinetic parameter (order and rate constant) using batch kinetic data*	*Solve the ODE in heat conduction problems using R-K method*	*Convective Diffusion problem*
	SLO-2	*Flash vaporization calculation using Newton Raphson method*	*Estimate the composition of extract in each stage using Gauss Elimination method*	*Differential method to estimate the chemical kinetic parameters*	*Solve the ODE in Continuous stirred tank without reaction using Euler's method*	*One dimensional steady state mass transfer*
S-9	SLO-1	*Recap the equation of state and density of gas mixture*	*Review of single and multi-stage evaporators*	*Determine the order and rate constant using polynomial curve fitting combined with Least Square method.*	*Concentration profile along the reactor length in isothermal plug flow reactor using Euler's method*	*Stability analysis of finite difference schemes to PDE*
	SLO-2	*Estimate the molar volume of liquid and vapor using Newton Raphson method*	*Estimate the area of multi-stage evaporator using explicit method.*	*Curve fitting in heat conduction problems*	*Temperature profile in plug flow reactor*	*Unsteady state heat transfer problem.*

Course Code	18CHE375T	Course Name	INTRODUCTION TO PROCESS PLANT SIMULATION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Chemical Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Overview of mathematical modeling of various chemical engineering systems*
CLR-2 :	*Understand the modular approaches in process plant simulation*
CLR-3 :	*Understand the various tearing algorithms in process plant simulation*
CLR-4 :	*learnt the convergence promotion methods involved in process simulation*
CLR-5 :	*Evaluate the individual equipment simulation using commercial software*
CLR-6:	*Hand-on-training for plant simulation using commercial software*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (loom)	2 Expected Proficiency %)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO –3
CLO-1 :	*Propose the mathematical model equation for chemical engineering equipment*	1	80	70	H	H	H		H								H	L	
CLO-2 :	*Solve the model equations using sequential modular approaches*	2	80	70	H	H	L		H								H	H	L
CLO-3 :	*Solve the model equations using equation solving approach*	2	70	65	H	H	L		H								H	H	
CLO-4 :	*Apply the convergence promotion for minimize the total time required for simulation*	2	80	70	H	H	L		H								H	H	
CLO-5 :	*Perform the process plant simulation using commercial software*	2	70	65	H	H	H	L	H						M		M	L	
CLO-6:	*Process plant simulation using commercial software*	2	75	65	H	H	H	M									H	M	L

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to process synthesis and analysis*	*Modular approaches – Analysis Vs Design mode*	*Decomposition of Networks*	*Convergence promotion scheme and Newton's method*	*Cascade simulations*
S-2	SLO-1	*Process plant simulation*	*Sequential modular approaches*	*Tearing Algorithms in decomposition of networks*	*Direct substitution*	*Steady state simulation: Ammonia synthesis reactor simulation*
S-3	SLO-1	*Modeling Aspects*	*Simultaneous modular approaches*	*Digraphs and signal flow graph*	*Wegstein's method*	*Simulation results and discussion*
S-4	SLO-1	*Classification of Mathematical Modeling.*	*Tearing a system of equations*	*BM Algorithm*	*Dominant Eigen value method*	*Steady state simulation of thermal cracking operation*
S-5	SLO-1	*Artificial Neural Networks*	*Equation Solving approach*	*BTA and K & S Algorithms*	*Quasi-Newton methods*	*Simulation results and discussion*
S-6	SLO-1	*steady state single and two stage solvent extraction*	*Precedence – ordering of equation sets*	*M&H Algorithms*	*Criterion for acceleration*	*Design of Shell-and -Tube Heat Exchanger*
S-7	SLO-1	*Unsteady-state mass balance in a mixing tank*	*Disjointing, PTM*	*Related problems*	*Introduction to application of flow sheeting software*	*Simulation results and discussion*
S-8	SLO-1	*Unsteady state steam heating of a liquid*	*The SWS and Rudd-Algorithm*	*Comparison of various Tearing Algorithms*	*Steady state simulations for single equipment*	*Steady state simulation of pyrolysis of Biomass*
S-9	SLO-1	*Degree of freedom for equipment*	*Direct methods and iterative methods*	*Linear and non-linear equations.*	*Dynamics simulations for single equipment*	*Simulation results and discussion*
	SLO-2	*Degree of freedom for process flow sheet.*

ACADEMIC CURRICULA

Professional Elective Courses

CIVIL ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18CEE301T	Course Name	FOUNDATION ENGINEERING AND DESIGN	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CIVIL ENGINEERING	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understanding the essential steps involved in a Geotechnical Investigation*
CLR-2 :	*Analyze the principle types of foundation and the factors governing the choice of the most suitable type of foundation.*
CLR-3 :	*Get exposed to determination of bearing capacity of shallow foundation*
CLR-4 :	*Analyze the cause and remedial measures for settlement and slope failure*
CLR-5 :	*Get an insight into the load carrying capacity of pile foundation in the field condition*
CLR-6 :	*Understand and analyse the concept of earth pressure*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Identify the soil characteristics through geotechnical investigation*	2	85	80	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-2 :	*Proper type of foundation is chosen depending upon the soil condition*	2	85	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-3 :	*Compute g the bearing capacity of shallow foundation*	2	80	75	H	H	-	H-	-	-	-	-	-	-	-	-	H	-	-
CLO-4 :	*Utilize the proper measures for reducing the settlement and slope failure*	2	85	80	H	H	-		-	-	-	-	-	-	-	-	H	-	-
CLO-5 :	*Utilize the proper type of pile in the field*	2	85	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	-
CLO-6 :	*Estimate of earth pressure for different soil condition*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Site investigation, soil Exploration*	*Definition: Foundation, purpose of foundation.*	*Combined footing - types*	*Deep foundation – Necessity. Pile Foundations classification*	*Lateral Earth Pressures Theories-Introduction:*
	SLO-2	*Planning and stages in site investigation*	*Definition: Shallow Foundation – classification. Ultimate, gross, net, safe bearing capacity. safe and allowable bearing pressure*	*Combined footing - types*	*Pile Foundations – classification*	*applications of earth pressure theories*
S-2	SLO-1	*Soil exploration – Methods – direct, semi-direct and indirect method*	*Bearing capacity failure - modes of shear failures – general, local and punching shear failure*	*Method of proportioning – Rectangular footing*	*Load carrying capacity of pile – Methods*	*Different types of earth pressure at rest, active and passive pressure*
	SLO-2	*Direct method – test pit, trenches*	*Factors affecting bearing capacity*	*Method of proportioning – Rectangular footing*	*Dynamic method – ENR, and Hiley's - Problems*	*Different types of earth pressure at rest, active and passive pressure*
S-3	SLO-1	*Indirect methods. Geophysical methods- Seismic Refraction Method*	*Bearing capacity determinations – Methods.*	*Method of proportioning – Trapezoidal footing*	*Static method – all type of soils - problems*	*Rankine's Earth Pressure Theory, active earth pressure and passive earth pressure for horizontal backfill for cohesion-less soil*
	SLO-2	*Geophysical methods- Electrical Resistivity Method*	*Terzaghi theory – Assumption.*	*Method of proportioning – Trapezoidal footing*	*Static method – all type of soils - problems*	*Rankine's Earth Pressure Theory, active earth pressure and passive earth pressure for horizontal backfill for cohesion-less soil*
S-4	SLO-1	*Indirect method – SPT*	*Bearing capacity – Strip and Square foundation*	*Combined footing - problems*	*Static method – all type of soils - problems*	*Rankine's Earth Pressure Theory, active earth pressure and passive earth pressure for horizontal backfill for cohesion-less soil-Problems*
	SLO-2	*Indirect method – SPT*	*Bearing capacity – Circular and Rectangular foundation*	*Combined footing - problems*	*Static method – all type of soils - problems*	*Rankine's Earth Pressure Theory, active earth pressure and passive earth pressure for horizontal backfill for cohesion-less soil-Problems*
S-5	SLO-1	*Indirect method – DCPT*	*Bearing capacity – effect of water table*	*Settlement – total and differential settlement.*	*Pile load capacity – penetration test results*	*Rankine's Earth Pressure Theory, active earth pressure and passive earth pressure for horizontal backfill for cohesive soils.*

	SLO-2	*Indirect method –SCPT*	*Bearing capacity – effect of water table*	*Settlement – total and differential settlement.*	*Pile load capacity – penetration test results*	*Rankine's Earth Pressure Theory, active earth pressure and passive earth pressure for horizontal backfill for cohesive soils*
S6	SLO-1	*Semi direct method Borings – auger*	*Bearing capacity - problems*	*Causes and methods to minimize the total settlement*	*Pile group – efficiency - problems*	*Rankine's Earth Pressure Theory, active earth pressure and passive earth pressure for horizontal backfill for cohesive soils-Problems*
	SLO-2	*Semi direct method Borings –shell and auger*	*Bearing capacity - problems*	*Causes and methods to minimize the total settlement*	*Pile group – efficiency - problems*	*Rankine's Earth Pressure Theory, active earth pressure and passive earth pressure for horizontal backfill for cohesive soils-Problems*
S-7	SLO-1	*Semi direct method Borings – wash boring and rotary drilling*	*Bearing capacity - problems*	*Causes and methods to minimize the differential settlement*	*Pile group – efficiency - problems*	*Earth pressure theories – Graphical method*
	SLO-2	*Semi direct method Borings – percussion method*	*Bearing capacity - problems*	*Causes and methods to minimize the differential settlement*	*Pile group – efficiency - problems*	*Earth pressure theories – Graphical method*
S-8	SLO-1	*Number and deposition of trail pits and borings*	*Hansen and IS code method*	*Slopes – types – Causes of slope failure*	*Pile load test : Types - Load carrying capacity of pile, under-reamed pile and pile group*	*Rebhann's Construction for Active Pressure*
	SLO-2	*Bore log details*	*Bearing capacity from Penetration test results*	*Methods to minimize the slope failure*	*load test as per BIS – estimation of load carrying capacity*	*Rebhann's Construction for Active Pressure*
S-9	SLO-1	*Soil Sample ; UDS*	*Bearing capacity : Plate load test as per BIS ,*	*Slope stability – methods - Swedish Method of Slice for a Cohesive-frictional Soil*	*Problems in pile load test.*	*Culmann'sgraphical solutions for active and passive case*
	SLO-2	*Soil Sample ; DS*	*limitations and estimation of settlements - Performance of foundation*	*Slope stability – methods - Swedish Method of Slice for a Cohesive-frictional Soil*	*Negative skin friction*	*Culmann'sgraphical solutions for active and passive case*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Planning of subsurface investigation*	*Terzaghi's theory of one dimensional consolidation*	*Stress and strain behavior of soil*	*Bearing capacity and settlement analysis of shallow foundations: Modes of failure*	*Pile foundation: Functions*
	SLO-2	*Purpose and scope*	*Terzaghi's theory of one dimensional consolidation*	*Stress and strain behavior of soil*	*Bearing capacity and settlement analysis of shallow foundations: Modes of failure*	*Pile foundation: Functions*
S-2	SLO-1	*Influence of soil conditions on exploratory program*	*Derivation of Terzaghi's equation (solution in detail need not be covered)*	*Triaxial test -drained and un-drained behavior of sand*	*Failure criteria, Prandtl Reissner Method, Assumptions - Estimation of ultimate loads,*	*Types of pile foundations*
	SLO-2	*Type of foundation on exploratory program*	*Derivation of Terzaghi's equation (solution in detail need not be covered)*	*Triaxial test -drained and un-drained behavior of sand*	*Failure criteria, Prandtl Reissner Method, Assumptions - Estimation of ultimate loads,*	*Types of pile foundations*
S-3	SLO-1	*Subsurface soundings –Static methods*	*Estimation of Cc and Cv from laboratory tests*	*Triaxial test -drained and un-drained behavior of clays*	*Terzaghi solution, Assumptions - Estimation of ultimate loads*	*Pile load tests, Use of load tests*
	SLO-2	*Subsurface soundings –Static methods*	*Estimation of Cc and Cv from laboratory tests*	*Triaxial test -drained and un-drained behavior of clays*	*Terzaghi solution, Assumptions - Estimation of ultimate loads*	*Pile load tests, Use of load tests*
S-4	SLO-1	*Subsurface soundings – Dynamic methods*	*Estimation of Cc and Cv from laboratory tests*	*Failure criteria in soils –only Mohr – Coulomb's criteria*	*Estimation of ultimate loads- Effect of shape,*	*Methods of estimation of pile load capacity- Static and dynamic*
	SLO-2	*Subsurface soundings – Dynamic methods*	*Estimation of Cc and Cv from laboratory tests*	*Failure criteria in soils –only Mohr – Coulomb's criteria*	*Estimation of ultimate loads- Effect of shape,*	*Methods of estimation of pile load capacity- Static and dynamic*
S-5	SLO-1	*Planning of subsurface investigations*	*Estimation of Pc by various methods*	*Ideal, plastic and real soil behavior*	*Estimation of ultimate loads- embedment of footing*	*Estimation of single pile capacity by static*
	SLO-2	*Planning of subsurface investigations*	*Estimation of Pc by various methods*	*Ideal, plastic and real soil behavior*	*Estimation of ultimate loads- embedment of footing*	*Estimation of single pile capacity by static*
S6	SLO-1	*Planning of subsurface investigations*	*Field consolidation curves*	*Shear strength of sand and clays*	*Estimation of ultimate loads- eccentricity in loading*	*Estimation of single pile by dynamic methods*
	SLO-2	*Planning of subsurface investigations*	*Field consolidation curves*	*Shear strength of sand and clays*	*Estimation of ultimate loads- eccentricity in loading*	*Estimation of single pile by dynamic methods*
S-7	SLO-1	*Type and sequence of operations*	*Quasi pre-consolidation*	*Estimation of stresses: Boussinesq's theory*	*Compressibility (including critical rigidity index), Choice of factor of safety, Settlement of foundations on sand –*	*Group capacity of piles*

					Schmertmann method	
	SLO-2	*Type and sequence of operations*	*Quasi pre-consolidation*	*Estimation of stresses: Boussinesq's theory*	*Compressibility (including critical rigidity index), Choice of factor of safety, Settlement of foundations on sand – Schmertmann method*	*Group capacity of piles*
S-8	SLO-1	*Lateral extent and depth of exploration*	*Quasi Secondary consolidation*	*Estimation of stresses: Westergard's theory*	*Foundations on collapsing and swelling soils, non-uniform soils, compressible soils and on rock*	*Separation of skin friction and end bearing capacity*
	SLO-2	*Lateral extent and depth of exploration*	*Quasi Secondary consolidation*	*Estimation of stresses: Westergard's theory*	*Foundations on collapsing and swelling soils, non-uniform soils, compressible soils and on rock*	*Separation of skin friction and end bearing capacity*
S-9	SLO-1	*Interpretation of field and laboratory data*	*Practical applications*	*Estimation of stresses: Newmark's charts*	*Design of isolated and combined footings*	*Settlement of single and group of piles.*
	SLO-2	*Interpretation of field and laboratory data*	*Practical applications*	*Estimation of stresses: Newmark's charts*	*Design of isolated and combined footings*	*Settlement of single and group of piles.*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the need for ground improvement*
CLR-2 :	*Understand the techniques adopted for ground improvement with respect to hydraulic modification*
CLR-3 :	*Identify conceptual and practical understanding of in-situ soil densification techniques*
CLR-4 :	*Familiarize with soil chemical modification techniques and acquaintance with emerging technologies*
CLR-5 :	*Understand the mechanism and concept related to soil modification by reinforcements*
CLR-6 :	*Recommend and design cost effective ground improvement techniques for difficult practical soil conditions*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Gain a thorough knowledge on the role of ground improvement techniques in the infrastructure development*	2	85	80	H	L	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-2 :	*Recommend hydraulic modification techniques for related problems*	2	85	75	H	M	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-3 :	*Apply densification techniques for loose sand deposits and alternative techniques for soft clay deposits*	2	80	75	H	M	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-4 :	*Recommend additives and frame soil chemical modification schemes for stabilizing problematic soil*	2	85	80	H	M	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-5 :	*Design geotechnical structures using reinforcements like reinforced earth retaining walls, slopes, foundations etc.,.*	3	85	75	H	H	-	M	-	-	-	-	-	-	-	-	H	-	-
CLO-6 :	*Recommend design efficient and economic alternatives using ground improvement techniques for problematic and difficult sites*	3	80	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction-Ground improvement techniques*	*Hydraulic modification-concept and principle*	*In-situ densification of cohesionless soil*	*Grouting -introduction*	*Soil reinforcement concepts*
	SLO-2	*Role of ground improvement techniques in foundation engineering*	*Dewatering -objectives -types*	*Various Methods and mechanism involved*	*Necessity types of grout-suspension-solution grouts*	*Principle and mechanism*
S-2	SLO-1	*Objectives and scope of ground improvement techniques*	*Dewatering Techniques -well points system*	*Consolidation of cohesive soil-types*	*Functions of grouting-permeation*	*Reinforced earth retaining structures-various applicability in geotechnical engineering*
	SLO-2	*Classification of techniques adopted*	*Installation -mechanism and suitability of soil*	*Properties and behaviour*	*Functions-Compaction-hydro fracture*	*Embankments -slopes etc..*
S-3	SLO-1	*Hydraulic-Mechanical-Chemical-Reinforcement*	*Dewatering methods-Ditches*	*Vibrofloatation techniques*	*Grouting equipment and methods*	*Types of reinforcing materials*
	SLO-2	*Choice of method of ground improvement techniques*	*Dewatering methods-Sumps*	*Dry feed method-wet feed method*	*Grouting with soil, bentonite*	*Natural and manmade materials*
S-4	SLO-1	*Geotechnical problems in Lateritic soil*	*Dewatering methods -Vacuum method.*	*Sand compaction piles*	*Grouting with cement mixes*	*Geosynthetics-types*
	SLO-2	*Properties and behavior and techniques adopted*	*Dewatering methods-Electroosmotic method*	*Installation techniques*	*Mechanism and concept*	*Geotextile-geogrids-geonets*
S-5	SLO-1	*Geotechnical problems in Alluvial soil*	*Seepage analysis of 2-dimensional flow-concepts*	*Deep compaction -dynamic compaction -blasting technique*	*Grout injection methods*	*Functions of geosynthetics*
	SLO-2	*Properties and behavior and techniques adopted*	*Theory and problems*	*Concepts and factors influencing*	*grout monitoring schemes*	*Filtration, drainage*
S6	SLO-1	*Geotechnical problems in Black Cotton soil*	*Seepage analysis-fully penetrated slot*	*Stone columns -installation*	*Civil engineering application of grouting techniques*	*Geosynthetics-Reinforcement*
	SLO-2	*Properties and behavior and techniques adopted*	*Theory and problems*	*Mechanism*	*Some of the field studies*	*Separation function -Geotechnical field application*

S-7	SLO-1	Selection of suitable ground improvement techniques based on soil condition	Preloading-concept	Design criteria	Stabilization -concept	Geomembranes-containments
	SLO-2	Some field conditions for practical applicability	Field applicability	Stone column- soil criteria-field application	Stabilization of expansive soil	Barriers- field application
S-8	SLO-1	Use of Piezometers	Vertical drains-sand drains	Lime columns-applicability	Lime stabilization-concept-suitability criteria	Current practices-geosynthetics
	SLO-2	Field applications	Installation and mechanism	Soil criteria-mechanism involved	Mechanism involved	Field application reinforcement
S-9	SLO-1	Use of inclinometers	Prefabricated vertical drains	Field application	Cement stabilization -concept-suitability criteria	Geosynthetics in field applications
	SLO-2	Field applications	Installation and mechanism	Installation -mechanism	Mechanism involved	Introduction of ground anchors

Course Code	18CEE305J	Course Name	CONCRETE TECHNOLOGY	Course Category	E	Professional Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	IS 10262: 2019 and IS 456: 2000		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand and test the properties of materials constitutes concrete*
CLR-2 :	*Understand about chemical and mineral admixtures used in concrete. Also understand and test fresh concrete properties*
CLR-3 :	*Know and understand the properties of concrete in hardened state*
CLR-4 :	*Know and understand the durability properties of concrete and special concrete*
CLR-5 :	*Understand the importance of concrete mix design*
CLR-6 :	*Understand the process involved in manufacture of concrete*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Test and study the properties of cement, aggregates and water*	3	80	75	H	M	-	-	-	-	-	-	-	-	-	-	L	H	M
CLO-2 :	*Know the effects of admixtures in concrete and test the fresh concrete properties*	3	85	75	H	M	-	-	-	-	-	-	-	-	-	-	L	H	M
CLO-3 :	*Test the hardened concrete properties*	3	75	75	H	M	-	-	-	-	-	-	-	-	-	-	L	H	M
CLO-4 :	*Understand the importance of durability of concrete and properties of special concrete*	3	90	80	H	L	-	-	-	-	-	-	-	-	-	-	L	H	M
CLO-5 :	*Design the concrete mix without and with admixtures*	3	85	75	H	H	H	-	-	-	-	-	-	-	-	-	M	H	M
CLO-6 :	*Know the various stages of manufacture of concrete*	3	80	75	H	L	-	-	-	-	-	-	-	-	-	-	L	H	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*CONCRETE CONSTITUENTS MATERIALS Overview. Cement, brought up, invention, chemical composition, oxide composition, limits and role.*	*ADMIXTURES Overview –Chemical and mineral admixtures – additive – plasticizers – definition – situation need high workability – effects of plasticizer in concrete.*	*HARDENED CONCRETE Test – purpose – density - compressive strength test.*	*DURABILITY OF CONCRETE Definition - significance – permeability – reasons for permeability in actual structures.*	*CONCRETE MIX DESIGN Definition – Principle of mix design – Factors choice of mix proportion – Properties of concrete related to mix design.*
	SLO-2	*Hydration - Bogue's compound – types of cement.*	*Super plasticizers – effects in – fresh and hardened concrete.*	*Factors affects strength of concrete. Failure of compression specimen.*	*Joints in concrete – classifications.*	*Physical properties of materials required for mix design.*
S-2	SLO-1	*Properties of cement - Tests on cement – field.*	*Accelerators – accelerating plasticizer.*	*Flexural strength – central point load.*	*Concrete subjected to high temperature.*	*Nominal and design mix – variables in mix design.*
	SLO-2	*Laboratory tests – fineness – specific gravity – procedures.*	*Retarders – use – materials. Water proofers.*	*Flexural strength –third point load.*	*Freezing and thawing.*	*Objective of mix design – List of methods of mix design. Basic steps — Information required for mix design.*
S-3	SLO-1	*Determination of fineness of cement and normal consistency of cement practically in lab.*	*Determination of soundness of cement (Demo only) practically in lab.*	*Determination of crushing strength of coarse aggregate practically in lab.*	*Determination of flakiness and elongation index of coarse aggregate practically in lab.*	*Determination of flexural strength of concrete practically in lab.*
	SLO-2					
S-4	SLO-1	*Consistency - setting time of cement – initial and final setting time.*	*Fly ash – characteristics – use – classification –effects in fresh and hardened concrete.*	*Indirect tension test.*	*Sulphate attack – methods to control.*	*Indian standard method of mix design - Step by step mix design procedure.*
	SLO-2	*Soundness and strength of cement.*	*Silica fume – characteristics – effects in fresh and hardened concrete.*	*Stress – strain curve.*	*Acid attack – concrete in sea water.*	*Mix design example : Without admixture*
S-5	SLO-1	*Aggregates – classification – source - size – shape – texture.*	*GGBS - effects in fresh and hardened concrete – uses.*	*Modulus of elasticity –determination.*	*Carbonation - factors.*	*Mix design examples: With chemical admixture and mineral admixture*
	SLO-2	*Properties of aggregates and tests: Crushing – 10% fines – impact.*	*Metakaolin – application – advantages – uses.*	*Different elastic moduli.*	*Chloride attack – limits of chloride.*	

S-6	SLO-1	*Determination of initial setting time of cement and final setting time (Demo only) - practically in lab.*	*Determination of fineness modulus of coarse aggregate practically in lab.*	*Determination of impact resistance of coarse aggregate practically in lab.*	*Compressive strength of bricks and concrete cubes practically in lab.*	*Determination of split tensile strength of concrete practically in lab.*
	SLO-2					
S-7	SLO-1	*Abrasion – bulk density – specific gravity Absorption and moisture content – bulking.*	*FRESH CONCRETE Workability –factors – tests.*	*Impact resistance test – Impact energy.*	*Effects of some materials on durability.*	*MANUFACUTRE OF CONCRETE Process – various stages of manufacture of concrete.*
	SLO-2	*Soundness – flakiness index – elongation index.*	*Slump and compaction factor tests.*	*Impact energy calculation*	*Surface treatments of concrete – materials used.*	*Batching – mixing*
S-8	SLO-1	*Grading – sieve analysis – fineness modulus.*	*Segregation – types – conditions – remedies.*	*Shrinkage – classifications – factors affect.*	*Concrete permeability test - Rapid chloride penetration test.*	*Transporting – Methods adopted for transportation of concrete.*
	SLO-2	*Water – quality – quantity.*	*Bleeding – effects – test.*	*Creep – definition – measurement of creep – factors affect.*	*Introduction to special concretes.*	*Placing – compacting - curing – finishing.*
S-9	SLO-1	*Determination of specific gravity of cement, fine and coarse aggregate practically in lab*	*Determination of bulking of sand practically in lab.*	*Determination of abrasion resistance of coarse aggregate practically in lab.*	*Workability of concrete – slump – compaction factor test practically in lab.*	*Determination of impact strength of concrete practically in lab.*
	SLO-2

		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Know and utilize the concepts of prestress concrete to analyseprestress concrete sections*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLR-2 :	*Know and understand the different losses of prestress and anchorage zone stress to design*																		
CLR-3 :	*Understand flexural failure types and to analyze and also to design flexural and tension members*																		
CLR-4 :	*Understand shear strength analyze and also to design for shear. Also to analyze due to torsion*																		
CLR-5 :	*Know the design concept of prestressed concrete one way and two way slab*																		
CLR-6 :	*Know the design concept of prestressed concrete flat slab*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*																		
CLO-1 :	*Analyze the prestress concrete sections using different concepts*	3	80	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	M
CLO-2 :	*Analyze the different losses of prestress and anchorage zone stress to design*	3	85	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	M
CLO-3 :	*Analyze and design of prestressed concrete flexural and tension members*	3	75	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	M
CLO-4 :	*Analyze and design of prestressed concrete for shear and also analyze due to torsion*	3	90	80	H	H	-	H	-	-	-	-	-	-	-	-	H	-	M
CLO-5 :	*Design the prestressed concrete one way and two way slab*	3	85	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	M
CLO-6 :	*Design the prestressed concrete flat slab*	3	80	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*PRESTRESSED CONCRETE Introduction - Basic concept – Principle of prestressing – Materials.*	*LOSSES OF PRESTRESS Nature of losses of prestress – types of losses of prestress in – pre and post tensioning.*	*FLEXURAL STRENGTH ANALYSIS Flexural failure - control parameters.*	*SHEAR STRENGTH ANALYSIS Shear and principal stresses – maximum and minimum principal stresses.*	*PRESTRESSED CONCRETE SLAB Slabs types –cross section of floor panels.*
	SLO-2	*Forms of steel – systems of prestressing*		*Types of flexural failure.*	*Eliminate diagonal tension cracks - improvement of shear resistance.*	
S-2	SLO-1	*Types of prestressing – uses of prestressed concrete.*	*Loss due to elastic deformation*	*Indian code provisions – moment of resistance – bonded tendons only.*	*Example without and with axial prestress*	*Design of one-way slab*
	SLO-2	*Materials – concrete strength limitation – requirements of steel for prestressed concrete.*	*Example*	*Rectangular section*		
S-3	SLO-1	*Analysis – basic assumptions.*	*Loss due to shrinkage and creep of concrete*	*Examples*	*Example with curved cable and vertical cable.*	*Example*
	SLO-2	*Concentric and eccentric tendons – resultant stresses – at transfer – at service. Concepts of prestressing – rectangle – symmetrical I-section only.*	*Example*			
S-4	SLO-1	*Stress concept*	*Loss due to relaxation of steel – friction – anchorage slip.*	*T – Sections. Neutral axis – within the flange – outside the flange.*	*DESIGN FOR SHEAR Types of shear cracks – sections uncracked in flexure – sections cracked in flexure.*	*Example*
	SLO-2		*Example*	*Examples*	*Design of shear reinforcement*	
S-5	SLO-1	*Stress concept – examples*	*ANCHORAGE ZONE STRESSES Anchorage zone – nature of stresses – objective.*	*DESIGN FOR FLEXURE Stress conditions - minimum section modulus – critical combinations – four fundamental conditions – at transfer – at service loads.*	*Examples*	*Design of two-way slab*

	SLO-2		Stress distribution in end block – single and double anchor plates – ideal stress distribution.	Minimum prestressing force – maximum eccentricity.		
S-6	SLO-1	Stress concept - examples	Effect of transverse tensile stress	Examples	Examples	Example
	SLO-2		Analysis of anchorage zone stress – methods (names only)			
S-7	SLO-1	Strength concept - examples	Indian standard method of analysis of anchorage zone stresses	Examples	TORSION ANALYSIS Shear stress due to torsion - circular – rectangle – T –section and box section.	Design of simple flat slab
	SLO-2					
S-8	SLO-1	Load balancing concept – cable profile – reaction – equivalent loads.	Examples	DESIGN OF TENSION MEMBER Determination of area of concrete	Examples	Example
	SLO-2			Load factor – cracking and collapse		
S-9	SLO-1	Load balancing concept – examples.	Design of anchorage zone.	Example	Examples	Example
	SLO-2		Example

Course Code	18CEE307T	Course Name	DESIGN OF EARTHQUAKE RESISTANT STRUCTURES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	IS 1893 (Part 1):2016, IS 13920 : 2016		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the principles of structural dynamics with regard to Single Degree Of Freedom (SDOF) system.*
CLR-2 :	*Extension of understanding of SDOF system to Multi Degree Of Freedom System (MDOF) with emphasis on two degree of freedom system.*
CLR-3 :	*Understand the fundamentals of earthquake forces.*
CLR-4 :	*Apply structural dynamics principles to the analysis of structures subjected to earthquake forces.*
CLR-5 :	*Design earthquake resistant moment resistant frames / shear walls with emphasis on ductile detailing.*
CLR-6 :	*Understand the modern concepts in the design of earthquake resistant structures using isolation techniques.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Analyze single degree moment resistant frame for free and forced vibrations*	3	80	80	H	H	-	H	-	-	-	-	-	-	-	-	H	-	-
CLO-2 :	*Analyze two degree moment resistant frame for free vibrations using modal superposition method*	3	75	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	-
CLO-3 :	*Calculate base shear using equivalent static method as per IS 1893*	3	90	85	H	H	H	H	-	-	-	-	-	-	-	L	H	-	-
CLO-4 :	*Calculate base shear using response spectrum method as per IS 1893*	3	85	80	H	H	H	H	-	-	-	-	-	-	-	L	H	-	-
CLO-5 :	*Apply the provisions of IS13920 to structures*	3	90	80	H	M	M	M	-	-	L	-	-	-	-	L	H	-	-
CLO-6 :	*Suggest isolation systems for earthquake resistance*	3	75	75	H	L	L	L	-	-	L	-	-	-	-	-	M	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*SINGLE DEGREE OF FREEDOM SYSTEM (SDOF)* *Introduction to Systems with single degree of freedom*	*MULTI-DEGREE OF FREEDOM SYSTEM (MDOF)* *Introduction to Systems with two degrees of freedom*	*DESIGN SEISMIC FORCES AS PER IS 1893-2016* *Basis of earthquakes – epicenter*	*DUCTILE DESIGN FOR EARTHQUAKE RESISTANCE USING IS 13920-2016* *Definition of ductility – member and structural*	*BASE ISOLATION* *Introduction to base isolation*
	SLO-2	*Definition of free vibration – mass, stiffness,*	*Introduction to Systems with multi degrees of freedom (MDOF)*	*Magnitude of earthquake – measurement – Richter's scale*	*Response reduction factor and ductility*	*Passive base isolation – introduction*
S-2	SLO-1	*Damped and undamped vibration*	*Moment resistant frames as MDOF– two degree freedom system*	*Intensity of earthquake – different scales*	*General specification for ductility*	*Base isolation for a building*
	SLO-2	*Fundamental / Natural frequency and time period – problem solving*	*Shear building and lumped mass*	*Configurations of buildings to resist earthquake*	*Ductile requirements of beams – general*	*Purpose of base isolation*
S-3	SLO-1	*Forced vibration –Harmonic loading*	*Calculation of column stiffness – effect of orientation of column on stiffness*	*Vertical and in-plan mass irregularities*	*Ductile requirements of beams – Longitudinal reinforcement*	*Principles of base isolation*
	SLO-2	*Derivation of equation of motion for free and forced vibration*	*Computation of diagonal mass matrix*	*Vertical and in-plan stiffness irregularities – calculation of eccentricities in plan*	*Ductile requirements of beams – Transverse reinforcement*	*Basic requirements of base isolation system*
S-4	SLO-1	*Solution of equation of motion for free vibration*	*Computation of stiffness matrix*	*Storey drift and storey shear*	*Ductile requirements of columns – geometry*	*Type of Base Isolation Systems – Elastomeric rubber bearings – Roller and ball bearings,*
	SLO-2	*Solution of equation of motion for forced vibration – harmonic loading*	*Forming acceleration and velocity vectors*	*Response spectrum*	*Relative strength of columns and beams at a joint*	
S-5	SLO-1	*Problem solving for finding the response for undamped free vibration*	*Equation of motion of undamped two degree lumped mass free vibration of moment resistant frame*	*Seismic zone factor, Importance factor,*	*Transverse reinforcement in column*	*Type of Base Isolation Systems – springs – sliding bearing*
	SLO-2	*Problem solving for finding the response for damped free vibration*	*Solution of equation of motion of undamped two degree freedom system for free vibration*	*Response reduction factor*	*Ductile detailing for shear walls – introduction*	*Modeliing base isolation in SAP – introduction*

S-6	SLO-1	*Problem solving for finding the response for undamped forced vibration*	*Eigen value problem and modal superposition method*	*Percentage of imposed loads , seismic weight of floors- Load combinations*	*General requirements*	*Input requirements for SAP*
	SLO-2	*Problem solving for finding the response for damped forced vibration*	*Determining modal frequencies and time periods*	*Introduction to Equivalent Static Method (ESM) and its limitations*	*Design for shear force*	*Input requirements for ETABS*
S-7	SLO-1	*Magnification factor*	*Uncoupled equations in SDOF and finding modal response*	*Computation of base shear for single & double storey moment resistant plane frame using ESM*	*Design for axial force*	*Modeling for base isolation in STAAD.Pro*
	SLO-2	*Application to determine the forces transferred to base from machine foundation*	*Undamped equation of motion for two degree moment resistant frame with lateral harmonic loading at the DOF*	*Introduction to Response Spectrum Method(RSM) and applicability*	*Design for bending moment*	*Input requirements for STAAD.Pro*
S-8	SLO-1	*Machine isolation*	*Modal superposition method to form uncoupled SDOF equations including modal load vector.*	*Computation of base shear for single storey and double storey moment resistant plane frame using RSM*	*Opening in walls – introduction*	*Introduction to active base isolation*
	SLO-2	*Determination of damping required to minimize forces transferred to foundation*	*Determination of response of the structure at discrete time intervals.*	*Introduction to DBE (Design Based Earthquake) and MCE(Maximum Considered Earthquake)*	*Detailing around the openings*	*Underlying principles of active base isolation*
S-9	SLO-1	*Definition of ground motion due to earthquake*	*Superposition of modal responses*	*Performance based design – Capacity and demand spectra as per ATC40*	*Ductile construction joints*	*Schematic diagram of a typical active base isolation system*
	SLO-2	*Equivalent model for considering ground motion in moment resistant fame*	*Square Root of Sum of Squares (SRSS) method.*	*Principles of pushover analysis and pushover curve*	*Ductile design of gravity columns in buildings*	*Comparison between passive and active base isolation*

Course Code	18CEE308T	Course Name	DESIGN OF STEEL-CONCRETE COMPOSITE STRUCTURES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book/Codes/Standards	IS 456 :2000, IS 800: 2007, IS 11384, Steel Tables		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concept of steel-concrete composite member design and to get introduced to the relevant IS codes*
CLR-2 :	*Create insights to the concepts of Limit state method of design*
CLR-3 :	*Utilize the concepts in performing design of steel-concrete composite beams and columns*
CLR-4 :	*Utilize the concepts in performing design of steel-concrete composite connections*
CLR-5 :	*Understand the behaviour of composite girder bridges*
CLR-6 :	*Create insights to the seismic behaviour of composite structures*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Identify the effect of external loads on steel-concrete composite members and the factors influencing their behaviour and to get familiarity with the relevant IS codes*	*2*	*85*	*80*	*H*	*-*	*-*	*M*	*-*	*-*	*-*	*-*	*-*	*-*	*-*	*H*	*H*	*M*	*-*
CLO-2 :	*Analyze the behavior of steel-concrete composite sections under flexure, shear and compression*	*2*	*85*	*80*	*H*	*H*	*-*	*M*	*-*	*-*	*-*	*-*	*-*	*-*	*-*	*H*	*H*	*M*	*-*
CLO-3 :	*Apply Limit state method of design to steel-concrete composite beams and columns*	*2*	*80*	*75*	*H*	*H*	*H*	*H*	*-*	*-*	*-*	*-*	*-*	*-*	*-*	*H*	*H*	*M*	*-*

Course Code	18CEE310T	Course Name	SOLID AND HAZARDOUS WASTE MANAGEMENT	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CIVIL ENGINEERING	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Create insights to the various sources and classification of solid and hazardous waste*
CLR-2 :	*Address concepts related to waste characteristics and source reduction*
CLR-3 :	*Create insights to the storage, collection and transport of waste*
CLR-4 :	*Address concepts related to waste processing technologies*
CLR-5 :	*Address concepts related to waste disposal*
CLR-6 :	*Role of Government and NGO's in sustaining the waste management*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Understand the various sources of solid and hazardous waste*	2	85	80	H	H	M	L	-	L	H	-	-	-	-	L	M	-	-
CLO-2 :	*Able to identify the options for Reduction, reuse and recycling of waste*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-3 :	*Knowledge of collection and transport of solid and hazardous waste*	2	80	75	H	H	M	M	-	L	H	-	-	-	-	L	M	-	-
CLO-4 :	*Able to know about various waste processing techniques*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-5 :	*Understand the waste disposal methods and management*	2	85	80	H	H	M	M	L	L	M	-	-	-	-	L	M	-	-
CLO-6 :	*Knowledge of basic solid and hazardous waste legislations*	2	80	75	H	H	M	-	-	L	M	-	-	-	-	-	M	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Sources, classification and regulatory framework: Sources of solid waste*	*Waste characterization and source reduction: Waste generation rates*	*Storage, collection and transport of waste: Handling of waste at source*	*Waste processing technologies: Objectives of waste processing*	*Waste disposal : Waste disposal options for solid and hazardous waste*
	SLO-2	*Types of solid waste*	*Waste generation variation*	*Segregation of waste at source*	*material separation technologies in solid waste*	*Disposal in landfills*
S-2	SLO-1	*Hazardous Waste - Identification*	*sampling and characterization*	*Storage of municipal solid waste*	*Physical Processing Equipment*	*Landfill Classification*
	SLO-2	*Hazardous Waste -Classification*	*factors affecting waste generation rate and Composition*	*On-site storage methods*	*material processing technologies*	*Landfill types*
S-3	SLO-1	*Need for solid waste management*	*Physical properties of solid waste*	*Effect of storage*	*chemical conversion technologies*	*Landfill methods*
	SLO-2	*Need for hazardous waste management*	*Chemical properties of solid waste*	*Materials used for containers*	*biological conversion technologies methods of Composting*	*Site selection*
S-4	SLO-1	*Elements of integrated waste management*	*Biological properties of solid waste*	*Collection of municipal solid waste-Methods*	*biological conversion technologies methods of Composting*	*Design and operation of sanitary landfills*
	SLO-2	*roles of stakeholder's*	*Hazardous Characteristics*	*Collection vehicles – Manpower – Collection routes*	*Factors of Composting*	*Landfill liners*
S-5	SLO-1	*Role of public and NGO's*	*TCLP tests*	*Analysis of Collection systems*	*Thermal conversion technologies-energy recovery*	*Secure landfills*
	SLO-2	*Tutorial 1: Case Study: Status of Waste Generation in Bangalore*	*Tutorial 3 : Practices in household waste management*	*Solving problems using Tutorial Sheet 7*	*Thermal conversion technologies- energy recovery*	*Landfill bioreactors*
S-6	SLO-1	*Public health and environmental impacts*	*Tutorial 4: Source Reduction and Recycling.*	*Need for transfer and transport*	*Incineration*	*Leachate management*
	SLO-2	*Salient features of Indian legislations on management and handling of municipal solid waste*	*Source reduction of waste*	*Transfer stations*	*Hazardous Waste Treatment*	*Landfill gas management*

S-7	SLO-1	*Hazardous waste*	*Waste exchange*	*Hazardous Waste-Storage and collection*	*Physical and chemical treatment*	*Landfill closure*
	SLO-2	*Biomedical waste*	*Extended producer responsibility*	*Hazardous Waste-Storage and collection*	*Thermal treatment*	*Environmental monitoring*
S-8	SLO-1	*Lead acid batteries*	*Recycling*	*Hazardous Waste -Transfer and transport*	*Biological treatment*	*Rehabilitation of open dumps*
	SLO-2	*Electronic waste*	*Reuse*	*Hazardous Waste -Transfer and transport*	*Pollution Prevention and Waste Minimization*	*Landfill remediation*
S-9	SLO-1	*Plastics and fly ash*	*Solving problems using Tutorial Sheet 5*	*Hazardous waste manifests*	*Hazardous Wastes Management in India*	*Solving problems using Tutorial Sheet 9*
	SLO-2	*Tutorial 2: Mention the public awareness program*	*Solving problems using Tutorial Sheet 6*	*Hazardous waste transport*	*Solving problems using Tutorial Sheet 8*	*Solving problems using Tutorial Sheet 10*

Course Code	18CEE312T	Course Name	ENVIRONMENTAL IMPACT ASSESSMENT AND LIFE CYCLE ANALYSIS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CIVIL ENGINEERING	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Know the interrelationship between various activities and their impact on environment*
CLR-2 :	*Understand how to conduct an environmental impact assessment*
CLR-3 :	*Learn principles and methods of environmental analysis*
CLR-4 :	*review and comment on an environmental impact statement, environmental assessment and environmental regulations*
CLR-5 :	*Understand role of standards and how government, NGOs, and the private sector can affect their evolution*
CLR-6 :	*Explain the concept of life cycle assessment (LCA) as an environmental management tool and its potential for identifying all the environmental impacts throughout the entire life cycle of a product*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Explainkey concepts in environmental impact assessment & Management*	3	85	80	H	-	-	-	-	-	H	H	-	-	-	-	M	-	-
CLO-2 :	*Understand the importance of various rules & regulation in EIA*	2	85	75	-	M	-	-	-	M	H	-	-	-	-	-	M	-	-
CLO-3 :	*Evaluate the Impact on various environments and role of stake holders in EIA*	2	80	75	H	M	-	M	-	M	M	-	-	-	-	-	M	-	-
CLO-4 :	*Explain the application of Life cycle analysis*	2	85	75	H	M	-	-	-	H	H	M	-	-	-	-	M	-	-
CLO-5 :	*Identify most suitable tool for assessment process and make suggestions for solutions*	2	85	80	H	H	-	M	M	-	M	M	-	-	-	-	M	-	-
CLO-6 :	*Participate in a group to evaluate a project using EIA & LCA using one or more management tools*	2	80	75	H	H	-	M	-	-	H	-	H	-	-	-	H	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction* *Introduction, definitions and concepts of EIA, Ethics and environment, EIA for civil engineers*	*Evolution of EIA* *Evolution of EIA worldwide; Evolution of EIA in India; Forecasting Environmental Changes*	*Assessment Technique* *Components of the Environment: Water-Standards pertaining to water quality*	*Life Cycle Analysis* *Life cycle assessment and its purpose; Evolution of Life Cycle Assessment; Stages in LCA of a Product; A Code of Good Conduct for LCA*	*EIA Methodologies* *Initial Environmental Examination; Screening*
	SLO-2	*Discussion: Identify the Ethics that you breach in daily activities which affects the environment*	*Discussion: Introduction to importance of Rio Convention*	*Activity & Discussion using a Case Study*	*Discussion: Necessary for LCA*	*Case Study involving screening*
S-2	SLO-1	*Ecology and the environment ; Ecosystem and its characteristics*	*Types of EIA: Rapid; Comprehensive; Strategic; Sectoral; Regional Rationale and scope of each type*	*Components of the Environment: Air & Noise- Standards pertaining to Air & Noise quality*	*Procedures for LCA; Defining the goal and scope; Analyzing the inventory; Assessing environmental impact*	*Scoping Analysis of alternatives*
	SLO-2	*In continuation with previous class discussion in how the ecosystem in which you live gets affected your activities*	*Case Study*	*Activity & Discussion using a Case Study*	*Case Study using LCA*	*Case Study in EIA*
S-3	SLO-1	*Structure of Ecosystem; Biotic Components Abiotic components*	*EIA Regulations in India* *Overview of Indian laws – Constitutional Provisions (Water, Air, Forest, Hazardous etc)*	*Components of the Environment: Soil- Soil quality, Landuse Criteria*	*Carbon trading: Energy foot printing, Food foot printing and Carbon foot printing.*	*Mitigation- Definition, options for mitigation of impact on water, air and land, water, energy, flora and fauna*
	SLO-2	*Identify the impact of your activities on Biotic and abiotic components of your ecosystem& How their services gets affected*	*Discussion: Evolution of law with time*	*Activity & Discussion using a Case Study*	*Case Study On carbon footprint*	*Case study Employing mitigation measures*
S-4	SLO-1	*Food chains, Food webs and Tropic levels*	*EPA 1986*	*Components of the Environment: Biosphere (Macro, Micro)- Introduction to Hazard Exposure levels for biota*	*Environmental management: Principles, problems and strategies; Review of political, ecological and remedial actions.*	*Environmental Impact Statement- Document planning - collection and organization of relevant information*
	SLO-2	*Identify the impact of your activities on various trophic levels of your ecosystem*	*Discussion: Amendment of E(P) Rules, 1986 on time of 545 days for finalisation of Draft Notification (MOEFCC Website)*	*Activity & Discussion using a Case Study*	*Discussion With Activity: Why Environmental Management is important – using case study*	*Example: Case study with Documentation*
S-5	SLO-1	*Energy and energy flows; Elemental cycles,*	*EIA Notification 2006*	*Components of the Environment: Socio-economic*	*Environmental audit: Definitions,concepts, partial audit, compliance audit, methods & regulations.*	*ToR& Sectoral ToR*

	SLO-2	Choose a element cycle and how it affects the ecosystem	Case Study	Activity & Discussion using a Case Study	Discussion: Introduction to ISO 19011 (EMS Auditing)	Example of ToR for various environments
S-6	SLO-1	Concept of Succession;Role of succession in restoration and recovery of ecosystem	CPCB and State PCBs – roles and responsibilities	Components of the Environment: Cultural and Aesthetics	Local infrastructure development and environmental management: A system approach, Regional environmental management system Landuse Conversion plan development and implementation strategies	Environmental Assessment- Base line, Construction Phase, Post Construction/ Operational phase scenario
	SLO-2	Example: Restoration of an ecosystem (Mining area)	Discussion: Sethusamudram Project- Role of CPCB& SPCB and Central & State Governments	Activity & Discussion using a Case Study	Discussion: Problems faced in developmental projects- using case study	Case study on a project
S-7	SLO-1	Ecosystem disturbances and their causes; natural causes and anthropogenic causes	Structured Environmental Management Systems ISO 14001 - EMS	Role of Public Participation in EIA	Environmental management systems in local government. Certification body assessments of EMS Documentation for EMS	Impact Assessment Methodologies: Checklists- Simple, Descriptive, Scaling Checklist
	SLO-2	Discussion: How Do Species Replace One Another in Ecological Succession?	Case Study: (Whitelaw and Butterworth, ISO 14001: Environmental System Handbook, 1997)	Reference EIA Notification 2006	Discussion: Expert systems (Software/ Model) used for EMS	Case study involving Checklist methods
S-8	SLO-1	Ecosystem and Ecological Footprints	ISO 18001- OHSAS	Role of stakeholders	Sustainable development – Definitions, Charter and Global Conventions; Future scenarios.	Matrix- Simple, Interaction- Leopold Matrix, Stepped matrix
	SLO-2	Discussion: How Cultural Changes Have Increased Our Ecological Footprints?	Discussion: Accreditation Procedure for ISO 14001	Activity & Discussion using a Case Study, Role Play	Discussion on various important conventions	Case study involving Matrix methods Discussion: Aldo Leopold's Environmental Ethics
S-9	SLO-1	Discussion of basic concepts	Environmental Risk Assessment	Setting the baseline	Case Studies on EIA	Network Methods Decision Tree, Expert Systems
	SLO-2	Example: Case study (An Affected Area)	Discussion: risk screening/prioritization	Discussion-Describe the various aspects of the environmental components of your neighborhood	Case Studies on EIA	Case study involving Network methods Introduction to various Expert system (Software/ models widely used)

Course Code	18CEE313T	Course Name	DESIGN OF HYDRAULIC STRUCTURES AND IRRIGATION ENGINEERING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CIVIL ENGINEERING	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide knowledge on irrigation and its types, and on water movement through soil*
CLR-2 :	*Expound on the design principles of gravity and earthen dams and associated structures*
CLR-3 :	*Introduce diversion structures and their design by applying failure concepts*
CLR-4 :	*Provide an understanding of canal structures*
CLR-5 :	*Address concepts on sediment movement*
CLR-6 :	*Introduce design concepts for various types of canals*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire knowledge on soil–plant–water relationship*	2	85	80	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-2 :	*Complete a design for dams and spillways*	2	85	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	-
CLO-3 :	*Understand the types of diversion structures and design them by applying failure concepts*	2	85	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	-
CLO-4 :	*Identify the various canal structures and design them*	2	85	80	H	H	-	H	-	-	-	-	-	-	-	-	H	-	-
CLO-5 :	*Understand basic concepts of sediment movement*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-6 :	*Design various types of canals considering efficiency and economy*	2	85	75	H	H	-	H	-	-	-	-	-	-	-	-	H	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Irrigation: Necessity and importance of irrigation*	*Lane's weighted creep theory*	*Earthen dams – types*	*Canal falls – necessity and location of falls*	*Computing the design capacity of an irrigation canal*
	SLO-2	*Methods of irrigation*	*Design of a vertical drop weir on Bligh's creep theory*	*Design of earthen dams*	*Types of canal falls*	*Shield's entrainment method*
S-2	SLO-1	*Methods of improving soil fertility*	*Design of a vertical drop weir on Bligh's creep theory*	*Design of earthen dams*	*Design of a trapezoidal notch fall*	*Design of non-scouring stable channels with protected side slopes in alluvium soil (Shield's entrainment method)*
	SLO-2	*Standards of quality for irrigation water*	*Khosla's method – flow nets*	*Seepage analysis in earthen dams*	*Design of a trapezoidal notch fall*	*Design of non-scouring stable channels with protected side slopes in alluvium soil (Shield's entrainment method)*
S-3	SLO-1	*Duty and delta – factors affecting duty*	*Khosla's method of independent variables for determination of pressures and exit gradient for seepage below a weir or a barrage*	*Seepage analysis in earthen dams*	*Design of simple vertical drop fall*	*Design of non-scouring channels with unprotected side slopes in alluvium soil*
	SLO-2	*Methods of improving duty*	*Design problem on Khosla's method of independent variables*	*Design for stability of earthen dams*	*Design of simple vertical drop fall*	*Design of non-scouring channels with unprotected side slopes in alluvium soil*
S-4	SLO-1	*Irrigation efficiencies*	*Design problem on Khosla's method of independent variables*	*Design for stability of earthen dams*	*Design of a Sarda fall*	*Design of most efficient channel section*
	SLO-2	*Problems in irrigation efficiencies*	*Complete design of weir/barrage using Khosla's theory*	*Spillways – types and design considerations*	*Design of a Sarda fall*	*Design of most efficient channel section*
S-5	SLO-1	*Estimation of consumptive use –Blaney Criddle method*	*Complete design of weir/barrage using Khosla's theory*	*Design of chute spillway*	*Cross drainage works – types*	*Design of stable channels – Kennedy's theory*
	SLO-2	*Pan evaporation method – Penman's method*	*Storage structures: Gravity dam – cross section of gravity dam*	*Design of chute spillway*	*Cross drainage works – selection of suitable type*	*Design of stable channels – Kennedy's theory*
S-6	SLO-1	*Classes and availability of soil water – soil moisture deficiency*	*Modes of failure of gravity dam*	*Design of ogee spillway*	*Design considerations for cross drainage works*	*Design of stable channels – Lacey's theory*

	SLO-2	*Depth of water stored in root zone*	*Criteria for structural stability of gravity dam*	*Design of ogee spillway*	*Design considerations for cross drainage works*	*Design of stable channels – Lacey's theory*
S-7	SLO-1	*Limiting soil moisture conditions*	*Design considerations for gravity dam*	*Energy dissipators*	*Design of cross drainage works*	*Balancing depth of canals*
	SLO-2	*Depth and frequency of irrigation*	*Design considerations for gravity dam*	*Design of stilling basin*	*Design of cross drainage works*	*Balancing depth of canals*
S-8	SLO-1	*Diversion structures: Weirs and barrages*	*Design of gravity dam*	*Canal structures: Canal regulators – head and cross regulator*	*Design of cross drainage works*	*Economic justification of canal lining for unlined canals*
	SLO-2	*Diversion head works and its components*	*Design of gravity dam*	*Functions – Alignment of the off-taking channel*	*Design of cross drainage works*	*Economic justification of canal lining for unlined canals*
S-9	SLO-1	*Failure of hydraulic structures – failure by piping and failure by direct uplift*	*Design of gravity dam*	*Design of cross regulator*	*Conveyance: Mechanics of sediment transport*	*Design of lined canals*
	SLO-2	*Bligh's creep theory*	*Design of gravity dam*	*Design of distributary head regulator*	*Computing the design capacity of an irrigation canal*	*Design of lined canals*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Create insights into the occurrence and properties of groundwater*
CLR-2 :	*Address concepts related to movement of groundwater*
CLR-3 :	*Create insights on well hydraulics*
CLR-4 :	*Address concepts related to exploration and investigation of groundwater*
CLR-5 :	*Create insights into groundwater management and seawater intrusion*
CLR-6 :	*Understand the software applications in groundwater modeling*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Understand the various properties of groundwater*	2	85	80	H	M	L	L	-	L	H	-	-	-	-	L	M	-	-
CLO-2 :	*Understand the governing equations of groundwater movement*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-3 :	*Acquire the knowledge on yield of the well and its hydraulics*	2	80	75	H	H	M	M	-	L	H	-	-	-	-	L	M	-	-
CLO-4 :	*Understand the concept of various methods of exploration*	2	85	75	H	L	M	M	-	-	H	-	-	-	-	-	M	-	-
CLO-5 :	*Understand the concept of seawater intrusion and conjunctive use*	2	85	80	H	M	H	H	-	M	M	-	-	-	-	L	M	-	-
CLO-6 :	*Acquire knowledge on groundwater modeling and models in use*	2	80	75	H	H	H	H	H	M	H	-	-	-	-	H	M	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Groundwater: Global distribution of water, role of groundwater in hydrological cycle*	*Groundwater Movement Groundwater Movement- Governing Equation*	*Well Hydraulics Flow into a well*	*Subsurface Exploration Objective and Need for exploration Various methods*	*Groundwater Management and Modeling Groundwater quality and Contamination*
	SLO-2	*Various water bearing formations, subsurface water distribution*	*Darcy's Law*	*Steady radial flow into a well: Dupuit equation, Thiem's equation*	*Geophysical investigations*	*Groundwater quality standards*
S-2	SLO-1	*Aquifers and types of aquifers*	*Heterogeneity and anisotropy*	*Unsteady radial flow into a well: Theis equation*	*Surface geophysical techniques*	*Types and sources of groundwater contamination*
	SLO-2	*Aquifer properties: porosity, permeability, specific yield, storage coefficient and transmissivity, factors affecting permeability*	*Estimation of aquifer parameters*	*Jacob's correction for very thin aquifers with water table condition*	*Electrical resistivity method*	*Various quality parameters and its significance*
S-3	SLO-1	*Problems on aquifer properties*	*Problems on Darcy's law*	*Problems on Theis equation*	*Seismic refraction method*	*Attenuation of groundwater quality*
	SLO-2	*Problems on aquifer properties*	*Problems on aquifer parameter estimation*	*Problems on Jacob equation*	*Remote sensing in groundwater exploration*	*Potential evaluation of groundwater quality*
S-4	SLO-1	*Groundwater fluctuation*	*1D governing equation of flow through porous medium*	*Theis recovery, well hydraulics*	*Other surveying methods*	*Physical, chemical and biological method of analysis*
	SLO-2	*Groundwater balance and budgeting*	*2D governing equation of flow through porous medium*	*Wells in leaky aquifer*	*Borehole geophysical techniques*	*Problems on quality evaluation*
S-5	SLO-1	*Problems on water balance equation*	*Equation for flow into leaky aquifer*	*Partially penetrating wells*	*Electric logging, radioactive logging*	*Conjunctive use of groundwater and basin management*
	SLO-2	*Problems on groundwater fluctuation*	*Flow through unconfined aquifer*	*Image well theory, multiple wells*	*Induction, fluid and sonic logging*	*Groundwater development under various scales*
S-6	SLO-1	*Groundwater in different rocks*	*Boundary conditions*	*Well capacity and well development*	*Geochemical method of exploration*	*Groundwater modeling, problems in groundwater*

	SLO-2	*Groundwater potential in India*	*Groundwater flow rates and direction*	*Construction and types of open well*	*Application of GIS in groundwater exploration*	*Types of models*
S-7	SLO-1	*Case Study 1*	*Groundwater flow problems*	*Construction and types of tube well*	*Seawater intrusion theory*	*Conceptual model, physical model*
	SLO-2	*Case Study 2*	*Steady one dimensional flow, flow into galleries*	*Problems on well hydraulics*	*Shape of interface*	*Mathematical model and analog model*
S-8	SLO-1	*GEC Norms*	*Aquifer with recharge*	*Problems on Theis recovery*	*Slope of interface*	*Data, input, boundary conditions and output, prediction*
	SLO-2	*Methodology of estimation*	*flow into confined aquifer with constant*	*Pumping test and recuperation test*	*Causes of seawater intrusion*	*Calibration and validation of a model*
S-9	SLO-1	*Status of groundwater in various parts of India- a case study*	*flow into confined aquifer with variable thickness*	*Problems on yield test*	*Effects of seawater intrusion*	*Groundwater models*
	SLO-2	*Threats to groundwater*	*Groundwater Theory, Solution for differential Equations*	*Well losses and determination*	*Various methods of reducing seawater intrusion*	*MODFLOW, MT3D, FEFLOW, SEAWAT*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Create insights into various hydrometeorological variables and components of hydrological cycle*
CLR-2 :	*Address concepts related to precipitation and water losses*
CLR-3 :	*Analyze concepts of runoff and hydrograph analysis*
CLR-4 :	*Address concepts related to floods and their estimation*
CLR-5 :	*Create insights into reservoir routing and stream flow routing*
CLR-6 :	*Address various types of models and their processes*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Identify various hydrometeorological variables and components of hydrological cycle*	2	85	80	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-2 :	*Analyze precipitation and water losses*	3	85	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-3 :	*Understand runoff and hydrograph analysis*	3	85	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-4 :	*Analyze floods and their estimation*	2	85	80	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-5 :	*Understand reservoir routing and channel routing*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-
CLO-6 :	*Analyze various models and their processes*	3	85	75	H	H	-	-	-	-	-	-	-	-	-	-	H	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Weather and climate*	*Precipitation: forms and types*	*Runoff, components of stream flow*	*Floods: Standard project flood, maximum probable flood, PMP, design flood*	*Systems and models – system concept in hydrology*
	SLO-2	*Scope of hydrometeorology*	*Test for consistency of the record, causes of inconsistency in the record*	*Catchment characteristics, watershed concepts*	*Estimation of peak flood: Empirical flood formulae- Dickens, Ryves, Inglis, Myers*	*Types of models – physical, conceptual, empirical, mathematical models*
S-2	SLO-1	*Meteorological variables*	*Double mass curve techniques*	*Classification of streams, isochrones*	*Rational method and concentration time method*	*Life cycle of a model*
	SLO-2	*Temperature, atmospheric pressure*	*Depth-Area relationship, Intensity-Duration-Frequency (IDF) curves*	*Factors affecting runoff*	*Problems on peak discharge*	*Types of mathematical models*
S-3	SLO-1	*Atmospheric humidity*	*Analysis of rainfall data*	*Runoff estimation: rational method, assumptions and drawbacks*	*Flood frequency studies: California method and Weibull method*	*Formulation of a mathematical model – modeling concepts*
	SLO-2	*Simple problems on saturation vapour pressure and relative humidity*	*Problems on mean, median and mode, mass curve, hyetograph, moving average, IDF and frequency curve*	*Components of streamflow hydrograph*	*Problems on flood frequency*	*Watershed–System concept*
S-4	SLO-1	*Clouds: categories and its classification*	*Design storm*	*Baseflow separation methods*	*Encounter probability: probability of exceedance and Probability of non-exceedance*	*Types of watershed models*
	SLO-2	*Atmosphere: different strata of atmosphere*	*Water losses*	*Problems on rainfall excess estimation by baseflow separation methods*	*Problems on encounter probability*	*Models in practice for various hydrologic processes*
S-5	SLO-1	*Wind and wind belts*	*Evaporation from water surfaces, Dalton's law of evaporation*	*Derivation of a unit hydrograph*	*Flood routing: Reservoir routing and channel routing*	*Stochastic model: space independent and space co-related*
	SLO-2	*Evaporation, vertical air motions*	*Evaporation pans: floating pans, land pan and Colorado sunken pan*	*Elements and propositions of unit hydrograph*	*Reservoir routing: ISD method*	*Artificial Neural Network (ANN)*
S-6	SLO-1	*Global distribution of water*	*Pan coefficient, problems on loss of water due to evaporation*	*Problems on unit hydrograph*	*Modified Pul's method*	*ANN activation function*

	SLO-2	*Water resources of India*	*Measures to reduce lake evaporation*	*Problems on unit hydrograph*	*Problem on reservoir routing*	*Network training algorithm – back propagation*
S-7	SLO-1	*Seasons in India*	*Transpiration, transpiration ratio and evapotranspiration*	*S-curve method*	*Problem on reservoir routing*	*Advantages and limitations of ANN*
	SLO-2	*Hydrology and hydrologic cycle*	*Consumptive use determination by Blaney-Criddle method, problems.*	*Problems on S-curve hydrograph*	*Stream flow routing: prism storage and wedge storage*	*Fuzzy sets and fuzzy logic*
S-8	SLO-1	*Distribution of rainfall in India*	*Infiltration, Horton's equation*	*Problems on S-curve hydrograph*	*Muskingum method*	*Fuzzification, evaluation of rules, defuzzification*
	SLO-2	*Scope of hydrology*	*Measurement of infiltration: infiltrometer and rainfall simulator*	*Synthetic unit hydrograph*	*Problem on Muskingum method*	*Fuzzy rule based reservoir operation model*
S-9	SLO-1	*Hydrological data*	*Infiltration indices: phi index and W-index*	*Snyder's method*	*Problem on Muskingum method*	*Changes in climate as related to water*
	SLO-2	*Hydrologic equation, simple problems on water budget.*	*Problems on Horton's equation and infiltration indices*	*Problems on Snyder's method*	*Flood forecasting and warning*	*Impacts and responses – climate change and water resources*

Course Code	18CEE401T	Course Name	PAVEMENT ANALYSIS AND DESIGN	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CIVIL ENGINEERING	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn layered structure stress-strain analysis*
CLR-2 :	*Understand the viscoelastic characterization of the material*
CLR-3 :	*To impart basic knowledge on various bituminous technology and its characterization*
CLR-4 :	*Familiarize with the design of flexible pavement*
CLR-5 :	*Study about the distress of pavements*
CLR-6 :	*Knowabout the pavement condition survey*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*analyze the critical conditions of the layered structure*	2	85	80	H	H	M	L	H	-	H	-	-	-	-	-	M	-	-
CLO-2 :	*Predict the real time behavior of the material*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-3 :	*Select appropriate material for the bituminous pavement construction*	2	80	75	H	H	M	M	-	-	H	-	-	-	-	-	M	-	-
CLO-4 :	*Design the flexible pavement for different conditions of traffic and with different material combination*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-5 :	*Evaluate the existing condition of the pavement*	2	85	80	H	H	M	M	L	-	M	-	-	-	-	-	M	-	-
CLO-6 :	*Suggest the suitable measures to improve the condition of the pavement*	2	80	75	H	H	M	-	-	-	M	-	-	-	-	-	M	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Stress Analysis of Layered Structure: Importance of pavement design*	*Viscoelasticity: Introduction to viscoelasticity*	*Pavement Materials: Bitumen.*	*Design of Flexible pavement: Different layers of flexible pavement*	*Evaluation of pavement: Distress in flexible pavement*
	SLO-2	*Overview of layered system*	*Creep and recovery*	*Modified bitumen*	*Design factors*	*Distress in flexible pavement*
S-2	SLO-1	*Single layer system- stress analysis*	*Stress relaxation*	*Bitumen emulsion-Types*	*Traffic factors*	*Distress of rigid pavement*
	SLO-2	*Single layer system- stress analysis*	*Viscoelastic models*	*Grading of bitumen*	*Traffic factors*	*Distress of rigid pavement*
S-3	SLO-1	*Solving problems*	*Viscoelastic solid model*	*Performance grading*	*Material characteristics*	*Evaluation of distress*
	SLO-2	*Solving problems*	*Derivation of Voigt-Kelvin model*	*Aging of binder*	*Temperature*	*Distress measurement-Surface roughness*
S-4	SLO-1	*Two-layer pavement- stress analysis*	*Creep and recovery response of Voigt-Kelvin model*	*Bituminous mixture*	*Critical locations in pavement*	*Skid resistance*
	SLO-2	*Two-layer pavement- stress analysis*	*Stress relaxation response of Voigt-Kelvin model*	*Hot mix asphalt mixture*	*Pavement design as per IRC*	*Deflection measurements*
S-5	SLO-1	*Solving problems*	*Viscoelastic fluid model*	*Warm mix asphalt mixture*	*Solving problems-VDF*	*Benkelman beam test - concept*
	SLO-2	*Solving problems*	*Derivation of Maxwell model*	*Half warm mix asphalt mixture*	*Solving problems-VDF*	*Benkelman beam test – Method of measuring deflection*
S-6	SLO-1	*Multilayered stress analysis*	*Creep and recovery response of Maxwell model*	*Cold mix asphalt mixture*	*Solving problems-Pavement Design*	*Falling weight deflectometer-Working principle*
	SLO-2	*Multilayered stress analysis*	*Stress relaxation response of Maxwell model*	*Cold mix asphalt mixture*	*Solving problems-Pavement Design*	*Fallingweightdeflectometer-Calculation of moduli*

S-7	SLO-1	*Multilayered stress analysis*	*Burger's model*	*Mixture characterization - Resilient modulus*	*Solving problems-Pavement Design*	*Design of overlay by Benkelman beam method*
	SLO-2	*Multilayered stress analysis*	*Derivation of Burger's model*	*Mixture characterization - Determination of resilient modulus*	*Solving problems-Pavement Design*	*Design procedure*
S-8	SLO-1	*Software demo for multilayered structure*	*Oscillatory shearing*	*Mixture characterization - Dynamic modulus*	*Airfield pavement*	*Design procedure*
	SLO-2	*Software demo for multilayered structure*	*Response of elastic material to Oscillatory shearing*	*Mixture characterization - Determination of dynamic modulus*	*Specifications of airfield pavement*	*Solving problems*
S-9	SLO-1	*Software demo for multilayered structure*	*Response of viscous material to Oscillatory shearing*	*Mixture characterization - Time-temperature superposition*	*Design procedure of airfield pavement*	*Solving problems*
	SLO-2	*Software demo for multilayered structure*	*Response of viscoelastic material to Oscillatory shearing*	*Mixture characterization – Rutting and fatigue characterization*	*Design procedure of airfield pavement*	*Solving problems*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Get exposed to Railway track planning and design*
CLR-2 :	*Understand the process of operation and maintenance of Railway track*
CLR-3 :	*Attain knowledge on the concepts of planning and design of airport components*
CLR-4 :	*Learn the structural design of the airfield pavement*
CLR-5 :	*Understand the process in the Evaluation of the airfield pavement*
CLR-6 :	*Acquire knowledge on the site characteristics and component planning for harbour*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Apply the planning and design concepts of railway alignment and geometric design of railway track*	2	85	80	H	H	M	L	-	L	H	-	-	-	-	L	M	-	-
CLO-2 :	*Plan and design the operational facilities for effective rail transportation*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-3 :	*Apply the planning and design concepts of airport components*	2	80	75	H	H	M	M	-	L	H	-	-	-	-	L	M	-	-
CLO-4 :	*Design the airfield pavement*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-5 :	*Evaluate the airfield pavement*	2	85	80	H	H	M	M	L	L	M	-	-	-	-	L	M	-	-
CLO-6 :	*Understand the basic need for handling the cargos in the harbour*	2	80	75	H	H	M	-	-	L	M	-	-	-	-	-	M	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*RAILWAY PLANNING AND DESIGN Introduction to railway engineering*	*Numericals in length of transition curve*	*AIRPORT PLANNING AND GEOMETRIC DESIGN Importance and limitations Advantages and Limitations of Air Transport.*	*PAVEMENT DESIGN AND EVALUATION Importance of pavement design and evaluation*	*HARBOUR ENGINEERING Importance of Harbour Engineering*
	SLO-2	*Role of Indian Railways in National Development*	*Numericals in length of transition curve*	*Characteristics of Air travel.*	*Components of airfield pavement*	*History and modern trends of waterway transportation,*
S-2	SLO-1	*Track Alignment -Importance*	*Widening of Gauges in Curves , Gradients Grade Compensation*	*Airport Master Plan, Evaluation and Institutional arrangements*	*Wheel and Axle Configurations*	*Definition of Terms - Harbours, Ports, Docks, , Sounding,*
	SLO-2	*Obligatory points in railway track alignment*	*Vertical Curves*	*Site Selection and survey,*	*Traffic considerations*	*Tides and Waves, Sounding, Littoral Drift*
S-3	SLO-1	*Engineering Surveys for Track Alignment*	*RAILWAY TRACK OPERATION AND MAINTENANCE Points and Crossings -*	*Components of airport- Runway Orientation,*	*Stress and strain analysis in airfield pavement*	*Classification of Harbours*
	SLO-2	*Remote Sensing, GIS &GPS, EDM and other equipment*	*Turnouts – Types - Working Principle*	*Cross wind Component, Wind rose Diagram*	*Stress and strain analysis in airfield pavement*	*Site Selection and harbour planning*
S-4	SLO-1	*Permanent Way and its components*	*Signaling*	*Numericals in Type I and II Wind Rose Diagram*	*Numericals in stress and strain*	*Types of Layouts of ports and components*
	SLO-2	*Functions of each component -Concept of Gauges*	*Interlocking*	*Basic Runway length and Corrections*	*Numericals in stress and strain*	*Approach facilities- With head gates, Without head gates*
S-5	SLO-1	*Gauges and the type of gauges*	*Track Circuiting*	*Numericals in Corrections of BRL*	*Cummulative Damage Factor*	*Protection facilities*
	SLO-2	*Coning of Wheels, Creeps and kinks*	*Construction & Maintenance Materials,*	*Numericals in Corrections of BRL*	*Environmental factors*	*Breakwater and its types*
S-6	SLO-1	*Geometric Design of Railway Tracks - basic terms and representations*	*Track Drainage*	*Airport classification, Geometric design and specifications of runway*	*FAARFIELD input*	*Docking facilities*
	SLO-2	*Super-Elevation, Negative superelevation*	*Track Modernization*	*Geometric Design elements and specifications of taxiway*	*Design of airfield pavement using FAARFIELD*	*Wet docks and Dry docks*
S-7	SLO-1	*Numericals in design of superelevation*	*Automated maintenance and upgrading, Technologies,*	*Runway patterns - Minimum Separation Distances*	*Pavement Evaluation - importance*	*Navigational Aids - Buoys and Beacons*

	SLO-2	Numericals in design of superelevation	Re-laying of Track	Clearance over Highways and Railways	Method of evaluation and overview	Light ships, Light house
S-8	SLO-1	Numericals in design of superelevation	Lay outs of Railway Stations and Yards,	Drainage - Airport Zoning	Structural Evaluation - test procedure	Storage Facilities
	SLO-2	Numericals in design of superelevation	Rolling Stock	Aircraft parking systems	Structural Evaluation - evaluation techniques	Dolphins
S-9	SLO-1	Horizontal Curves, Transition Curves,	Tractive Power, Track Resistance	Visual Aids , Wind Direction Indicators	Functional Evaluation - test procedure	Mooring Accessories
	SLO-2	Numericals in length of transition curve	Numericals in Tractive resistance	Runway and Taxiway Markings and Lightings	Functional Evaluation - evaluation techniques	Dredging facilities

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basics of traffic flow modelling.*
CLR-2 :	*Familiarize the microscopic modelling*
CLR-3 :	*Learn and understand the level of service of traffic flow*
CLR-4 :	*Address the issues related to flow interruptions*
CLR-5 :	*Learn and design the facilities required for the traffic control measures*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Develop model for the traffic stream parameters*	2	85	80	H	H	M	L	-	L	H	-	-	-	-	L	M	-	-
CLO-2 :	*Create the microscopic models of the traffic flow*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-3 :	*Apply the qualitative rankings on uninterrupted flow*	2	80	75	H	H	M	M	-	L	H	-	-	-	-	L	M	-	-
CLO-4 :	*Provide the facilities for interrupted flow*	2	85	75	H	H	H	H	-	-	H	-	-	-	-	-	M	-	-
CLO-5 :	*Apply the concept of traffic control measures*	2	85	80	H	H	M	M	L	L	M	-	-	-	-	L	M	-	-
		2	80	75	H	H	M	-	-	L	M	-	-	-	-	-	M	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*TRAFFIC STREAM MODELLING Importance of traffic Engineering and need for flow modelling*	*MICROSCOPIC TRAFFIC FLOW MODELLING Concepts of microscopic modeling*	*UNINTERRUPTED FLOW Concept of uninterrupted flow*	*INTERRUPTED FLOW Concept of interrupted flow - intersections*	*TRAFFIC CONTROL Various traffic control measures*
	SLO-2	*Importance of traffic Engineering and need for flow modelling*	*Car-following model, Basic terms and notations*	*Definitions - Capacity, Level of Service(LoS)*	*Various traffic measures for interrupted flow*	*Applications of control measures*
S-2	SLO-1	*Fundamental parameters - speed, density, volume,travel time,headway, spacing*	*Concept of stimulus - response*	*Highway capacity*	*Traffic signs*	*Traffic signal - elements*
	SLO-2	*Time-Space diagram*	*Application of stimulus response theory in traffic flow modelling*	*Factors affecting LoS*	*Types and specifications*	*Definition and analysis of saturation headway, saturation flow, lost time*
S-3	SLO-1	*Fundamental relations - time mean speed, space mean speed and their relation,*	*General motor's models*	*HCM methods*	*Road markings - longitudinal marking*	*Phase design - two, three, four phases*
	SLO-2	*Numerical problems and solutions*	*Derivation - general motor model*	*Urban Street - Classification*	*Road markings - transverse and object marking*	*Cycle time determination - Green split time*
S-4	SLO-1	*Relation between speeds, flow, density,*	*Simulation Problem in general motor model*	*Operational Performance measures*	*Channelization*	*Definitions and measurement of stopped and control delay*
	SLO-2	*Fundamental diagrams*	*Simulation Problem in general motor model*	*Congestion Management*	*Case studies*	*Webster's delay model*
S-5	SLO-1	*Greenshield's model – Assumptions and model form*	*Simulation Problem in general motor model*	*Case studies for congestion management*	*Traffic rotary*	*Problems in traffic signal design*
	SLO-2	*Derivation -greenshield model*	*Simulation Problem in general motor model*	*Case studies for congestion management*	*Conflict resolution in a rotary*	*Capacity and LoS analysis*
S-6	SLO-1	*Numerical solution - Greenshield model*	*Vehicle arrival model,Poisson distribution*	*Multilane highways - Characteristics, Capacity*	*Geometric layout*	*HCM 2000 method - analysis of a signalized intersections*
	SLO-2	*Numerical solution - Greenshield model*	*Problems in Poisson distribution*	*Multilane highways - Level of service*	*Design elements of rotary*	*Determination of level of service as per HCM 2000*
S-7	SLO-1	*Greenberg's logarithmicmodel*	*Headway modeling*	*Freeway operations*	*Capacity of rotary*	*Signal coordination- concepts*

	SLO-2	*Underwood's exponential model*	*Random vehicle generation*	*Freeway operations- operational considerations*	*Problem in rotary capacity*	*Application of coordinated traffic signal*
S-8	SLO-1	*pipe'sgeneralized model*	*Microscopic traffic simulation*	*Capacity and Level of service of freeway segment*	*Grade separated intersection - road over bridges*	*Concept of offset*
	SLO-2	*multi-regime models*	*Microscopic traffic simulation*	*Capacity and Level of service of freeway segment*	*Underpass, Overpass concepts*	*Common cycle length andbandwidth*
S-9	SLO-1	*Movingobserver method.*	*Design, calibration, validation, applications,*	*Weaving operation*	*Types of interchanges based on the traffic flow*	*Offset for one-way and two-way streets*
	SLO-2	*Numerical solution - moving observer method*	*Operational models.*	*Weaving operation*	*Case studies on interchanges*	*Vehicle actuated signals*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify the management concepts of construction equipment*
CLR-2 :	*Identify the various earthwork equipments and its applications in real projects*
CLR-3 :	*Identify the various off shore equipments and techniques for dewatering*
CLR-4 :	*Identify the various equipments used on aggregate and concrete production*
CLR-5 :	*Analyze the basic concepts of methods and techniques on demolishing and dismantling structures*
CLR-6 :	*Explore the advanced level of automated equipments for various construction activities*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Accrue the knowledge of equipment management and cost controlling methods*	*2*	*85*	*75*	*H*	*M*	-	*L*	-	-	-	*H*	*M*	*M*	*H*	*H*	*M*	-	*H*
CLO-2 :	*Apply the knowledge of calculating productivity of earthwork equipments*	*3*	*85*	*75*	*H*	*H*	-	*L*	*L*	-	-	-	*H*	*H*	*H*	*M*	*M*	-	*H*
CLO-3 :	*Accrue the knowledge of equipments used in off shore construction practice*	*2*	*85*	*75*	*H*	*H*	-	*M*	*M*	-	-	-	*H*	*H*	*H*	*M*	*M*	-	*H*

CLO-5 :	*Apply the knowledge in demolition and dismantling the distressed structures*	*2*	*85*	*75*	*H*	*H*	-	*H*	*M*	-	-	-	*H*	*H*	*H*	*M*	*M*	-	*H*
CLO-6 :	*Accrue comprehensive knowledge of automation in construction practices*	*2*	*85*	*75*	*H*	*H*	-	*M*	*H*	-	-	-	*H*	*H*	*H*	*H*	*M*	-	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction on Construction Equipment*	*Earth Moving operations*	*Dredging equipment*	*Drilling equipments*	*Lifting equipments*
	SLO-2		*Types of Earthwork Equipment*	*Types of Dredging equipment*	*Types of Drilling equipments*	*Material handling equipments*
S-2	SLO-1	*Equipment Management in Construction Projects*	*Earthwork Equipment - Tractors*	*Types of trenching equipment*	*Principles of Blasting*	*Hoisting Equipments*
	SLO-2	*Management Programme*	*capacity calculations*		*Types of Blasting equipment*	*Types and safety precautions*
S-3	SLO-1	*Maintenance and Safety management*	*Earthwork Equipment - Motor Graders*	*Concept of Pipe jacking techniques*	*Aggregate production equipment*	*Slip form techniques*
	SLO-2	*Equipment requirement for construction project*	*Capacity calculations*	*Equipment used for Pipe jacking*	*Crushers*	
S-4	SLO-1	*Planning of Equipment*	*Earthwork Equipment - Scrapers,*	*Compaction equipments*	*Various types of crushers, feeders and screening equipments*	*Equipments for Conveyors*
	SLO-2	*Selection of Equipment*	*capacity calculations*	*Types of Compaction equipments*		*Types of Conveyors*
S-5	SLO-1	*Cost Control of Equipment*	*Earthwork Equipment - Front end Loaders*	*Pumping and Dewatering equipments*	*Concrete mixers*	*Prestressing techniques*
	SLO-2	*Depreciation on Equipment*	*capacity calculations*	*Types of pumps*	*Types of concrete mixers*	*Insitu prestressing in high rise structures*
S-6	SLO-1	*Conventional construction methods*	*Earthwork Equipment – Bull dozer*	*Well point Dewatering system*	*Pouring and pumping of concrete*	*Aerial transportations*
	SLO-2		*Capacity calculations*	*Vacuum dewatering of concrete flooring*	*Precautions*	*Applications and applications*

S-7	SLO-1	*Mechanized methods*	*Earthwork Equipment – Excavators*	*Pile Driving Equipments*	*Ready mix concrete - concept and procedure*	*Robots in construction*
	SLO-2	*Advanced Mechanized methods*	*Capacity calculations*	*Types and methods*		*Different automated equipments*
S-8	SLO-1	*Types of construction project*	*Equipments Used for Box Jacking Techniques*	*Concept of Coffer dam*	*Demolition equipment*	*Conventional plastering machines*
	SLO-2	*Types of construction equipment*		*Sheet piling*	*Controlled demolition techniques*	*Use of robots for repetitive activities*
S-9	SLO-1	*Safety Management*	*General safety in excavations*	*Tunneling equipments*	*Sequence of demolition*	*Drones in construction*
	SLO-2	*Safety measures*		*Methods of tunneling*	*Procedure for Dismantling*	*Advantages of drones*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To understand Indian Contract Act and to know the various types of construction contracts and their legal aspects*
CLR-2 :	*Learn about contracts and agreements*
CLR-3 :	*Acquire the knowledge of FIDIC concepts*
CLR-4 :	*Apply the concept of various types of taxes*
CLR-5 :	*Learn about the different types of labour laws*
CLR-6 :	*Utilize the knowledge of labour laws and legal requirements in broader perspective*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Indian contract act*	*Tender- Definitions and Methods*	*Construction claims: Extra items and causes of claims*	*Legal Requirements- Insurance and Bonding*	*Labour Regulations-social security*
	SLO-2	*Definitions and important terms. Clause 1-75*	*Need for tendering, agreements and bonds in tendering process*	*Types of construction claims, documentation*	*Types of insurance*	*Welfare legislation*
S-2	SLO-1	*Elements of contract*	*Notice inviting tender*	*Settlement of claims*	*Laws governing sale*	*Laws relating to wages, Bonus and industrial disputes*
	SLO-2	*Types of contract – Legal parlance, Engineering contracts*	*Tender- Prequalification process*	*Arbitration- comparison and action of laws*	*Purchase and sale of urban and rural land*	*Labour administration*
S-3	SLO-1	*Features and suitability*	*Bidding, Accepting*	*Agreements, subject matter*	*Land revenue codes*	*Insurance and safety regulations*
	SLO-2	*Design of contract documents*	*Evaluation of technical, contractual and commercial point of view*	*Causes of disputes and importance of role of various stakeholders in prevention of disputes*	*Tax laws- income tax, sales tax ,VAT*	*Workmen compensation act*
S4	SLO-1	*International contract document*	*One cover and two cover system*	*Alternate dispute resolution methods*	*Excise on custom duties and their influence on construction cost*	*Indian factory act*
	SLO-2	*Standard contract document*	*Contract formation and interpretation*	*Violations, Appointment of arbitrator*	*Legal requirements for planning*	*Child labour act*
S-5	SLO-1	*Importance of breach of contract*	*Potential contractual problems*	*Conditions of arbitrator Powers and duties of arbitrator*	*Property law, Agency law*	*Maternity act*
	SLO-2	*Law of torts*	*World bank procedures and guidelines*	*Rules of evidences*	*Local government laws for approval*	*Minimum wages act*
S-6	SLO-1	*Special and general conditions of contract*	*Tamilnadu transparency in tenders Act.*	*Dispute review boards*	*Statutory regulations*	*Payment of wages act,1936*
	SLO-2	*Introduction to FIDIC contracts and types*	*EMD, SD*	*Indian arbitration and conciliation act1996*	*The companies act 1956: nature and definition of a company*	*Industrial dispute act*
S-7	SLO-1	*ICE conditions- introduction*	*Environmental provisions for construction contracts*	*Difference between 1940 act and 1996 act*	*Registration and incorporation*	*Domestic engaging of misconduct*
	SLO-2	*Evaluation of FIDIC document, types*	*Duties and responsibilities- engineers and contractors, Project manager, owner*	*Extent application of 1996 act. objectives and general provisions*	*Memorandum of association*	*The Tamilnadu and country planning act*

S-8	SLO-1	*Design and build contract, EPC contract*	*Important site documents*	*Conciliation and its provisions in the act*	*Articles of association,, prospectus, kinds of company*	*Building and other construction works act,1996*
	SLO-2	*Short forms contract-colour code*	*Process of building permissions*	*Conduct of conciliation and arbitral proceedings, ground for challenge*	*Directors: powers, duties, meetings and winding up*	*Employees state insurance act,1948*
S -9	SLO-1	*Various conditions of red book*	*Provisions for scheduling delays and accelerations*	*Procedure of appeal against the awards.*	*Managing performance- introduction, monitoring and performance*	*Contract labour act,1970*
	SLO-2	*Case study*	*Case study*	*Case study*	*Case study*	*Case study*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Civil Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To assess the diagnosis of distress*
CLR-2 :	*To provide an overview of performance of concrete structures*
CLR-3 :	*To identify the sources of dampness and its prevention remedies*
CLR-4 :	*To choose the appropriate material and its application*
CLR-5 :	*To assess the extent of distress*
CLR-6 :	*To study strengthening and demolition of structural component*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Diagnosis the distresses*	3	85	75	H	H	-	M	-	H	-	-	-	-	-	-	H	-	-
CLO-2 :	*Understand the performance of the concrete*	3	85	75	H	H	-	M	-	H	-	-	-	-	-	-	H	-	-
CLO-3 :	*Sources of dampness and its remedies can be able to identify*	3	85	75	H	H	-	M	-	H	-	-	-	-	-	-	H	-	-
CLO-4 :	*Know about types of materials and its selection*	3	85	75	H	H	-	M	-	H	M	-	-	-	-	-	H	-	-
CLO-5 :	*Rectify the Distress in various structures*	3	85	75	H	H	-	M	-	H	-	-	H	-	-	-	H	-	-
CLO-6 :	*Strengthen and demolish the structural components*	3	85	75	H	H	-	M	-	H	M	M	H	-	-	-	H	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*General Consideration – Distresses monitoring, Causes of distresses*	*Sources of dampness*	*Materials: Types*	*Distresses : Concrete Structures: Introduction, Causes of deterioration*	*General principle for Strengthening*
	SLO-2	*Defects due to climate, wear and erosion*	*Moisture movement from ground*	*Essential parameters for Materials*	*Diagnosis of causes, Flow charts for diagnosis*	*Relieving loads*
S-2	SLO-1	*Quality assurance & Inspection*	*DPC*	*Special Mortar And Concretes, Concrete Chemicals*	*Methods of repair – repairing, spalling and disintegration*	*Strengthening super structures*
	SLO-2	*Structural & Economic appraisal*	*Reasons for ineffective DPC*	*Special Cements*	*Repairing of concrete floors and pavements*	*Plating*
S-3	SLO-1	*Life Expectancy of Different Types of Buildings*	*Roof leakage - Pitched roofs*	*High Grade Concrete*	*Steel Structures : Types and causes for deterioration*	*Conversation to composite construction*
	SLO-2	*Influence of Environmental Elements on Buildings*	*Madras Terrace roofs*	*Expansive Cement*	*Types and causes for deterioration – preventive measures*	*Post stressing*
S-4	SLO-1	*Design and Construction Errors*	*Leakage of Concrete slabs*	*Polymer Concrete*	*Repair procedure - Brittle fracture*	*Jacketing*
	SLO-2	*Corrosion Mechanism*	*Protective Seal coatings*	*Epoxies, Resins*	*Lamellar tearing*	*Bonded overlays*
S-5	SLO-1	*Effect of Biological Agents*	*Ferro cement overlay*	*Surface Coatings*	*Defects in welded joints*	*Reinforcement addition*
	SLO-2	*Termite Control and Prevention*	*Resin or polymer slurry injection*	*Parameters & types of coatings*	*Mechanism of corrosion*	*Fiber wrap techniques*
S-6	SLO-1	*Chemical Attack on Building*	*Thin polymer overlay*	*Sulphur Infiltrated Concrete*	*Design of protect against corrosion*	*Pre placed aggregate concrete*
	SLO-2	*Aspects of Fire on Buildings*	*Thin epoxy overlay*	*Properties and application of SIFCON*	*Design and fabrication errors*	*Shortcrete*

S-7	SLO-1	*Building Cracks Causes – diagnosis*	*Dampness in solid walls*	*Ferro cement*	*Distress during erection.*	*Strengthening concrete by surface impregnations*
	SLO-2	*Remedial measures*	*Condensation – hygroscopic salts*	*Application of Ferro cement*	*Masonry Structures: Discoloration and weakening of stones*	*Vacuum methods*
S-8	SLO-1	*Thermal cracks*	*Remedial treatments*	*Fiber Reinforced Concrete*	*Biotical treatments*	*Strengthening the substructures: Shoring*
	SLO-2	*Shrinkage cracks*	*Dry pack & epoxy bonded dry pack*	*Types and applications*	*Preservation – Chemical preservatives*	*Under pinning*
S-9	SLO-1	*Vegetation and trees*	*Chemical coating*	*Admixtures*	*Brick masonry structures*	*Increasing the load capacity of footing*
	SLO-2	*Foundation movements*	*Flexible and rigid coatings*	*Chemical and Mineral admixtures*	*Distresses and remedial measures.*	*Design for rehabilitation.*

ACADEMIC CURRICULA

Professional Elective Courses

COMPUTER SCIENCE AND ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18CSE351T	Course Name	COMPUTATIONAL LOGIC	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the basics of Propositional logic*
CLR-2 :	*Acquire skills on rules to handle Propositional logic*
CLR-3 :	*Understand the First order Logic and Meta theorems*
CLR-4 :	*Learn the art of application of AI Concepts.*
CLR-5 :	*Master various theorems on Logic*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Apply the skills acquired on propositional logic to solve examples at hand*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Apply the rules learnt towards problem solving*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Acquire mastry over FOL and Meta theorems and apply the same with confidence*	2	85	80	H	M	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Apply the acquired knowledge on AI under appropriate problem solving contexts*	2	80	75	H	H	H	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Attempt to apply the acquired knowledge on logics under appropriate problem solving contexts*	2	75	85	H	M	H	-	-	-	-	-	M	-	-	H	-	-	-

Program Learning Outcomes (PLO)

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Propositional Logic-Introduction*	*Natural Deduction of Propositional Logic: Rules of Conjunction, Disjunction*	*First Order Logic-Introduction*	*Axiomatic System FC: Introduction*	*Modal Logic K-Introduction*
	SLO-2	*Syntax of PL*	*Natural Deduction of Propositional Logic: Implication, Negation*	*First Order Logic-Illustration*	*Axiomatic System FC: Example applications, Illustrations*	*Modal Logic K-Illustration*
S-2	SLO-1	*Is It a Proposition?*	*Natural Deduction of Propositional Logic: Proofs*	*Syntax of FL*	*Monotonicity Theorem-Detail*	*Syntax and Semantics of K*
	SLO-2	*Unique Parsing, PropDet*	*Natural Deduction of Propositional Logic: Examples*	*Scope and Binding*	*Deduction Theorem- Detail*	*Syntax and Semantics of K: Illustration*
S-3	SLO-1	*Sub Propositions, Precedence rules*	*Natural Deduction of Propositional Logic: Problems*	*Scope and Binding-Illustration*	*Theorem-RA, Fitness- Detail*	*Validity and Consequence in K*
	SLO-2	*Proposition: Theorems and Examples*	*Natural Deduction of Propositional Logic: Problems*	*Substitutions*	*Paradox of material Implication-Detail*	*Validity and Consequence in K: Illustration*
S-4	SLO-1	*Interpretations*	*Derived Rules of Propositional Logic: Introduction*	*Substitutions- Illustrations*	*Strong Generalization Theorem:Introduction*	*Axiomatic System KC*
	SLO-2	*Boolean conditions, Truth table*	*Derived Rules of Propositional Logic: Examples*	*Substitutions- Problems*	*Strong Generalization Theorem: Illustration*	*Axiomatic System KC: Illustration*
S-5	SLO-1	*Interpretations: Theorems, Conventions and Lemma*	*Derived Rules of Propositional Logic:Problems*	*Semantics of FL*	*Adequacy of FC to FL*	*Adequacy of KC to K*
	SLO-2	*Interpretations: Examples*	*Derived Rules of Propositional Logic:Problems*	*Semantics of FL: Illustration*	*Adequacy of FC to FL: Illustration*	*Adequacy of KC to K: Illustration*
S-6	SLO-1	*Models: Introduction to terminologies*	*Parse Tree*	*Translating into FL*	*Compactness of FL*	*Natural Deduction in K*

	SLO-2	*Equivalences and Consequences : Introduction to terminologies*	*Sub Formula*	*Translating into FL: Illustrations*	*Compactness of FL: Proof*	*Natural Deduction in K: Illustration*
S-7	SLO-1	*Equivalences and Consequences : Examples*	*Soundness of Propositional Logic*	*Satisfiability and Validity*	*Laws in FL*	*Analytic Tableau for K*
	SLO-2	*Deduction Theorem (DT)-Introduction*	*Soundness of Propositional Logic: Illustration*	*Satisfiability and Validity:Illustrations*	*Laws in FL: Illustration*	*Analytic Tableau for K: Illustration*
S-8	SLO-1	*RA Theorem, Monotonicity Theorem (M)-Introduction*	*Completeness of Propositional Logic*	*Metatheorems: Introduction*	*Natural Deduction*	*Modalities*
	SLO-2	*Fitness Theorem*	*Completeness of Propositional Logic: Illustration*	*Metatheorems: Deduction, Substitution, Chaining*	*Natural Deduction: Illustration*	*Modalities: Illustration*
S-9	SLO-1	*Theorem-Paradox of material Implication*	*Gentzen sequent calculus*	*Metatheorems: Examples*	*Analytic Tableaux*	*Computation Tree Logic*
	SLO-2	*Replacement Laws*	*Gentzen sequent calculus: Illustration*	*Metatheorems: Problems*	*Analytic Tableaux: Illustration*	*Computation Tree Logic: Illustration*

Course Code	18CSE352T	Course Name	NEURO FUZZY AND GENETIC PROGRAMMING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamentals of Artificial Neural Networks*
CLR-2 :	*Learn the various topologies and learning algorithms of ANN*
CLR-3 :	*Understand the principles and fundamentals of Fuzzy Logic*
CLR-4 :	*Understand the Fuzzy Rule based systems*
CLR-5 :	*Understand the basic concepts and techniques of Genetic Algorithms*
CLR-6 :	*Utilize the Neural, Fuzzy and Genetic Algorithms for real-time application development*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire the knowledge on constructing a neural network*	3	80	75	L	H	-	H	L	-	-	-	L	L	-	H	-	-	-
CLO-2 :	*Identify the basic Neural net and learning algorithm to apply for a real time problem*	3	85	75	M	H	M	M	H	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*Acquire the ability to use Fuzzy operators, membership functions, Fuzzification and Defuzzification Techniques*	3	75	70	M	H	M	H	M	-	-	-	M	L	-	H	-	-	-
CLO-4 :	*Gain Knowledge on applying the Fuzzy rules to different applications*	3	85	80	M	H	M	H	H	-	-	-	M	L	-	H	-	-	-
CLO-5 :	*Acquire the knowledge of fitness functions and Genetic operators*	3	85	75	H	H	M	H	M	-	-	-	M	L	-	H	-	-	-
CLO-6 :	*Apply the Genetic Algorithm to real-time applications*	3	80	70	M	H	M	H	H	-	-	-	L	L	-	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Biological and Artificial Neuron*	*Delta Rule, Derivation of GDR*	*Crisp sets*	*Fuzzification of Input Variables, Application of Fuzzy operations*	*History of Evolutionary Computing, Genetic Algorithms, basic concepts*
	SLO-2	*History of ANN*	*Backpropagation Algorithm, Local Minima Problem*	*Fuzzy sets*		*GA Cycle , Fitness Function,*
S-2	SLO-1	*ANN architectures*	*Radial Basis Function Neural Network*	*Fuzzy membership functions*	*Evaluation of Fuzzy rules, Aggregation of output Fuzzy sets*	*Introduction to GA Operators Selection Operators, Crossover, Mutation Operations*
	SLO-2	*Learning Algorithms*	*Pattern Association, Auto Associative nets*	*Operations of Fuzzy sets*		
S-3	SLO-1	*Activation Functions, Bias, Threshold and other parameters*	*Hetero Associative nets*	*Fuzzy Relations, Operations*	*Rule based systems, Conventional programs vs Rule based systems*	*Schema Theorem, Example*
	SLO-2	*McCulloch Pitts model,*	*Bidirectional Associative Memory Network*	*Fuzzy Extension Principle*	*Fuzzy Propositions*	
S-4	SLO-1 SLO-2	*Simulation of Logic Functions*	*Hopfield network Competitive networks: Maxnet*	*Crisp Relations, Fuzzy relations, Properties, operations,*	*Fuzzification*	*Classification of Genetic Algorithm*
S-5	SLO-1	*Perceptron Network*	*Self Organizing Map Network*	*Propositional Logic*	*Defuzzification*	*Holland Classifier Systems*
	SLO-2	*Hebbian network*	*Learning Vector Quantization*	*Crisp Logic*	*Fuzzy Controller : Air conditioner control, Cruise Controller*	*Genetic Programming*
S-6	SLO-1	*ADALINE networks*	*Adaptive Resonance Theory Network*	*Predicate Logic Rules of Inference*	*Fuzzy Decision making*	*Data Representation*
	SLO-2	*MADALINE networks*		*Fuzzy Truth, Fuzzy Rules*		*Genetic Operators*
S-7,8	SLO-1	*Practice of Neural Network tool : Simple Logic functions*	*Practice of Neural Network tool : Delta rule*	*Fuzzy Reasoning*	*Introduction to neuro fuzzy system- Adaptive Neuro-Fuzzy Inference Systems Coactive Neuro-Fuzzy Modeling*	*Application of Genetic Algorithm*
	SLO-2		*Practice of Neural Network tool : Pattern Classification*	*Practice of Fuzzy Logic tool: Fuzzy functions*	*Recent Applications*	*Practice of Optimization and Genetic algorithm tool*
S-9	SLO-1 SLO-2	*Practice of Neural Network tool : XOR problem*	*Practice of Neural Network tool : Pattern Clustering*	*Practice of Fuzzy Logic tool: Fuzzy operations*	*Practice of Fuzzy Logic tool : Fuzzy controller design and applications*

Course Code	18CSE353T	Course Name	DIGITAL IMAGE PROCESSING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*provide deep understanding of basic concepts of digital image acquisition*
CLR-2 :	*provide deep Understanding of various digital image enhancement techniques*
CLR-3 :	*Understand image restoration and segmentation methods*
CLR-4 :	*provide understanding and implementation of image compression techniques*
CLR-5 :	*Provide understanding and knowledge of image recognition methods*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand basics of digital images and tools for image processing*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Learn and implement image Enhancement techniques*	*2*	*75*	*80*	*H*	*H*	*H*	-	*H*	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Understand and Learn image Restoration and Segmentation Methods*	*2*	*85*	*80*	*H*	*H*	*M*	-	*H*	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Understand and implement Image Compression techniques*	*2*	*80*	*75*	*H*	*H*	*M*	-	*H*	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Learn and Implement Image Recognition methods*	*2*	*75*	*85*	*H*	*H*	*M*	-	*H*	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction*	*Introduction to Spatial Domain*	*Noise models – Mean Filters – Order Statistics*	*Wavelets – Subband coding – Multiresolution expansions*	*Boundary representation – Chain Code*
S-2	SLO-1	*Origin- Steps in Digital Image Processing*	*Gray level transformations*	*Adaptive filters – Band reject Filters – Band pass Filters*	*Fundamentals of Compression – Image Compression methods - Error Free Compression*	*Polygonal approximation, signature, boundary segments*
S-3	SLO-1	*Components*	*Histogram processing*	*Inverse Filtering – Wiener filtering Segmentation*	*Variable Length Coding – Bit-Plane Coding – Lossless Predictive Coding*	*Boundary description – Shape number*
S-4	SLO-1	*Elements of Visual Perception*	*Basics of Spatial Filtering*	*Point, Line, and Edge Detection*	*Lossy Compression – Lossy Predictive Coding*	*Fourier Descriptor*
S-5	SLO-1	*Image Sensing and Acquisition*	*Smoothing and Sharpening Spatial Filtering*	*Marr-Hildreth & Canny edge detector*	*Compression Standards-Huffman, Arithmetic coding, LZW coding, Run Length Encoding*	*Regional Descriptors*
S-6	SLO-1	*Image Sampling and Quantization*	*Frequency Domain: Basics of filtering*	*Edge Linking and Boundary detection*	*Compression StandardsHuffman, Arithmetic coding, LZW coding, Run Length Encoding*	*Topological - Texture – Patterns and Pattern classes*
S-7	SLO-1	*Relationships between pixels*	*Smoothing and Sharpening frequency domain filters*	*Local & Regional processing-Region based segmentation*	*Block Transform coding, Wavelet coding, JPEG standard*	*Recognition based on matching*
S-8	SLO-1	*Introduction to Image processing toolbox in MATLAB*	*Smoothing and Sharpening frequency domain filters*	*Morphological processing- Watershed segmentation algorithm*	*MATLAB code for image compression: Huffam coding, Arithmetic coding, wavelet coding*	*MATLAB code for image representation*
S-9	SLO-1	*Tool box practice*	*MATLAB code for histogram equalization*	*MATLAB code for restoring an image after degradation using adaptive and wiener filter*	*MATLAB code for image compression: Huffam coding,*	*MATLAB code for image recognition*
	SLO-2	*Exploring functions*	*MATLAB code for spatial and frequency domain filter.*	*Edge detection operators*	*Arithmetic coding, wavelet coding*	*MATLAB Practice exercises*

Sujatha, Assistant Professor*

Course Code	18CSE356T	Course Name	DISTRIBUTED OPERATING SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*To recognize the essential concepts of distributed system.*
CLR-2 :	*To comprehend about the communication that takes place in Distributed systems*
CLR-3 :	*To realize the necessity of synchronization, consistency and Fault tolerance in a Distributed System.*
CLR-4 :	*To value the Process management, File systems, Shared memory*
CLR-5 :	*To acquire apparent scheme regarding distributed object-oriented based systems*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Characterize the fundamental hardware and software concepts of distributed systems.*	3	80	70	H	M	M	H	H	M	-	-	H	M	-	H	-	-	-
CLO-2 :	*Categorize layered protocols and comprehend the communications in distributed systems*	3	85	75	H	M	H	M	H	M	-	-	H	M	-	H	-	-	-
CLO-3 :	*Implement synchronization of distributed systems using various algorithms.*	3	75	70	H	H	H	H	H	M	-	-	H	M	-	H	-	-	-
CLO-4 :	*Demonstrate process scheduling and fault tolerance of distributed systems.*	3	85	80	H	H	H	H	H	M	-	-	H	M	-	H	-	-	-
CLO-5 :	*Evaluate various Distributed Object-Oriented based systems.*	3	85	75	H	H	H	M	H	M	-	-	H	M	-	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction- Distributed Systems*	*Fundamentals of Communication systems*	*Synchronization in Distributed Systems- Fundamentals of Clock Synchronization*	*Processes and Processors in Distributed Operating Systems - Threads*	*Distributed Shared memory - Introduction*
	SLO-2	*Goals of Distributed Systems*		*Logical clock, Physical clock*	*Design issues of Threads package*	*Bus-Based Multiprocessors*
	SLO-2				*Work Station Model*	*Switched Multiprocessors*
S-2	SLO-1	*Hardware Concepts- Bus-based Multiprocessors*	*Layered Protocols*	*Algorithms for Clock synchronization*	*System Model - Introduction*	*Ring-based Multiprocessors*
S-3	SLO-1		*ATM networks*	*Mutual Exclusion-Centralized Algorithm*	*Using Idle Work Stations*	*Numa Multiprocessors*
	SLO-2	*Switched Multiprocessors*				*Comparison of Shared Memory Systems*
S-4	SLO-1	*Bus-based Multicomputers*	*Client Server model - Blocking Primitives*	*Distributed Algorithm*	*Processor Pool Model, Hybrid Model*	*Consistency Models – Strict Consistency, Casual Consistency, PRAM Consistency*
	SLO-2		*Non-Blocking Primitives*	*Token Ring Algorithm*	*Processor Allocation – Allocation Model*	*Weak Consistency, Release Consistency, Entry Consistency*
S-5	SLO-1	*Switched Multicomputers*	*Buffered Primitives*	*Comparison of all three algorithms*	*Design issues for processor Allocation Algorithms*	*Page Based Distributed Shared Memory – Replication, granularity*
	SLO-2		*Unbuffered Primitives*	*Importance of Election Algorithm*	*Example of processor Allocation Algorithms*	*Finding the Owner,Finding the Copies*
S-6	SLO-1	*Software Concepts-Network Operating System*	*Reliable primitives*	*Bully Algorithm*	*Scheduling in Distributed Systems*	*Page Replacement*
	SLO-2		*Unreliable primitives*	*Ring Algorithm*	*Load Balancing and Sharing Approach*	*Synchronization*
S-7	SLO-1	*True Distributed Systems*	*Message passing and its related issues*	*Atomic Transaction- Introduction*	*Fault Tolerance-Component Faults*	*Shared – Variable Distributed Shared memory*
	SLO-2			*Transaction Model, Concurrency Control*	*System Failures*	*Object Based Distributed Shared memory – DOO Architecture*
S-8	SLO-1	*Multiprocessors Timesharing Systems*	*Remote Procedure Call and its related issues*	*Deadlock in Distributed Systems*	*Synchronous versus Asynchronous Systems*	*Distributed Object-Oriented Process*

	SLO-2			*Distributed Deadlock Detection*	*Fault tolerance Using Active Replication, Primary-backup*	*Distributed Object-oriented Communication*
S-9	SLO-1	*Design Issues-Distributed Systems*	*Case Studies: SUN RPC, DEC RPC*	*Distributed Deadlock Prevention*	*Real Time Distributed Systems-Communication*	*Case Study - Amoeba*
	SLO-2				*Real Time Scheduling*	*Mach-OS, Chorus*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer science	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concept of authentication using biometrics.*
CLR-2 :	*Gain knowledge on the basics of biometric traits, sensors and data acquisition*
CLR-3 :	*Gain knowledge on design of biometric security systems*
CLR-4 :	*Acquire knowledge on pattern recognition systems*
CLR-5 :	*Introduce the various feature extraction and matching techniques for different biological traits.*
CLR-6 :	*Understand the real time application of biometrics*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire the knowledge on various biometric traits*	*1*	*80*	*85*	*H*	*M*	*H*	*H*	-	-	*H-*	-	-	-	-	-	-	-	-
CLO-2 :	*Acquire the ability to identify pattern recognition system and its features*	*1*	*75*	*80*	*H*	*H*	*H*	*H*	-	-	*H*	-	-	-	-	-	-	-	-
CLO-3 :	*Understand the basic ideas about physical and hehaviourial biometric traits*	*1*	*85*	*80*	*H*	*M*	*M*	*M*	-	-	*M*	-	-	-	-	-	-	-	-
CLO-4 :	*Apply the knowledge of biometrics on developing identification system.*	*2*	*80*	*75*	*H*	*M*	*M*	*M*	-	*H*	-	*H*	-	-	-	-	-	-	-
CLO-5 :	*Apply the knowledge for designing biometric sytems*	*2*	*75*	*85*	*H*	*H*	*L*	-	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Acquire the knowledge on authentication systems for real time security applications*	*1*	*80*	*85*	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction of biometric systems*	*Biometrics Sensors and Data Acquisition*	*Introduction to multibiometrics*	*Biometric system authentication*	*Biometric Authentication Applications*
	SLO-2	*Biometric functionalities: verification, identification*	*Biometric data acquisition and database*	*Sources of multiple evidence*	*physiological and behavioral properties of biometric system,*	*access control like a lock or an airport check-in area*
S-2	SLO-1	*The design cycle of biometric systems*	*Biometrics Pre-processing*	*Acquisition sequence*	*Software biometrics systems*	*immigration and naturalization*
	SLO-2	*Building blocks of a generic biometric system*	*The related biometrics preprocessing technologies*	*Processing sequence*	*Hardware biometrics systems*	*welfare distribution*
S-3	SLO-1	*Introduction to unimodal system*	*Image restoration*	*Fusion level*	*Security of biometric systems*	*military application*
	SLO-2	*Introduction to Multimodal biometric system*	*Image segmentation*	*Sensor level fusion*	*Advisory,insider,infrastructure attacks*	*banking, e.g., check cashing, credit card, ATM*
S-4	SLO-1	*Biometric system errors*	*Pattern extraction and classification*	*Feature level fusion*	*Attacks at the user interface*	*computer login; intruder detection; smart card*
	SLO-2	*Performance measures*	*Pattern classification*	*Score level fusion*	*impersonation ,obfuscation, spoofing*	*multi-media Communication; WWW and an electronic purse*
S-5	SLO-1	*Image processing basics*	*Fingerprint Recognition and acquisition*	*Rank level fusion*	*Attacks on biometric processing*	*sensor fusion; decision fusion*
	SLO-2	*what is image, acquisition, type, point operations, Geometric transformations*	*Fingerprint features, matching and synthesis*	*Decision level fusion*	*Attacks on system module and interconnections*	*categorization: e.g., age and gender*
S-6	SLO-1	*First and second derivative*	*Face recognition and acquisition*	*Features Matching and Decision Making*	*Counter measure: Biometric template security*	*industrial automation*
	SLO-2	*steps in edge detection, smoothening, enhancement, thresholding, localization,*	*Face detection, feature extraction and matching*	*Feature matching: null and alternative hypothesis h0, h1, Error type I/II, Matching score distribution, FM/FNM, ROC curve, DET curve, FAR/FRR curve.*	*Countermeasure:spoof dectection*	*gesture interpretation;*
S-7	SLO-1	*Robert's method, Sobel's method, Perwitts*	*Iris recognition and acquisition*	*Introduction to Various matching methods:*	*Challenges in biometric systems like fool proofing, false positives*	*efficient enrollment*

	SLO-2	*Laplacian of Gaussian, Zero crossing*	*Iris Segmentation, normalization and matching*	*LDA*	*Developing Tools for Comparing fingerprints*	*audio-visual tracking*
S-8	SLO-1	*Low level feature extraction, Describing image motion*	*Ear recognition*	*PCA, Eigen vectors and values, 2D-PCA,*	*Enhancing pattern when data is minimum*	*stock market;*
	SLO-2	*High level feature extraction ,Template matching*	*Ear detection*	*generalization to p-dim, covariance and correlation, algebra of PCA, projection of data*	*Biometric failures in special cases like(too much moisture in hands which system can't read)*	*on-line shopping*
S-9	SLO-1	*Hough transform for lines*	*Hand geometry features*	*Introduction to decision theory and their examples*	*Mini project: Fingerprint, Face detection*	*compact embedded systems*
	SLO-2	*Hough transform for circles and ellipses*	*palmprint features*	*Explanation – examples*	*Mini project: signature ,iris detection*	*other commercialized services*

Course Code	18CSE359T	Course Name	NATURAL LANGUAGE PROCESSING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CSE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Teach students the leading trends and systems in natural language processing.*
CLR-2 :	*Make them understand the concepts of morphology, syntax, semantics and pragmatics of the language and that they are able to give the appropriate examples that will illustrate the above mentioned concepts.*
CLR-3 :	*Teach them to recognize the significance of pragmatics for natural language understanding.*
CLR-4 :	*Enable students to be capable to describe the application based on natural language processing and to show the points of syntactic, semantic and pragmatic processing.*
CLR-5 :	*To conceive basics of knowledge representation, inference, and relations to the artificial intelligence.*
CLR-6	*To understand natural language processing and to learn how to apply basic algorithms in this field*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO – 3
CLO-1 :	*Understand approaches to syntax and semantics in NLP.*																		
CLO-2 :	*Understand approaches to discourse, generation, dialogue and summarization within NLP.*	*2*	*80*	*85*	*H*	*H*	*H*	*H*	*H*	-	-	-	*H*	*M*	*M*	*H*	*H*	*H*	*H*

Course Code	18CSE360T	Course Name	INFORMATION STORAGE AND MANAGEMENT	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the components of storage infrastructure.*
CLR-2 :	*Gain knowledge to evaluate storage architectures including storagesubsystems*
CLR-3 :	*Understand the business continuity, backup and recovery methods.*
CLR-4 :	*Acquire knowledge on information security framework*
CLR-5 :	*Introduce the working principle of storage infrastructure with monitoring principles*
CLR-6 :	*Understand the structure of cloud computing and its techniques*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire the knowledge on the components of storage infrastructure*	*3*	*80*	*70*	*M*	-	-	-	-	-	-	-	*L*	-	-	*M*	-	-	-
CLO-2 :	*Acquire the ability to evaluate storage architectures including storagesubsystems*	*3*	*85*	*75*	*M*	*M*	*M*	*M*	-	-	-	-	*L*	-	-	*H*	-	-	-
CLO-3 :	*Understand the business continuity, backup and recovery methods.*	*3*	*75*	*70*	*M*	*M*	*M*	*M*	-	-	-	-	*L*	-	-	*H*	-	-	-
CLO-4 :	*Appreciate the concepts of storage security and information security applied to virtual machine*	*3*	*85*	*80*	*M*	*M*	*L*	*L*	-	-	-	-	*M*	-	-	*H*	-	-	-
CLO-5 :	*Apply the knowledge for storage infrastructure*	*3*	*85*	*75*	*L*	*M*	-	-	-	-	-	-	*M*	-	-	*H*	-	-	-
CLO-6 :	*Acquire the knowledge on structure of cloud computing and its techniques*	*3*	*80*	*70*	*M*	-	-	-	-	-	-	-	*L*	-	-	*H*	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Information Storage Management*	*Virtualization and Cloud Computing : Fiber Channel: Overview*	*Business Continuity And Back Up Recovery Business Continuity: Information Availability.*	*Storage Security And Management :*	*Cloud Computing:Cloud Enabling Technologies*
	SLO-2	*Evolution of Storage Architecture*	*SAN and its Evolution*	*BC Terminology, BC Planning life cycle*	*Information Security Framework*	*Characteristics of Cloud Computing*
S-2	SLO-1	*Data Centre Infrastructure*	*Components of FC SAN, FCConnectivity, FC Architecture*	*Failure Analysis, Business Impact Analysis*	*Risk Triad*	*Benefits of Cloud Computing*
	SLO-2	*Virtualization and Cloud Computing*	*IPSAN-iSCSI components*	*BC Technology Solutions*	*Storage Security Domains*	*Cloud Service Models*
S-3	SLO-1	*Key challenges in managing information.*	*iSCSI Protocol StackiSCSI Names*	*Backup and Archive: Backup Purpose*	*Security Implementations in Storage Networking*	*Cloud Deployment models*
	SLO-2	*Data Center Environment: Application*	*NAS: General Purpose Servers versus NAS Devices*	*Backup Considerations*	*Securing Storage Infrastructure in Virtualized and Cloud Environments*	*Cloud Infrastructure Mechanism: Logical Network Perimeter*
S 4-5	SLO-1 SLO-2	*Database Management System (DBMS)*	*Benefits of NAS- File Systems and Network File Sharing*	*Backup Granularity , Recovery considerations*	*RSA and VMware Security Products*	*Virtual Server , Cloud Storage Device*
S-6	SLO-1	*Host : Connectivity, Storage*	*Components of NAS*	*Backup Methods, Backup Architecture*	*Monitoring the Storage Infrastructure*	*Cloud Usage Monitor*
	SLO-2	*Disk Drive Components,Disk Drive Performance*	*NAS I/O Operation*	*Backup and Restore Operations*	*Monitoring Parameters,*	*Resource Replication*
S-7	SLO-1	*Intelligent Storage System*	*NAS Implementations*	*Backup Topologies*	*Components Monitored, Monitoring examples*	*Ready Made environment*
	SLO-2	*Components of an Intelligent Storage System*	*NAS File Sharing Protocols*	*Backup in NAS Environments*	*Storage Infrastructure Management Activities*	*Container*
S-8	SLO-1	*Storage Provisioning*	*Object Based Storage Devices*	*Backup Targets, Data Deduplication for Backup*	*Storage Infrastructure Management Challenges, Storage Management Examples*	*Cloud Challenges*
	SLO-2	*Types of Intelligent Storage Systems*	*Content Addressed Storage*	*Backup in Virtualized Environments*	*Storage Allocation to a New Server/Host,*	*Cloud Adoption Considerations*
S-9	SLO-1 SLO-2	*Creation of Virtual storage machine, Navigation of storage system .*	*Configuration and Tracing of FC scan and iSCSI scan*	*Sharing Files between host and Virtual Machines, Usage of Backup techniques*	*Creation of an Linux Instance in Public Cloud, Generate a private key, Access using SSH client*	*Usage of Cloud services with open source cloud tools (like Eucalyptus, Openstack, Open Nebula and others)*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CSE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand basic sensor network concepts*
CLR-2 :	*Know physical layer issues, Medium Access Control Protocols*
CLR-3 :	*Comprehend network and transport layer characteristics and protocols*
CLR-4 :	*Understand the network management and Middleware services*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the basic ideas about sensor network concepts with Applications and Apply the knowledge for WSN tools*	2	80	85	H	H	H	H	M	M	M	M	M	H	L	H	H	H	H
CLO-2 :	*Acquire the knowledge on wireless transmission technology ,hardware and Medium Access Protocols*	2	75	80	H	H	H	H	M	M	M	M	M	H	L	H	H	H	H
CLO-3 :	*Understand the basic ideas about Wireless Sensor Networks Routing protocols and network - transport layer characteristics*	2	85	80	H	H	H	H	M	M	M	M	M	H	L	H	H	H	H
CLO-4 :	*Apply the knowledge for network management and Middleware services*	2	80	75	H	H	H	H	M	M	M	M	M	H	L	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to computer and wireless sensor networks*	*Wireless Transmission Technology and systems*	*Overview-Wireless Mac Protocols*	*Design Issues in WSN routing- Data Dissemination and Gathering*	*WSN middleware principles-*
	SLO-2				*Routing Challenges in WSN*	
S-2	SLO-1	*Motivation for a network of Wireless Sensor nodes -*	*Radio Technology Primer*	*Characteristics of MAC protocols in Sensor networks*	*Flooding*	*Middleware architecture*
	SLO-2	*Sensing and sensors*	*Available Wireless Technologies*			*Data related functions, Architecture*
S-3	SLO-1	*Challenges and constraints*	*Hardware- Telosb*	*Contention free MAC Protocols*	*Flat Based Routing – SAR*	*Existing middleware*
	SLO-2				*Directed Diffusion*	*MiLAN, IrisNet*
S-4	SLO-1	*Node architecture*	*Hardware -Micaz motes*	*MAC Protocols -Characteristics*	*MCFA Coherent processing*	*AMF,DSWare*
	SLO-2	*Sensing sub system*		*Traffic Adaptive Medium Access*	*Non-Coherent Processing*	*CLMF*
S-5	SLO-1	*Processor sub system*	*Time Synchronization- Clock*	*Y-MAC*	*Hierarchical Routing- LEACH,TEEN, APTEEN,PEGASIS*	*Operating systems for wireless sensor networks*
	SLO-2	*Communication interfaces-- prototypes*		*Low energy Adaptive Clustering*		
S-6	SLO-1	*Application of Wireless sensors*	*Synchronization Problems*	*Contention based MAC Protocols*	*Query Based Routing*	*Performance and traffic management*
	SLO-2				*Negotiation Based Routing*	
S-7	SLO-1	*WSN Tools- Overview and Limitations*	*Basics of time synchronization*	*Sensor MAC*	*Geographical Based Routing*	*Fundamentals of network security*
	SLO-2		*Time synchronization protocols*	*Timeout MAC and pattern MAC*		
S-8	SLO-1	*Contiki -Introduction*	*Localization*	*MAC protocols in ContikiOS simulator*	*Routing protocol simulation in contiki*	*Network security Challenges*
	SLO-2		*Ranging Techniques*	*Nullmac in Contiki simulator*	*RPL objective function &simulation using DGRM model cooja*	
S-9	SLO-1	*Characteristics of Contiki WSN simulator*	*Range based Localization Range Free Localization*	*CSMA in Contiki simulator*	*RPL(Routing Protocol for Low-Power and Lossy Networks) Border Router simulation in Contiki 2.7 OS*	*Attacks Protocols mechanisms for security*
	SLO-2		*Event driven Localization*

Course Code	18CSE453T	Course Name	NETWORK ROUTING ALGORITHMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18CSC302J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand how addressing and routing are tied together and different architectural components are related to routing.*
CLR-2 :	*Gain knowledge on the need for routers, its functionality and different architectures.*
CLR-3 :	*Understand fundamental basis of various algorithms in centralized and distributed point of view.*
CLR-4 :	*Apply the knowledge of IP addressing in various routing algorithms.*
CLR-5 :	*Understand the various types of key routing protocols used in wireless networks.*
CLR-6 :	*Gain knowledge on past experiences and prepare for next generation networks and routing*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire the knowledge of how data transfer happens in conventional networks*	2	80	85	H	M	-	-	L	-	-	-	-	M	-	H		-	-
CLO-2 :	*Comprehend Router Architectures and IP Address Lookup Algorithms*	2	75	80	H	H	M	M	L	-	-	-	-	-	L	H	-	-	-
CLO-3 :	*Compare routing techniques and protocols*	2	85	80	H	H	L	M	M	-	-	-	M	-	L	H	-	-	-
CLO-4 :	*Examine how different dimensions of routing differ for different types of network*	2	80	75	H	H	H	H	H	L	-	M	M	-	-	H	-	-	-
CLO-5 :	*Apply various routing algorithms in wireless network scenario.*	2	75	85	H	H	H	H	M	-	-	-	M	-	-	H	-	-	-
CLO-6 :	*Understand various routing paradigms in next generation*	2	80	85	H	H	H	M-	M	L	-	-	-	-	-	H	-	-	-

Duration (hour)		8	9	9	9	10
S-1	SLO-1	*Network Routing: An Introduction to Routing algorithms*	*Router Architectures: Basic Forwarding Functions*	*Bellman-Ford algorithm*	*Routers, Networks, and Routing Information: Some Basics*	*Routing in Wireless Networks: Internet based mobile ad-hoc networking*
	SLO-2	*Functions of Router*	*Routing table versus forwarding table*	*Distance Vector Approach*	*Routing Table, Communication of Routing Information*	*Classifications of routing protocols*
S-2	SLO-1	*IP addressing- Classful Addressing*	*Types of router*	*Dijkstra's Algorithm*	*Routing Information Protocol, Version 1 (RIPv1)*	*Table-Driven Routing Protocols: Destination Sequenced Distance-Vector Routing Protocol*
	SLO-2	*Classless Addressing*	*Elements of Router*	*Comparison of Bellman-Ford and Distance Vector Approach*	*Routing Information Protocol, Version 2 (RIPv2)*	*Cluster-Head Gateway Switch Routing Protocol*
S-3	SLO-1	*Protocol architecture stack – OSI Reference Model*	*Packet Flow*	*Shortest Path Computation with Candidate Path Caching*	*Interior Gateway Routing Protocol (IGRP)*	*On-Demand Routing Protocols: Dynamic Source Routing Protocol*
	SLO-2	*IP Protocol Stack Architecture*	*Packet Processing*	*Widest Path Computation with Candidate Path Caching*	*Enhanced Interior Gateway Routing Protocol (EIGRP), Route Redistribution*	*Ad Hoc On-Demand Distance-Vector Routing Protocol*
S-4	SLO-1	*Network Topology Architecture*	*Shared CPU architecture, Shared forwarding Engine Architecture*	*Widest Path Algorithm*	*OSPF: Protocol Features*	*Hybrid Routing Protocols: Core Extraction Distributed Ad Hoc Routing Protocol*
	SLO-2	*Network Management Architecture*	*Shared Nothing Architectures, Clustered Architectures*	*k-Shortest Paths Algorithm*	*OSPF Packet Format*	*Zone Routing Protocol*
S-5	SLO-1	*Public Switched Telephone Network*	*Impact of Addressing on lookup*	*Routing Protocol, Routing Algorithm, and Routing Table*	*Integrated IS-IS*	*Routing Protocols With Efficient Flooding Mechanisms : Preferred Link-Based Routing Protocols*
			Longest Prefix Matching	*Routing Information Representation and Protocol Messages*	*Similarities and Differences Between IS-IS and OSPF*	*Optimized Link State Routing*
S-6	SLO-1	*Communication Technologies*	*Naïve Algorithms, Binary Tries*	*Distance Vector Routing Protocol*	*IP Traffic Engineering: Traffic, Stochasticity, Delay, and*	*Hierarchical Routing Protocols*

					Utilization	
					Applications' View	Power-Aware Routing Protocols
S-7	SLO-1	Standard Committees – International TeleCommunication Union	Multi-bit Tries	Link State Routing Protocol	Traffic Engineering: An Architectural Framework	Toward Next Generation Routing:Quality of Service Routing
	SLO-2	Internet Engineering Task Force, MFA Forum	Compressing multi-bit strides		Traffic Engineering: A Four-Node Illustration	
S-8	SLO-1	Type Length Value	Search By Length Algorithms	Path Vector Routing Protocol	BGP Operations, configuration, faces of BGP	Multiprotocol Label Switching(MPLS)
	SLO-2	Network Protocol Analyzer	Search By value approaches		BGP Decision Process	Generalized MPLS
S-9	SLO-1		Hardware Algorithms	Network Flow Modeling: Single-Commodity Network Flow	Internal BGP Scalability	Routing and Traffic Engineering with MPLS
	SLO-2		Comparing Different Approaches	Multicommodity Network Flow: Three-Node Example	Protocol Message Format	
S-10	SLO-1					PSTN Call Routing Using the Interne
	SLO-2

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To learn about Modern Processors and concepts*
CLR-2 :	*To understand the basic concepts of optimizations*
CLR-3 :	*To learn about Parallel Computers and programming*
CLR-4 :	*To understand the basic concepts of parallelization*
CLR-5 :	*To Study about Memory Parallel Programming using OpenMP*
CLR-6 :	*To Study about Memory Parallel Programming using and MPI*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)
CLO-1 :	*Acquire the knowledge of Modern processors and concepts*	*2*	*80*	*85*
CLO-2 :	*Understand the basic ideas about Optimizations*	*2*	*75*	*80*
CLO-3 :	*Acquire the ability to identify parallel computers*	*2*	*85*	*80*
CLO-4 :	*Appreciate the concepts of parallelization*	*2*	*80*	*75*
CLO-5 :	*Apply the knowledge on parallel programming using Open MP*	*2*	*75*	*85*
CLO-6 :	*Acquire the knowledge on parallel programming using MPI*	*2*	*80*	*85*

Program Learning Outcomes (PLO)

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Stored Program Computer Architecture*	*Scalar profiling- Function- and line-based runtime profiling*	*Taxonomy of parallel computing paradigms*	*Introduction to OpenMP*	*Distributed-memory parallel programming with MPI- Message passing*
	SLO-2	*General-ptupose cache-based microprocessor architecture*	*Hardware performance counters .*	*Shared-memory computers*	*Parallel execution*	*introduction to MPI*
S-2	SLO-1	*Performance based metrics and Benchmarks*	*Manual instrumentation*	*Cache coherence*	*Data scoping*	*Messages and point-to-point Communication, Collective Communication*
	SLO-2	*Transistors galore:*	*Common sense optimizations- Do less work!*	*UMA – ccNUMA*	*OpenMP worksharing for loops*	*Nonblocking point-to-point Communication*
S-3	SLO-1	*Moore's Law*	*Avoid expensive operations!*	*Distributed-memory computers*	*Synchronization*	*Virtual topologies*
	SLO-2	*Pipelining*	*Shrink the working set!*	*Hierarchical (hybrid) systems*	*Reductions*	*Example: MPI parallelization of a Jacobi solver*
S-4	SLO-1	*Superscalarity*	*Simple measures, large impact- Elimination of common subexpressions*	*Networks- Basic performance characteristics of networks*	*Loop scheduling, Tasking*	*MPI implementation*
	SLO-2	*SIMD*	*Avoiding branches*	*Buses, Switched and fat-tree networks*	*Miscellaneous*	*Performance properties, MPI performance tools*
S-5	SLO-1	*Memory hierarchies*	*Using SIMD instruction sets*	*Mesh networks, Hybrids*	*Case study: OpenMP-parallel Jacobi algorithm*	*Communication parameters*
	SLO-2	*Cache*	*The role of compilers*	*Parallelism- Data parallelism*	*Advanced OpenMP: Wavefront parallelization*	*Synchronization, serialization, contention*
S-6	SLO-1	*Cache mapping*	*General optimization options*	*Functional parallelism*	*Efficient OpenMP programming*	*Implicit serialization and synchronization*
	SLO-2	*Prefetch*	*Inlining, Aliasing*	*Parallel scalability*	*Profiling OpenMP programs*	*Contention*
S-7	SLO-1	*Multicore processors*	*Computational accuracy*	*Factors that limit parallel execution*	*Performance pitfalls*	*Reducing Communication overhead*
	SLO-2	*Multithreaded processors*	*Register optimizations, Using compiler logs*	*Scalability metrics, Simple scalability laws*	*Ameliorating the impact of OpenMP worksharing constructs*	*Optimal domain decomposition*

S-8	SLO-1	*Vector processors-*	*C++ optimizations- Temporaries*	*Parallel efficiency, Serial performance versus strong scalability*	*Determining OpenMP overhead for short loops*	*Aggregating messages*
	SLO-2	*Design principles*	*Dynamic memory management*	*Refined performance models*	*Serialization*	*Collective Communication*
S-9	SLO-1	*Maximum performance estimates*	*Loop kernels and iterators*	*Choosing the right scaling baseline*	*False sharing*	*Nonblocking vs. asynchronous Communication,*
	SLO-2	*Programming for vector architectures*	*Storage order- Case study: Jacobi algorithm and Dense matrix transpose.*	*Load imbalance*	*Case study: Parallel sparse matrix-vector multiply*	*Understanding intranode point-to-point Communication*

Course Code	18CSE455T	Course Name	DATABASE SECURITY AND PRIVACY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CSE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamentals of security relates to information*
CLR-2 :	*how security is maintained in information systems*
CLR-3 :	*Understand the concept of security models in database*
CLR-4 :	*Implementation of virtual private dtabase*
CLR-5 :	*Learn the procedures of database auditing*
CLR-6 :	*Implementation of data mining algorithms for PPDM*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Acquire the knowledge of information system and information security*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Able to manage the security of information system as well as database*	*2*	*75*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Able to design and develop the security model in database*	*2*	*85*	*80*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Able to implement VPD in various database*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Able to audit the database activities, users, security*	*2*	*75*	*85*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Apply the security mechanism in PPDM using various algorithms*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Security Architecture: Introduction*	*Administration of Users-Introduction*	*Database Application Security Models: Introduction-*	*Auditing Database Activities-introduction*	*Privacy Preserving Data Mining Techniques: Introduction*
	SLO-2	*Information Systems*	*Authentication*	*Types of Users*	*Oracle Database Activities*	*Data Mining Techniques:*
S-2	SLO-1	*Database Management Systems*	*Creating Users*	*-Security Models*	*Oracle Database Activities*	*Privacy Preserving Data Mining Algorithms*
	SLO-2	*Information Security Architecture*	*SQL Server User*	*Application Types*	*Creating DLL Triggers with Oracle*	*Privacy Preserving Data Mining Algorithms*
S-3	SLO-1	*- Database Security*	*Removing, Modifying Users*	*-Application Security Models*	*Creating DLL Triggers with Oracle*	*General Survey-Data Mining Techniques*
	SLO-2	*Asset Types and value*	*Default users*	*Data Encryption*	*Auditing Database Activities with Oracle*	*Randomization Methods*
S-4	SLO-1	*Security Methods*	*Remote Users*	*Virtual Private Databases: Introduction*	*Auditing Database Activities with Oracle*	*Randomization Methods*
	SLO-2	*Operating System Security Fundamentals: Introduction*	*Database Links*	*-Overview of VPD*	*Auditing Server Activity with SQL Server 2000*	*Group Based Anonymization*
S-5	SLO-1	*Operating System Overview*	*Linked Servers*	*Implementation of VPD using Views*	*Auditing Server Activity with SQL Server 2000*	*Group Based Anonymization*
	SLO-2	*Security Environment*	*Remote Servers*	*Application Context in Oracle*	*Auditing Server Activity with SQL Server 2000*	*Distributed Privacy Preserving Data Mining*
S-6	SLO-1	*Security Components*	*Practices for Administrators and Managers-*	*Implementing Oracle VPD-*	*Auditing Server Activity with Oracle*	*Distributed Privacy Preserving Data Mining*
	SLO-2	*Authentication Methods*	*Profiles, Password Policies, Privileges and Roles: Introduction*	*Implementing Oracle VPD*	*Auditing Server Activity with Oracle*	*Curse of Dimensionality*
S-7	SLO-1	*User Administration*	*Defining and Using Profiles*	*Viewing VPD Policies*	*Security and Auditing*	*Application of Privacy Preserving Data Mining*
	SLO-2	*Password Policies*	*Designing and Implementing Password Policies*	*VPD using views*	*Security and Auditing*	*Application of Privacy Preserving Data Mining*
S-8	SLO-1	*Vulnerabilities*	*Best Practices*	*Application contexts using Data Dictionary*	*Casestudy: projest security and auditing*	*Casestudy: on PPDM*
	SLO-2	*Vulnerabilities*	*Granting and Revoking User Privileges*	*Policy manager implementation*	*Casestudy: projest security and auditing*	*Casestudy: on PPDM*

S-9	SLO-1	*Email Security*	*Creating, Assigning and Revoking User Roles*	*Policy Manager Implementing Row and Column level Security with SQL Server*	*Casestudy: projest security and auditing*	*Casestudy: on PPDM*
	SLO-2	*Internet security*	*Best practices*	*Policy Manager Implementing Row and Column level Security with SQL Server*	*Casestudy: projest security and auditing*	*Casestudy: on PPDM*

							3	0	0	3

Pre-requisite Courses	18CSC302J	Co-requisite Courses	Nil	Progressive Courses	
Course Offering Department	CSE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*cover topics more advanced than a typical undergraduate networking course*
CLR-2 :	*prepare students for a market that is going to demand computer scientists and software engineers to deliver the next generation of network switches*
CLR-3 :	*describe the principles by which large computer networks and applications atop them are designed and maintained*
CLR-4 :	*Make students understand the state-of-the art networking technologies proposed in literature or used throughout industry in a variety of areas*
CLR-5 :	*Make students learn to critique research literature through a number of paper reviews and attempt to improve the state-of-the-art through minor and major projects*

Course Learning Outcomes (CLO):	*At the end of this course, learners will::*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*have a knowledge of the technology evolution leading to SDN as well as the Open Source role in SDN and OpenFlow specifications*	*3*	*75*	*80*	*H*	*M*	*H*	*-*	*H*	*-*	*-*	*-*	*-*	*-*	*-*	*H*	*H*	*H*	*H*
CLO-2 :	*gain a knowledge of the advantages and disadvantages of SDN, API approaches, Hypervisor overlays, and Data Center SDN, SDN WAN etc*	*3*	*75*	*80*	*H*	*M*	*H*	*-*	*H*	*-*	*-*	*-*	*-*	*-*	*-*	*H*	*H*	*H*	*H*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Analyze the fundamental of transmission and cellular systems*
CLR-2 :	*Apply skills in real time engineering problems and can have capability to evaluate the transmission errors*
CLR-3 :	*Comprehend the concept of mobile network, transport layer and wireless technologies*
CLR-4 :	*Differentiate the various types of cellular standard by their unique services.*
CLR-5 :	*Grasp GSM. GPRS, Handover and Localization techniques*
CLR-6 :	*Apply skills in various Routing protocols*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Apply Wireless Technology concepts to Engineering problems related to Communication*	3	80	70	H	H	H	H	H	H	H	H	H	H	M	H	H	H	H
CLO-2 :	*Improve their knowledge on Digital and analog Modulation techniques.*	3	85	75	H	H	H	H	H	H	H	H	H	H	M	H	H	H	H
CLO-3 :	*Equip themselves familiar with principle of Mobile Communication*	3	75	70	H	H	H	H	H	H	H	H	H	H	M	H	H	H	H
CLO-4 :	*Familiarize with Digital Cellular Standards*	3	85	80	H	H	H	H	H	H	H	H	H	H	M	H	H	H	H
CLO-5 :	*Acquaint with routing protocols*	3	85	75	H	H	H	H	H	H	H	H	H	H	M	H	H	H	H
CLO-6 :	*Expose to the emerging wireless technologies*	3	80	70	H	H	H	H	H	H	H	H	H	H	M	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to wireless Communication*	*Cellular Concept*	*Introduction to GSM*	*Mobile IP*	*IEEE 802.11*
	SLO-2	*Elements of wireless Communication system*	*Cell area*	*Frequency Bands and Channels*	*IP packet delivery*	*System Architecture*
S-2	SLO-1	*Frequencies for radio Communication*	*Signal strength*	*Frames in GSM*	*Tunneling – Reverse Tunneling*	*Protocol Architecture*
	SLO-2	*Signals, Noise – Types of Noise*	*Cell parameter*	*Planes and layers of GSM*	*IPv6*	*MAC Layer and Management*
S-3	SLO-1	*Introduction to modulation and demodulation*	*Capacity of Cell*	*Protocols*	*DHCP*	*802.11a, 802.11b*
	SLO-2	*Signals in the modulation*	*Co channel interference*	*Localization and calling*	*Tradition TCP*	*HIPERLAN*
S-4	SLO-1	*Introduction to Analog modulation schemes*	*Frequency reuse*	*Handoff – Short messaging system*	*Congestion control*	*Bluetooth Architecture*
	SLO-2	*Amplitude Modulation Frequency modulation*	*Cell splitting Cell sectoring*	*GPRS EDGE*	*Classical TCP Snooping ,*	*IEEE 802.15* *IEEE 802.15.4*
S-5	SLO-1	*Phase Modulation Introduction to Analog modulation schemes*	*Multiple Radio access protocols Frequencydivision Multiple Access*	*3G CELLULAR SystemsMMS*	*Mobile TCPFast retransmit / Fast recovery*	*MANET characteristicsROUTING*
	SLO-2	*Amplitude Shift Keying Frequency Shift Keying Phase Shift Keying- BPSK, QPSK*	*Time division Multiple Access Fixed ALOHA , Slotted ALOHA*	*UMTS Release and standards UMTS system architecture UTRAN*	*Transaction oriented TCP TCP over 2.5/3G wireless Networks*	*AODV Routing VANETCommunications in VANET*
S-6	SLO-1	*Multiplexing and multiple access techniques*	*Multiple Access with Collision Avoidance*	*Handover*	*Introduction to WAP WAP Architecture*	*Wireless Sensor Networks*
S-7	SLO-1	*Frequency-division multiplexing*	*Space division Multiple Access Code division Multiple Access*	*Satellite System Infrastructure- GEO, LEO, MEO*	*Wireless Datagram ProtocolWireless Transaction Protocol*	*RFID TechnologyTwo tags of RFID*
	SLO-2	*Time-division multiplexing*	*Spread ALOHA multiple Access*	*Limitations of GPS*	*Wireless Session Protocol*	*Wi-Fi Standards*
S-8	SLO-1	*Code-division multiplexing*	*OFDM*	*GPSBeneficiaries of GPS*	*Wireless Transport Layer Security*	*WiMax Standards*
	SLO-2	*Spread spectrum modulation*	*Variants of OFDM*			
S-9	SLO-1	*frequency hopping Spread spectrum*	*Comparison of Multiple Access Technique*	*4G Cellular systems*	*Wireless Markup Language*	*Fem-to-Cell Network*
	SL0-2	*Direct Sequence Spread spectrum*		*4G Standards (LTE/WiMax)*	*Push Architecture*	*Push-to-talk technology for SMS*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn service oriented analysis techniques*
CLR-2 :	*Learn technology underlying the service design*
CLR-3 :	*Learn advanced concepts in building SOA*
CLR-4 :	*Understand the Java Web services*
CLR-5 :	*To know about various Web services specification standards*
CLR-6 :	

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Acquire the knowledge on service oriented design technology*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Acquire the ability to identify web services in SOA*	*2*	*75*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Understand the basic ideas about building SOA*	*2*	*85*	*80*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Appreciate the concepts of standards and security on SOA*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Apply the knowledge in Java based web servise*	*2*	*75*	*85*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Acquire the knowledge on ASP .NET based web servises.*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to SOA , Defining SOA*	*Introduction to Web Services*	*Phases of the SOA delivery lifecycle*	*SOA support in J2EE*	*Introduction to WS-BPEL*
	SLO-2	*Necessity of SOA.*	*Primitive SOA*	*SOA Delivery Strategies Top- down strategy, Bottom-up strategy*	*SOA platform basics and building blocks*	*Basic terms used in the BPEL terminology*
S-2	SLO-1	*SOA timeline from XML to Web services to SOA*	*Web Service Framework with respect to SOA*	*Agile strategy with Pros and cons*	*Overview of Java API for XML-based web services(JAX- WS)*	*WS-Coordination overview*
	SLO-2	*History about XML*	*Logical components of the Web services framework*	*Objectives and service-oriented process steps*	*Java Architecture for XML binding (JAXB)*	*WS-Choreography*
S-3	SLO-1	*Web Services and SOA*	*Service descriptions with WSDL layout*	*Benefits of a business-centric SOA*	*Building web services and client with examples*	*WS-Policy with SOA*
	SLO-2	*Service Oriented Enterprise (SOE)*	*Meta data and service contracts*	*Service- oriented design*	*Introduction to Java API for XML Registries(JAXR)*	*WS Security*
S-4	SLO-1	*Analyze the past architectures*	*Messaging with SOAP protocol and SOAP nodes*	*Introduction to WSDL language basics*	*Java API for XML based RPC (JAX-RPC)*	*Notification and Eventing*
	SLO-2	*Scope Of SOA*	*SOAP message path*	*Define the structure of WSDL*	*Web Services Interoperability*	*Transaction Management*
S-5	SLO-1	*SOA Reference Model*	*Message exchange Patterns and Coordination*	*Implement sample WSDL file*	*SOA support in .NET*	*Case study-SOA in cloud*
	SLO-2	*Key Service characteristics of SOA*	*Web Services a Activity Management,*	*Introduction to SOAP basics*	*NET Platform overview*	*research focus on SOA and issues*
S-6	SLO-1	*Anatomy of SOA*	*Coordination types and protocols*	*SOAP language basics*	*ASP.NET Page Handling*	*Comparative Analysis of SOA and Cloud Computing*
	SLO-2	*SOA architecture*	*ACID properties*	*Structure of SOAP*	*Post back vs Non post back events*	
S-7	SLO-1	*Components in SOA interrelate*	*Analyze atomic transaction with SOA*	*Implement SOAP style web services in Java.*	*ASP.NET web services*	*Case Study On Vehicle management system- create a service for identify the vehicle by entering the vehicle number.*
	SLO-2	*SOA component and specific behaviors*	*Business activities and protocols*	*SOA Composition*	*Creating a Web Site Using Visual Studio IDE*	

S-8	SLO-1	*Relationships among these components*	*Orchestration*	*service layers and standards*	*ASP.NET Programming Basics*	*Case Study on Online Healthcare System-Design an API to help healthcare providers collect, store, retrieve and exchange patient healthcare information more efficiently and enable better patient care.*
	SLO-2	*Technical Benefits of SOA*	*Choreography*	*Entity-centric business service design: List the step-by-step process*	*Creating a Web Site Using Visual Studio IDE*	
S-9	SLO-1	*Business Benefits of SOA*	*Service layer configuration scenarios*	*Application service design: process steps*	*Case Studies: Implement the Small Business Customer Management application as a web applications using ASP.NET*	*Case study on Simple Library Management System using API to get, post, edits and update book data from server.*
	SLO-2	*Principles of service orientation*	*Application Service Layer*	*Task centric business service design process steps*	*Web Services Enhancements (WSE)*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*The Historical Development of Evolutionary Computing. Genetic Algorithms and Genetic Programming*	*Terminologies and operators of GA.Key elements, Individuals,*	*Diploidy, Dominance etc. Inversion and Reordering. Order Crossover and Cycle crossover.*	*Genetic programming (GP). Comparison of GP and other algorithms. Genetic operators. Tree based GP, Representation of GP.*	*Specific Applications of Genetic Algorithms. GA in network synthesis, Control systems engineering and Fuzzy based speed control of Brushless DC motor.*
	SLO-2		*Genes, Fitness, Populations. Data Structures.*			
S-2	SLO-1	*Features of Evolutionary Computation Advantages of Evolutionary computation.*	*Breeding, Selection, Crossover, Mutation and Replacement.*	*Micro operators: Segregation and translocation, Duplications and Deletion, Sexual determination.*	*Attributes in GP. Steps of GP, Characteristics of GP. What are Human Competitive, High-Return, Routine, and Machine Intelligence?*	*Feature selection in machine learning using GA. Designing texture filters with GA.*
	SLO-2					
S-3	SLO-1	*Genetic algorithms-Biological background. Cell, Chromosomes, Genetics, Reproduction and Natural selection.*	*Search Termination or Convergence criteria.*	*Non-binary representation, Multi-objective optimization, combined optimization and Knowledge based techniques.*	*Applications of Genetic Programming*	*GA based knowledge acquisition in Image Processing. Object localization in image using GA.*
	SLO-2					
S-4	SLO-1	*Search space, GA world, Evolution and optimization*	*Best individual, Worst individual, Sum of fitness and Medium fitness.*	*Classification of GAs. Simple Genetic algorithms (SGA). Parallel and distributed GAs.*	*GA Optimization problems: Fuzzy optimization problems, Multi objective Reliability Design Problem. Network and bicriteria reliability problems.*	*Data mining applications such as feature selection in data mining, GA in intrusion detection, etc.*
	SLO-2					
S-5	SLO-1	*Evolution and genetic algorithms. Conventional optimization and search techniques.*	*Why do genetic algorithms work? Building block hypothesis*	*Master-slave, Fine-grained parallel GAs. Multiple-Deme Parallel GAs.*	*Combinatorial Optimization problems. Linear integer model,*	*Applications in wireless networks for topology planning. GA application in ATM network.*
	SLO-2					
S-6	SLO-1	*Gradient based, Random search, Stochastic Hill climbing*	*A Macro mutation hypothesis. An adaptive mutation hypothesis.*	*Hierarchical Parallel algorithms. Hierarchical Genetic Algorithms: Crossover, Initialization heuristics. Remove sharp algorithms.*	*Applications of combinatorial optimization methods.*	*VLSI design applications Genetic layout optimization using GA.*
	SLO-2					
S-7	SLO-1	*Simulated Annealing, Symbolic AI. A simple Genetic Algorithm.*	*The schema theorem*	*Adaptive GA., Initialization, Evaluation function, Selection operators, Crossover operators, and mutation operators.*	*Network design and Routing problems*	*Introduction to Particle Swam Optimization [PSO] and Ant Colony Optimization [ACO].*
	SLO-2		*Optimal allocation of Trials. Implicit Parallelism*			

S-8	SLO-1	*Comparison of GA with other optimization techniques.*	*Advanced operators and techniques in GA,*	*Independent sampling GA and Breeding Phase.*	*Planning of passive optical networks, Packet switched networks,*	*Examples on PSO and ACO.*
S-9		*Limitations of GA.*	*Convergence problems in GA*	*Niched pareto genetic algorithm*	*Optimal topological design of all terminal networks.*	*Comparison of GA with PSO and ACO*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Why neural network?*	*Components of artificial neural networks*	*Learning and training samples*	*Radial basis functions*	*Unsupervised learning networkparadigms*
	SLO-2	*Basics of Artificial Neural Networks*	*The concept of time in neural networks*	*Paradigms of Learning*	*Information processing of an RBF network*	*Structure of a self-organizing map(SOM)*
S-2	SLO-1	*A brief history of neural networks*	*Connections*	*Using training samples*	*Training of RBF networks*	*Functionality*
	SLO-2	*Biological neural networks*	*Propagation function*	*Gradient Optimization Procedure*	*Growing of RBF networks*	*Training*
S-3	SLO-1	*Biological neural networks*	*Activation*	*Hebbian learning rule*		*Topology function*
	SLO-2	*The vertebrate nervous system*	*Threshold value, Activation function*	*Supervised learning networkparadigms*	*Compare multilayer perceptrons and RBF*	*Decreasing Learning Rate*
S-4	SLO-1	*peripheral nervous system*	*Common activation functions*	*The perceptron, back propagation and its variants*	*Recurrent perceptron-like networks*	*Variations of SOMs*
	SLO-2	*Cerebrum, cerebellum, diencephalon,brainstem*	*Output function, Learning strategies*	*Singlelayer perceptron*	*Jordan networks*	*Neural gas*
S-5	SLO-1		*Network topologies*	*Linear Separability*	*Elman networks*	*Multi-SOM*
	SLO-2	*The Neuron*	*Feedforward networks*	*Multilayer perceptron*	*Training recurrent networks*	*Multi-neural gas*
S-6	SLO-1	*Components*	*Recurrentnetworks*	*Backpropagation of error*		*Growing neural gas*
	SLO-2	*Electrochemical processes*	*Completely linked networks*	*Selecting learning rate*	*Unfolding in time*	*Adaptive resonance theory(ART)*
S-7	SLO-1	*Receptor cells- Various types*	*Bias neuron*	*Resilient Backpropagation*	*Teacher forcing*	*Task and structure of an ART network*
	SLO-2	*Information processing within nervous system*	*Representing Neurons*	*Adaption of Weights*	*Recurrent backpropagation*	*Resonance*
S-8	SLO-1	*Light Sensing organs*	*Orders of Activation*	*Variations in Backpropagation*		
	SLO-2	*Neurons in living organisms*	*Synchronous activation*			
S-9	SLO-1	*Transition to technical neurons*	*Asynchronous activation*	*Multilayer perceptron*	*Evolutionary algorithms*	*Learning process of an ART network*
	SLO-2		input and outputof data

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Fuzzy Logic Introduction : Comparison of traditional logic and fuzzy logic*	*Machine learning : Importance of ML*	*Fuzzy Clustering Basics: Cluster analysis Objective function-based cluster analysis, Fuzzy analysis of data*	*Fuzzy Integral Classification: Introduction and Notation , Reduction vs. Ordering*	*Neuro Fuzzy Modeling : ANFIS – Adaptive Neuro Fuzzy Inference system*
	SLO-2	*Basic History of Fuzzy Logic*	*Types of MachineLearning : SupervisedLearning-Unsupervised Learning, reinforcement Learning*	*Special objective functions, A principal clustering algorithm*	*The Borda Count*	*ANFIS - architecture*
S-2	SLO-1	*The case of Imprecision, A Historical perspective*	*TheCurse of dimensionality Overfitting and linear regression*	*Classical Fuzzy Clustering Algorithms : The fuzzy c-means algorithm*	*The Average Rule , The Median Alternative*	*Hybrid learning algorithm*
	SLO-2	*The Utility of Fuzzy systems, Limitations of Fuzzy systems*		*The Gustafson-Kessel algorithm*	*The Product Rule, The MaxMax and MaxMin Rules*	*Coactive Neuro fuzzy modeling : Towards generalized ANFIS*
S-3	SLO-1	*Fuzzy sets and membership*	*Bias andVariance LearningCurve*		*The Intersection Method , The Union Rule*	*Framework*
	SLO-2	*Chance Vs Fuzziness*		*The Gath-Geva algorithm*	*Logistic Regression : The Logit Transform and Maximum Likelihood Estimation*	*Neuron functions for adaptive netwoks*
S-4	SLO-1	*Classical sets and Fuzzy sets : Operations on classical sets, properties of classical sets*	*Classification*	*Computational effort*	*Separate Weight Sets*	*Fuzzy membership functions Vs Receptive field units*
	SLO-2	*Operations on fuzzy sets, properties of fuzzy sets*	*Error and noise*	*Linear and Ellipsoidal Prototypes : The fuzzy c-varieties algorithm*	*Model Selection by Local Accuracy*	*Non-linear rule*
S-5	SLO-1	*Classical relations : Cartesian product, crisp relations*	*Measuring(dis)similarity-Evaluating the output of clusteringmethod*	*The adaptive fuzzy clustering algorithm*	*Maximizing the Fuzzy Integral : What Does This Have to Do with Classifier Combination?*	*Neuro-fuzzy spectrum*
	SLO-2	*Fuzzy relations: cardinality of fuzzy relations, operations on fuzzy relations*	*Hierarchical clustering, Agglomerativeclustering - Divisiveclustering*	*Algorithms by Gustafson/Kessel and Gath/Geva*	*Pairwise Coupling - Pairwise Threshold Optimization*	*Analysis of Adaptive learning capability : Convergence based on the steepest descend method alone*
S-6	SLO-1	*Properties of fuzzy relations*	*K-Meansclustering*		*Comparing the Combination Methods : Small Training Set, Three Models*	*Interpretability spectrum*

	SLO-2	*Tolerance and Equivalence relations: crisp tolerance*		*Cluster Estimation Models :AO membership functions*	*Large Training Set, Three Models*	*Evolution of antecedents*
S-7	SLO-1	*Fuzzy Tolerance*	*Perceptrons*	*ACE membership functions*	*Small Training Set, Three Good Models , One Worthless*	*Evolution of consequence*
	SLO-2	*Properties of Membership functions, Fuzzification and defuzzification – Features of the memberfunction*	*Feedforwardnetworks.*	*Hyperconic clustering (dancing cones)*	*Large Training Set, Three Good Models, One Worthless*	*Evolving partitions*
S-8	SLO-1	*Various forms*	*MultilayerNetworks and Back PropagationAlgorithms*	*Cluster Validity : Global validity measures*	*Small Training Set, Worthless and Noisy Models Included*	*Neuro Fuzzy Control : Feedback control systems and Neuro fuzzy control*
	SLO-2	*Defuzzification of crisp sets*	*Linear Models – Linear regression,Logistic regression*	*Solid clustering validity measures, Shell clustering validity measures*	*Large Training Set, Worthless and Noisy Models Included*	*Expert control*
S-9	SLO-1	*Lamda cuts of fuzzy relations, Defuzzification to scalars*	*Tree learning : Decision trees*	*Local validity measures : The compatible cluster merging algorithm, The unsupervised FCSS algorithm*	*Fuzzy Association rules*	*Inverse learning, specialized learning*
	SLO-2	*Conclusion : Benefits of Fuzzy in comparison with crisp*	*Conclusion : Summary of ML concepts*	*Conclusion : Fuzzy based clustering merits*	*Conclusion : Fuzzy based classifier benefits*	*Conclusion : Summary / benefits of Neuro-fuzzy systems*

CLO-5 :	*Apply the knowledge of K-means clustering on real world examples*	3	75	85	H	-	H	H	-	-	-	-	-	-	-	H	H	M	H
CLO-6 :	*Acquire the knowledge on using PCA and SVD with Scikit-learn*	2	80	85	H	-	H	H	-	-	-	-	-	-	-	H	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Statistical terminology for model building and validation-Machine Learning,Major differences between statistical modeling andmachine learning*	*Comparison between regression and machinelearning models*	*K-nearest neighbors-KNN voter example*	*Support Vector Machines and Neural Networks-Support vector machines working principles-Maximum margin classifier*	*K-means clustering-K-means working methodology from first principles*
	SLO-2		*Compensating factors in machine learning models*	*Curse of dimensionality-Curse of dimensionality with 1D, 2D, and 3D example*		
S-2	SLO-1	*Steps in machine learning model developmentand deployment*	*Assumptions of linear regression Steps applied in linearregression modeling*	*Curse of dimensionality with 3D example*	*Support vector classifier*	*Optimal number of clusters and cluster evaluation*
	SLO-2					
S-3	SLO-1	*Statistical fundamentals and terminology for model building and validation*	*Example of simple linear regression from first principles*	*KNN classifier with breast cancer Wisconsin data example*	*Support vector machines*	*The elbow method*
	SLO-2					
S-4	SLO-1	*Bias versus variance trade-off,Train and test data*	*Machine learning models - ridge and lasso regression-Example of ridge regression machine learning,Example of lasso regression machine learning model*	*Naive Bayes*	*Kernel functions*	*K-means clustering with the iris data example*
	SLO-2					
S-5	SLO-1	*Linear regression versus gradient descent Machine learning losses*	*Logistic Regression Versus Random Forest-Maximum likelihood estimation*	*Probability fundamentals-Joint probability*	*Artificial neural networks - ANN*	*Principal component analysis - PCA-PCA working methodology from first principles*
	SLO-2					
S-6	SLO-1	*When to stop tuning machine learning models*	*Terminology involved in logistic regression*	*Understanding Bayes theorem with conditional probability*	*Forward propagation and backpropagation*	*PCA applied on handwritten digitsusing scikit-learn*
	SLO-2		*Applying steps in logistic regression modeling*			
S-7	SLO-1	*Train, validation, and test data Cross-validation*	*Random forest-Example of random forest using German credit data*	*Naive Bayes classification*	*Optimization of neural networks-*	*Singular value decomposition - SVD*

	SLO-2		*Grid search on random forest*		*Stochastic gradient descent - SGD*	
S-8	SLO-1	*Grid Search*	*Variable importance plot*	*Laplace estimator*	*Introduction to deep learning-Solving methodology*	*SVD applied on handwritten digitsusing scikit-learn*
	SLO-2					
S-9	SLO-1	*Machine learning model overview*	*Comparison of logistic regression with random forest*	*Naive Bayes SMS spam classification example*	*Deep learning software*	*SVD applied on handwritten digitsusing scikit-learn*
	SLO-2

Course Code	18CSE480T	Course Name	NATURE INSPIRED COMPUTING TECHNIQUES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To Understand the basics of Natural systems*
CLR-2 :	*To appreciate the concepts of Natural systems and its applications*
CLR-3 :	*To understand newBasic Natural systems functions(operations)*
CLR-4 :	*To understand the fundamentals of nature inspired techniques which influence computing*
CLR-5 :	*To understand an Integration of Hardware and software in Natural applications.*
CLR-6:	*To Understand practical implementation of Natural design considerations.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Illustrate the basic concepts of Swarm Intelligenceprocesses*	3	80	70	L	H	L	H	L	L	M	L	L	L	M	L	L	L	L
CLO-2 :	*Examine the principle of Immuno computing techniques*	3	85	75	L	H	L	H	L	L	M	L	L	L	M	L	L	L	L
CLO-3 :	*Skills for planning, estimating, and resourcing for Natural design considerations*	3	75	70	L	H	L	H	L	L	M	L	L	L	M	L	L	L	L
CLO-4 :	*Manage the scope changes of nature inspired techniques which influence computing*	3	85	80	L	H	L	H	L	L	M	L	L	L	M	L	L	L	L
CLO-5 :	*Ability to identify optimization Techniques as a means to provide functionality and value to apply context in specific case studies*	3	85	75	L	H	L	H	L	L	M	L	L	L	M	L	L	L	L
CLO-6 :	*Ability to understand the needs and familiarize the DNA Computing*	3	80	70	L	H	L	H	L	L	M	L	L	L	M	L	L	L	L

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction*	*Evolutionary Computing*	*Swarm Intelligence*	*Introduction to Immune System*	*DNA Computing*
	SLO-2	*Overview of Philosophy*		*Introduction*		
S-2	SLO-1	*Nature to Nature Computing*	*Hill Climbing*	*Ant Colony Optimization*	*Physiology and main components*	*DNA Molecule*
	SLO-2			*Ant Foraging Behavior*		
S-3	SLO-1	*A Brief Overview of Three Branches*	*Simulated Annealing*	*Ant Colony Optimization*	*Pattern Recognition and Binding*	*Adleman's experiment*
	SLO-2	*Individuals, Entities and agents*		*SACO algorithm*		
S-4	SLO-1	*Parallelism and Distributivity Interactivity*	*Simulated Annealing*	*Ant Colony Algorithm (ACA)*	*Immune Network Theory*	*PAM Model*
	SLO-2				*Danger Theory*	
S-5	SLO-1	*Adaptation- Feedback*	*Genetics Principles*	*scope of ACO algorithms*	*Immune Algorithms*	*Splicing Systems*
	SLO-2					
S-6	SLO-1	*Self-Organization*	*Standard Evolutionary Algorithm*	*Swarm Robotics*	*Genetic algorithms*	*From Classical to DNA Computing*
	SLO-2	*Complexity, Emergence*	*Genetic Algorithms*			
S-7	SLO-1	*Bottom-up Vs Top-Down Approach*	*Reproduction*	*Social Adaptation of Knowledge*	*Bone Marrow Models*	*Universal DNA Computers*
	SLO-2		*Crossover Mutation*			
S-8	SLO-1	*Determination*	*Evolutionary Programming*	*Particle Swarm Optimization*	*Forest's Algorithm*	*Scope of DNA Computing*
	SLO-2					
S-9	SLO-1	*Chaos and Fractals*	*Genetic Programming*	*Particle Swarm Optimization*	*Artificial Immune Networks*	*Lipton's Solution to SAT Problem*
	SLO-2

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Analyze the text data using Machine Learning*
CLR-2 :	*Analyze the audio data using Machine Learning*
CLR-3 :	*Analyze Time series and Sequential data using Machine Learning*
CLR-4 :	*Analyze the Image Content using Machine Learning*
CLR-5 :	*Visualize the data*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Identifying patterns in text using topic modeling*	3	75	80	H	M	H	-	H	-	-	-	-	-	-	H	H	H	H
CLO-2 :	*Building a speech recognizer*	3	75	80	H	M	H	-	H	-	-	-	-	-	-	H	H	H	H
CLO-3 :	*Extracting statistics from time series data, Building Conditional Random Fields for sequential text data*	3	75	80	H	M	H	-	H	-	-	-	-	-	-	H	H	H	H
CLO-4 :	*Building an object recognizer*	3	75	80	H	M	H	-	H	-	-	-	-	-	-	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Text Feature Engineering Introduction*	*Speech Recognition Introduction*	*Dissecting Time Series and Sequential Data*	*Image Content Analysis*	*Biometric Face Recognition*
	SLO-2	*Cleaning text data*	*Reading audio data*	*Introduction*	*Computer Vision*	*Face detection from the image and video*
S-2	SLO-1	*Preprocessing data using tokenization*	*Plotting audio data*	*Transforming data into the time series format Pandas and Numpy to convert Time Series data*	*Operating on images using OpenCV- Python*	*Capturing and processing video from a webcam Resizing and Scaling*
	SLO-2	*Tagging and categorising words*	*Transforming audio signals into the frequency domain*	*Plotting time series data*	*Learn to extract and load the image*	*Building a face detector using Haar cascades*
S-3	SLO-1	*Sequential tagging, Backoff tagging*	*Apply Fourier transform signal and plot*	*Slicing time series data Operating on time series data*	*Detecting edges Histogram equalization*	*determine the location of a face in the video frames captured from the webcam*
	SLO-2	*Creating features from text data- Stemming,*	*Generating audio signals with custom parameters*	*Plotting sliced time series data*	*Sobel filter, Laplacian edge detector, Canny edge detector*	*Face detector on the grayscale image*
S-4	SLO-1	*Lemmatising*	*Generate the time axis*	*Operating on time series data*	*Histogram equalization*	*Building eye and nose detectors*
	SLO-2	*Bagging using random forests*	*Synthesizing music*	*Extracting statistics from time series data*	*Visualize gray scale image*	*Face cascade classifier*
S-5	SLO-1	*Implementing bag of words*	*Construct the audio sample -amplitude and frequency*	*Correlation coefficients*	*Detecting corners*	*Visualize eye and nose detector*
	SLO-2	*Testing prepared data*	*synthesizer function*	*Plotting and understanding correlations*	*Understand the output corner detection image*	*Performing Principal Components Analysis*
S-6	SLO-1	*Analyze the results*	*Extracting frequency domain features*	*Building Hidden Markov Models for sequential data*	*Detecting SIFT feature points*	*PCA in face recognition systems*
	SLO-2	*Building a text classifier*	*MFCC and filter bank features*	*Prepare the Time Series data*	*SIFT feature detection*	*Convert the dataset from a five-dimensional set to a two-dimensional set*
S-7	SLO-1	*Analyzing the sentiment of a sentence*	*Building Hidden Markov Models*	*Train Gaussian HMM*	*Visualize the feature detected image*	*Kernel Principal Components Analysis*
	SLO-2	*Implement the sentiment analysis of a sentence*	*HMM training and prediction*	*Visualizing the model*	*Building a Star feature detector*	*Perform Kernel PCA*

S-8	SLO-1	*Identifying patterns in text using topic modeling*	*Building a speech recognizer*	*Building Conditional Random Fields for sequential text data*	*Detect features using the Star feature detector*	*Plot the PCA-transformed data*
	SLO-2	*Implement identifying patterns in text using topic modeling*	*MFCC features*	*CRF Model*	*Visualize keypoints on the input image*	*Plot Kernel PCA-transformed data*
S-9	SLO-1	*Case study- Twitter Data*	*Case study*	*Analyzing stock market data using Hidden Markov Models*	*Creating features using visual codebook and vector quantization*	*Performing blind source separation*
	SLO-2	*Case study- Twitter Data*	*Case study*	*Train the HMM and visualize*	*Method to quantize the data points*	*Independent Components Analysis*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*History of Computational Neuroscience*	*Four components of Neural Signaling*	*From artificial neural network to realistic neural networks - Introduction*	*Memory Classification Scheme – Declarative, Non-declarative*	*Hebbian Learning-Hebbian versus Perceptron Learning-*
	SLO-2	*Models in Computational Neuroscience*	*Four components of Neural Signaling*	*Modelling the ventral stream*	*Auto-associative network and hippo campus - Learning and retrieval phase*	*Learning by Error Minimization*
S-2	SLO-1	*Computational Theory of the Brain*	*Neurotransmission*	*Modelling the dorsa and auditory stream*	*Point-attractor neural networks - Network dynamics and training*	*Gradient Descent Learning*
	SLO-2	*Biological Background*	*Population dynamics*	*Mechanical behavior of ceramics-flexural strength -The Perceptron .*	*Signal-to-noise analysis - Noisy weights and diluted attractor networks*	*Stabilizing Hebbian Learning*
S-3	SLO-1	*Basic synaptic mechanisms and dendritic processing*	*Modeling the average behavior of neurons*	*Mapping function*	*Sparse attractor neural networks and correlated patterns-Sparse patterns and expansion recoding*	*Principal Component Analysis (PCA)-Eigenvectors-Eigenvalues-Covariance matrix*
	SLO-2	*The generation of action potentials*	*Hodgkin*	*Multi-layer Perceptron*	*Control of sparseness in attractor networks*	*Singular Value Decomposition*
S-4	SLO-1	*Stimulation and rising phase*	*Modeling the average behavior of neurons*	*Back-propagation – Initution , Derivation*	*Chaotic networks-Attractors*	*Limits and Extensions of PCA*
	SLO-2	*Peak and falling phase*	*Huxley Model*	*Back-propagation –Loss Function*	*Lyapunov functions - The Cohen-Grossberg theorem*	*Variations of Hebbian Learning*
S-5	SLO-1	*After hyperpolarization and Refractory Period*	*Spiking neuron models - Single*	*Back-propagation – Limitation*	*Asymmetrical networks*	*Nonlinear Hebbian learning*
	SLO-2	*Hodgkin and Huxley equations - Intro*	*Spiking neuron models - Detailed*	*Support Vector Machines - Introduction*	*Non-monotonic networks*	*Linsker's Model of the Visual System*
S-6	SLO-1	*Neuron - axons,dendritesetc, thefour components ofNeural Signaling*	*Spiking neuron models – 2D Model*	*Support Vector Machines - Classification*	*Complementary memory systems*	*Application of Lateral Inhibition*
	SLO-2	*Neurotransmission:neurotrasmitter,rec epto r, ionchannel, channelgating*	*Integrate and firing model -Leaky integrate-and-fire model*	*Support Vector Machines - Regression*	*Distributed model of working memory-Limited capacity of working memory*	*Lateral Geniculate Nucleus*

S-7	SLO-1	*Electrophysiology -Nernst potential,resting potential,Goldman-Hodgkin-Katz voltageequation, outline ofthe Hodgkin- Huxley model.*	*Integrate and firing model -Nonlinear integrate-and-fire model*	*Support Vector Machines – Kernel Function*	*The spurious synchronization hypothesis*	*Striate Cortex*
	SLO-2	*Modeling ion1 channel kinetics,activation andinactivation gates*	*Integrate and firing model -Stimulation by synaptic currents*	*Self-organizing Maps - Introduction*	*The interacting-reverberating-memory hypothesis*	*Linsker's model for orientation columns*
S-8	SLO-1	*Completeformulation ofHodgkin-Huxleymodel. Relationbetween outputfiring and constant input current.Discussion ofregimes. Softwaredemo.*	*noise in spikingneuron model – part I*	*Self-organizing Maps - Variable*	*Motor Learning and Control*	*Reinforcement Learning -Elements of Reinforcement Learning*
	SLO-2	*Compartmental models: Cable theory*	*noise in spikingneuron model – part II*	*Self-organizing Maps - Algorithm*	*Feedback controller*	*Markov decision process-Dynamic programming algorithms for solving MDPs*
S-9	SLO-1	*Compartmental models: Cable theory – Cable Equation*	*compartmental modeling - I*	*Self-organizing Maps – SOM Initialization*	*Forward and inverse model controller*	*Algorithms for large state spaces*
	SLO-2	*Physical Shape of Neurons and Neuron Simulators*	*compartmental modeling -II*	*Self-organizing Maps – Kohonen Algorithm*	*The cerebellum and motor control*	*Gradient temporal difference learning*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamentals of Artificial Intelligence*
CLR-2 :	*Learn basics of Intelligent machining, sensors and machining process*
CLR-3 :	*Understand the design of Intelligent Systems - RTOS*
CLR-4 :	*Understand the computational methods, optimization and reasoning about physical system*
CLR-5 :	*Understand implications of Artificial Intelligence in various real time applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire the knowledge on the fundamentals of Artificial intelligence and its problem solving approaches*	2	80	85	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Acquire the knowledge on fundamentals of Intelligent Machining and machining process*	2	75	80	H	H	H	H	H	H	-	-	-	-	-	H	-	-	-
CLO-3 :	*Acquire knowledge on the design of Intelligent Systemsand RTOS*	2	85	80	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Acquire knowledge on computational methods and optimization*	2	80	75	-	H	-	-	H	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Apply the knowledge on Real time applications*	2	75	85	-	H	-	-	H	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Artificial Intelligence and it's techniques*	*Introduction Intelligent Machining, Basics*	*Representation of Intelligent systems*	*Computational methods and optimization*	*Case Study - Autonomous Vehicle (Driver Less Car)*
	SLO-2	*Problem Solving with Artificial Intelligence*	*Open Architecture Machine Control*	*Control for the Evolution of VLSI Designs*		
S-2	SLO-1	*AI Models, Data acquisition and learning aspects of AI*	*Manufacturing Automation Protocol*	*An Object-Oriented Approach*	*Neural Network Modelling*	*Case Study - Defect Prediction , Wear and Tear Prediction in Mechanical devices*
	SLO-2	*Problem Solving - Problem Solving Process, Formulating Problems*	*The Evolution of Intelligent Machining*			
S-3	SLO-1	*Problem types and Characteristics*	*MOSAIC - NGC*	*Tools and Techniques for Conceptual Design*	*Fuzzy set theory*	*Case Study - Flying Drones*
	SLO-2	*Problem Space and Search*	*OSACA - SERCOS*	*Design Compilers*		
S-4	SLO-1	*Intelligent Agent*	*Components of Intelligent Machining*	*Labelled Interval Calculus*	*Machining Optimization*	*Case Study -Cogito*
	SLO-2	*Rationality and Rational agent with performance measures*	*Introduction sensors - Machining Process*	*Knowledge Representations for Design Improvisation*		
S-5	SLO-1	*Flexibility and Intelligent Agents*	*Sensing and Monitoring*	*A knowledge-based Framework for Design*	*Objective Functions and Constraints*	*Case Study - Alexa , SIRI*
	SLO-2	*Task Environment and its Properties*	*Signal Processing*		*Optimization Techniques*	
S-6	SLO-1	*Types of Agents*	*Transforming Data into Information - Examples*	*Introduction to RTOS - Hardware Components*	*Reasoning about physical system*	*Case Study - Smarter Home robots*
	SLO-2	*Other aspects of agents*	*Machining Process Control*			
S-7	SLO-1	*Constraint satisfaction problem (CSP)*	*Practical Uses of Machine Learning*	*Design Principles of RTOS - Interupt Processing - task Management*	*Temporal Qualitative Analysis*	*Case Study -Application of AI in CAD/CAM*
	SLO-2	Crypto Arithmetic puzzles	Machine Learning Process Control Strategies			

S-8	SLO-1	*CSP as a search problem-constraints and representation*	*Programmable Logic Controllers (PLC)*	*Task Scheduling -Synchronization tools*	*Reasoning about Geometry*	*Case Study - Streamlining Drug Discovery*
	SLO-2	*CSP- backtracking and Role of heuristic*	*Closed Loop Process Control Systems*	*Task Communication - Memory Management*		
S-9	SLO-1	*CSP - Froward Checking and constraint propogation*	*Introduction to Adaptive Control*	*File System*	*Study of Heuristic knowledge for automatic configuration Generation and Innovation*	*Case Study - Betterment (Financial Advisor)*
	SLO-2	*CSP-Intelligent backtracking*	*Commercially Available Software*	*Tracing and Debugging*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concepts of Neural Networks and Deep Learning*
CLR-2 :	*Understand Deep neural network and layered learning approach*
CLR-3 :	*Study and understand CNN and RNN for deep learning*
CLR-4 :	*Learn and understand Auto Encoders and its applications*
CLR-5 :	*Understand concept of transfer learning and its applications with keras*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Apply basic mathematical concepts in Deep Learning*	2	80	85	H	L	-	-	H-	-	-	-	-	-	-	H	H	-	-
CLO-2 :	*Work with powerful framework for supervised learning*	3	75	80	H	H	-	-	H	-	-	-	-	-	-	H	H	H	M
CLO-3 :	*Deal with Convolution Neural Networks*	2	85	80	H	H	H	-	H	-	-	-	-	-	-	H	H	H	H
CLO-4 :	*Analyze various types efficient data encoders*	2	80	75	H	H	-	-	H	-	-	-	-	-	-	H	H	H	H
CLO-5 :	*Apply various network models in deep learning*	3	75	85	H	H	H	H	H	-	-	-	-	-	-	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Historical trends in deep learning – Machine Learning basics*	*Introduction to Simple DNN*	*Convolution Neural Networks Introduction*	*Encoder*	*Deep Architectures in Vision*
	SLO-2	*Learning algorithms – Supervised and Unsupervised Training*	*Platform for Deep Learning*	*Convolution Operation*	*Decoder*	*AlexNet to ResNet*
S-2	SLO-1	*Linear Algebra for machine learning*	*Deep Learning Software Libraries*	*Motivation*	*Auto Encoders Introduction*	*Transfer Learning*
	SLO-2	*Testing - Cross Validation*	*Deep Feed Forward Networks Introduction*	*Pooling*	*Auto Encoders*	
S-3	SLO-1	*Dimensionality Reduction*	*Learning XOR*	*Normalization*	*Under Complete Auto Encoder*	*Siamese Networks*
	SLO-2	*Over fitting /Under Fitting*	*Gradient-Based Learning*	*Applications in Computer Vision - ImageNet*	*Regularized Auto Encoder*	
S-4	SLO-1	*Hyper parameters and validation sets*	*Various Activation Functions, ReLU, Sigmoid – Error Functions*	*Sequence Modelling –VGGNet, LeNet*	*Stochastic Auto Encoder*	*Metric Learning*
	SLO-2	*Estimators – Bias - Variance*	*Architecture Design*	*Recurrent Neural Networks*	*Denoising Auto Encoder*	*Ranking / Triplet Loss*
S-5	SLO-1	*Loss Function-- Regularization*	*Differentiation Algorithms*	*RNN topologies- Difficulty in Training RNN*	*Contractive Auto Encoder*	*RCNNs with keras*
	SLO-2	*Biological Neuron – Idea of Computational units*	*Regularization methods for Deep Learning*		*Auto Encoder Applications*	
S-6	SLO-1	*McCulloch-Pitts units and Thresholding logic*	*Early Stopping*	*Long Short Term Memory*	*Dimensionality Reduction and Classification using Auto encoders*	*CNN-RNN*
	SLO-2	*Linear Perceptron*	*Drop Out*		*Recommendation*	
S-7	SLO-1	*Perceptron Learning Algorithm*	*Difficulty of training deep neural networks*	*Bidirectional LSTMs*	*Optimization for Deep Learning-Optimizers–RMS prop for RNNs*	*Applications in captioning and Video tasks*
	SLO-2	*Convergence theorem for Perceptron Learning Algorithm*				
S-8	SLO-1	*Linear Separability*	*Greedy layer wise training*	*Bidirectional RNNs*	*SGD for CNNs*	*3D CNNs*
	SLO-2	*Multilayer perceptron –The first example of network with Keras code*				
S-9	SLO-1	*Backprobagation*	*Optimization methods for Neural Networks-Adagrad, Adam*	*Application case study -Handwritten digits recognition using deep learning, LSTM with Keras – sentiment Analysis*	*Application case study – Image dimensionality reduction using encoders LSTM with Keras – sentiment Analysis*	*Application case study – Image recognition using RCNN and transfer learning*
	SLO-2

CLO-2 :	*Apply knowledge of Potential functions and Navigations*	3	85	75	M	H	L	M	L	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*Apply knowledge of Sampling Algorithms*	3	75	70	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-4 :	*Gain knowledge of filtering techniques*	3	85	80	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-5 :	*Gain knowledge about Trajectory and Motion Planning*	3	85	75	H	H	M	H	L	-	-	-	M	L	-	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Over view of Motion Planning*	*Potential Function: Addictive Attractive/Repulsive Potential*	*Sampling - Based Algorithms-Probabilistic Road Maps: Basic PRM*	*Linear Kalman Filtering*	*Trajectory Planning : Preliminaries*
	SLO-2	*Bug1 And Bug 2*	*Gradient Descent*	*Implementation of basic PRM*		
S-2	SLO-1	*Tangent Bug*	*Computing Distance From Implementation In The Plane*	*PRM sampling Strategies*	*Kalman Filter : Example*	*Decoupled Trajectory Planning*
	SLO-2	*Implementation: The Tangent Line*		*PRM connection Strategies*		
S-3	SLO-1	*Distance On Gradient*	*Local Minima Problem*	*Single-Query Sampling Based Planners: Expensive Spaces Trees*	*Bayesian Methods : Localization*	*Direct Trajectory Planning: Optimal Control*
	SLO-2	*Continuation Method*	*Wave-Front Planner*	*Rapidly Exploring Random Trees*	*Basic Idea Probabilistic Localization*	*Nonlinear Ptimization*
S-4	SLO-1	*Robot Configuration Specification*	*Navigation Potential Function: Sphere- Space*	*Connection Strategies and SBL Planner*	*Probabilistic Localization As Recursive Bayesian Filtering*	*Grid-Based Search*
	SLO-2		*Star-Space*			
S-5	SLO-1	*Circular Mobile Robot*	*Potential Functions for Rigid-Body Robots*	*Integration Of Planners Sampling Based Roadmap*	*Derivation Of Probabilistic Localization*	*Nonholonomic And Underactuated Systems : preliminaries*
	SLO-2	*Two joint planer arm*	*Path Planning for Articulated Bodies*			*Control Systems*
S-6	SLO-1	*Dimension Of The Configuration Space*	*Visibility Graph*	*Analysis Of PRM*	*Representation Of Posterior*	*Controllability*
	SLO-2					
S-7	SLO-1	*Topology of configuration space: Homeomorphisms and Diffeomorphisms*	*Deformation Retracts : Generalized Voronoi Diagram*	*Control based Planning*	*Sensor Model*	*Motion Planning: Optimal Control*
	SLO-2			*Multiple Robots*		
S-8	SLO-1	*Differentiable Manifolds*	*Retract -Like Structure: Generalized Voronoi Graph*	*Manipulation Planning*	*Mapping:: Mapping with known locations*	*Steering Chained -Form Systems Using Sinusoids*
	SLO-2					
S-9	SLO-1	*Examples*	*Piecewise Retracts: The Rod Hierarchical Generalized Voronoi GraphSilhouette Methods*	*Assembly Planning*	*Bayesian Simultaneous Localization and Mapping*	*Nonlinear Optimization*
	SLO-2

Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand different asymptotic notations to analyze an algorithms*
CLR-2 :	*Utilize various data structures in developing applications*
CLR-3 :	*Utilize stack and queues in processing data for real-time applications*
CLR-4 :	*Understand various data structures to handle graph theory related real-time applications*
CLR-5 :	*Understand various probabilistic algorithms and randomized algorithms for real-time programming applications*
CLR-6 :	*Understand various Complexity classes like P-Type, NP-Type, NP-Complete, NP-Hard problems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Understand complexity of various algorithms*	3	80	70	L	H	-	H	L	-	-	-	L	L	-	H	-	-	-
CLO-2 :	*How efficiently a problem can be solved with respect to time and space*	3	85	75	M	H	L	M	L	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*To find the appropriateness of Data structure for real time applications*	3	75	70	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-4 :	*Representation and Solving Graph algorithms*	3	85	80	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-5 :	*Understand approximation methods to solve very difficult problems*	3	85	75	H	H	M	H	L	-	-	-	M	L	-	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction-Basic Terminology*	*Elementary data structures-Array*	*Graph algorithms-Representation of graphs*	*Approximation algorithms*	*Complexity classes-Introduction*
	SLO-2	*Complexity of algorithms- Space and time complexity issues- Growth of functions*	*Operations on Arrays – Insertion and Deletion*	*BFS-DFS*	*The vertex-cover problem*	*Various definitions*
S-2	SLO-1	*Introduction of various asymptotic notations like Θ,ω,O, Ω*	*Stack-Various ADT operations- Uses of stack-Various examples*	*Strongly connected components*	*The traveling-salesman problem*	*NP-Completeness and the classes of P and NP*
	SLO-2	*Designing algorithm-Analysis of Insertion sort-Best case, worst case, average case analysis*	*Queue ADT- Insertion-deletion and various operations on Queue*	*Minimum Spanning tree-Introduction Prim's algorithm*	*Example*	*Continued*
S-3	SLO-1	*Various Problem solving techniques*	*Linked List- Deletion and Search-Doubly linked list-Various operations on linked list*	*Kruskal algorithm*	*The set-covering problem –With an example*	*A Formal language framework-Polynomial time verification*
	SLO-2	*Divide and Conquer paradigm*	*Polynomial Arithmetic*	*Single source Shortest path problem*	*The subset-sum problem*	*Continued*
S 4-5	SLO-1 / SLO-2	*Recurrence relations-Construction of recurrence relation for various examples- Towers of Hanoi Problem, Fibannacci series*	*Hashing-Hash functions Open addressing-Perfect Hashing*	*The Bellman-Ford algorithm - Single-source shortest paths in directed acyclic graphs -Dijkstra's algorithm*	*String Matching- The naive string-matching algorithm*	*p-type and NP-type problems NP- Completeness-Various examples*
S-6	SLO-1	*Solution by Substitution method*	*Various hashing methods*	*Shortest paths and matrix multiplication*	*Example*	*NP-Completeness-reducibility*
	SLO-2	*Recursion Tree Method*	*Collision in hashing-Avoiding Collision – Various methods*	*The Floyd-Warshall algorithm*	*The Rabin-Karp algorithm*	*Continued*
S-7	SLO-1	*Mater Theorem-Proof*	*Binary search tree*	*An example*	*Continued*	*NP-Completeness-reducibility*
	SLO-2	*Simple examples*	*Insertion-Deletion-Finding max,min*	*Johnson's algorithm for sparse graphs*	*The Knuth-Morris-Pratt algorithm*	*Continued*
S-8	SLO-1	*Probabilistic analysis of an algorithm*	*Red Black tree*	*Example*	*An example*	*NP-completeness proofs Continued-Satisfiability of boolean formulas is NP-complete.*

	SLO-2	*Hiring assistant problem*	*Insertion-Deletion*	*Flow network-example*	*Computational Geometry- Finding Convex hull- Finding the closest pair of points*	*3-CNF satisfiability problem-NP Complete*
S-9	SLO-1	*Probabilistic analysis Quick sort with illustration*	*Properties of RBT*	*Continued*	*Continued*	*NP-Hard problem-Definition and various examples-continued*
	SLO-2

CLO-6 :	*Understand the importance of applying Data mining concepts in different domains*	*2*	*80*	*85*															

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Why Data mining? What is Data mining ?*	*Mining frequent patterns: Basic concepts*	*Classification: Basic concepts*	*Cluster Analysis: Introduction*	*Outliers: Introduction*
	SLO-2	*Kinds of data meant for mining*	*Market Basket Analysis*	*General approach to Classification*	*Requirements and overview of different categories*	*Challenges of outlier detection*
S-2	SLO-1	*Kinds of patterns that can be mined*	*Frequent itemsets, Closed itemsets*	*Decision tree induction*	*Partitioning method: Introduction*	*Outlier detection methods: Introduction*
	SLO-2	*Applications suitable for data mining*	*Association rules-Introduction*	*Algorithm for Decision tree induction*	*k-means*	*Supervized and Semi-supervized methods*
S-3	SLO-1	*Issues in Data mining*	*Apriori algorithm-theoritical approach*	*Numerical example for Decision tree induction*	*k-medoids*	*Unsupervized methods*
	SLO-2	*Data objects and Attribute types*	*Apply Apriori algorithm on dataset-1*	*Attribute selection measure*	*Hierarchical method: Introduction*	
S-4	SLO-1	*Statistical descriptions of data*	*Apply Apriori algorithm on dataset-2*	*Tree pruning*	*Agglomerative vs. Divisive method*	*Statistical and Proximity based methods*
	SLO-2		*Generating Association rules from frequent itemsets*	*Scalability and Decision tree induction*	*Distance measures in algorithmic methods*	
S-5	SLO-1	*Need for data preprocessing and data quality*	*Improving efficiency of Apriori*	*Bayes' Theorem*	*BIRCH technique*	*Statistical approaches*
	SLO-2			*Naïve Bayesian Classification*		
S-6	SLO-1	*Data cleaning*	*Pattern growth approach*	*IF-THEN rules for classification*	*DBSCAN technique*	*Statistical data mining*
	SLO-2	*Data integration*		*Rule extraction from a decision tree*		
S-7	SLO-1	*Data reduction*	*Mining frequest itemsets using Vertical data format*	*Metrics for evaluating classifier performance*	*STING technique*	*Data mining and recommender systems*
	SLO-2		*Strong rules vs. weak rules*	*Cross validation*		
S-8	SLO-1	*Data transformation*	*Association analysis to Correlation analysis*	*Bootstrap*	*CLIQUE technique*	*Data mining for financial data analysis*
	SLO-2			*Ensemble methods-Introduction*		
S-9	SLO-1	*Data cube and its usage*	*Comparison of pattern evaluation measures*	*Bagging and Boosting*	*Evaluation of clustering techniques*	*Data mining for Intrusion detection*
	SLO-2			*Random Forests: Introduction*

Course Code	18CSE391T	Course Name	BIG DATA TOOLS AND TECHNIQUES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Gain knowledge about the various tools and techniques used in big data analytics*
CLR-2 :	*Learn the fundamentals of Hadoop and the related technologies*
CLR-3 :	*Understand the basics of development of applications using MapReduce, HDFS, YARN*
CLR-4 :	*Learn the basics of Pig, Hive and Sqoop*
CLR-5 :	*Learn the basics of Apache Spark, Flink and understand the importance of NoSQL databases*
CLR-6 :	*Learn about Enterprise Data Science and data visualization tools*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Use the various tools and techniques in big data analytics*	2	80	85	L	-	H	-	H	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Apply Hadoop and related technologies to big data analytics*	2	75	80	L	H	H	M	H	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Apply MapReduce, HDFS and YARN develop big data applications*	2	85	80	L	-	H	-	H	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Develop applications using Pig, Hive and Sqoop*	2	80	75	L	H	H	-	H	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Apply Apache Spark and Flink to applications and understand the importance of NoSQL databases*	2	75	85	L	-	H	M	H	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Understand the applications of Enterprise Data Science and data visualization tools*	2	80	85	L	-	H	-	H	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of Big Data Analytics*	*MapReduce*	*Setting up a Hadoop cluster*	*Introducing Oozie*	*Enterprise Data Science Overview*
	SLO-2	*Introduction to data analytics and big data*	*Analyzing data with Unix tools and Hadoop*	*Cluster specification and setup*		
S-2	SLO-1	*Big data mining*	*Scaling Out – Data Flow, Combiner Functions*	*Hadoop configuration*	*Apache Spark*	*Data Science Solutions in the enterprise*
	SLO-2	*Technical elements of the Big Data platform*	*Hadoop Streaming*	*YARN configuration*		
S-3	SLO-1	*Analytics Toolkit, Components of the analytics toolkit*	*HDFS*	*Introduction to Pig*	*Limitations of Hadoop and overcoming the limitations*	*Enterprise data science – Machine Learning and AI*
	SLO-2	*Distributed and Parallel Computing for Big Data*		*Installing and running pig*	*Core components and architecture of Spark*	*Enterprise Infrastructure solutions*
S-4	SLO-1	*Cloud computing and Big Data*	*Hadoop filesystems*	*Basics of Pig Latin*	*Introduction to Apache Flink*	*Visualizing Big Data*
	SLO-2		*Java Interface to Hadoop*		*Installing Flink*	
S-5	SLO-1	*In-Memory Computing Technology for Big Data*	*YARN*	*Introduction to Hive*	*Batch analytics using Flink*	*Using Python and R for visualization*
	SLO-2		*Job Scheduling*	*Installing and running Hive*		*Big Data Visualization Tools*
S-6	SLO-1	*Fundamentals of Hadoop*	*Hadoop I/O*	*Introduction to HiveQL*	*Big Data Mining with NoSQL*	*Data Visualization with Tableau*
	SLO-2	*Hadoop Ecosystem*				
S-7	SLO-1	*The core modules of Hadoop*	*Data Integrity*	*Introduction to Zookeeper*	*Why NoSQL?*	*Case Studies: Hadoop*
	SLO-2		*Compression*	*Installing and running Zookeeper*	*NoSQL databases*	
S-8	SLO-1	*Introduction to Hadoop MapReduce*	*Serialization*	*The Zookeeper Service*	*Introduction to HBase*	*Case Studies: Spark*
	SLO-2		*File based Data Structures*	*Flume Architecture*		
S-9	SLO-1	*Introduction to Hadoop YARN*	*Developing a MapReduce Application*	*Introduction to Sqoop*	*Introduction to MongoDB, Cassandra*	*Case Studies: NoSQL*
	SLO-2

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CSE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To provide basic concepts of machine learning*
CLR-2 :	*To provide deeper understanding of various tools and techniques for Machine learning Algorithms and outputs*
CLR-3 :	*Understand and Implement the major classification techniques*
CLR-4 :	*Understand and Implement the various Clustering Methods*
CLR-5 :	*Learn and Understand the Tree based machine Learning Algorithms*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the concepts of machine learning*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Learn and understand machine tools and libraries of machine learning*	2	75	80	H	H	H	-	H	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Learn and understand the linear learning models and classification in machine learning*	2	85	80	H	H	-	-	H	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Understand the clustering techniques and their utilization in machine learning*	2	80	75	H	H	-	-	H	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Study the tree based machine learning techniques and to appreciate their capability*	2	75	85	H	H	-	H	H	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Machine Learning: What and Why?*	*Platform for machine learning*	*Ridge Regression*	*Measuring (dis)similarity*	*Decision tree representation*
	SLO-2	*Types of Machine Learning*	*Machine learning python libraries*		*Evaluating output of clustering methods*	
S-2	SLO-1	*Supervised Learning*	*Scikit-learn*	*Maximum likeliwood estimation (least squares)*	*Spectral clustering*	*Basic decision tree learning algorithm*
	SLO-2	*Unsupervised Learning*	*training data – testing data – validation data*		*Hierarchical clustering*	
S-3	SLO-1	*Reinforcement learning*	*k-fold cross validation*	*principal component analysis*	*Agglomerative clustering*	*Inductive bias in decision tree*
	SLO-2	*The Curse of dimensionality*	*Features*		*Divisive clustering*	
S-4	SLO-1	*Over fitting and under fitting*	*Performance metrics*	*Bayesian classifier*	*Choosing the number of clusters*	*Decision tree construction*
	SLO-2	*linear regression*	*MSE, accuracy, confusion matrix, precision*		*Clustering datapoints and features*	
S-5	SLO-1	*Bias and Variance tradeoff*	*recall, F- score*	*Support vector machine*	*Bi-clustering*	*Issues in decision tree*
	SLO-2	*Testing – cross validation*				
S-6	SLO-1	*Regularization*	*Linear Regression with multiple variables*	*Support vector machine + kernels*	*Multi-view clustering*	*Classification and regression trees (CART)*
	SLO-2	*Learning Curve*				
S-7	SLO-1	*Classification*	*Logistic Regression*	*Multi class classification*	*K-Means clustering*	*Random Forest*
	SLO-2	*Error and noise*				*Random Forest with scikit-learn*
S-8	SLO-1	*Parametric vs. non-parametric models*	*spam filtering with logistic regression*	*K nearest neighbour classification*	*K-meloids clustering*	*Multivariate adaptive regression trees (MART)*
	SLO-2					*Introduction to Artificial Neural Networks*
S-9	SLO-1	*Linear Algebra for machine learning*	*Naive Bayes with scikit-learn*	*Application: face recognition with PCA*	*Application: image segmentation using K-means clustering*	*Perceptron learning*
	SLO-2

Course Code	18CSE395T	Course Name	WEB INTELLIGENCE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CSE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the topics of Web Intelligence*
CLR-2 :	*Study models of information retrieval, semantic webs, search engines, and web mining.*
CLR-3 :	*Gain knowledge on the algorithmic aspect of Web Intelligent systems*
CLR-4 :	*Acquire knowledge on Data mining techniques*
CLR-5 :	*Understand the impact of Social Network Design for Web Intelligence*
CLR-6 :	*Gain Knowledge on different approaches required for studying the impact of social network for Web Intelligence*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Acquire the knowledge on topics and benefits of Web Intelligence*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	*H*	*H*	*H*	-
CLO-2 :	*Acquire the ability to build models of information retrieval, semantic webs, search engines, and web mining.*	*2*	*75*	*80*	*H*	*H*	*H*	-	*H*	-	-	-	-	-	-	*H*	*H*	*H*	*M*
CLO-3 :	*Understand the basic ideas of Multimedia Information Retrieval*	*2*	*85*	*80*	*H*	-	-	-	-	*H*	-	-	-	-	-	*H*	*H*	*H*	*H*
CLO-4 :	*Acquire knowledge to use web crawlers and fetch relevant information*	*2*	*80*	*75*	*H*	*H*	*H*	*M*	*M*	-	-	-	-	-	-	*H*	*H*	*H*	*H*
CLO-5 :	*Acquire knowledge to refine the social network design approached used for developing intelligent web*	*2*	*75*	*85*	*H*	-	-	*H*	*H*	-	-	-	-	-	-	*H*	*H*	*H*	*H*
CLO-6 :	*Apply the knowledge of different web intelligence based algorithms in practical applications*	*2*	*80*	*85*	*H*	-	*H*	-	-	*H*	-	-	-	-	-	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1 SLO-2	*Introduction to Web Intelligence What is Web Intelligence? Benefits of Intelligent Web:What applications can benefit from web intelligence*	*Information Retrieval-Introduction, Document Representation*	*Data Mining Techniques-Classification*	*Web Content Mining-Web Crawlers*	*Social Network Design for Web Intelligence:Introduction: Social Network Design for Web Intelligence*
S-2	SLO-1 SLO-2	*Wisdom Web*	*Retrieval Models*	*Data Mining Techniques-Clustering and Association*	*Web Crawlers*	*Overview of Social Intelligence Design: Groups and Communities, Issues of Social Intelligence Design, Applications of Social Intelligence Design*
S-3	SLO-1 SLO-2	*Ingredients of Intelligent Web*	*Retrieval Models*	*Data Mining Techniques- Association*	*Search Engines*	*The Travelling Conversation Model*
S-4	SLO-1 SLO-2	*Topics of Web Intelligence*	*Evaluation of Retrieval Performance*	*Web Usage Mining- Web-Log processing*	*Personalization of Web Content*	*A Broadcast-Based Approach*
S-5	SLO-1 SLO-2	*How can I build intelligence in my own application?*	*Semantic Web-Introduction, The Layered-Language Model*	*Web Usage Mining -Analyzing Web Logs*	*Multimedia Information Retrieval*	*A Conversational Agent-Based Approach*
S-6	SLO-1 SLO-2	*Examples of intelligent web applications*	*Metadata and Ontologies*	*Applications of Web Usage Mining Clustering of Web Users*	*Web Structure Mining- Modeling Web Topology*	*Smart Environment based approach*
S-7	SLO-1 SLO-2	*Fallacies of Intelligent applications*	*Ontology Languages for the Web*	*Applications of Web Usage Mining-Classification Modeling of Web Users*	*PageRank Algorithm*	*Psychological Evaluation, Technical Issues*
S-8	SLO-1 SLO-2	*Related Technologies*	*Tool Environment for the Ontology RDFferret-Full Text Search and RDF Querying.Onto Share-Community support Onto Edit-Ontology Development*	*Applications of Web Usage Mining-Association Mining of Web Usages*	*Hyperlink-Induced Topic Search (HITS)*	*Case Study-Putting it all together : an intelligent news portal*
S-9	SLO-1 SLO-2	*Related Technologies*	*OntoView-Change Management for Ontologies Sesame-Repositories for Ontologies and Data CORPORIUM-Information Extraction*	*Sequence-Pattern Analysis of Web Logs*	*Random Walks on the Web*	*Case Study-Applying Web Intelligence for Business Intelligence*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Able to apply fundamental algorithmic ideas to process data*
CLR-2 :	*Understand the Data Analytics lifecycle*
CLR-3 :	*Able to construct predictive models to classify new data set*
CLR-4 :	*Learn to apply hypotheses and data into actionable predictions*
CLR-5 :	*Document and communicate the results effectively to different stakeholders*
CLR-6 :	*Effectively communicate the findings using visualization techniques*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Able to comprehend basic methods of processing data from real world problems*	2	85	80	L	M	L	L	H	L	L	L	L	L	M	M	H	M	L
CLO-2 :	*Able to convert data into actionable insights*	2	80	75	M	H	L	M	M	L	L	M	M	M	M	H	M	M	M
CLO-3 :	*Build clustering and classification models using R environment*	3	85	80	H	M	H	H	H	L	L	M	H	M	H	M	M	H	M
CLO-4 :	*Apply statistical techniques for evaluation*	3	75	70	M	H	H	H	H	L	M	M	H	H	H	H	M	H	H
CLO-5 :	*Analyze and validate the models using appropriate performance metrics*	4	80	75	H	H	M	H	M	L	M	M	H	M	H	H	M	H	H
CLO-6 :	*Present the results using effective visualization techniques*	4	85	80	M	M	M	H	H	M	L	H	H	H	H	H	M	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Data science process*	*Approaching Analytics Problems*	*Introduction to R*	*Choosing and evaluating models*	*Documentation*
	SLO-2	*The roles in a data science project*	*Key roles for successful Analytics project*	*R Graphical user interfaces*	*Schematic model construction and evaluation*	*Knitr package*
S-2	SLO-1	*Stages in data science project*	*Discovery*	*Data Import and Export*	*Mapping problems to machine learning*	*Deploying models*
	SLO-2	*Define, Collect, Build, Evaluate, Present and Deploy*	*Business domain, Resources, Problem framing, Key stakeholders, Analytics sponsors, Initial hypotheses, Data sources*	*Attributes and Data Types*	*Solving classification problems, working without known targets*	*Deploying R HTTP services and exporting*
S-3	SLO-1	*Working with data from files*	*Data Preparation*	*Vectors*	*Evaluating classification models*	*Presenting your results to the project sponsor*
	SLO-2	*Structured data, other data formats and Transforming data in R*	*Learning about the data, conditioning*	*Arrays and Matrices*	*Accuracy, precision, Recall, sensitivity and specificity*	*Summarizing the project goals and stating the results*
S-4	SLO-1	*Working with relational databases and NoSQL databases*	*Model Planning*	*Data Frames*	*Evaluating clustering models*	*Presenting your model to end user*
	SLO-2	*Staging and Curating the data*	*Data exploration, Model selection*	*Lists*	*Intracluster distance, cross cluster distance*	*Presenting your work to other data scientist*
S-5	SLO-1	*Exploring data*	*Model Building*	*Factors*	*Validating models*	*Introduction to data analysis*
	SLO-2	*Using summary statistics to spot problems*	*Common tools for model building*	*Contingency Tables*	*Overfitting, Quantifying model soundness, Ensuring model quality*	*Visualization before Analysis*
S-6	SLO-1	*Managing data*	*Communicate Results*	*Descriptive statistics*	*Memorization methods*	*Dirty data*
	SLO-2	*Cleaning data*	*Analysis over the different models*	*Model building, Evaluation and Deployment*	*Using single variable and multi variable*	*Visualizing a single variable*
S-7	SLO-1	*Sampling for modeling and validation*	*Operationalize*	*Hypotheses Testing*	*Linear regression*	*Examining multiple variables*

	SLO-2	*Training and test set split, Sample group column, Record grouping, Data provenance*	*Moving the model to deployment environment*	*Null hypotheses and Alternative hypotheses*	*Building a linear regression model and predicting*	*Dotchart and Barplot*
S-8	SLO-1	*Data Structures*	*Analytics Plan*	*Difference of means*	*Logistic regression*	*Box and Whisker plot*
	SLO-2	*Structured, Semi-structured, Quasi-structured and Unstructured data*		*Student t-test, Welch's t-test*	*Building a logistic regression model and predicting*	*Hexbinplot for large datasets*
S-9	SLO-1	*Drivers of big data*	*Key deliverables of analytics project*	*Wilcoxon Rank-Sum test*	*Unsupervised methods*	*Scatterplot matrix*
	SLO-2	*Devices – Mobile, smart devices*	*Presentation: Project sponsors, Analysts, Code, Technical specifications*	*Type I and II errors*	*Cluster analysis*	*Analyzing a variable over time*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the basic idea of data warehouse*
CLR-2 :	*To learn step by step approach to design a data warehouse*
CLR-3 :	*Understand ETL Process*
CLR-4 :	*To learn building process of data warehouse and implementation of data mart*
CLR-5 :	*Identify the Data mining concepts with various domains*
CLR-6 :	*To learn case studies to bring out practical aspects of data warehouse*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Acquire the knowledge, Architecture and schema and OLAP Tool concepts.*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Acquire knowledge to design a data warehouse.*	2	75	80	H		-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Implement ETL Process in various data warehouse applications.*	2	85	80	H		-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Acquire knowledge to implement a data warehouse.*	2	80	75	H		-		-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Implement the various concepts and applications of data mining rules and technology.*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*To Implement the data warehouse concepts in various organizations.*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to dataware housing*	*Data Warehouse Schema-Introduction*	*Building a data warehouse - Introduction*	*DATA MINING-introduction – Data – Types of Data – Data Mining Functionalities*	*Data Warehouse in Tamil Nadu government*
	SLO-2	*Introduction to data ware housing*	*Dimensional Modeling*	*Critical success factor*	*Integrating Data Mining with Data Warehouse*	*Data warehouse for ministry of commerce*
S-2	SLO-1	*Data warehousing Components*	*The Star Schema*	*Requirement Analysis*	*Data Mining Task Primitives*	*Data warehouse for the government of Andhra Pradesh*
	SLO-2	*Need for Data warehousing*	*The Snowflake Schema*	*Planning for the data warehouse*	*Data Preprocessing*	*Data warehouse for the government of Andhra Pradesh*
S-3	SLO-1	*Benefits and application of data warehouse*	*Aggregate Tables*	*Data warehouse design stage*	*Association rule mining and classification*	*Data warehouse in Hewlett Packard*
	SLO-2	*Data Warehouse Architecture Goals*	*DBMS Schemas for Decision Support*	*Building and implementing data marts*	*Frequent pattern Mining*	*Data warehouse in Hewlett Packard*
S-4	SLO-1	*Data Warehouse Architecture and Characteristics*	*Data Extraction*	*Building data warehouse*	*Apriori algorithm*	*Data warehouse in Levi Strauss*
	SLO-2	*Data Warehouse Architecture and Characteristics*	*Data transformation: Basic tasks*	*Backup and Recovery*	*Frequent pattern Mining without candidate generation*	*Data warehouse in Levi Strauss*
S-5	SLO-1	*Data Mart*	*Major transformation types*	*Establish the data recovery quality framework*	*Mining Multilevel Association Rules*	*Data warehouse in World Bank*
	SLO-2	*Data Mart*	*OLAP definition,*	*Operating the warehouse*	*Mining Multidimensional Association Rule, Correlation Analysis Rule*	*Data warehouse in World Bank*
S-6	SLO-1	*Classification of data mart, Implementation*	*Dimensional Analysis*	*Recipe for a successful data warehouse*	*Classification: Decision Tree*	*HARBOR-A highly available data warehouse*
	SLO-2	*Classification of data mart, Implementation*	*Hypercube*	*Data warehouse pitfalls*	*Bayesian Classification-Naïve Bayes Classification*	*HARBOR-A highly available data warehouse*
S-7	SLO-1	*Gathering the business requirement*	*OLAP operations*	*Meta Data – Introduction*	*SVM Linear and Non linear data*	*A Typical Business Data Warehouse for a trading company*

	SLO-2	Planning and project management-Project principles	Drill down	Meta Data – Data Management	Text Mining Temporal Data Mining and Spatial Data mining	A Typical Business Data Warehouse for a trading company
S-8	SLO-1	Data ware house readiness assessment, project team	Roll up	Meta Data – Query Generation	Cluster Analysis-Introduction	Customer Data warehouse of world's first and largest online bank in united kingdom
	SLO-2	Selecting the operating system	Slice	Meta Data – Query Generation	K-means– Partitioning Methods	Customer Data warehouse of world's first and largest online bank in united kingdom
S-9	SLO-1	Selecting the database software	OLAP models	Meta Data and Tools	Hierarchical Methods	A German supermarket Edeka's Data warehouse
	SLO-2	Selecting the tools	MOLAP	Meta Data and Tools	Data Mining Applications	A German supermarket Edeka's Data warehouse

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basic building blocks of stream processing*
CLR-2 :	*Explore the data ingestion options into stream processing engines*
CLR-3 :	*Process streaming data in real time*
CLR-4 :	*Utilize NOSQL storage options to store real time data*
CLR-5 :	*Deliver stream processing results to end users*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Comprehend the usage of basic constructs of a functional programming language*	3	80	70	L	H	H	H	H	-	-	-	L	L	-	H	-	-	-
CLO-2 :	*Create the different types of functions and evaluate its operations*	3	85	75	M	H	L	M	M	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*Create patterns and match the same with traits and case classes*	3	75	70	M	H	M	H	H	-	-	-	M	L	-	H	-	-	-
CLO-4 :	*Create lists and collections, evaluate its operations*	3	85	80	M	H	M	H	H	-	-	-	M	L	-	H	-	-	-
CLO-5 :	*Construct functional design for real world applications using common structures*	3	85	75	H	H	M	H	M	-	-	-	M	L	-	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Programming Paradigms*	*Modules, Objects and Namespaces*	*Traits – Purpose and Syntax*	*Lists – Java vs Scala Lists*	*Functors - Purpose and Use*
	SLO-2	*Different types of programming paradigms, Functional vs OOP*	*Demo - Modules, Objects and Namespaces*	*Define a trait*	*Lists definitions and usage demo*	*Writing a simple functor*
S-2	SLO-1	*Scala Language Basics - Variables,*	*Anonymous Functions*	*Interface types*	*Working with Lists*	*Functor Laws*
	SLO-2	*Expressions*	*Polymorphic Functions, Nested Functions*	*Interface types examples*	*Constructing Lists*	*Applicatives – Concepts and use*
S-3	SLO-1	*Functions*	*Demo – Anonymous , Polymorphic and Nested Functions*	*Thick Interfaces*	*Basic operations on lists*	*Defining an applicative*
	SLO-2	*Recursion*	*Closures*	*Thin Interfaces*	*head, tail, isEmpty demo, List Patterns*	*Demo of Applicatives*
S-4	SLO-1	*Call By Name*	*Demo - Closures*	*Comparison - Thick vs Thin Interfaces*	*Lists - First Order methods*	*Traversable functors*
	SLO-2	*Call By Value*	*Repeated Parameters*	*Ordered trait*	*Examples of First Order Methods*	*Example – Traversable Functors*
S-5	SLO-1	*Conditionals*	*Tail Recursion*	*Demo – Ordered trait, Trait Comparisons*	*Lists - Higher Order methods*	*Monads*
	SLO-2	*Looping – for each and for*	*Demo – Tail Recursion*	*Traits for modifying interfaces*	*Examples of Higher Order Methods*	*Defining Monads*
S-6	SLO-1	*Significance of vals*	*Define a tail recursive function*	*Stacking modifications*	*Sequences – Overview and operations*	*Monad Laws*
	SLO-2	*Classes*	*Tracing tail-recursive functions*	*Recap – Traits and operations*	*Demo - Sequences*	*Demo – Monads and Monad Laws*
S-7	SLO-1	*Types*	*Demo – Tracing tail-recursive functions*	*Mixin – Purpose & Composition*	*Tuples - Overview and operations*	*Monoid – Concept, Purpose and Use*
	SLO-2	*Fields*	*Limits of tail-recursive functions*	*Mixin Example*	*Demo - Tuples*	*Examples of Monoid*
S-8	SLO-1	*Methods*	*Curried Functions*	*Case Classes – Use, Definition*	*Sets and Maps – Overview and operations*	*Recap with more examples -Monads and Functors*
	SLO-2	*Variable scope*	*Demo - Curried Functions*	*Pattern Matching, Example*	*Demo – Sets and Maps*	*Recap with more examples -Applicatives*
S-9	SLO-1	*Objects*	*Higher Order Functions - Definition and Uses*	*Sealed Classes, Option Type*	*Recap – Lists and Collections*	*Applications – Functors, Monads*
	SLO-2	*Singleton object, Variables of objects*	*Higher Order Functions Example*	*Applications – Sealed Classes and Option Type*	*Examples – Lists and Collections*	*Applciations - Monads*

Course Code	18CSE489T	Course Name	STREAMING ANALYTICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the basic building blocks of stream processing*
CLR-2 :	*Explore the data ingestion options into stream processing engines*
CLR-3 :	*Process streaming data in real time*
CLR-4 :	*Utilize NOSQL storage options to store real time data*
CLR-5 :	*Deliver stream processing results to end users*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO – 3
CLO-1 :	*Comprehend the concepts and terminologies in stream processing*	3	80	70	L	H	H	H	H	-	-	-	L	L	-	H	-	-	-
CLO-2 :	*Create the data ingestion pipeline for a stream processing application*	3	85	75	M	H	L	M	M	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*Create stream processing applications using Apache Storm and Spark Streaming*	3	75	70	M	H	M	H	H	-	-	-	M	L	-	H	-	-	-
CLO-4 :	*Store real time data using NoSQL databases*	3	85	80	M	H	M	H	H	-	-	-	M	L	-	H	-	-	-
CLO-5 :	*Construct stream data visualizations for users*	3	85	75	H	H	M	H	M	-	-	-	M	L	-	H	-	-	-
		3	80	70	L	H	H	H	H	-	-	-	L	L	-	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Stream Processing*	*Getting Started with Kafka*	*Apache Storm – Introduction*	*Apache Spark Streaming Introduction*	*NoSQL Data Bases*
	SLO-2	*Batch vs Stream Processing, Examples of stream processing*	*Why Kafka ? Publish Subscribe messaging model*	*Features of Storm*	*Spark's Memory Usage*	*Introduction to MongoDB*
S-2	SLO-1	*Map Reduce, Scalability and Fault Tolerance*	*Kafka Architecture*	*Storm Components*	*Understanding Resilience and Fault Tolerance in a Distributed System*	*MongoDB's Key Feature*
	SLO-2	*Applications of stream processing*	*Messages and Batches, Schemas*	*Nimbus, Supervisor Nodes*	*Spark's cluster manager*	*Data Model, Adhoc queries*
S-3	SLO-1	*Stateful Stream Processing*	*Topics and Partitions,*	*Zookeeper cluster*	*Data Delivery Semantics in Spark*	*Indexes, Querying*
	SLO-2	*Stream Processing Model*	*Producers and consumers*	*Storm Data Model*	*Data Delivery Semantics in Spark Applications*	*Replication, Speed and Durability*
S-4	SLO-1	*Data Sources, Stream processing pipelines, Sinks*	*Brokers and Clusters*	*Definition of a Storm topology, Operation modes in Storm*	*Microbatching*	*Scaling, MongoDB Change Streams*
	SLO-2	*Transformations and Aggregation*	*Multiple Clusters, Data Ecosystem*	*Storm – Prerequisites and Setting up a storm cluster, Developing a hello world example*	*Dynamic Batch Interval*	*Real-time data changes with Change Streams*
S-5	SLO-1	*Window Aggregations*	*Sending messages with producers*	*Storm topology options, Demo of Hello world in Storm*	*Structured Stream processing model*	*Visualizing Streaming data – Events, Logs, Records*
	SLO-2	*Stateless and stateful processing*	*Steps & Example - Sending messages with producers*	*Introduction to Storm UI*	*Spark Streaming Resilience Model*	*Dashboards*
S-6	SLO-1	*Effect of time in stream processing*	*Receiving messages with consumers*	*Cluster, Nimbus, Supervisor, Topology Summary. Nimbus Configuration*	*Data Structures in Spark – RDDs and DStreams*	*Visual Elements and Properties*
	SLO-2	*Lambda Architecture*	*Steps & Example - Receiving messages with consumers*	*Storm Scheduler*	*Spark Fault Tolerance Guarantees*	*Data Density*
S-7	SLO-1	*Kappa Architecture*	*Developing Kafka Streams Application*	*Types of schedulers*	*First Steps in Structured Streaming*	*Dividing time, Time to Live, Context*
	SLO-2	*Examples – Lambda & Kappa Architectures*	*Phases in a Kafka Streams Applciation Development*	*Applications of schedulers*	*Streaming Analytics Phases*	*Examples of Streaming Data Visualization*

S-8	SLO-1	*Streaming vs Batch Algorithms*	*Constructing a topology*	*Storm Cluster Monitoring*	*Acquiring streaming data*	*Visual Distractions and Visual Deception*
	SLO-2	*Applications – Streaming and Batch Algorithms*	*Streams and State – Applying stateful operations*	*Integration of Storm with Kafka*	*Transforming streaming data*	*Example – Stream processing visualization dashboards*
S-9	SLO-1	*Use of a Batch-Processing Component in a Streaming Application*	*Example application development with Kafka Streams*	*Integration of Storm with Kafka example*	*Output the resulting data*	*Streaming Visualization Techniques*
	SLO-2	*Recap – Stream Processing Fundamentals*	*Demo – Kafka Streams*	*Recap – Storm in Stream Processing*	*Demo – Stream Processing with Spark Streaming*	*Demo – Stream Processing visualizaton*

Course Code	18CSE490T	Course Name	BIG DATA VISUALIZATION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the key techniques used in visualization which includes data models, graphical perception and techniques specifically for visual encoding and interaction*
CLR-2 :	*Obtain an exposure to common data domains and the corresponding analysis tasks which includes multivariate data and text*
CLR-3 :	*Get hands-on experience in building and evaluating visualization systems*
CLR-4 :	*Gain knowledge in data visualization aides*
CLR-5 :	*Understand the significance of data by placing it in a visual context*
CLR-6 :	*Utilize the knowledge by reading and discussing research papers from the visualization literature*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Design and exploring the result with data visualizations*	*3*	*75*	*70*	*L*	*M*	*M*	*M*	*L*	-	-	-	*M*	*L*	*M*	*M*

CLO-4 :	*Designing and evaluating color palettes for visualization based on principles of perception.*	*3*	*85*	*80*	*M*	*M*	*M*	*H*	*H*	-	-	-	*M*	*M*	*H*	*H*			
CLO-5 :	*Using the knowledge of perception and cognition to evaluate visualization design alternatives*	*3*	*85*	*80*	*M*	*H*	*M*	*H*	*H*	-	-	-	*M*	*M*	*H*	*H*			
CLO-6 :	*Identifying opportunities for the application of data visualization in various domains.*	*3*	*85*	*80*	*M*	*H*	*H*	*H*	*H*	-	-	-	*M*	*M*	*H*	*H*			

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Big Data Visualization*	*Definitions and explanations of visualization categories*	*An Introduction to Visualization tools*	*Introduction to D3*	*Case Studies: 1: Color considerations with a dark background*
	SLO-2	*Challenges of Big Data Visualization*	*Exploring R In big data*	*Visualization tools and big data*	*D3 and big data*	
S-2	SLO-1	*Categorization*	*Example with Patient Medical History*	*Example 1 – Sales transactions*	*Basic Examples*	*2: Leveraging animation in thevisuals you present*
	SLO-2	*Visualization Philosophies*	*Digging in with R*	*Adding more context*	*Getting started with D3*	
S-3	SLO-1	*Approaches to Big Data Visualization*	*No looping*	*Wrangling the data*	*D3 visualization sample templates*	*3: Logic in order*
	SLO-2	*Quality of Visualization*	*Comparisons and Contrasts*	*Trifacta Script panel*	*Big data visualization using D3*	
S-4	SLO-1	*Infographics versus Data Visualization*	*Tendencies*	*A visualization dashboard*	*Displaying Results Using D3*	*4: Strategies for avoiding thespaghetti graph*
	SLO-2	*Exploration versus Explanation*	*Dispersion*	*Experimenting with the data and build the visualization*	*Create a summary file for visualization*	
S-5	SLO-1	*Informative versus Persuasive versus Visual Art*	*Data quality categorized*	*Data pane_core details*	*Visualization using HTML document*	*5: Alternatives to pies*
	SLO-2	*Ingredients of Successful Visualizations*	*Data Manager*	*Constructing Dashboards*	*Data visualization showing the stacked view*	
S-6	SLO-1	*Choose Appropriate Visual Encodings-Natural Ordering, Distinct Values*	*Data Manager and big data*	*Saving and Presenting the work*	*Visual transitions*	*Final Thought*
	SLO-2	*Redundant Encoding ,Defaults versus Innovative Formats ,Readers' Context*	*Example-Reformatting-A little Setup*	*Visualization re-coloring, resizing, adding or changing labels*		
S-7	SLO-1	*Compatibility with Reality ,Patterns and Consistency*	*Adding Script Code*	*Filters and Measure Names*	*Multiple donuts*	*Where to go from here*
	SLO-2	*Selecting Structure*	*Executing the scene*	*Example-Promotion Spend Effect on Sales*	*Another twist on bar chart visualizations with examples*	
S-8	SLO-1	*Position: Layout and Axes*	*Status and relevance*	*Sales and spend*		*Building storytelling with data*

	SLO-2	*The Meaning of Placement and Proximity*	*Naming the nodes*	*Sales v Spend and Spend as % of Sales Trend*	*D3 Stacked Area via Nest template*	*competency in yourteam or organization*
S-9	SLO-1	*Patterns of Organization-Specific Graphs, Layouts, and Axis Styles*	*Consistency ,Reliability ,Appropriateness*	*ables and indicators*	*Adopting the sample*	
	SLO-2	*Appropriate Use of Circles and Circular Layouts*	*Accessibility and Other Output nodes*		*Visualization changes format*

Duration (hour)		9	6	9	9	9
S-1	SLO-1	Significance of human Communication, Communication systems, transmitter	Introduction to information sources and source coding	Coding for reliable Communication	Fibre Optic Communication: Introduction Through Optical Fiber	Satellite Communication: Introduction
	SLO-2	Communication channel, Receivers, Transceivers	Modeling of information sources	Tight bound on error probability of orthogonal signals	Electromagnetic Spectrum	Basic Satellite Transponder Kepler's Laws Kepler's First Law Kepler's Second Law Kepler's Third Law
S-2	SLO-1	Attenuation, Noise	Measure of Information	The promise of coding	Types of Optical Fibres	Satellite Orbits: Low Earth Orbit Satellite Medium Earth Orbit Satellite
	SLO-2	Types of electronic Communication, simplex	Joint and Conditional Entropy	Linear block codes	Propagation of Light	Satellite Orbital Patterns Inclined Orbits Equatorial Orbit, Polar Orbits
S-3	SLO-1	Full duplex, half duplex	Source coding theorem	Theorem on Linear code	Single Mode Fibre	Geostationary Satellites
	SLO-2	Analog signals, Digital signals	Source coding algorithms	Hamming Codes	Multimode Fibre	Geosynchronous Satellite—Advantages and Disadvantages
S-4	SLO-1	Modulation and multiplexing, Baseband transmission	The Huffman source coding algorithm	Decoding and performance of linear block codes	Losses Within an Optical Fibre: Attenuation Loss	Power Systems
	SLO-2	Broadband transmission	Huffman Encoding Algorithm	Soft decision decoding	Absorption Loss	Altitude Control: Spin Stabilized
S-5	SLO-1	Multiplexing	Examples on Huffman Encoding Algorithm	Hard decision decoding	Radiation Loss	Spun/de-spun Stabilization Method
	SLO-2	Electromagnetic spectrum	The Lempel-Ziv source coding algorithm	Error detection and Error correction	Dispersion Loss	Three-axis Stabilized Method
S-6	SLO-1	Frequency and wavelength	Rate distortion theory	Burst error correcting codes	Rayleigh Scattering Loss	Altitude Control Components: Sensors, Actuators

	SLO-2	Optical spectrum	Mutual information	Cyclic codes, The structure of cyclic codes	Modal Dispersion Loss	Satellite System Parameters
S-7	SLO-1	Bandwidth	Differential Entropy	The generator matrix, Encoding of cyclic codes	Coupling Losses	Equivalent Noise
	SLO-2	Channel bandwidth	Rate distortion function	BCH Codes, Reed-Solomon Codes	Fibre Optic Transmission System: Fibre Optic Cable Light Sources	Temperature Carrier-to-Noise Density Ratio
S-8	SLO-1	Spectrum management	Examples on Rate distortion function	Convolutional Codes	Types of Fibre Optic Transmitters, Optical Detectors, Optical Repeater	Energy of Bit-to-Noise Density Ratio
	SLO-2	Standards	Digital audio transmission and digital audio recording	Basic properties of convolutional codes, Encoding, The transfer function	Optical Point-to-point Communication System:	Satellite System Link Models
S-9	SLO-1	Communication applications survey - Simplex	Digital audio in telephone transmission systems	Catastrophic codes	Single Channel System Amplified Single Channel System	Satellite System Link Equation 636 Uplink Power Budget Calculation
	SLO-2	Communication applications survey - Duplex	Digital audio recording	Optimum decoding of convolutional codes - The Viterbi algorithm	Wavelength Division Multiplexing (WDM) Systems	Satellite Radio Navigation

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the model of digital Communication system.*
CLR-2 :	*Gain the knowledge about digital coding, signal compression and its application*
CLR-3 :	*Gain knowledge on digital modulation , baseband and band-pass modulation*
CLR-4 :	*To know the fundamentals of error control coding*
CLR-5 :	*To learn the importance of Multiplexing and Multiple Access*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Acquire the knowledge on digital Communication, signals and systems*	*1*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Acquire the knowledge on sampling, Quantization, encoding and Signal Compression*	*2*	*75*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Understand the various digital modulation techniques*	*2*	*85*	*80*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*To understand the error Detection and Correction codes*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Understand the behavior of various multiplexing techniques*	*2*	*75*	*85*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :		*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction Digital Communication System, advantages of Digital Communication*	*Introduction to digital coding*	*Introduction to Digital Modulation*	*Introduction-Types and Measure of Error- Shannon-Hartley Capacity Theorem*	*Introduction to Multiplexing-Types*
	SLO-2	*Regeneration of Digital Signals, Power Efficiency of Digital Modulators*	*Digitizing Analog Signals*	*Baseband Modulation*	*Methods of Error Control-Classification of Error Correcting Codes*	*Frequency Division Multiplexing*
S-2	SLO-1	*Bandwidth Compression, Multimedia: Unification of Signals*	*Sampling*	*Pulse Modulation Systems*	*Linear Block Codes-Hamming Distance, Weight, Error Detection, Correction*	*Time Division Multiplexing*
	SLO-2	*Performance, Technology*	*Quantization*	*Baseband Signaling*	*Linear Block Codes-Generator Matrix, Systematic codes, Parity Check Matrix*	*Frame Synchronization*
S-3	SLO-1	*Time and Frequency Representation*	*Encoding*	*Correlative Coding: Duo-Binary Coding*	*Standard Array - Implementing the decoder*	*Primary Multiplexing in Digital Telephony*
	SLO-2	*Fourier Series, Fourier Transform*	*Signal Compression,*	*Modified Duo-Binary Coding*	*Cyclic Codes-Generator Polynomial for cyclic code*	*Higher Order Multiplexing*
S-4	SLO-1	*Discrete-time Fourier Transform*	*Signal Statistics and Redundancy*	*Digital Phase Modulation(Phase Shift Keying): Bi-phase shift keying modulation*	*Systematic Cyclic code*	*Multiple Access-Frequency Division Multiple Access*
	SLO-2	*Discrete Fourier Transform*	*Companded PCM*	*Differential coding in Bi-phase shift keying*	*Polynomial Multiplication and division*	*Time Division Multiple Access*
S-5	SLO-1	*Convolution*	*Predictive Coding*	*Scarmbling*	*Importance of Block Codes-Hamming Codes*	*Code Division Multiple Access*
	SLO-2	*Correlation*	*Transform Coding*	*Bi-phase shift keying modulator, Quadrature and Offset Quadrature phase shift keying*	*Problem solving session*	*Random Access*
S-6	SLO-1	*Hilbert Transform*	*Parametric Coding*	*Digital Frequency Modulation(Frequency Shift Keying)*	*Golay-Reed Solomon Codes*	*Carrier Sense Multiple access/Collision Detection*
	SLO-2	*Problem solving session*	*Perceptual Coding*	*Minimum Shift Keying*	*Convolutional codes, Convolutional Encoder*	*Fixed Assignment Multiple Access*
S-7	SLO-1	*Low-pass and Band-pass Representations,*	*Application of Digital Coding-Digital*	*Minimum Shift Keying Modulator, Gaussian*	*Convolutional Decoding, Maximum*	*Demand Assignment Multiple Access*
		Band-pass Signals and Systems	*Speech*	*Minimum Shift Keying, Continuous Phase*	*like hood Decoding*	

				Modulation		
	SLO-2	*Analytic Signals*	*Adaptive Delta Modulation Codec*	*Power Spectral Density of Baseband Signals*	*Viterbi algorithm*	*Introduction to Pseudo-Noise Sequence*
S-8	SLO-1	*Low-pass Equivalent Signals*	*Pulse Code modulation Codec*	*Power Spectral Density of Band-pass Signals*	*Sequential Decoding and Fano Algorithm*	*Properties of PN Sequences*
	SLO-2	*Problem solving session*	*Digital Audio: MP3 Coding*	*Problem solving session*	*Practical Applications of Error Correcting codes*	*Direct Sequence Spread Spectrum Transmitter and Receiver, Interface Rejection*
S-9	SLO-1	*Signal Space Representations: Vector Space*	*Digital Video: Run Length Coding, variable Length Coding*	*Comparison of Basic Modulations*	*Deep Space Communication*	*Frequency hopping Spread Spectrum, Frequency hopping Spread Spectrum Transmitter and receiver*
	SLO-2	*Problem solving session*	*MPEG1*	*Orthogonal Frequency Division Multiplexing*	*Satellite Communication*	*Spread Spectrum Applications*

Course Code	18CSE378T	Course Name	PRINCIPLES OF CLOUD COMPUTING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the fundamental ideas behind Cloud Computing, the evolution of the paradigm, its applicability; benefits, as well as current and future challenges*
CLR-2 :	*Learn cloud enabling technologies and get exposure to advanced clouds*
CLR-3 :	*Explore cloud storage technologies and relevant distributed file systems, NoSQL databases and object storage;*
CLR-4 :	*Understand the cloud security threats and protective mechanism for cloud computing*
CLR-5 :	*Participate in team-based peer reviews to analyze the security development life cycle and mitigate risks and vulnerabilities*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)
CLO-1 :	*Explain terms used in secured software development and life cycle process*	3	80	70
CLO-2 :	*Apply fundamental concepts in cloud infrastructures to understand the cloud system, network and virtualization and outline their role in enabling the cloud computing system model.*	3	85	75
CLO-3 :	*Illustrate the fundamental concepts of cloud storage and demonstrate their use in storage systems such as Amazon S3 and HDFS*	3	75	70
CLO-4 :	*Evaluate the security issues related to cloud computing and handle the security threats and construct different cloud delivery design models.*	3	85	80
CLO-5 :	*Analyze various cloud programming models and apply them to solve problems on the cloud.*	3	85	75

Program Learning Outcomes (PLO)	1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3

Course Code	18CSE344T	Course Name	CLOUD ARCHITECTURE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Observe the fundamentals of cloud architecture*
CLR-2 :	*Observe the Technologies used in cloud platforms*
CLR-3 :	*Understand the advanced cloud architecture and storage arrays*
CLR-4 :	*Understand the importance of cloud architecture design*
CLR-5 :	*Gain knowledge in virtualization architecture*
CLR-6 :	*Gain knowledge in future trends and technologies in cloud structures*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO – 3
CLO-1 :	*To understand the concept of basic cloud computing paradigms*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*To interpret the concepts of Cloud service structures*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*To Analyze the components of cloud computing showing how business agility in an organization can be created*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*To be familiar with the market service providers in cloud.*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*To understand the technologies of data center cloud structures.*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*To work with robust cloud architectural patterns*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to cloud computing fundamentals*	*Service Oriented Architecture*	*Introduction to cloud storage infrastructures*	*Management Of Cloud Services*	*Introduction to Cloud Architecture patterns*
	SLO-2	*Cloud Computing definition*	*REST*	*Concept, planning and Design*	*Reliability, availability and security of services deployed from the cloud*	*Horizontally Scaling Compute Pattern- Cloud Significance*
S-2	SLO-1	*Cloud deployment models*	*Systems of Systems*	*Business continuity*	*Performance and scalability of services*	*Queue-Centric Workflow Pattern*
	SLO-2	*Private, Public , Hybrid, community cloud*	*Web Services*	*Basic concepts of information security*	*Tools and technologies used to manage cloud services deployment*	*Auto-Scaling Pattern*
S-3	SLO-1	*Cloud services:*	*Publish-Subscribe Model*	*Managing VDC and cloud environments and infrastructures*	*Cloud Economics*	*Eventual Consistency Prime*
	SLO-2	*IaaS, PaaS, SaaS*	*Basics of Virtualization*	*Securing storage in virtualized and cloud environments*	*Cloud Computing infrastructures available for implementing cloud based services*	*MapReduce Pattern*
S-4	SLO-1	*Enabling technologies of cloud computing*	*Types of Virtualization*	*Monitoring and management*	*Economics of choosing a Cloud platform for an organization*	*. Database Sharding Pattern*
	SLO-2	*Benefits and challenges of cloud computing*	*Implementation Levels of Virtualization*	*Security auditing and SIEM*	*Runtime Support Services*	*Node Failure Pattern*
S-5	SLO-1	*Business Agility:*	*Virtualization Structures*	*Storage Network Design*	*Resource Provisioning and Platform Deployment- Provisioning of Compute Resources (VMs)*	*Network Latency Primer*
	SLO-2	*Benefits and challenges to Cloud architecture.*	*Tools and Mechanisms*	*Architecture of storage, analysis and planning.*	*Resource Provisioning Methods*	*CDN Pattern.*
S-6	SLO-1	*Cloud Applications*	*Virtualization of CPU Memory*	*Storage network design considerations*	*NIST Cloud Computing Reference Architecture*	*Multisite Deployment Pattern*
	SLO-2	*Application availability*	*I/O Devices*	*NAS and FC SANs*	*Demand-Driven, Event-Driven Resource Provisioning*	*Network connectivity optimization evolution: Top of rack (TOR), end of rack (EOR), connectivity.*

S-7	SLO-1	*Performance*	*Virtualization Support and Disaster Recovery*	*Hybrid storage networking technologies*	*Popularity-Driven Resource Provisioning*	*Stand-alone, blades, stateless,*
	SLO-2	*Security and disaster recovery*	*Server Virtualization*	*iSCSI, FCIP, FCoE*	*Dynamic Resource Deployment*	*clustering*
S-8	SLO-1	*Next generation of Cloud Applications.*	*Parallel Processing*	*Design for storage virtualization in cloud computing*	*Storage-as-a-Service*	*scaling*
	SLO-2	*Virtualization*	*Vector Processing*	*host system design considerations*	*Advantages of Cloud Storage - Global Exchange of Cloud Resources*	*optimization, virtualization.*
S-9	SLO-1	*Types of virtualization in cloud computing*	*Symmetric Multiprocessing Systems*	*Cloud Applications*	*Application Development*	*Limitation of traditional server deployments*
	SLO-2	*Advantages and Disadvantages*	*Massively Parallel Processing Systems*	*Technologies and the processes required when deploying web services*	*Service creation environments to develop cloud based applications*	*Case studies*

CLO-3 :	*Able to develop a Map Reduce application*	*3*	*85*	*80*	*M*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	*H*	*M*	*H*	-
CLO-4 :	*Identify knowledge of Map Reduce and develop real world map reduce application*	*3*	*80*	*75*	*M*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	*H*	*H*	*H*	-
CLO-5 :	*Apply knowledge and solve various case study problems*	*3*	*80*	*75*	*H*	*H*	*H*	*H*	*H*	*H*	-	*M*	-	-	-	*H*	*M*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Data, Data storage and Analysis*	*Introduction of Big data programming Hadoop, History of Hadoop*	*Introduction of Map Reduce*	*Map Reduce Types*	*Case studies*
	SLO-2	*Comparison with other systems- Distributed computing vs Big data Framework*	*The eco system and stack*	*Configuration API*	*Default Map Reduce map*	*Healthcare*
S-2	SLO-1	*Basis of Distributed computing, Need for Big data framework*	*The Hadoop Distributed File System (HDFS)*	*Configuring the Development Environment, Writing a Unit Test, Running Locally on Test Data*	*Input Formats*	*Telecom*
	SLO-2					
S-3	SLO-1	*Introduction to Big Data- Big data definition*	*Hadoop file system*	*Running on a Cluster*	*Output formats*	*Privacy preserving Data analytics: Smart Homes*
	SLO-2	*enterprise / structured data, social / unstructured data, unstructured data needs for analytics*	*Java interfaces to HDFS*	*Running on a Cluster*	*Output formats*	*Privacy preserving Data analytics: Smart Homes*
S 4-5	SLO-1	*What is Big Data, Big Deal about Big Data*	*Architecture overview*	*Tuning a Job ,Map Reduce Workflows How Map Reduce Works, The Map Reduce Anatomy of a Map Reduce Job run*	*Map reduce features- counters, built in counters, user defined java and streams counters*	*Data analytics in Intelligent transport system*
	SLO-2					
S-6	SLO-1	*Big Data Sources, Industries using Big Data, Big Data challenges.*	*Hadoop installation*	*Failures, Job Scheduling*	*Sorting*	*Detection and identification of influential spreaders in social media data streams*
	SLO-2					
S-7	SLO-1	*Big Data Technology*	*Hadoop commands execution*	*Shuffle and Sort*	*Joins*	*Predictive analytics in insurance*
	SLO-2	*Old vs. New Approaches*	*Hadoop commands execution*	*The Map Side*	*Programming Real-World Map Reduce*	*Predictive analytics in insurance*
S-8	SLO-1	*Data Discovery*	*Hadoop I/O*	*The Reduce Side, Configuration Tuning*	*Weather dataset*	*Pricing analytics in consumer products*
	SLO-2	*Open-Source Technology for Big Data Analytics*	*Data Integrity*	*Task Execution*	*data with Unix*	*Pricing analytics in consumer products*
S 9	SLO-1	*The Cloud and Big Data*	*Compression*	*Task Execution*	*data with Hadoop*	*Analytics in banking sector*

	SLO-2

Course Code	18CSE444T	Course Name	CLOUD STRATEGY PLANNING AND MANAGEMENT	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To learn the concepts and technological advances fueling the rapid adoption of cloud computing today.*
CLR-2 :	*To provide the students with the skills and knowledge required to plan and manage a Cloud Computing strategy within an organization.*
CLR-3 :	*To enable students to evaluate the strategic value of Cloud Computing using IT Governance and Compliance.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Strategically assess how cloud computing enables IT Transformation and business value in an organization.*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Analyze the role that cloud computing can play in the business process.*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Evaluate how cloud computing and Service Oriented Architecture (SOA) can deliver business agility.*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Implement IT governance to manage business realization from cloud IT services.*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Critically appraise how the incorporation of cloud computing in an IT strategy can deliver on strategic business objectives.*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*The four pillars of cloud computing*	*Moving to a cloud architecture and strategy to achieve business value.*	*Develop an IT strategy to deliver on strategic business objectives in the business strategy*	*Shared services delivered by a Service Oriented Architecture (SOA) in a Private or Public Cloud*	*Benefit Realization and it Governance*
	SLO-2	*Cloud applications and Platforms*				
S-2	SLO-1	*Providing the cloud infrastructure*	*BPM, IS, Porter's Value chain model and BPR as a means of delivering business value*	*IT Project planning in the areas of ITaaS is essential in delivering a successful strategic IT Plan*	*Services, Databases and Applications on demand*	*Managing resources (people, process, technology), to realize benefit from Private/Public Cloud IT services*
	SLO-2	*Cloud computing, Spectral efficiency, Sensors and perspiration*				
S-3	SLO-1	*Strategic inflection points in information Technology*	*Developing Business Strategy: Investigate business strategy models to gain competitive advantage for organizations*	*IT Project planning in the areas of SaaSis essential in delivering a successful strategic IT Plan*	*The effect on Enterprise Architecture and its traditional frameworks such as Zachman).*	*Gartner's 5 pillars of benefit realization*
	SLO-2	*Cloud computing and its slogans*	*SWOT/PEST, Economies of scale, Porter's 3 Strategies and 5 Competitive Forces, D'Aveni's hyper competition models*	*IT Project planning in the areas of PaaSis essential in delivering a successful strategic IT Plan*	*The Open Group Architecture Framework (TOGAF).*	*IT governance as a service in measuring the delivery of IT Strategy from Cloud IT Services using Sarbannes Oxley (CobiT) and other commonly-used approaches*
S-4	SLO-1	*User centered solution and cloud computing*	*Emphasize the roles of the strategic IS/IT leaders such as Chief Information Officer (CIO)*	*IT Project planning in the areas of IaaSis essential in delivering a successful strategic IT Plan*	*Customer Relationship Management*	*High Technology for private banking and Asset Management*
	SLO-2	*For cloud vendors inflection point Is risk and opportunity*				
S-5	SLO-1	*Potential customers of cloud technology*	*The Chief Technology Officer (CTO) in planning and managing IT Strategic development in the organization.*	*Searching for an open architecture*	*Enterprise Resource Planning*	*Cloud Software for Private Banking*
	SLO-2					
S-6	SLO-1	*The cloud interests Small and Medium enterprises*	*Budgeting for cloud computing*	*Infrastructure as a Utility*	*Just-in-Time Inventories*	*Leadership Is based on Fundamentals*
	SLO-2					
S-7	SLO-1	*Virtual companies and the cloud*	*Service level agreements*	*Cloud System Architecture and its primitives*	*Machine-to-Machine and RFID Communications*	*Cloud Software For Asset Management*
	SLO-2	*Virtual networked objects*				

S-8	SLO-1 SLO-2	Consumer technologies and the cloud	Outsourcing, Infrastructural inter dependencies, and the cloud	The User Organizations Business Architecture	Challenges Presented by Organization	Cloud Technology can Improve Fund Management
S-9	SLO-1	Social networks and multimedia messaging	Human resources at the CIO level	Financial Services Applications Architecture	Challenges Presented by Commercial vision	Criteria of Success in Asset Management Technology
	SLO-2		*The transition from legacy to competitive system*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering	CSE	Data Book /	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Layout foundations of Distributed Systems.*																		
CLR-2 :	*Get familiar with the idea of middleware and related issues*																		
CLR-3 :	*Understand in detail the system level and support required for distributed system*																		
CLR-4 :	*Understand the issues involved in studying data and cryptographic algorithms*																		
CLR-5 :	*Expose to the concept of design and implementation of distributed file systems*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Fundamentals of Distributed System Concepts and access System*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*An ability to familiar with various architecture models and Distributed File access techniques*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*An ability to understand the security aspects of distributed system*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Distributed Systems*	*Distributed Computing Model*	*Remote Procedure Call*	*Introduction of Security systems in distributed system*	*Distributed File Systems –Introduction*
	SLO-2				*Potential attacks and threats on computer systems*	
S-2	SLO-1	*Characterization of Distributed Systems*	*Workstation model*	*Remote method invocation*	*Cryptography*	*File Service Architecture*
	SLO-2	*Examples of Distributed Systems*	*Workstation server model*		*Symmetric cryptosystem algorithm –DES*	
S-3	SLO-1	*Architecture of Distributed Systems*	*Process pool model*	*Client server model basics concepts*	*Asymmetric cryptosystems*	*File Models*
	SLO-2	*Shared and Distributed Memory Architechture*	*Comparison of Distributed computing model*	*Client server addressing*		
S-4	SLO-1	*Focus on resource sharing the web*	*Interprocess Communication*	*Client server implementations*	*Secure Channels-Authentication*	*DFS Design*
	SLO-2				*Message Integrity and confidentiality*	
S-5	SLO-1	*Challenges in Distributed Systems*	*External data representation and multicast Communication*	*Client Server Architecture*	*Access control*	*DFS implementation*
	SLO-2					
S-6	SLO-1	*Design issues in Distributed systems*	*API for Internet protocol*	*Group Communication publish and subscribe systems*	*Security Management*	*File catching in DFS*
	SLO-2				*Issues in key distribution*	
S-7	SLO-1	*Networking and Internetworking basic introduction Types of Network*	*Network Virtivalization and overlay networks*	*Shared memory approach*	*Secure group management*	*Implementation in DFS*
	SLO-2			*Distributed objects*	*Authorization management*	
S-8	SLO-1	*Network Principles*	*Case Study : interprocess Communication in UNIX*	*Case study : java RMI*	*Case study - Kerberos*	*Case study – Sun network File systems*
	SLO-2					
S-9	SLO-1	*Internet protocol*	*Case study - MPI*	*Case Study - CORBA*	*Case study - Epayment*	*Case study - Google File systems*
	SLO-2

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Study the fundamentals of optical networks*
CLR-2 :	*Gather knowledge about different types of components*
CLR-3 :	*Learn single hop and multi hop networks*
CLR-4 :	*Acquire knowledge about different WDM network design*
CLR-5 :	*Understand about OADM architecture*
CLR-6 :	*Gather knowledge about optical TDM and CDMA*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Acquire knowledge about basic fundamentals of optical networks*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Understand various classifications of optical components*	*2*	*75*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Develop the ability to apply optical concepts in single and multihop networks*	*2*	*85*	*80*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Gather knowledge about various multiplexing techniques*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Acquire knowledge about OADM concept*	*2*	*75*	*85*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Apply various techniques to handle spectrum with a different perspective*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to optical networks*	*Components :Couplers – Principle of operation*	*Broadcast optical networks – characteristics of single hop networks*	*WDM Network Elements :Optical line terminals*	*Optical TDM Networks*
	SLO-2	*TeleCommunication Network Architecture and services*	*Conservation of energy*	*Experimental WDM Systems*	*optical line amplifiers*	*Basics of TDM*
S-2	SLO-1	*Optical Networks- Multiplexing Techniques*	*Isolators*	*Other Non – Pretransmission Coordination protocols*	*Optical Add/Drop Multiplexers*	*Optical TDM*
	SLO-2	*Second Generation Optical Networks*	*Circulators*	*Pretransmission coordination protocols*	*OADM Architecture*	*Optical Sources*
S-3	SLO-1	*Optical Layer*	*Multiplexers – Gratings, Diffraction Patterns*	*Special Case: Linear Bus with Attempt- and-Defer Nodes*	*Optical crossconnects*	*Modulation*
	SLO-2	*Optical packet switching*	*Bragg and Fiber Gratings*	*AMTRAC and multichannel probabilistic scheduling*	*OXC Configurations*	*multiplexing*
S-4	SLO-1	*Transmission Basics – wavelengths, Frequencies, and channel spacing*	*Filters – fabryperot filters*	*Single- Hop Case study : IBM Rainbow Protocol*	*WDM Network Design: Cost trade-offs*	*Transmission of Ultrafast OTDM signal using soliton*
	SLO-2	*Standards, optical power and loss*	*Mach-Zehnder Interferometers, Arrayed Waveguide gratings*	*Model, Analysis*	*LTD and RWA problems*	*Demultiplexing*
S-5	SLO-1	*WDM Networking Evolutions*	*Optical Amplifiers – Emissions*	*Multihop Networks: characteristics, topological optimization studies*	*Light path topology design*	*Clock Recovery*
	SLO-2	*WDM Network Constructions*	*Erbium -Doped fiber amplifiers, Raman Amplifiers and Semiconductor optical amplifiers*	*Regular structures*	*Routing and wavelength assignment and conversion*	*Optical processing*
S-6	SLO-1	*Optical Fiber- Transmission*	*Transmitters – Lasers, Light emitting diodes,tunable lasers*	*Near- Optimal Node Placement*	*Dimensioning Wavelength*	*Optical TDM network Architectures*
	SLO-2	*Single mode vs Multimode fiber*	*Direct and external modulation, pump sources*	*Shared- channel multihop systems*	*Routing Networks*	*Optical TDM proposals*
S-7	SLO-1	*Attenuation in Fiber*	*Detectors – photo detectors*	*Multihop case study – GEMNET*	*Statistical Dimensioning Models : First passage model*	*Optical CDMA Networks:*
	SLO-2	*Dispersion in Fiber*	*Front end amplifiers*	*GEMNET Architecture and properties*	*Blocking model*	*Basics of CDMA*

S-8	SLO-1	Non Linear Effects – self phase modulation	Switches – large optical switches, optical switch technologies	Channel sharing	Maximum load dimensioning model : offline lightpath requests	Spread spectrum
	SLO-2	Cross phase modulation	Large electronic switches	Multicasting	Online RWA in rings	Code sequences
S-9	SLO-1	Solitons	Wavelength converters – optoelectronic Approach, optical gating	Shared – channel Multihop GEMNET	Access Networks : Network Architecture overview	CDMA Example
	SLO-2	Dispersion- Managed Solitons	Interferometric techniques, wave mixing	Performance Evaluation	Enhanced HFC	Optical CDMA

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basic concepts of IoT and its possible application areas*
CLR-2 :	*Understand the various IoT architectures along with compute and management stack across layers*
CLR-3 :	*Understand the architecture dissected at physical, Communication and Access levels*
CLR-4 :	*Introduce existing toolkits, available platforms, boards, software and laguages for easy development of IoT products*
CLR-5 :	*Understand the various enabling technologies for IoT including Big data analytics, Machine learning, Cloud and Streaming analytics*
CLR-6 :	*Understand the underlying business model for IoT and also acquire skills for DiY (Do it Yourself)*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to IOT*	*Drivers Behind New Network Architectures*	*Smart Objects: The "Things" in IoT*	*Data Analytics for IoT- Overview*	*Business Models for IoT: Introduction*
	SLO-2	*What, Where and How of IoT?*	*Comparing IoT Architectures*	*Sensors, Actuators, and Smart Objects*	*IoT Data Analytics Challenges*	*Business Models*
S-2	SLO-1	*Data Flow of IoT*	*The IoT World Forum (IoTWF) Standardized Architecture*	*Micro-Electro-Mechanical Systems (MEMS)*	*Relevance of ML and IoT- Overview*	*Business Model Innovation*
	SLO-2	*Definition and characteristics of IOT*	*IT and OT Responsibilities in the IoT Reference Model*	*Smart Objects,Smart Objects: A Definition*	*Relevance of Big data and IoT- Overview*	*Value Creation in IoT*
S-3	SLO-1	*Architecture of Internet of Things: Physical-Things*	*A simplified IoT architecture*	*Trends in Smart Objects*	*ML and getting Intelligence from Big Data*	*Laws of Information*
	SLO-2	*Architecture of Internet of Things: Protocols-an Introduction*	*The core IoT functional stack*	*Sensor Networks*	*Big data analytics tools and techniques for IoT: Overview*	*Revenue Generation in the Internet of Things*
S-4	SLO-1	*Architecture of Internet of Things: Logical-Functional Blocks*	*Layer 1: Things: Sensors Layer*	*Wireless Sensor Networks (WSNs)*	*MPP, NoSQL*	*Exemplary Business Model Scenarios for the Internet of Things*
	SLO-2	*Architecture of Internet of Things: Logical-Communication Models*	*Layer 1: Things: Actuators Layer*	*Communication Protocols for WirelessSensor Networks- a Introduction*	*Hadoop and YARN*	*Scenario 1: Product as a Service (PaaS)*
S-5	SLO-1	*Architecture of Internet of Things: Logical-Communication API*	*Layer 2: Communications Network Layer: Access, Gateway*	*Communication Criteria- Introduction*	*Hadoop Eco system*	*Scenario 2: Information Service Providers*
	SLO-2	*IOT enabling technologies*	*Layer 2: Communications Network Layer: Network, Management*	*Communication Criteria- Definitions*	*Apache Kafk, Spark, Storm, Flink,*	*Scenario 3: End-user Involvement*
S-6	SLO-1	*Introduction to IoT Levels and Deployments*	*Layer 3: Applications and Analytics Layer:*	*IoT Access Technologies-Introduction*	*Lamba Architecture*	*Scenario 4: Right-time Business Analysis and Decision making*
	SLO-2	*IoT Deployment Levels: 1 to 6*	*Analytics Versus Control Applications,*	*IoT Access Technologies-Definitions*	*Edge Streaming Analytics for IoT*	*DIY- Smart Experience (DiYSE) Projects- a introduction*

S-7	SLO-1	*IoT Security and Privacy*	*Data Versus Network Analytics*	*IoT Application transport methods- Definitions*	*Edge Analytics core functions*	*Requirements for Enabling DiY in Eco- awareness Applications*
	SLO-2	*IoT Data Analytics, Protocols*	*Data Analytics Versus Business Benefits*	*The Toolkit Approach for End-user Participation in the Internet of Things:*	*Distributed analytics systems*	*Technologies and Standards Relevant for DiY Eco-awareness*
S-8	SLO-1	*IoT Environmental challenges: excess waste disposal*	*Smart Services*	*Existing Toolkits*	*Network Analytics*	*Sensor-actuator Technologies and Middleware as a Basis for a DiY Service Creation Framework*
	SLO-2	*Legal Challenges for a Privacy Framework- an IoT perspective*	*Iot Data Management And Compute Stack: The Hierarchy Of Edge, Fog, And Cloud*	*I/O Boards*	*IoT physical servers and cloud offerings (Cloud computing for IoT)*	*Device Integration, Middleware Technologies*
S-9	SLO-1	*Privacy Enhancing Technologies for IoT*	*Fog Computing*	*HW Based Systems, Introduction to Open source boards (Arduino, Raspberry Pi and other variants)*	*Relevance of Cloud connectivity and IoT- Overview*	*Semantic Interoperabity- a requirement for IoT DiY*
	SLO-2	*Case Studies: Domain specific IOT Applications*	*Edge Computing*	*SW Based Solutions*	*Logical design using Python, Useful IoT libraries*	*DiY Smart Experiences Service Framework-an Introduction*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understanding the basics of pervasive computing and its application*
CLR-2 :	*Gain knowledge on the voice enabling*
CLR-3 :	*Understand the fundamental elements of pervasive computing.*
CLR-4 :	*Learn the design process of Pervasive Computing Environments and its solutions*
CLR-5 :	*Familiarize with device connectivity & web applications concepts*
CLR-6 :	*Introduce the concepts of wearale computing and security in pervasive computing*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understand the fundamental elements of pervasive computing.*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Learn the design process of Pervasive Computing Environments and its solutions*	*2*	*75*	*80*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Familiarize hardware, software and the aspects involved in pervasive computing*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Apply the knowledge for implementing security*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Organize the functionalities and components of PDA in pervasive computing.*	*2*	*75*	*85*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Describe the user interface issues in pervasive computing.*	*2*	*75*	*80*	*H*	-	-	*M*	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*- INTRODUCTION*	*Device connectivity*	*WAP & VOICE TECHNOLOGY, WAP and Beyond: Introduction*	*Wearable Computing and Sensor Systems for Healthcare - Introduction*	*Security and Privacy in Pervasive Networks - Introduction*
	SLO-2	*Pervasive Computing: Past, Present and Future Pervasive computing*	*Protocols: wireless*	*Components of the WAP*	*The Health Body Area Network*	*Security Classics - Perimeter Security - Access Control*
S-2	SLO-1	*Pervasive Computing Market,*	*mobile phone technologies*	*architecture*	*Medical and Technological Requirements of Health Sensors*	*Hardening Pervasive Networks - Pervasive Computational Paradigms*
	SLO-2	*m-Business*	*mobile phone technologies*	*WAP infrastructure,*	*Wearable Sensors for Vital Signals Monitoring*	*Pervasive Hardware*
S-3	SLO-1	*Application examples: Retail,*	*mobile internet protocol*	*WAP security issues*	*Wearable Sensors for Activity Recognition*	*Pervasive Networking and Middleware*
	SLO-2	*Application examples: Airline check-in and booking,*	*mobile internet protocol*	*Wireless Markup Language*	*Sensors and Signals for Emotion Recognition*	*Pervasive Applications*
S-4	SLO-1	*Healthcare*	*Synchronization and replication protocol*	*WAP push*	*ntra-BAN Communications in Pervasive Healthcare Systems: Standards and Protocols - IEEE 802.15.4 and ZigBee*	*Pervasive Distributed Application*
	SLO-2	*Tracking, Car information system,*	*Synchronization and replication protocol*	*Products*	*Bluetooth*	*Logic Based Level Security*
S-5	SLO-1	*Sales Force Automation*		*i-Mode*	*Bluetooth Low Energy*	*Deterministic Access Models*
	SLO-2	*Email access via WAP and voice*	*distributed services*	*VoiceTechnology: Basics of Speech recognition,*	*Integrated and Additional Solutions for Health BAN Communications*	*Predictive Statistical Schemes*
S-6	SLO-1	*A Pervasive System for Volcano Monitoring*	*distributed message*	*VoiceTechnology: Basics of Speech recognition,*	*Introduction - Pervasiveness and Mobility in Computing and Communications*	*Privacy in Pervasive Networks - Problem Definition*

	SLO-2	*A Pervasive Computing Platform for Individualized Higher Education*	*transaction protocols*	*Voice Standards*	*Context Awareness*	*Challenges to Privacy Protection*
S-7	SLO-1	*Device Technology*	*Security*	*Voice Standards*	*Heterogeneity*	*Location Dependency*
	SLO-2	*Hardware,*	*Device Management*		*Wireless Technologies and Standards*	*Data Collection*
S-8	SLO-1	*Human machine interface*	*Web Application Concepts: WWW Architecture*	*Speech Applications,*	*Middleware*	*Internet Service Provider (ISP) Role*
	SLO-2	*Bio metrics,*	*Protocols*	*Speech Applications,*	*Future Trends: Beyond the Middleware*	*Data Ownership Private Systems*
S-9	SLO-1	*Operating systems*	*Transcoding*	*Speech and Pervasive Computing*	*Pervasive Computing in Extreme Areas; The Hiker's Personal Digital Assistant*	*Quality of Privacy (QoP)*
	SLO-2	*Java for pervasive devices*	*Client Authentication via Internet*	*Speech and Pervasive Computing*	*Pervasive Computing in Personal Health Systems; The MyHealthService Approach*	*Open Issues in Privacy of Systems 'Sharing' in Personal Networks*

Course Code	18CSE381T	Course Name	CRYPTOGRAPHY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand OSI security architecture and classical encryption techniques.*
CLR-2 :	*Acquire fundamental knowledge on the concepts of finite fields and number theory*
CLR-3 :	*Understand various block cipher and stream cipher models*
CLR-4 :	*Describe the principles of public key cryptosystems, hash functions and digital signature.*
CLR-5 :	*Gain a first-hand experience on encryption algorithms, encryption modes.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Implement the Classical Encryption Techniques.*	2	80	85	H									H					
CLO-2 :	*Comprehend fundamental concepts of finite field and number theory.*	2	75	80	H														
CLO-3 :	*Categorize block cipher modes of operation and comprehend digital signature functions*	2	85	80	H														
CLO-4 :	*Implement Public Key Cryptography and hash functions.*	2	80	75	H							H							

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Cryptography and Network Security*	*Groups, Rings, Fields*	*Block cipher principles-Introduction*	*Principles of Public-key Cryptosystems - Structure and key management*	*Message Authentication Codes*
	SLO-2					
S-2	SLO-1	*OSI Security Architecture*	*Modular arithmetic*	*Data Encryption Standard*	*Principles of Public-key Cryptosystems – Applications for Public-key Cryptosystems*	*Requirements for Message Authentication Codes*
	SLO-2					
S-3	SLO-1	*Introduction to Security attacks*	*Euclid's Algorithm*	*DES Example, Strength of DES*	*Requirements for Public-key Cryptosystems and Public – Key Cryptanalysis*	*Applications of Cryptographic Functions - Message Authentication*
	SLO-2					*Two Simple Hash Function*
S-4	SLO-1	*Security mechanisms*	*Polynomial Arithmetic*	*Block cipher Modes of operation – Multiple Encryption*	*RSA algorithm - Key management*	*Security Requirements for Cryptographic hash Functions*
	SLO-2					
S-5	SLO-1	*Symmetric cipher model*	*Finite Fields*	*Block cipher Modes of operation – Triple DES*	*RSA algorithm - Encryption and Decryption*	*Hash Algorithms - MD5*
	SLO-2					
S-6	SLO-1	*Substitution techniques: Caesar cipher*	*Prime Numbers, Testing for Primality*	*Electronic Code Book, Cipher Block Chaining Mode*	*Diffie Hellman key exchange – Algorithm, Key Exchange Protocols*	*Hash Algorithms - SHA*
	SLO-2	*Play fair Cipher*		*Cipher Feedback Mode, Output Feedback Mode and Counter Mode*	*Diffie Hellman key exchange – Man-in-the-Middle Attack*	
S-7	SLO-1	*Mono alphabetic cipher*	*Fermat's and Euler's Theorem*	*Advanced Encryption Standard – Structure and Transformation Functions*	*Elliptic curve: Arithmetic – Abelian Groups, Elliptic Curves over Real Numbers*	*Digital Signature Standard*
	SLO-2	*Poly alphabetic ciphers , Onetime pad*		*AES Key Expansion and AES Example*		
S-8	SLO-1	*Hill Cipher -Encryption*	*The Chinese remainder theorem*	*Blowfish*	*Elliptic Curves over* Z_p*, Elliptic Curves over* $GF(2^m)$	*Applications pertaining to Encryption using different ciphers and modes*
	SLO-2	*Decryption*				
S-9	SLO-1	*Transposition techniques, Steganography*	*Discrete Logarithms*	*RC5 algorithm*	*Elliptic Curve Cryptography*	*One-way hash algorithms.*
	SLO-2

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the different ways the information systems may be compromised.*
CLR-2 :	*Learn to model the various types of threats.*
CLR-3 :	*Understand the Information Assurance planning strategies.*
CLR-4 :	*Acquire knowledge by analyzing software systems.*
CLR-5 :	*Understand and apply different countermeasures and protect information.*
CLR-6 :	*Perform vulnerability testing.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Acquire the basic knowledge about the Information Assurance.*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Design an appropriate Policies for the organization.*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Deliver professional, ethical, legal, security and social issues and responsibilities in an effective manner.*	2	85	80	H	-	-	-	-	-	-	M	-	-	-	-	-	-	-
CLO-4 :	*.Develop risk management strategies for an enterprise.*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Provide the understanding of different security mechanisms used in various areas of computing*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Apply the current technical concepts and practices in the core information technologies.*	2	80	85	H	-	-	-	-	-	-	-	M	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Information Assurance Basics*	*Information Security Planning*	*Information Assurance Process : Managing Information Assurance*	*Benefits of Incorporating Security Considerations*	*Information Assurance Detection and Recovery Processes*
	SLO-2	*The Need for Information Assurance*	*Information Security Governance*	*Information Security project management*	*System Development Life Cycle*	*Intrusion Detection and Prevention System(IDPS)*
S-2	SLO-1	*Key Information Security concepts*	*Policy, Standards and Practices*	*Technical aspects of implementing Information Security*	*Information Assurance in System Development Life Cycle*	*IDPS types*
	SLO-2	*Critical characteristics of Information*	*Policy Management, Information Security Blueprint*	*Non-Technical aspects of implementing Information Security*	*Information Assurance in the Service Acquisition Life Cycle*	*IDPS detection methods*
S-3	SLO-1	*MSR Model*	*Continuity Strategies*	*Structure of an Information Assurance*	*Physical and Environmental Security Controls*	*IDPS - Analysis*
	SLO-2	*Security in System lifecycle*	*Crisis Management*	*Organizational Maturity, Asset Management*	*Handling of Media*	*Log Management Tools: SIEM*
S-4	SLO-1	*NIST Approach to Securing SDLC*	*Information Asset Life Cycle, Plan,Do,Check,Act Model*	*APM Maturity model*	*Information Assurance Awareness, Training, and Education (AT and E), Purpose, Benefits*	*Honeypot/Honeynet*
	SLO-2	*Security Professionals and Organizations*	*Current Practices : Due Care and Due Diligence*	*Overview of Risk Management*	*AT and E : Design, Development*	*Scanning and Analysis tools*
S-5	SLO-1	*Communities of Interest*	*Specific Laws and Regulations*	*Risk Identificaion*	*AT and E : Assessment*	*Malware Detection*
	SLO-2	*Information Security: Is it an art or Science?*	*International Laws and Acts*	*Risk Assessment*	*Types of Learning Programs*	*Penetration Test*
S-6	SLO-1	*Information Assurance Concepts : Defense in Depth*	*Standards and Best Practices*	*Risk control*	*Employment Policies and Practices*	*Physical Controls*
	SLO-2	*Information Assurance in Cyber Security*	*Plans for Information Assurance Strategy*	*Quantitative vs Qualitative Risk management practices*	*Securty considerations for temporary employees, consultants and other workers*	*Special considerations for Physical security*

S-7	SLO-1	*CIA Triangle*	*Cryptology*	*Recommended risk control practices*	*Preventive Information Assurance Tools*	*Information Assurance Measurement Process*
	SLO-2	*The Need for Security*	*Cipher methods*	*Process , Secure design through threat modeling*	*Preventive Information Assurance controls*	*Metrics Program*
S-8	SLO-1	*Categories of Threats*	*Cryptographic algorithms*	*Importance of Policy*	*Positioning and staffing the Security function*	*Incident Handling Process*
	SLO-2	*Software Attacks types*	*Cryptographic tools*	*Information Assurance Policy*	*Credentias for Information Security Professionals*	*Continuity Strategies*
S-9	SLO-1	*Other vulnerabilities*	*Protocols for secure Communications*	*Policy Development Steps*	*Access control benefits*	*Computer Forensics*
	SLO-2	*Implications from Lack of Information Assurance*	*Approaches to implement Information Assurance*	*Certification, Accreditation, and Assurance*	*Access control Techniques, Administration*	*Examiner Prerequisites, Team Establishment*

Course Code	18CSE384T	Course Name	SECURE SOFTWARE DEVELOPMENT LIFE CYCLE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify project security risks & selecting risk management strategies.*
CLR-2 :	*Analyze software security standards, policies, and guidelines to articulate and elaborate requirements*
CLR-3 :	*Use automated tools and secure coding practices to analyze and test existing code and reduce vulnerabilities*
CLR-4 :	*Select and integrate established security design patterns and address threat assessments to mitigate common vulnerabilities and achieve the target design*
CLR-5 :	*Participate in team-based peer reviews to analyze the security development life cycle and mitigate risks and vulnerabilities*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Explain terms used in secured software development and life cycle process*	*3*	*80*	*70*	*L*	*H*	*-*	*L*	*L*	*-*	*-*	*-*	*L*	*L*	*-*	*H*	*-*	*-*	*-*
CLO-2 :	*Incorporate requirementsinto secured software development process and testsoftware for security vulnerability*	*3*	*85*	*75*	*M*	*H*	*L*	*M*	*L*	*-*	*-*	*-*	*M*	*M*	*-*	*H*	*-*	*-*	*-*
CLO-3 :	*Identify vulnerable code in implemented software and describe attack consequences*	*3*	*75*	*70*	*M*	*H*	*M*	*H*	*L*	*-*	*-*	*-*	*M*	*L*	*-*	*H*	*-*	*-*	*-*
CLO-4 :	*Apply mitigation and implementation practices to construct attack resistant software*	*3*	*85*	*80*	*M*	*H*	*M*	*H*	*L*	*-*	*-*	*M*	*M*	*M*	*-*	*H*	*-*	*-*	*-*
CLO-5 :	*Apply secure design principles for developing attack resistant software*	*3*	*85*	*75*	*H*	*H*	*M*	*H*	*L*	*-*	*-*	*-*	*M*	*M*	*-*	*H*	*-*	*-*	*-*

Program Learning Outcomes (PLO)

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Software Engineering- Process model*	*A Risk Management Framework*	*Introduction toArchitectural Risk Analysis*	*Code Review with a Tool*	*Software Penetration Testing*
	SLO-2				*Catching Implementation Bugs with a Tool)*	
S-2	SLO-1	*Agile development-Agile Process*	*The Five Stages of Activity*	*Common Themes among Security Risk Analysis Approaches*	*Approaches to Static Analysis*	*Software Penetration Testing—a Better Approach*
	SLO-2	*Extreme Programming*				
S-3	SLO-1	*Need to secure development life cycle*	*Understanding the Business Context*	*Traditional Risk Analysis Terminology*	*Modern Rules*	*Using Penetration Tests to Assess the Application Landscape*
	SLO-2		*Gathering the Artifacts*			
S-4	SLO-1	*Current Software Development Methods Fail to Produce Secure Software .*	*Identifying the Business and Technical Risks*	*Knowledge Requirement*	*Tools from Researchland*	*Risk-Based Security Testing*
	SLO-2	*Incentive to Review Code*				
S-5	SLO-1	*Understanding Security Bugs*	*Synthesizing and Ranking the Risks*	*The Necessity of a Forest-Level View*	*Commercial Tool Vendors*	*Abuse Cases*
	SLO-2	*Critical Mass*		*A Traditional Example of a Risk Calculation*		
S-6	SLO-1	*Proprietary Software Development Methods- CMMI, TSP, and PSP*	*Defining the Risk Mitigation Strategy*	*Modern Risk Analysis*	*Key Characteristics of a Tool*	*Software Security Meets Security Operations*
	SLO-2					
S-7	SLO-1	*SDL for Management*	*Carrying Out Fixes and Validating*	*Touchpoint Process: Architectural Risk Analysis*	*The Fortify Knowledge Base*	*Knowledge for Software Security*
	SLO-2					
S-8	SLO-1	*Managing the SDL*	*The Importance of Measurement*	*Limitations of Traditional Approaches*	*Touchpoint Process: Code Review*	*Establishing a Metrics Program*
	SLO-2					
S-9	SLO-1	*Case study: A Short History of the SDL at Microsoft*	*The Cigital Workbench*	*Getting Started with Risk Analysis*	*Use a Tool to Find Security Bugs*	*Continuous Improvement*
	SLO-2

Course Code	18CSE385T	Course Name	SECURITY AUDIT AND RISK ASSESSMENT	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CSE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the security audit planning strategies*
CLR-2 :	*Gain knowledge about information risk*
CLR-3 :	*Discover knowledge in collecting data about organization*
CLR-4 :	*Acquire knowledge in various analysis on Information Risk Assessment*
CLR-5 :	*Introduce the System Risk analysis*
CLR-6 :	*Understand the organizational and system specific risk*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Acquire the knowledge on various secure auditing techniques*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Acquire the ability to identify knowledge in information risk*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Understand the basic ideas about data collection workload*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Appreciate the concepts of vulnerability catalogs and impact analysis scheme*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Identify the knowledge in risk classification techniques*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Acquire the knowledge on system specific risk*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Need for Audit Planning*	*What is Risk?*	*Data Collection-Introduction*	*Compiling Observations from Organizational*	*System Risk Analysis*
	SLO-2	*Steps in Audit Planning*	*Going Deeper with Risk*	*The Sponsor*	*Risk Documents*	*Risk Classification*
S-2	SLO-1	*Audit Risk Assessment*	*Components of Risk*	*The Project Team*	*Preparation of Threat and Vulnerability Catalogs*	*Risk Rankings*
	SLO-2	*Performing Audit*	*Putting it Altogether*	*The size and Breadth of the Risk Assessment*	*Threat Catalog*	*Risk Prioritization and Treatment*
S-3	SLO-1	*Internal Controls*	*Information Security Risk*	*Scheduling and Deadlines*	*Vulnerability Catalogs*	*Review of Audit Findings*
	SLO-2	*Audit Evidence*	*Information Security Risk Assessment Overview*	*Assessor and Organization Experience*	*Threat Vulnerability Pairs*	*Review of Security Incidents*
S-4	SLO-1	*Audit Testing*	*Assess Information Security Risk*	*Work load*	*Overview of the System Risk Computation*	*Review of Security Exceptions*
	SLO-2	*Follow up activities*	*Risk assessment and security Program*	*Data Collection Mechanisms*	*Designing the Impact Analysis Scheme*	*System Specific Risk Treatment*
S-5	SLO-1	*Security Monitoring and Auditing*	*Information Security Management in a Nutshell*	*Collectors*	*Confidentiality, Integrity*	*Information Security Risk Assessment Reporting*
	SLO-2	*Assurance and Trust*	*Drivers, Laws and Regulations*	*Containers*	*Availability*	*Risk Analysis Executive Summary*
S-6	SLO-1	*Need for Assurance*	*Federal Information Security Management*	*Executive Interview*	*Preparing the Impact Score*	*Methodology*
	SLO-2	*Role of Requirements in Assurance*	*Gramm-Leach-Blile(GLBA)*	*Document Requests*	*Designing the Control analysis Scheme*	*Organizational*
S-7	SLO-1	*Audit Assurance in Software Development Phases*	*Health Insurance Portability and Accountability Act(HIPAA)*	*IT Asset Inventories*	*Designing the Likelihood Analysis Scheme*	*System Specific*
	SLO-2	*Building Secure and Trusted Systems*	*State Governments*	*Asset Scoping*	*Exposure*	*Results*
S-8	SLO-1	*Designing an Auditing System*	*ISO 27001*	*Business Impact Analysis and Other Assessments*	*Frequency*	*Organizational Analysis*
	SLO-2	*Auditing to detect Violations of a Security Policy*	*Drivers,Laws and Regulations*	*Critical Success Factor Analysis*	*Controls*	*System Specific*
S-9	SLO-1	*Auditing Mechanisms*	*Risk Assessment Framework*	*Profile & Control Survey*	*Likelihood*	*Risk Register*
	SLO-2	*Audit Browsing*	*Practical Approach*	*Consolidation*	*Final Risk Score*	*Post Mortem*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Gain knowledge on various security testing techniques and asses sensitiveness of assets.*
CLR-2 :	*Gain knowledge on weaknesses of various OS, network and applications.*
CLR-3 :	*identify how security controls can be improved to prevent hackers gaining access to operating systems and networked environments.*
CLR-4 :	*Acquire knowledge on methodologies and techniques of Hacking*
CLR-5 :	*To test and exploit systems using various tools.*
CLR-6 :	*Understand the impact of hacking in real time machines*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	Acquire the knowledge on identifying security vulnerabilities	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	Acquire the ability to identify problems in network, OS and applications commonly exploited by hackers	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	Understand management of static and dynamic security controls in firewalls, IPS, IDS	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	Appreciate the concepts of hacking and gaining access to remote and local systems.	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	Apply the knowledge for creating better security controls.	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	Acquire the knowledge to prevent threats in targeted attacks and real time systems.	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to penetration testing*	*Types of Scanning*	*Meterpreter Basics*	*Social engineering*	*DOS Attack*
	SLO-2	*Introduction to penetration testing -2*	*Black, White and Grey Scanning*	*Working with Meterpreter session*	*Electronic and Non Electronic Social Engineering*	*DDOS Attack*
S-2	SLO-1	*Understanding basic Ethical Hacking terminologies*	*Foot Printing Stages*	*Exploit Modules*	*SET- Social Engineering Toolkit*	*Web application Vulnerability*
	SLO-2	*Understanding basic Ethical Hacking terminologies -2*	*Foot Printing Stages-2*	*Payload Modules*	*Social Engineering Prevention Techniques*	*Security assessment of public Domains*
S-3	SLO-1	*Batch Programming Basics*	*DNS Information Gathering*	*Privilege Escalation*	*Buffer Over Flow Attack*	*Phishing and its Types*
	SLO-2	*Batch Programming Basics - 2*	*NS Lookup*	*Vertical and horizontal Privilege Escalation*	*Stack Based Buffer overflow*	*Cross Site Request Forgery*
S-4	SLO-1	*Taking control using batch programs*	*Network Information Gathering*	*Token Stealing*	*Heap Based buffer overflow*	*DOM Based XSS*
	SLO-2	*Taking control using batch programs-2*	*NMap*	*Active and Passive stealing*	*Deep packet inspection*	*Brup Suite*
S-5	SLO-1	*Open web Application Security Project(OWASP)*	*Scanning*	*Network Sniffing*	*SQL Injection –Introduction*	*Password Cracking*
	SLO-2		*Port, Network and OS*	*Active and passive sniffing*	*SQL Injection Types*	*John the Ripper*
S-6	SLO-1	*Stages of Ethical Hacking*	*Nmap Scripting*	*Creating Backdoors*	*Error Based SQL,*	*Dictionary Attack, Brute Force Attack*
	SLO-2			*Persistent and Non-Persistent*	*Union Based SQL*	*Rainbow Table Attack,*
S-7	SLO-1	*Vulnerability Research*	*Vulnerability Scanning*	*Key Loggers*	*Blind SQL*	*Shoulder Sniffing, Spidering*
	SLO-2		*Nessus*	*Software and Hardware Key loggers*	*Boolean-based SQL injection, Time-based SQL injection*	*Offline Cracking*
S-8	SLO-1	*Impact of Hacking*	*'Who is' Information Gathering*	*ARP Poisoning*	*SQL Map,DVWA*	*Wifi Hacking*
	SLO-2		*Wireshark*	*Maltigo*	*SQL injection Counter Measures*	*AIrcrack*
S-9	SLO-1	*Introduction to Kali OS*	*Enumeration*	*Man In The Middle Attack*	*Steganography*	*Documentation and Reporting*
	SLO-2	*Installation and configuration*	*Active and Passive Enumeration*	*Port Forwarding*	*Steganography counter measures*	*Dradis Framework*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the fundamentals of static and dynamic analysis.*
CLR-2 :	*Gain knowledge about running malware in virtual environment.*
CLR-3 :	*Study about disassembly constructs and its structures.*
CLR-4 :	*Study about new processors and file types using the IDA SDK*
CLR-5 :	*Explore popular plug-ins that make writing IDA scripts easier, allow collaborative reverse engineering*
CLR-6 :	*Understand how to best approach the subject of Android malware threats and analysis.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Gain knowledge about the different forms of malware.*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Set up a safe virtual environment to analyze malware.*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Navigate, comment, and modify disassembly.*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Use code graphing to quickly make sense of cross references and function calls*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Use IDA's built-in debugger to tackle hostile and obfuscated code.*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Learn procedures for recognizing and analyzing Android malware threats quickly and effectively.*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*The Goals of Malware Analysis*	*The Structure of a Virtual Machine*	*Disassembly Theory*	*Cross-References*	*Introduction to the Android Operating System and Threats*
	SLO-2	*Malware Analysis Techniques*	*Creating Your Malware Analysis Machine*	*The Why and how of Disassembly*	*Function Calls*	*Malware Threats, Hoaxes, and Taxonomy*
S-2	SLO-1	*Types of Malware*	*Using Your Malware Analysis Machine*	*Reversing and Disassembly Tools.*	*IDA Graphing*	*Open Source Tools*
	SLO-2	*General Rules for Malware Analysis*	*The Risks of Using VMware for Malware Analysis*	*Getting started with IDA.*	*Console Mode IDA*	*Collections*
S-3	SLO-1	*Antivirus Scanning*	*Record/Replay: Running Your Computer in Reverse*	*IDA Data Displays*	*IDA's Batch Mode*	*File Data, Metadata*
	SLO-2	*Hashing- Fingerprint for Malware*	*Sandboxes: The Quick-and-Dirty Approach*	*Disassembly Navigation.*	*Customizing IDA's*	*Creating a JAR File, VisualThreat Modeling*
S-4	SLO-1	*Finding Strings*	*Running Malware*	*Disassembly Manipulation.*	*Library Recognitions*	*Automation*
	SLO-2	*Packing Files*	*Monitoring with Process Monitor*	*Recognizing Data Structure Use*	*Augmenting Function Information*	*Processor Emulation*
S-5	SLO-1	*Detecting Packers with PEiD*	*Viewing Processes with Process Explorer*	*Creating IDA Structures*	*Augmenting Predefined Comments*	*Configuring Emulated Devices within AVD*
	SLO-2	*Portable Executable File Format*	*Comparing Registry Snapshots with Regshot*	*Using Structure Templates*	*The Infamous Patch Program Menu*	*Using the ADB Tool*
S-6	SLO-1	*Static, Runtime, and Dynamic Linking*	*Faking a Network*	*Importing New Structures*	*IDA Output Files and Patch Generation*	*Installing Samples to Devices and Emulators*
	SLO-2	*Exploring Dynamically Linked Functions with Dependency Walker*	*Packet Sniffing with Wireshark*	*Using Standard Structures*	*IDA Scripting*	*Application Storage and Data Locations*
S-7	SLO-1	*Imported and Exported Functions*	*Using INetSim*	*IDA TIL Files*	*IDA Software Development Kit*	*Devices View, LogCat View*
	SLO-2	*PotentialKeylogger.exe: An Unpacked Executable*	*Basic Dynamic Tools in Practice*	*C++ Reversing Primer- The this Pointer*	*The IDA Application Programming Interface*	*Application Tracing*
S-8	SLO-1	*Examining PE Files with PEview*	*Levels of Abstraction*	*Virtual Functions and Vtables*	*Writing a Plug-in, Plug-in User Interface Options*	*Build Your Own Sandbox*

	SLO-2	*Viewing the Resource Section with Resource Hacker*	*Reverse-Engineering*	*The Object Life Cycle*	*IDA Loader Modules*	*USB-cleaver, Torec*
S-9	SLO-1	*Using Other PE File Tools*	*The x86 Architecture*	*Name Mangling, Runtime Type Identification*	*Processor Module Architecture*	*Static and Dynamic Analysis of Uploaded Malware Samples.*
	SLO-2	*PE Header Summary*	*Recognizing C Code Construct in Assembly*	*Inheritance Relationships, C++ Reverse Engineering References*	*Real World Applications- Vulnerability Analysis.*	*Capabilities and Limitations of the Emulators.*

Course Learning Rationale (CLR):	The purpose of learning this course is to:	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	Understand the basics of cyber law and cyber security																		
CLR-2 :	familiarize the issues those are specific to amendment rights																		
CLR-3 :	Become aware on copyright issues in software's																		
CLR-4 :	Understand the Cyber-crimes and Cyber Frauds																		
CLR-5 :	Understand the Legal Framework																		
CLR-6 :	understand ethical laws of computer for different countries																		
Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	Gain in-depth knowledge on information on cyber security and issues specific to amendment rights	3	80	70	L	H	H	H	L	H	L	H	H	H	L	H	H	H	H
CLO-2 :	Apply the knowledge on copyright issues within software packages	3	85	75	L	H	H	H	L	H	L	H	H	H	L	H	H	H	H
CLO-3 :	Comprehend ethical laws of computer for various countries	3	75	70	L	H	H	H	L	H	L	H	H	H	L	H	H	H	H
CLO-4 :	Defines the Cyber-crimes and frauds	3	85	80	L	H	H	H	L	H	L	H	H	H	L	H	H	H	H
CLO-5 :	Apply the knowledge of Legal framework	3	85	75	L	H	H	H	L	H	L	H	H	H	L	H	H	H	H
CLO-6 :	Construct the secured environment	3	80	70	L	H	H	H	L	H	L	H	H	H	L	H	H	H	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	Introduction	Overview Of The Information Technology Act, 2000	Cyber-crimes / Cyber Frauds	Cyber Crimes& Legal Framework	Cyber Security
	SLO-2	History of Internet and World Wide Web	Applicability of the Act	Definition of cyber crime	Cyber Crimes against Individuals, Institution and State	Network and website Security Risks
S-2	SLO-1	Need for cyber law	Scheme of the Act	First Cyber crime	Hacking	Hacking
	SLO-2	Cyber-crime on the rise	Important provisions of the Act		Digital Forgery	E-business Risk management issues
S-3	SLO-1	Important terms related to cyber law	Digital Signature under the IT Act, 2000	Types of cyber frauds	Cyber Stalking/Harassment	Firewall
	SLO-2		E-Governance		Cyber Pornography	Security framework
S-4	SLO-1	Cyber law in India	Attribution, Acknowledgement and Dispatch of Electronic Records	Cyber frauds in India	Identity Theft & Fraud	Cryptocurrency
	SLO-2		Certifying Authorities	Preventive measures	Cyber Terrorism	Blockchain –Technology Stack :Protocol, Currency
S-5	SLO-1	Need for cyber law in India	Controller of Certifying Authorities (CCA)	Cyber crimes	Cyber Defamation	Crowd Funding
	SLO-2		Security Guidelines for Certifying Authorities	Who commits cyber-crimes?	Right to Privacy and Data Protection on Internet	Bitcoin Prediction Markets
S-6	SLO-1	History of cyber law in India	Electronic Signature Certificates	Penalties and offences under the IT Act, 2000	Concept of privacy	Smart Property
	SLO-2		Duties of Subscribers		Self-regulation approach to privacy	Smart Contract
S-7	SLO-1	Information Technology Act, 2000	Penalties and Offences	Offences under other legislations	Ingredients to decide confidentiality of information	Decentralized Governance Services
	SLO-2				Intellectual Property Issues in Cyber Space	E Payments
S-8	SLO-1	Overview of other laws amended by the IT Act, 2000	Intermediaries	Investigation of cyber-crimes in India	Interface with Copyright Law	Digital Token based E payment systems
	SLO-2				Interface with Patent Law	E Wallet
S-9	SLO-1	National Policy on Information Technology 2012	rules issued under the IT Act, 2000	Regulatory Authorities	Trademarks &Domain Names Related issues	Online financial services in India
	SLO-2				Dispute Resolution in Cyberspace	Law to Protect online financial service fraud

Course Code	18CSE475T	Course Name	MOBILE AND WIRELESS SECURITY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CSE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*understand the fundamentals of mobile cellular networks and IEEE wireless networks*
CLR-2 :	*Learn the basic security fundamentals*
CLR-3 :	*understand the security issues in Wi-Fi.and Wi-Max*
CLR-4 :	*explore the security issues in Next generation mobile networks*
CLR-5 :	*understand the security issues and key management in ad-hoc networks.*
CLR-6 :	*study the hacking techniques in IEEE 802.11*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO – 3
CLO-1 :	*understand the fundamentals of mobile cellular networks and IEEE wireless networks*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Identify various possibilities for security threats in wireless networks.*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Handle the security threats in Wi-Fi networks.*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Solve the security attacks in mobile IP networks*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Prevent the attacks in ad-hoc networks.*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Protect the 802.11 Networks from attacks.*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to mobile cellular networks*	*Wi-Fi Security*	*Security in Next Generation Mobile Networks*	*Security in Ad Hoc Networks*	*Overview of Wireless security-Hacking*
	SLO-2	*Cellular network basic concepts*	*Attacks on wireless networks*	*SIP*	*Motivations and application fields*	*Scanning and Enumerating 802.11 Networks*
S-2	SLO-1	*IEEE wireless networks, WLAN: IEEE 802.11*	*IEEE 802.11 security mechanisms*	*VoIP security flaws*	*Routing protocols*	*Windows Sniffing/Injection Tools*
	SLO-2	*WMAN mobile: IEEE 802.20*	*WEP (Wired Equivalent Privacy) and Shortcomings*	*Making VoIP secure*	*Attacks to routing protocols*	*Attacking 802.11 Wireless Networks*
S-3	SLO-1	*Mobile Internet networks*	*Security in 802.1x*	*IP Multimedia Subsystem (IMS)*	*Security mechanisms - Basic protections and existing tools*	*Security Through Obscurity*
	SLO-2	*Security in the digital age*	*Authentication*	*IMS architecture and security*	*Key management architectures*	*Attacking WPA-Protected 802.11 Networks*
S-4	SLO-1	*Threats and risks to TeleCommunication systems*	*The 802.11i security architecture*	*4G security*	*Protections using asymmetric cryptography*	*Breaking Authentication: WPA-PSK*
	SLO-2	*From wireline vulnerabilities to vulnerabilities in wireless Communications*	*Radio security policies*	*Confidentiality*	*Protections using symmetric cryptography*	*Breaking Authentication: WPA Enterprise*
S-5	SLO-1	*Security services*	*Authentication in wireless networks*	*Security of IP-Based Mobile Networks*	*Protection against data modification*	*Attack 802.11 Wireless Clients*
	SLO-2	*Symmetric and asymmetric cryptography*	*Layer 3 security mechanisms*	*Vulnerabilities of Mobile IP networks*	*Protection against tunnel attacks*	*Attacking the Application Layer*
S-6	SLO-1	*Hash functions*	*WiMAX Security*	*Discovery mechanisms and Authenticity of the mobile location*	*Key Management in Ad Hoc Networks*	*Dynamically Generating Rogue APs and Evil Servers with Karmetasploit*
	SLO-2	*Electronic signatures and MAC*	*Security evolution in WiMAX standards*	*Data protection (IP tunnels)*	*The threshold cryptography technique and Self-managed PKI*	*Direct Client Injection Techniques*
S-7	SLO-1	*Public Key Infrastructure (PKI) and electronic certificates*	*WiMAX low layers*	*IPv6 mobility mechanisms*	*Key agreement technique within MANETs and Cryptographic identifiers*	*Overview of Bluetooth Scanning and Reconnaissance*

	SLO-2	*Management of cryptographic keys*	*Security according to the IEEE-802.16e standard*	*Mobile IPv6 bootstrapping*	*The Resurrecting Duckling technique*	*Bluetooth Eavesdropping*
S-8	SLO-1	*Cryptographic protocols*	*Authentication with PKMv2-RSA, PKMv2-EAP*	*Mobility with Mobile IPv4*	*Group key management within ad hoc networks*	*Commercial Bluetooth Sniffing*
	SLO-2	*IPsec protocol suite*	*SA-TEK 3-way handshake*	*Protocol and security*	*Security services and challenges for group Communications within MANETs*	*Open-Source Bluetooth Sniffing*
S-9	SLO-1	*Authentication mechanisms*	*GTEK updating algorithm*	*Mobility with MOBIKE*	*Comparison metrics*	*ZigBee Security*
	SLO-2	*Access control-Firewalls*	*Algorithms associated with the TEKs*	*IP mobility with HIP*	*Approaches for Group key management*	*ZigBee Attacks*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Analyze the expanding role of IT governance and its effect on organizations*																		
CLR-2 :	*Be aware of management issues in IT governance*																		
CLR-3 :	*Analyze the role of risk to an organization and ways to identify key risk factors*																		
CLR-4 :	*Evaluate various risks and appropriate actions*																		
CLR-5 :	*Develop naming conventions for the resources in a system*																		
CLR-6 :	*Create and justify several appropriate policies and procedures to manage resources in a system.*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Having an overview of IT governance*	*3*	*80*	*70*	*M*	*H*	*H*	*H*	*H*	*M*	*M*	*M*	*H*	*M*	*H*	*H*	*H*	*H*	*H*
CLO-2 :	*Undergo an risk assessment*	*3*	*85*	*75*	*M*	*H*	*H*	*H*	*H*	*M*	*M*	*M*	*H*	*M*	*H*	*H*	*H*	*H*	*H*
CLO-3 :	*Describe legal and ethical considerations related to the handling and management of enterprise information assets.*	*3*	*75*	*70*	*M*	*H*	*H*	*H*	*H*	*M*	*M*	*M*	*H*	*M*	*H*	*H*	*H*	*H*	*H*
CLO-4 :	*Specify what constitutes admissible evidence in a legal proceeding and how to acquire and maintain this information.*	*3*	*85*	*80*	*M*	*H*	*H*	*H*	*H*	*M*	*M*	*M*	*H*	*M*	*H*	*H*	*H*	*H*	*H*
CLO-5 :	*Create a set of policies that implement a specified organizational objective.*	*3*	*85*	*75*	*M*	*H*	*H*	*H*	*H*	*M*	*M*	*M*	*H*	*M*	*H*	*H*	*H*	*H*	*H*
CLO-6 :	*Justify several appropriate policies and procedures to manage resources in a system.*	*3*	*80*	*70*	*M*	*H*	*H*	*H*	*H*	*M*	*M*	*M*	*H*	*M*	*H*	*H*	*H*	*H*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to IT Governance*	*overview of Industry Best Practice Standards*	*Security mindset*	*Trends*	*Creation of policies*
	SLO-2					
S-2	SLO-1	*IT Risk Management Life Cycle*	*Model and Guidelines covering some aspect of IT governance*	*Design principles*	*Auditing*	*Maintenance of policies*
	SLO-2					
S-3	SLO-1	*IT Risk framework*	*principles of Business/IT Alignment Excellence,*	*System/security life-cycle*	*Cost / benefit analysis*	*Prevention*
	SLO-2					
S-4	SLO-1	*IT Risk identification*	*principles of Program/Project Management Excellence*	*Security implementation mechanisms*	*Asset management*	*Avoidance*

Course Code	18CSE361T	Course Name	WEB PROGRAMMING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Web has become ubiquitous in nature*
CLR-2 :	*Organizations have integrated the Internet "seamlessly" into their information systems and the Web offers endless opportunity to do so.*
CLR-3 :	*This course provides the basic concepts and techniques used to design, develop, and deploy web applications satisfying the requirements in terms of flexibility, availability and scalability.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understand different internet Technologies, web 2.0 and create a basic website using HTML and Cascading Style Sheets*	*1*	*80*	*70*	*H*	*H*	*H*	*H*	*H*	*M*	*L*	*M*	*H*	*M*	*M*	*H*	*H*	*H*	*M*
CLO-2 :	*Design a dynamic web page with validation using JavaScript objects and by applying different event handling mechanisms*	*1*	*85*	*75*	*H*	*H*	*H*	*H*	*H*	*M*	*L*	*M*	*H*	*M*	*M*	*H*	*H*	*H*	*M*
CLO-3 :	*Design a server side program using Servlets and JSP*	*1*	*75*	*70*	*H*	*H*	*H*	*H*	*H*	*M*	*L*	*M*	*H*	*M*	*M*	*H*	*H*	*H*	*M*
CLO-4 :	*Design a simple web page in PHP, and to present data in XML format.*	*2*	*85*	*80*	*H*	*H*	*H*	*H*	*H*	*M*	*L*	*M*	*H*	*M*	*M*	*H*	*H*	*H*	*M*
CLO-5 :	*Get overviews of java specific web services architecture and to enable rich client presentation using AJAX.*	*2*	*85*	*75*	*H*	*H*	*H*	*H*	*H*	*M*	*L*	*M*	*H*	*M*	*M*	*H*	*H*	*H*	*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Understanding Internet , Difference between websites and web server*	*An introduction to JavaScript*	*Java Servlet Architecture*	*An introduction to PHP*	*Introduction to Ajax*
	SLO-2	*Internet technologies Overview*	*Java Script Terminologies*	*Servlet Life Cycle*	*Using PHP, Variables, Program control*	*Ajax Client Server Architecture*
S-2	SLO-1	*Understanding websites and web servers:*	*Introduction to DOM Model*	*Form GET and POST actions*	*Built-in functions*	*Introduction to XMLhttpRequest Object*
	SLO-2	*Understanding the difference between internet and*	*DOM Model*	*Session Handling ,*	*Connecting to Database*	*XMLhttpRequest Object*
S-3	SLO-1	*Web 2.0: Basics, RIA Rich Internet Applications*	*Introduction to Objects*	*Understanding Cookies,*	*Using Cookies*	*Introduction to Call Back Methods*
	SLO-2	*collaborations tools*	*Built-in objects: Math Object*	*Installing and Configuring Apache Tomcat Web Server*	*Regular Expressions*	*Call Back Methods*
S-4	SLO-1	*HTML5.0 Introduction*	*Built-in objects: String Object*	*Introduction to JSP*	*Introduction to XML*	*Introduction to Web Services*
	SLO-2	*HTML5.0 Elements Headers ,Linking,Images,List*	*Date Object*	*Understanding Java Server Pages*	*Basic XML Concepts*	*Java web services Basics*
S-5	SLO-1	*HTML5.0 Elements Tables, Formatting,Frames*	*Boolean Object*	*Applications on JSP*	*Introduction to DTD*	*Introduction to SOAP*
	SLO-2	*CSS Introduction*	*Object Collections*	*Introduction to JSTL*	*Document Type Definition*	*Elements of SOAP*
S-6	SLO-1	*CSS Types*	*Regular Expressions*	*Understanding of JSTL*	*Introduction to XML*	*Introduction to WSDL*
	SLO-2	*CSS : Positioning,Text Flow and Box Model*	*Examples of Regular Expressions*	*JSP Standard Tag Library(JSTL)*	*XML Schema*	*Creating, Publishing a WSDL*
S-7	SLO-1	*XHTML Introduction*	*Exception Handling*	*Creating HTML forms by embedding JSP code*	*DOM and Presenting XML*	*Testing and Describing a Web services(WSDL)*
	SLO-2	*XHTML Elements:Headers ,Linking,Images,List*	*Validation*	*Creating HTML forms by embedding JSP code*	*XML Parsers*	*Consuming a web service*
S-8	SLO-1	*XHTML Elements:Tables, Formatting,Frames*	*Event Handling Concept*	*Creating HTML forms by embedding JSP code*	*XML Validation*	*Introduction to Database Driven web*

						service from an application
	SLO-2	*CSS 3 Introduction*	*Introduction to DHTML*	*Creating HTML forms by embedding JSP code*	*XSLTransformation*	*Database Driven web service from an application*
S-9	SLO-1	*CSS 3 Types*	*DHTML with JavaScript*	*Lab 6:Creating HTML forms by embedding JSP code*	*XSLT Transformation*	*Applications on Database Driven web service*
	SLO-2	*CSS 3: Positioning,Text Flow and Box Model*		*Creating HTML forms by embedding JSP code*	*News Feed (RSS and ATOM)*	*Applications on Database Driven web service*

		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Understand the concepts and features of Integrative programming*																		
CLR-2 :	*Gain knowledge on Java network programming and JDBC for integrating applications*																		
CLR-3 :	*Gain knowledge on Java component based technology for integrating reusable components across applications*																		
CLR-4 :	*Acquire knowledge on XML and JSON technology for data representation and exchange in integrating applications*																		
CLR-5 :	*Acquire knowledge in Java Messaging Service*																		
CLR-6 :	*Understand interoperability between programming languages*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Understand the basic ideas in Integrative coding*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Acquire the ability to code java socket programming and java application to integrate databases*	*2*	*75*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Acquire the ability to develop Enterprise Java bean components and Java based Web services*	*2*	*85*	*80*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Appreciate the concepts of ML and JSON techniques in data representation and exchange for integrating applications*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Acquire the knowledge for developing JMS based enterprise application integration*	*2*	*75*	*85*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Programming paradigms an overview*	*Java network programming and RMI overview*	*Component Based technology overview*	*Data representation and exchange techniques in integrating applications overview*	*Interoperability between programming languages an overview*
	SLO-2	*Integrative programming an overview,*	*Java networking basics*	*Java beans concept and feature for reusability*	*Understanding XML and JSON for data representation and exchange*	*Understanding Java platform runtime environment and JVM*
S-2	SLO-1	*Integrative coding and its supporting Object Oriented concepts like inheritance, interface polymorphism .*	*Socket programming for TCP*	*Visual Java Beans components features and steps for creation*	*Understanding XML validation, Schema,*	*Understanding Java Native Interface(JNI) concepts in integrating native application code in java applications*
	SLO-2	*Object oriented design pattern for integrative coding overview..*	*Options and features for socket programming*	*Integrating visual beans to different applications*	*Understanding XML parsers DOM and SAX variant parsers.*	*Java tools for JNI programming*
S-3	SLO-1	*Creational design pattern, structural design pattern, Behavioral design pattern*	*UDP programming using Datagram*	*Enterprise Java platform overview*	*Understanding Integration of Enterprise applications with XML*	*Java libraries for JNI support*
	SLO-2	*Concept of Inversion of Control*	*options and features for UDP programming*	*Enterprise java bean components features and types*	*JSON encoding and decoding implementation*	*Understanding Usage of IDE for JNI programming*
S-4	SLO-1	*Application Architecture overview*	*Secure socket Communication*	*Session bean concepts and its types*	*Concept of Messaging Queue in integrating software systems to exchange information Asynchronously*	*Understanding concepts in JNI programming .Name mangling and function signatures DLL ,The JNIEnv argument*
	SLO-2	*Multi-tier architecture for integrating application packages like client side, middleware and databases*	*IP multicast and Multicast socket programming*	*Entity bean concepts and types*	*JMS and its role in integrating application in java enterprise platform*	*Understanding Accessing of Java Strings, Passing and using Java objects in native code*
S-5	SLO-1	*Enterprise application architecture, overview*	*RMI and distributed applications*	*Implementing Enterprise application through integrating session and Entity beans*	*JMS features and benefits*	*Exception handling in JNI*
	SLO-2	*JEE platform and its features*	*Understanding stub and skeleton concept in RMI*	*Java web services an overview*	*JMS service providers*	*Threading concept in JNI*

S-6	SLO-1	*Understanding Design principles in Enterprise applications*	*RMI programming application steps*	*SOAP based web services .WSDL,SOAP message*	*Concept of Message queues*	*Python integration in java platform overview*
	SLO-2	*Enterprise application integration overview*	*RMI programming implementation*	*JAX-WS implementation for SOAP based webservices*	*Point to point messaging domain features*	*Jython programming concepts and features*
S-7	SLO-1	*Role of Design Patterns in Enterprise application integration,*	*Concepts in Java Database connectivity in integrating java applications with various databases*	*RESTful web services features*	*Application scenario for integrating applications through p2p messaging*	*Installation of Jython for developing applications to run in java platform.*
	SLO-2	*Designing distributed object interfaces*	*Understanding Types of data base connectivity Different drivers*	*JAX-RS implementation for Restful web services*	*Concept of publish/subscribe method of messaging*	*Jython programming basics*
S-8	SLO-1	*Front controller patterns*	*JDBC application program concepts and implementation*	*Integrating web services component to client application*	*Application scenario for integrating applications through publish/subscribe method based messaging*	*Accessing Java features and libraries of java in Jython code*
	SLO-2	*Facade patterns,*	*Java persistence API overview*	*Service discovery, UDDI*	*Message driven beans in Enterprise JavaBeans*	*Java swing based GUI development in Jython*
S-9	SLO-1	*Adapter patterns*	*Java Data Objects(JDO) concepts*	*Policy and security for web services*	*Features and environmental setup for implementing Message driven beans*	*Understanding Jython JDBC connectivity*
	SLO-2	*Concepts of DAO*	*Java persistence API frameworks overview*	*Comparison between SOAP and RESTful web services*	*Understanding and using JMS in Message driven beans*	*Integrating Jython code in Java application*

Course Code	18CSE364T	Course Name	SYSTEM ADMINISTRATION AND MAINTENANCE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the factors that make Authentication/Authorization and stores of system Administration*
CLR-2 :	*Acquire a knowledge and understanding of the specific problems in the Enterprise Security, and be able to apply some of the techniques*
CLR-3 :	*Identify the specific challenges that inherent in the Budget and Desktop Deployment of system Administration that are able to apply some of the techniques that can be of use in comprehending and changing them*
CLR-4 :	*Evaluate and understand the specific problems inherent in the system maintenance and evolution of package- based operating system, and be able to apply techniques for designing change-resistant systems from pre- packaged code.*
CLR-5 :	*Analyze and apply system maintenance technical concepts that relate to UPS software administration*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Explain terms used in make Authentication/Authorization and stores of system Administration*	3	80	70	H	H	H	H	H	-	-	-	H	H	-	H	-	-	-
CLO-2 :	*Incorporate a knowledge and understanding of the specific problems Enterprise Security, and be able to apply some of the*	3	85	75	M	H	H	M	H	-	-	-	M	H	-	H	-	-	-
CLO-3 :	*Identify challenges that inherent in maintenance and evolution of package-based operating system, and be able to apply techniques*	3	75	70	M	H	M	H	H	-	-	-	M	H	-	H	-	-	-
CLO-4 :	*Apply techniques for designing change-resistant systems from pre-packaged code.*	3	85	80	M	H	M	H	H	-	-	-	M	H	-	H	-	-	-
CLO-5 :	*Apply system maintenance technical concepts that relate to UPS software administration*	3	85	75	H	H	M	H	H	-	-	-	M	H	-	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1 SLO-2	*Authentication/Authorization*	*Thin client support:*	*Issues relating to proposal construction and endorsement: New project development issues,*	*Customization of Operating System and maintenance of system:3 types of media to use when backing up your data and when each method is appropriate,*	*UPS: Identify the specifications of UPS,*
S-2	SLO-1 SLO-2	*Storage: Storage Area Networks*	*LTSP, Citrix*	*RFC construction, RFP Process,*	*How to create automated backups to ensure you always have a recent backup,*	*Switch-on and Switch-off procedure of UPS,*
S-3	SLO-1 SLO-2	*Network Attached Storage*	*Windows Terminal services,*	*Budgeting,*	*Learn how to manually backup data, How to make an exact copy of a hard drive*	*Measurement of Input/output voltage/current levels, battery charge level,*
S-4	SLO-1 SLO-2	*Storage Virtualization, Enterprise Backup and Restoration Issues*	*Sun Ray Services*	*Budgeting for new projects*	*Hardware Troubleshooting: The danger in not diagnosing problems first,*	*Identifying status of UPS from front panelindicators,*
S-5	SLO-1 SLO-2	*Enterprise Service Deployment: Clustering and fault tolerance,*	*Enterprise Security:*	*Desktop Deployment and Management, Alternative Desktops: SUS*	*Learn how to test your RAM ,*	*carryout routine maintenance of battery, battery terminals, loose contacts etc.,*
S-6	SLO-1 SLO-2	*Virtualization of services, Grids/On Demand/N1*	*Disaster Recovery*	*RIS,*	*check your hard drive for errors*	*Test UPS as per specification. Verification of back-up time.*
S-7	SLO-1 SLO-2	*Enterprise Applications: Enterprise Resource Planning,*	*Policies*	*Sun Java Desktop,*	*PC Cleaning: The best cleaning supplies to use,*	*Circuit tracing and fault finding practice*
S-8	SLO-1 SLO-2	*Customer Relationship Management,*	*Planning*	*Xandros*	*How to increase airflow and increase your computers lifespan*	*Servicing of UPS by simulating more likely faults and systematic approach to identify and rectify them*
S-9	SLO-1 SLO-2	*Office Automation*	*Procedures*	*Lindows*	*How to clean your computer*	*backup times its dependence on battery's load and its calculations*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview Of Virtualization -Basics of Virtualization -*	*Creating a Virtual machine- Performing P2V Conversions*	*Managing Storage for a virtual machine-Understanding storage virtualization*	*Theory Network Device Virtualization - VLANs*	*Case study: Load balancing*
	SLO-2	*Virtualization Types – Desktop Virtualization*	*Loading your Environment*	*Configuring VM Storage options*	*VRF Instances- VFIs -Virtual Firewall Contexts Network Device Virtualization*	*Autonomic computing*
S-2	SLO-1	*Storage Virtualization – System-level Operating Virtualization – Application Virtualization-*	*Building a new Virtual machine*	*Tuning practices for VM storage*	*Fundamentals of Virtualization security-Virtualization architecture*	*Xen para virtualization*
S-3	SLO-1	*Virtualization Advantages*	*Managing CPUs for a virtual machine-Understanding CPU Virtualization*	*SCSI- Speaking SCSI- Using SCSI buses – Fiber Channel – Fiber Channel Cables – Fiber Channel Hardware Devices – iSCSI Architecture – Securing iSCSI*	*Threats to a virtualized environment*	*Any Simulation tool*
S-4	SLO-2		*Configuring VM CPU options*	*Server virtualization concepts*	*How security must adapt to virtualization*	*Webhosting*
S-5	SLO-1	*Understanding Hypervisors*	*Tuning practices for VM CPUs*	*Introduction to server virtualization, Types of server virtualization technologies*	*Securing hypervisors-Hypervisor configuration and security*	*KVM virtualization*
S-6	SLO-2			*Limitations of server virtualization*		
S-7	SLO-1	*Understanding Virtual Machines*	*Managing Memory for a virtual Machine-Understanding memory virtualization, Configuring VM memory options*	*Managing Networking for a virtual machine-understanding network virtualization*	*Designing virtual networks for security-comparing virtual and physical networks*	*Microsoft Virtual Server*
S-8	SLO-2	Assignment-Installing windows, Linux on a virtual machine	*Tuning practices for VM memory*	*Configuring VM network options*	*Virtual network security considerations*	*Live migration*
S-9				*Tuning practices for Virtual networks*	*Configuring virtual switches for security*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the underlying assumptions, verify them, and propose appropriate actions if some assumptions do not hold*
CLR-2 :	*Identify appropriate statistical learning methods for the given problem involving real data.*
CLR-3 :	*Evaluate performance of the chosen regression and classification techniques and compare them*
CLR-4 :	*Show, analytically or empirically, the optimal balance between precision within training data and prediction power.*
CLR-5 :	*Use training and testing data to evaluate performance of the chosen regression and classification techniques and compare them.*
CLR-6 :	*Illustrate results with appropriate plots and diagrams.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Acquire the knowledge on methods, theory, mathematics and algorithms in data analysis*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Acquire the ability to To formulate and model mathematical and computational tasks*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Understand the basic ideas about high-level data analysis, concepts and techniques*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Acquire the ability identify other possible problems with messy data, such as multi-collinearity, understand their consequences, and propose solutions.*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Apply the knowledge To build from scratch the basic components of a data analysis pipeline*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*To Show, analytically or empirically, the optimal balance between precision within training data and prediction power.*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*General Introduction*	*Generative Algorithms: Multivariate Normal*	*Unsupervised Learning:*	*Regularization and Model Selection:*	*Decision Tree and Random Forest:*
	SLO-2	*Supervised Learning*	*Linear Discriminant Analysis*	*PCA*	*Cross Validation,*	*Entropy*
S-2	SLO-1	*Least Squares and Nearest Neighbors*	*Naive Bayes*	*Mixture Models*	*Hill Climbing*	*Building Tree Bagging features*
	SLO-2	*Statistical Models*	*Laplacian Smoothing*	*Bayesian Graphical Models*	*Bayesian Optimization*	*Bagging Samples*
S-3	SLO-1	*Discriminative Algorithms*	*Multiclass Classification*	*Power Method*	*Bayesian Regression*	*Random Forest Adaboost*
	SLO-2	*Supervised Learning Concept*	*K-NN*	*Oja's algorithm*	*Bayesian Logistic*	*Gradient Tree Boosting*
S-4	SLO-1	*Linear Regression*	*Multi-class Fisher Discriminant Analysis*	*EM Algorithm*	*Regression Forward and*	*Boosting and Regularization Paths*
	SLO-2	*The Gauss–Markov Theorem*	*Multinomial Regression*	*Variational Inference*	*Backward Regression*	*Learning Ensembles*
S-5	SLO-1	*Multiple Regression*	*Support Vector Machines and Kernel Methods*	*Matrix Factorization/Completion*	*Lasso*	*Proximity Plots*
	SLO-2	*Maximum Likelihood*	*Intuition, Geometric Margins,*	*Independent Component Analysis*	*elastic-net*	*Random Forests and Overfitting*
S-6	SLO-1	*Normal Equation*	*Optimal Margin Classifier*	*The Google PageRank Algorithm*	*Proximal Gradient*	*Neural Network: Concept*
	SLO-2	*Gradient Descent*	*Lagrangian Duality, Soft-margin,*	*Principal Components, Curves and Surfaces*	*Prox-SVRG*	*Deep Neural Network*
S-7	SLO-1	*Stochastic Gradient*	*Loss function, Stochastic Subgradient Method*	*Cluster Analysis*	*Coordinate Proximal Gradient*	*Backpropagation*
	SLO-2	*SVRG*	*Kernel, SMO algorithm*	*Proximity Matrices*	*Pathwise Coordinate Descent*	*Convolutional Neural Network;*
S-8	SLO-1	*Linear Classification*	*Coordinate Gradient Descent*	*Dissimilarities Based on Attributes*	*Principal Components Regression*	*Bayesian Neural Nets*
	SLO-2	*Linear Discriminant Analysis*	*Kernel PCA, Kernel Logistic Regression*	*Object Dissimilarity*	*Incremental Forward Stage wise Regression*	*Bayes, Boosting and Bagging*
S-9	SLO-1	*Logistic Regression*	*Kernel Ridge Regression*	*Clustering Algorithms*	*The Dantzig Selector*	*Fitting Neural Networks*
	SLO-2	*Newton Method*	*Multiclass SVM*	*Combinatorial Algorithms*	*The Grouped Lasso*	*Issues in Training Neural Networks*

Course Code	18CSE461T	Course Name	INTERNET SECURITY AND CYBER FORENSICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18CSC302J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Study about various threats associated with security and information warfare*
CLR-2 :	*Study about email security and the Importance of Firewalls and their types*
CLR-3 :	*Impart an introduction to the need of computer forensics*
CLR-4 :	*Study the tools and tactics associated with cyber forensics*
CLR-5 :	*Analyze and validate computer forensics data*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Have thorough knowledge about various threats associated with security and information warfare*	2	85	80	L	H	-	L	L	-	-	-	L	L	-	H	-	-	-
CLO-2 :	*Have in-depth knowledge about email security and understand the Importance of Firewalls and their types*	2	85	75	M	H	-	M	L	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*Understand the need of computer forensics*	2	80	75	M	H	M	H	L	-	-	H	M	M	-	H	-	-	-
CLO-4 :	*Utilize the tools and tactics associated with cyber forensics*	3	75	70	M	H	M	H	H	-	-	H	M	M	-	H	-	-	-
CLO-5 :	*Analyze and validate computer forensics data and apply them for solving computer forensics issues*	3	75	70	H	H	M	H	M	-	-	H	M	M	-	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*IPSec Protocol – Basics*	*PGP – Confidentiality and Authentication*	*Computer Forensics Fundamentals: Introduction to Computer Forensics, Use of Computer Forensics in Law Enforcement, Computer Forensics Assistance to Human Resources/Employment Proceedings*	*Processing Crime and Incident Scenes: Identifying Digital Evidence*	*Computer Forensics Analysis and Validation, Determining what data to collect and analyze*
	SLO-2	*IPSec Protocol - Documents*	*PGP – Compression and E-mail compatibility via Radix-64 conversion*	*Computer Forensics Services, Benefits of Professional Forensics Methodology, Steps Taken by Computer Forensics Specialists, Who Can Use Computer Forensic Evidence?*	*Collecting Evidence in Private-Sector Incident Scenes, Processing Law Enforcement Crime Scenes*	*Validating Forensics Data, Validating with Hexadecimal Editors, Validating with Computer Forensics Programs*
S-2	SLO-1	*IPSec Protocol – Security Associations*	*MIME*	*Types of Computer Forensics Technology: Types of Military Computer Forensic Technology*	*Preparing for a Search*	*Data Hiding Techniques - Hiding Partitions, Marking Bad Clusters, Bit-Shifting*
	SLO-2	*Hashed Message Authentication Code (HMAC)*	*S/MIME*	*Types of Law Enforcement: Computer Forensic Technology*	*Securing a Computer Incident or Crime Scene , Seizing Digital Evidence at the Scene*	*Using Steganography to Hide Data,*
S-3	SLO-1	*IP Authentication Header*	*Internet Firewalls for Trusted System: Roles of Firewalls*	*Types of Business Computer Forensic Technology*	*Storing Digital Evidence, Obtaining a Digital Hash*	*Examining Encrypted Files, Recovering Passwords*
	SLO-2	*IP ESP*	*Firewall related terminology*	*Specialized Forensics Techniques*	*Reviewing a Case*	*Performing Remote Acquisition, Remote Acquisitions with Runtime Software*
S-4	SLO-1	*Key Management Protocol for IPSec – OAKELY Key Determination Protocol*	*Types of Firewalls*	*Types of Computer Forensics Systems: Internet Security Systems, Intrusion Detection Systems, Firewall Security Systems*	*Working with Windows and DOS Systems*	*Network Forensics*
	SLO-2	*Key Management Protocol for IPSec – ISAKMP*	*Packet filters*	*Storage Area Network Security Systems, Network Disaster Recovery Systems, Public Key Infrastructure Systems*	*Understanding File Systems, Exploring Microsoft File Structures*	*Securing a Network*
S-5	SLO-1	*Transport layer Security : SSL and TLS*	*Circuit level gateways*	*Wireless Network Security Systems, Satellite Encryption Security Systems, Instant Messaging (IM) Security Systems , Net Privacy Systems*	*Examining NTFS Disks*	*Email Investigations – Exploring the Role of E-mail in Investigations, Exploring the Roles of the Client and Server in E-mail*
	SLO-2	*SSL Protocol*	*Application level gateways*	*Identity Management Security Systems, Identity Theft,*	*Understanding Whole Disk Encryption*	*Investigating E-mail Crimes and Violations:*

				Biometric Security Systems, Homeland Security Systems		*Examining E-mail Messages, Viewing E-mail Headers, Examining E-mail Headers, Examining Additional E-mail Files*
S-6	SLO-1	*SSL Record Protocol*	*Firewall designs*	*Understanding Computer Investigation: Preparing a Computer Investigation, Taking a Systematic Approach*	*Understanding the Windows Registry*	*Tracing an E-mail Message,Using Network E-mail Logs*
	SLO-2	*SSL Change Cipher Spec Protocol*	*Screened Host Firewall (Single – Homed Bastion Host)*	*Procedures for Corporate High-Tech Investigations*	*Understanding Microsoft Startup Tasks, Understanding MS-DOS Startup Tasks, Understanding Virtual Machines*	*Understanding E-mail Servers - Examining UNIX E-mail Server Logs, Examining Microsoft E-mail Server Logs, Examining Novell GroupWise E-mail Logs, Using Specialized E-mail Forensics Tools*
S-7	SLO-1	*SSL Alert Protocol*	*Screened Host Firewall (Dual – Homed Bastion Host)*	*Understanding Data Recovery Workstations and Software*	*Current Computer Forensics Tools: Software/ Hardware Tool*	*Cell Phone and Mobile Devices Forensics*
	SLO-2	*SSL Handshake Protocol*	*Screened Subnet Firewall*	*Conducting an Investigation, Completing the Case*	*Evaluating Computer Forensics Tool Needs*	*Understanding Mobile Device Forensics*
S-8	SLO-1	*Cryptographic Computations – Computing the Master Secret*	*SET for E-Commerce Transactions: Business requirements for SET*	*Data Acquisition: Understanding Storage Formats for Digital Evidence, Determining the Best Acquisition Method, Contingency Planning for Image Acquisitions, Using Acquisition Tools*	*Types of Computer Forensics Tools, Tasks Performed by Computer Forensics Tools*	*Mobile Phone Basics, Inside Mobile Devices*
	SLO-2	*Cryptographic Computations – Converting the Master Secret into Cryptographic Parameters*	*SET System Participants*	*Validating Data Acquisitions, Performing RAID Data Acquisitions*	*Computer Forensics Software Tools, Command-Line Forensics Tools, UNIX/Linux Forensics Tools, Other GUI Forensics Tools*	*Inside PDAs*
S-9	SLO-1	*TLS Protocol*	*SET Cryptographic Operation Principles, Dual Signature, Authentication and Message Integrity*	*Using Remote Network Acquisition Tools*	*Computer Forensics Hardware Tools, Forensic Workstations, Using a Write-Blocker, Recommendations for a Forensic Workstation*	*Understanding Acquisition Procedures for Cell Phones and Mobile Devices*
	SLO-2	*Cryptographic Computations for TLS*	*SET Payment Processing*	*Using Other Forensics Acquisition Tools*	*Validating and Testing Forensics Software, Using National Institute of Standards and Technology (NIST) Tools, Using Validation Protocols*	*Mobile Forensics Equipment*

Learning Resources	*1. Man Young Rhee, "Internet Security: Cryptographic Principles, Algorithms and Protocols", Wiley Publications, 2003* *2. Christopher Steuart, Bill Nelson, Amelia Phillips, "Guide Computer Forensics and Investigations", Cengage Learning, India, Fourth Edition, 2013.*	*2. John R.Vacca, "Computer Forensics: Computer Crime Scene Investigation", Charles RiverMedia, 2002.* *3. Richard E.Smith, "Internet Cryptography", Pearson Education, 3rd Edition, 2008.* *4. Marjie T.Britz, "Computer Forensics and Cyber Crime: An Introduction", Pearson Education, 3rd Edition, 2013.*

Learning Assessment

	Bloom's Level of Thinking	Continuous Learning Assessment (50% weightage)								Final Examination (50% weightage)	
		CLA – 1 (10%)		CLA – 2 (15%)		CLA – 3 (15%)		CLA – 4 (10%)#			
		Theory	Practice	Theory	Practice	Theory	Practice	Theory	Practice	Theory	Practice
Level 1	Remember Understand	40 %	-	30 %	-	30 %	-	30 %	-	30%	-
Level 2	Apply Analyze	40 %	-	40 %	-	40 %	-	40 %	-	40%	-
Level 3	Evaluate Create	20 %	-	30 %	-	30 %	-	30 %	-	30%	-
	Total	100 %		100 %		100 %		100 %		100 %	

CLA – 4 can be from any combination of these: Assignments, Seminars, Tech Talks, Mini-Projects, Case-Studies, Self-Study, MOOCs, Certifications, Conf. Paper etc.,

Course Designers		
Experts from Industry	Experts from Higher Technical Institutions	Internal Experts
	1. Dr.L.Kavisankar, Associate Professor, Department of Computer Science and Engineering, Hindustan Institute of Technology and Science, Chennai, India	*1. Mr. S.Saminathan, SRMIST*
		2. Dr.M.B.Mukesh Krishnan, SRMIST

Course Code	18CSE462T	Course Name	DATA CENTRE ADMINISTRATION AND MANAGEMENT	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Critically discuss data center networking technologies*
CLR-2 :	*Evaluate key concepts in data center design*
CLR-3 :	*Concepts related to data center maintenance*
CLR-4 :	*Design, build and configure a data centers*
CLR-5 :	*Expose to implementing the various system management practices*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Manage Server Systems and Data Centres Infrastructure Management*	*1*	*90*	*85*	*L*	-	-	*M*	-	-	-	-	-	-	-	*H*	*L*	-	-
CLO-2 :	*Utilize the Storage, Bandwidth, Efficiency of systems and other resources for Data centre.*	*3*	*85*	*80*	*M*	*M*	*H*	*H*	*H*	-	-	-	-	-	-	*H*	*M*	*H*	-
CLO-3 :	*Monitoring the Networks and Resources. .*	*3*	*85*	*80*	*M*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	*H*	*M*	*H*	-

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To develop an awareness of the opportunities that information technology can have for enhancing service firms' competitiveness.*
CLR-2 :	*To appreciate the organizational significance of managing the IT service encounter to achieve internal and external customer satisfaction.*
CLR-3 :	*To understand new service development from both a product and process perspective.*
CLR-4 :	*To gain an appreciation of the complexities associated with implementing change during IT services.*
CLR-5 :	*to understand how an integrated ITSM framework*
CLR-6 :	*To Understand practical implementation of Information Technology Service Management*

		Learning			Program Learning Outcomes (PLO)

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction*	*IT Project/Service Management*	*Communication Management*	*Service management concepts and frameworks*	*Planning and delivery processes*
	SLO-2	*Overview of Service Science, Management, Engineering*				
S-2	SLO-1	*IT Infrastructure*	*Planning*	*Team Building in IT Services*	*Services and service management*	*Service reporting*
	SLO-2					
S-3	SLO-1	*RFID Applications*	*Estimating*	*IT service project in a start-up company*	*Customer-facing services*	*Service availability and continuity management*
	SLO-2					
S-4	SLO-1	*Data Storage Management*	*Resourcing*	*Smaller IT service organization*	*Resource-facing services*	*Capacity management*
	SLO-2					
S-5	SLO-1	*IT Service Strategy*	*IT Project/Service Change*	*Soft Skills in IT Service Management*	*The service lifecycle. Processes. Functions. Roles*	*Information security management*
	SLO-2					
S-6	SLO-1	*Approach, and Practice*	*Quality*	*Presentation skills*	*Service strategy*	*Customer relationship management*
	SLO-2					
S-7	SLO-1	*IT Infrastructure Library*	*Issue*	*Negotiation skills*	*Service portfolio*	*Supplier relationship management.*
	SLO-2					
S-8	SLO-1	*e-Business Case Study*	*Risk Management*	*Job interview skills*	*Service catalog management*	*Service management tools*
	SLO-2					

S-9	SLO-1	*IT service report of IBM e-business at Ford Motor*	*Evaluate issue, and mitigate risk in IT service management*	*IBM perspectives of IT Service Management*	*Service level agreements.*	*Tool assessment framework*
	SLO-2				*Operational level agreements*	*Analysis of specific ITSM tools*

Learning Resources	1. Service Management, Fourth Edition, J.A. Fitzsimmons and M.J. Fitzsimmons, McGraw Hill. 2. Services Marketing, Valerie Zeithaml, Mary Jo Bitner, and Dwayne Gremler, McGraw-Hill. 3. Introduction to Operations Research, Hillier and Lieberman	4. Service modeling, Principles and Applications. Vilho Råisånen, Wiley 5. Understanding Service Business, S.E. Sampson, Wiley.

Course Code	18CSE464T	Course Name	COMPUTER GRAPHICS AND GAME PROGRAMMING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamental concepts of generating basic output primitives*
CLR-2 :	*Know the basics of transformations and curves and surface representations*
CLR-3 :	*Know the various visible surface detection methods and various color models*
CLR-4 :	*Learn the interfaces of Unity and its installation procedure*
CLR-5 :	*Know the various objects in Unity to develop games*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Have a very good understanding of generating various output primitives*	2	80	85	-	-	H	-	-	-	-	-	-	-	-	-	-	M	-
CLO-2 :	*Posses the ability to represent various curves and surfaces*	2	75	80	-	-	-	-	-	-	-	-	-	-	-	-	-	M	-
CLO-3 :	*Have a clear understanding of various visible surface detection algorithms and color models*	2	85	80	-	-	-	-	-	-	-	-	-	-	-	-	-	M	-
CLO-4 :	*Apply the knowledge to install and explore the interfaces of Unity*	2	80	75	-	-	H	-	H	-	-	-	H	-	-	-	-	-	-
CLO-5 :	*Possess the ability to design and implement games using Unity*	2	75	85	-	-	H	-	H	-	-	-	H	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Graphics systems Overview and IO devices*	*Basic Three-Dimensional Concepts*	*Classification of visible surface detection Algorithms*	*Introduction to Unity Installation and its interface*	*Concept of collisions*
	SLO-2					
S-2	SLO-1	*Applications of Computer Graphics*	*Clipping operations-Point, Line and Polygon*	*Back-face detection, Depth buffer method and A-buffer method*	*Game objects, 2D&3D and its transformation*	*Introduction to Prefabs*
	SLO-2					
S-3	SLO-1	*Line drawing algorithms*	*Curve, Text and Exterior Clipping*	*Scan line method, Depth sorting method, BSP and Area sub division method*	*Fundamentals of models, materials and shaders*	*Handling sprites and adding UI to the game*
	SLO-2					
S-4	SLO-1	*Circle drawing algorithms*	*Polygon Clipping algorithms*	*Octree, Ray casting method and curved surfaces*	*How to sculpt terrain*	*Basics of particle systems*
	SLO-2					
S-5	SLO-1	*Ellipse drawing algorithms*	*Plane equations and meshes*	*Basic models of illumination*	*Adding environments*	*Basics of animation*
	SLO-2					
S-6	SLO-1	*Filled area primitives*	*Curved line& surfaces*	*Halftone and ditheringtechniques*	*Using lights*	*Designing a complex game*
	SLO-2					
S-7	SLO-1	*Basics of Geometric transformations*	*Quadratic surfaces and Blobby objects*	*Properties of Light, RGB Color Model*	*Using cameras*	*Basics of audio in Unity*
	SLO-2					
S-8	SLO-1	*Reflection and shearing -2D*	*Fractals*	*YIQ, and CMY color model*	*Designing a basic game*	*Basics of audio in Unity*
	SLO-2					
S-9	SLO-1	*2D viewing and window to viewport*	*Bezier and B-Spline curves and surfaces*	*HSV and HLScolor model, Color selection*	*Introduction to scripting*	*Requirements for mobile game development*
	SLO-2

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamental concepts of analog and digital data*
CLR-2 :	*Know the basics of bitmap, DCT and color models*
CLR-3 :	*Learn the various tools for digital image processing*
CLR-4 :	*Know the basics of digital audio representation*
CLR-5 :	*Understand the concepts of video and its compression methods*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Have a very good understanding of analog and digital data*	*2*	*80*	*85*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Have a clear understanding of bitmap, DCT and color models*	*2*	*75*	*80*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	*M*	-
CLO-3 :	*Possess the ability to handle various tools for digital image processing*	*2*	*85*	*80*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	*M*	-
CLO-4 :	*Apply the knowledge to represent digital audio*	*2*	*80*	*75*	-	-	*H*	-	*H*	-	-	-	*H*	-	-	-	-	*M*	-
CLO-5 :	*Possess the ability to compress the video*	*2*	*75*	*85*	-	-	*H*	-	*H*	-	-	-	*H*	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction*	*Bitmaps- Frequency in digital images*	*Tools for digital image processing*	*Introduction of digital audio representation*	*Tools for digital audio processing*
	SLO-2					
S-2	SLO-1	*Analog to digital conversion*	*Discrete Cosine Transform*	*Digital image file types*	*Audio waveforms*	*Dynamics processing- Audio restoration*
	SLO-2					
S-3	SLO-1	*Data storage*	*Aliasing*	*Indexed colors - Dithering*	*Pulse code modulation & audio digitization*	*Digital audio filters and related processing*
	SLO-2					
S-4	SLO-1	*Data Communication*	*Color models*	*Channels, layers and masks*	*Sampling rate and aliasing*	*Pulse code modulation & audio digitization*
	SLO-2					
S-5	SLO-1	*Data Communication*	*Color models*	*Blending modes*	*quantization and quantization error*	*Designing and implementing your own file*
	SLO-2					
S-6	SLO-1	*Compression methods*	*Color models*	*Pixel point processing*	*Frequency analysis*	*Digital audio compression*
	SLO-2					
S-7	SLO-1	*Compression methods*	*Vector graphics*	*Spatial filtering*	*Frequency analysis*	*Fundamental concepts in video*
	SLO-2					
S-8	SLO-1	*Standards and standardization organizations*	*Vector graphics*	*Resampling and interpolation*	*Statistical analysis of an audio file*	*Basic video compression*
	SLO-2					
S-9	SLO-1	*Mathematical modeling tools for the study of digital media*	*Algorithmic art and procedural modeling*	*Digital image compression*	*MIDI*	*MPEG 1 and 2*
	SLO-2

Course Code	18CSE345T	Course Name	IOT ARCHITECTURE AND PROTOCOLS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	CSE	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand Data and Knowledge Management and use of Devices in IoT Technology.*
CLR-2 :	*Understand State of the Art – IoT Architecture.*
CLR-3 :	*To Understand the Architectural Overview of IoT*
CLR-4 :	*Understand the IoT Reference Architecture and RealWorld Design Constraints*
CLR-5 :	*To Understand the various IoT Protocols (Datalink, Network, Transport, Session, Service)*
CLR-6 :	*Understand and apply IoT protocols appropriately*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Interpret the vision of IoT architecture from a global context.*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Implement state of the art architecture in IoT.*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Compare and Contrast the use of Devices, Gateways and Data Management in IoT.*	2	85	80	H	M	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Implement using the available resources and demonstrate quick to deployment protocols wherever applicable*	2	80	75	H	H	H	M	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Apply the protocols and Techniques towards integration in relevant areas of IoT Product development*	2	75	85	H	M	H	M	H	-	-	-	M	-	-	H	-	-	-
CLO-6 :	*Choose appropriate protocols for various layers (Datalink, Network, Transport, Session, Service)*	2	80	85	H	M	H	H	H	-	-	-	H	-	-	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*M2M and IoT- Relevance and Transition*	*Data Management- Introduction*	*Introduction to RFID*	*Transport Layer Protocols -Introduction*	*Service Layer Protocols- Introduction*
	SLO-2	*Building an architecture*	*Managing M2M data: Data generation,*	*Introduction to NFC*	*TCP*	*oneM2M*
S-2	SLO-1	*Main design principles and needed capabilities*	*Data acquisition, Data validation*	*WSN(Large topic),*	*MPTCP*	*ETSI M2M*
	SLO-2	*IoT architecture outline*	*Data storage, Data processing*	*Narrow band IoT (NbIOT)*	*UDP*	*OMA*
S-3	SLO-1	*M2M and IoT Technology Fundamentals*	*Data remanence, Data analysis*	*WiFi*	*DCCP*	*BBF*
	SLO-2	*Devi ces and Gateways-Introduction*	*Data management,*	*PLC Communication Protocols: A comparison*	*SCT*	*Understanding Security and Interoperability*
S-4	SLO-1	*Basic Devices*	*Business processes in IoT*	*Popular radio protocols and its security drawbacks*	*TLS*	*Modes of attack: DoS, Getting Access, Guess, Man in Middle, Sniff, Post Scan*
	SLO-2	*Gateways*	*Everything as a Service (XaaS)*	*802.15.4 in depth*	*DTLS*	*Modes of attack: Web Crawl, Search Features and Wild Cards, Breaking Cipher*
S-5	SLO-1	*Advanced devices*	*M2M and IoT Analytics*	*Network Layer Protocols- Introduction*	*Session Layer-HTTP*	*Tools for achieving Security: VPN, X.509, Authentication,*
	SLO-2	*Need for networking*	*Knowledge Management*	*IPv4*	*CoAP*	*Tools for achieving Security: User names and Passwords, Message Brokers,*
S-6	SLO-1	*State of the art-ETSI M2M*	*Data Link Layer Protocols: PHY/MAC Layer:3GPP MTC*	*IPv6*	*Implementation demo of CoAP*	*Tools for achieving Security: Provisioning servers, Centralization versus decentralization,*
	SLO-2	*IoT Reference model-IoT Domain model*	*IEEE 802.11*	*6LoWPAN in depth*	*MQTT*	*The need for interoperability:*
S-7	SLO-1	*Information model*	*IEEE 802.15*	*6TiSCH*	*Implementation demo of MQTT*	*Combining Security and Interoperability*
	SLO-2	*Functional model*	*Wireless HART*	*ND*	*MQTT-SN*	*Need for Security in IoT Protocols – Introduction*

S-8	SLO-1	*Communication model*	*Z-Wave*	*DHCP*	*Implementation demo of MQTT-SN*	*Security in IoT Protocols :MAC 802.15.4*
	SLO-2	*Safety, privacy, trust, security model*	*Bluetooth, Bluetooth Low Energy*	*ICMP*	*XMPP*	*Security in IoT Protocols :6LoWPAN,*
S-9	SLO-1	*Introduction to Protocols- Physical, Data Link*	*Zigbee, Zigbee Smart Energy*	*RPL*	*AMQP*	*Security in IoT Protocols :RPL*
	SLO-2	*Introduction to Protocols- Network, Transport, Application*	*DASH7*	*CORPL, CARP*	*Introduction to Contiki- Practical demo*	*Security in IoT Protocols: Application Layer*

Course Code	18CSE346T	Course Name	NETWORK PROGRAMMING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18CSC302J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*To learn different socket function and implement client server applications using sockets*
CLR-2 :	*To conduct experiments to know how different internet protocols like TCPIP works*
CLR-3 :	*To analyze various application program like TELNET, DNS, DHCP*
CLR-4 :	*Build different application like Routing, Load balancing & Security*
CLR-5 :	*To apply protocols get adapted to emerging technologies*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Become familiar with elementary socket functions*	3	80	70	L	H	-	H	L	-	-	-	L	L	-	H	-	-	-
CLO-2 :	*Design and implement client –server applications using Sockets*	3	85	75	M	H	L	M	L	-	-	-	M	L	-	H	-	-	-
CLO-3 :	*Learn about functions that convert between names and numeric values and protocols*	3	75	70	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-4 :	*Analyze network programs*	3	85	80	M	H	M	H	L	-	-	-	M	L	-	H	-	-	-
CLO-5 :	*Build network applications*	3	85	75	H	H	M	H	L	-	-	-	M	L	-	H	-	-	-

Program Learning Outcomes (PLO)

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction*	*Socket function*	*Get sock opt function*	*DNS*	*Internet Protocol*
	SLO-2	*simple daytime client*	*connect function*	*set sock opt function*	*resolvers and name servers*	
S-2	SLO-1	*protocol independence*	*bind function*	*IPV4*	*gethostbyname function*	*IPV4*
	SLO-2	*Error handling*	*listen function*	*ICMP*	*gethostbyaddr function*	
S-3	SLO-1	*simple daytime server*	*accept function*	*TCP socket options*	*getservbyname*	*IPV6 interoperability*
	SLO-2	*Roadmap to client/server.*	*Fork function*		*getservbyport function*	
S 4-5	SLO-1	*Overview of TCP/IP protocol- TCP connection establishment and termination*	*exec function*	*UDP Echo server and client*	*tcp_connect function-*	*Daemon processes*
	SLO-2					
S-6	SLO-1	*TCP state transition diagram – Time-wait state*	*concurrent servers*	*recvfrom function*	*tcp_listen function*	*Daemon processes and the inetdsuperserver*
	SLO-2	*SCTP association establishment and termination*	*close function-getsockname and getpeername*	*send to function*	*udp_client*	
S-7	SLO-1	*TCP port numbers and concurrent servers*	*TCP Echo server, TCP Echo client*	*Connect function with UDP*	*udp_connect*	*Advanced I/O functions*
	SLO-2	*Buffer size and limitations*	*normal startup and termination*		*udp_server function*	

S 8-9	SLO-1	*standard internet services*	*POSIX signal handling, Wait and Waitpid functions*	*dg_cli function*	*BOOTP*	*Advanced I/O functions*
	SLO-2	*protocol usage by common, Internet applications*	*Termination of server process, Crashing and rebooting of server host*	*lack of flow control with UDP*	*DHCP*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Fundamentals of IoT and Security and its need*	*Prevent Unauthorized Access to Sensor Data*	*Block ciphers*	*Introduction to Blockchain*	*Introduction of IoT devices*
	SLO-2	*IoT Security Requirements*	*,M2M Security,*	*Message integrity*	*Modeling faults and adversaries*	*Difference among IoT devices, computers, and embedded devices.*
S-2	SLO-1	*IoT and cyber-physical systems*	*RFIDSecurity,*	*Authenticated encryption*	*Byzantine Generals problem*	*sensors and actuators in IoT*
	SLO-2	*IoT security (vulnerabilities, attacks, and countermeasures),*	*Cyber Physical Object Security, ,*	*Hash functions*	*Consensus algorithms and their scalability problems*	*Accelerometer, photoresistor, buttons*
S-3	SLO-1	*Security engineering for IoT development*	*Hardware Security,*	*Merkle trees and Elliptic curves*	*digital signatures, verifiable random functions, Zero-knowledge systems*	*motor, LED, vibrator,*
	SLO-2	*IoT security lifecycle*	*Front-end System Privacy Protection, Management,Secure IoT Databases*	*Public-key crypto (PKI),*	*blockchain, the challenges, and solutions,*	*analog signal vs. digital signal*
S-4	SLO-1	*Data Privacy*	*Networking Function Security*	*Trees signature algorithms*	*proof of work, Proof of stake,*	*Networking in IoT*
	SLO-2	*Device/User Authentication in IoT*	*IoT Networking Protocols,*	*Crypto-currencies,*	*alternatives to Bitcoin consensus, Bitcoin scripting language and their use*	*Real-time communication*
S-5	SLO-1	*Introduction to Authentication Techniques*	*SecureIoT Lower Layers,*	*Bitcoin P2P network,*	*Ethereum and Smart Contracts,*	*Bandwidth efficiency*
	SLO-2	*Data Trustworthiness in IoT*	*SecureIoT Higher Layers,*	*Distributed consensus, , ,*	*Smart Contract Languages and verification challenges*	*data analytics in IoT - simple data analyzing methods*
S-6	SLO-1	*Human IoT Trust Relationship*	*Secure Communication*	*Incentives and proof-of-work*	*comparing Bitcoin scripting vs. Ethereum Smart Contracts*	*IoT architecture, component and technology*
	SLO-2	*Trust and Reputation Systems*	*Links in IoTs,Back-end Security -Secure Resource*	*Mining, scripts and smart contracts*	*Hyperledger fabric*	*Case study: discussion on specific IoT applications and their design considerations*
S-7	SLO-1	*Trust Negotiation*	*Game Theory Foundation*	*Wallets: hot and cold storage ,anonymity, altcoins*	*Mechanisms in permissioned blockchain*	*cybersecurity overview in IoT*

	SLO-2	*IoT Privacy Preservation Issues*	*Mixed-strategy, ,*	*Credential management for connected devices: Security credential management system (SCMS),*	*Pseudo-anonymity vs. anonymity*	*General cybersecurity concepts in IoT*
S-8	SLO-1	*Attack Models - Attacks to Sensors in IoTs,*	*Nash equilibrium*	*VehicleBased Security System (VBSS),*	*Zcash and Zk-SNARKS for anonymity preservation*	*security threats in IoT*
	SLO-2	*Attacks to RFIDs in IoTs,*	*Repeated games*	*PKI design, Certification provisioning*	*Attacks on Blockchains*	*data privacy in IoT*
S-9	SLO-1	*Attacks to Network Functions in IoTs,*	*Bayesian games*	*Pseudonyms (privacy-by design),*	*Sybil attacks, selfish mining*	*device/User authentication in IoT*
	SLO-2	*Attacks to Back-end Systems and security in Front end Systems*	*Coalitional games.*	*Misbehavior detection and Revocation,*	*51% attacks*	*data trustworthiness problem in IoT*

Course Code	18CSE446T	Course Name	ADVANCED DATABASE SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Familiarize with the various query processing, join and optimization techniques*
CLR-2 :	*Improve their ability to choose the appropriate techniques for any parallel and distributed database systems*
CLR-3 :	*Familiarize with the various object based databases techniques*
CLR-4 :	*Familiarize with the various Motivation, Structure, Storage, Application and Evaluation of XML Queries*
CLR-5 :	*Expose to the concepts of Performance Tuning, Temporal, Spatial, Multimedia and Mobile data bases*
CLR-6 :	*Expose to the latest Spatial and Geographic data, R Trees and Multimedia databases*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO – 3
CLO-1 :	*Acquire the knowledge on query processing, join and optimization on a database*	2	80	85	H	H	L	M	L	-	-	-	M	M	M	-	-	-	-
CLO-2 :	*Acquire the ability to identify & design a parralel and distributed database*	2	75	80	H	H	L	M	L	-	-	-	M	M	M	-	-	-	-
CLO-3 :	*Understand the basic ideas about various object based databases*	2	85	80	H	M	L	M	L	-	-	-	M	M	M	-	-	-	-
CLO-4 :	*Apply the knowledge of XML on various applications*	2	80	75	H	H	L	M	L	-	-	-	M	M	M	-	-	-	-
CLO-5 :	*Appreciate the concepts of Performance Tuning, Temporal, Spatial, Multimedia and Mobile data bases*	2	75	85	H	M	L	M	L	-	-	-	M	M	M	-	-	-	-
CLO-6 :	*Appreciate the concepts of latest Spatial and Geographic data, R Trees and Multimedia databases*	2	80	85	H	M	-	M	L	-	-	-	M	M	M	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Overview of query processing*	*Introduction to Parallel Databases*	*Overview of object based databases*	*Introduction to XML*	*Performance Tuning*
	SLO-2	*Measures of query cost*	*I/O parallelism*	*Complex data types*		*Improving set orientation*
S-2	SLO-1	*Selection Operation*	*Interquery Parallelis*	*Structured types in SQL*	*Motivation*	*Tuning of bulk loads and updates*
	SLO-2	*Sorting*	*Intraquery Parallelism*	*Inheritance in SQL*		*Location of bottlenecks*
S-3	SLO-1	*Join Operation-Nested loop join*	*Intraoperation Parallelism*	*Table inheritance*	*Structure of XML data*	*Tunable parameters*
	SLO-2	*Merge join and Hash join*	*Interoperation Parallelism*			*Tuning of hardware*
S-4	SLO-1	*Projection, set operation, Outer join and Aggregation*	*Query Optimization*	*Array and multiset Types in SQL*	*XML document scheme*	*Tuning of the schema and Indices*
	SLO-2	*Evaluation of Expressions*	*Design of Parallel Systems*			*Tuning of Physical design*
S-5	SLO-1	*Overview of query optimization*	*Homogeneous and heterogeneous database*	*Object –identity and reference Types in SQL*	*Querying and transformation*	*Tuning of concurrent transactions*
	SLO-2	*Transformation of relational expressions -Equivalence Rules*	*Distributed data Storage*			*Introduction to Temporal, Spatial, Multimedia and Mobile data bases*
S-6	SLO-1	*Join Ordering*	*Distributed transactions*	*Implementing O-R features*	*Application program interface to XML*	*Performance benchmarks*
	SLO-2	*Enumeration of Equivalent Expression*	*Commit protocols*			*Time in databases*
S-7	SLO-1	*Estimating statistics of expression results Cataloq Information*	*Concurrency control in distributed databases*	*Persistent programming languages – Persistence of objects*	*Storage of XML data*	*Spatial and Geographic data*
	SLO-2	*Selection Size and Join size Estimation*	*Distributed query processing*	*Object identity and pointers*		*Representation of Geographic data*
S-8	SLO-1	*Size Estimation for other Operation,Estimation of Number of Distinct Values*	*Availability*	*Persistent C++ systems*	*XML applications.*	*Spatial Queries*

	SLO-2	*Choice of evaluation plans-Cost based join order Selection*		*Persistent Java systems*		*Indexing of Spatial Data*
S-9	SLO-1	*Cost based optimization with equivalence rules*	*Heterogeneous distributed databases.*	*Object-relational mapping*	*Evaluation of XML Queries*	*R Trees*
	SLO-2	*Heuristics in optimization, Optimizing Nested Sub queries*		*Object-oriented versus object-relational.*		*Multimedia databases*

Course Offering Department		Computer Science and Engineering	Data Book / Codes/Standards	Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the rudiments of energy conservation and IoT*
CLR-2 :	*Gain the knowledge on various energy conservation schemes in IoT*
CLR-3 :	*Utilize the conventional and optimization algorithms for conserving energy in IoT devices*
CLR-4 :	*Understand the various techniques of green IoT and impact of conventional techniques of IoT*
CLR-5 :	*Gain the knowledge on existing energy efficient architecture for energy conservation and harvesting*
CLR-6 :	*Gain the knowledge on low energy Bluetooth devices and its importance*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO – 3
CLO-1 :	*Acquire the knowledge on IoT and energy conservation approaches in IoT*	*2*	*80*	*85*	*H*	*M*	*M*	*M*	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Identify and choose appropriate energy conservation component for real world problems*	*2*	*75*	*80*	*H*	*M*	*M*	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Design and develop energy conservation algorithms for improving the lifetime of IoT devices*	*2*	*85*	*80*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Compare and contrast of various green IoT techniques and able to design green IoT for real world problems*	*2*	*80*	*75*	*H*	*M*	*H*	*H*	-	-	-	-	-	-	-	*M*	-	-	-
CLO-5 :	*Design and develop energy efficient architecture for real world problems*	*2*	*75*	*85*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	-	*M*	-	-	-
CLO-6 :	*Design and develop energy efficient architecture for real world problems using low energy Bluetooth devices*	*2*	*80*	*85*	*H*	*M*	*M*	*M*	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to IoT*	*Energy conservation schemes*	*Static energy efficient algorithms*	*Green IoT an Overview*	*Designing energy efficient IoT based Intelligent Transport System*
	SLO-2	*Architecture of IoT*	*Sleep/wakeup scheme*	*Exact allocation algorithm*	*Smart Homes, Smart Cities*	*Intelligent Transport System*
S-2	SLO-1	*Components of IoT*	*Data driven scheme*	*Best Fit Heuristic Algorithm*	*Energy Efficient smart health care*	*Motivations for IoT in Transportation*
	SLO-2	*Applications of IoT*	*Mobility based scheme*	*Dynamic energy efficient algorithms*	*Importance of Green IOT*	*Communication Technology and Related Power Issues*
S-3	SLO-1	*Challenges in IOT*	*Load balancing*	*Hardware Level Solution*	*Taxonomy of green IoT techniques*	*Information Extraction and Underlying Power Issues*
	SLO-2	*Energy Management in IoT*	*Working of load balancing*	*Dynamic Voltage Frequency Scaling (DVFS)*	*Various Approaches to Achieve Green IoT*	*Energy Efficiency Challenges and Corresponding Solutions, Further Challenges and Opportunities*
S-4	SLO-1	*Energy harvesting*	*Hardware based load balancing*	*Software Level Solution*	*software based green IoT techniques*	*Capacity Estimation of Electric Vehicle Aggregator for Ancillary Services*
	SLO-2	*Block diagram of energy harvesting*	*Software Based Load Balancing*	*First Fit Decreasing algorithm (FFD)*	*Hardware based green IoT techniques*	*Development of Electric Vehicles*
S-5	SLO-1	*Various ambient energies*	*Compare hardware and software based load balancing techniques*	*Modified Best Fit Decreasing algorithm (MBFD)*	*Policy based techniques*	*Motivation for Vehicle to Everything (V2X) and V2G Technology*
	SLO-2	*Energy harvesting schemes*	*Load balancing algorithms*	*Genetic Algorithm (GA)*	*Awareness based Approach - Toward Green IoT, Energy Awareness*	*Electric Vehicles and Solar Power Plants in Smart Grid Environment*
S-6	SLO-1	*Harvesting modules*		*Particle Swarm Optimization (PSO)*	*IoT Based Smart Metering*	*Potential of EV to Grid Connection, Capacity Estimation of Aggregator*
	SLO-2	*Rectenna Model*	*Static Algorithms, Dynamic Algorithms*	*Ant Colony Optimization (ACO)*	*Communication Technology Creating Awareness About Green Information, PromotingRecycling*	*Battery Management System, Grid Connection and Performance Testing of V2G*

S-7	SLO-1	*Sensing antenna*	*Issues of energy conservation in IoT*	*Simulated Annealing (SA)*	*Habitual Based Techniques*	*Weather monitoring using Bluetooth Low Energy (BLE) in warehouses*
	SLO-2	*DC-DC Converter*		*Cat Swarm Optimization(CSO)*	*Comparative analysis of different green IoT approaches*	*BLE Introduction*
S-8	SLO-1	*Wireless energy harvesting*	*Basic model of smart home system*	*Hybrid Genetic Algorithm and Cat Swarm Optimization (HGACSO)*	*Case study: impact of smart phones on the environment in present and future trends*	*BLE importance*
	SLO-2	*Near Field Communication, Inductive coupling*	*Energy Conservation in Smart Home and IoT*	*Hybrid Genetic Algorithm, Particle Swarm Optimization and Simulated annealing(HGAPSOSA)*	*Reduce the environmental impact life cycle assesment of smatphones, smart phone emission and selling rate*	
S-9	SLO-1	*Paradigmatic view of energy efficient IoT*	*Automation and Sensors in Smart Home*	*Comparison of dynamic energy efficient algorithms*	*Promoting the Usage of Sensor Cloud: a step toward green IoT.*	*Design weather monitoring using BLE*
	SLO-2	*Pragmatic energy efficient IoT system architecture*	*Case study: energy conservation component for smart home.*	*Compare and contrast static and dynamic energy efficient algorithms*	*Creating Awareness Through Prototyping: A Green IoT-Based Smart*

Course Code	18CSE367T	Course Name	REQUIREMENTS ENGINEERING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Identify the sources, collect, organize and classify the requirements*
CLR-2 :	*Improve their ability to choose the appropriate Elicitation Techniques for any systems*
CLR-3 :	*Familiarize with the various requirements documentation and validation techniques*
CLR-4 :	*Familiarize with the various requirements quality drivers, Traceability models and requirements change control techniques*
CLR-5 :	*Expose to the Conflits, Escalation model , Settlements and Analytics of Cost Benefit analysis*
CLR-6 :	*Expose to the latest requirements engineering tools*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Acquire the knowledge on identifying the Source, organising and classifying requirements*	2	80	85	H	H	L	M	-	L	L	M	H	H	M	L	-	-	-
CLO-2 :	*Acquire the ability to identify and Apply the appropriate Elicitation Techniques for any systems*	2	75	80	H	H	H	L	-	L	-	L	H	H	H	L	-	-	-
CLO-3 :	*Understand the basic ideas about various requirements documentation and validation techniques*	2	85	80	H	L	L	L	M	-	-	M	M	M	M	-	-	-	-
CLO-4 :	*Apply the knowledge on various requirements quality drivers, Traceability models and requirements change control techniques for any system*	2	80	75	H	H	L	M	H	M	-	M	M	L	L	M	-	-	-
CLO-5 :	*Appreciate the concepts of Conflict, Escalation model , Settlements and Analytics of Cost Benefit analysis*	2	75	85	H	H	-	H	H-	-	-	M	L	M	M	-	-	-	-
CLO-6 :	*Appreciate the concepts of latest requirements engineering tools*	2	70	70	H	L	L	M	H	-	L	L	L	L	M	M	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Requirements and Requirements Engineering*	*Requirement Inception*	*Introduction to Requirement Document, Structure of Document*	*Business drivers of Quality-components of Integrated Quality approach*	*Conflict types*
	SLO-2	*Requirements Types*	*sources of requirements*			
S-2	SLO-1	*Classification of Requirements*	*Introduction to requirement Elicitation*	*Vision, Scope and Elicitation notes*	*Quality improvement techniques, Requirements Quality Assurance*	*Mastering and using detection of the 5conflicts types on the basis of indication in project*
	SLO-2	*Requirements Gathering relevant to Software Life Cycle Models*				
S-3	SLO-1	*Stakeholders in the requirements process*	*Classical Elicitation Techniques-Interview, Questionnaire, Social analysis*	*Requirement Specification techniques*	*PDCA Cycle*	*Glasl's conflicts escalation model*
	SLO-2					
S-4	SLO-1	*Requirements Engineering Process Framework, Requirements Engineering Maturity Model*	*Modern Elicitation Techniques-Brainstorming,*	*Introduction to requirement validation-Classical Requirement Validation techniques-Inspection, Simple Check*	*Introduction to Requirement Management-Requirement Identification-Requirements traceability*	*Conflicts Settlement techniques*
	SLO-2	*Generic Process for requirements Engineering*				
S-5	SLO-1	*Levels of Requirements Engineering*	*Modern Elicitation Techniques-Prototyping, Use Centered Design,*	*. Introduction to requirement validation-Classical Requirement Validation techniques-Desk Check, Walkthrough*	*Requirement Tracebility models, Traceability Matrix- Traceability List & Tree*	*Conflicts Settlement techniques*

	SLO-2	*System Model for Requirements Engineering*				
S-6	SLO-1	*Representation of Requirements-Data Flow, ER Diagram*	*Modern Elicitation Techniques-Walkthrough, Use case Joint Application Development*	*Format review*	*Introduction to RequirementTraceability-Requirement traceability methods*	*Analytic Methods – Mastering and using Consider All Facts (CAF)*
	SLO-2	*View Point Controlled Requirements*				
S-7	SLO-1	*Structured Analysis and Design Technique, Viewpoint Oriented Requirements Definition*	*Requirement reuse*	*Prototype & Enactments, Functional test Design*		*Analytic Methods – Plus –Minus-Intresting(PMI)*
	SLO-2					
S-8	SLO-1	*0bject Oriented Methods of Requirements Engineering*	*Feature Oriented Domain Analysis*	*Development of User manual*	*Advance Traceability*	*Analytic Methods – Cost Benefit Analysis*
	SLO-2					
S-9	SLO-1	*Case Study : For the given application identify the stakeholders, gather and classify the requirements according to the types*	*Case Study: For the given application apply various techniques and Elicitation the requirements*	*Case study. For the given application validate and document the specifications*	*Requirement Change Control*	*Case study : Requirement Engineering Tools*
	SLO-2

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Classify the essential elements of software architecture*
CLR-2 :	*Understand the issues related to architecting a large-scale software system*
CLR-3 :	*Understand different software architectures views and styles*
CLR-4 :	*Able to use the four-views approach for developing and documenting a software architectures*
CLR-5 :	*Understand the implications of different design patterns*
CLR-6 :	*working as part of a team, develop, analyze and critique an architecture of a software system*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	2	3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Describe different approaches to design software application*	3	80	75	H	H	-	-	L	-	-	-	-	L	-	H	-	-	-
CLO-2 :	*Analyze specifications and identify appropriate design strategies.*	3	85	80	M	H	H	H	-	-	-	-	M	M	M	H	-	-	-
CLO-3 :	*Develop an appropriate design for a given set of requirements*	3	75	75	M	H	H	H	-	-	-	-	-	M	M	H	-	-	-
CLO-4 :	*Identify applicable design patterns for the solution*	3	85	80	H	H	H	H	-	-	-	-	-	L	L	H	-	-	-
CLO-5 :	*Abstract and document reusable design patterns*	3	80	70	M	H	H	-	L	-	-	-	M	M	M	H	-	-	-
CLO-6 :	*Evaluate a given design against the specifications*	3	80	70	M	H	-	-	-	-	-	-	M	M	M	H	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Software Architecture –Software Design*	*Software Architectural Patterns & Styles*	*Evaluating a Software Architecture*	*Introduction to Design Process*	*Introduction to Design Pattern*
	SLO-2	*Importance and Need of Software Architecture*	*Types of Architectural Styles*	*Why- When -Who evaluate Architecture*	*Design Strategy*	*Component of Design Pattern - Types*
S-2	SLO-1	*4 +1 View Model*	*Layered pattern*	*What Qualities Can We Evaluate an Architecture?*	*Describing the design process the D-Matrix*	*Creational Design Patten - Abstract Factory Pattern*
	SLO-2	*Activities in Software Architecture*	*Merits and Demerits of Layered Pattern*		*Views associated with D-matrix*	*Factory Method*
S-3	SLO-1	*Fundamental design issues*	*Pipe-Filter pattern*	*Outputs of an Architecture Evaluation*	*Design by top-down decomposition*	*Singleton Pattern*
	SLO-2		*Merits and Demerits of Pipe and Filter*			*Structural design Pattern - Types*
S-4	SLO-1	*Understanding quality attributes -*	*Shared Data Pattern*	*Evaluating the Architecture - ATAM*	*Design by composition*	*Adaptor pattern*
	SLO-2	*Six parts of Quality Scenario*	*Merits and Demerits of Shared Data Pattern*	*Participants and Outputs of ATAM*		*Decorator Pattern*
S-5	SLO-1	*Design for quality attributes - Availability (General Scenario, Tactics)*	*Client Server pattern*	*Phases of ATAM*	*Function-oriented design*	*Proxy Pattern*
	SLO-2		*Merits and Demerits of Client Server*	*CASE Study for ATAM*		*Behavioral Design Pattern - Types*
S-6	SLO-1	*Design for quality attributes - Modifiability (General Scenario, Tactics)*	*Blackboard Architectural Pattern*	*Evaluating the Architecture - CBAM*	*Object-oriented design*	*Observer Pattern*
	SLO-2		*Merits and Demerits*	*Decision-Making Context*		*Strategy Pattern*
S-7	SLO-1	*Design for quality attributes - Security (General Scenario, Tactics)*	*Flight Simulation: A Case Study in an Architecture for Integrability*	*Basis for the CBAM - Case Study*	*Aspect Oriented Design*	*Iterator pattern*
	SLO-2		*Relationship to the Architecture Business*			*Introduction to ADL*

			Cycle			
S-8	SLO-1	*Design for quality attributes - Usability (General Scenario, Tactics)*	*Requirements and Qualities related to flight simulation*	*Evaluating Software Architecture - SAAM*	*Design Metrics - Need for Metrics*	*Components of ADL- Example*
	SLO-2			*SAAM Evaluation Process*	*WMC -DIT*	
S-9	SLO-1	*Design for quality attributes - Testability (General Scenario, Tactics)*	*Architectural Solution for flight simulation*	*Evaluating Software Architecture - ARID*	*NOC - CBC*	*Future Directions in Architecture*
	SLO-2			*ARID Evaluation Process*	*RFC- LCOM*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Select a suitable modeling method according to problem area and assignment, and can justify their choice.*
CLR-2 :	*Formulate models of a system to describe the system on different levels of abstraction and from different viewpoints.*
CLR-3 :	*Identify the Formal models used in software development*
CLR-4 :	*Define model checking concepts using tools*
CLR-5 :	*Model the software system and analyze its characteristics and correctness.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Implement the appropriate modeling method for the given problem*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Explain the system abstraction in different levels*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Apply the Formal models in the software development*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Apply tools to check model checking properties of a system*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Analyze the characteristics and correctness of software system*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to software modelling*	*Representing domain concepts by conceptual objects*	*Modeling system agents, Characterizing agents.*	*Correctness of Object Oriented Programs Design by Contract, The Class Invariant*	*Introduction to Kripke Structures*
S-2	SLO-1	*Modeling principles*	*Entities, Association, Attributes*	*Representing agent models,Refinement of abstract agents*	*Example - correctness of stack application*	*Modeling System Design as Kripke Structure*
S-3	SLO-1	*Goal features as model annotations,Goal refinement*	*Built–in associations for structuring object models*	*Building Agent models*	*A real–time temporal logic for specifying model annotations*	*Exercise on Kripke Modelling, Recap to Kripke Structures*
S-4	SLO-1	*Representing conflicts among goals,Connecting the goal model with other system views.*	*Class Diagrams, Heuristic rules for building object models*	*Modelling system operations, Characterizing system operations*	*Specifying goals in the goal model.*	*Exercises on system modeling using kripke structures, Introduction to LTL*
S-5	SLO-1	*Modelling alternative options, Goal diagrams as AND/OR graphs.*	*Object or Attribute Entity, association, agent or event?*	*Goal Operationalization, Goals, agents, objects and operations*	*Specifying descriptive properties in the object model*	*Properties of a system, Liveness and Safety properties , Exercise on specifying properties as LTL formula*
S-6	SLO-1	*Documenting goal refinements and assignments with annotations*	*Attribute of a linked object or of the linking association Specialization and generalizing concepts Avoiding common*	*Representing object models, Building operation models*	*Specifying operationalization's in the operation model*	*Introduction to NuSMV tool, Model Checking using NuSMV,Introduction to SPIN CHECKER tool*
S-7	SLO-1	*Building goal models: Heuristic rules and reusable patterns*	*Aggregation or association? Avoiding common pitfalls*	*Modelling System behaviour, Modelling instance behaviours*	*Checking goal refinements deriving goal operations*	*Model Checking using SPIN checker tool*
S-8	SLO-1	*Goal obstruction by obstacles*	*Specialization and generalizing concepts Avoiding common pitfalls*	*Modelling class behaviours*	*Generating obstacles for risk analysis Generating anti goals for security analysis*	*System Property as first order logic formula Proof of correctness using theorem prover*

S-9	SLO-1	*Modelling obstacles, Obstacle ananlysis for a more robust goal model*	*Case Study*	*Building behaviour models*	*Formal conflict analysis. Synthesizing behaviour models for animation and model checking.*	*Introduction Isabelle tool, Theorem proving using Isabelle*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concepts of design; Utilize by learing various color models*
CLR-2 :	*Gain knowledge on the basics of various law in UX*
CLR-3 :	*Construct the task for requirement gathering*
CLR-4 :	*Gain knowledge on how to Design for various domains or applications*
CLR-5 :	*Introducetools for designing various applications*
CLR-6 :	*Utilisedifferent types of design for real-time programming applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Identify various color models for design*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Create the design as per the design law*	*2*	*75*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Construct the task for requirement gathering*	*2*	*85*	*80*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Create wire frames and prototypes*	*2*	*80*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Create the usability constraints and accebility*	*2*	*75*	*85*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Construct real-time applications using real-time programming applications*	*2*	*80*	*85*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*What is typography-type properties, baseline, cap height*	*Laws of UX designing*	*Introduction to Interaction Design*	*Culture in usability*	*Importance of case studies and guidelines*
	SLO-2	*X-height, ascenders*	*Hicks law*	*Task analysis*	*Universal usability*	*Tracking APP Introduction*
S-2	SLO-1	*Descenders and weight*	*example of hicks law with an application*	*Data collection for gathering user*	*Inclusive interaction*	*Tracking APP Design guidelines*
	SLO-2	*Type classification-Serif*	*Jakob's law*	*Data for task requirements*	*Importance of accessibility*	*Tracking APP demo*
S-3	SLO-1	*sans serif fonts*	*example of jakob's law with an application*	*Requirements gathering*	*principles of accessibility*	*Designing UI*
	SLO-2	*monospace*	*Fitts's Law*	*Eliciting Qualitative data*	*Universal design*	*Redesigning Gmail and making it flash*
S-4	SLO-1	*handwriting and Display*	*example of Fitts's law with an application*	*analyzing qualitative data*	*Accessibility design*	*Design principles*
	SLO-2	*Readability, letter spacing*	*Ockham's Razor*	*Qualitative metrics*	*Font weight, color*	*Redesigning Gmail and making it flash Demo*
S-5	SLO-1	*line height with an example*	*example of Ockham's law with an application*	*User narratives*	*Contrast, Screen readers*	*Introduction of how to Design a new UX concept to reduce driver distraction*
	SLO-2	*Paragraph spacing, power of alignment*	*Pareto Principle*	*Scenario implementation and its challenges*	*Alt text using a tool*	*Designing concepts of Driver distraction*
S-6	SLO-1	*Leading and Kerning*	*example of Pareto principle with an application*	*Wireframes*	*Introduction to Multifaceted Users*	*Demo*
	SLO-2	*Fundamentals of color*	*Weber's law*	*Example on wireframes*	*Designing for Multifaceted Users*	*Importance of User data in UX designing*

S-7	SLO-1	*Color Models Introduction*	*example of Weber's law with an application*	*Prototypes*	*Design guidelines*	*Approach to design without user data*
	SLO-2	*RGB, CMYK*	*Tesler's law*	*Implementation of Prototypes*	*Guidelines for helping adults*	*Designing concept*
S-8	SLO-1	*Color harmony: monochromatic, analogous*	*example of Tesler's law with an application*	*UX design for mobile application*	*Application example*	*Implementation problems without data*
	SLO-2	*Complementary, triadic, double-complementary*	*Law of proximity*	*Application design example*	*Virtual third eye simulator introduction*	*Dynamic webpages*
S-9	SLO-1	*Meaning of colors*	*example of proximity*	*Responsive Design*	*Web accessibility guide*	*Demo*
	SLO-2	*The power of Contrast*	*Law of similarity and human eye*	*Adaptive design and difference with Responsive design*	*Virtual third eye simulator web accessibility*	*Perform UI Case study*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Gain knowledge about basics of C# and .NET framework*
CLR-2 :	*Utilize object-oriented aspects of C# to develop applications*
CLR-3 :	*Utilize forms, menus etc. to design Windows applications*
CLR-4 :	*Utilize ActiveX Data Objects to create Database applications*
CLR-5 :	*Utilize web forms to develop Web based applications*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Understand the basics of C# and .NET framework*	2	80	85	-	-	-	-	H	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Develop applications using object-oriented aspects of C#*	2	75	80	H	-	M	-	H	-	-	-	-	-	-	H	-	-	-
CLO-3 :	*Design Windows applications*	2	85	80	H	-	M	M	H	L	L	-	H	-	-	H	-	-	-
CLO-4 :	*Create Database applications using ActiveX Data Objects*	2	80	75	H	H	M	-	H	L	L	-	H	-	-	H	-	-	-
CLO-5 :	*Develop Web based applications*	2	75	85	H	-	M	M	H	L	L	M	H	M	L	H	M	H	H

Duration (hour)		10	10	9	8	8
S-1	SLO-1, SLO-2	*Introducing C# - Understanding .NET Framework*	*Class – Objects*	*Building Windows Application*	*Accessing data with ADO.NET: DataSet*	*Programming Web Application with Web Forms*
S-2	SLO-1	*Overview of C# - Literals – Variables*	*Constructors – Types of Constructors*	*Examples: Windows Applications*	*Accessing data with ADO.NET: Typed Dataset*	*Introduction to ASP.NET,*
	SLO-2	*Data Types – Operators – Constants - Expressions*				
S-3	SLO-1, SLO-2	*Program Control Statements: Branching*	*Inheritance and its types*	*Creating Window Forms with Events and Controls*	*Data Adapter*	*Working with XML and .NET*
S-4	SLO-1, SLO-2	*Program Control Statements: Looping*	*Examples - Inheritance*	*Examples: Window Forms with Events and Controls*	*Updating Database using Stored Procedures*	*Creating Virtual Directory and Web Application*
S-5	SLO-1, SLO-2	*Casting - Methods*	*Indexers and Properties*	*Menu and Toolbar*	*SQL Server with ADO.NET*	*Session Management*
S-6	SLO-1, SLO-2	*Arrays: Array Class*	*Polymorphism – Operator Overloading*	*Delegates - Inheriting Window Forms*	*Handling Exceptions*	*Web Services – web.config*
S-7	SLO-1, SLO-2	*Array List*	*Polymorphism – Method Overloading*	*SDI Application*	*Validating Controls*	*Web Services – Passing Datasets and Returning Datasets from Web Services*
S-8	SLO-1, SLO-2	*String*	*Interfaces, Abstract Class*	*MDI Application*	*Windows Application Configuration*	*Transaction Handling, Exception Handling – Returning Exceptions from SQL Server*
S-9	SLO-1, SLO-2	*String Builder*	*Event Handling*	*Dialog Box: Modal and Modeless*		
S-10	SLO-1, SLO-2	*Structures - Enumerations*	*Errors and Exception Handling*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand scripting language basics for web development*
CLR-2 :	*Develop familiarity with the JavaScript language – Arrays, Objects, Functions*
CLR-3 :	*Understand concepts like HTML, CSS , DOM,*
CLR-4 :	*Acquire knowledge of jQuery , DOM events etc.*
CLR-5 :	*Apply in AJAX and learn the usage of Closures*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3
CLO-1 :	*Learn the basics of Scripting language*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Ability to use Javascript in applications*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Ability to apply HTML, CSS and DOM*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Ability to Apply jQuery concepts in applications*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Understand the AJAX environment and Closure concept*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	
S-1	SLO-1	*Learn concept of Scripting languages*	*Arrays. Array insertion and deletion*	*HTML and CSS and*	*jQuery , Overview of jQuery*	*AJAX.*
	SLO-2	*Compiled vs interpreter a comparison*	*. Array length*	*The Document Object Model , Tags*	*Examples*	*Asynchronous Communication*
S-2	SLO-1	*Understand Web development basics*	*Sparse arrays*	*Document structure.*	*Cross-browser compatibility*	*Callback functions.*
	SLO-2	*Acquire basic knowledge on Server side programming*	*Multidimensional arrays*	*Elements. Text, forms, images,blocks and frames.*	*The $ function object*	*The get and post formats.*
S-3	SLO-1	*Understand concept of dynamic interactive web pages.*	*Objects as unordered maps. Object creation,*	*Selectors*	*Element selectors.*	*Same-origin policy.*
	SLO-2	*Overview of JavaScript , Brief history*	*modification and lookup syntax. Nested objects. Object methods.*	*Cascading and inheritence*	*Tree traversal.*	*Cross-origin requests with JSONP*
S-4	SLO-1	*Common use-cases. Runtime environments, Overview of language features.*	*The delete keyword.*	*Text and color tyles.*	*Node creation, insertion, modification and deletion.*	*AJAX polling.*
	SLO-2	*Running JavaScriptDebugging JavaScript in the browser. The console and REPL in the browser and at the command line*	*The for... in statement, and the hasOwnProperty method.*	*The box model.*	*Getting and setting attributes,*	*Context Object method invocation as method passing*

S-5	SLO-1	*Values and literals. Primitive types. Numbers. Integer and floating point as a single type Rounding errors.*	*The global window object. Object references*	*Layout.*	*styles and class.*	*The this variable as an implicit parameter variable.*
	SLO-2	*. Special floating point numbers.*	*Aliasing. Pass-by-reference-copy semantics.*	*The DOM as an document API. Browser information*	*Wrapping and unwrapping DOM raw objects.*	*Problems with methods in event handlers and callbacks*
S-6	SLO-1	*The Math library. Strings. Immutability of strings.*	*Functions :Function declaration and invocation syntax.*	*The setTimer and setTimeout*		*Usage of call and apply*
	SLO-2	*+ and [] operatorsCommon string utilities*	*Anonymous functions.*	*Element lookup*	*The chaining pattern*	*Binding context.*
S-7	SLO-1	*Booleans. Ternary operator.*	*Functions as data.*	*Tree traversal.*	*Event handling.*	*The new keyword.*
	SLO-2	*Regular expressions. Truth-y and False-y values. null and undefined.*	*The arguments object.*	*Attribute getting and setting*	*bind and unbind.*	*Closures Lexical scope. Inner functions*
S-8	SLO-1	*Dynamic typing. Weak typing. The typeof operator.*	*Variadic functions. Optional parameters.*	*Creating and deleting nodes.*	*Keyboard and mouse events.*	*Closure scope. Examining closure scope in the debugger*
	SLO-2	*The === and !== operators.*	*Named parameters. Function overloading.*	*Events.*	*Event delegation and bubbling.*	*Functors.*
S-9	SLO-1	*Control statements.*	*Duck typing.*	*Case studies*	*Animation.*	*Simulation of private object properties.*
	SLO-2	*Examples*	*Examples*	*Case Studies*	*Examples*	*Simulation of namespaces.*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the software engineering process and the tools used to support this process to deliver the quality software product*
CLR-2 :	*Know the process, tools and methods used for software requirements modeling and the designing process*
CLR-3 :	*Study the various software development approaches, tools and to install and use some software development tools*
CLR-4 :	*Know about different web application development technologies and tools used to support the quick development process*
CLR-5 :	*Understand the software testing process used in the industry and various test related tools used for the different task in the testing*
CLR-6 :	*Study the functionalities of different testing tools used in the software maintenance and engineering process*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	COMPUTER SCIENCE AND ENGINEERING	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide an understanding of concepts and techniques for testing software*
CLR-2 :	*Prepare test plan based on the requirement document ,design test plans and document test plans*
CLR-3 :	*Design test cases suitable for a software development in various domains*
CLR-4 :	*Validate and document test cases, assuring software component or system satisfies its requirements and meets stakeholder expectations*
CLR-5 :	*Use of automation testing tools*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)
CLO-1 :	*Identify, design different types of test cases for software development in any domain*	*2*	*80*	*85*
CLO-2 :	*Design, develop, implement, validate and document test plans at various levels*	*3*	*80*	*80*
CLO-3 :	*Develop Test cases for a given Software/System Specification*	*2*	*90*	*85*
CLO-4 :	*Validate Test Cases with the Requirement Specifications*	*2*	*80*	*80*
CLO-5 :	*Use various automation tools to implement test cases*	*3*	*75*	*80*

Program Learning Outcomes (PLO)

Duration (hour)		8	10	8	9	10
S-1	SLO-1	*Fundamentals of Testing: Necessity of Testing-Case Studies on "Impact of Software bugs"*	*Test Case Design Strategies: Introduction to basic design strategies*	*The need for levels of testing, Unit Testing: Planning, Test Harness*	*Test Management: Choice of Standards*	*Software Test Automation: Skills and Scope Design*
	SLO-2	*Objectives of Testing, Basics Definitions*		*Running the tests Recording Results*	*Infrastructure Management, Test People Management*	
S-2	SLO-1	*Testing Principles-Illustrations*	*White Box Strategies - Peer Reviews, Inspections, Walkthrough*	*Integration Testing: Goals, Design and Plan*	*Test Plan Components*	*Architecture for Automation*
	SLO-2		*Comparative Analysis*		*Test Plan Attachments*	
S-3	SLO-1	*Fundamental Test Process, The tester's role in a software development organization*	*Static Analysis Tools: Coding Standards, Code Metrics, Code Structure*	*System Testing goals, Types of System Testing: Functional Testing*	*Locating Test Items, Managing Issues*	*Requirements for a test tool, Process Model for Automation, Selecting the test tool*
	SLO-2	*Test planning*	*Activity: Static Analysis of a source code*	*Performance Testing, Stress Testing*	*Addressing Perception, Taking team together*	
S-4	SLO-1	*Establishing Test Policy, Structured approach to testing Test Factors*	*Coverage and Control Flow Graphs*	*Configuration Testing*	*Documentation uses*	*Demonstration of a Functional Testing Tool*
	SLO-2	*Eleven Step software testing process*	*Activity: Calculate Complexity for a given source code*	*Security Testing*	*Documentation Types*	
S-5	SLO-1	*Origin of Defects, Defect Repository and Test Design*	*Paths Code Complexity*	*Recovery Testing, Reliability Testing*	*Test Analysis report Documentation,*	*Demonstration of a Web Testing Tool*
	SLO-2	*Developer/Tester support of developing a defect repository*	*Activity: Calculate Path Code Complexity for a given source code*	*Usability Testing*	*Analyze reports and Problem tracking,*	
S-6	SLO-1	*Defect Examples, Case Studies – "Identify the defect"*	*Evaluating test adequacy criteria, Case Studies-"Applying the suitable White Box Strategy"*	*Regression Testing*	*Controlling and Monitoring Test Progress*	*Démonstration of an Unit Testing Tool*
	SLO-2			*Alpha, Beta and Acceptance Testing*	*Test Metrics and measurements: Role, need and types*	

S-7	SLO-1	Defect Analysis and Prevention Strategies	Black Box Testing Strategies: Requirements Based Testing, Random Testing	Role of use cases in testing	Project Metrics with Practice	Demonstration of an Defect Tracking Tool
	SLO-2			Applying Testing Skills: Compatibility testing, Internationalization testing		
S-8	SLO-1	Developing adhoc test cases for a case study	Black Box Testing Strategies: Boundary Value Analysis, Equivalence Class Partitioning,	Testing Documentation plan	Progress Metrics with Practice	Demonstration of an Test Management Tool
	SLO-2		Activity: Designing test cases for the given requirement specification using Boundary value analysis and Equivalence Class Partitioning	Recording test cases, Reporting and Measurement of Success		
S-9	SLO-1		Black Box Testing Strategies: Cause Effect graphing		Productivity Metrics with Practice	Challenges in Automation
	SLO-2		Activity: Designing test cases for the given requirement specification using cause effect graphing and developing decision tables			
S-10	SLO1 SLO2		Evaluating test adequacy criteria, Case Studies-"Applying the suitable Black Box Strategy"			The Future: Software Quality Assurance

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*The nature of Software*	*Agile And Its Significance*	*Agile methodology*	*Agile Project management*	*Agile Quality assurance*
	SLO-2	*Defining Software*	*Agile Story*	*Extreme Programming: Method Overview*	*Multi-team and multi-site development*	*Feature Driven Development*
S-2	SLO-1	*The Software Process*	*Evolutionary delivery, Scrum Demo*	*Life cycle phases*	*Pipelining activities across Iterations*	*Feature Driven Development roles*
	SLO-2	*Software Engineering practice*	*Planning game, Sprint back log, adaptive planning and retrospective*	*Work products*	*Rolling Wave adaptive and predictive planning*	*Feature Driven Development process*
S-3	SLO-1	*Agile Development*	*Agile Motivation*	*Roles and practices*	*Benefits of rolling wave adaptive planning*	*Class Ownership*
	SLO-2	*Agility and the cost of change*	*Challenges With The Waterfall*	*Core practices*	*Agile requirements*	*Reporting*
S-4	SLO-1	*Agile Process*	*Research Evidence*	*Process mixtures*	*Agile modeling*	*Test Driven Development (TDD)*
	SLO-2	*Agile Manifesto & Principles*	*Scrum: Method Overview*	*Strengths of XP*	*Defining and keeping the vision*	*Test Driven Development roles*
S-5	SLO-1	*Software is new product development*	*Life cycle phases*	*Unified process: Method Overview*	*Evolutionary Requirements workshop*	*TDD benefits*
	SLO-2	*Predictable vs. Inventive Projects*	*Work products*	*Work products*	*Gathering requirements*	*TDD Limitations*
S-6	SLO-1	*Iterative and Evolutionary methods*	*Roles and practices*	*Roles and practices*	*Tracking requirement across iterations, Direct user involvement*	*Agile approach to Quality Assurance*
	SLO-2	*Risk driven and client driven planning*	*Core practices*	*Core practices*	*Brainstorming and Brain writing*	*Unscheduled and Scheduled*
S-7	SLO-1	*Time boxed Iterative development*	*Values of Scrum meeting*	*EVO: Method Overview*	*Mind maps, Team rotation writing*	*Status meeting*
	SLO-2	*Evolutionary and Adaptive development*	*Other practices and values*	*Life cycle phases*	*Agile environment*	*Automated unit tests and Acceptance tests*
S-8	SLO-1	*Adaptive Development*	*Common mistakes and*	*Work products*	*Continuous Integration*	*Exploratory Testing*
	SLO-2	*Incremental Delivery, Evolutionary delivery*	*Sample projects*	*Roles and practices*	*Project Wiki webs, Case tools*	*Code review and code metrics*
S-9	SLO-1	*Specific Iterative methods*	*Process mixtures*	*Core practices*	*Caves and common rooms*	*Continuous Integration*
	SLO-2	*Evolutionary methods*	*Strengths and Weakness of Scrum*	*Process mixtures*	*Reverse engineering*	*Informative Workspaces*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the need for Software Security and the threats to software security*
CLR-2 :	*Incorporate security principles to software development lifecycle*
CLR-3 :	*Understand Secure software architecture design and coding*
CLR-4 :	*Gain basic knowledge on web security principles*
CLR-5 :	*Learn risk management and mitigation of risk in software development*
CLR-6 :	*Learn testing types and strategies for secure software*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO – 3
CLO-1 :	*Identify security threats and issues in software*	2	80	85	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Gather security related requirements during requirement elicitation*	2	75	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Design software by incorporating security principles*	2	85	80	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*Understand the issues in web and database security*	2	80	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Apply risk management strategies and risk mitigation strategies in software development*	2	75	85	H	-	-	H	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to software Security*	*Secure software architecture and design*	*Browser Security Principles*	*Risk Management Framework*	*Software security testing*
	SLO-2	*Software assurance and software security*	*Software security practices for architecture and design*	*Defining the same-origin policy*	*Five stages of activity*	*Contrasting software testing and software security testing*
S-2	SLO-1	*Threats to Software security*	*Software security knowledge for architecture and design*	*Client-side vs. server-side*	*Applying the RMF*	*Functional testing*
	SLO-2	*Sources of Software Insecurity*	*Software characterization*	*Exceptions to the same origin policy*	*Understanding the business context*	*Risk-based testing*
S-3	SLO-1	*Benefits of detecting software security defects early*	*Threat analysis*	*Cross-site scripting*	*Gathering the artifacts, conducting project research*	*Penetration Testing*
	SLO-2	*Managing Secure software development*	*Architectural vulnerability assessment*	*Reflected, POST-based reflected, stored and local XSS*	*Identifying the business and technical risk*	*Security testing consideration throughout the SDLC*
S-4	SLO-1	*Risk Management framework for Software security*	*Risk likelihood determination*	*XSS defense*	*Developing risk questionnaires, interviewing the target project team*	*Unit testing*
	SLO-2	*Software security practices in the development lifecycle*	*Risk Impact Determination*	*Cross-site request forgery*	*Analyzing the research and interview data*	*Testing Libraries*
S-5	SLO-1	*Properties of secure software*	*Risk Mitigation Planning*	*CSRF defense*	*Uncovering technical risks*	*Testing Executable files*
	SLO-2	*Influencing security properties of software*	*Security principles*	*Prevent XSS*	*Analyzing software artifacts*	*Integration testing*
S-6	SLO-1	*Building a security assurance case*	*Security guidelines and attack patterns*	*SQL Injection*	*Synthesizing and ranking the risk*	*System Testing*
	SLO-2	*Incorporating assurance cases into SDLC*	*Secure coding and testing*	*SQL Injection effects*	*Reviewing the risk data*	*Security Failures*
S-7	SLO-1	*Importance of requirements engineering*	*Code analysis*	*Blind SQL Injection*	*Conducting the business and technical peer review*	*Categories of Errors*
	SLO-2	*Security Requirements Engineering*	*common software code vulnerabilities*	*Setting Database Permissions*	*Defining the risk mitigation strategy*	*Attacker Behaviour*
S-8	SLO-1	*The SQUARE Process model*	*Source code review*	*Stored Procedure Security*	*The importance of measurement*	*Functional and attacker perspectives for Security Analysis*
	SLO-2	*SQUARE sample outputs*	*Coding practices*	*SQL Injection in stored procedures*	*Measurement and metrics in the RMF*	*Identity Management and Software development*

S-9	SLO-1	*Requirements elicitation*	*Sources of additional information on secure coding*	*Insecure direct object references*	*The Cigital Workbench*	*System Complexity drivers and security*
	SLO-2	*Requirements prioritization*	*Best practices for secure coding*	*Pre and post authorization checks*	*Risk Management is a framework for Software security*	*Deep Technical Problem Complexity*

Course Code	18CSE471T	Course Name	SOFTWARE MAINTENANCE AND ADMINISTRATION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	
Course Offering Department	Computer Science and Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the factors that make change of existing systems both technically challenging and risky, and the processes required to control change.*
CLR-2 :	*Acquire a knowledge and understanding of the specific problems inherent in the reengineering and evolution of legacy software systems, and be able to apply some of the techniques that can be of use in comprehending and changing them*
CLR-3 :	*Identify the specific challenges that inherent in the reengineering and evolution of data-intensive systems that are able to apply some of the techniques that can be of use in comprehending and changing them*
CLR-4 :	*Evaluate and understand the specific problems inherent in the reengineering and evolution of package-based software systems, and be able to apply techniques for designing change-resistant systems from pre-packaged code.*
CLR-5 :	*Analyze and apply numerous administration tools and technical concepts that relate to software administration*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO – 3

ACADEMIC CURRICULA

Professional Elective Courses

ELECTRICAL AND ELECTRONICS ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18EEE301T	Course Name	OPTIMIZATION TECHNIQUES IN POWER ELECTRONICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce and classify different conventional optimization techniques.*
CLR-2 :	*Understand the fundamentals of genetic algorithm and to apply appropriate algorithm for Power Electronic Applications.*
CLR-3 :	*Outline the concept of particle swarm optimization and apply it in Power Electronic applications.*
CLR-4 :	*Introduce other modern optimization algorithms for engineering applications.*
CLR-5 :	*Extend multi objective optimization techniques to Power Electronics*
CLR-6 :	*Introduce the concept of optimization design for Power Electronic Applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Categorize optimization problems and its techniques based on constraints and variables*	*1*	*75*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Correlate Genetic algorithm with various power electronic application.*	*2*	*75*	*75*	*H*	*H*	*M*	*M*	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-3 :	*Interpret Particle swarm optimization and develop hybrid algorithm for power electronic applications*	*3*	*75*	*75*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-4 :	*Gain knowledge about other modern optimization algorithms and integrate them for power electronic applications*	*3*	*75*	*75*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-5 :	*Formulate multi objective optimization algorithm for power electronic applications.*	*3*	*75*	*75*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	-	-	*H*	*H*	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to optimization*	*Introduction – Genetic Algorithm*	*Particle Swarm Optimization*	*Bacterial foraging-Chemotaxis, Swarming*	*Multiobjective optimization*
	SLO-2	*Design vector – design constraints – constraint surface*	*Encoding – Methods for GA*	*Fundamental principle*	*Operation of Bacterial foraging*	*Concept of pareto optimality*
S-2	SLO-1	*objective function – objective function surfaces*	*Fitness function*	*Velocity updating in PSO -Algorithm*	*Bees colony algorithm-Behavior of Honey bee swarm*	*Classical Methods – Weighted sum method,*
	SLO-2	*Classification of optimization problem*	*Maximization & Minimization*	*Algorithm for PSO*	*Algorithm for Bee colony optimization*	*ε-constraint method*
S-3	SLO-1	*Single variable optimization - optimalityconditions*	*Genetic operators*	*PSO – Parameter Selection*	*Differential evolution-Initialization, Mutation*	*Weighted metric methods,*
	SLO-2	*Single variable (unconstrained optimization) – Exhaustive search method*	*Crossover*	*Pseudocode*	*Recombination, Selection*	*Benson method.*
S-4	SLO-1	*Successive quadratic estimation method*	*Mutation*	*Implementation & Convergence issues in PSO*	*Ant colony optimization-Introduction*	*Multi objectiveGA*
	SLO-2	*Newton Raphson method*	*Parent Selection Roulette wheel selection*	*Advanced operators of PSO*	*Algorithm for Ant colony optimization*	*Fitnessassignment*
S-5	SLO-1	*Multi variable optimization – optimality conditions (unconstrained)*	*Stochastic universal selection,*	*Meta-Optimization- Behavioral parameters*	*Cuckoo Search Optimization*	*Sharing function*
	SLO-2	*Simplex search method*	*Tournament selection*	*Algorithm for Meta-Optimization*	*Algorithm for Cuckoo search Optimization*	*Convergence criterion*
S-6	SLO-1	*Cauchy's method*	*Rank selection*	*Applications of PSO*	*Firefly optimization-Working Principle*	*NSGA-II*
	SLO-2	*Steepest descent method*	*Issues in GA implementation*	*Harmonics Elimination in Inverters*	*Algorithm for Firefly optimization*	*Convergence criterion*
S-7	SLO-1	*Multivariable optimization (Constrained) Kuhn – Tucker Conditions*	*Applications of GA*	*Applications of PSO*	*Flower Pollination optimization-Introduction*	*Applications:Design of AC – DC Grid connected converter using Multi objective optimization*
	SLO-2	*Penalty Function Method*	*Passive Filter design using GA*	*PSO for single phase PWM Inverters*	*Algorithm for Flower pollination optimization*	*Algorithm for Design of AC – DC Grid connected converter*

S-8	SLO-1	*Method of Multipliers*	*Parameter tuning of DC-DC converter using genetic algorithm*	*Control of Dc-DC converters using PSO*	*Grey Wolfe optimization-Introduction*	*Multi objective optimization of power converters (NSGA-II)*
	SLO-2	*Linearized search Technique – Frank Wolfe method*	*Tuning of PI Controllers for Power electronic converters*	*Feedback controller design for boost converters*	*Algorithm for Grey Wolfe Optimization*	*Algorithm for Multi objective optimization of power converters*
S-9	SLO-1	*Non-Linearized Search Technique – Reduced gradient method*	*MPPT in Renewable Energy systems*	*HybridofGAandPSO*	*Comparison of various algorithms*	*Multi objective optimization for design and tuning of PID controllers*
	SLO-2	*Quadraticprogramming*	*Genetic Algorithm for MPPT*	*Algorithm for hybrid GA and PSO for selective harmonic elimination in VSI fed drives*	*Benchmark functions*	*Algorithm for Multi objective optimization for design and tuning of PID controllers*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Illustrate the basic concepts of CAD and its design consideration*
CLR-2 :	*Derive the output equation of DC and AC machines*
CLR-3 :	*Compute the torque and force for rotating and linear actuators*
CLR-4 :	*Analyze the finite element method in solving electromagnetic field problem*
CLR-5 :	*Enumerate the design concept of CAD in mathematical modelling*
CLR-6 :	*Build the models of electrical machines*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the basic design of electrical machines and the need for CAD*	1	75	75	H	M	M	-	-	-	-	-	-	-	-	-	H	M	-
CLO-2 :	*Make use of output equation for calculate main dimension of DC and AC machines*	2	75	75	H	H	M	M	-	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Deduce the electromagnetic field equations for actuators*	3	75	75	H	H	H	M	-	-	-	-	-	-	-	-	H	M	-
CLO-4 :	*Examine the mathematical and physical basis of finite element method*	3	75	75	H	M	H	M	-	-	-	-	-	-	-	-	H	H	-
CLO-5 :	*Apply the design concept of CAD in mathematical modelling*	3	75	75	H	H	M	M	M	-	-	-	-	-	-	-	H	M	-
CLO-6 :	*Develop the models of switched reluctance motor and rotating actuators*	3	75	75	H	H	M	M	M	-	-	-	-	-	-	-	H	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*CAD and its objectives*	*Maxwell's Equations*	*Finite element method*	*Organization of CAD package*	*model building*
	SLO-2	*Conventional design procedure of machines*	*integral form and differential form*	*Assumptions in FEM*	*Pre-processor*	*modeling flowchart*
S-2	SLO-1	*Output equation of DC machines.*	*Significance of field equations,*	*Electromagnetic field equations in Finite element*	*solver*	*geometric modeling, drawing edges*
	SLO-2	*Specific loading values for DC machines*	*electromagnetic equation-integral and differential form*	*Finite difference method*	*post-processor in CAD package*	*creating surface and creating components*
S-3	SLO-1	*output equation of AC machines*	*Magnetic vector potential*	*Finite difference method for calculation of magnetic field in a linear medium*	*Applications of finite element analysis*	*selecting edges surfaces and components*
	SLO-2	*Specific loading values for AC machines*	*scalar potential form*	*Assumptions in linear medium*	*Considerations in problem modeling*	*positioning the construction slice materials*
S-4	SLO-1	*Factors affecting the size of rotating machines*	*Energy stored in electromagnetic field*	*Finite difference method for calculation of magnetic field in a non-linear medium*	*stator and rotor model*	*boundary condition*
	SLO-2	*Specific loadings and its dependent factors*	*Energy stored in current carrying coil*	*Assumptions in non-linear medium*	*model replication and air gap discretisation*	*model solving*
S-5	SLO-1	*Variation of output and losses with dimension*	*Energy functional*	*Stiffness matrix*	*Post-processing of results-flux and flux linkage*	*Meshing: 2-D and 3-D*
	SLO-2	*Separation of main dimensions*	*Assumptions in energy functional*	*FEM and FDM functions*	*Numerical and graphical results using processors*	*finite element mesh*
S-6	SLO-1	*Limitations of conventional methods of design*	*Electromechanical energy conversion*	*FEM-mathematical basis*	*Analytical calculation*	*Design of C-cored coil with rotating actuator*
	SLO-2	*Need for field analysis based design*	*Classification of electromechanical energy conversion*	*FEM- physical basis*	*Terminal inductance calculation.*	*Geometric modeling of C-core*
S-7	SLO-1	*Outline of finite element analysis*	*Force and torque calculation from energy*	*Energy functional*	*Co-energy calculation.*	*Design of doubly excited rotating actuator*
	SLO-2	*Necessity of FEA*	*Force and torque calculation from co-energy*	*Non-linear energy functional*	*Force and torque calculation*	*Design procedure and its assumptions*
S-8	SLO-1	*Computers in finite element analysis*	*singly excited linear and rotating actuator*	*discretization*	*virtual work method*	*Design procedure of SRM*
	SLO-2	*Graphical users of FEA*	*doubly excited rotating actuator*	*shape function*	*Maxwell's stress tensor method*	*Geometric modeling*

S-9	SLO-1	*Engineering Optimisation*	*Force calculation on a current carrying conductor*	*Shape triangle calculation*	*Bil method*	*Material assigning*
	SLO-2	*Optimisation Methodology*	*torque calculation on a current carrying conductor*	*Comparison of Finite difference and finite element method*	*Boundary conditions*	*Design of Switched reluctance motor by CAD package*

Course Code	18EEE303T	Course Name	POWER CONVERTER ANALYSIS AND DESIGN	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18EEC302J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Enrich the knowledge on design aspects of phase controlled converters*
CLR-2 :	*Acquire knowledge in DC-DC converters and its performance*
CLR-3 :	*Enrich the knowledge of flyback back converter and its design*
CLR-4 :	*Acquire knowledge on the design techniques of the inverters*
CLR-5 :	*Understand the concept of resonant converters and role of reactive elements in UPS*
CLR-6 :	*Gain knowledge on power converter analysis and design*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Standards & Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Design single phase and three phase rectifiers*	3	75	75	H	H	M	M	H	-	-	-	-	-	-	-	M	H	-
CLO-2 :	*Understand the analysis and design aspects of DC-DC converters*	3	75	75	H	H	M	M	H	-	-	-	-	-	-	-	M	H	-
CLO-3 :	*Design flyback back converter and its various topologies*	3	75	75	H	H	M	M	H	-	-	-	-	-	-	-	M	H	-
CLO-4 :	*Design the inverter for various applications*	3	75	75	H	H	M	M	H	-	-	-	-	-	-	-	M	H	-
CLO-5 :	*Apply the knowledge on design concepts of resonant converters and UPS*	3	75	75	H	H	M	M	H	-	-	-	-	-	-	-	M	H	-
CLO-6 :	*Analyze and Design power converters*	3	75	75	H	H	M	M	H	-	-	-	-	-	-	-	M	H	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to single phase controlled converter (rectifier)*	*Introduction to isolated and non isolated DC-DC converters.*	*Introduction - Linear versus switch mode power supplies.*	*Introduction to inverters for single phase application*	*Introduction to resonant converters*
	SLO-2	*Working principle of single phase full converter*	*Principles of step down converters and step up converters*	*Functional circuit blocks of an offline switches*	*Introduction to inverters for three phase application*	*Classification of resonant converters*
S-2	SLO-1	*Analysis of single phase controlled rectifier for R load*	*Introduction to buck , boost converters*	*Classification of Basics switch mode DC-DC converters:*	*Selection of switching devices*	*Quasi resonant converters: Operating principle*
	SLO-2	*Analysis of single phase controlled rectifier for RLload and RLE load*	*Buck boost converters*	*Switch mode DC-DC converters: Operating principles*	*Introduction to IPM modules*	*Load resonant converters*
S-3	SLO-1	*Introduction to three phase controlled converters*	*Analysis of Buck converter*	*Flyback converters: operating principle*	*PWM techniques for inverter*	*Series Resonant switch converters*
	SLO-2	*Operation & principle of three phase controlled rectifier*	*Buck converter Design*	*Forward Converter: operating principle*	*Impact of PWM techniques on inverter performance*	*Parallel Resonant switch converters*
S-4	SLO-1	*Analysis of three phase controlled rectifier for R Load*	*Analysis of boost converter*	*Half-Bridge converters and, SMPS : Operating principle*	*Protection circuits for switches*	*Concept of Zero Voltage Switching*
	SLO-2	*Analysis of three phase controlled rectifier for RL Load*	*Boost converter design*	*Full Bridge Converters : operating principle*	*Snubber circuit design*	*Concept of Zero Current Switching*
S-5	SLO-1	*Selection of converter components for specified load*	*Analysis of buck-boost converter*	*Push-Pull Converter and its working*	*Thermal design considerations*	*Multi resonant converters*
	SLO-2	*Design of filter circuit for single phase controlled rectifier*	*Buck-Boost converter design*	*SMPS with multiple outputs*	*Heat sink design*	*Zero Voltage Transition converters*
S-6	SLO-1	*Design of filter circuit-three phase converter*	*Introduction to SEPIC converter*	*Magnetic design: Properties of magnetic cores*	*Multilevel Inverter(MLI) concept*	*UPS: offline UPS, Online UPS*
	SLO-2	*Importance of driver circuits*	*Introduction to CUK converter*	*High frequency inductor and transformer design*	*Classification of MLI*	*Filters: Voltage filters*
S-7	SLO-1	*Pulse generation circuits*	*Analysis of SEPIC converter*	*Selection of output filter capacitor*	*Design of MLI*	*Series-parallel resonant filters, filter without series capacitors,*

	SLO-2	*Design of driver circuits*	*Analysis of CUK converter*	*Selection of switches*	*Pulse Width Modulation for MLI*	*current filter, DC filters*
S-8	SLO-1	*Power factor study – Improvement techniques*	*Thermal design: temperature control*	*Snubber circuit design*	*Influence of PWM on inverter performance*	*Design of inductor and transformé of power electronic applications*
	SLO-2	*Harmonic analysis study*	*Heat sink design*	*Design of driver circuits.*	*PWM for low inverter loss*	*Selection of capacitors.*
S-9	SLO-1	*Simulation of fully controlled converters*	*Simulation of basic DC- DC converters*	*Simulation of isolated dc dc converter*	*Simulation of a typical three phase inverter*	*Simulation of resonant and quasi resonant converter*
	SLO-2	*Demonstration of a fully controlled converter for R , RL loads*	*Demonstration of DC DC converters*	*Demonstration on Closed Loop Control of SMPS*	*Demonstration on a three phase inverter*	*Demonstration of resonant converters*

Pre-requisite Courses	18EEC302J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Review the basics of the power semiconductor devices and their requirements for the design of SMPC.*
CLR-2 :	*Explain the advantage of Switched mode Power supply over linear power Supply and the design of basic switched mode DC-DC converters.*
CLR-3 :	*Illustrate the need of derived / isolated converters and the working of various types of derived converters.*
CLR-4 :	*Introduce the control and compensating schemes for the design of SMPS and the procedure to be followed in the design of magnetic components.*
CLR-5 :	*Demonstrate the use of resonant converters to implement the Zero voltage and Zero current switching concepts.*
CLR-6 :	*Learn the basics and steady state operation of efficient switched mode power conversion and control techniques, including component design.*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to switched mode power conversion*	*Basic concepts of Switched Mode power converters.*	*DC-DC converters with isolation.*	*Reactive elements in Power Electronic Systems*	*Basic resonant circuit concepts*
	SLO-2	*Industrial relevance of switched mode power conversion*	*Generalized comparison between switched mode and linear voltage regulator.*	*Requirement for isolation in the switch-mode converters*	*Design constraints of reactive elements in Power Electronic Systems*	*SMPS using resonant circuit*
S-2	SLO-1	*Requirements of power conversion system*	*DC-DC converters circuit elements, operating principles*	*Power circuit of flyback converters*	*Design of inductor, transformer and capacitors for power electronic applications*	*Resonant switch converters – Introduction*
	SLO-2	*Requirements of high performance modern power conversion system*	*DC-DC converters Characteristics*	*Steady-state analysis of flyback converters*	*Filter inductor design constraints, Transformer design constraints*	*Resonant switch converters – principle of operation*
S-3	SLO-1	*Review of power diodes, Schottky didoes, power MOSFETs &IGBTs*	*Operation and steady state performance of Buck Converter in continuous-conduction mode (CCM)*	*Power circuit of push-pull converters*	*Modeling of power converters*	*Buck converter with zero current switching*
	SLO-2	*Introduction to power semiconductor devices for SMPS*	*Buck converter - Discontinuous-conduction mode (DCM) and boundary between CCM and DCM operation*	*Steady-state analysis of push-pull converters*	*Generalized State Space Model of the switching power converter*	*Steady state conversion ratio – Buck converters*
S-4	SLO-1	*Recent developments in power devices*	*Operation and steady state performance of Boost Converter in continuous-conduction mode (CCM)*	*Power circuit of forward converters*	*Transfer Function of switching power converters*	*Boost converter with zero voltage switching*

	SLO-2	New devices: GaN & SiC for switch mode power supplies	Boost converter - Discontinuous-conduction mode (DCM) and boundary between CCM and DCM operation	Steady-state analysis of forward converters	EMI and filter design problem	Steady state conversion ratio – Boost converters
S-5	SLO-1	Gate drive basics	Operation and steady state performance of Buck - Boost Converter in continuous-conduction mode (CCM)	Power circuit and steady-state analysis of half-bridge DC-DC converters	Closed loop control of switching power converters	Series resonant DC-DC converters – principle
	SLO-2	Gate drive requirements	Buck - Boost Converter Discontinuous-mode (DCM) and boundary between CCM and DCM operation	Power circuit and steady-state analysis of full bridge DC-DC converters	Selection of controller parameters for converters	Series resonant DC-DC converters – Analysis and operation
S-6	SLO-1	Switching performance and snubber design	Operation and performance of Cuk Converters	Magnetic circuits in isolated topologies	Feedback compensators for converters	Parallel resonant DC-DC converters – principle
	SLO-2	Turn-on and Turn-off snubber	Operation and performance of SEPIC Converters	Utilization of Magnetic circuits in isolated topologies	Design of feedback compensators	Parallel resonant DC-DC converters – Analysis and operation
S-7	SLO-1	Selection of devices	Inductors current ripple design considerations	Comparison of different isolated topologies	Effect of parasitics on the switching converter design	Resonant DC link converters – principle
	SLO-2	Basic heat sink design for the devices	Output voltage ripple design considerations	Selection criteria of different isolated topologies	Stray inductance and inductive coupling effects	Resonant DC link converters – Analysis and operation
S-8	SLO-1	Sources of losses in SMPS	Effect of parasitic elements	Recent advancements of DC –DC converters (current mode, voltage mode)	Digital Control of power converter	Comparison of resonant converter configurations
	SLO-2	Conduction/Switching losses	Choice of switching frequency	Recent advancements of DC –DC converters (multiple output, high frequency output)	Quantization issues in digitally controlled power converters	Selection criteria of resonant converter configurations
S-9	SLO-1	Losses and efficiency in converters	Comparisons of DC –DC converter configurations	Applications of DC-DC converters	Practical issues in controller design	Applications of Resonant converters
	SLO-2	Realistic converter models	Selection criteria of DC –DC converter configurations	Seminar on Recent advancements and applications of DC –DC converters	Seminar on practical issues in controller design for power converters	Seminar on recent advancements and applications of Resonant converters

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Major considerations, Design factors and limitations in machine design*	*Output Equation of DC machine*	*kVA output for single transformers*	*Output equation of three phase induction motor*	*Output equation of synchronous machine*
	SLO-2	*Limitations in machine design*	*Classification of magnetic materials*	*kVA output for three phase transformers*	*Main dimensions of induction motor*	*Main dimensions and pole constructions in synchronous machine*
S-2	SLO-1	*Electrical Engineering Materials introduction*	*Choice of Specific Electric Loading*	*Window space factor*	*Choice of Specific Electric Loading*	*Choice of Specific Electric and Magnetic Loading*
	SLO-2	*Electrical Engineering Materials classification*	*Choice of Specific Magnetic Loading*	*Core area factor*	*Choice of Specific Magnetic Loading*	*Influence of runaway speed*
S-3	SLO-1	*Magnetic Circuits Calculations*	*Problems with main dimensions*	*Design problems of core dimension for single phase transformer*	*Problems with main dimensions*	*Problems in main dimensions including runaway speed*
	SLO-2	*Problems under MMF Calculation*	*Problems with specific loading*	*Design problems of window dimension for single phase transformer*	*Problems with specific loading*	*Problems in main dimensions including pole constructions*
S-4	SLO-1	*Carter's Coefficient and net length of iron*	*Selection of number of poles*	*Design of core and winding*	*Influence of Length of air gap*	*Short Circuit Ratio (SCR) and Effect of SCR on machine performance*
	SLO-2	*Problems under net length of Iron*	*Design problems including pole design*	*design problems in core and winding*	*Design problems including air gap length*	*Estimation of length of air gap*
S-5	SLO-1	*Real and Apparent flux densities*	*Armature Design procedure*	*Design of three phase transformer winding*	*Selecting rotor slots of squirrel cage machines*	*Problems in MMF*
	SLO-2	*Problems based on real and apparent flux densities*	*Problems in designing of armature*	*Problems on three phase transformer design*	*Design procedure of rotor bars, slots and end ring*	*Problems in SCR and air gap length*
S-6	SLO-1	*Temperature gradients in cores and conductors*	*Design of Commutator*	*Temperature rise in Transformers*	*Design procedure of slots*	*Armature design in synchronous machine*
	SLO-2	*Thermal resistivity of winding*	*Design of brushes*	*Transformer Tank design Procedure*	*Design procedure of end ring*	*Problems in armature design*

S-7	SLO-1	*Problems in temperature gradients*	*Problems in designing of commutator*	*Transformer Cooling tube design Procedure*	*Design problems in squirrel cage rotor*	*Procedure for Estimation of air gap length*
	SLO-2	*Problems in thermal resistivity*	*Problems in designing of brushes*	*Transformer Cooling tube design problems*	*Design procedure for wound rotor*	*Problems in air gap length*
S-8	SLO-1	*Indian Standard Specification for conductor, transformer*	*Computer Aided Design of DC machines – Main dimensions*	*Computer Aided Design of transformer-Core design*	*Computer Aided Design of three phase induction motor – Main dimension, stator design, squirrel cage rotor design*	*Overall design of stator*
	SLO-2	*International Electro- Technical commission Publications 34-1, 34-2*	*Computer Aided Design of DC machines – number of poles*	*Computer Aided Design of transformer-winding design*	*Computer Aided Design of three phase induction motor –squirrel cage rotor design*	*Overall design of rotor*
S-9	SLO-1	*Computer Aided Design introduction and uses*	*CAD – Armature design*	*CAD – Tank design*	*Design practices with software tools for stator design*	*CAD – Stator design*
	SLO-2	*Different approaches in Computer Aided Design*	*CAD – Field design*	*CAD – Cooling tube design*	*Design practices with software tools for rotor design*	*CAD – Rotor design*

Course Code	18EEE306T	Course Name	SPECIAL ELECTRICAL MACHINES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Acquire knowledge on Stepper motor and its characteristics*
CLR-2 :	*Understand the concepts of switched reluctance motor and its control.*
CLR-3 :	*Gain knowledge on Permanent magnet DC and BLDC Motors*
CLR-4 :	*Analyze the working principle , operation and control of permanent magnet synchronous motor*
CLR-5 :	*Gain knowledge on the basics of various application based motors*
CLR-6 :	*Understand the overall concepts of various special electrical machines*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Analyze the working and control of Stepper moor*	3	75	75	H	M	-	-	-	-	-	-	-	-	-	-	H	H	-
CLO-2 :	*Illustrate the operation and characteristics of SRM*	2	75	75	H	-	-	-	-	-	-	-	-	-	-	-	L	L	-
CLO-3 :	*Interpret knowledge on PMDC and BLDC motors for real time applications.*	2	75	75	H	-	-	-	-	-	-	-	-	-	-	-	L	L	-
CLO-4 :	*Evaluate the performance of PMSM*	3	75	75	H	M	-	-	M	-	-	-	-	-	-	-	H	H	-
CLO-5 :	*Understand the characteristics of application based motors*	2	75	75	H	-	-	-	-	-	-	-	-	-	-	-	L	L	-
CLO-6 :	*Summarize the characteristics of various special electrical machines.*	2	75	75	H	M	-	-	M	-	-	-	-	-	-	-	M	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Stepper motor*	*Introduction to Switched reluctance motor.*	*Construction of PMDC motor*	*Construction, and types of PMSM*	*Construction of repulsion motors*
	SLO-2	*Variable reluctance motor-Construction-Single Stack*	*Elementary operation of SRM*	*Principle of Working PMDC motor*	*Operation of PMSM*	*working and types of repulsion motors*
S-2	SLO-1	*Single Stack-Modes of Excitation-single phase*	*Machine topology*	*Moving Coil motors*	*EMF equation of PMSM*	*Torque equation of repulsion motor*
	SLO-2	*Half Step On mode*	*Operation of Linear SRM*	*Printed coil motors*	*Torque equation of PMSM*	*Phasor diagram of repulsion motor*
S-3	SLO-1	*Multi Stack Motor-Construction*	*Non Linear Analysis of SRM*	*Shell type motor*	*Voltage equation of PMSM*	*Characteristics of repulsion motor*
	SLO-2	*Modes of Excitation*	*Torque Production -SRM*	*BRUSHLESS –Classification of BLDC motor*	*Phasor diagram*	*Applications of repulsion motor*
S-4	SLO-1	*Hybrid stepper Motor-construction-working*	*Voltage and torque equation of SRM*	*Construction and operation of BLDC MOTOR*	*Performance Characteristics Characteristics of PMSM*	*Universal motor-construction and operation*
	SLO-2	*Types of Stepper motors-single phase stepper motor-Disc magnet type-Claw tooth stepper motor*	*Converter Circuit For SRM With Bifilar Winding*	*Equivalent Circuit And Torque Equation*	*Control of PMSM-Vector control*	*Speed control of universal motor*
S-5	SLO-1	*Torque Equation Of stepper Motor*	*Split Link Circuit -SRM*	*Performance Characteristics of BLDC motor*	*Self control of PMSM*	*Linear induction motor – construction*
	SLO-2	*Windings in stepper motor-Unipolar and Bipolar winding*	*C- Dump Circuit-SRM*	*BRUSHLESS –Classification of BLDC motor*	*Microprocessor based control of PMSM*	*Equivalent Circuit of LIM*
S-6	SLO-1	*Static Characteristics of stepper Motor*	*Converter topology - N + 1, (N +1) diodes*	*Construction and operation of BLDC MOTOR*	*Sensorless control of PMSM*	*characteristics of LIM*
	SLO-2	*Dynamic Characteristics of stepper Motor*	*Control Of SRM -Rotor Position Sensor-Optical Position*	*Electronic commutation -180˚ with magnetic arc and 120˚ with square wave phase currents -star connection*	*POWER controllers - PMSM*	*Control of Linear Induction Motor*
S-7	SLO-1	*Open loop Control of Stepper motors*	*Hall Effect Sensing*	*Electronic commutation -180˚ with square wave phase currents and 120˚ with magnetic arc -Delta connection*	*Operation of PMSM using DC-AC Converter with 120° Mode*	*Linear Reluctance motor- Construction*

	SLO-2	*Closed loop Control of Stepper motors*	*Current Regulators-Hysteresis*	*Control of BLDC motor*	*Operation of PMSM using DC-AC Converter with 180° Mode*	*Linear Reluctance motor – working Principle*
S-8	SLO-1	*Microprocessor –based control of stepper motor*	*Voltage –PWM type regulators*	*Microprocessor based control of BLDC motor*	*Modelling of PMSM Using simulaton tool*	*, Linear Reluctance motor Applications*
	SLO-2	*Problem Solving- torque- stepper motor*	*Microprocessor Based Control Of SRM*	*Comparison-Conventional and BLDC*	*Problem Solving - torque-PMSM*	*Ac Servo motors*
S-9	SLO-1	*Problem Solving- step angle-stepper motor*	*Advantages of SRM over other machines*	*Sensor -less Control of BLDC Motors*	*Problem Solving - speed- PMSM*	*Construction and Working*
	SLO-2	*Applications of Stepper Motors*	*, Applications of SRM motors*	*Applications of BLDC Motors*	*Applications of PMSM*	*Torque speed characteristics of servomotor*

							3	0	0	3

Pre-requisite Courses	18EEC302J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basics of electric drives*
CLR-2 :	*Explain the working of converter/ chopper fed DC drives*
CLR-3 :	*Design controllers for closed loop operation of DC motor drive*
CLR-4 :	*Acquire knowledge on operation and performance of induction motor drives*
CLR-5 :	*Enumerate the different control strategies of synchronous motor drive*
CLR-6 :	*Expose the students to various power converters associated with DC and AC drives*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Enrich the basics of electric drives, multi-quadrant operation*	2	75	75	H	M	M	-	-	-	-	-	-	-	-	-	M	M	-
CLO-2 :	*Study and analyze the operation of four quadrant chopper / rectifier and solve simple problems*	3	75	75	H	M	M	M	M	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Model closed loop DC motor drive and design the current and speed controllers*	3	75	75	H	M	M	M	-	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Analyze the power electronic converter used for the speed control of induction motor drives*	3	75	75	H	M	M	M	M	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Analyze the various control schemes for the speed control of synchronous motor drives*	3	75	75	H	M	M	M	M	-	-	-	-	-	-	-	M	M	-
CLO-6 :	*Analyse the operation of DC and AC drives*	3	75	75	H	M	M	M	M	-	-	-	-	-	-	-	M	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*ElectricDrives: Classification, advantages*	*Review of emf, torque and speed equations*	*Closed loop control of DC drive*	*Review of induction motor torque-speed characteristic*	*Review of synchronous motor torque-speed characteristic*
	SLO-2	*Components of electric drive*	*Review of torque-speed characteristics of DC machine*	*Separately excited DC motor transfer function*	*Equivalent circuit of Induction motor*	*control of synchronous motor*
S-2	SLO-1	*Thermal loading*	*Conventional speed control techniques*	*Modelling closed loop speed control of DC drive using armature voltage control*	*Conventional speed control techniques-Stator side control*	*Separate control of Synchronous motor*
	SLO-2	*Thermal model of motor for heating and cooling*	*Armature and field side control*	*Block diagram of closed loop speed control of DC drive*	*Rotor side control*	*self-control of synchronous motor*
S-3	SLO-1	*Classesofdutycycle*	*DC chopper control strategy*	*Modelling closed loop speed control with inner current controller(P)*	*Inverter control techniques: three-phase PWM generation*	*V/f control of synchronous motor*
	SLO-2	*Determinationofmotor rating – Continuous and intermittent duty*	*Constant and variable frequency control strategies*	*Block diagram of closed loop speed control with inner current controller(P)*	*Sinusoidal modulation*	*VSI fed synchronous motor drive*
S-4	SLO-1	*Simple problems on power rating estimation with Continuous and intermittent duty*	*chopper fed dc motor for speed control- One,two quadrant operation*	*Modelling closed loop speed control with inner current controller(PI)*	*Introduction to vector control*	*Definition of marginal angle*
	SLO-2	*Determinationofmotor rating – short time duty*	*chopper fed dc motor for speed control- four quadrant operation*	*Block diagram of closed loop speed control with inner current controller(PI)*	*Vector control of Induction motor drives*	*Marginal angle control*
S-5	SLO-1	*Determinationofmotor rating – intermittent periodic duty*	*Harmonics and ripple in motor current*	*Modelling closed loop speed control of DC drive with load torque disturbance*	*Conventional space vector modulation.*	*Power factor control*
	SLO-2	*Frequen2cy of operation subjected to intermittent loads*	*Effect on motor performance*	*Block diagram of closed loop speed control of DC drive with load torque disturbance*	*SVPWM for three phase VSI*	*Block diagram for power factor control*
S-6	SLO-1	*Equations governing motor load dynamics*	*Single phase full converter fed separately excited DC motor*	*Modelling DC series motor*	*Introduction to FPGA*	*Recap of single and three phase cycloconverters*

	SLO-2	*Steady state stability at various operating points on Speed –Torque curve*	*Steady state analysis of the drive– continuous conduction*	*Block diagram of DC series motor*	*PWM pulse generation using FPGA*	*Cycloconverter fed synchronous motor*
S-7	SLO-1	*Multi-quadrant Operation*	*Single phase full converter fed separately excited DC motor*	*System response with filters*	*Squirrel cage induction motor: constant V/f control of induction motor*	*Comparison of VSI and CSI fed drives*
	SLO-2	*Real time example for four quadrant operation*	*Steady state analysis of the drive– discontinuous conduction*	*Phase locked loop control*	*Steady-state performance analysis based on equivalent circuit.*	*CSIfed synchronous motor*
S-8	SLO-1	*Components of Load Torques*	*three phase full converter fed separately excited DC motor drive*	*Design of speed controller*	*Impact of rotor resistance on speed torque characteristics – rotor resistance control*	*Permanent magnet synchronous motor*
	SLO-2	*Nature and Classification of Load Torques*	*Steady state analysis of the drive - continuous conduction.*	*Simple problems*	*Derivation for equivalent resistance*	*Closed loop control of PMSM*
S-9	SLO-1	*Need for closed loop control*	*Introduction to software simulation of DC drives.*	*Design of current controller*	*slip power*	*Simulation of induction motor characteristics*
	SLO-2	*Closed loop speed control of drives*	*Chopper based simulation*	*Simple problems*	*slip power recovery schemes - Kramer's drive,Scherbius drive*	*Introduction to software simulation of AC drives.*

Course Code	18EEE402T	Course Name	MODELLING AND ANALYSIS OF ELECTRICAL MACHINES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18EEC204J, 18EEC205J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical & Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Illustrate the reference frame theory*
CLR-2 :	*Formulate the concept of modelling of DC machines*
CLR-3 :	*Understand the theoretical model of synchronous machine*
CLR-4 :	*Derive the mathematical model of poly phase induction machines*
CLR-5 :	*Explain the generalized theory model of a single phase induction machine*
CLR-6 :	*Derive the mathematical model of DC and AC machines*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Outline the basics of rotating reference frame- synchronously and arbitrarily rotating reference frame transformation*	1	75	75	H	H	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Interpret the modelling of DC machines for dynamic and steady state operation*	2	75	75	H	H	H	M	M	-	-	-	-	-	-	-	M	H	-
CLO-3 :	*Construct the mathematical modelling of three phase synchronous machine*	3	75	75	H	H	H	M	H	-	-	-	-	-	-	-	M	H	-
CLO-4 :	*Inspect the mathematical model of poly phase induction machine for electrical simulation studies*	3	75	75	H	H	H	M	H	-	-	-	-	-	-	-	M	H	-
CLO-5 :	*Apply the generalized theory concept for the modelling of single phase induction machine*	3	75	75	H	H	H	M	H	-	-	-	-	-	-	-	M	H	-
CLO-6 :	*Develop a mathematical model of different types of DC and AC machines*	3	75	75	H	H	H	M	H	-	-	-	-	-	-	-	M	H	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Theory of transformation*	*Introduction to DC machine*	*Introduction to Three phase synchronous machine*	*Three phase induction machine- Types*	*Development of generalized theory*
	SLO-2	*Different reference frames*	*Back EMF equation*	*RMF, MMF waveform*	*MMF waveform*	*The general machine representation*
S-2	SLO-1	*Various sign conventions*	*Speed, torque equations*	*Winding model*	*Equivalent circuit*	*Sign Conventions*
	SLO-2	*Reference frame transformations*	*Terminal voltage equations*	*Modelling assumptions*	*Winding model*	*Voltage equations of a general machine*
S-3	SLO-1	*Illustration of how a transformation can result in constant inductances*	*DC machine types*	*Sign convention*	*Modelling assumptions*	*Flux linkage equations of a general machine*
	SLO-2	*Concept of stationary reference frame*	*separately excited, self-excited- Equivalent circuits*	*Stator voltage equations in abc coordinates*	*Sign convention*	*Torque equation of a general machine*
S-4	SLO-1	*Illustration of transformation of stationary circuit variables*	*Speed - torque characteristics*	*Rotor voltage equations in abc coordinates*	*Stator voltage equations in abc coordinates*	*Illustration of application of generalized theory-DC machine model*
	SLO-2	*Concept of synchronously rotating reference frame*	*Electromechanical model of DC machine*	*Stator flux linkage equations in abc coordinates*	*Rotor voltage equations in abc coordinates, Induction machine: torque equations in abc*	*DC machine model-voltage and flux linkage equations*
S-5	SLO-1	*Concept of arbitrarily rotating reference frame*	*State equations of armature current and speed of DC motor*	*Rotor flux linkage equations in abc coordinates*	*Stator flux linkage equations in abc coordinates*	*DC machine model-Torque equation*
	SLO-2	*Transformation: stationary circuit variables to arbitrary reference frame*	*State-space model of DC machines*	*Stator self-inductance calculation*	*Rotor flux linkage equations in abc coordinates*	*Existing theories for explanation of single phase Induction motor operation, revolving field theory*
S-6	SLO-1	*Illustration of transformation of stationary circuit variables-Resistive elements*	*Transfer function model of DC machines*	*Stator to rotor Mutual-inductance calculation*	*Stator self-inductance calculation*	*MMF and Flux waves, Torque components*

	SLO-2	*Illustration of transformation of stationary circuit variables-Inductive elements*	*Steady state response of DC machines*	*Rotor to Stator Mutual-inductance calculation*	*Stator to rotor and Rotor to Stator, Mutual-inductance calculation*	*Application of generalized theory to single-phase induction motor*
S-7	SLO-1	*Illustration of transformation of stationary circuit variables-Capacitive elements*	*Dynamic characteristics of DC machines*	*Rotor self –inductance calculation*	*Rotor self –inductance calculation*	*Voltage equations of single-phase induction machine*
	SLO-2	*Transformations between reference frames x and y*	*The effect on speed for simultaneous change in input voltage and load torque of DC machine*	*Park's transformation*	*Reference frame transformation*	*Flux linkage equations single-phase induction motor*
S-8	SLO-1	*Transformation of a balanced set to an arbitrarily rotating reference frame (ARF)*	*Calculation of efficiency and starting torque of DC separately excited machine.*	*Voltage equations in dqo reference frame (Park's equations)*	*Voltage equations in arbitrary reference frame*	*Torque equation of single-phase induction motor*
	SLO-2	*Numerical example of transformation to arbitrary reference frame*	*Calculation of speed of DC machine from steady state equations*	*Flux linkage equations in (dqo) rotor reference frame*	*Flux linkage equations arbitrary reference frame,*	*Equivalent circuit of single phase induction machine*
S-9	SLO-1	*Transformation to a synchronously rotating reference frame (SRF), Balanced steady-state phasor relationships*	*Calculation of armature torque and load torque of DC separately excited machine*	*Synchronous machine torque equations in abc and dq variables , Steady state equations in dq variables*	*Induction machine: torque equations in reference frame variable, Steady state equations in dq variables*	*Numerical example to illustrate steady-state computation of single phase induction machine*
	SLO-2	*Summary – various reference frames*	*Computer simulation of DC machine dynamics using transfer function*	*Steady State analysis of Synchronous machine using simulation software*	*Computer simulation of induction motor dynamics in arbitrary reference frame*	*Validation of single phase induction machine model using simulation software*

Course Code	18EEE403T	Course Name	HYBRID ELECTRIC VEHICLES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical & Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Classify the various types of EVs and the power flow involved*
CLR-2 :	*Explain and analyze the storage and battery technologies in EVs*
CLR-3 :	*Discuss and design the various power electronic (PE) topologies involved in EVs*
CLR-4 :	*Analyze the machines and its drives for the propulsion of EVs*
CLR-5 :	*Explain the emerging technologies in EVs*
CLR-6 :	*Create an EV with new and advanced PE topologies and storage systems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Infer knowledge about the basics of power flow in electric vehicles*	*2*	*75*	*75*	*H*	*L*	*L*	-	-	-	-	-	-	-	-	-	-	*H*	-
CLO-2 :	*Understand and model a battery energy storage system for EV*	*2*	*75*	*75*	*H*	*L*	*M*	*M*	*M*	-	-	-	-	-	-	-	*M*	*H*	*L*
CLO-3 :	*Acquire knowledge and develop the various PE converters involved in EV*	*3*	*75*	*75*	*H*	*M*	*M*	*M*	*M*	-	-	-	*L*	-	-	-	*M*	*H*	-
CLO-4 :	*Analyze the various machines and drives involved in EVs*	*3*	*75*	*75*	*H*	*M*	*L*	*L*	*M*	-	-	-	*M*	-	-	-	*M*	*H*	-
CLO-5 :	*Design and describe the future enhancement in EVs*	*3*	*75*	*75*	*H*	*M*	*M*	*M*	*M*	*L*	*L*	-	*M*	-	-	-	*H*	*H*	*L*
CLO-6 :	*Develop an EV with batteries, new PE topologies and drives*	*3*	*75*	*75*	*H*	*M*	*M*	*M*	*M*	*L*	*L*	-	*M*	-	-	-	*H*	*M*	*L*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Electric Vehicles*	*Introduction to Energy Storage system*	*Introduction to charging and requirements of a charging system*	*Introduction to starting system*	*Introduction to the emerging trends in EVs*
	SLO-2	*History of electric vehicles and hybrid electric vehicles*	*Battery Requirements for HEVs, PHEVs, and EVs.*	*Principles of charging system*	*Requirements of a starting system*	*Electric Vehicle Supply Equipments*
S-2	SLO-1	*Social and environmental importance of hybrid and electric vehicles*	*Types of batteries*	*Alternators and charging circuits*	*Principles of starting system*	*Smart vehicles in smart grid*
	SLO-2	*Key challenges of hybrid and electric vehicles*	*Battery characterization*	*Diagnosing charging system faults*	*Various drive system for the transmission of EV*	*Smart vehicles in smart grid*
S-3	SLO-1	*Basics of EV*	*Working principle and construction of lead-acid battery*	*Rectifiers/Inverters for HEV*	*DC/DC chopper based two, four quadrant operations of DC drives - Configuration*	*Vehicle-to-grid technologies*
	SLO-2	*Basics of HEV, PHEV*	*Working principle and construction of nickel cadmium battery*	*Battery chargers: High frequency transformer based bidirectional DC-DC converter*	*DC/DC chopper based two, four quadrant operations of DC drives - Control*	*Vehicle-to-grid technologies*
S-4	SLO-1	*Concept of EV*	*Working principle and construction of nickel metal hydride battery*	*Isolated bidirectional DC-DC converter*	*Inverter based V/f Operation (motoring and braking) of induction motor drive system - Configuration*	*Vehicle-to-grid technologies: Unidirectional*
	SLO-2	*Configurations of EV*	*Working principle and construction of lithium ion battery*	*Half bridge DC-DC converter*	*Inverter based V/f Operation (motoring and braking) of induction motor drive system - Control*	*Vehicle-to-grid technologies: Bidirectional*
S-5	SLO-1	*Concept of Series HEV*	*Diagnosing battery faults.*	*Full bridge DC-DC converter*	*Permanent magnet motor based vector control operation – Configuration*	*Charging Station Selection (CSS) server*
	SLO-2	*Configurations of Series HEV*	*Basic battery modeling: Static and dynamic electric circuit model*	*Four quadrant operation of DC-DC converter*	*Permanent magnet motor based vector control operation –Control*	*Need of Charging Station Selection (CSS) server*
S-6	SLO-1	*Concept of Parallel HEV*	*Battery charging control*	*Flyback converter*	*SRM drives – Configuration*	*Smart grid technologies*

	SLO-2	*Configurations of Parallel HEV (Mechanical Coupling)*	*Battery charging control*	*Cell balancing converters: Active and Passive balancing methods*	*SRM drives –Converter and modes of operation*	*Smart grid technologies: Applications and Benefits*
S-7	SLO-1	*Configurations of Parallel HEV (Torque Coupling)*	*Ultra-capacitor: Symmetrical and asymmetrical – Introduction and Operation*	*Wireless Charging –Inductive Charging*	*Types of starters for motors in EV*	*Smart meter*
	SLO-2	*Configurations of Parallel HEV (Speed Coupling)*	*Ultra-capacitor modeling*	*Wireless Charging –Conductive Charging*	*Diagnosing starter faults*	*Smart meter: Purpose and benefits*
S-8	SLO-1	*Power train components*	*Operation of flywheel and fuel cell*	*Advanced charging system technology*	*Advanced starting system technology*	*Smart charger*
	SLO-2	*Vehicle model*	*Operation of hydraulic energy storage system*	*New developments in charging systems*	*New developments in starting systems*	*Smart charger: Purpose and benefits*
S-9	SLO-1	*EV power train component sizing*	*Simulation of battery model*	*Simulation of any PE converter for EV*	*Simulation and implementation of PE converter fed drives for EVs*	*Technical talk on any new emerging trend in EVs*
	SLO-2	*EV power train component sizing*	*Simulation of ultra-capacitor model*	*Simulation of any PE converter for EV*	*Simulation and implementation of PE converter fed drives for EVs*	*Technical talk on any new emerging trend in EVs*

Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn the fundamental principle and fabrication of PV cell*
CLR-2 :	*Study about PV characteristics and MPPT algorithms*
CLR-3 :	*Utilize the various components and installation of standalone PV system*
CLR-4 :	*Study about the PV integration with utility grid*
CLR-5 :	*Know net metering and applications of Photovoltaic systems*
CLR-6 :	*Model a solar photovoltaic system*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the basics of PV energy conversion and cell fabrication*	2	80	75	H	M	M	-	-	-	M	-	-	-	-	-	H	M	-
CLO-2 :	*Acquire knowledge about PV module and MPPT techniques*	3	80	75	H	M	M	-	M	-	M	-	-	-	-	-	M	M	-
CLO-3 :	*Design stand-alone PV system*	3	80	75	H	M	M	M	-	-	H	H	M	M	-	-	H	M	M
CLO-4 :	*Analyze grid connected PV system*	3	80	75	H	M	M	M	-	-	-	-	-	-	-	-	H	H	-
CLO-5 :	*Develop a PV system for various applications*	3	80	75	H	M	M	M	-	-	-	-	-	-	-	-	H	M	-
CLO-6 :	*Design a photovoltaic on grid and off grid system*	3	80	75	H	M	M	M	M	-	M	H	M	M	-	-	H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Global energy scenario*	*I-V,PV characteristics of a PV*	*Classification of PV systems*	*Grid Interactive PV System.*	*Need for Metering, Types of metering*
	SLO-2	*Indian energy scenario*	*Modelling of PV*	*Central Power Station System , Distributed PV System*	*Principle components in Grid –PV system*	*Concepts in Grid Tie systems*
S-2	SLO-1	*Historical development of PV*	*Short Circuit, Open Circuit and peak power parameters*	*Stand alone PV System*	*Classification of Grid Tie Inverters*	*Net metering and its importance*
	SLO-2	*Photovoltaic cell technologies*	*Datasheet study, Cell efficiency*	*Components of standalone PV connected system*	*Working Central inverter, String Inverter, Micro Inverter.*	*Net metering benefits, policies*
S-3	SLO-1	*Basics of energy from sun: Insolation, irradiance, Solar constant*	*Effect of irradiation and temperature*	*Charge controllers*	*Grid-connected single phase PV inverter schemes*	*PV potential and facilities in rural areas*
	SLO-2	*Insolation variation with time of day, Earth centric viewpoint and declination*	*Shading impacts ,Fill factor*	*Batteries*	*Grid-connected PV control*	*Electrifying rural and remote areas using PV*
S-4	SLO-1	*Solar geometry*	*Solar PV Module and its parameters*	*Inverter control topologies*	*Power processing schemes based on single string, multi-string*	*Introduction to hybrid PV system*
	SLO-2	*Description of the solar spectrum*	*Specifications of Solar PV Module*	*Stand-alone connection of PV modules to a battery and load*	*AC module technologies*	*Smart grid*
S-5	SLO-1	*Sun position, sun path diagrams, solar and clock times*	*Parallel and series connections. Identical cells Non-identical cells connection*	*Energy storage alternatives for PV systems.*	*Sizing the inverter*	*Case studies on Solar PV Power Plant*
	SLO-2	*Solar radiation measurements, resource of solar data.*	*Protecting cells in series and parallel, Interconnecting modules*	*Storage batteries, lead-acid, nickel-cadmium, nickel-metal-hydride and lithium type batteries.*	*PV system sizing, efficiency*	*Survey on existing solar PV system*
S-6	SLO-1	*Photovoltaic effect - Principle of direct solar energy conversion into electricity in a solar cell system.*	*Estimation and Measurement of PV Module Power*	*Small storage systems employing ultra capacitors, charging and discharging properties*	*Transformer less inverter topologies for grid connected PV applications*	*Design and Development of PV vehicle charging system*
	SLO-2	*Semiconductor properties semiconductor physics*	*Selection of PV Module, Interfacing PV modules to loads*	*Modeling of batteries load estimation, battery sizing*	*Centralized grid-connected three-phase inverters for large PV installations*	*PV powered lighting, Solar Lantern, LED for building etc*

S-7	SLO-1	*Solar cell - p-n Junction, Solar cell- basic structure*	*PV cell simulation*	*Design and Installation of a standalone PV system*	*Design related issues; grounding, dc arcing, islanding*	*PV water pumping, DC and AC pump drive*
	SLO-2	*Solar cell materials ,its properties and construction*	*Simulation of PV cells in series and parallel.*	*Mechanical Considerations for PV installation*	*Harmonic content, reactive power, wiring issues,electro-magnetic interference*	*PV applications in aircraft, power satellites.*
S-8	SLO-1	*Types of solar cells :crystalline, multi-crystalline, thin film silicon solar cells, etc*	*Maximum power point concept*	*Trouble shooting of Standalone Solar PV System*	*Interfacing with the power grid economic considerations*	*Socio-economic and environmental impacts of PV system*
	SLO-2	*Commercial Si solar cells, recent development in materials used for solar cell*	*Power conditioning and maximum power point tracking*	*Maintenance of Solar PV System*	*Energy yield of grid connected PV installation- Cost and Investment*	*PV in portable devices*
S-9	SLO-1	*Solar cells fabrication*	*MPPT basic Algorithms overview*	*Safety in installation of Solar PV System*	*Modeling of stand-alone and grid-connected PV systems*	*Impact of high PV penetration in power system*
	SLO-2	*Process involved solar cell fabrication technologies*	*MPPT algorithms based on buck- and boost-converter topologies*	*Codes and standards Related to PV Systems: National Electric Code(NEC) and IEEE Standard 1547*	*Simulation of stand-alone and grid-connected PV systems*	*Markets for photovoltaic systems*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Value of Energy Management*	*Power supply of an electrical motor driven system*	*Introduction to Energy management systems(EMS)*	*Introduction of SCADA*	*Introduction to Power System Automation*
	SLO-2	*Total Quality Management*	*Effects of Unbalanced Voltages on The Performance of Poly-phase Squirrel-Cage Induction Motors*	*Usage of EMS*	*SCADA Systems*	*Benefits of Power System Automation*
S-2	SLO-1	*Energy Management Profession*	*Glossary of frequently occurring motor terms*	*Direct Digital Control*	*Evolution of SCADA*	*Functional structure of Power System Automation*
	SLO-2	*Energy Management skills*	*Design , Load types and torque of motor*	*Objectives of an EMCS using DDC*	*Objectives of SCADA*	*Architecture For Power System Automation*
S-3	SLO-1	*Principles of Energy Management*	*Power factor of motor*	*Hardware used in Energy management systems*	*Benefits of SCADA*	*Classification of Power System Automation- Substation Automation*
	SLO-2	*Some Suggested Principles of Energy Management*	*Benefits and correction of power factor*	*Advantages of Hardware used in Energy management systems*	*SCADA in Process Control*	*Classification of Power System Automation- Distribution Automation*
S-4	SLO-1	*Introduction to Energy Management Program*	*Electric motor design to operate at varying load conditions*	*Software used in Energy management systems*	*Usage of SCADA*	*Implementation Of Power System Automation Using SCADA*
	SLO-2	*Components of Comprehensive Energy Management Program*	*Determining Electric Motor Operating Loads*	*Effectiveness of the Software Control Logic*	*Real-Time Monitoring and Control using SCADA*	*Implementation Of Power System Protection Using SCADA*
S-5	SLO-1	*Organizational Structure*	*Power meter to measure unit operation*	*Control Strategies*	*Functions of SCADA*	*SCADA Based Model for Automation*
	SLO-2	*Energy manager , Team and Employees*	*Selection of Equipment for Power Measurement and Surveys*	*Routines of Control Strategies*	*SCADA Applications*	*SCADA Based Model Digital Protection*
S-6	SLO-1	*Energy Policy Objectives and Accountability*	*Slip measurement of motor*	*Justification of Energy Management Control Systems(EMCSs)*	*SCADA Hardware*	*Introduction to Applications of SCADA*
	SLO-2	*Energy Policy Reporting and Training*	*Amperage Readings*	*EMCSs Functions*	*SCADA Hardware Functions*	*SCADA Applications in Power Systems:*
S-7	SLO-1	*Energy Planning*	*Amperage Readings of Electric motor*	*EMCS opportunity*	*RTU Standards*	*Expected Benefits of SCADA for Power Systems*

	SLO-2	*Audit Planning*	*Electric Motor efficiency*	*EMCS for an building*	*Difference between PLC and RTU*	*SCADA for Power Utility Network*
S-8	SLO-1	*Educational Planning*	*Comparing Motors based on efficiency*	*EMCS Retrofit*	*Features of SCADA*	*Components of SCADA Applications*
	SLO-2	*Strategic Planning*	*Sensitivity of Load To Motor Rpm*	*New Construction EMCS*	*Software of SCADA*	*Introduction to IEC 61850 Standard for SCADA*
S-9	SLO-1	*Energy Reporting*	*Motor Performance Management Process(MPMP)*	*System Integration*	*Protocols of SCADA, DNP (Distributed Network Protocol)*	*Intelligent Electronic Devices (IEDs)*
	SLO-2	*Energy Ownership*	*How To Start MPMP*	*Specifics of Software Logic*	*Protocols of SCADA, IEC (International Electro Technical Commission)*	*Substation Automation System (SAS) using IED:*

18EEE327T Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basic operation of non conventional energy sources*
CLR-2 :	*Gain the knowledge about PV system*
CLR-3 :	*Acquire the knowledge of wind power Generation*
CLR-4 :	*Explain the energy production from Biomass and OTEC*
CLR-5 :	*Describe the working of Battery, Flywheel, Ultra Capacitors, micro-turbines*
CLR-6 :	*Acquire the Knowledge of Nonconventional energy sources*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	Learning 2 Expected Proficiency (%)	Learning 3 Expected Attainment (%)	PLO 1 Engineering Knowledge	PLO 2 Problem Analysis	PLO 3 Design & Development	PLO 4 Analysis, Design, Research	PLO 5 Modern Tool Usage	PLO 6 Society & Culture	PLO 7 Environment & Sustainability	PLO 8 Ethics	PLO 9 Individual & Team Work	PLO 10 Communication	PLO 11 Project Mgt. & Finance	PLO 12 Life Long Learning	PLO 13 PSO - 1	PLO 14 PSO - 2	PLO 15 PSO - 3
CLO-1 :	*Describe the basic operation of PV,wind,Fuel cell, Micro turbine, Biomass, Tidal power generation*	*1*	*75*	*75*	*H*	-	-	-	-	-	*M*	-	-	-	-	-	*M*	*M*	*L*
CLO-2 :	*Develop the knowledge of PV collector types and know the technical parameters*	*2*	*75*	*75*	*H*	*M*	-	-	-	-	*M*	-	-	-	-	-	*M*	*M*	*L*
CLO-3 :	*Distinguish different types of wind turbine and know the technical parameters*	*2*	*75*	*75*	*H*	*M*	-	-	-	-	*M*	-	-	-	-	-	*M*	*M*	*L*
CLO-4 :	*Summarize the functions of Biomass and OTEC*	*1*	*75*	*75*	*H*	-	-	-	-	-	*M*	-	-	-	-	-	*M*	*M*	*L*
CLO-5 :	*Realize the functions of Battery, Flywheel, Ultra Capacitors, micro-turbines*	*2*	*75*	*75*	*H*	-	-	-	-	-	*M*	-	-	-	-	-	*M*	*M*	*L*
CLO-6 :	*Develop the knowledge of the fundamental operation of unconventional energy sources*	*2*	*75*	*75*	*H*	*M*	-	-	-	-	*M*	-	-	-	-	-	*M*	*M*	*L*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Definition, Concepts of Non Conventional Energy Sources*	*Definition, Solar radiation data*	*Energy available from wind*	*Biomass Resources*	*Energy storage, Battery – types*
	SLO-2	*Limitations of Non Conventional Energy Sources*	*solar energy conversion in to heat*	*General formula, Lift and drag etc*	*Biofuels*	*Equivalent circuit*
S-2	SLO-1	*Energy needs of India, and energy consumption patterns*	*Solar Radiation Measurement*	*Basis of Wind energy conversion*	*Biomass Conversion Routes*	*Performance characteristics*
	SLO-2	*Worldwide Potentials of these sources.*	*Types of Measurement*	*Basic components of wind energy conversion*	*Combustion, Gasification*	*Battery design*
S-3	SLO-1	*Energy efficiency and energy security*	*Flat plate and Concentrating collectors*	*Effect of density, Frequency variances,*	*Anaerobic Digestion*	*Charging and charge regulators*
	SLO-2	*Energy and its environmental impacts*	*Principle of natural and forced convection*	*Angle of attack, Wind speed*	*Pyrolysis*	*Battery management*
S-4	SLO-1	*Technical impact of Distributed generation*	*Energy Storage of PV system*	*Choice of generators*	*Cogeneration*	*Flywheel-energy relations*
	SLO-2	*Economical impact of Distributed generation*	*Case studies of Solar thermal systems for residential water heating*	*Turbine rating, electrical load matching*	*Biogas plants*	*Components of Flywheel*
S-5	SLO-1	*Concept of distributed generations, topologies, selection of sources*	*Industrial heating*	*Variable speed operation*	*Energy recovery from Urban waste*	*Benefits over battery*
	SLO-2	*regulatory standards/ framework*	*Solar power generation*	*Maximum power operation*	*.Energy recovery from liquid waste*	*Introduction to Ultra Capacitors*
S-6	SLO-1	*Definition of Distributed Generation*	*Concept of Maximum Power Point Tracking*	*control systems, system design features,*	*Types of Biomass plant*	*Working Principle of Ultra Capacitors*
	SLO-2	*Classification of Distributed Generation*	*Types of MPPT*	*Windmill rotors, Horizontal axis*	*Performance analysis of Biomass*	*Testing of Ultra capacitor*
S-7	SLO-1	*DG installation classes*	*DC Power Conditioning Converters*	*Vertical axis rotors*	*Testing Biomass systems*	*Applications*
	SLO-2	*Security issues in DG implementations.*	*Types of converter*	*Induction type generators,*	*Thermal applications*	*Fuel Cells – Principle of Operation*
S-8	SLO-1	*Distributed Generation Impact on Coordinated Relay Protection*	*AC Power Conditioning –Inverters*	*Working principle of wind power plant*	*Power generation*	*Performance characteristics*

	SLO-2	*Classification of NCES, Solar, Wind,*	*Types of inverter*	*Determination of torque coefficient*	*Principles of tidal and wave power generations*	*Applications*
S-9	SLO-1	*Geothermal, Biomass, Ocean energy sources,*	*Testing of PV systems*	*Standalone connected operations*	*Open cycle OTEC*	*micro-turbines- Principle -of Operation*
	SLO-2	*Comparison of these energy sources*	*Type of testing of PV system*	*Grid connected operations*	*Closed cycle OTEC*	*Advantages and Disadvantages of Microturbine*

Course Code	18EEE404T	Course Name	DISTRIBUTED GENERATION AND MICRO GRID	Course Category	E	Professional elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basic operation of non-conventional energy sources*
CLR-2 :	*Gain knowledge of IEEE rules applied for distributed generation*
CLR-3 :	*Discuss the concept of microgrid*
CLR-4 :	*Acquire the knowledge on the control algorithms of microgrid*
CLR-5 :	*Examine the behavior of microgrid under Faulty condition*
CLR-6 :	*Acquire the Knowledge of Micro grid*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	Program Learning Outcomes (PLO) 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Summarize the basic operation of PV, Wind, Fuel cell, Micro turbine, Biomass, Tidal power generation*	*1*	*75*	*75*	*H*	*M*	*M*	-	-	-	*H*	-	-	-	-	-	*M*	*M*	*H*
CLO-2 :	*Interpret the standards required for distributed Generation*	*1*	*75*	*75*	*H*	-	-	-	-	-	*H*	*H*	-	-	-	-	*M*	*M*	*H*
CLO-3 :	*Describe Islanding process and Distributed Generation impact on Coordinated Relay Protection*	*2*	*75*	*75*	*H*	*M*	*M*	-	-	-	*M*	-	-	-	-	-	*M*	*M*	*M*
CLO-4 :	*Apply the knowledge on the control concept and interface devices*	*2*	*75*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-5 :	*Analyze protection schemes adopted to the microgrid*	*3*	*75*	*75*	*H*	*M*	*M*	*L*	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-6 :	*Develop the knowledge of fundamental operation of Micro grid*	*3*	*75*	*75*	*H*	*M*	*M*	*L*	-	-	*H*	*M*	-	-	-	-	*M*	*M*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Conventional power generation: advantages and disadvantages*	*Concept of distributed generations*	*Concept and definition of microgrid*	*Typical structure and configuration of a microgrid*	*Modelling of Microgrid*
	SLO-2	*Energy crises, Nonconventional energy (NCE) resources*	*topologies, selection of sources, regulatory standards/ framework*	*microgrid drivers and benefits*	*AC and DC microgrids*	*Concept of per unit*
S-2	SLO-1	*Review of Solar PV*	*Classification of Distributed Generation*	*review of sources of microgrids*	*Control techniques applied to micrgrid*	*DC Microgrid*
	SLO-2	*Solar Radiation Measurement*	*DG installation classes*	*P-f and Q-V control*	*Concept of Space Vector Modulation*	*AC Microgrid*
S-3	SLO-1	*Introduction to Wind Energy systems*	*IEEE 1547 – Standard for Interconnecting Distributed Resources with Electric Power Systems*	*ISLANDING - Significance of Islanding Detection*	*Concept of synchronizing*	*Technical issues of Micro grid*
	SLO-2	*Basic components of wind energy conversion*	*Purpose and Limitations*	*Effects of Islanding Phenomena*	*Synchronizing methods*	*Power loss and Voltage raise*
S-4	SLO-1	*Types of wind energy collectors*	*IEEE 1547.1 standard Conformance Test*	*Islanding Detection Techniques- Active Detection*	*Enhanced Interface Devices*	*Protection scheme for grid-connected mode*
	SLO-2	*Concept of Maximum Power Point Tracking*	*Purpose and Limitations*	*Passive Detection*	*Dynamic Voltage Restorer*	*Thermal issues*
S-5	SLO-1	*Introduction to fuel cell*	*IEEE 1547.4 – Guide for Design, Operation and Integration*	*Optimal Power Sharing*	*Constant Voltage Transformers*	*Power quality issues in microgrids*
	SLO-2	*Fuel Cells – Principle of Operation*	*Purpose and Limitations*	*Microgrid with Multiple Distributed Generators*	*Noise Filters*	*Solution methods*
S-6	SLO-1	*Introduction to Micro turbines*	*IEEE 1547.8 Recommended practice for Establishing methods and Procedures*	*Optimal sizing and Sitting of DG*	*Isolation Transformers*	*Stability issues in micro grid*
	SLO-2	*Micro-turbines- Principle of Operation*	*Purpose and Limitations*	*Peak Shaving Potential of a Microgrid*	*Static VAR Compensators*	*Solution methods*

S-7	SLO-1	*Biomass- Biomass Resources, Biofuels*	*Energy storage elements - Batteries*	*Operating modes of DG- Grid connected*	*Harmonic Filters*	*Economic impact of DG*
	SLO-2	*Biomass Conversion Technologies*	*Principle of operation*	*Operating modes of autonomous mode*	*Microgrid Operation Strategies*	*Barriers to DG Development*
S-8	SLO-1	*Energy recovery from Urban waste*	*ultra-capacitors*	*Concept of reverse power flow*	*MicroGrids and Traditional Power*	*Configuration of SCADA*
	SLO-2	*.Energy recovery from liquid waste*	*Principle of operation*	*Distributed Generation Impact on Coordinated Relay Protection*	*System Economics*	*Energy Management System*
S-9	SLO-1	*Principles of tidal and wave power generations*	*Flywheels*	*Adaptive relaying*	*Case Studies : Microgrid Economics*	*active distribution networks Distributed control system (DCS)*
	SLO-2	*Open cycle OTEC and closed cycle OTEC*	*Principle of operation*	*Fault Limiters*	*Economic Issues Between MicroGrids and the Bulk Power Systems*	*Impact of EV on micro grid*

Course Code	18EEE405T	Course Name	POWER ELECTRONICS IN RENEWABLE ENERGY SYSTEM	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Educate the students on contemporary development in renewable energy studies*
CLR-2 :	*Design and analyze the power converters for PV applications*
CLR-3 :	*Understand the significance of the power converters for wind energy conversion system*
CLR-4 :	*Create insights into the concept of fuel energy system and its power conditioning system*
CLR-5 :	*Enrich the concept of hybrid renewable energy systems and multiport converters*
CLR-6 :	*Create overall structure for integrating renewable electricity on the grid*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Acquire knowledge on renewable energy sources and their characteristics*	2	80	75	H	M	M	-	-	-	M	-	-	-	-	-	H	M	-
CLO-2 :	*Select and design the components of a power converter for PV system*	3	80	75	H	M	M	-	M	-	M	-	-	-	-	-	M	M	-
CLO-3 :	*Propose an appropriate power converter for wind energy conversion system*	3	80	75	H	M	M	-	M	-	M	-	-	-	-	-	H	M	-
CLO-4 :	*Choose a suitable converter topology for fuel cell-based energy system*	3	80	75	H	M	M	-	-	-	M	-	-	-	-	-	H	H	-
CLO-5 :	*Analyze various hybrid energy system for various applications*	3	80	75	H	-	-	-	-	-	M	-	-	-	-	-	H	M	-
CLO-6 :	*Design the building blocks of the renewable energy conversion system*	3	80	75	H	M	M	-	M	-	M	-	-	-	-	-	H	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Present scenario of renewable energy sources in India*	*Photovoltaic system components*	*Components of a wind energy conversion system*	*Basic overview of fuel cell currently under development*	*Need for Hybrid Systems*
	SLO-2	*Solar, wind, ocean, Biomass, Fuel cell and geothermal resources.*	*Factor influencing output*	*Site selection consideration*	*Applications and markets- Portable and stationary application*	*Types of Hybrid system*
S-2	SLO-1	*Factors influencing the amount of GHG emission*	*Types of PV system*	*Wind generators-Introduction*	*Fuel cell design levels: The unit cell, the stack, and the system*	*wind-diesel hybrid system*
	SLO-2	*Impacts of renewable energy generation on environment*	*Stand-alone PV system and grid connected PV system*	*Classification of wind generators*	*Types of fuel cell and its comparative study*	*PV-Diesel hybrid system*
S-3	SLO-1	*Basic principle of photovoltaic Energy Conversion*	*PV and IV characteristics*	*Power output performance characteristics*	*Chemical reaction in various fuel cell*	*PV-hydro hybrid system*
	SLO-2	*PV materials*	*Modeling of PV system*	*Modeling of wind energy conversion system*	*Components of fuel cell- Electrolytes and catalyst*	*Biomass-PV-diesel hybrid system*
S-4	SLO-1	*Issues associated with the tapping of solar energy*	*Factors to be considered for the selection of inverter and batteries for solar energy conversion*	*Matrix converters*	*Thermodynamic and electrochemical principles of hydrogen fuel cell*	*Economic, technical and sustainability issues involved in the integration of hybrid renewable energy systems*
	SLO-2	*Limitations of solar power*	*Sizing the solar arrays*	*Limitations in the operation of matrix converter.*	*High temperature fuel cell*	*Current status of solar-wind hybrid renewable energy system*
S-5	SLO-1	*Wind resource assessment*	*Batteries for solar panel*	*Synchronized operation with grid supply*	*Fuel cell power system*	*Hybrid system characteristics*
	SLO-2	*wind energy pattern for a particular location*	*various aspects of battery sizing*	*Harmonic distortion*	*MPPT techniques for fuel cell*	*Various power quality issues hybrid renewable power system*
S-6	SLO-1	*Basic principle of wind energy conversion*	*DC power conditioning converters*	*Standards used for grid integration- Grid connection requirement of renewable power system.*	*Design consideration of power electronics converters for fuel cell system*	*Merits of Hybrid RES over the isolated RES*

	SLO-2	*Power in wind –Betz limit*	*AC Power conditioning converters*	*Disturbances from power conditioning devices on the power grid- Power quality issues*	*Power conversion and control strategies*	*Case studies on wind-PV maximum power tracking system*
S-7	SLO-1	*Net metering concept*	*Basic non-isolated converters*	*problems in grid integrated WECS*	*Issues in fuel cell power conditioning system*	*Multi-port DC-DC converter*
	SLO-2	*Repowering concept*	*Isolated dc-dc converters*	*Impact of wind power penetration in power grid*	*Fuel cell power conditioning for electric power applications*	*Flux additive dc-dc converter*
S-8	SLO-1	*Hydrogen energy system*	*Converter dynamics and control*	*Design and optimization of renewable energy system*	*High gain dc-dc converters for fuel cell based electric vehicle*	*Hybrid controller*
	SLO-2	*Hydrogen energy to generate electric power*	*Bidirectional inverter system*	*Simulation software for distributed generation power system*	*Operating principles of high gain dc-dc converter*	*Major features of hybrid system.*
S-9	SLO-1	*Working principle of fuel cell*	*Simulation of PV and IV characteristics*	*Simulation of Sizing, and analysis of WECS*	*Reliability study on fuel cell*	*Merits and demerits of various renewable energy technologies*
	SLO-2	*Fuel cell characteristics*	*Simulation of Sizing, and analysis of photovoltaic systems.*	*Simulation of power electronic converters for WECS*	*Recent research in fuel cell technology*	*Application of various renewable energy technologies.*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Solar radiation*	*Solar cell- module-array*	*Battery storage autonomy*	*Wind resources nature*	*Characteristics of WECS*
	SLO-2	*Beam and diffuse radiation*	*Electrical characteristics of the solar cell*	*State of Charge (SOC)*	*Occurrence of wind Power in the wind*	*Principle of operation and analysis of WECS*
S-2	SLO-1	*Solar constant, earth*	*Equivalent circuit*	*Depth of Discharge(DOD)*	*Wind characteristics*	*Types of generators: IG, PMSG, SCIG*
	SLO-2	*Sun angles*	*Modeling of solar cells including the effects of temperature*	*Types of battery*	*Principles of wind energy conversions*	*DFIG*
S-3	SLO-1	*Attenuation of solar radiation*	*Irradiation and series/shunt resistances on the open-circuit voltage*	*Types of mechanical tracking*	*Components of wind energy conversions system (WECS) Aerodynamics of wind turbine*	*Grid Connected WECS*
	SLO-2	*Measurement of solar radiation*	*Irradiation and series/shunt resistances on the short-circuit current.*	*Significance of MPPT*	*Wind data*	*Grid connectors concepts*
S-4	SLO-1	*Local solar time, derived solar angles*	*IV characteristics of solar cell*	*Types of MPPT*	*HAWT, VAWT, power developed,thrust, efficiency*	*Wind farm and its accessories*
	SLO-2	*Sunrise, sunset and day length. Flat plate collectors*	*Shadow effects*	*Mitigation techniques of shadow analysis*	*Rotor selection*	*Systems forfeeding into the grid*
S-5	SLO-1	*Declination angle*	*Bypass diodes*	*Street lighting*	*Rotor design considerations*	*Induction Generators for direct grid coupling*
	SLO-2	*Solar window, cosine law*	*Hot spot problem in a PV module*	*Solar distillation*	*Tip speed ratio*	*Challenges in Grid connected wind power*
S-6	SLO-1	*Calculation of angle of incidence*	*Safe operating area*	*Solar air heaters, types*	*Number of blades, blade profile*	*Asynchronousgenerators in static cascades*
	SLO-2	*Seasonal variations, daily variation*	*Temperature effects of solar PV module*	*Active solar heaters*	*Power regulation*	*Power evacuation issues*
S-7	SLO-1	*hour angle*	*Types of solar panels*	*Passive solar heaters*	*Yaw control, pitch angle control*	*Synchronous generators*
	SLO-2	*Latitude angle*	*Issues in the stand alone solar system*	*Solar pond*	*Stall control*	*Grid related problems*
S-8	SLO-1	*Longitude angle*	*Types of losses in solar panel.*	*Water pumping*	*Schemes for maximum power extraction.*	*Wind generatorcontrolling techniques*

	SLO-2	*Zenith angle*	*Solar Photovoltaic power plant.*	*Domestic lighting*	*Site Selection*	*Issues in hybrid of solar and wind power*
S-9	SLO-1	*Concentrating collectors.*	*Net metering concept*	*Grid connected PV systems*	*Environmental aspects*	*Different schemes*
	SLO-2	*Advantages and disadvantages of solar*	*Design :Panel requirements for a particular load*	*Challenges in Grid connected solar PV*	*Solidity*	*AC voltage controllers*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards			

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the current energy scenario and energy conservation.*
CLR-2 :	*Familiarize the basics of energy and its forms*
CLR-3 :	*Outline the concepts of energy management and audit*
CLR-4 :	*Discuss the methods of improving energy efficiency in different electrical machines*
CLR-5 :	*Describe the methods of improving energy efficiency in different industrial systems*
CLR-6 :	*Obtaining wide knowledge about energy management procedures in industrial system*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Relate the energy scenario and energy conservation*	2	80	75	H	M	-	-	-	-	-	H	-	-	-	-	-	-	H
CLO-2 :	*Explain about various energies and its conversions*	3	80	75	H	M	-	-	-	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Implement the procedure for energy audit*	3	80	75	H	H	-	-	-	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Assess the energy efficiency in electrical components*	3	80	75	H	H	-	-	-	-	H	H	-	-	-	-	H	M	H
CLO-5 :	*Assess the energy efficiency in industrial system*	3	80	75	H	H	M	-	-	-	-	-	-	-	H	-	H	M	-
CLO-6 :	*Apply energy saving concepts in electrical system*	3	80	75	H	H	M	-	-	-	M	H	-	-	H	-	H	M	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Energy Classifications*	*Forms of energy*	*Energy management*	*Introduction to energy policy, synopsis of National energy policies in India, EC Act 2001.*	*Air condition and refrigeration*
	SLO-2	*Primary energy consumption*	*Energy conversion, Grades*	*Energy audit - types*	*ISO-50001, PDCA, PAT scheme*	*Diesel Generator*
S-2	SLO-1	*Indian energy scenario*	*Electrical energy*	*Conservation opportunities*	*BEE & State Development Agencies & EESL Programmes*	*Energy Efficiency in Building*
	SLO-2	*World energy scenario*	*Electrical energy conversion*	*Conservation opportunities*	*Ujala & SEEP Programs*	*Energy Efficiency in Building*
S-3	SLO-1	*Energy needs*	*Electricity Tariff – M.D.,*	*Energy costs, bench marking*	*Municipal & Agriculture DSM Initiatives*	*Savings opportunities in HVAC*
	SLO-2	*Energy pricing*	*Electrical Tariff T.O.D., P.F*	*Energy performance*	*Standards and Labelling Programme EEC initiatives in Other Sectors*	*Fans and blowers*
S-4	SLO-1	*Energy sector reforms*	*Electrical Tariff – two-part tariff and others*	*System efficiencies*	*Energy tariffs*	*Conservation opportunities*
	SLO-2	*Green house, climate change*	*Numerical Examples on electrical basics*	*Energy substitution*	*Energy Instrument*	*Pumps - CASE STUDY*
S-5	SLO-1	*Future effects*	*Numerical Examples on electrical tariff*	*audit instruments*	*Energy Instrument*	*Control strategies*
	SLO-2	*Energy security*	*Thermal energy– temperature, pressure*	*Facility as an energy system*	*Measurement of harmonics*	*Conservation opportunities*
S-6	SLO-1	*Energy conservation*	*Heat transfer*	*Preparing process flow*	*Harmonics Analyzer*	*Cooling Tower -performance*
	SLO-2	*Material and energy balance*	*Latent heat, super heat*	*Energy efficiency in electrical system*	*Power quality analyzer, Thermal Imagining camera, Thermocouple*	*Efficient system operation*
S-7	SLO-1	*Energy balance calculations*	*Humidity*	*Electric motor, compressor, pump.*	*Hot wire anemometer, Energy meter.*	*Efficient system operation*
	SLO-2	*Restructuring energy sector*	*Conduction / convection / radiation / evaporation*	*Power factor improvement,Load management.*	*Combustion analyzer, Airflow meter, Ultrasonic leak detector*	*Validation of energy saving using application software*
S-8	SLO-1	*Energy strategy*	*Units and conversion – pressure, power,*	*Numerical Examples on power factor*	*Occupancy sensors,*	*Energy saving opportunities*
	SLO-2	*Air pollution*	*Units and conversion - energy units*	*Numerical Examples on power factor*	*energy efficient lighting controls*	*Energy saving opportunities*

S-9	SLO-1	*Energy conservation act*	*Numerical example on energies*	*Numerical examples on harmonics*	*Energy saving potential of technology*	*Assessment of cooling towers*
	SLO-2	*Extracted features of the act*	*Numerical example on energies*	*Numerical examples on harmonics*	*Case study on energy saving technologies*	*Assessment of cooling towers*

Course Code	18EEE311T	Course Name	INDUSTRIAL POWER SYSTEM	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards			

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the wiring system for residential ,commercial and industrial consumers*
CLR-2 :	*Acquire knowledge on standard methodologies for measuring energy in the workplace and energy audit instruments.*
CLR-3 :	*Acquire knowledge about Electrical distribution system design aspects of industrial and commercial buildings*
CLR-4 :	*Comprehend power quality issues and power factor correction*
CLR-5 :	*Describe the various techniques in industrial automation*
CLR-6 :	*Acquire knowledge on the methodologies and technologies of industrial automation*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Design the different components of wiring system*	2	80	75	H	M	M	M	-	-	-	L	-	-	-	-	M	L	L
CLO-2 :	*Analyze the concept of energy audit and different loads*	3	80	75	H	M	M	L	-	-	-	-	-	-	-	-	M	M	L
CLO-3 :	*Evaluate and design of distribution system and address different Communication systems in industries*	3	80	75	H	M	L	L	-	-	-	M	-	-	-	-	M	M	-
CLO-4 :	*Address the different power quality problem and various methods of power factor correction*	3	80	75	H	-	-	-	-	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Identify, monitor and control using PLC and SCADA*	2	80	75	H	M	M	L	M	-	-	-	-	-	-	-	M	M	-
CLO-6 :	*Analyze the problem pertaining to power management and automation in industries*	3	80	75	H	M	M	L	M	-	-	-M	-	-	-	-	M	M	L

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*LT system wiring components*	*System approach and End use approach to efficient use of Electricity*	*Electrical System Design*	*Overview of power quality*	*Computer controlled systems Insulation coordination and Automation*
	SLO-2	*Selection of cables,wires,switches*	*Energy auditing: Types and objectives*	*Distribution System Design*	*Various issues in power quality*	*Modeling of system*
S-2	SLO-1	*Selection of distribution box.*	*audit instruments- ECO assessment*	*Electrical Design Aspects of Industrial Buildings*	*Various standards of voltages*	*simulation of switching surges*
	SLO-2	*Metering system*	*Economic methods*	*Commercials Buildings – Design aspects*	*Voltage sag-Definition and types*	*capabilities; voltage acceptance criteria*
S-3	SLO-1	*Tariff structure*	*specific energy analysis*	*Electrical Safety*	*System Data for power quality*	*insulation coordination case study*
	SLO-2	*Protection components*	*Minimum energy paths*	*Earthing Practices at various voltage levels*	*Voltage Drop Calculations*	*methods of minimizing switching transients*
S-4	SLO-1	*Fuse ,MCB inverse current characteristics*	*Electric motors*	*IS Code for earthing*	*Computer- Aided Analysis*	*Study role of Basic PLC*
	SLO-2	*Isolator ,Relay,MPCB*	*Energy efficient controls and starting efficiency*	*Distribution Automation System : Necessity, System Control Hierarchy*	*Power factor correction studies*	*Role of an automation*
S-5	SLO-1	*Electric shock and safety practices*	*Motor Efficiency*	*Basic Distribution Management System Functions*	*Introduction to over voltages*	*Advantages of process automation*
	SLO-2	*Types of Residential system*	*Load Analysis*	*Integration of Distributed Generation*	*Description and Modeling*	*PLC based control system design , Panel metering*
S-6	SLO-1	*Types of commercial wiring system*	*Variable speed drives*	*Custom Power components in distribution systems-*	*Acceptance Criteria-Frequency Scan Analysis*	*Introduction to SCADA*
	SLO-2	*Genaral rules for wiring system*	*Pumps and Fans-Efficient Control strategies*	*Distribution system Performance*	*Voltage Magnification Analysis*	*Common System Components*
S-7	SLO-1	*Guide lines for installation*	*Optimal selection and sizing*	*reliability calculations*	*Sustained Over voltages*	*Various functions of SCADA System for distribution automation*
	SLO-2	*Load calculation*	*Optimal operation and Storage*	*Communication Systems for Control and Automation*	*Switching Surge Analysis*	*SCADA Architecture*

S-8	SLO-1	*sizing of wire*	*Electric Energy Scenario*	*Wireless Communications*	*Back-to-Back Switching*	*Various control of SCADA System*
	SLO-2	*Rating of main switch and distribution board*	*Demand Side Management-Industrial Load Management*	*Wired Communications*	*KVAR calculation*	*Supervision and Control in SCADA*
S-9	SLO-1	*Earthing system calculation*	*Load Curves-Load Shaping Objectives-Methodologies-Barriers*	*DA Communication Protocols*	*Types of compensation*	*HMI, RTU and Supervisory Stations*
	SLO-2	*Requirements of commercial installation*	*Classification of Industrial Loads- -Load Modelling; Electricity pricing*	*Architectures and user interface*	*Over view of compensation*	*Trends in SCADA, Security Issues*

Course Code	18EEE312T	Course Name	FACTS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Outline the fundamentals of FACTS controllers*
CLR-2 :	*Discuss shunt and series compensation techniques and its objectives*
CLR-3 :	*Understand the concept of TCSC controllers*
CLR-4 :	*Learn basic idea of voltage and phase angle regulator in power system*
CLR-5 :	*Familiarize the concept of versatile FACTS controllers*
CLR-6 :	*Create overall structure of facts controllers and application of FACTS controller*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Summarize the concepts of FACTS controllers*	1	80	75	H	-	-	-	-	-	-	-	-	-	-	-	H	M	-
CLO-2 :	*categorize the shunt and series compensation techniques used in facts controllers and its objectives*	2	80	75	H	-	-	-	-	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Examine the operation of TCSC and application of TCSC*	2	80	75	H	-	-	-	-	-	-	-	-	-	-	-	H	M	-
CLO-4 :	*Relate the various application of phase shift transformer and phase angle regulator*	2	80	75	H	-	-	-	-	-	-	-	M	M	-	-	H	H	-
CLO-5 :	*Gain knowledge the basic concept of STATCOM, UPSC and its application*	2	80	75	H	-	-	-	M	-	-	-	-	-	-	-	H	M	-
CLO-6 :	*Design a suitable FACTS controller to compensating of real and reactive power using FACTS devices*	2	80	75	H	-	-	-	M	-	-	-	M	M	-	-	H	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Electrical Transmission Network*	*Introduction to passive compensation*	*Need for variable series compensation*	*Phase shifting transformer*	*voltage source converters*
	SLO-2	*HVDC Vs HVAC*	*Objectives of shunt and series compensation*	*TCSC: Basic and practical module*	*Configurations of SPST*	*current source converter*
S-2	SLO-1	*Conventional Control Mechanisms-Automatic Generation Control (AGC)*	*Introduction to Single-phase and three phase-Thyristor controlled Reactor (TCR)*	*Net reactance offered by TCSC,*	*Objectives of voltage and phase angle regulators*	*Static synchronous series compensator :*
	SLO-2	*Excitation Control-Transformer Tap-Changer Control-Phase-Shifting Transformers*	*The 12-Pulse TCR*	*Operation of TCSC: Basic principle*	*Real and reactive power of voltage and phase angle regulators*	*principle of operation*
S-3	SLO-1	*System compensation*	*Analysis of single phase TCR*	*X-I and V-I characteristics of TCSC*	*Applications of Phase Angle Regulator*	*VI characteristics*
	SLO-2	*Analysis of Uncompensated Transmission system*	*SVC configurations- Fixed Capacitor*	*Different modes of Operation Explain TCSC*	*Approaches to Thyristor controlled voltage regulators*	*Applications*
S-4	SLO-1	*Necessity of FACTS controller*	*Thyristor-Controlled Reactor and its operating characteristics*	*Different modes of operation Explain MSC*	*Approaches to phase angle regulators*	*Introduction to Static synchronous compensator (STATCOM)*
	SLO-2	*Load and system Compensation*	*Operating Characteristics without Voltage Control*	*Analysis of TCSC*	*Continuously Controllable Thyristor Tap changers*	*STATCOM Principle of operation*
S-5	SLO-1	*Comparison between Series-Connected and Shunt-Connected Compensating Voltages*	*Operating Characteric With Voltage Control*	*Analysis of TSSC*	*Thyristor Tap Changer with Discrete Level Control*	*VI characteristics*
	SLO-2	*Modeling long transmission line*	*SVC voltage control operation*	*Capability Characteristics (single and multi-module TCSC) TCSC losses*	*Improvement of Transient Stability*	*Applications*
S-6	SLO-1	*Real and reactive power flows in AC system*	*Q-V characteristics*	*TCSC applications*	*Power Oscillation Damping*	*UPFC: basic module -capabilities*

	SLO-2	*Symmetrical lossless line Midpoint compensation*	*Thyristor Switched Capacitor (TSC)-operation-.*	*Modelling of TCSC for Stability Studies*	*Basic Issues in the Damping of Low Frequency Oscillations in Large Power Systems*	*UPFC Modes of operation*
S-7	SLO-1	*Surge Impedance Loading*	*Practical switching strategy V-I characteristics of TSC*	*power flow enhancement*	*System Modelling for Small Signal Stability*	*Applications*
	SLO-2	*Classification of FACTS controllers controllable parameters*	*(TSC)-operation -VI characteristics*	*Variable reactance model for transient stability study*	*Damping of Power Oscillations Using Series FACTS Controllers*	*Introduction to Generalized unified power flow controller (GUPFC)*
S-8	SLO-1	*Applications of FACTS*	*(TCR)-operation -VI characteristics*	*TCSC: Open loop current control*	*Damping of Power Oscillations Using Shunt FACTS Controllers*	*Inter line power flow controller (IPFC)*
	SLO-2	*Relative Power Carrying Capability of AC and DC Transmission Lines*	*Advantages of slope in SVC dynamic characteristics*	*TCSC: closed loop current control*	*Switching Converter-Based Voltage and Phase Angle Regulators*	*Configuration of IPFC*
S-9	SLO-1	*The Impact of Distributed Generation*	*SVC Applications*	*Power flow incorporating with SVC and TCSC*	*Hybrid Phase Angle Regulators*	*Application*
	SLO-2	*The Effect of Electricity Deregulation*	*Enhancement of steady state and transient stability*	*Mitigation of Subsynchronous Resonance with TCSC*	*A Case Study of Damping Controllers in UPFC*	*Simulation of SVC and TCSC with SMIB system*

Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Outline the concepts of over voltages and Insulation Co-ordination on power system*
CLR-2 :	*Discuss the solid, liquid and gaseous dielectrics with its relevance to application of high voltages.*
CLR-3 :	*Understand the concept of generation of high voltages*
CLR-4 :	*Familiarize the concept on the measurement of high voltages and currents*
CLR-5 :	*Describe the testing of high voltage equipments and its application.*
CLR-6 :	*Create overall understanding of various types of overvoltages, high voltage generation, measurement and testing*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Gain knowledge on overvoltage protection and the importance on insulation co-ordination levels.*	2	80	75	H	-	-	-	-	-	M	-	-	-	-	-	-	M	-
CLO-2 :	*Understand the basics of dielectrics and its breakdown process on high voltage application*	2	80	75	H	M	L	L	-	-	M	-	-	-	-	-	M	M	-
CLO-3 :	*Acquire knowledge on high voltage generation*	2	80	75	H	M	L	L	-	-	-	-	M	M	-	-	M	M	-
CLO-4 :	*Gain knowledge on measurement of high voltage generation*	2	80	75	H	M	L	L	L	-	-	H	-	-	-	-	M	M	M
CLO-5 :	*Demonstrate the testing procedures of high voltage equipment and its application*	3	80	75	H	M	-	-	-	-	-	H	-	-	-	-	M	M	H
CLO-6 :	*Summarize the scenarios of over voltages and applications of high voltage equipments for generation ,measurement and testing*	3	75	75	H	M	L	L	L	-	M	H	M	M	-	-	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Causes of over voltages*	*Gaseous breakdown in uniform and non-uniform fields*	*Generation of high DC voltages – Half-wave and full-wave rectifier circuits*	*HVDC measurement techniques Series Resistance microammeter*	*Testing of High voltage electrical apparatus*
	SLO-2	*Effects of overvoltages on power system*	*Conduction and breakdown in gases-Ionization process*	*Voltage doubler circuits*	*Resistance potential divider*	*Technical terms definition for high voltage testing*
S-2	SLO-1	*Parameters of lightning strokes*	*Townsend's current growth equation in the presence of secondary processes*	*voltage multiplier circuits*	*Generating voltmeter*	*Testing procedures on insulators-Power frequency tests*
	SLO-2	*Characteristics of lightning strokes-Direct ,indirect strokes and backflashover*	*Townsend's Criterion for breakdown*	*Van de Graff generator*	*Measurement of high A.C and impulse voltages-*	*Impulse tests*
S-3	SLO-1	*Origin of Switching overvoltages*	*Experimental determination of Townsend's coefficients*	*Generation of high alternating voltages*	*Series Impedance voltmeters*	*Testing procedures on bushings-Power frequency tests*
	SLO-2	*Characteristics of Switching overvoltages*	*Breakdown in electronegative gases*	*Cascaded transformer*	*Series capacitance voltmeter*	*Thermal test*
S-4	SLO-1	*Impact of switching surges in EHV and UHV systems*	*Time lags for breakdown*	*Resonant transformer-Series connection*	*Capacitance potential dividers and capacitance voltage transformers*	*Testing procedures on isolators*
	SLO-2	*Control of overvoltages due to switching overvoltages*	*Streamer Breakdown mechanism in gases*	*Resonant transformer-Parallel connection*	*Potential Transformer, Electrostatic voltmeter,*	*Short-circuit test*
S-5	SLO-1	*Causes of power frequency overvoltages in EHV and UHV systems*	*Paschen's law-Derivation*	*Generation of high frequency alternating voltages- Advantages*	*Peak reading ac voltmeter-Series capacitor, peak voltmeter*	*Testing procedures of cables-Preparation of cables-Dielectric power test*
	SLO-2	*Remedial measures adopted in EHV and UHV systems*	*Practical Considerations in using gases for insulation purposes*	*Tesla coil equivalent circuit*	*Digital peak voltmeter*	*High voltage test and Partial discharge test*
S-6	SLO-1	*Protection against Lightning overvoltages and switching surges of short duration-Ground wires*	*vacuum breakdown*	*Generation of impulse voltages-Standard impulse waveshapes*	*Measurement of high dc, ac and impulse voltages -Sphere gap measurement*	*Testing procedures of transformers-e overvoltage test, Partial discharge test*
	SLO-2	*Protection of transmission lines against over voltages-Ground rods and counter-poise wires*	*Liquid as insulators-Electrical properties*	*waveshape control parameters*	*Factors influencing the spark over voltage of sphere gaps*	*Impulse testing of transformers-Procedures-Detection and location of fault*

S-7	SLO-1	*Protective devices-Rod gap, Expulsion gap*	*Conduction and breakdown in pure and commercial liquids*	*Multistage impulse generator-Marx circuit*	*Resistance Potential divider for impulse voltage measurements*	*Testing procedures of surge diverters*
	SLO-2	*Protector tubes, Surge arrester*	*Breakdown mechanisms in solid dielectrics-Intrinsic and Electromechanical breakdown*	*Marx circuit -simulation*	*Capacitance potential dividers for impulse voltage measurements*	*Radio Interference Measurements – Measurement of Radio Interference voltage*
S-8	SLO-1	*Principles of Insulation Coordination-Ideal requirements of a protective device*	*Breakdown mechanisms in solid dielectrics-Intrinsic and Electromechanical breakdown*	*Generation of impulse current-Definition-Circuits for producing impulse current waves*	*Measurement of high DC, AC and impulse measurements-High DC currents-DC current transformer-Hall generators*	*RIV measurement circuit*
	SLO-2	*Surge diverters,Equipment insulation level and insulation co-ordination of substation*	*Thermal breakdown, solid breakdown used in practice*	*Generation of rectangular current pulses*	*Measurement of high frequency and impulse currents- Resistive shunts*	*Non-destructive testing of materials and measurement of direct current resistivity*
S-9	SLO-1	*insulation level at substation with protective zones*	*Breakdown in composite dielectrics-properties*	*Circuits for producing switching surge voltages*	*Rogowski coils,Magnetic links,Faraday Generator*	*Measurement of dielectric constant and loss factor. Partial discharge measurements*
	SLO-2	*Insulation Coordination in EHV and UHV systems*	*Mechanism of breakdown in composite dielectrics*	*Tripping and control of impulse generators-Trigatron gap*	*Cathode Ray Oscillographs for Impulse voltage and current measurements*	*Application of high voltage engineering in food processing and bio-medical industry*

Learning Resources	*1. Naidu.M.S, and Kamaraju, High Voltage Engineering, Tata McGraw Hill,2014.* *2. Wadhwa.C.L, High Voltage Engineering New age international publishers Ltd.-New Delhi 2010.* *3. Course Code	18EEE314T	Course Name	POWER QUALITY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the characterization of electric power quality*
CLR-2 :	*Study the sources of power quality events such as voltage sag, short and long duration variations*
CLR-3 :	*Explain the reduction of PQ problems using custom power devices and harmonic filters*
CLR-4 :	*Impart knowledge on various methods of power quality monitoring*
CLR-5 :	*Illustrate the power quality issues in distributed generation*
CLR-6 :	*Understand Power Quality events, Measuring equipments and their impact on Distributed Generation*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)
CLO-1 :	*Describe the causes and effects of power quality problems and categorize the various electrical power quality issues in power systems*	1	75	75
CLO-2 :	*Identify the power quality major events like voltage sag, interruptions and harmonics*	2	75	75
CLO-3 :	*Design and simulate the custom power devices and harmonic filters*	3	75	75
CLO-4 :	*Interpret in usage of various PQ measuring instruments*	2	75	75
CLO-5 :	*Identify the various power quality issues in solar system and wind energy conversion system*	2	75	75
CLO-6 :	*Analyze PQ issues in wind and solar energy system and utilize the monitoring equipments for PQ events*	3	75	75

Program Learning Outcomes (PLO)

CLO-6	H	L	L	L	M	-	M	M	-	-	-	-	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to power distribution system*	*Sources of Sag and Interruptions*	*Fundamentals of harmonics*	*Introduction to Power Quality monitoring*	*Introduction to Distributed Generation Technologies*
	SLO-2	*Power quality: concepts and definition*	*Classification of Voltage sag*	*Sources of harmonics*	*Power Quality Monitoring considerations*	*Resurgence of DG*
S-2	SLO-1	*Characterization of Transients*	*Estimating Voltage Sag performance – Area of Vulnerability, Equipment sensitivity to voltage sags*	*Definitions: Average value - RMS value - True power factor - phase sequence - Fourier series*	*Perspective of Power Quality Measuring equipments*	*Perspectives on DG benefits*
	SLO-2	*Causes and effects of Transients*	*Transmission system sag performance evaluation, Utility distribution system sag performance evaluation*	*Numerical example for harmonic analysis*	*Overview of Power Quality measurement equipments*	*Perspectives on Interconnection*
S-3	SLO-1	*Characterization, causes and effects of Short duration variations – interruptions*	*Fundamental principles of protection*	*Voltage and current distortions, Harmonics indices - (THD and TDD)*	*Power Quality Measurement Equipment: Power line disturbance analyzer*	*Interface to the Utility System*
	SLO-2	*Characterization, causes and effects of Short duration variations – Sags and Swells*	*Solutions of voltage sag at the end user level*	*Harmonics standards (IEEE, IEC)*	*Spectrum analyzer and Harmonic analyzer,*	*Various types of electrical system interfaces*
S-4	SLO-1	*Characterization of Long duration variations*	*Voltage sag and interruption indices*	*Harmonics sources from commercial load*	*Flicker meters*	*Power Quality issues of DG*
	SLO-2	*Causes and effects of Long duration variations*	*Basic Reliability evaluation techniques*	*Harmonics sources from industrial nonlinear load*	*Disturbance analyzer*	*Various types of Power Quality issues affected by DG*
S-5	SLO-1	*Characterization of Voltage imbalance and Waveform distortion*	*Motor-Starting sags*	*Effect of harmonics distortion*	*Transducer requirements*	*Operating conflicts*
	SLO-2	*Causes and effects of Voltage imbalance and Waveform distortion*	*Motor-starting methods*	*Impact on capacitors, transformers, motors, teleCommunications, energy and demand metering*	*Demonstration of harmonic analyzer*	*Description of Operating conflicts results in Power Quality problems*

S-6	SLO-1	*Characterization of Voltage fluctuation and Power Frequency variations*	*Utility System Fault-Clearing Issues*	*Devices for controlling Harmonics - Inline choke*	*Assessment of Power Quality Measurement Data*	*DG on Low-Voltage Distribution networks*
	SLO-2	*Causes and effects of Voltage fluctuation and Power Frequency variations*	*Overview of Transient Faults*	*Zig Zag transformer*	*Off-line and On-line Power quality data assessment*	*Integration techniques for DG on networks*
S-7	SLO-1	*CBEMA*	*Overview of Permanent Faults*	*Harmonic filters: Passive, Active and Hybrid filters*	*Application of Intelligent Systems to power quality monitoring*	*Siting DG*
	SLO-2	*ITI curves*	*Voltage sag Mitigation methods*	*Design of filters - simulation*	*Design of expert systems for monitoring applications*	*Discussion on optimal DG siting problem*
S-8	SLO-1	*Introduction to Power Quality standards*	*Mitigation of sag - Dynamic Voltage Restorer (DVR)*	*Harmonic analysis*	*Requirements on industry Power Quality monitoring applications*	*DG Interconnection standards*
	SLO-2	*International Standards of Power Quality*	*Principle and configuration of DVR*	*Illustration of Harmonic analysis with an Industry case study*	*Web based Power Quality monitoring system*	*Interconnection requirements*
S-9	SLO-1	*Introduction to Power Quality events*	*Mitigation of sag - Distribution static synchronous compensator (DSTATCOM)*	*Seminar on Harmonic analysis*	*Power Quality monitoring standards*	*Power Quality issues in grid integrated Solar system*
	SLO-2	*Computer simulation of Power Quality events*	*Principle and configuration of DSTATCOM*	*Recent advancement in Harmonic distortion analysis*	*IEEE 1159 and IEC 61000-4-30*	*Power Quality issues in grid connected wind energy conversion system*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Evolution of Electric Grid*	*Necessity of renewable power generation*	*Importance of measurement in smart grid*	*Basics of load flow studies*	*Role of Communication infrastructures in smart grid*
	SLO-2	*Definitions and Need for Smart Grid*	*Benefits of renewable generation in smart grid*	*Measurement parameters in smart grid*	*Extended load flow studies in smart grid*	*Types of Communication infrastructures*
S-2	SLO-1	*Basics of smart grid*	*Importance of PV system*	*Introduction to Smart Meters*	*Necessity of voltage stability analysis*	*Elements of data Communication networks*
	SLO-2	*Comparison of Power grid with Smart grid power system*	*Grid integration issues of PV system*	*Block diagram of smart meters*	*Voltage stability analysis in smart grid*	*Standards of data Communication networks*
S-3	SLO-1	*Smart grid components*	*Importance of wind system*	*Communication infrastructure for smart metering*	*Importance of state estimation*	*Wired networks in smart grid*
	SLO-2	*Smart grid driversfunctions*	*Grid integration issues of wind system*	*Communication protocols for smart metering*	*Approach of smart grid to state estimation*	*Wireless networks in smart grid*
S-4	SLO-1	*Opportunities, challenges and benefits*	*Basics of energy storage system*	*Basics of AMI drivers*	*Necessity of optimization techniques*	*Functional groups of smart grid Communications*
	SLO-2	*Functions of Smart Grid Components*	*Operation of independent Large-Scale Battery Storage system*	*Benefits of AMI drivers*	*Optimization techniques in smart grid-case study*	*Types of Communications in smart grid*
S-5	SLO-1	*Wholesale energy market in smart grid*	*Necessity of Battery management system*	*Necessity of WAMS network*	*Different intelligent techniques*	*Characterization of smart grid data*
	SLO-2	*Advantages of building integrated and distributed power systems*	*Types of Battery management system in smart grid*	*Wide area measurement system in smart grid*	*Applications of computational intelligence in smart grid*	*Secure data management in smart grid*
S-6	SLO-1	*Approach to smart grid interoperability standards*	*Necessity of energy management system*	*Introduction to Phasor measurement units*	*Transmission system automation*	*Applications of smart grid data*
	SLO-2	*IEEE standards for Smart Grid*	*Energy management system in smart grid*	*Architecture of Phasor measurement units*	*Components of transmission system automation*	*Impact of bad data in smart grid data*
S-7	SLO-1	*International policies in Smart Grid*	*Basics of demand side management*	*Communications in PMUs*	*Distribution system automation*	*Data cleaning in smart grid data*
	SLO-2	*National and International Initiatives in Smart Grid*	*Demand side management in smart grid*	*Implementation of dynamic visualization system for real time power system data*	*Components of Distribution system automation*	*Smart grid network interoperability*

S-8	SLO-1	*Operation of smart grid*	*Basics of demand response*	*Smart buildings in smart grid*	*PHEV in distribution network*	*Basics of cyber security*
	SLO-2	*Control strategies of smart grid*	*Demand response issues in smart grid*	*Components in smart buildings*	*Charging strategies in PHEV*	*Cyber security issues in smart grid*
S-9	SLO-1	*Basics of microgrid*	*Study of power quality parameters*	*ASHRAE standard for smart buildings*	*Discharging strategies in PHEV*	*Types of cyber attacks*
	SLO-2	*Micro grid importance in smart grid*	*Power quality issues associated with renewable energy in smart grid*	*Multi agent systems in smart grid*	*Impact of PHEV on the grid*	*Mitigation approach to cyber security attacks*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*History of modern transportation*	*Introduction to energy storage systems*	*Requirements of charging system*	*Structure and operation of fuel cell*	*DC motor drives principle of operation*
	SLO-2	*Importance of different transportation development strategies to future oil supply*	*Battery requirements for HEVs, PHEVs and EVs*	*Charging system principles*	*Types of fuel cell (PAFC and PEM)*	*Analysis of DC motor drives performance*
S-2	SLO-1	*History of hybrid electric vehicles*	*Working principle and construction of lead-acid, nickel cadmium*	*Alternators basics and working*	*Types of fuel cell (MCFC and SOFC)*	*Chopper control techniques for DC motor drives*
	SLO-2	*History of electric vehicles*	*Working principle and construction of nickel cadmium*	*Charging circuits basics and working*	*Types of fuel cell (DMFC, AFC and ZAFC)*	*Rectifier control techniques for DC motor drives*
S-3	SLO-1	*Social and environmental importance of hybrid and electric vehicles*	*Working principle and construction of nickel metal hydride*	*Charging system testing instruments*	*Fuel cell based power processing systems introduction*	*Induction motor drives principle of operation*
	SLO-2	*Key challenges of hybrid and electric vehicles*	*Working principle and construction of lithium ion batteries*	*Diagnosing charging system faults*	*Benefits of power processing systems*	*Analysis of Induction motor drives performance*
S-4	SLO-1	*Specifications of PHEVs, BEVs, EVs and HEVs*	*Properties of battery*	*New developments in charging systems*	*Important properties of fuel cells for vehicles*	*Inverter control techniques for induction motor drives*
	SLO-2	*The future of electric vehicles*	*Characteristics of battery*	*Advanced charging systems*	*Alternate fuels for fuel cell vehicles*	*Cycloconverter control techniques for induction motor drives*
S-5	SLO-1	*Requirement of drive train*	*Maintenance of battery*	*Requirements of starting systems*	*Fuel cost and fuel economies comparison*	*Permanent magnetic brush-less DC motor drive operation*
	SLO-2	*Sizing of components in drive train*	*Visual inspection of battery*	*Starter motors and its circuits*	*Comparison of characteristics of fuel cells*	*Analysis of brush-less DC motor drives performance*
S-6	SLO-1	*Series configuration of HEVs*	*Battery testing instruments*	*Inertia starter and pre-engaged starter*	*Fuel cell based drive trains*	*Control techniques of BLDC motor drive*
	SLO-2	*Parallel configuration of HEVs*	*Diagnosing battery faults*	*Permanent magnet starter, integrated starter generator and electronic starter*	*Comparison of BEV, DHFC/EV and DMFC/EV*	*Implementing control techniques for BLDC motor drive*
S-7	SLO-1	*Power split configuration of HEVs*	*Introduction to supercapacitor*	*Starting system testing instrument*	*Transition from diesel to fuel cell engines*	*Sensorless control for BLDC drive introduction*

	SLO-2	*Merits and Demerits of different HEV configurations*	*Introduction to flywheel*	*Diagnosing in starting system faults*	*Fuel cell/battery hybrid power system*	*Different control techniques for BLDC drive introduction*
S-8	SLO-1	*Vehicle dynamics*	*Advanced battery technology*	*Advanced starting system technology*	*Fuel cell in domestic application*	*Switched reluctance motor drives principle of operation*
	SLO-2	*Problems using vehicle dynamics*	*Developments in electrical storage*	*New developments in starting systems*	*Fuel cell in industrial application*	*Analysis of switched reluctance motor drives performance*
S-9	SLO-1	*Modelling electric vehicle range*	*Case studies on battery technologies*	*Case studies in charging and starting systems*	*Case studies on fuel cell technologies*	*Control techniques of switched reluctance motor drive*
	SLO-2	*Problems under vehicle travel range*	*Software implementation of battery and its applications*	*Software implementation of charging and starting systems*	*Software implementation of fuel cell and its applications*	*Implementing control techniques for switched reluctance motor drive*

Course Code	18EEE407T	Course Name	POWER SYSTEM HARMONICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamentals and standards of harmonics*
CLR-2 :	*Study the various sources of harmonics*
CLR-3 :	*Enumerate the effects of harmonics in various equipments*
CLR-4 :	*Classify the methods of power system harmonics mitigation*
CLR-5 :	*Explore the approach of harmonics system study*
CLR-6 :	*Develop an overall knowledge about harmonics in power system*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Identify the harmonic indices and study the characteristics of harmonics*	2	80	75	H	-	-	-	-	-	-	H	-	-	-	-	-	-	H
CLO-2 :	*Understand the level of harmonics in equipments and devices*	3	80	75	H	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*Familiarize the harmonics effects in critical loads and equipments*	3	80	75	H	-	-	-	-	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Study and compare the various filters used for harmonics mitigation*	3	80	75	H	H	M	-	-	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Simulate the harmonics analysis in a low/medium voltage system*	3	80	75	H	H	M	M	-	-	-	-	-	-	-	-	M	M	-
CLO-6 :	*Design a harmonic mitigation for the industrial and commercial applications*	3	80	75	H	H	M	M	-	-	-	M	-	-	-	-	M	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction*	*Traditional sources*	*Harmonics effects – Thermal losses*	*Harmonics Filters*	*Harmonics modeling of system components - Generator,*
	SLO-2	*Basics of harmonic theory*	*Transformers*	*Copper, core and dielectric losses*	*Passive filters*	*Harmonics modeling of Shunt capacitors*
S-2	SLO-1	*Representation of Harmonics*	*Rotating machines*	*Harmonics effects on power system equipment*	*Single tuned filters*	*Harmonics modeling of Loads*
	SLO-2	*Fourier series – coefficients*	*Arc furnaces*	*Capacitor bank*	*Double tuned filters*	*Harmonics modeling of Induction motor*
S-3	SLO-1	*Fourier transform*	*Modern sources*	*Transformers*	*Damped filters*	*Harmonics modeling of Transformer with network*
	SLO-2	*Discrete Fourier transform (DFT)*	*Power electronics devices*	*Neutral grounding overloading*	*Detuned filters*	*Harmonics modeling of Transformer with different configuration*
S-4	SLO-1	*Fast Fourier transform (FFT)*	*Rectifiers*	*Rotating machines*	*Series tuned filter design*	*Harmonics modeling of Transmission line model*
	SLO-2	*Examples of harmonic estimation using FFT*	*A.C. Regulators*	*Pulsating torque*	*Impedance plot of series tuned filter design*	*Harmonics modeling of Transmission line with network*
S-5	SLO-1	*Characteristics of harmonics in power system – Symmetry*	*Power converters – Six pulse converters*	*Power electronics devices*	*Second order damped filters*	*Examples – transmission line*
	SLO-2	*Phase sequence*	*Six pulse converters - Analysis*	*Power converters*	*Impedance plot of second order damped filter design*	*Examples – Problems on load*
S-6	SLO-1	*Voltage and current distortion factors - Total harmonic distortion (THD)*	*Twelve pulse converters*	*Harmonics on power system protection*	*Active filters*	*Harmonics analysis using spread sheet*
	SLO-2	*Real, Reactive and Apparent power*	*Twelve pulse converters - Analysis*	*Unexpected relay operation*	*Characteristics of active filters*	*Analysis of harmonics analysis using spread sheet*
S-7	SLO-1	*Distortion power; Power factor*	*Inverters*	*Harmonics effects on consumer equipment*	*Other methods of mitigation*	*Simulation of harmonics analysis*
	SLO-2	*Total influence factor (TIF) and I*T Product*	*Cycloconverters*	*UPS*	*Transformer connection*	*harmonics resonance*

S-8	SLO-1	*Voltage THD limits – IEEE standards*	*Thyristor controlled reactors*	*Lighting loads*	*Network topology reconfiguration*	*Simulation of harmonics filters*
	SLO-2	*Voltage THD limits – IEC standards*	*Static VAR compensator*	*Electronics devices*	*Increase of supply mode stiffness*	*Analysis of simulation output of harmonics filters*
S-9	SLO-1	*Current THD limits – IEEE standards*	*Effect of transformer connection on harmonics*	*Harmonic interference with Communication*	*Harmonic cancellation through use of multi pulse converters*	*Case study*
	SLO-2	*Current THD limits – IEC standards*	*Star-Delta and Delta-Star*	*Microwave links, telephone interference*	*Series reactor as harmonic attenuator elements*	*Analysis of Case study*

Course Code	18EEE408T	Course Name	HVDC AND EHVAC SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	i	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Outline the concepts of Extra High Voltage transmission systems*
CLR-2 :	*Explain the general background and operational concepts in EHVAC Transmission Systems*
CLR-3 :	*Give idea about the factors affecting EHV transmission and the protection of EHV lines*
CLR-4 :	*Impart knowledge about HVDC Transmission systems*
CLR-5 :	*Expose to the concept of harmonics and basis of protection for HVDC Systems.*
CLR-6 :	*Know the detailed background of extra high voltage AC transmission and high voltage DC transmission*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

CLO-6 :	*Interprete the operational concepts of high voltage AC and DC transmission*	3	80	75	H	M	M	-	M	-	M	L	M	M	-	-	H	M	L

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Brief Description of Energy Sources*	*Power handling capacity of AC transmission line*	*Effects of corona*	*Choice of HVDC Transmission*	*Pulse number*
	SLO-2	*Development of Energy sources*	*Line losses of AC transmission line*	*Attenuation of travelling waves due to corona loss*	*Basic outline of HVDC Transmission*	*Choice of Converter Configuration*
S-2	SLO-1	*Introduction to EHV transmission*	*Introduction to mechanical considerations in transmission line performance*	*Generation of audible noise*	*Comparison of Economics, Technical Performance of DC power Transmission*	*Introduction to Graetz circuit*
	SLO-2	*Standard Voltage levels of Transmission systems*	*Types of vibrations and oscillations*	*Characteristics and its limitations of audible noise*	*Comparison of Reliability of DC power Transmission*	*Simplified analysis of Graetz circuit*
S-3	SLO-1	*Hierarchical levels for Transmission systems*	*Concept of bundled conductors*	*Generation of corona pulses*	*Description of HVDC transmission system*	*Concept of HVDC link Control*
	SLO-2	*Costs of Transmission Lines And Equipment*	*Properties of Bundled conductors*	*Properties of corona pulses*	*Types of HVDC links*	*Principles of HVDC link control*
S-4	SLO-1	*Necessity for EHV transmission*	*Surface voltage gradient on single conductor bundles*	*Limits for radio interference fields*	*Components of a Converter station*	*DC Breaker – Basic concepts of DC circuit interruption*
	SLO-2	*Challenges involved in EHV transmission*	*Derivation of Surface voltage gradient on single conductor bundles*	*Evaluation of radio interference using Cigre Formula*	*Description of a Converter station*	*DC Breaker –Characteristics and Applicatiobns*
S-5	SLO-1	*Operational Aspects of EHV AC transmission*	*Surface voltage gradient on double conductor bundles*	*Concept of RL filter to block corona enery*	*Basic concepts of multi-terminal HVDC system.*	*AC Filter –Criteria of design*
	SLO-2	*Electrical characteristics of EHV cables*	*Derivation of Surface voltage gradient on double conductor bundles*	*Design of RL filter*	*Types and potential applications of multi-terminal HVDC system.*	*AC Filter –Ratings of filter components and protection of filters*
S-6	SLO-1	*Gas insulated EHV transmission lines*	*Basic concepts of reactive power compensation*	*Intereference to TV reception from EHV lines*	*Effects of proximity of ac and dc transmission lines*	*DC Filter –Criteria of design*
	SLO-2	*Properties of SF_6 gas*	*Principles of shunt compensation*	*Discharges from an EHV line causing television interference*	*HVDC transmission based on Voltage Source Converters*	*DC Filter –Hybrid active filter for DC filtering*
S-7	SLO-1	*Effect of Power-Frequency Magnetic Fields on Human Health*	*Principles of series compensation*	*Concept of lightning strokes*	*Merits of HVDC System*	*Protection Against Over Currents, Over Voltages*

	SLO-2	*Effect of High Electro Static Field on Humans, Animals, and Plants*	*Sub-synchronous resonance in compensated lines*	*General principles of the lighting protection problem*	*Limitations of HVDC System*	*Protection Systems in HVDC Substation*
S-8	SLO-1	*Introduction to line parameters*	*Counter measures for Sub-synchronous resonance problem*	*Arresters used for EHV systems*	*Applications of HVDC transmission*	*Necessity of simulation of a dynamic system*
	SLO-2	*Determination of resistance of EHV lines*	*Improvement of system performance due to reactive power compensation.*	*Protective characteristics of lightning arresters*	*Modern Trends in HVDC transmission*	*Tools for simulation of a dynamic system*
S-9	SLO-1	*Determination of inductance of EHV lines*	*Comparison of Overhead and Underground lines*	*Operating characteristics of lightning arresters*	*Seminar on case Studies of HVDC links in the world- I*	*Digital Dynamic Simulation of Converters*
	SLO-2	*Determination of capacitance of EHV lines*	*Examples of Giant power pools in the world*	*Insulation Coordination based on lightning*	*Seminar on case Studies of HVDC links in the world- II*	*Digital Dynamic Simulation of DC Systems*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical & Electronics Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Enumerate the significance of stability study and its classification*
CLR-2 :	*Explain the concept of detailed modelling of synchronous machine for stability studies*
CLR-3 :	*Understand and model the various excitation system*
CLR-4 :	*Examine the small-signal stability study of single-machine infinite bus (SMIB) system*
CLR-5 :	*Discuss the Sub-synchronous oscillations and countermeasures for small-signal stability*
CLR-6 :	*Develop the mathematical model of synchronous machine and assessment of small-signal stability*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Explain the basics of stability analysis and its types*	1	75	75	H	H	-	-	-	-	-	-	-	-	-	-	M	M	-
CLO-2 :	*Apply the idea of Park's transformation and express the voltage and flux linkage equation, torque and power equation of synchronous machine in rotor reference frame.*	3	75	75	H	H	L	H	H	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Describe the excitation system, types and its modelling for stability studies*	3	75	75	H	H	L	H	H	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Analyze the small-signal stability for the SMIB system with classical model of synchronous machine*	3	75	75	H	H	H	H	H	-	-	-	-	H	-	-	M	M	-
CLO-5 :	*Infer Sub-synchronous oscillations and the enhancement methods of small-signal stability*	3	75	75	H	H	H	H	-	-	-	-	-	-	-	-	M	M	-
CLO-6 :	*Design the mathematical model of synchronous machine and evaluate the small-signal stability*	3	75	75	H	H	H	H	H	-	-	-	-	H	-	-	M	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction –Basic elements of power system*	*Introduction to Three phase synchronous machine*	*Excitation system requirements*	*Small-signal stability of dynamic Systems*	*Introduction to Sub-synchronous oscillations*
	SLO-2	*Structure of power system-power system control*	*RMF, MMF waveform*	*Basic functions of Excitation system*	*Local, finite and global stability*	*Turbine-generator torsional characteristics*
S-2	SLO-1	*Operating states of power system and control strategies*	*Winding model*	*Elements of an excitation system*	*Linearization*	*Structure of typical lumped mass shaft system model*
	SLO-2	*Normal design contingencies*	*Modelling assumptions,*	*Control functions of an excitation system*	*State-space representation*	*Shaft model representation*
S-3	SLO-1	*System design for stability*	*Sign convention*	*Protective functions of an excitation system*	*Mathematical analysis of stability*	*Equations of inertia constant-Torsional stiffness-Damping coefficient*
	SLO-2	*Classifications of stability*	*Stator voltage equations in abc coordinates*	*Types of Excitation System (ES)*	*Eigen properties of the state matrix*	*Derive the Shaft system equations between turbine and generators*
S-4	SLO-1	*The stability phenomena: small-signal and transient stability*	*Rotor voltage equations in abc coordinates*	*DC excitation system-(DC1A)*	*Eigenvalues of the state matrix*	*Computation of damping and stiffness coefficient for a five mass model system*
	SLO-2	*Basic assumptions made in stability studies*	*Stator flux linkage equations in abc coordinates*	*DC excitation system with amplidyne*	*Eigenvectors, participation factor, modal matrices*	*Computation of each shaft section torque for a five mass model system*
S-5	SLO-1	*Rotor dynamics and the swing equation*	*Rotor flux linkage equations in abc coordinates*	*AC Excitation system*	*Eigenvalues and stability-trajectory behaviour*	*Torsional natural frequencies*
	SLO-2	*Transient stability- Illustrate with Single machine connected to infinite bus (SMIB) system*	*Stator self-inductance calculation*	*Field-Controlled Alternator Rectifier ES*	*Mode shape and participation factor.*	*Example of torsional characteristics of coal-fired unit with static exciter*
S-6	SLO-1	*Numerical problem on transient stability analysis of SMIB system*	*Stator to rotor Mutual-inductance calculation*	*Stationary rectifier based AC Exciter*	*Controllability and observability-concept of complex frequency*	*Small-signal stability enhancement-methods*

	SLO-2	*Power versus rotor angle curve,Power-rotor angle equations-(during a fault, after fault clearing and removal of the faulted circuit)- Numerical problem*	*Rotor to Stator Mutual-inductance, Rotor self –inductance calculation*	*Alternator-supplied controlled-rectifier ES*	*State-space form of Synchronous machine's swing equation*	*Different types of Power system stabilizers (PSS)- Need of PSS*
S-7	SLO-1	*Transient stability assessment of SMIB system by Equal-Area Criterion*	*Park's transformation*	*Rotating type- Brush less Excitation system*	*Case study on small signal stability analysis of Single-Machine Infinite Bus (SMIB) with classical machine model*	*Stabilizers based on shaft speed signal*
	SLO-2	*Computation of Critical clearing angle-critical clearing time- Numerical problem*	*Voltage and flux linkage equations in dqo reference frame (Park's equations)*	*Static Excitation system*	*Block diagram representation of SMIB system*	*Delta-P-Omega stabilizer*
S-8	SLO-1	*Introduction to Voltage stability*	*Steady state analysis-voltage, Current, and flux linkage relationships.*	*Potential-source controlled rectifier-static type excitation system*	*Calculation of synchronizing torque coefficient, system matrix, eigenvalues and participation factor*	*Frequency based stabilizer, Digital stabilizer*
	SLO-2	*Voltage collapse- Illustrate with two bus radial system*	*Phasor representation-Steady state equivalent circuit.*	*Modelling and computer simulation of excitation system*	*The effect of damping torque in the stability of SMIB system with classical machine model*	*Enhancement of stability by Excitation control design*
S-9	SLO-1	*Large disturbance and small disturbance*	*Simplified model (constant flux linkage)-Classical machine model.*	*Detailed excitation system model- DCIA*	*Speed and rotor angle time response of SMIB system with classical machine model*	*Exciter gain, Phase-lead compensation, stabilizing signal washout, Stabilizer gain-Stabilizer limits*
	SLO-2	*Voltage stability- Mid-term and Long-term stability*	*Steady State analysis of Synchronous machine using simulation software*	*AC1A and AC4A model of excitation system*	*Synchronous machine model using suitable simulation software*	*General observation on excitation control design*

Course Code	18EEE410T	Course Name	MODERN POWER SYSTEM ANALYSIS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18EEC303T	Co-requisite Courses	NIL	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Explain the numerical method involved in for optimal power flow analysis*
CLR-2 :	*Analyse the significance of contingency analysis and power system security states*
CLR-3 :	*Outline the concepts of distribution system*
CLR-4 :	*Understand and analyze the different concepts of stability*
CLR-5 :	*Demonstrate the concepts of state estimation of power systems*
CLR-6 :	*Evaluate the overall analysis of power system problems starting from transmission to distribution*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Acquire the knowledge on the numerical methods of optimal power flow analysis*	3	75	75	H	M	M	M	M	-	-	-	-	-	-	-	M	M	-
CLO-2 :	*Analyse the concepts of power system security*	3	75	75	H	M	M	M	M	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Familiarize the knowledge on distribution system and its application*	3	75	75	H	M	M	M	M	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Categorize the study of stability analysis*	3	75	75	H	M	M	M	-	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Gain knowledge on the concept of state estimation in power systems*	3	75	75	H	L	L	-	-	-	-	-	-	-	-	-	M	M	-
CLO-6 :	*Create ,design and analyze the power system issues starting from transmission to distribution*	3	75	75	H	M	M	M	M	-	-	-	-	-	-	-	M	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Formulation of power flow problem*	*Overview of security analysis*	*Basic concepts of stability*	*Introduction - Primary distribution systems*	*Need for state estimation*
	SLO-2	*Solution through Newton-Raphson method*	*Need for Power system Security*	*Classifications of stability*	*Types of primary distribution systems*	*Basic methods of state estimation*
S-2	SLO-1	*Problems solving- Newton-Raphson method*	*Factors affecting power system security*	*Small signal stability of a single machine infinite bus system*	*Secondary distribution systems*	*Comparison of power flow and state estimation problems*
	SLO-2	*Fast decoupled power flow solutions*	*Introduction to Contingency analysis*	*Small signal stability-solving numerical*	*Types of Secondary distribution systems*	*Least Square State Estimation*
S-3	SLO-1	*Problems solving-Fast Decoupled method*	*Contingency analysis-Addition and removal of one line*	*Transient stability-Runge kutta method*	*Ring main distribution systems*	*Weighted Least Square State Estimation*
	SLO-2	*Comparison of Load flow methods*	*Computation of bus impedance matrix from bus admittance matrix*	*Runge kutta method - Solving numericals*	*Ring main distribution systems-solving numerical*	*State estimation from Non-linear measurements*
S-4	SLO-1	*Power flow studies-simulation*	*Problem solving-contingency analysis*	*Runge kutta method - Solving numericals*	*Load flow of radial distribution networks-solving numerical*	*Static state estimation for power systems*
	SLO-2	*Power flow studies-simulation*	*Problem solving-contingency analysis*	*Runge kutta method - Solving numericals*	*Load flow of radial distribution networks - solving numerical*	*Weighted Least Square State Estimation – solving numericals*
S-5	SLO-1	*DC power flow solutions*	*Calculation of new bus voltage due to addition and removal of one line-simulation*	*Transient stability- Simulation*	*General design characteristics of distribution system*	*Detection of bad measurements*
	SLO-2	*AC-DC power flow model*	*Solving numericals*	*Voltage stability*	*Primary distribution system - design*	*Identification of bad measurements*
S-6	SLO-1	*Optimal Power Flow-Introduction*	*Linear sensitivity factors*	*Transmission characteristics*	*Primary distribution system - design*	*Detection and identification of bad measurements*
	SLO-2	*Gradient method*	*Problem solving-Linear sensitivity factors*	*Transmission characteristics*	*Voltage,scheme and feeder size selection*	*solving numerical*
S-7	SLO-1	*Problem solving-Gradient method*	*Problem solving-Linear sensitivity factors*	*Generator characteristics*	*Secondary distribution system - design*	*Network observability*
	SLO-2	*Newton's method*	*AC power flow method*	*Generator characteristics*	*Lamp flicker-Origin*	*Problem solving Network observability*

S-8	SLO-1	*Security constrained optimal power flow*	*Problem solving-AC power flow method*	*Load characteristics*	*Types of flicker and remedial measures*	*Pseudo measurements*
	SLO-2	*Optimal generation scheduling*	*Contingency selection*	*Load characteristics*	*Design of capacitors to distribution systems*	*State estimation including Phasor measurement units*
S-9	SLO-1	*Problem solving-optimal generation scheduling*	*Contingency ranking*	*Characteristics of reactive compensating devices.*	*Design of capacitors to distribution systems-solving numerical*	*State estimation including Phasor measurement units*
	SLO-2	*Optimal unit committment*	*Security analysis and contingency evaluation*	*Typical scenario of voltage collapse*	*Design of capacitors to distribution systems-solving numerical*	*Application of state estimation in power system in load forecasting*

Course Code	18EEE411T	Course Name	POWER SYSTEM DEREGULATION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Electrical & Electronics Engineering	Data Book / Codes/Standards	NIL		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the basics of deregulation and economics of power system*
CLR-2 :	*Learn Unit commitment, optimal power flow and its constraints*
CLR-3 :	*Understand the activity of GENCO and independent system operator*
CLR-4 :	*Get familiarized with the various transmission services*
CLR-5 :	*Gain knowledge on the role of security and congestion management in deregulated power system.*
CLR-6 :	*Create overall restructuring of power system starting from generation to power transmission and distribution*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Illustrate the basics of deregulation in conventional power system*	2	75	75	H	H	-	-	-	-	-		-	-	-	-	H	H	-
CLO-2 :	*Use the concept of Unit commitment, optimal power flow in electric power system*	2	75	75	H	H	-	-	-	-	-	M	-	-	-	-	H	H	M
CLO-3 :	*Apply the knowledge on the various role of ISO in deregulated environment*	2	75	75	H	M	-	-	-	-	-	-	-	-	-	-	H	H	-
CLO-4 :	*Analyze various transmission system problems*	2	75	75	H	M	--	-	-	-	-	-	-	-	-	-	H	H	-
CLO-5 :	*Utilize the basic role of security and congestion management and its solutions*	3	75	75	H	M	M	M	-	-	-	M	-	-	-	-	H	H	M
CLO-6 :	*Analyze the power system generation and transmission losses with various components in deregulated system*	3	75	75	H	M	M	M	-	-	-	M	-	-	-	-	H	H	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction- Deregulation*	*Optimal Power Flow problem model*	*Operational planning activities of ISO*	*embedded cost based transmission pricing*	*Introduction to Congestion,*
	SLO-2	*Structure of a deregulated electricity system*	*Limits on Real and Reactive power flow*	*Single Auction Market*	*Postage stamp method*	*reasons for transfer capability limitation*
S-2	SLO-1	*Different entities in deregulated electricity markets*	*OPF Examples (quantitative analysis)*	*Double Auction Market*	*MW mile method(quantitative analysis)*	*Importance of congestion management*
	SLO-2	*Power system Deregulation in different countries*	*Characteristic features of OPF & its applications*	*ISO in Pool markets*	*Incremental cost based transmission pricing*	*Features of congestion management*
S-3	SLO-1	*competitive electricity markets*	*Unit commitment in conventional electricity market*	*ISO in Bilateral markets*	*Short run marginal cost based method*	*Classification of congestion management methods*
	SLO-2	*Benefits from a competitive electricity market*	*UC Constraints*	*Operational planning activities of GENCO*	*Long run marginal cost based method*	*Calculation of ATC*
S-4	SLO-1	*Classification of electricity markets*	*price based Unit commitment Design in deregulated electricity market*	*GENCO in pool and bilateral markets*	*Revenue Reconciliation*	*Economic instruments for Handling congestion*
	SLO-2	*Pool co and Bilateral Markets*	*Constraints in price based Unit commitment*	*Market participation issues*	*Transmission open access and pricing mechanisms in various countries*	*Congestion pricing methods*
S-5	SLO-1	*effects of deregulation*	*Competitive bidding., strategic bidding*	*Power exchange*	*Cost components of Transmission System Operator (TSO)*	*Market splitting*
	SLO-2	*Pre dispatch and instantaneous dispatch*	*parameters affecting bidding strategies*	*market operations*	*Transfer capability on open access transmission system*	*counter trade*

S-6	SLO-1	*Review of Economic Load Dispatch problem (ELD)*	*Formation of power pools*	*Market power- standard cost*	*Developments in international transmission pricing*	*Transmission rights*
	SLO-2	*Constraints in ELD problem*	*Economic Exchange of Energy*	*Price forecasting*	*Transmission Security management in deregulated environment*	*Inter zonal congestion management*
S-7	SLO-1	*Economic Load Dispatch problem In Deregulation*	*Multi area Joint Dispatch (quantitative analysis)*	*Power wheeling*	*Scheduling of spinning reserves in deregulated electric market*	*Intra zonal congestion management*
	SLO-2	*Economic Load Dispatch problem (quantitative analysis)*	*Energy Brokerage system*	*Types of wheeling transactions*	*Introduction of ancillary services*	*Price area congestion management*
S-8	SLO-1	*Conditions for optimum*	*Role of Independent system operator (ISO),*	*Transmission open access and types*	*Types of Ancillary services*	*Capacity alleviation method*
	SLO-2	*Significance of Lagrange Multipliers*	*Types of electricity market*	*Cost components in transmission*	*Classification of ancillary services*	*Contingency reserve services*
S-9	SLO-1	*Security constrained Economic dispatch*	*Structure of UK Electricity deregulated market*	*pricing of power transactions*	*Ancillary services management in various countries*	*Indian electricity act*
	SLO-2	*Preventive and corrective rescheduling*	*Structure of Nordic Electricity deregulated market*	*Ideal Wheeling Rate*	*Interruptible load options for security management*	*Indian power exchange*

							3	0	0	3

Pre-requisite Courses	18EEC301J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical & Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Model and represent the systems in state variable form*
CLR-2 :	*Understand the need of controllability and observability*
CLR-3 :	*Provide adequate knowledge in the phase plane analysis*
CLR-4 :	*Give a basic knowledge in describing function analysis*
CLR-5 :	*Educate on stability analysis of systems using Lyapunov's theory*
CLR-6 :	*Create a mindset to model and analyze the system stability using system theory concepts*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Apply the state space method to model Linear and Nonlinear system*	3	75	75	H	H	M	M	-	-	-	-	-	-	-	-	M	M	-
CLO-2 :	*Test the controllability and observability of the system*	3	75	75	H	H	M	M	-	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Apply the concepts of phase plane analysis to linear and Nonlinear system*	3	75	75	H	H	M	M	-	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Formulate the Describing function for Nonlinear system*	3	75	75	H	H	M	M	-	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Determine the stability of Nonlinear system using Lyapunov and Variable- Gradiant Method*	3	75	75	H	H	H	H	-	-	-	-	-	-	-	-	M	M	-
CLO-6 :	*Apply system theory concepts to model and analyze real time system*	3	75	75	H	H	H	H	-	-	-	-	-	-	-	-	M	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Concept of State-tate equation for Dynamic Systems*	*Concept of Controllability & Observability*	*Features of linear and non-linear systems*	*Basic concepts of describing functions*	*Introduction to Stability Analysis of Nonlinear System*
	SLO-2	*Time invariance and linearity- Non uniqueness of state model*	*Controllability Test for Time Varying and Time In varying Case: Minimum Energy Control*	*Common physical non-linearity's*	*Describing Function and Harmonic Balance*	*Equilibrium Points*
S-2	SLO-1	*State Diagram*	*Observability test for Time Varying and Time In- varying system*	*Methods of linearizing non-linear systems*	*Describing function analysis of nonlinear systems*	*Stability in the sense of Lyapunov*
	SLO-2	*Physical System: Linear Continuous Time model*	*Principle of Duality*	*Introduction to phase portraits*	*Importance of Describing Function*	*BIBO Stability*
S-3	SLO-1	*Physical System: Nonlinear system Model*	*Controllability of State model in Jordan Canonical Form*	*Concept of phase portraits*	*Derivation of describing functions for Hysteresis non-linearity*	*Stability of Linear Time Invariant Systems*
	SLO-2	*Local Linearization of Nonlinear Model*	*Observability of State model in Jordan Canonical Form*	*Singular points*	*Derivation of describing functions for Dead zone non-linearity*	*Problem Solving to find stability of Linear Time Invariant System*
S-4	SLO-1	*Solution of Nonlinear Continuous Time State Equation*	*Controllability and Observability Canonical Forms of State mode*	*Existence of Limit cycles*	*Basics of Backlash non-linearity*	*Introduction to Nonlinear Continuous Time Autonomous Systems*
	SLO-2	*Runge Kutta Method*	*Controllable Subspace, Unobservable Subspace*	*Use of Limit cycle in control system*	*Derivation of describing functions for Backlash non-linearity*	*Equilibrium Stability of Nonlinear Continuous Time Autonomous Systems*
S-5	SLO-1	*Solution of Linear Time Varying Continuous Time State Equation*	*Canonical Decomposition Theorem*	*Construction of phase portraits*	*Derivation of describing functions for Ideal Relay non-linearity*	*Basics of the Direct Method of Lyapunov*

	SLO-2	*The Homogeneous Solution*	*Input- Output Maps from State Model for Linear and Nonlinear System*	*Problem solving in phase portraits*	*Derivation of describing functions for Hysteretic Relay non-linearity*	*Direct Method of Lyapunov for Linear Continuous-Time Autonomous Systems*
S-6	SLO-1	*Evaluation of State Transition Matrix*	*Output Controllability*	*Phase plane analysis of linear System*	*Basics of Saturation non-linearity*	*Finding Lyapunov Functions for Nonlinear Continuous Time Autonomous Systems*
	SLO-2	*Non Homogeneous Solution*	*Dead-beat Controller*	*Problem solving in Phase plane for linear system*	*Derivation of describing functions for Saturation non-linearity*	*Krasovskii Method of Stability Analysis*
S-7	SLO-1	*Solution of Linear Time In-varying Continuous Time State Equation*	*Reducibility of Linear System*	*Phase plane analysis of Nonlinear System*	*General Conditions for stability of Nonlinear system*	*Finding Lyapunov Functions for Nonlinear Continuous Time Autonomous Systems*
	SLO-2	*Evaluation using Similarity Transform*	*Reducibility of Nonlinear System*	*Problem solving in Phase plane for Non-linear system*	*Describing function Conditions for stability of Nonlinear system*	*Variable- Gradient Method*
S-8	SLO-1	*Solution of Linear Time In-varying Continuous Time State Equation*	*Linear System Realizations: Phase Variable Canonical Form*	*Isocline method*	*Possibilities of Oscillations occurrence in Non Linear System*	*Transients in Non Linear System*
	SLO-2	*Evaluation using Cayley Hamilton Technique*	*Nonlinear System Realizations: Phase Variable Canonical Form*	*Importance of Isocline Method in Non Linear control system*	*Stability analyses of oscillations in Nonlinear system*	*Use of Lyapunov to Estimate Transients*
S-9	SLO-1	*Solution of Linear Time In-varying Continuous Time State Equation*	*Linear System Realizations: Jordan Canonical Form*	*Basics of Inverted Pendulum*	*Introduction to DC Motor Model*	*Stability Analysis Case Study related with Power Engineering Application*
	SLO-2	*Evaluation using Inverse Laplace Transform*	*Nonlinear System Realizations: Jordan Canonical Form*	*Example of Nonlinear System: Inverted Pendulum on a Cart*	*Describing function analysis of DC Motor with Permanent Magnet*	*Stability Analysis Case Study related with Power Engineering Application*

							3	0	0	3

Pre-requisite Courses	18EEC301J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce the basics of Robust control principles*
CLR-2 :	*Solve the various problems in linear systems different stabilization methods*
CLR-3 :	*Compute the performance of linear systems by the measured parameters*
CLR-4 :	*Understand the performance and limitations of Feedback control*
CLR-5 :	*Identify the solutions for H∞ control and µSynthesis*
CLR-6 :	*Create a overall structure for Robust control system*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Understand the basics of Robust control principles*	2	80	75	H	M	M	-	-	-	-	-	-	-	-	-	H	M	-
CLO-2 :	*Calculate the parameters of Linear systems by using different stabilization methods*	3	80	75	H	H	M	M	M	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Analyze the performance of linear systems by the measured parameters*	3	80	75	H	H	H	M	-	-	-	-	M	-	-	-	H	M	-
CLO-4 :	*Acquire knowledge on Observer, Feedback control systems*	3	80	75	H	M	H	M	-	-	-	-	M	M	-	-	H	H	-
CLO-5 :	*Analyze the basics of H∞ control and µSynthesis and its solution*	3	80	75	H	H	M	M	-	-	-	-	M	M	-	-	H	M	-
CLO-6 :	*Design a Robust control system for Real time Control Applications*	3	80	75	H	H	M	M	M	-	-	-	M	M	-	-	H	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction Engineering Background of RobustControl*	*Introduction Fundamentals ofLinearSystem*	*Introduction to Stabilization ofLinearSystems*	*Introduction to Performance Limitation ofFeedbackControl*	*Introduction to H ∞ Control &µSynthesis*
	SLO-2	*A Brief History of RobustControl*	*Structural Properties ofDynamicSystem*	*StateFeedback*	*PoissonIntegralFormula*	*ControlProblemand H ∞ Control Norm*
S-2	SLO-1	*Methodologies of RobustControl*	*Stability - Bounded-InputBounded-OutputStability*	*Observer - Full-OrderObserver*	*All-Pass and Minimum-PhaseTransferFunctions*	*Input–OutputRelationofTransferMatrix's H ∞ Norm*
	SLO-2	*Small-GainApproach*	*InternalStability*	*MinimalOrderObserver*	*Limitation on Achievable Closed-loopTransferFunction*	*Disturbance Control andWeightingFunction*
S-3	SLO-1	*Positive Real Method*	*Pole–Zero Cancellation*	*Parametrization ofStabilizingControllers*	*InterpolationCondition*	*LMI Solution 1:VariableElimination*
	SLO-2	*LyapunovMethod*	*StabilizabilityandDetectability*	*Generalized FeedbackControl System*	*Analysis ofSensitivityFunction*	*LMI Solution 2: VariableChange*
S-4	SLO-1	*Robust Regional PolePlacement*	*Problem solving session*	*Problem solving session*	*IntegralRelation*	*Problem solving session*
	SLO-2	*GainScheduling*	*LinearFractionalTransformation*	*ParametrizationofControllers*	*Problem solving session*	*Design of Generalized Plant andWeighting Function*
S-5	SLO-1	*Problem solving session*	*SystemPerformance*	*YoulaParametrization*	*Bode Integral RelationonSensitivity*	*µSynthesis*
	SLO-2	*Basics of Linear Algebra and Function Analysis*	*TestSignals*	*Structure ofClosed-LoopSystem*	*BodePhase Formula*	*Definition of µ andItsImplication*
S-6	SLO-1	*Trace, Determinant, Matrix Inverse, and BlockMatrix*	*Steady-StateResponse & TransientResponse*	*Structure of2-Degree-of-Freedom Systems*	*Limitation ofReference Tracking*	*Propertiesofµ*
	SLO-2	*Problem solving session*	*Comparison of Open-Loop andClosed-LoopControls*	*Implementation of 2-Degree-of-Freedom*	*1-Degree-& 2 Degree of-FreedomSystem*	*D–K IterationDesign*

S-7	SLO-1	*Linear VectorSpace*	*Problem solving session*	*SystemPerformance*	*Relation between Time Domain and FrequencyDomainProperties*	*RegionalPolePlacement*
	SLO-2	*Norm and Inner Product of Vector*	*Basics of Convex Analysis and LMI*	*Problem solving session*	*Parseval'sTheorem*	*Convex Region and ItsCharacterization*
S-8	SLO-1	*LinearSubspace*	*Convex Set and Convex Function*	*TestSignals*	*Fourier Transform and InverseFourierTransform*	*Condition for RegionalPolePlacement*
	SLO-2	*Matrix and Linear Mapping*	*Control Problem andLMI*	*Steady-StateResponse*	*KYPLemma*	*CompositeLMIRegion*
S-9	SLO-1	*Eigenvalue and Eigenvector*	*Interior Point Method*	*TransientResponse*	*Problem solving session*	*Problem solving session*
	SLO-2	*Problem solving session*	*Problem solving session*	*Problem solving session*	*Case Study: Stabilization of aUnicycleRobot*	*Case Study: Transient Stabilization of aPowerSystem*

							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical & Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1	*Understand the concepts and basic structure of Robots*
CLR-2	*Recognize the basics of end effectors and drive systems*
CLR-3	*Enrich the students on the basics of Robotic manipulator and understand the kinematics of serial manipulators*
CLR-4	*Analyze the basics of Sensors and its various applications in Robots.*
CLR-5	*Design the Algorithms for mobile Robot navigation.*
CLR-6	*Utilize the concepts in robotics for the understanding of automation technology*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1	*Interpret the basic structure of Robots and apply it to design the Robots.*	2	75	75	H	H	M	L	-	-	-	-	-	-	-	-	M	M	-
CLO-2	*Acquire knowledge about end effectors and actuators systems*	3	75	75	H	H	H	M	-	-	-	-	-	-	-	-	H	M	-
CLO-3	*Select robotic manipulator and understand the kinematics of serial manipulators*	2	75	75	H	H	H	M	-	-	-	-	-	-	-	-	H	H	-
CLO-4	*Select and implement the sensors for various applications in Robots.*	3	75	75	H	H	H	M	-	-	-	-	-	-	-	-	M	M	-
CLO-5	*Develop the algorithms for mobile Robot navigation.*	3	75	75	H	H	H	H	-	-	-	-	-	-	-	-	H	M	-
CLO-6	*Apply the concepts of robotics in real time applications*	3	75	75	H	H	H	H	-	-	-	-	-	-	-	-	H	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Robotics: Definition Advantage and disadvantage of robots*	*Robot Drives- Actuators*	*Matrix representation*	*Robot Sensors*	*Localization*
	SLO-2	*History of robotics*	*Actuators selection.*	*Fixed – reference frame*	*Selection of sensor*	*Path Planning*
S-2	SLO-1	*Classification of robots*	*Characteristics of actuating system*	*Representation of frame at the origin of a fixed-reference frame*	*Contact and touch sensor*	*Examples oflocalization system*
	SLO-2	*Robot components,*	*Comparisons of actuating system*	*Representation of frame in a fixed reference frame*	*Tactile sensor*	*Brief representations*
S-3	SLO-1	*Robot characteristics*	*Electric Actuators: DC motor*	*Representation of rigid body*	*Gripping force sensing*	*Brief considerations*
	SLO-2	*Co-ordinate systems*	*Brushless DC motor*	*Robot Kinematics - Position analysis*	*Slip sensing*	*Mobile robot localization using practical filters*
S-4	SLO-1	*Robot reference frame*	*Hydraulic actuators*	*Representation of a pure transformation*	*Proximity sensor*	*Map representations*
	SLO-2	*Degrees of freedom*	*Pneumatic actuators*	*Representation of combined transformation*	*range sensor*	*Map considerations*
S-5	SLO-1	*Configuration space*	*Robot end effectors*	*Calculation of transformations*	*Light sensors*	*Simultaneous planning localization and mapping (SLAM)*
	SLO-2	*Operational space*	*Classification of end-effectors*	*Transformations relative to the rotating frame*	*Pressure sensors*	*Path planning*
S-6	SLO-1	*Robots as mechanisms*	*Drive system for grippers*	*Inverse transformation matrix*	*strain gauge based force-torque sensors*	*Path planning challenges*
	SLO-2	*Robot configurations-cartesian*	*Mechanical grippers*	*Inverse transformation matrix of the universe, robot, hand and end effectors frame*	*Position sensor*	*Types of Path planning algorithms*
S-7	SLO-1	*Robot configurations- cylinder*	*Magnetic grippers*	*Forward kinematics-2 DOF of kinematics analysis*	*Displacement sensor*	*Robotics applications with examples*
	SLO-2	*Robot\ configurations- polar*	*Vacuum grippers*	*Forward kinematics-3 DOF of kinematics analysis*	*Sensors-Vision systems*	*Material handling:Pick and place operation*
S-8	SLO-1	*Robot configurations- articulate*	*Adhesive grippers*	*Inverse kinematics- 2 DOF of kinematics analysis*	*Low level vision sensing and digitizing*	*Palletizing and depalletizing*
	SLO-2	*Robot wrist mechanism*	*Selection criteria for grippers*	*Inverse kinematics- 3 DOF of kinematics analysis*	*Vision cameras*	*Machine loading and unloading*
S-9	SLO-1	*Precision and accuracy of robot*	*Gripper force analysis and design*	*Euler angles*	*Charge coupled device line scan sensor*	*Welding, A sensor based joystick controlled teleoperated manipulator*
	SLO-2	*simple problems in precision and accuracy of robot*	*simple problems in Gripper*	*Issues in inverse kinematics*	*Applications of robotics vision system*	*A sensor based joystick controlled teleoperated manipulator*

CLO-4 :	*Develop the digital IIR filters*	3	80	75	H	H	H	H	L	-	-	-	-	-	-	-	H	M	-
CLO-5 :	*Design the digital FIR filters*	3	80	75	H	H	H	H	L	-	-	-	-	-	-	-	H	M	-
CLO-6 :	*Evaluate the various types of signals and systems*	3	80	75	H	H	H	H	L	-	-	-	-	-	-	-	H	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Analog signals, discrete time signals and digital signals*	*Continuous time systems*	*System representation through differential equations*	*Design procedure of Analog Butterworth Filter*	*Design procedure of FIR filter by window technique*
	SLO-2	*Deterministic and random signals*	*Discrete time systems*	*System representation through difference equations*	*Design of Analog Butterworth Filter*	*Rectangular and Hamming windows*
S-2	SLO-1	*Periodic and aperiodic signals*	*Memory less and memory systems*	*Realization of discrete time systems: Direct form - I*	*Design procedure of Analog Chebyshev Filter*	*Hanning and Blackmann Windows*
	SLO-2	*Energy and power signals*	*Causal and non-causal systems*	*Realization of discrete time systems: Direct form - II*	*Design of Analog Chebyshev Filter*	*Kaiser window*
S-3	SLO-1	*Even-odd signals*	*Linear and non-linear systems*	*Realization of discrete time systems: Cascade form*	*Bilinear transform technique*	*Design of low pass FIR filter: Calculation of window coefficients*
	SLO-2	*Causal and non-causal signals*	*Time variant and time invariant systems*	*Realization of discrete time systems: Parallel form*	*Quantitative treatment of Bilinear transform technique*	*Design of low pass FIR filter: Calculation of filter coefficients*
S-4	SLO-1	*Standard continuous time signals: Unit step and Impulse signals*	*Stable and unstable systems*	*Discrete Fourier Transform (DFT)*	*Impulse invariance technique*	*Design of high pass FIR filter: Determination of window coefficients*
	SLO-2	*Standard continuous time signals: Sinusoidal and Exponential signals*	*FIR and IIR systems*	*Calculation of DFT*	*Quantitative treatment of Impulse invariance technique*	*Design of high pass FIR filter: Determination of filter coefficients*
S-5	SLO-1	*Standard discrete time signals: Unit step and Impulse signals*	*Recursive and non-recursive systems*	*DFT properties: Linearity, Periodicity, Circular convolution*	*Design of IIR Butterworth digital filters using bilinear transform technique*	*Design of band pass FIR filter: Calculation of window coefficients -*
	SLO-2	*Standard discrete time ignals:Sinusoidal and Exponential signals*	*System properties via the impulse response: Causality*	*DFT properties: Time reversal, Circular time shift, Parseval's theorem*	*Design of IIR Chebyshev digital filters using bilinear transform technique*	*Design of band pass FIR filter: Calculation of filter coefficients*
S-6	SLO-1	*Transformations of the independent variable: Addition, Multiplication and Shifting*	*System properties via the impulse response: Memory*	*DFT using DIT-FFT algorithm*	*Design of IIR Butterworth digital filters using impulse invariance technique – Self study*	*Design of band stop FIR filter: Determination of window coefficients – Seminar*

	SLO-2	*Transformations of the independent variable: Scaling and Reversal*	*Relation between continuous and discrete time systems*	*Calculation of DFT using DIT-FFT*	*Design of IIR Chebyshev digital filters using impulse invariance technique – Self study*	*Design of band stop FIR filter: Determination of filter coefficients – Seminar*
S-7	SLO-1	*Sampling and Sampling Theorem*	*Continuous time convolution*	*DFT using DIF-FFT algorithm*	*Realization of IIR Butterworth digital filters*	*Realization of FIR filters: Transversal realization structure*
	SLO-2	*Quantization and Coding*	*Quantitative treatment of Continuous time convolution*	*Calculation of DFT using DIF-FFT algorithm -Assignment*	*Realization of IIR Butterworth digital filters*	*Realization of FIR filters: Linear phase realization structure*
S-8	SLO-1	*Aliasing*	*Discrete time convolution*	*Inverse DFT*	*Need of Pre-warping*	*Realization of FIR filters: Polyphase realization structure*
	SLO-2	*Effects of Aliasing*	*Quantitative treatment of Discrete time convolution*	*Calculation of IDFT*	*Pre warping – Frequency transformation in digital domain*	*Realization of FIR filters: Cascade structure*
S-9	SLO-1	*Simulation on continuous time signals*	*Simulation on Continuous time systems*	*Circular convolution*	*Simulation on digital IIR Butterworth filters*	*Simulation on digital FIR low and high pass filters*
	SLO-2	*Simulation on discrete time signals*	*Simulation on discrete time systems*	*Quantitative treatment of Circular convolution -Assignment*	*Simulation on digital IIR Chebyshev filters*	*Simulation on digital FIR band pass and band stop filters*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basics of Classical Feedback Control*	*Introduction to Model Predictive control*	*Introduction to adaptive control*	*Introduction to Sliding Mode Control*	*Introduction to Optimal Control*
	SLO-2	*Introduction to multivariable control systems*	*MPC Strategy, Historical perspectives.*	*Effects of process variations*	*Properties of Sliding Motion*	*Importance of Optimal Control*
S-2	SLO-1	*Transfer functions for MIMO systems*	*MPC Elements: Prediction Model*	*Introduction to Adaptive control schemes*	*Pseudo Sliding With a Smooth Control*	*Basics of Parameter Optimization*
	SLO-2	*Negative Feedback Control system in MIMO system*	*MPC Elements: Objective Function*	*Types of Adaptive Control Schemes*	*State Space Approach in Sliding Mode*	*Parameter Optimization in Optimal Control*
S-3	SLO-1	*Multivariable frequency response analysis*	*Model forms for model predictive control Forms*	*Adaptive control problem*	*Sliding Mode Control: Problem Statement*	*Performance Index in Optimal Control*
	SLO-2	*Directions in Multivariable Systems*	*Dynamic Matrix Control*	*Non-parametric identification*	*Existence Solution and Equivalent Control*	*Constraints in Optimal Control*
S-4	SLO-1	*Introduction to multivariable system mapping-poles & zeros*	*Model predictive control Forms*	*Deterministic Self Tuning Regulators*	*Properties of Sliding Motion*	*Calculus of variance in Optimal Control*
	SLO-2	*Singular value decomposition*	*Model Algorithmic Control*	*Pole Placement in Adaptive Control*	*Properties of Sliding Motion*	*Basic Concepts, Functions in optimal Control*
S-5	SLO-1	*Limitations On Performance In MIMO Systems:: Functional controllability*	*Model predictive control Forms*	*Indirect Self Tuning Regulators*	*The reachability Problem in Sliding Mode Control*	*Optimum of a Function*
	SLO-2	*Limitations imposed by time delays*	*Predictive Functional Control*	*Continuous Time Self tuners*	*Single input Control Structure*	*Optimum of a Functional*
S-6	SLO-1	*Limitations On Performance In MIMO Systems*	*Generalized Predictive Control*	*Introduction to Stochastic Tuning Regulators*	*Unit Vector Approach: Existence in Ideal Sliding Mode*	*The basic variational Problem*
	SLO-2	*Limitations imposed by RHP zeros*	*Introduction and Formulation of Predictive Control*	*Predictive Self Tuning Regulators*	*Description of the sliding Motion by Unit Vector Approach*	*Second Variation Problem*

S-7	SLO-1	*Trade-offs in MIMO feedback design*	*Introduction to Multivariable Model Predictive Control*	*Stochastic Adaptive Problem*	*Introduction to types of Sliding Mode Design Approach (Qualitative)*	*Introduction to linear quadratic optimal control system*
	SLO-2	*Traditional LQG and LQR problems*	*Generalized Model of Multivariable Predictive Control*	*Dual Control in stochastic Predictive Control*	*Introduction to types of Sliding Mode Design Approach (Quantitative)*	*linear quadratic optimal control system Model*
S-8	SLO-1	*Introduction to linear quadratic regulation (LQR) control*	*Constrained Model Predictive Control*	*Introduction to Auto Tuning of Controller*	*Direct Eigen Structure Assignment Approach (Qualitative)*	*Finite Time Linear Quadratic Regulator*
	SLO-2	*Robustness properties of LQR control*	*Constraint General Form, Example*	*PID Controller Auto Tuning*	*Direct Eigen Structure Assignment Approach (Quantitative)*	*Problem Formulation in Finite Time Linear Quadratic Regulator*
S-9	SLO-1	*Introduction to H_2 control*	*Introduction to Robust Model Predictive Control - Application*	*Introduction to Gain Scheduling - Application*	*Introduction to higher order sliding mode control*	*Introduction to LQR system for general performance Index*
	SLO-2	*Introduction to $H\infty$ control*	*Introduction to Robust Model Predictive Control - Application*	*Introduction to Gain Scheduling - Application*	*Problems in Higher order sliding mode control*	*Introduction to LQR system for general performance Index*

Course Code	18EEE413T	Course Name	DISTRIBUTED CONTROL SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn the architecture, Organization and operation of PLC, SCADA and Distributed Control System (DCS)*
CLR-2 :	*Impart knowledge about basic controllers and DCS controller Configuration*
CLR-3 :	*Know the importance of Alarm features in DCSs*
CLR-4 :	*Impart adequate knowledge onMaintenance and Troubleshooting procedures of DCS*
CLR-5 :	*Learn the basics of Advanced Process Controllers in DCSs and Latest trends related to DCS*
CLR-6 :	*Gain Knowledge about basic DCS controllers Alarm system management and advanced process controllers*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Familiarize the concepts and abstractions of distributed systems and their limitations*	2	80	75	H	L	L	L	-	-	-	-	-	-	-	-	M	M	-
CLO-2 :	*Obtain the knowledge of basic controllers and DCS controller Configuration*	2	80	75	H	L	L	-	-	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Enrich the knowledge of Alarm features of DCS*	2	80	75	H	L	M	L	-	-	-	-	-	-	-	-	M	L	-
CLO-4 :	*Analyse the system for the awareness of the issues and procedures to perform DCS Maintenance and Troubleshooting*	3	80	75	H	H	M	M	-	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Acquire the basics of Advanced Process Controllers in DCSs and Latest trends related to DCS*	3	80	75	H	H	H	H	-	-	-	-	-	-	-	-	M	M	-
CLO-6 :	*Evaluate and specify DCSs to ensure efficient and optimum operation of Plant*	3	80	75	H	H	H	H	-	-	-	-	-	-	-	-	M	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Programmable Logic Controller (PLC) – brief overview*	*Introduction to basic controller, Identification of the controller boards*	*Alarm system management: An alarm system, Functions of the plant or process operator*	*Introduction to Distributed control system reporting, Operation of advanced DCS using multi-screen display*	*Advanced Process Controllers:Feed forward Control*
	SLO-2	*Block Diagram of PLC*	*Discrete and logic control, Sequential and batch control*	*Functions of an alarm system, An effective alarm system*	*Cross screen invocation and linking*	*Cascade Control*
S-2	SLO-1	*An overview of SCADA systems: Introduction and Basics of SCADA system*	*Basic DCS controller configuration: Introduction and Control modes*	*Design overview*	*Alarm reporting, generation and acceptance*	*Statistical Process Control*
	SLO-2	*SCADA key features*	*Tracking and initialization in control slots used for cascade control*	*Human and ergonomic factors*	*Different types of logs and reports configurable on a DCS*	*Basics of advanced process control and optimization*
S-3	SLO-1	*Remote terminal units (RTUs)*	*Control functions*	*Structure of a good alarm system*	*Introduction to Distributed control system (DCS) configuration*	*Latest DCS Trends:Monitoring and control in the Field*
	SLO-2	*Typical requirements for an RTU system*	*Control algorithms*	*Safety integrity level (SIL)*	*System/project tree structure, DCS system database*	*Industrial Internet*
S-4	SLO-1	*PLCs used as RTUs and Consideration and benefits of SCADA system*	*Sequential Controllers for Batch Processing*	*Definition of strategy, Strategy for alarm system design*	*Configuration of control functions*	*Internet of Things*
	SLO-2	*DCS versus SCADA terminology*	*Defining equipment procedures*	*Strategy for alarm system maintenance and management at the site/plant, Generation of minimum design documentation for each alarm*	*Configuration of operator/monitoring functions*	*Mobile and remote devices*
S-5	SLO-1	*SCADA software package*	*Phase logic programming*	*Measurement of the alarms, Field measurements for deriving alarms*	*Configuration of system hardware structure*	*Cloud ProcessingMonitoring and control in the Cloud*
	SLO-2	*Hardware, software, system interfacing*	*Phase logic interface*	*Hardware for alarm processing, Alarm displays*	*Configuration of system software*	*Typical DCS and SCADA systems: Honeywell Plant Scape system*
S-6	SLO-1	*Overview of Distributed Control Systems: Introduction and Basic concepts of Distributed Computing*	*Logic block functions in advanced controller*	*Testing of alarms, Generation of various types of alarms*	*Documentation and Commissioning*	*Foxboro I/A series DCS*

	SLO-2	*Evolution of Distributed Computing System*	*DCS controller configuration*	*Selection of alarm settings*	*Introduction to Maintenance & Troubleshooting*	*Delta system*
S-7	SLO-1	*Present market trends in DCS*	*Introduction to Communications for DCS & SCADA systems: Purpose and Basic Communications principles*	*Setting alarm priority*	*Maintenance requirements of system and system elements*	*Citect*
	SLO-2	*Basic DCS specification*	*Balanced and unbalanced transmission lines*	*Design of field sensors for generating alarms*	*Requirements for in-built diagnostic and maintenance routines*	*Wonderware*
S-8	SLO-1	*General description of a commercial DCS*	*4 EIA-232 interface standards (CCITT V.24 interface standard)*	*Logical processing of alarms*	*Requirement for installation of UPS system*	*Distributed control system applications: Use of DCS in oil and gas processing environment*
	SLO-2	*Advantage of DCS systems*	*The EIA-485 interface standard*	*Design of alarm list displays*	*Recovery of a DCS following power outage*	*Use of DCS in pulp and paper environment*
S-9	SLO-1	*DCS selection criteria*	*Interoperability, ModBus protocol*	*Measurement of performance*	*Proper troubleshooting methods, identify typical Communication malfunctions and faults, Identifying failures, malfunctions, and faults*	*Use of DCS in petroleum-refining environment*
	SLO-2	*DCS architecture*	*HART protocol, The promise of FieldBus and DeviceNet and Benefits*	*Usefulness of alarms*	*Diagnostics of Communication faults*	*Distributed control systems project implementation*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Design of Feedback Control Systems*	*Introduction to Design of State Variable Feedback Systems*	*Introduction to Controllability and Observability*	*Introduction to Robust control system*	*Lyapunov's stability*
	SLO-2	*Approaches to System Design*	*Advantages of State Space Representation*	*Conditions for Controllability and Observability*	*Review of norms for signals and systems*	*Stability of Autonomous Systems*
S-2	SLO-1	*Cascade Compensation Networks*	*State-space Equations*	*Algebraic definitions for Controllability and Observability*	*Review of Nyquist Criterion and Classical Stability Margin*	*Stability of linear and non-linear autonomous systems*
	SLO-2	*System Design Using Integration Networks*	*State model of LTI and SISO linear systems*	*Full-state feedback control design*	*The small Gain Theorem and Applications of Small Gain Theorem to the Robust Control*	*Lyapunov's indirect method*
S-3	SLO-1	*Design procedure for Phase-Lead network Using the Bode Diagram*	*State space representation using physical variables*	*Need for Observer*	*Robust control systems and system sensitivity*	*Lyapunov's direct method*
	SLO-2	*Design example: Phase-Lead design for different types system*	*State space representation using phase variables*	*Structure and properties of observer*	*System sensitivities to parameter perturbations*	*optimal control positive definite function*
S-4	SLO-1	*Design procedure for Phase-Lead network Using the root locus*	*State space models of DC motor*	*Integrated full-state feedback and observer*	*Analysis of robustness*	*optimal control negative definite function*
	SLO-2	*Design example: Phase-Lead design for different types system*	*State space models of inverted pendulum*	*Pole placement for single-output systems*	*System with uncertain parameters of robust control system*	*Positive semi-definite functions*
S-5	SLO-1	*Design procedure for Phase-Lag network Using the Bode Diagram*	*Decomposition of Transfer Functions- Direct Decomposition*	*Compensator design by separation principle*	*Considerations in design of robust control system Design*	*Negative semi-definite functions*
	SLO-2	*Design example: Phase-Lag design for different types of system*	*Cascade and parallel Decomposition*	*Reference inputs*	*Design of robust PID controlled systems*	*Lyapunov stability criteria*
S-6	SLO-1	*Design procedure for Phase-Lag network Using the root locus*	*Similarity Transformation*	*Types of observer*	*Robust internal mode control systems*	*Introduction to optimal control*
	SLO-2	*Design example: Phase-Lag design for different types system*	*Solution of state equations*	*Compensator design using full order observer*	*Design of internal mode control systems*	*Riccatti Equation*

S-7	SLO-1	*Design on the Bode Diagram Using Analytical Methods*	*Computation of the State Transition Matrix by infinite series method*	*Optimal control systems*	*Loop shaping necessary and sufficient conditions.*	*Linear Quadratic Regulator*
	SLO-2	*System design using analytical technique*	*Computation of the State Transition Matrix by Laplace transformation*	*Determination of optimal control systems*	*Robust stability test.*	*Lasalle's invariance principle*
S-8	SLO-1	*Systems with a Pre-filter*	*Computation of the State Transition Matrix by Cayley-Hamilton Theorem*	*Optimal system with control energy consideration*	*Robust performance test.*	*Instability Theorem*
	SLO-2	*Design for Deadbeat Response*	*Computation of the State Transition Matrix by Canonical Transformation*	*Disturbances and tracking systems*	*Design Examples: the pseudo quantitative feedback system*	*Design Examples-Linear Harmonic Oscillator*
S-9	SLO-1	*System design using control design software*	*Computation of the State Transition Matrix by Sylvester's method*	*Design Examples-Automatic test system*	*Robust Control Systems using Control design software*	*Design Examples-Non-Linear Spring mass system with Damper*
	SLO-2	*Sequential design of disk drive read system*	*Transfer Function from the State-Model*	*Diesel Electric Locomotive control system*	*Sequential design of disk drive read system*	*Design Example-Pendulum with and without friction*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic components of a control system*	*Introduction to sampling*	*Introduction to state variable model*	*Compensator design*	*Introduction- Pole placement*
	SLO-2	*Classification of control systems*	*Sampled data control systems*	*State variable concepts, First , second companion forms*	*Compensating networks types: Cascade and feedback*	*State observers*
S-2	SLO-1	*Elements of an automatic control system*	*Sampled signal flow graph*	*Various canonical forms*	*Cascade Lead compensator design using Bode plot*	*Controller Design by State Feedback*
	SLO-2	*Applications of control system*	*Sampling time and frequency domain description aliasing, hold operation,*	*Jordan canonical models*	*Problems related to lead compensators*	*Stability improvement by state feedback*
S-3	SLO-1	*Introduction to Z-transform*	*Mathematical modeling of sampling process and analysis*	*Analysis-state space models*	*Cascade Lag compensator design using Bode plot*	*Necessary and sufficient condition for arbitrary pole placement*
	SLO-2	*Z-transform Concept*	*First order hold, factors limiting the choice of sampling rate,reconstruction.*	*Problems related to state space model*	*Problems related to lag compensators*	*State regulator design*
S-4	SLO-1	*Properties of Z-transform*	*Sampling and reconstruction of continuous time signals*	*Discrete state variable models*	*Problems related to lead- lag compensators*	*Design of state observers*
	SLO-2	*Z-transform relation with Laplace transform*	*Stability analysis of discrete system*	*Elementary principles.*	*Digital implementation of lead and lag controllers*	*Full Order Observer Design*
S-5	SLO-1	*Inverse z-Transforms and Problems*	*Jury stability test*	*Characteristic equation, state transition matrix*	*Design of digital control systems with deadbeat response*	*Reduced Order Observer Design*
	SLO-2	*Mapping of s-plane to z-plane*	*Bi-linear transformation*	*Solution to discrete state equation*	*Practical issues with deadbeat response design*	*Evaluation of State Feedback Gain Matrix*
S-6	SLO-1	*Pulse transfer function*	*Problems related to stability analysis*	*Stability of discrete state space models*	*Sampled data control systems with deadbeat response*	*State feedback with integral control*

	SLO-2	*Pulse transfer function of closed loop system*	*Digital PID controllers.*	*Cayley -Hamilton theorem*	*Introduction to software tools used in control system for compensator design*	*Digital control system with state feedback.*
S-7	SLO-1	*Introduction to the representation of discrete time systems*	*PID tuning and its importance*	*Controllability and observability*	*Coding in simulation software*	*Linear Quadratic Regulator (LQR) design*
	SLO-2	*Time response of discrete time systems*	*Techniques of controller tuning*	*Analysis of Controllability and observability*	*Exercises for solving problems related to compensators design*	*Formulation of LQR problem-*
S-8	SLO-1	*Time response specifications*	*Manual tuning Zeigler-Nichols method based on open loop and closed loop responses*	*Stability- Lyapunov stability theorem*	*Software implementation using microprocessors and microcontrollers*	*Optimal estimation- Kalman filter*
	SLO-2	*Application of the z transform for discrete time signals and systems.*	*Application of controllers used for control system*	*Analysis of Lyapunov stability*	*Microcontroller based temperature control systems*	*Solution to continuous and discrete systems - Design examples.*
S-9	SLO-1	*Problems related to time response for standard test signals*	*Controller design using root locus*	*Systems with dead time*	*Speed control of motor load system*	*Introduction to optimal control*
	SLO-2	*Problems related to time domain specifications*	*Root locus based controller design using software tools*	*Problems related to controllability and observability*	*Microcontroller based motor speed control systems.*	*Parameter optimization*

Course Code	18EEE321T	Course Name	PHOTONICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce the basics principles of photonics*
CLR-2 :	*Solve the various problems in Light beams and Variable polarization*
CLR-3 :	*Analyze the performance of surface and cavity nanophononics*
CLR-4 :	*Understand the process and performance of Multiphoton*
CLR-5 :	*Analyze the basics of Electromagnetic duality, Slow and fast light principles*
CLR-6 :	*Create a over all structure for Photonics system*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the basics of photonics principles*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-2 :	*Calculate the parameters of Light beams and Variable polarization*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-3 :	*Compute the performance of surface and cavity nanophononics*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-4 :	*Acquire knowledge on Multiphoton process*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-5 :	*Identify the solutions for slow and fast light*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-6 :	*Design a Photonics system for Real Time Applications*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*M*	*M*	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Photon in Perspective*	*Light Beams with Spatially Variable Polarization*	*Surface and Cavity Nanophononics*	*Multiphoton Processes*	*Lighting Principles*
	SLO-2	*Photon Localization*	*Poincare Modes of Beams*	*Basic Formalism*	*Molecular Two-Photon Absorption: Basic Principles*	*Introduction to Slow and Fast Light*
S-2	SLO-1	*Wavefunction*	*Polarization Singularities*	*Dipole Emitter Near Edge*	*Molecular Two-Photon Fluorescence*	*Mechanisms of Slow Light*
	SLO-2	*The Quantum Vacuum*	*Quantum Optics*	*Quantum Correlations*	*Applications and Future Prospects*	*Physics with Slow and Fast Light*
S-3	SLO-1	*Virtual Photons*	*Open Systems: Inputs and Outputs*	*Entanglement*	*Orbital Angular Momentum*	*Some Applications of Slow and Fast Light*
	SLO-2	*Structured Light*	*Photon Counting*	*Wedge Cavities*	*Historical Introduction*	*Fundamental Limits on Slow Light*
S-4	SLO-1	*Photon Number Fluctuations*	*Cavity*	*Quantum Electrodynamics*	*Creating Beams with OAM*	*Attosecond Physics*
	SLO-2	*Photon Number Phase*	*Circuit QED*	*Molecular QED: Principle of Minimal Electromagnetic Coupling*	*Micro-Manipulation through the Use of OAM*	*Attosecond Streaking Spectroscopy of Atoms and Solids*
S-5	SLO-1	*The Reality of Photonics*	*Squeezed Light*	*Multipolar Hamiltonian*	*Beam Transformations*	*Time-Resolved Photoemission from Atoms*
	SLO-2	*Coherence and Statistical Optics*	*Salient Features of Squeezed States*	*One-Photon Absorption*	*Measuring Beams with OAM*	*Streaked Photoemission from Solids*
S-6	SLO-1	*Classical Theory of Optical Coherence in the Space-Time Domain*	*Detection*	*Emission of Light: Spontaneous and Stimulated Processes*	*OAM in Classical Imaging*	*Attosecond Streaking from Nanostructures*

	SLO-2	*Classical Theory of Optical Coherence in the Space-Frequency Domain*	*Preparation*	*Linear Light-Scattering:*	*OAM in Nonlinear and Quantum Optics*	*Attosecond Physics*
S-7	SLO-1	*Cross-Spectrally Pure Optical Fields*	*Applications in Quantum Information*	*The Kramers–Heisenberg Dispersion Formula*	*Electromagnetic Duality Transformations in Optics*	*Attosecond Streaking Spectroscopy of Atoms and Solids*
	SLO-2	*Polarization Properties of Stochastic Beams*	*Electromagnetic Theory of Materials*	*Chiroptical Effects*	*Symmetries and Operators*	*Attosecond Streaking Spectroscopy of Solids*
S-8	SLO-1	*Remarks on Partially Coherent*	*Macroscopic Viewpoint*	*Two-Photon Absorption*	*Electromagnetic Duality*	*Introduction to Photoemission*
	SLO-2	*Partially Polarized*	*Constitutive Dyadic*	*Nonlinear Light-Scattering: Sum-Frequency and Harmonic Generation*	*Optical Helicity*	*Time-Resolved Photoemission from Atoms*
S-9	SLO-1	*Beams Basics of Quantum Theory of Optical Coherence*	*Linear Materials*	*Resonance Energy Transfer*	*Electromagnetic Duality Symmetry*	*Streaked Photoemission from Solids*
	SLO-2	*Polarization of singularities*	*Nonlinear Materials*	*van der Waals Dispersion Energy*	*Duality Symmetry in Piecewise Homogeneous and Isotropic Media*	*Attosecond Streaking from Nanostructures*

Learning Resources	1. *David L. Andrews, Photonics, Volume 1: Fundamentals of Photonics and Physics, Wiley, 2015.* 2. *Lasers-Theory and Applications- Ghatak and Thyagarajan, McMillan (2010)* 3. *Optoelectronic devices and systems- S C Gupta ,Prentice Hall India (2008)* 4. *Understanding Fiber optics- J Hecht, Pearson Edu. Inc (2006)*	5. *Light Emitting Diodes-E Fred Scheubert ,Cambridge University Press,(2003)* 6. *Photonic switching technology - H T Mouftah, J M H Elmirghani - IEE Press (1999).* 7. *Online Course: IITM-NPTEL – Introduction to Photonics. https://nptel.ac.in/courses/108106135/*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the physiological system of the body*
CLR-2 :	*Have an in depth knowledge on the devices for physiological process measurements in the human body*
CLR-3 :	*Acquire knowledge on the measurement of non-electrical parameters in the human body*
CLR-4 :	*Enrich the students on the basic concepts of medical imaging, telemetry techniques and their applications*
CLR-5 :	*Expose the students to medical assisting and therapy equipments*
CLR-6 :	*Create overall structure of biomedical instrumentation starting from physiological system to measurements and assisting equipments*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Explain the various systems of the human body*	1	80	75	H	-	-	-	-	-	-	-	-	-	-	-	-	M	-
CLO-2 :	*Use electrodes and transducers for physiological process measurements in the human body*	2	80	75	H	-	-	-	-	-	-	L	-	-	-	-	M	M	L
CLO-3 :	*Measure the non-electrical quantities of the human body*	2	80	75	H	-	-	-	-	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Recognize the applications of medical imaging and telemetry techniques*	2	80	75	H	-	-	-	-	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Relate the medical assisting and therapy equipments*	2	80	75	H	-	-	-	-	-	-	L	-	-	-	-	H	M	L
CLO-6 :	*Identify the physiological systems of the body along with various measurements and assisting equipments*	2	80	75	H	-	-	-	-	-	-	L	-	-	-	-	M	M	L

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Physiological systems of the body*	*Electrode theory*	*Measurement of blood pressure- direct method*	*X-ray machine*	*Need for Cardiac pacemakers*
	SLO-2	*Cells and their structure*	*Needle and wire electrode*	*Measurement of blood pressure-indirect method*	*Physical parameters for X- ray detectors*	*External pacemakers: Types: Vetricular asynchronous , synchronous and inhibited pacemaker*
S-2	SLO-1	*Characteristics of living organisms*	*Surface and micro electrode*	*Introduction to the measurement of blood flow*	*Digital radiography*	*Atrial synchronous and sequential ventricular inhibited pacemaker*
	SLO-2	*General characteristics of a human cell*	*Metal micropipette electrode*	*Electromagnetic blood flow meter*	*Diagnostic ultrasound*	*Implantable pacemaker*
S-3	SLO-1	*Nernst equation*	*Resistive transducers, thermistor, strain gauge*	*Ultra sound blood flow meter*	*Echocardiography*	*Need for defibrillator*
	SLO-2	*Bioelectric potential*	*Inductive and capacitive transducer*	*Laser Doppler blood flow meter*	*Computer tomography*	*DC defibrillator*
S-4	SLO-1	*Electrical characteristics of the human cell*	*Basic recording system, direct writing recorder, Ink jet recorder*	*Dye dilution method of cardiac output measuring techniques*	*CT system components*	*Implantable defibrillator*
	SLO-2	*Bioelectric potential propagation*	*Potentiometric recorder , Digital recorder and instrumentation type recorder*	*Thermal dilution method of cardiac output measuring techniques*	*Patient dose in CT Scanners*	*Mechanics of respiration*
S-5	SLO-1	*Cardiovascular system*	*Lead system of electrocardiogram*	*Heart rate measurement*	*Principles of Magnetic resonance Imaging systems*	*Artificial ventilation*
	SLO-2	*Blood circulation*	*Standard bipolar leads and unipolar leads*	*Measurement of heart sounds*	*Basic MRI components*	*Types of ventilators: Pressure limited ventilator*
S-6	SLO-1	*Heart and its mechanical activities*	*Recording methods of electrocardiogram*	*Gas analysers*	*Image reconstruction techniques*	*Volume limited and servo controlled vetilators*
	SLO-2	*Electrical potentials generated within the heart*	*Typical waveforms of electrocardiogram*	*Blood gas analyser*	*Position Emission Tomography*	*Pressure volume flow diagram*

S-7	SLO-1	*Physiology of the respiratory system*	*Electromyography*	*Oximetry*	*Single Photon Emission Computed Tomography*	*Kidney machine, Artificial kidney*
	SLO-2	*Respiratory volumes and capacities*	*Measurement of conduction velocity*	*Ear oximeter*	*Thermography*	*Dialyzers, Types: Parallel flow dialyzer*
S-8	SLO-1	*Anatomy of the nervous system*	*Electroretinography*	*Pluse oximeter*	*Biotelemetry*	*Coil hemodialyzer, Hollw fiber hemodialyzer*
	SLO-2	*Excitation and inhibition potentials*	*Electrogastrography*	*Skin reflection oximeter*	*Wireless telemetry*	*Diathermy*
S-9	SLO-1	*Muscle action*	*Electroculography*	*spirometry*	*Single channel telemetry system*	*Endoscopes*
	SLO-2	*Sensory system*	*Pneumotachography*	*Measurement of lung volume*	*Multichannel wireless telemetry system*	*Lasers in biomedical field*

							3	0	0	3
Pre-requisite Courses		Co-requisite Courses		Progressive Courses						
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards								

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Enrich the students on the basics of batteries*
CLR-2 :	*Understand the concepts of battery starting system*
CLR-3 :	*Introduce the different methods of charging systems for batteries*
CLR-4 :	*Learn the fundamentals of Automotive Electronic devices*
CLR-5 :	*Understand different sensors and actuators used in automotive systems*
CLR-6 :	*Get idea about real time automotive electronic systems*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Analyze the concept of batteries & it's working*	3	80	75	H	M	M	M	-	-	-	-	-	-	-	-	M	L	-
CLO-2 :	*Gain knowledge on the concepts of battery starting system*	2	80	75	H	M	M	L	-	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Familiarize the principles of charging system for batteries*	2	80	75	H	M	L	L	-	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Acquire knowledge on automotive Electronics*	2	80	75	H	-	-	-	-	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Enhance the use of sensors and actuators in the field of automotive systems*	2	80	75	H	M	M	L	-	-	-	-	-	-	-	-	M	M	-
CLO-6 :	*Apply the idea in real time automotive electronics*	3	80	75	H	M	M	L	-	-	-	-	-	-	-	-	M	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Batteries and Accessories : Principle of lead acid battery*	*Starting System- introduction*	*Charging System - introduction*	*Introduction to Automotive Electronics*	*Sensors*
	SLO-2	*Batteries and Accessories : construction of lead acid battery*	*Starting System - Condition at starting*	*Charging System - Generation of direct current*	*Fundamentals of Automotive Electronics*	*Activators*
S-2	SLO-1	*Characteristics of battery*	*Behaviour of starter during starting*	*Evaluating state of battery health*	*Current trends in automotive electronic engine management system*	*Sensors- introduction*
	SLO-2	*Rating capacity and efficiency of batteries*	*Advantages and disadvantages*	*Fundamental in battery testing*	*Electric power Braking systems*	*Types of sensors: sensor for speed*
S-3	SLO-1	*Various tests on batteries*	*Series motor and its characteristics for starting system*	*Battery testing - Capacity*	*Electromagnetic interference suppression*	*Throttle position*
	SLO-2	*Visual inspection and voltage testing*	*Shunt motor and its characteristics for starting system*	*Battery testing – internal resistance*	*Electromagnetic compatibility*	*Exhaust oxygen level*
S-4	SLO-1	*Lighting system: insulated and earth return system*	*Principle and construction of starter motor*	*Battery testing – self discharging quantity*	*Electronic dashboard instruments*	*Manifold pressure*
	SLO-2	*Vehicle circuits and systems*	*Cranking motor construction*	*Factors for degradation and ageing process*	*Onboard diagnostic system*	*Crankshaft position*
S-5	SLO-1	*Earthing system: Types*	*Working of different starter drive units*	*Measurement methods of battery*	*Security and warning system*	*Coolant temperature*
	SLO-2	*Head light and side light*	*Care and maintenances of starter motor*	*Direct measurement method*	*Nano-electromechanical devices*	*Exhaust temperature*
S-6	SLO-1	*LED lighting system*	*Starter switches*	*Indirect measurement method*	*Engine Ignition*	*Air mass flow for engine application*
	SLO-2	*Control of LED lighting system*	*Optoelectronic devices- solar cells*	*Battery Maintenance*	*Fuel Injection*	*Solenoids*
S-7	SLO-1	*Horn system*	*Photodiodes*	*New developments on battery charging system*	*Collision Avoidance Systems*	*Various types of electric motors*
	SLO-2	*Wiper system and trafficator*	*Laser Diodes*	*Rate of charging*	*Safety Controls*	*Piezoelectric force generators*
S-8	SLO-1	*Maintenance on batteries*	*Light Absorption and Emission*	*Depth of charging*	*Security Alarms*	*Automatic transmission control systems*
	SLO-2	*Charging on batteries*	*Optical Fiber*	*Depth of discharging*	*Transmission Controls*	*stepper motors*
S-9	SLO-1	*Health monitoring of batteries*	*Surface-Emitting Lasers*	*SoC and SoH*	*Navigation System*	*Relays- Types*
	SLO-2	*Battery monitoring methods*	*Array Lasers*	*Downfall modes*	*Applications of Automotive Electronics*	*Thermal Relay*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand various analog Communication techniques.*
CLR-2 :	*Impart knowledge on data and pulse Communication techniques.*
CLR-3 :	*Explain various digital Communication techniques*
CLR-4 :	*Illustrate source and Error control coding*
CLR-5 :	*Gain knowledge on multi-user radio Communication*
CLR-6 :	*Apply the analog and digital Communication concepts in Communication industries*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Gain knowledge on basics of analog Communication techniques*	2	80	75	H	M	M	-	-	-	-	-	-	M	-	-	L	-	-
CLO-2 :	*Analyze data and pulse Communication techniques*	2	80	75	H	M	M	L	-	-	-	L	-	M	-	-	-	L	L
CLO-3 :	*Summarize digital Communication techniques*	2	80	75	H	L	-	-	-	-	-	-	-	M	-	-	-	-	-
CLO-4 :	*Interpret Source and Error control coding.*	2	80	75	H	M	M	L	-	-	-	L	-	M	-	-	L	L	L
CLO-5 :	*Understand multi-user radio Communication*	3	80	75	H	L	-	-	-	-	-	-	-	L	-	-	-	-	-
CLO-6 :	*Acquire the overall knowledge on analog and digital Communication*	3	80	75	H	H	M	L	-	-	-	L	-	M	-	-	L	L	L

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Analog Communication:Introduction to Fourier Series*	*Pulse and data Communication:Introduction to Pulse Communication*	*Digital Communication:Introduction to digital Communication*	*Source coding and Error Control Coding: Introduction to coding*	*Multi-user radio Communication: Global System for Mobile Communications (GSM)*
	SLO-2	*Fourier Series Properties and applications*	*Introduction to Data Communication*	*Analog Communications versus digital Communications*	*Entropy and Properties of coding*	*Overview of GSM*
S-2	SLO-1	*Introduction to Fourier Transform*	*Pulse Amplitude Modulation (PAM)*	*conversion of analog signal to digital form*	*Binary Symmetric Channel*	*Code division multiple access (CDMA)*
	SLO-2	*Fourier Transform properties*	*Pulse Time Modulation (PTM)*	*baseband signal, band pass signal*	*Binary Erase Channel*	*Overview of CDMA*
S-3	SLO-1	*Modulation – Types*	*Pulse code Modulation (PCM)*	*Digital Communication systems – Functional description*	*Source Coding Theorem*	*Cellular Concept*
	SLO-2	*Need for Modulation*	*Differential pulse code modulation*	*Block diagram of digital Communications*	*Lossless data Compression Algorithms*	*Frequency Reuse*
S-4	SLO-1	*Noise: Source of Noise*	*Pulse position modulation(PPM)*	*Signal processing operations in digital Communications*	*Shannon fano coding*	*Channel Assignment*
	SLO-2	*External Noise, Internal Noise*	*Comparison of various Pulse Communication System (PAM – PTM– PCM)*	*quantitative analysis of modulation schemes*	*Huffman Coding*	*Handover Techniques*
S-5	SLO-1	*Amplitude Modulation Theory*	*Data Communication: Introduction to Data Communication*	*Amplitude Shift Keying (ASK), Frequency Shift Keying (FSK)*	*Algorithm and Problem in Shannon fano coding*	*Overview of Multiple Access Schemes*
	SLO-2	*Frequency spectrum of AM wave*	*History of Data Communication*	*Phase Shift Keying (PSK)*	*Algorithm and Problem in Huffman Coding*	*Types of Multiple access*

S-6	SLO-1	*Double Sideband (DSB) Suppressed Carrier (SC)*	*Standards Organizations for Data Communication*	*BPSK*	*Error Control Coding*	*IEEE802.11: Wireless LANs Using CSMA/CA*
	SLO-2	*Conventional AM*	*Data Communication Circuits*	*QPSK*	*Error detection*	*WLAN Fundamentals*
S-7	SLO-1	*Single Sideband Modulation (SSB)*	*Data Communication codes*	*Principles of MSK*	*Parity*	*Cellular Digital Packet Network*
	SLO-2	*Vestigial Sideband (VSB) Modulation*	*Error Control, Hardware*	*Principles of QAM*	*Redundancy*	*Overview of cellular digital packet network*
S-8	SLO-1	*Quadrature Amplitude Modulation*	*Serial Interfaces*	*Quadrature Amplitude Modulation (QAM) – 8 QAM*	*Error correction*	*Satellite Communication*
	SLO-2	*Concept synthesis for AM*	*Parallel interfaces*	*Quadrature Amplitude Modulation (QAM) - 16 QAM*	*Forward Error Correction*	*Satellite Networking*
S-9	SLO-1	*Theory of Frequency and Phase Modulation*	*Data Modems – Asynchronous Modem*	*Bandwidth Efficiency*	*Application, Convolution Codes*	*Bluetooth*
	SLO-2	*Comparison of Analog Communication Systems (AM – FM – PM)*	*Synchronous Modem*	*Comparison of various Digital Communication System (ASK – FSK – PSK – QAM)*	*Block Codes*	*Bluetooth Applications*

Course Code	18EEE325T	Course Name	WAVELET TRANSFORM	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce the learners to wavelets- its relevant fundamentals and significance*
CLR-2 :	*Establish the theory behind construction of wavelets using software tools*
CLR-3 :	*Gain knowledge on the details of discrete wavelet transform*
CLR-4 :	*Expose the students to the conceptual aspect of multi resolution analysis*
CLR-5 :	*Illustrate data compression /extraction and signal processing applications using wavelet transform*
CLR-6 :	*Introduce wavelet functions, the advancements in technology and applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the theory and mathematics behind wavelet transform*	*1*	*75*	*75*	*H*		-	-	-	-	-	-	-	-	-	-	*M*	-	-
CLO-2 :	*Apply the coding for construction of Daubechies and other wavelet functions*	*2*	*75*	*75*	*H*	*M*	*L*	-	-	-	-	-	-	-	-	-	*M*	*M*	-
CLO-3 :	*Analyze use of wavelets and discrete wavelet transform for filter bank design.*	*2*	*75*	*75*	*H*	*M*	*L*	-	*M*	-	-	-	-	-	-	-	*M*	*M*	-
CLO-4 :	*Analyze use of wavelets for filter design and multi resolution analysis*	*2*	*75*	*75*	*H*	*M*	*L*	-	*M*	-	-	-	-	-	-	-	*M*	*M*	-
CLO-5 :	*Use software for various wavelet transform based applications*	*3*	*75*	*75*	*H*	*M*	*L*	-	*M*	-	-	-	-	-	-	-	*H*	*H*	-
CLO-6 :	*Evaluate existing and new wavelet transform based applications*	*3*	*75*	*75*	*H*	*M*	*L*	-	*M*	-	-	-	-	-	-	-	*H*	*H*	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Wavelets- General introduction*	*Construction of wavelets*	*Discrete wavelet transform(DWT) for filter design*	*Multi resolution analysis (MRA) - Formal definition*	*Audio compression – Audio masking*
	SLO-2	*Fields of applications, Heisenberg's un certainty*	*Relationship between two scale sequences*	*Signal decomposition- Analysis*	*Need for multi resolution based image analysis*	*Standards specifying sub band implementation*
S-2	SLO-1	*Classical wavelets, Wavelet packets, Local trigonometric bases, Multiwavelets, 2G Wavelets*	*Relationship between reconstruction and decomposition sequences*	*Filtering /Frequency response*	*Multi resolution spaces*	*Image compression*
	SLO-2	*Gaussian, Morlet, Daubechies, Mexican Hat, Symlets, Coiflets, Complex, Biorthogonal spline wavelets.*	*Construction of semi orthogonal spline wavelets*	*Decimation (Down sampling)*	*Orthogonal decomposition*	*The JPEG standard (ITU - T.81)*
S-3	SLO-1	*Wavelet transform – Translation*	*Construction of ortho- normal wavelets*	*Signal reconstruction- Synthesis*	*Bi orthogonal and Semi orthogonal decompostion*	*Spatial oriented tree (SOT) code and Generalized self-similarity tree (GST)*
	SLO-2	*Wavelet transform -Scaling and Shifting Operation*	*Shannon scaling function*	*Filtering and Stretching (Up sampling)*	*Two scale relations*	*Embedded zero tree wavelet (EZW) code*
S-4	SLO-1	*Continuous wavelet transform*	*Meyer scaling function*	*Computing input co- efficient*	*A wavelet basis for MRA*	*Huffman code*
	SLO-2	*Discrete wavelet transform*	*Battle- Lemarie scaling function*	*Lattices and Lifting*	*Functional subspace relation between scaling and wavelet functions*	*Run length encoding*
S-5	SLO-1	*Mathematical prelude – Fourier transform*	*Daubechies scaling function*	*Vanishing moments*	*Scaled and translated version of wavelet functions*	*Set partitioning in hierarchical tree (SPIHT)*
	SLO-2	*Parseval Plancherel theorem, Convolution, Dilation and its inverse…*	*Graphical display – Iteration method*	*Perfect reconstruction filter banks- Introduction*	*Wavelet series*	*Embedded block coding with optimized truncation (EBCOT)*

S-6	SLO-1	*Continuous time frequency representation of signals*	*Spectrum method*	*Spectral domain analysis of a 2 channel PR filter bank*	*PR banks- Coding tutorial - I*	*Médical Imaging*
	SLO-2	*The windowed Fourier transform*	*Eigen value method*	*Analysis and Synthesis*	*PR banks- Coding practice exercises-I*	*Other applications*
S-7	SLO-1	*Signal spaces*	*Daubechies wavelet construction-Coding tutorial - I*	*Quadrature mirror filter (QMF) approach*	*PR banks- Coding tutorial - II*	*Audio compression -Simulation using software tools – Tutorial*
	SLO-2	*Ortho-gonality and Ortho-normality in brief*	*Coding practice exercises*	*Half band filter (HBF) approach*	*PR banks- Coding practice exercises*	*Audio compression -Simulation using software tools – Practice*
S-8	SLO-1	*Haar wavelet and scaling function*	*Daubechies wavelet construction-Coding tutorial- II*	*Time domain analysis*	*PR banks- Coding tutorial - III*	*Image compression -Simulation using software tools – Tutorial*
	SLO-2	*Triangle scaling function*	*Coding practice exercises*	*PR filter requirements*	*PR banks- Coding practice exercises*	*Image compression -Simulation using software tools – Practice*
S-9	SLO-1	*Short time Fourier transform -Coding tutorial*	*Daubechies wavelet construction-Coding tutorial- III*	*Bi-orthogonal filter bank*	*PR banks- Coding practice tutorial- IV*	*Image compression -Simulation using software tools – Tutorial*
	SLO-2	*Coding practice exercises*	*Coding practice exercises*	*Simple problems(Qualitative) for practice*	*PR banks- Coding practice exercises*	*Image compression -Simulation using software tools – Practice*

Course Code	18EEE326T	Course Name	ADVANCED CMOS DEVICES AND TECHNOLOGY	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Enrich the students to have basic knowledge in CMOS technology and scaling*
CLR-2 :	*Upgrade the students with the knowledge on design of CMOS devices*
CLR-3 :	*Buildup knowledge on fabrication and isolation of advanced CMOS*
CLR-4 :	*Outline the concept of layout dependent effect, bench marking and interconnects*
CLR-5 :	*Understand the basic of lithography and manufacturability*
CLR-6 :	*Upgrade the knowledge in Nano CMOS devices*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Describe the operation of CMOS devices and scaling technology*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*L*	*H*	-
CLO-2 :	*Interpret how modern CMOS devices are designed for better power performance*	*3*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*H*	*M*	-
CLO-3 :	*Perceive knowledge on basic fabrication process flow steps of advanced CMOS devices and isolation*	*3*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-4 :	*Advance knowledge on layout dependent effect, bench marking and interconnects*	*3*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*H*	*M*	-
CLO-5 :	*Infer knowledge about advanced lithography and manufacturability*	*3*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-6 :	*Gain knowledge to develop new improved CMOS devices*	*3*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*H*	*H*	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*History of silicon technology*	*Mobility enhancement techniques*	*Fabrication issues*	*Compact modeling of analog process*	*Basics of sub wavelength lithography*
	SLO-2	*Review of CMOS scaling, moore's law*	*Gate dielectric material*	*Process integration*	*Digital benchmarking of models*	*Advanced lithography*
S-2	SLO-1	*Junction diode*	*High K material and Material selection*	*Atomic layer integration*	*Layout dependent effects*	*Design for manufacturability (DFM)*
	SLO-2	*MOS capacitor*	*Electronic structure of transition metal and rare earth metals*	*Metal organic chemical vapor deposition*	*Metallization*	*Economic motives for DFM*
S-3	SLO-1	*Circuit considerations*	*Band gap energies*	*Physical vapor deposition*	*Gate electrodes*	*Lithographic techniques and tools for advanced technology nodes*
	SLO-2	*CMOS latch-up*	*Band off-set energies*	*Etching*	*Reduction in device parasitics*	*Optical proximity correction*
S-4	SLO-1	*MOS transistor classical models*	*Bond iconicity and dielectric constant*	*Fabrication of drain and source*	*Test structures for characterization*	*Lithography limited yield*
	SLO-2	*Threshold voltage and V-I characteristcs*	*Carrier effective masses*	*Ultra shallow junctions*	*Characterization variation effects on scaling*	*Catastrophic failures*
S-5	SLO-1	*Short channel effects*	*Thermal stability*	*Isolation techniques*	*Dopant activation methods*	*Lithography driven DEM solutions*
	SLO-2	*Drain induced barrier lowering*	*Disorders and defects*	*Device, well and dielectric isolation*	*Device isolation pitch*	*Classical approach*
S-6	SLO-1	*Gate leakage current*	*Extrinsic defects*	*Integration challenges*	*Interconnects*	*Printability checkers*
	SLO-2	*Tunneling*	*High –K / Si Interface traps*	*Dopant activation methods*	*Limits of interconnects*	*ASIC cell optimization*
S-7	SLO-1	*Sub-threshold conduction*	*Fermi level pinning*	*Reduction of parasitics*	*Current interconnect technologies*	*Case study on emerging technology*
	SLO-2	*Short channel modifications*	*Progress integration of high K gate dielectrics and metal gates*	*Types of stress elements*	*Optical interconnects*	*Applications of advanced CMOS devices*
S-8	SLO-1	*Features and uniqueness of MOS transistors*	*Effect of stress*	*Strained isolation oxide*	*Scaling of device isolation*	*Challenges of advanced CMOS devices*
	SLO-2	*MOS in Deca-Nano meters*	*Strain on the band structure of silicon*	*Ultra shallow junction resistance*	*Layout dependent effect*	

						CMOS technology design for mobile applications
S-9	SLO-1	*Device structure and channel engineering*	*Effect of gate length on stress effect*	*Solution to shallow junction resistance problem*	*Characterization*	*CMOS technology designed for wireless applications*
	SLO-2	*Source , drain and gate stack engineering*	*Mobility enhancements in strained silicon MOSFETS*	*Fermi level pinning effect of strain to improve the CMOS performance*	*Test structures used for characterization*	*Special MOS devices*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Expose the students to various sensors and transducers for measuring quantities.*
CLR-2 :	*Emphasize the general background and operational concepts in sensors and transducers*
CLR-3 :	*Elicit the characteristics of inductive and capacitive transducers.*
CLR-4 :	*Examine the advances in sensor technology.*
CLR-5 :	*Facilitate the application of microsensors and actuators*
CLR-6 :	*Analyse the performance of various sensors and transducer*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Enumerate the basics of sensors and transducers*	*2*	*75*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Summarize the underlying principles and performance of different sensors*	*2*	*75*	*75*	*H*	*H*	-	-	-	-	-	*M*	-	-	-	-	-	-	*M*
CLO-3 :	*Acquire knowledge on the basic conditioning circuits for inductive and capacitive transducers*	*2*	*75*	*75*	*H*	*H*	-	-	-	-	-	*M*	-	-	-	-	-	-	*M*

Duration (hour)		9	9	9	9	9
CVVVS-1	SLO-1	*General concepts of measurement systems*	*Resistive Transducers*	*General factors governing the design of self-inductance transducer*	*Piezoelectric transducer*	*Introduction to Micro sensor*
	SLO-2	*Terminologies of measurement systems*	*Principle of operation, construction details*	*Variable inductance transducer*	*Hall Effect transducers*	*Transducers and its interface standard*
S-2	SLO-1	*Transducer classification based on principle of transduction*	*Potentiometer ,Characteristics*	*Linear Variable Differential Transformer*	*Magnetostrictive transducers*	*Evolution of micro-fabrication*
	SLO-2	*Flow rate sensing elements*	*Applications of potentiometer*	*Expression for mutual inductance variation*	*Fiber optic Sensors*	*Evolution of Micro system and Microelectronics*
S-3	SLO-1	*Classification of errors*	*Loading effect*	*Rotary variable differential transformer*	*Geiger counters*	*The multidisciplinary nature of MEMS, Miniaturization*
	SLO-2	*Error Analysis*	*Strain Gauge, Types of Strain gauges*	*Applications of LVDTs*	*Scintillation detectors.*	*Applications of micro systems in automotive, and health care*
S-4	SLO-1	*Units and standards of measurements*	*Applications of Strain gauges*	*Output input relationship*	*Film sensor*	*Applications of micro systems in aerospace, and teleCommunication fields*
	SLO-2	*General input and output configuration*	*Gauge Factor*	*Microsyn Transducer*	*Magneto elastic sensor*	*Biomedical sensors*
S-5	SLO-1	*Analog & digital modes of operation*	*Load cells*	*Control type Synchro system*	*Digital displacement sensors*	*Biosensors*
	SLO-2	*Null & deflection methods*	*Torque measurement using strain gauges.*	*Resolvers classification and application*	*Proximity sensors*	*Chemical sensors*
S-6	SLO-1	*Methods of correction for interfering & modifying inputs*	*Pressure measurement using strain gauges*	*Capacitive Transducer*	*Pneumatic sensors*	*Optical sensors*

	SLO-2	*Static characteristics of a measurement system*	*Measurement of Linear Velocity*	*Variable Area Type Capacitive Transducers*	*Semiconductor sensor*	*Pressure sensors*
S-7	SLO-1	*Dynamic characteristics of a measurement system*	*Resistance Thermometers*	*Variable Air Gap type Capacitive Transducers*	*Smart sensors*	*Acoustic wave sensors*
	SLO-2	*Statistical analysis of measurement data*	*Thermocouples*	*variable dielectric constant type*	*Radiation sensors*	*Microactuators*
S-8	SLO-1	*Electric Transducer*	*Thermistors*	*Sensitivity factors*	*Pyroelectric type*	*Actuators using thermal forces*
	SLO-2	*Advantages of Electric Transducer*	*Thermistor material, shape, ranges and accuracy specification*	*Nonlinearity factors*	*Digital encoding Transducer*	*Actuators using shape memory alloy*
S-9	SLO-1	*Transducer actuating mechanism*	*Hotwire anemometers*	*Advantages of capacitive transducer*	*Photo optic Transducer*	*Actuators using piezoelectric crystals*
	SLO-2	*Factors influencing the choice of transducer*	*Temperature compensation*	*Applications of capacitive transducer*	*Environmental Monitoring sensors (Water Quality & Air pollution)*	*Actuators using electrostatic forces*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Create knowledge on physiological system of the human body*
CLR-2 :	*Learn the various biomedical sensor and amplifiers*
CLR-3 :	*Identify the bio potential electrodes used for ECG, EEG, EOG and ENG measurements*
CLR-4 :	*Understand the various analysis techniques of bio signals and data acquisition systems*
CLR-5 :	*Expose the students to various medical application using optical electronics*
CLR-6 :	*Demonstrate the physiological system, its measurements and application of electronics in the medical field*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Describe the physiological system of the body*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	*M*	-
CLO-2 :	*Use the biomedical sensor and amplifiers*	*3*	*80*	*75*	*H*	-	-	-	*H*	-	-	*L*	*L*	-	-	-	*L*	*M*	*L*
CLO-3 :	*Recognize the biopotential electrodes used for ECG,EEG,EMG,ERG and EOG measurements*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	*L*	*M*	-
CLO-4 :	*Apply and analyze bio signals and data acquisition system for biomedical application*	*3*	*80*	*75*	*H*	-	-	-	*H*	-	-	-	*L*	-	-	-	*L*	*M*	-
CLO-5 :	*Interpret the various medical application using optical electronics*	*2*	*80*	*75*	*H*	-	-	-	-	-	-	*L*	-	-	-	-	*H*	*M*	*L*
CLO-6 :	*Identify the human body physiological system along with various measurements and application of electronics in the medical field*	*3*	*80*	*75*	*H*	-	-	-	*H*	-	-	*L*	*L*	-	-	-	*H*	*M*	*L*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to the physiological system of the body*	*Sensor parameters*	*Electrode-electrolyte interface*	*Introduction to bio signal analysis*	*Introduction to medical application using optical electronics*
	SLO-2	*Cardiovascular system*	*Physical principle of sensing*	*Electrode types: Surface metal plate electrode*	*Analog and digital method*	*Charge coupled devices*
S-2	SLO-1	*Respiratory system*	*Strain gauge, Piezo electric transducer*	*Needle and wire electrode*	*Types of analog to digital converters*	*Interline transfer*
	SLO-2	*Parts of respiratory system*	*Load cell, pitot tube*	*Micro electrode*	*Flash type ADC*	*Fiber optics introduction*
S-3	SLO-1	*Nervous system*	*High impedance charge output*	*Electrocardiography: Lead system for recording ECG*	*Types of digital to analog converters*	*Fiber optics classification*
	SLO-2	*Structure of neuron and phenomenon of impulse transmission*	*Linear variable differential transformer*	*ECG measurement*	*Successive approximation DAC*	*Features of optical fibers*
S-4	SLO-1	*Sources of biomedical signals*	*Hall effect magnetic sensor*	*Electro cardio graph*	*Signal to noise improvement*	*Analysis of optical fiber*
	SLO-2	*Basic medical instrumentation system*	*Optical encoder*	*Electroencephalography: Signal sources*	*Amplitude measurements*	*The step-index fiber*
S-5	SLO-1	*Performance requirements of medical instrumentation system*	*Accelerometer*	*Placement of electrodes*	*Signal recovery*	*Graded index fiber*
	SLO-2	*Intelligent medical instrumentation system*	*RTD*	*EEG recording modes*	*Data acquisition*	*CT Scanners*
S-6	SLO-1	*Use of microprocessors in medical instruments*	*Thermistor*	*Electroencephalograph*	*Sample and hold conversion*	*Sectional imaging*
	SLO-2	*The microprocessor*	*Thermocouple*	*Electromyography: EMG electrodes*	*ECG acquisition*	*Digital imaging*
S-7	SLO-1	*The microcontroller*	*Sensor interfacing*	*Electromyograph*	*EMG acquisition*	*Endoscope*
	SLO-2	*Interfacing of analog signals to microprocessors*	*Driving bridges*	*Determination of conduction velocities in motor nerves*	*EOG acquisition*	*Digital X rays*

S-8	SLO-1	*PC based medical instruments*	*Signal conditioning amplifiers*	*Quantity of electricity associated with muscle contraction*	*EEG acquisition*	*Medical sensors from fiber optics*
	SLO-2	*General constrains in design of medical instrumentation systems*	*Instrumentation amplifiers*	*Electrical activity of EOG signal*	*ERG acquisition*	*Fiber optics for circulatory system*
S-9	SLO-1	*Regulations of medical devices*	*Isolation amplifiers*	*Electroretinograph*	*Pattern recognition*	*Fiber optics for respiratory system*
	SLO-2	*Types of standards*	*Simulation of pressure sensor*	*Electroocculograph*	*Simulation of flash type ADC*	*Lasers in biomedical field*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Outline the aspects of electrical properties of semiconductors*
CLR-2 :	*Learn about diode fabrication, properties, and characterization*
CLR-3 :	*Provide the fundamentals of MOSFET fabrication and scaling laws*
CLR-4 :	*Enrich the knowledge on structure quantum effects and development of advanced transistor devices*
CLR-5 :	*Upgrade knowledge on basic principle of operation of LED and solar cell*
CLR-6 :	*Understand the characteristics, operation and limitations of semiconductor devices*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	Enrich the knowledge on semiconductor material, properties and classical semiconductor devices	2	80	75	H	L	L	L	-	-	-	-	-	-	-	-	H	H	-
CLO-2 :	Interpret the fabrication and characterization of PN diode	3	80	75	H	L	L	L	-	-	-	-	-	-	-	-	M	H	-
CLO-3 :	Perceive knowledge on advanced MOSFET devices, characteristics, application and fabrication	3	80	75	H	L	L	L	-	-	-	-	-	-	-	-	H	H	-
CLO-4 :	Gain knowledge of hetero structure, quantum effect and transport in the development of advanced transistor devices	3	80	75	H	L	L	L	-	-	-	-	-	-	-	-	L	M	-
CLO-5 :	Infer knowledge on optoelectronics, solar cell and photovoltaic	3	80	75	H	-	-	-	-	-	-	-	-	-	-	-	H	M	-
CLO-6 :	Gain knowledge to develop new semiconductor devices	3	80	75	H	L	L	L	-	-	-	-	-	-	-	-	M	H	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Semiconductor materials*	*Structure of PN junction diode*	*Metal oxide semiconductor transistor structure*	*Bipolar transistor structure*	*Optoelectronic semiconductor devices*
	SLO-2	*Electrons and holes*	*Zero applied bias*	*Working of two terminal MOS structure*	*Principle and modes of operation*	*Optical absorption*
S-2	SLO-1	*Crystal structures*	*Reverse applied bias*	*Inversion channel MOSFET*	*Minority carrier distribution*	*Light emitting diode (LED)*
	SLO-2	*Atomic bonding and bond models*	*Fabrication process*	*MOSFET Scaling effect*	*Low frequency common base current gain*	*Vertical cavity surface emitting laser (VCSEL) diode*
S-3	SLO-1	*Equilibrium and non-equilibrium*	*Non uniform doped junction*	*Electrical and DC MOSFET characteristics*	*Nonlinear effects*	*Laser diode arrays*
	SLO-2	*Imperfections and Impurities in Solids*	*Equilibrium electrical properties of a PN junction*	*Capacitance - voltage characteristics*	*Equivalent circuit models*	*Hetero junction LED types*
S-4	SLO-1	*Statistical distribution*	*PN junction current*	*Current-voltage characteristics*	*Frequency limitations*	*Photoluminescence*
	SLO-2	*Drift and diffusion*	*DC electrical characteristics*	*Fabrication of MOSFET*	*Hetero structure and Quantum well*	*Electroluminescence*
S-5	SLO-1	*Generation and recombination*	*Small signal model of PN junction*	*Small signal analysis*	*Super lattice and modulation*	*Advanced semiconductors for solar cell and photovoltaic applications*
	SLO-2	*Principles of Quantum mechanics*	*Small signal characteristics*	*Frequency limitations*	*Two dimensional electron gas (2DEG)*	*Hetero junction solar Cell*
S-6	SLO-1	*Schrodinger's Wave Equation*	*Diode switching transients*	*Switching properties and circuit applications*	*Coulomb blockade effect, quantized transport*	*Amorphous Silicon solar Cells*
	SLO-2	*Extensions of the wave theory to atoms*	*Generation and recombination current*	*CMOS technology*	*Large signal switching*	*Photo detectors*
S-7	SLO-1	*Quantum theory of solids*	*Charge storage*	*Gallium nitride (GaN) and Silicon Carbide (SiC) based devices*	*Ballistic transport and Quantum capacitance*	*PIN photo diode and photo transistor*
	SLO-2	*Allowed and forbidden energy bands*	*Junction breakdown*	*Tunneling field effect transistor (TFET)*	*High electron mobility transistor (HEMT)*	*Optical switches and amplifiers*
S-8	SLO-1	*Electrical conduction in solids*	*Tunnel diode*	*Thin film transistor (TFT)*	*Modulation doped FET (MODFET)*	*Active nano crystalline devices*
	SLO-2	*Semiconductor in equilibrium*	*Schottky diode*	*Junction gate field effect transistor (JFET)*	*Single electron and hetero junction transistor*	*Nano electronics*
S-9	SLO-1	*Carrier transport phenomena*	*Metal-semiconductor junctions*	*Nonlinear effects*	*Ballistic transistor*	*Applications of nano electronics*

	SLO-2	*Non-equilibrium excess carriers in semiconductors*	*Hetero junctions*	*Threshold voltage modifications*	*Poly silicon emitter and silicon-germanium transistor*	*Organic semiconductors*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Educate on Cellular Concepts and Wireless Standards*
CLR-2 :	*Understand the Statistical Multipath Channel Models.*
CLR-3 :	*Provide adequate knowledge on Digital Modulation & Multiple Access Schemes*
CLR-4 :	*Give a basic knowledge in Capacity of Wireless Channels*
CLR-5 :	*Educate on Multiple Antennas & Space Time Communications*
CLR-6 :	*Create overall understanding of cellular concepts, multiple antennas and space time Communication.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Gain Knowledge in the concepts of cellular Communication.*	1	80	75	H	M	-	-	-	-	-	M	-	-	-	-	H	M	M
CLO-2 :	*Comprehend the statistical multipath channel models*	2	80	75	H	M	-	-	-	-	-	-	-	-	-	-	H	M	-
CLO-3 :	*Infer the various schemes in the digital modulation and multiple access*	2	80	75	H	M	-	-	-	-	-	-	-	-	-	-	M	L	-
CLO-4 :	*Identify the capacity of wireless channels*	2	80	75	H	M	-	-	-	-	-	-	-	-	-	-	H	L	-
CLO-5 :	*Recognize the concepts on multiple antennas & space time Communications*	3	80	75	H	M	-	-	-	-	-	M	-	-	-	-	H	M	M
CLO-6 :	*Gain Knowledge on the overall Communication process involved in cellular Communication.*	3	80	75	H	M	-	-	-	-	-	M	-	-	-	-	H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Evolution of Mobile Radio Communication*	*Signal propagation*	*Multiple access schemes-FDMA (Frequency Division Multiple Access)*	*Capacity in Additive White Gaussian Noise Channel*	*MIMO*
	SLO-2	*Cellular Telephone Systems-Cell structures*	*Propagation mechanism- reflection,*	*Non-linear effects in FDMA*	*Capacity of flat fading channels-Channel and System Model*	*Space time signal processing*
S-2	SLO-1	*Frequency Reuse*	*Refraction*	*TDMA (Time Division Multi Access)*	*Channel and Distribution Information Known*	*spatial multiplexing*
	SLO-2	*Example Problems in Frequency Reuse*	*Diffraction*	*Efficiency of TDMA and number of channels in TDMA system*	*Channel side information at receiver*	*Diversity/Multiplexingtradeoff*
S-3	SLO-1	*Improving Coverage and Capacity in Cellular Systems-Cell Splitting*	*Scattering*	*Spread spectrum multiple access: CDMA (Code-Division Multiple Access)*	*Shannon (Ergodic) Capacity*	*Performance measures- Outage*
	SLO-2	*Sectoring*	*Large scale signal propagation*	*Hybrid FDMA/CDMA(FCDMA)*	*Capacity with outage*	*Average SNR*
S-4	SLO-1	*Repeaters for Range Extension*	*Lognormal Shadowing*	*SDMA(Space Division Multiple Access)*	*Channel side information at transmitter and receiver*	*Average symbol*
	SLO-2	*A Microcell Zone Concept*	*Small-Scale Fading and Multipath -Small-Scale Multipath Propagation*	*Modulation schemes- BPSK (Binary Phase-shift keying)*	*Shannon Capacity*	*Bit error rate*
S-5	SLO-1	*Channel assignment Strategies*	*Doppler shift, Parameters of Mobile Multipath Channels*	*Spectrum and Bandwidth of BPSK*	*Zero-Outage capacity and channel inversion*	*Receiver structure*
	SLO-2	*Handoff Strategies - Prioritizing Handoffs*	*Types of Small-Scale Fading*	*QPSK (Quadrature Phase Shift Keying), Spectrum and Bandwidth of QPSK Signals*	*Outage capacity*	*Diversity receivers- selection*
S-6	SLO-1	*Practical Handoff Considerations*	*Statistical multipath channel models*	*QPSK Transmission and Detection*	*Truncated Channel Inversion*	*MRC receivers*
	SLO-2	*Interference and System Capacity*	*Narrowband Wideband Fading Models*	*Offset QPSK*	*Capacity with receiver Diversity*	*DFE*
S-7	SLO-1	*Channel Planning for Wireless Systems*	*Power delay profile*	*π/4 QPSK*	*Capacity comparisons*	*System examples- GSM*

	SLO-2	*Adjacent Channel Interference*	*Average and RMS delay spread*	*π/4 QPSK transmission and detection techniques*	*Channel and System Model*	*EDGE*
S-8	SLO-1	*Power Control for Reducing Interference- Power control of Cellular Circuits*	*Coherence bandwidth and Coherence time*	*QAM (quadrature amplitude modulation)*	*Capacity of frequency selective fading channels*	*GPRS*
	SLO-2	*Wireless Standards: Overview of 2G*	*Flat and Frequency selective fading*	*MSK (minimum-shift keying) and GMSK (Gaussian minimum shift keying)*	*Time Invariant Channels*	*IS-95*
S-9	SLO-1	*3G cellular standards*	*Slow and fast fading*	*Multicarrier Modulation*	*Time Varying Channels*	*CDMA 2000*
	SLO-2	*Channel Planning for Wireless Systems*	*Average fade duration and Level crossing rate*	*OFDM (Orthogonal Frequency-Division Multiplexing)*	*Optimal Power allocation of Block Frequency -Selective Fading*	*WCDMA.*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Satellite systems-Attitude and Orbit Control System(AOCS)*	*Basic Transmission Theory*	*Frequency modulation, Waveform Equation for FM*	*Frequency Division Multiple Access (FDMA)*	*Error detection and correction*
	SLO-2	*Telemetry, Tracking, Command and Monitoring (TTC&M)*	*Example Problems in Transmission Theory*	*Bandwidth of FM Signals: Carson's Rule*	*Inter Modulation, Inter Modulation Example*	*Channel Capacity*
S-2	SLO-1	*Power Systems, Communication Subsystems*	*System noise temperature*	*Baseband S/N Ration for FM Signals*	*Calculation of C/N with Intermodulation*	*Error Control Coding*
	SLO-2	*Satellite Antennas*	*Calculation of System noise temperature*	*Pre-emphasis and de-emphasis*	*Time Division Multiple Access (TDMA)*	*Linear and Cyclic Block Codes*
S-3	SLO-1	*Transmission and Multiplexing*	*Noise figure and Noise Temperature*	*Analog FM Transmission by satellite*	*Bits, Sample and Channels*	*Golay Codes*
	SLO-2	*Modulation Multiple access-advent of Digital satellite Communications*	*G/T ratio for Earth Stations*	*Television Signals*	*TDMA Frame Structure*	*Performance of Block Error Correction Codes*
S-4	SLO-1	*The Equations of the Orbit*	*Design of Downlink*	*S/N Rations for FM Video Transmission*	*Synchronization in TDMA Networks*	*Convolution Codes*
	SLO-2	*Locating the Satellite in the Orbit*	*Link Budgets*	*FM Threshold, SCPC FM Links*	*Transmitter Power in TDMA Networks*	*Implementation of Error Detection on Satellite Links*
S-5	SLO-1	*Orbital elements*	*Design of Uplink*	*Concept of FM Squared of transmitting analog satellite audio*	*Satellite Switched TDMA*	*Concatenate Coding*
	SLO-2	*Look angle Determination- The Sub-satellite point*	*Limits on link performance*	*Digital Transmission*	*On-board Processing*	*Interleaving*
S-6	SLO-1	*Elevation angle Calculation*	*Design of Satellite links for specified (C/N)*	*Baseband Digital Signals,*	*Baseband Processing Transponders*	*Turbo Codes*

	SLO-2	*Azimuth angle Calculation*	*Overall $(C/N)_0$ with Uplink and Downlink Attenuation*	*Base Band Transmission of Digital Data*	*Satellite Switched TDMA with Onboard Processing*	*Repetition Codes*
S-7	SLO-1	*Geostationary orbit*	*Uplink and Downlink Attenuation in Rain*	*Band-pass Transmission of Digital Data*	*Concept of Pre-assignment*	*Cyclic Codes*
	SLO-2	*Visibility*	*Uplink attenuation and $(C/N)_{up}$, Downlink attenuation and $(C/N)_{dn}$*	*Analysis of Digital Transmission*	*Demand Access Multiple Access (DAMA)*	*Basic of Convolution codes*
S-8	SLO-1	*Orbital perturbations Longitudinal Changes: Effects of the Earth's Oblateness*	*Satellite Design for Specific Performance*	*Digital Modulation*	*Random Access*	*Catastrophic Convolutional Code*
	SLO-2	*Inclination Changes: Effects of the Sun and the Moon*	*Satellite Communication Link Design Procedure*	*Digital Demodulation*	*Packet Radio Systems and Protocols*	*Performance of block error correction codes*
S-9	SLO-1	*Orbit Determination*	*Propagation effects and their Impact on Satellite-Earth Links Quantifying Attenuation and Depolarization: Rain and Ice efffects*	*Digital transmission of Analog signals PCM*	*Code Division Multiple Access (CDMA)*	*Implementation of Error Detection on Satellite Links.*
	SLO-2	*Orbital effects in Communication system performance*	*Prediction of Rain Attenuation*	*DPCM and DM*	*CDMA Capacity*	*Example Problem on Error Detection on Satellite Links*

Course Code	18EEE420T	Course Name	EMBEDDED SYSTEM	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Illustrate the concept of embedded system .*
CLR-2 :	*Discuss the various Embedded Controllers with its Interfacing Components*
CLR-3 :	*Explain the different Embedded System protocol layers and bit configurations.*
CLR-4 :	*Understand the basics of the RTOS, its challenges and issues.*
CLR-5 :	*Impart knowledge on the programming skills and execute the different programs using Embedded C*
CLR-6 :	*Understand the concept of embedded system and develop code for real time applications*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Understand the fundamentals of Embedded System*	*1*	75	75	*H*	-	-	-	-	-	-	-	-	-	-	-	-	*M*	-
CLO-2 :	*Comprehend the various bus and interfacing components in digital controller.*	*2*	75	75	*H*	-	-	-	-	-	-	-	-	-	-	-	-	*M*	-
CLO-3 :	*Implement the embedded networking concept and various bus protocols*	*3*	75	75	*H*	*M*	*M*	*M*	-	-	-	*M*	-	-	-	-	*H*	*M*	*M*
CLO-4 :	*Analysis the concept of RTOS, the challenges and issues in RTOS.*	*3*	75	75	*H*	*M*	*H*	*M*	*H*	-	-	-	-	-	-	-	*M*	*M*	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction To Embedded System: Embedded system,*	*Memory system mechanisms - Various memory systems*	*Serial Bus Communication protocols*	*Message Queues*	*Programming for LED Display*
	SLO-2	*Functional building block of embedded system*	*CPU bus - Memory devices - I/O devices*	*RS232 standard – RS422,RS 485*	*Mailboxes and Pipes*	*Embedded C Seven Segment Display*
S-2	SLO-1	*Characteristics of embedded system applications*	*Component interfacing Interrupt – Handler*	*Characteristics of RS232, RS422, RS423 and RS485*	*Time functions - Events*	*Communication Protocols:-I²C initialization and formation*
	SLO-2	*Reliability, life time, power consumption*	*Saving and Restoring the content - Disabling Interrupts.*	*CAN Bus with control word registers*	*Memory Management*	*programming using embedded C*
S-3	SLO-1	*Challenges in embedded system design*	*The Shared data Problem – Shared data bug*	*Serial Peripheral Interface (SPI)*	*Interrupt Routine in RTOS Environment.*	*Programming Using SPI Protocols.*
	SLO-2	*Optimizing the Power Dissipation, reliability, upgradability*	*Atomic and Critical sections – Interrupt Latency*	*Inter Integrated Circuits (I²C)*	*Design Using RTOS : Design Principles – Short Interrupt Routines*	*Programming for CAN Bus Protocols*
S-4	SLO-1	*Embedded system design processes.*	*Embedded Software Architecture : Round – Robin and other cycles*	*ZigBee*	*RTOS Tasks – Tasks for Priority*	*Commercial Applications: Washing Machine,*
	SLO-2	*Characteristics of embedded system applications*	*Round-Robin with interrupts– A Communication Bridge as an Example*	*Bluetooth with various protocol*	*Tasks for Encapsulation*	*Vending machine with flow diagram*
S-5	SLO-1	*types of embedded system with examples*	*Characteristics – Functions – Queue – Scheduling*	*Interfacing Protocols- GPIB*	*Creating and Destroying tasks*	*Laser Printer, underground tank monitor,*
	SLO-2	*Performance & Design issues*	*Various Queue and scheduling methods*	*FIREWIRE(IEEE 1394 standard)*	*Avoidance - Tank Monitoring System*	*Cordless Bar, Code Scanner*
S-6	SLO-1	*Performance & Design issues – Throughput – Response – Testability –*	*Software development process Architecture – Assembly and compiling*	*Universal Serial Bus (USB)*	*Design as example – Time Scheduling*	*Power Electronics Applications: Operation of DC/DC Converter*
	SLO-2	*Debuggability – Reliability – Memory space – Program Installation*	*Linking and loading, programme flow*	*need for device drivers*	*Embedded Programming and Communication Protocols: Introduction*	*Embedded C programming for DC-DC Converter pulse generation.*

S-7	SLO-1	*Power Consumption – Processor Hogs – Cost*	*Basic compilation techniques*	*Real Time Operating Systems : Tasks and Task states*	*Importance of Communication protocol and types of protocols*	*Introduction to 180Degree mode Three phase inverter*
	SLO-2	*Small size and weight, Real time/reactive operation, End-product utility, System-level requirements*	*Program optimization*	*Tasks and Data share*	*Embedded C Programming for 8051*	*Various mode of operation and switching sequence*
S-8	SLO-1	*Embedded System Architecture : Computer architecture taxonomy*	*Difference between task and process Multiple tasks*	*Shared data problems – Re-entrancy-Reentrancy Rules*	*Various programming language and advantage of embedded C*	*Programming for Three phase 180◦ Mode Inverter PWM pulse generation*
	SLO-2	*Harvard , von Neumann, and hybrid architectures*	*multiple processes with simple example*	*Semaphores and Shared data*	*Syntax, variable initialization and assigning a port address*	*Applications of Three phase inverter*
S-9	SLO-1	*CPUs, various processing unit and control units*	*Embedded Networking: Introduction, I/O ports*	*RTOS Semaphores*	*Header file inclusions, condition loop,*	*Basic concept of induction motor drive and speed control of V/F method*
	SLO-2	*Programming input and output, Supervisor mode, Exceptions & Traps, Co - processors*	*Different type of buses*	*Initializing semaphores Reentrancy and Semaphores – Multiple semaphores*	*Simple programme using embedded C*	*Controller Implementation for induction motor drive applications*

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Illustrate the MOS fabrication technologies and understand the electrical properties of MOS, CMOS and Bi CMOS circuits*
CLR-2 :	*Describe CMOS technology-specific layout rules in the placement and routing of transistors and interconnect and to verify the functionality, timing, power, and parasitic effects*
CLR-3 :	*Describe the various parameters and its characteristics of CMOS technology*
CLR-4 :	*Identify the real-time VLSI tools and its applications*
CLR-5 :	*Interpret the various testing methods, design tools and chip-level design techniques*
CLR-6 :	*Construct the digital logic gate using VLSI design tools*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Understand the steps for MOS fabrication technologies and analyze electrical behavior of MOS, CMOS and Bi CMOS circuits.*	2	75	75	H	-	-	-	-	-	-	-	-	-	-	-	-	M	-
CLO-2 :	*Draw the layout of integrated circuits following design rules*	2	75	75	H	-	-	-	-	-	-	-	-	-	-	-	-	M	-
CLO-3 :	*Analyze the different CMOS technology and its characteristics*	3	75	75	H	H	H	H	M	-	-	-	-	-	-	-	M	H	-
CLO-4 :	*Develop the coding for FPGA*	3	75	75	H	H	H	H	M	-	-	-	-	-	-	-	H	H	-
CLO-5 :	*Design a VLSI project having a set of objective criteria and design constraints*	3	75	75	H	H	H	H	H	-	-	-	-	-	-	-	H	H	-
CLO-6 :	*Design a digital components and basic logic gates circuits using VLSI tools*	2	75	75	H	H	H	H	H	-	-	-	-	-	-	-	H	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to IC Technology–MOS*	*VLSI circuit design processes: MOS Layers- Mask Layout, Layer contact mask layout representation*	*Gate level design: Transmission Gates*	*Introduction to design tools FPGAs (Xilinx 4000series)–Features and basic details of FPGA*	*Design Approach*
	SLO-2	*Introduction to IC Technology -PMOS*	*Coloured Stick Diagrams:- capabilities and limitations of stick diagram*	*Gate level design: Alternate gate circuits*	*Various functional block diagram with merits and demerits*	*VLSI Design Flows & Design Verification*
S-2	SLO-1	*Introduction to IC Technology NMOS, CMOS*	*Types of Design Rules VLSI circuit design*	*Basic circuit concepts: Sheet Resistance RS*	*Different syntax of fpga coding and variables*	*Design methods, Design capture tools*
	SLO-2	*Introduction to IC Technology Bi-CMOS Historical Perspective& Bi-CMOS technologies.*	*Layout of circuit diagram*	*Concept of RS in MOS*	*Simple basic programme*	*Design Flow, Design Languages, High-level Synthesis (HLS)*
S-3	SLO-1	*basic electrical properties: Basic Electrical Properties of MOS Circuits:*	*Layer Representations*	*Area Capacitance Units, Calculations, Delays*	*CPLDs (Xilinx 9500series)- Features and basic details*	*Design Verification Tools*
	SLO-2	*basic electrical properties: Basic Electrical Properties of Bi-CMOS Circuits:*	*Example of layer presentation*	*Estimation of Delay and INVERTER DELAYS Estimation of CMOS inverter delay Rise & Fall time estimation*	*Various functional block diagram with merits and demerits*	*Various Steps of verifications with one example*
S-4	SLO-1	*Ids-Vds relationships*	*CMOS Design rules for wires*	*Capacitance Modeling Driving large Capacitive Loads*	*Different syntax of CPLDs coding and variables*	*CMOS Testing:- Fault models, Test pattern generation*
	SLO-2	*Ids-Vds its characteristics*	*Layout Design rules & Lambda (λ)*	*Sizing Factor (s) , Inverter gain, Delay Optimization Problem*	*Simple basic programme*	*Need for testing:- Physical defects*

:S-5	SLO-1	MOS characteristics - transistor threshold Voltage,Wo	Design rules of Contacts	Wiring Capacitances, Fan-in and fan-out	Programmable Array Logic: introduction and applications	Test Principles, Design Strategies for test
	SLO-2	MOS characteristics -gm, gds characteristics	Design rules of Transistors	Effect of Capacitive Loading,Propagation Delay in Timing Diagrams	Operation and logic with simple problem	Fault Modeling, Design-for-Testability
S-6	SLO-1	Basic design parameters:- Figure of merit, Pass transistor	Layout Diagrams for NMOS Inverters and Gates	Choice of layers. SUBSYSTEM DESIGN: Shifters,	Design Approach with various steps	Chip-level Test Techniques
	SLO-2	MOS Transistor circuit model, Latch-up in CMOS circuits	Example layout of basic logic gates	Choice of layers. Adders, ALUs	Fuse mapping examples	Moving test up the flowFlop Factor
S-7	SLO-1	characteristics of NMOS Inverter, Various pull ups	Layout Diagrams :-CMOS Inverters and Gates	Choice of layers. Multipliers	Multiplier logic	System-level Test Techniques
	SLO-2	Resistive Load, Inverter with N type MOSFET Load	Example layout of CMOS inverters	Choice of layers. Parity generators	Alternate representation of high Fan-in structures	Characterization Test, Functional Board Testing, In-circuit testing
S-8	SLO-1	CMOS Inverter circuit operation	Scaling of MOS circuits	Comparators, Zero/One Detectors	Parameters influencing low power design	Layout Design for Improved Testability
	SLO-2	CMOS and complex CMOS logic circuit	Figure(s) of Merit (FoM) for scaling, Scaling factors for device parameters	Example of problems	Dynamic Power Consumption, Leakage power dissipation	Bridge Fault Model, Bridge Fault Simulation, Test Generation for Bridge Fault
S-9	SLO-1	Performance of the BiCMOS Inverter	Implications of scaling ondesign of Scaling	High-Density Memory Elements	Low Power Strategies: Sources of Power Dissipation	Observability and controllability
	SLO-2	Power Consumption, Designing BiCMOS Digital Gates	Limitations of Scaling	Bitline IO Circuit, SRAM	Degrees of Freedom, Supply Voltage Scaling, Ultra Low Power System Design	False Path problem

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Basic Terminologies*	*Array implementation of Stack ADT*	*Singly linked lists*	*Basic Tree Terminologies*	*Basic Terminologies of Graph*
	SLO-2	*Elementary Data Organizations*	*Stack ADT operations with example*	*Singly linked lists - Representation in memory*	*Basic Tree Operations*	*Representations of Graph*
S-2	SLO-1	*Abstract data type*	*Application of Stack: Infix to Postfix Conversion*	*Algorithm of Traversing operation*	*Binary Tree operations*	*Graph traversal algorithms - breadth first search with example*
	SLO-2	*Abstract data type Example*	*Infix to Postfix Conversion Algorithm*	*Algorithm of Searching operation*	*Algorithm of Binary Tree operations*	*Graph traversal algorithms - depth first search with example*
S-3	SLO-1	*Data Structure Operations*	*Application of Stack: Evaluation of postfix expression*	*Insertion into linked list*	*Binary Search Tree - operations - insertion*	*Prims Minimum spanning tree algorithm*
	SLO-2	*Types of Data Structure Operations*	*Evaluation of postfix expression Algorithm*	*Algorithm of Insertion into linked list*	*Algorithm of Binary Search Tree - insertion*	*Prims Minimum spanning tree algorithm - Example*
S-4	SLO-1	*Analysis of an Algorithm*	*Application of Stack: Balancing symbols*	*Deletion from linked list*	*Binary Search Tree - operations - deletion*	*Kruskal's Minimum spanning tree algorithm*
	SLO-2	*Applications: Analysis of an Algorithm*	*Balancing symbols Algorithm with example*	*Algorithm of Deletion from linked list*	*Algorithm of Binary Search Tree - deletion*	*Kruskal's Minimum spanning tree algorithm – Example*
S-5	SLO-1	*Asymptotic Notations*	*Queue ADT- OperationsIntroduction*	*Linked representation of Stack*	*Binary tree traversal*	*Bubble sort*
	SLO-2	*Properties of Asymptotic Notations*	*Queue ADT- Operations Examples*	*Linked representation of Stack - Example*	*Binary tree traversal - inorder, preorder, postorder*	*Bubble sort – Example*
S-6	SLO-1	*Time-Space trade off*	*Simple Queue- Operations*	*Linked representation of Queue*	*Example of Binary tree traversal*	*Insertion Sort algorithm*

	SLO-2	*Time-Space trade off Example*	*Algorithm of Simple Queue – Operations with examples*	*Linked representation of Queue - Example*	*Applications of Binary Trees*	*Insertion Sort algorithm – Example*
S-7	SLO-1	*Linear Search Technique*	*Circular Queue - Operations*	*Doubly linked list*	*AVL Tree- operations: Rotations*	*Selection Sort algorithm*
	SLO-2	*Linear Search Technique Example*	*Algorithm of Circular Queue - Operations*	*Operations on Doubly linked list*	*AVL Tree- operations: Rotations - Example*	*Selection Sort algorithm – Example*
S-8	SLO-1	*Complexity analysis of Linear Search Technique*	*Example of Circular Queue - Operations*	*Example of Doubly linked list*	*AVL Tree- operations: Insertion*	*Merge sort algorithm*
	SLO-2	*Example of Linear Search Technique*	*Priority Queue - Operations*	*Circular Linked List*	*AVL Tree- operations: Insertion - Example*	*Merge sort algorithm – Example*
S-9	SLO-1	*Binary Search Technique*	*Algorithm of Priority Queue - Operations*	*Circular Linked List algorithms*	*AVL Tree- operations: Deletion*	*Quick sort algorithm*
	SLO-2	*Complexity analysis of Binary Search Technique*	*Example of Priority Queue - Operations*	*Circular Linked List example*	*AVL Tree- operations: Deletion – Example*	*Quick sort algorithm – Example*

Course Code	18EEE329T	Course Name	COMPUTER SYSTEM ARCHITECTURE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	NIL	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire knowledge about the modern computer organization technologies*
CLR-2 :	*Educate the students' on machine instructions*
CLR-3 :	*Explain the modern Acorn RISC Machine (ARM) Instruction set*
CLR-4 :	*Impart knowledge about the interfacing devices*
CLR-5 :	*Identify potential of memory unit*
CLR-6 :	*Educate the students' onadvances in computer technology*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Understand the concepts of modern computer organization*	2	75	75	H	H	M	L	-	-	-	-	-	-	-	-	M	M	-
CLO-2 :	*Analyze the machine instruction concept and operation*	2	75	75	H	H	M	L	-	-	-	-	-	-	-	-	M	M	-
CLO-3 :	*Examine and solve issues related to Acorn RISC Machine (ARM) Instruction set*	2	75	75	H	H	M	L	-	-	-	-	-	-	-	-	M	M	-
CLO-4 :	*Describe the operation of input and output units*	2	75	75	H	H	M	L	-	-	-	-	-	-	-	-	M	M	-
CLO-5 :	*Examine and solve issues related to memory mapping techniques*	2	75	75	M	H	M	L	-	-	-	-	-	-	-	-	M	M	-
CLO-6 :	*Acquire knowledge on the recent trends in computer technologies*	2	75	75	H	H	M	L	-	-	-	-	-	-	-	-	M	M	-

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Computer types*	*Numbers ,arithmetic operations and characters*	*Memory access and data transfer*	*Accessing I/O devices*	*Semiconductor RAM memories*
	SLO-2	*functional units of computer architecture*	*Memory locations*	*Acorn RISC Machine(ARM)- Registers*	*Interrupts*	*Read only memories*
S-2	SLO-1	*Operational concepts*	*Memory addresses*	*Arithmetic and logic instructions*	*ARM Interrupt structure*	*Speed size and cost*
	SLO-2	*bus structures*	*Addressing mode*	*Branch Instructions*	*Direct memory access*	*Mapping techniques*
S-3	SLO-1	*Software Performance*	*Instructions and sequencing*	*Setting condition codes*	*Buses-Synchronous bus*	*Hit rate and miss penalty*
	SLO-2	*Performance and metrics*	*Assembly language*	*Loop program*	*Asynchronous bus*	*Caches on the processor chip*
S-4	SLO-1	*compiler*	*Basic input/output operations*	*Pseudo instructions*	*Interface circuits-Serial port*	*Virtual memories*
	SLO-2	*Uniprocessors to multiprocessors*	*Subroutines*	*Byte sorting*	*Parallel port*	*Memory management requirements*
S-5	SLO-1	*operations and operands*	*Logic instructions*	*Linked list insertion subroutines*	*Standard I/O interfaces*	*Second storage system*
	SLO-2	*representing instructions*	*Branch Instructions*	*Linked list deletion subroutines*	*PCI buses*	*Memory hierarchy*
S-6	SLO-1	*Logical operations*	*Execution of a complete instruction*	*Data hazards*	*Universal serial bus*	*Memory technologies*
	SLO-2	*control operations*	*Addition algorithm*	*Instruction hazards*	*Overview of parallelism*	*Cache basics*
S-7	SLO-1	*Multiple bus organization*	*Subtractionalgorithm*	*Influence on instruction sets*	*Instruction-level-parallelism*	*Measuring cache performance*
	SLO-2	*Hardwired control*	*Multiplicationalgorithm*	*Data path and control considerations*	*Parallel processing challenges*	*Improving cache performance*
S-8	SLO-1	*Micro programmed control*	*Divisionalgorithm*	*Performance considerations of pipelining*	*Flynn's classification*	*Virtual memory*
	SLO-2	*Multi computers*	*Floating Point operations*	*Overview of data path control*	*Hardware multithreading*	*Translation Lookaside Buffer*
S-9	SLO-1	*Multiprocessors*	*Sub-word parallelism*	*Pipelined datapath and control*	*Analysis of parallelism methods*	*Direct Memory Access*
	SLO-2	*Nano programming*	*Write-through and Write-back cache write method*	*Exception handling*	*Multi-core computing in parallelism*	*Interrupts*

Course Code	18EEE330T	Course Name	COMPUTER NETWORKING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the protocols of modern networking technologies*
CLR-2 :	*Educate the students' on data format& data transfer at high speed Communication*
CLR-3 :	*Explain the modern transport layer technologies*
CLR-4 :	*Identify advances in technology that may solve the actual limitations with existing networks*
CLR-5 :	*Impart knowledge about modern technologies used in application layer*
CLR-6 :	*Educate the students on network security*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Acquire knowledge about the protocols of modern networking technologies*	2	75	75	H	H	M	L	-	-	-	M	-	-	-	-	H	M	M
CLO-2 :	*Analyze the physical properties and performance characteristics of Communication media*	2	75	75	H	H	M	L	-	-	-	M	-	-	-	-	H	M	M
CLO-3 :	*Examine and solve issues related to congestion management*	2	75	75	H	H	M	L	-	-	-	M	-	-	-	-	H	H	M
CLO-4 :	*Describe the importance of reliability and quality of service, for error recovery, traffic differentiation and prioritization.*	2	75	75	H	H	M	L	-	-	-	M	-	-	-	-	H	H	M
CLO-5 :	*Develop an appreciation of the theory of common application layer.*	2	75	75	H	H	M	L	-	-	-	M	-	-	-	-	H	M	M
CLO-6 :	*Acquire knowledge about the network security system.*	2	75	75	H	H	M	L	-	-	-	M	-	-	-	-	H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Historical perspective of computer networking*	*Theoretical basis for data Communication*	*Overview of Transport layer*	*Causes of errors on data transmission*	*Traditional applications*
	SLO-2	*Theoretical models of network architecture*	*Guided transmission media*	*Elements of transport protocol*	*Impact of errors on data transmission*	*Electronic Mail*
S-2	SLO-1	*Practical models of network architecture*	*Bounded type transmission mode*	*Functions of transport layer*	*Single bit errors*	*Simple Mail Transfer Protocol*
	SLO-2	*Introduction to ISO*	*Unbounded type transmission mode*	*Addressing modes*	*Burst errors*	*POP3*
S-3	SLO-1	*ISO OSI Seven-layer model*	*Magnetic Media*	*Service point addressing*	*Need for error detection*	*Web Services*
	SLO-2	*TCP protocol*	*Issues with magnetic media*	*Segmentation process*	*error detection strategies*	*Http*
S-4	SLO-1	*IP protocol*	*Need for cable transmission modeS*	*Reassembling process*	*Overview of error correction*	*Multimedia*
	SLO-2	*Comparison of OSI and TCP/IP reference models*	*Twisted Pair cable*	*User datagram protocol*	*error correction strategies*	*Domain Name System*
S-5	SLO-1	*Synchronous transfer mode protocol*	*Baseband Coaxial Cable*	*Reliable byte stream*	*Parity Checks*	*Simple Network Management Protocol*
	SLO-2	*Asynchronous transfer mode protocol*	*Broadband Coaxial Cable*	*Connection management*	*block sum Check*	*File Access and Management*
S-6	SLO-1	*Frame relay protocol*	*narrowband ISDN*	*Causes of Congestion*	*Sliding window protocol*	*Overview of Network security*
	SLO-2	*Frame Relay and the OSI Reference Model*	*broadband ISDN*	*Retransmission*	*Elementary data link protocol*	*Cryptography*
S-7	SLO-1	*Digital subscriber line technology*	*Microwave transmission*	*Congestion Control*	*Protocol identification*	*Symmetric key algorithm*
	SLO-2	*Variation in DSL technology*	*Electromagnetic Spectrum*	*Flow control*	*Protocol verification*	*Public key algorithm*
S-8	SLO-1	*2G technology*	*Radio transmission*	*Performance issues*	*Forward error control*	*Digital signature*
	SLO-2	*3G,4G technology*	*Fiber optics*	*Quality of service*	*Backward error control*	*Management of public keys*
S-9	SLO-1	*Wi-Fi technology*	*Microwave Transmission*	*Application requirements*	*Statistical analysis of the effectiveness of error detection code*	*Communication security*
	SLO-2	*Wi-MAX technology*	*Comparison of transmission medium*	*Design issues with transport layer*	*Statistical analysis of the effectiveness of error correction code*	*Social issues*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Outline the basic architectural overview of IoT .*
CLR-2 :	*Enable the students to differentiate between IoT and M2M.*
CLR-3 :	*Enrich the knowledge about IoT platforms and design methodology*
CLR-4 :	*Examine the various hardware platforms of IoT*
CLR-5 :	*Acquire the concept of IoT in application sectors.*
CLR-6 :	*Enable the students to acquire the basic knowledge of IoT architecture, various platforms and applications.*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the issues and design challenges in IoT architecture*	1	75	75	H	-	-	-	-	H	-	-	-	-	-	-	H	M	H
CLO-2 :	*Gain knowledge on M2M and IoT*	1	75	75	H	-	-	-	M	H	-	-	-	-	-	-	M	M	M
CLO-3 :	*Interpret about various network topologies and design methodologies*	1	75	75	H	-	-	-	M	H	-	M	-	-	-	-	H	M	M
CLO-4 :	*Analyze on hardware platforms relevant to IoT.*	2	75	75	H	-	-	-	M	H	-	-	-	-	-	-	H	H	M
CLO-5 :	*Apply knowledge of IoT in various applications.*	2	75	75	H	-	-	-	M	H	-	-	H	-	-	H	H	M	M
CLO-6 :	*Understand IoT platforms, interfacing and applications.*	2	75	75	H	-	-	-	M	H	-	M	H	-	-	H	H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Definitions of IoT*	*M2M towards IoT - the global context,*	*IoT platforms*	*IoT Physical Devices & Endpoints*	*Case Studies- IoT Design and Cloud incorporation*
	SLO-2	*Functional requirements of IoT.*	*Game changers*	*IoT platforms design methodology*	*Basic building blocks of an IoT Device*	*Introduction to IoT Design*
S-2	SLO-1	*Building an IoT architecture- SOA based architecture*	*M2M to IoT - building an architecture*	*IoT design methodology - Purpose & Requirements Specification, Process Specification*	*Exemplary Device: Raspberry Pi*	*Home Automation – smart lighting, smart appliances*
	SLO-2	*API oriented architecture*	*Main design principles and needed capabilities*	*Domain Model Specification, Information Model Specification*	*Linux on Raspberry Pi*	*Intrusion detection, Smoke /Gas detectors*
S-3	SLO-1	*Physical things of IoT- Things in IoT,*	*IoT architecture outline*	*Service Specifications, IoT Level Specification, Functional View Specification*	*Raspberry Pi Interfaces - serial*	*Cities –Smart Parking, Smart Lighting, Smart Roads*
	SLO-2	*IoT Protocols*	*Standard considerations*	*Operational View Specification, Device & Component, Application development.*	*Raspberry Pi Interfaces - SPI, I2C*	*Structural health Monitoring, Surveillance, Emergency Response*
S-4	SLO-1	*Logical Design of IoT - IoT functional Blocks,*	*Introduction to M2M*	*IoT Design methodology-case study on IoT system for Weather Monitoring*	*Programming Raspberry Pi with Python – controlling LED with Raspberry pi*	*Environment - Weather Monitoring, Air Pollution Monitoring*
	SLO-2	*Communication model, Communication APIs*	*Difference between IOT and M2M*	*Case study on IOT system for Weather Monitoring*	*Programming Raspberry Pi with Python – interfacing an LED and switch with Raspberry pi*	*Noise Pollution Monitoring, Forest Fire Detection, River Floods Detections*
S-5	SLO-1	*IoT enabling technologies- wireless sensor networks*	*Software defined networking (SDN)*	*Python data types*	*Programming Raspberry Pi with Python- interfacing a light sensor with Raspberry Pi*	*Energy - Smart grids , Renewable Energy Systems, Prognostics*
	SLO-2	*Cloud Computing*	*Network function visualization (NFV) for IOT.*	*Python data structures.*	*Other IoT Devices- pcDuino, BeagleBone Black*	*Retail - Inventory Management, Smart Payment, Smart Vending Machines*

S-6	SLO-1	*IoT enabling technologies - Embedded Systems,*	*Needs for IoT system management*	*Logical Design using Python- control flow*	*Other IoT Devices - Cubieboard*	*Smart Vending Machines*
	SLO-2	*Big data analytics*	*Simple Network Management Protocols (SNMP)*	*Logical Design using Python - functions*	*Controlling LED with Raspberry Pi*	*Logistics - Route Generation and scheduling, Fleet Tracking*
S-7	SLO-1	*IoT enabling technologies - Communication protocols for IoT,*	*Limitations of SNMP*	*Logical Design using Python - modules*	*Controlling LED with Myrio*	*Shipment Monitoring, Remote Vehicle Diagnotics*
	SLO-2	*Embedded systems*	*Network operator requirements*	*Logical Design using Python - packages*	*Interfacing an LED and Switch with Raspberry Pi*	*Agriculture - Smart irrigation, Green House Control*
S-8	SLO-1	*IoT levels and deployment templates- level 1, level 2,level 3*	*Network configuration protocol (NETCONF) layer*	*Logical Design using Python - file handling,*	*Interfacing an LED and Switch with Myrio*	*Industry – Machine Diagnosis and prognosis*
	SLO-2	*IoT levels and deployment templates- level 4, level 5, level 6*	*YANG data modelling language.*	*Logical Design using Python - date/time operations, classes*	*Interfacing a Light Sensor (LDR) with Raspberry Pi Other IoT Devices - BeagleBone Black,*	*Indoor Air Quality Monitoring*
S-9	SLO-1	*IoT data management and Analytics- IoT and the cloud*	*IOT system management with NETCONF - YANG*	*Python Packages of Interest for IoT - JSON,XML*	*Interfacing a temperature and humidity sensors with Raspberry Pi Other IoT Devices -BeagleBone Black*	*Health and lifestyle - Health and fitness Monitoring*
	SLO-2	*IoT data management and Analytics- Real time analytics in IoT and Fog computing*	*NETOPEER*	*Python Packages of Interest for IoT - XML*	*Interfacing a temperature and humidity sensors with Raspberry Pi Other IoT Devices -BeagleBone Black*	*Wearable Electronics*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Need of Object-Oriented Programming*	*Introduction to Classes*	*Pointers*	*Java platform features-Data types, Key words, Scoping rules*	*finalize() method*
	SLO-2	*Characteristics of Object-Oriented Languages*	*Introduction to Objects*	*Pointers with arrays and functions*	*Automatic Type Conversion, Type Casting and Arrays*	*finalize() method: Implementation*
S-2	SLO-1	*Introduction to the principles of object-oriented programming*	*Class fundamentals*	*Virtual Functions*	*Java platform features*	*Overloading methods*
	SLO-2	*Data Types, Variables*	*Structure of class*	*Friend Functions*	*Data types, Key words, Scoping rules*	*Constructors*
S-3	SLO-1	*Constants - Type Conversion*	*Declaring objects*	*Programs using pointers and arrays*	*Operators Precedence*	*Nested classes*
	SLO-2	*Basic Program Construction*	*Simple object creation*	*Programs using functions*	*Associativity, Expression*	*Inner classes*
S-4	SLO-1	*Operators*	*Objects and messages*	*Introduction to STL: Containers, Algorithms*	*Enhanced for loop, switch statements*	*Potential problems with methods and classes*
	SLO-2	*Constants , Strings, Expressions and Data types*	*Constructors and its types*	*Introduction to STL: Iterators*	*Handling Strings*	*Potential problems with constructors and classes*
S-5	SLO-1	*Library Functions*	*Destructors*	*Potential problems with STL: Containers, Algorithms*	*Declaring objects*	*Packages*
	SLO-2	*Loops and Decisions*	*Passing arguments to Functions*	*Potential problems with STL: Iterators*	*Assigning object reference variable*	*Interfaces*
S-6	SLO-1	*Structures*	*Passing Objects as Function arguments*	*Encapsulation*	*Methods & Method Signatures*	*Potential programs with packages*
	SLO-2	*Functions : Simple Functions*	*Returning values from Functions*	*Implementation of Encapsulation*	*Method retuning Values, Method with parameters*	*Potential programs with interfaces*
S-7	SLO-1	*Passing arguments, Returning values*	*Returning Objects from Functions*	*Polymorphism*	*Variable arguments in Java*	*Event handling*
	SLO-2	*Reference Arguments*	*Operator Overloading*	*Operator and method overloading*	*I/O Basics: Byte stream& Character Stream*	*Errors and Exception handling*

S-8	SLO-1	*Recursion, Inline Functions*	*Inheritance: Basics*	*Event handling*	*Getting user input: Reading console input & Writing console output,*	*Introduction to Threads*
	SLO-2	*Default Arguments*	*Inheritance: Method overriding from operator overriding*	*Errors and Exception handling*	*Reading and Writing files-new file system*	*Multithreaded programming*
S-9	SLO-1	*Storage Classes*	*Potential programming using functions, constructors and destructors*	*Potential programs using encapsulation, polymorphism*	*Constructors: Default Constructor,*	*Potential programs using threads*
	SLO-2	*Arrays – Strings*	*Potential programming using overloading and inheritance*	*Potential programs using exception handling*	*Parameterized constructor*	*Potential programs using multithreads*

Course Code	18EEE422T	Course Name	MODERN OPTIMIZATION TECHNIQUE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical & Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce and classify different conventional optimization techniques.*
CLR-2 :	*Understand the fundamentals of genetic algorithm and to apply appropriate algorithm for Engineering optimization problems*
CLR-3 :	*Outline the concept of particle swarm optimization and its hybrid approach to Engineering applications*
CLR-4 :	*Interpret other modern optimization algorithms for engineering applications*
CLR-5 :	*Extend optimization techniques to multi objective optimization*
CLR-6 :	*Introduce the concept of optimization design for Engineering problems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Categorize optimization problems and its techniques based on constraints and variables*	*1*	*75*	*75*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Apply Genetic algorithm for various Engineering application*	*2*	*75*	*75*	*H*	*H*	*M*	*M*	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-3 :	*Utilize Particle swarm optimization to Engineering applications*	*3*	*75*	*75*	*H*	*M*	*M*	*M*	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-4 :	*Gain knowledge about other modern optimization algorithms*	*3*	*75*	*75*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-5 :	*Formulate multi objective optimization algorithm for various applications*	*3*	*75*	*75*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	-	-	*H*	*H*	-
CLO-6 :	*Apply optimization techniques in modelling Engineering problems*	*3*	*75*	*75*	*H*	*H*	*H*	*H*	-	-	-	-	-	-	-	-	*H*	*H*	-

Program Learning Outcomes (PLO)

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to optimization*	*Introduction – Genetic Algorithm*	*Particle Swarm Optimization*	*Bacterial foraging-Chemotaxis, Swarming*	*Multiobjective optimization*
	SLO-2	*Classification of optimization problem*	*Encoding – Methods for GA*	*Fundamental principle*	*Operation of Bacterial foraging*	*General form of MOOP*
S-2	SLO-1	*Single variable optimization – optimalityconditions*	*Fitness function*	*Velocity updating in PSO*	*Bees colony algorithm-Behavior of Honey bee swarm*	*Pareto optimality*
	SLO-2	*Single variable (unconstrained optimization) – Exhaustive search method*	*Maximization & Minimization*	*Algorithm for PSO*	*Algorithm for Bee colony optimization*	*Dominance test*
S-3	SLO-1	*Successive quadratic estimation method*	*Genetic operators – Crossover*	*PSO – Parameter Selection*	*Differential evolution-Initialization, Mutation*	*Classical Methods – Weighted sum method, ε-constraint method*
	SLO-2	*Newton method*	*Single point crossover, Two-point crossover*	*Pseudocode*	*Recombination, Selection*	*Weighted metric methods, Benson method.*
S-4	SLO-1	*Multi variable optimization – optimality conditions*	*Uniform Crossover, Arithmetic Crossover*	*Implementation & Convergence issues in PSO*	*Ant colony optimization-Introduction*	*Multi objectiveGA*
	SLO-2	*Multi variable optimization (unconstrained) – Simplex search method*	*Mutation*	*Advanced operators of PSO*	*Algorithm for Ant colony optimization*	*Fitnessassignment*
S-5	SLO-1	*Cauchy's method*	*Parent SelectionMethods*	*Meta-Optimization-Behavioral parameters*	*Simulated Annealing optimization-Components and control parameters*	*Sharing function*
	SLO-2	*Steepest Descent Method*	*Rank selection, Roulette wheel selection, Stochastic universal selection, Tournament selection*	*Algorithm for Meta Optimization*	*Algorithm for Simulated Annealing*	*Convergence criterion*

S-6	SLO-1	*Multivariable optimization (Constrained) Kuhn – Tucker Conditions*	*Issues in GA implementation*	*Application of PSO*	*Firefly optimization-Working Principle*	*NSGA-II-Fitness assignment*
	SLO-2	*Transformation Method –Method of Multipliers*	*Applications of GA –Filter design*	*Harmonics Elimination*	*Algorithm for Firefly optimization*	*Sharing Function*
S-7	SLO-1	*Linearized search Technique*	*Automatic Load Frequency Control (ALFC)*	*Applications of PSO*	*Flower Pollination optimization-Introduction*	*Dynamic neighborhood PSO-Introduction*
	SLO-2	*Frank Wolfe method*	*Automatic Voltage Regulation (AVR)*	*Maximum Power Point Tracking*	*Algorithm for Flower pollination*	*Algorithm for Dynamic neighborhood PSO*
S-8	SLO-1	*Non-Linearized Search Technique*	*Evolutionary Algorithm*	*Application of PSO*	*Grey Wolfe optimization-Introduction*	*Vector evaluated PSO*
	SLO-2	*Reduced gradient method*	*Evolutionary Programming*	*Reactive power control using PSO*	*Algorithm for Grey Wolfe optimization*	*Applications – Economic load Dispatch*
S-9	SLO-1	*Quadraticprogramming-Objective Function*	*Evolutionary Strategy-Non-Recombinative strategy*	*HybridAlgorithm of GA and PSO*	*Comparison of various algorithms*	*Unit Commitment,*
	SLO-2	*Algorithm*	*Recombinative strategy*	*GAandPSO operators*	*Benchmark functions*	*Robot Path Planning*

Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Acquire knowledge on neural network.*
CLR-2 :	*Understand the neural network algorithms for pattern classification and regression problems*
CLR-3 :	*Introduce the basics of fuzzy logic and its reasoning.*
CLR-4 :	*Study the architecture of Fuzzy logic controller and neuro-fuzzy based systems.*
CLR-5 :	*Develop the knowledge on genetic algorithm for optimization problems*
CLR-6 :	*Demonstrate the application of neural network, fuzzy logic and Genetic algorithm in real world*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)
CLO-1 :	*Illustrate the working of various learning algorithms of Neural network.*	3	75	75
CLO-2 :	*Develop and analyze neural networks for pattern classification and pattern association.*	3	75	75
CLO-3 :	*Apply fuzzy logic and reasoning to handle uncertainty and solve engineering problems*	3	75	75
CLO-4 :	*Develop the process of approximate reasoning using Fuzzy logic controller and Neuro-Fuzzy Modeling.*	3	75	75
CLO-5 :	*Formulate a mathematical background to carry out optimization using genetic algorithm.*	3	75	75
CLO-6 :	*Design and perform experiments on real life problems using Neural network, Fuzzy logic and Genetic algorithm*	3	75	75

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Biological Neurons and Their Artificial Models*	*Pattern Association-Hebb rule*	*Introduction to Fuzzy Logic, Uncertainty based Information*	*Introduction to Fuzzy Reasoning*	*Difference between Traditional optimization Algorithms and genetic algorithm*
	SLO-2	*Models of Artificial Neural Networks, Architectures*	*Delta Rule for pattern association*	*Chances / randomness versus Fuzziness*	*Fuzzy rule generation. Aggregation Operations*	*The basic operation of genetic algorithm*
S-2	SLO-1	*Setting Weights, Activation functions, Learning Processes*	*Hetero associative memories - Architecture-Algorithm*	*Classical/crisp set*	*Fuzzy Logic controller- Basic block*	*Pseudo code of GA*
	SLO-2	*Learning Paradigms-Supervised, Unsupervised and reinforcement Learning*	*Example Problem-Application*	*Properties and operations of classical set*	*Knowledge Base-Rule base-Inference system-Importance*	*Schema theorem*
S-3	SLO-1	*McCulloch-Pitt Neuron*	*Auto associative memories -Architecture-Algorithm*	*Fuzzy set- Representation of fuzzy sets*	*Fuzzification*	*Encoding operation*
	SLO-2	*Linear Separability*	*Example Problem-Application-Storage Capacity*	*Properties and Operations of Fuzzy Sets*	*Assignment of membership functions*	*Binary, Octal, Hexadecimal , Permutation and Tree encoding*
S-4	SLO-1	*ANN training Algorithms-Training rules*	*Iterative Associative Net- Discrete Hopfield Network -Energy Function*	*Measure of Fuzziness and Inaccuracy of fuzzy set*	*Defuzzification Methods-Weighted Average method*	*Importance of Selection and Reproduction operators of GA*
	SLO-2	*Hebb rule-Algorithm -Application*	*Continuous Hopfield Network-Energy Function*	*Cartesian Product- Fuzzy Relations-Composition of fuzzy Relations*	*Centroid method, Center of sums, Mean max method*	*Selection operators of GA-Roulette Wheel, Tournament selection, Boltzmann selection and Rank Selection*
S-5	SLO-1	*Perceptrons-Algorithm*	*Bidirectional associative memories-Architecture (BAM)*	*Fuzzy Max-Min Composition*	*Introduction to Architecture of Mamdani Type Fuzzy Control Systems*	*Crossover operators of GA-Single point*
	SLO-2	*Application of Perceptron algorithm*	*BAM Algorithm-Analysis*	*Fuzzy Max-Product Composition*	*Fuzzy Reasoning approach*	*Two point-multiple point-Uniform crossovers*

S-6	SLO-1	*Delta Rule*	*Competitive Learning Networks-Basics*	*Types of fuzzy sets-Terms of fuzzy sets*	*Takagi and Sugeno's approach*	*Mutation operators of GA*
	SLO-2	*Derivations--Adaline Algorithm*	*Kohonen Self organizing Maps-Algorithm*	*Types of Membership Function distributions*	*Introduction to Fuzzy Clustering*	*Sample Problem to demonstrate the working of GA*
S-7	SLO-1	*Back Propagation Algorithm-Derivation*	*Learning Vector Quantization (LVQ)*	*Classical Logic, Multivalued Logics*	*Fuzzy Knowledge Based Systems for real world applications.*	*GA convergence analysis*
	SLO-2	*Sample problem for BPN*	*LVQ-Architecture-Algorithm*	*Fuzzy Propositions*	*Design of controllers using Simulation Software*	*Application of Genetic Algorithm.*
S-8	SLO-1	*Radial Basis Function Networks-Basics*	*Basic architecture of Adaptive Resonance Theory (ART)*	*Fuzzy Qualifiers*	*Hybrid Model implementing Fuuzy and Neuro*	*Hybrid Algorithms using GA*
	SLO-2	*Algorithm of RBF*	*Basic Operation of ART*	*Linguistic Variables, Linguistic Hedges*	*Adaptive Neuro-Fuzzy Inference Systems*	*Basics of GA-Fuzzy Logic, GA-Neural Network*
S-9	SLO-1	*Multilayer Perceptron Model*	*Applications of Artificial Neural Networks .*	*Introduction to basic Fuzzy Arithmetic*	*Architecture of adaptive neuro fuzzy Hybrid Learning Algorithm*	*GA-Fuzzy-Neural Network*
	SLO-2	*Madaline*	*Design of controllers using Simulation Software*	*Extension Principle.*	*Learning Methods that Cross-fertilize ANFIS and RBFN*	*Case study on real time application using Neuro/Fuzzy/Genetics*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce big data and its role in various domains*
CLR-2 :	*Learn and analyze the big data analytical tools*
CLR-3 :	*Introduce Hadoop and its components*
CLR-4 :	*Implement Map Reduce technique*
CLR-5 :	*Study the security concerns of big-data*
CLR-6 :	*Create an overall knowledge in big data with different environment*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Familiarize with applications of Big Data Analytics in various domains*	1	80	75	H	-	-	-	-	-	-	M	-	-	-	-	H	M	M
CLO-2 :	*Practice open source big data analytical tools*	2	80	75	H	H	H	H	H	-	-	M	-	-	-	-	M	M	M
CLO-3 :	*Install and operate the open source Distributed File System Hadoop*	2	80	75	H	H	M	M	H	-	-	-	-	-	-	-	H	M	-
CLO-4 :	*Solve simple problems using Map Reduce Technique*	2	80	75	H	H	M	M	H	-	-	-	-	-	-	-	H	H	-
CLO-5 :	*Analyze the log file in security aspects*	2	80	75	H	H	M	M	-	-	-	H	-	-	-	-	H	M	H
CLO-6 :	*Design a big data platform for different applications*	2	80	75	H	H	M	M	M	-	-	M	-	-	-	-	H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Big Data Platform*	*Data Analytics Lifecycle*	*History of Hadoop*	*Developing a Map Reduce Application*	*Introduction to Security Analytics*
	SLO-2	*Challenges of Conventional Systems*	*Overview of Data Analytics Lifecycle*	*Hadoop Distributed File System*	*How MapReduce Works*	*Challenges in Security Analytics*
S-2	SLO-1	*Intelligent data analysis*	*Successful Analytics Project*	*Components of Hadoop*	*Unit Tests*	*Concepts in Data Analytics*
	SLO-2	*Nature of Data*	*Key Roles for a Successful Analytics Project*	*Analyzing the Data with Hadoop*	*Unit Tests with MapReduce Unit*	*Techniques in Data Analytics*
S-3	SLO-1	*Analytic Processes and Tools*	*Background of Data Analytics Lifecycle*	*Scaling Out, Hadoop Streaming*	*Test Data*	*Data for Security Analysis*
	SLO-2	*Industry Examples of Big Data*	*Global Innovation Network and Analysis*	*Design of HDFS*	*Local Tests*	*Analysis in Everyday Life*
S-4	SLO-1	*Web Analytics*	*Case Study: Global Innovation Network and Analysis*	*Java Interfaces to HDFS Basics*	*Anatomy of a Map Reduce Job Run*	*Scenarios in Intrusion*
	SLO-2	*Big Data and Marketing*	*Introduction to R*	*Data Flow, Hadoop I/O*	*Classic MapReduce*	*Challenges in Intrusion*
S-5	SLO-1	*Fraud and Big Data*	*Introduction to SQL*	*Data Integrity*	*YARN*	*Incident Identification*
	SLO-2	*Risk and Big Data*	*Charts*	*Compression, Serialization*	*Failures in Classic MapReduce*	*Analysis of Log File*
S-6	SLO-1	*Credit Risk Management*	*Graphs*	*Avro, File Based Data Structures*	*Failures in YARN*	*Loading the Data*
	SLO-2	*Big Data and Algorithmic Trading*	*Data tools*	*Pig, Hive*	*Job Scheduling*	*Simulation*
S-7	SLO-1	*Big Data and Healthcare*	*Statistical Methods*	*Hbase*	*Shuffle and Sort*	*Security Process*
	SLO-2	*Big Data in Medicine*	*Clustering*	*Data Model and Implementations*	*Task Execution*	*Access Analytics*
S-8	SLO-1	*Advertising and Big Data*	*Association Rules Regression*	*Hbase Clients, Hbase Examples*	*MapReduce Types*	*Security Analysis*
	SLO-2	*Different advertising in Big Data*	*Classification*	*Praxis, Cassandra*	*MapReduce Formats*	*Security Analysis with Text Mining Security Intelligence*
S-9	SLO-1	*Big Data Technologies*	*Time Series Analysis*	*Cassandra Data Model*	*MapReduce Features*	*Security Breaches*
	SLO-2	*Classification of different technologies in Big Data*	*Text Analysis*	*Cassandra Clients, Cassandra Examples*	*Hadoop environment*	*Security Breaches Examples*

Course Code	18EEE426T	Course Name	FUNDAMENTALS OF CLOUD COMPUTING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electrical and Electronics Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Outline cloud computing and its model*
CLR-2 :	*Explain the cloud-enabling technology and its applications*
CLR-3 :	*Educate on different cloud computing architectures*
CLR-4 :	*Understand the cost metrics and cloud management*
CLR-5 :	*Provide adequate knowledge in cloud security*
CLR-6 :	*Create application by utilizing cloud platforms*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Recall the basic concepts of cloud computing and its model*	1	80	75	H	-	-	-	-	-	-	-	-	-	-	-	H	M	-
CLO-2 :	*Acquire knowledge on the cloud enabling technologies and its applications*	2	80	75	H	H	M	M	M	-	-	L	-	-	-	-	M	M	L
CLO-3 :	*Illustrate the basic concepts of cloud computing architecture*	1	80	75	H	-	-	-	-	-	-	-	-	-	-	-	H	M	-
CLO-4 :	*Analyze the cost metrics and recall the concepts of cloud management*	2	80	75	H	H	M	M	-	-	-	M	-	-	-	-	H	H	M
CLO-5 :	*Realize the security threats in cloud*	2	80	75	H	H	H	M	-	-	-	M	-	-	-	-	H	M	M
CLO-6 :	*Design a perfect cloud platform for different applications*	2	80	75	H	H	M	M	M	-	-	M	-	-	-	-	H	M	M

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Cloud*	*Key Drivers to Adopting the Cloud*	*Requirements of Cloud computing architecture*	*Cost Metrics*	*Infrastructure Security*
	SLO-2	*Overview of Cloud*	*Examples of Key Drivers to Adopting the Cloud*	*Introduction to Cloud computing architecture*	*Pricing Models*	*The Network Level Infrastructure Security*
S-2	SLO-1	*Basic Concepts of Cloud*	*The Impact of Cloud Computing*	*Workload Distribution Architecture*	*Business Cost Metrics*	*The Host Level Infrastructure Security*
	SLO-2	*Basic Terminology of Cloud*	*The Impact of Cloud Computing on Users*	*Example*	*Cloud Usage Cost Metrics*	*The Application Level Infrastructure Security*
S-3	SLO-1	*Goals*	*Broadband Networks*	*Resource Pooling Architecture*	*Cost Management*	*Data Security and Storage*
	SLO-2	*Benefits*	*Internet Architecture*	*Example*	*Considerations of Cost Management*	*Aspects of Data Security*
S-4	SLO-1	*Risks*	*Data Center Technology*	*Dynamic Scalability Architecture*	*Service Quality Metrics*	*Data Security Mitigation*
	SLO-2	*Challenges*	*Virtualization Technology*	*Example*	*Different types of Service Quality Metrics*	*Provider Data*
S-5	SLO-1	*Cloud service provider*	*Web Technology*	*Elastic Resource Capacity Architecture*	*SLA*	*Provider Data Security*
	SLO-2	*Cloud service consumer*	*Multitenant Technology*	*Example*	*SLA Guidelines*	*Encryption*
S-6	SLO-1	*Cloud Characteristics*	*Service Technology*	*Service Load Balancing Architecture*	*Identity and Access Management*	*Hashing*
	SLO-2	*Issues in Cloud Computing*	*Different Applications of Cloud Computing*	*Example*	*Trust Boundaries*	*Digital Signature*
S-7	SLO-1	*Cloud Computing*	*Healthcare*	*Cloud Bursting Architecture*	*IAM*	*Public Key Infrastructure (PKI)*
	SLO-2	*Grid Computing*	*Energy systems*	*Example*	*IAM Challenges*	*Example*
S-8	SLO-1	*Comparative study of Cloud Computing and Grid Computing*	*Transportation systems*	*Elastic Disk Provisioning Architecture*	*Relevant IAM Standards for Cloud Services*	*Single Sign On (SSO)*
	SLO-2	*Cloud Service Models*	*Manufacturing industry*	*Example*	*Relevant IAM Protocols for Cloud Services*	*Kerberos authentication - One-time password*
S-9	SLO-1	*IaaS, PaaS and SaaS*	*Education*	*Redundant Storage Architecture*	*IAM Practices in the Cloud*	*Example*
	SLO-2	*Cloud Deployment Models*	*Mobile Communication*	*Example*	*Cloud Authorization Management*	*Cloud Based Security Groups*

ACADEMIC CURRICULA

Professional Elective Courses

ELECTRONICS AND COMMUNICATION ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18ECE201J	Course Name	PYTHON AND SCIENTIFIC PYTHON	Course Category	E	Professional Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understanding the python language construct and apply them for scientific computation*
CLR-2 :	*Apply python vector ,list and plot concept to solve curve fitting*
CLR-3 :	*Applying Dictionary concept to model Polynomials*
CLR-4 :	*Create insights to difference equation based system model and solving them with python*
CLR-5 :	*Analyze Monte Carlo Simulation for computing Probabilities*
CLR-6 :	*Create insights to the concepts and programming of SciPy, numpy, matplotlib to solve scientific problem*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	PLO 1	PLO 2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9	PLO 10	PLO 11	PLO 12	PLO 13	PLO 14	PLO 15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Apply python language construct to compute formula and scientific problem*	*2*	*80*	*70*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	*H*
CLO-2 :	*Analyze Mathematical Models system using f Difference Equations and solving*	*2*	*85*	*75*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	*H*
CLO-3 :	*Apply time sequence concept for generation and processing of audio signal by python*	*2*	*75*	*70*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	*H*	-	-
CLO-4 :	*Apply python language construct to solve Polynomials*	*2*	*85*	*80*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	*H*
CLO-5 :	*Apply python language construct to compute probability by Monte Carlo Simulation ,game design and dynamic random motion creation*	*2*	*85*	*75*	*H*	-	*H*	-	-	-	-	-	-	-	-	-	-	-	*H*
CLO-6 :	*Apply SciPy, numpy, matplotlib to statistical analysis , correlation coefficient analysis , Solving equations- Linear least squares solutions and signal processing*	*2*	*80*	*70*	-	-	-	-	-	-	-	-	-	-	-	-	-	-	*H*

Duration (hour)		Solving Simple Formula And Scientific Problem	Plots, Array and Difference Equation Modelling	File I/O, Polynomials and Web Programming	Random Process and Game Programming	SciPy ,Numpy and Signal Processing
		12	12	12	12	12
S-1	SLO-1	*Computing with Formulas- Using a Program as a Calculator*	*Vectors, Mathematical Operations on Vectors, Vector Arithmetics and Vector Function*	*Reading Data from File- Line by Line, Reading a Mixture of Text and Numbers*	*Drawing Random Numbers- Uniformly Distributed Random Numbers*	*SciPy, numpy, matplotlib*
	SLO-2	*Using Variables, Formatting Text and Numbers*	*Arrays in Python Programs-Using Lists for Collecting Function Data*	*Making Dictionaries*	*Computing the Mean and Standard Deviation*	*Basic array methods in numpy, Changing the shape of an array*
S-2	SLO-1	*Celsius-Fahrenheit Conversion,*	*Curve Plotting-The SciTools and Easyviz Packages*	*Dictionary Operations*	*The Gaussian or Normal Distribution-Drawing a Random Element from a List*	*Maximum and minimum values*
	SLO-2	*Evaluating Standard Mathematical Functions, Type Conversion*	*Plotting a Single Curve, Decorating the Plot, Plotting Multiple Curves, Controlling Line Styles*	*Polynomials as Dictionaries, File Data in Dictionaries, File Data in Nested Dictionaries*	*Drawing random interger*	*Reading and writing an array to a fle*
S 3-4	SLO-1 SLO-2	*Lab 1:programming on formula and Standard Mathematical Functions- Evaluate a Gaussian function, Compute the air resistance on a football*	*Lab 4: Curve Plotting*	*Lab 7: reading student marks file into a dictionary data with the student name as key and computing the average grades*	*Lab 10: real card games*	*Lab 13: numpy file reading and data analysis*
S-5	SLO-1	*Complex Numbers, Complex Arithmetic's in Python*	*Numerical Python Arrays manipulations*	*Strings- Common Operations on Strings*	*Computing Probabilities- Principles of Monte Carlo Simulation*	*Statistical methods in numpy*
	SLO-2	*Input Data-Reading Keyboard Input-Reading from the Command Line*	*Higher-Dimensional Arrays- Two-Dimensional Numerical Python Arrays*	*Reading Coordinates*	*Throwing Dice, Rolling Two Dice game*	*Statistical methods in numpy*

S-6	SLO-1	*Making Modules, Collecting Functions in a Module File*	*Matrix Objects*	*Reading Data from Web Pages- About Web Pages*	*Drawing Balls from a Hat*	*Histograms*
	SLO-2	*Using Modules*	*Mathematical Models Based on Difference Equations- Interest Rates*	*Access Web Pages in Programs- Reading Pure Text Files,*	*Simple Games- Guessing a Number*	*Solving equations- Linear least squares solutions- Beer-Lambert Law*
S 7-8	SLO-1	*Lab 2: program on Making Modules and using them*	*Lab 5: Animating a Function-temperature on earth*	*Lab 8:reading web temperature text file into Dictionaries and computing average Temperature*	*Lab 11: Simple Games*	*Lab 14: the correlation coefficient between pressure and temperature*
	SLO-2					
S-9	SLO-1	*while loops and for loops*	*the Factorial as a Difference Equation*	*Extracting Data from an HTML Page*	*Random Walk in One Space Dimension*	*One-Dimensional Fast Fourier Transforms*
	SLO-2	*Lists and list manipulation*	*Growth of a Population, Payback of a Loan, Making a Living from a Fortune*	*Writing a Table to File, Reading and Writing Spreadsheet Files*	*Basic Implementation, visualization and Computing Statistics of the Particle Positions*	*Matplotlib basics- Plotting on a single axes object, scatter plot, Bar charts and pie charts*
S-10	SLO-1	*Loops with List Indices, Nested Lists*	*Logistic Growth, Programming with Sound Writing Sound to File, Reading Sound from File,*	*Representing a Function as a Class and manipulation*	*Random Walk in Two Space Dimensions*	*Choosing the Length of the DFT*
	SLO-2	*Tuples, Functions, Lambda Functions, If Tests*	*Playing Many Notes*	*Bank Accounts as class, A Class for Solving ODEs*	*Basic Implementation, visualization and Computing Statistics of the Particle Positions*	*Filters in Signal Processing*
S 11-12	SLO-1	*Lab 3: Programming on list and loops*	*Lab 6: Sound generated by formula and difference equation*	*Lab 9: Programming on class*	*Lab 12: Random Walk in One Space Dimension or Two Space Dimensions*	*Lab 15: Numpy signal processing*
	SLO-2

Course Code	18ECE202T	Course Name	MICRO- AND NANO-FABRICATION TECHNOLOGIES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Provide learners a systematic overview of micro and nano fabrication processes*
CLR-2 :	*Gain understanding of lithography, etching and ion implantation methods to fabricate, structure and modify the layer*
CLR-3 :	*Understand thin film fabrication techniques including PVD and CVD and to apply the knowledge to film formation*
CLR-4 :	*Apply the knowledge of microfabrication technology to the fields of general microelectronics systems*
CLR-5 :	*Learn the significant advances in molecular engineering*
CLR-6 :	*Embark on building micro/ nano structures applicable to their needs.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis0	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Understand the various layering Technologies*	2	80	70	H	-	-	-	-	-	-	-	-	-	-	-	M	-	
CLO-2 :	*Realize how the pattern generation is done using Lithography Techniques*	2	85	75	H	-	M	-	-	-	-	-	-	-	-	-	M	-	
CLO-3 :	*Gain knowledge on particle sources, Optics and Interaction*	2	75	70	H	-	M	-	-	-	-	-	-	-	-	-	-	-	H
CLO-4 :	*Learn the device and circuit fabrication Techniques*	2	85	80	H		M	-	-	-	-	-	-	-	-	-	-	-	H
CLO-5 :	*Learn about new and advances in fabrication Technologies*	2	85	75	H	-		H	-	-	-	M	-	-	-	M	-	-	H
CLO-6 :	*Know the limitations and tools of micro, nanofabrication.*	2	80	70	H	M	-	-	M	-	-	-	-	-	-	L	M	-	H

Duration (hour)		Crystal Growth, Epitaxy, Oxidation	Lithographic Processes	Deposition, Diffusion, Ion implantation	Device Circuit Fabrication	Molecular Nanotechnology
		9	9	9	9	9
S-1	SLO-1	*Starting Materials*	*Photoreactive Materials*	*Vaccum Evaporation*	*Isolation*	*Directed Self Assembly*
	SLO-2	*Growth from Melt (Czochralski Technique)*	*Image Reversal*	*Sputter Deposition*	*Self Alignment*	*Device Assembly*
S-2	SLO-1	*Considerations for Paper Crystal Growth*	*Pattern Generation*	*Chemical Vapour Deposition*	*Local Oxidation-Trench Technique*	*Electrostatic*
	SLO-2	*Cystal Orientation, Crystal hardening Techniques*	*Mask Making*	*Growth Habit*	*Planarization*	*Templated self assembly*
S-3	SLO-1	*Doping, Dislocation*	*Pattern Transfer*	*Fims for protection & Masks*	*Metalization*	*Colloids & Nanoparticles*
	SLO-2	*Molecular Beam Epitaxy*	*Optical Printing*	*Self-aligned Masks*	*Gettering*	*Block Copolymers*
S-4	SLO-1	*Gas Source MBE*	*Advanced Techniques*	*Films for Doping*	*NIOS-based Micro Circuits*	*DNA Nanostructures*
	SLO-2	*Vapour Phase Epitaxy*	*Short Wave lengths*	*Dopart Sources*	*P,n Channel Transistors*	*Scanning probe lithography Techniques*
S-5 5-6	SLO-1	*VPE Process to Silicon*	*Multilayer Resists*	*Films for Ohmic contacts*	*Complementary Transistors*	*Local Anodic Oxidation*

	SLO-2	*VPE Process for GaAs*	*Phase Shifting Masks*	*Wet Chemical etching*	*Memory Devices*	*Scribing*
S-7	SLO-1	*Liquid Phase Epitaxy*	*Electron Beam Techniques*	*Anisotropic Effects*	*SOI Devices*	*Atomic Manipulation*
	SLO-2	*LPE System*	*Lon-Beam Techniques*	*Dry Physical Etching*	*BJT based Silicon Micro Circuits*	*SPM Scanning Probe Microscopy*
S-8	SLO-1	*Thermal Oxidation of Silicon*	*X Ray Printing*	*Dry Chemical Etching*	*The buried layer*	*Erasable Electrostatic Lithography*
	SLO-2	*Kinetics of Oxide Growth*	*Problem areas- defects*	*Reactive Lon Etching*	*p-n-p Transistor*	*Limits to Nano Fabrication*
S-9	SLO-1	*Oxidation System*	*Feature size control & anisotropic Etch Mechanism*	*Penetration range &Transverse effects*	*Field Effect Transistor*	*Limits to MSO Devices*
	SLO-2	*Halogenic Oxidation*	*Lift off Techniques*	*Annealing*	*BICMOS Integrated Circuits*	*Limits for Pattern Generation*
	SLO-2	*Anodix Oxidation* *Plasma Processes*	*Plasma reactor* *Relative Plasma etching Technique*	*Ion Implantation systems* *High energy, high current Inplants*	*Self Aligned Technology* *The Hetero junction Bipolar Transistor*	*Nanofabrication Tools*

Course Code	18ECE204J	Course Name	ARM-BASED EMBEDDED SYSTEM DESIGN	Course Category	E	Professional Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	18ECC203J	Co-requisite Courses	Nil	Progressive Courses	18ECE305J, 18ECE306J
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/ Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-1 :	*Understand fast software development tools of ARM processor*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLR-2 :	*Understand I/O programming for ARM chip; A/D, PWM etc.*																		
CLR-3 :	*Understand the usage of timers and serial interfacing.*																		
CLR-4 :	*Know effective use of memory; and network interfacing, Ethernet and wireless protocol supports*																		
CLR-5 :	*Make application for audio signal processing.*																		
CLR-6 :	*Develop ARM Cortex-M based embedded systems for networking and signal processing applications.*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*																		
CLO-1 :	*Learns about "mbed" software and C language application for ARM Cortex-M processors.*	*2*	*80*	*70*	*L*												*H*		
CLO-2 :	*Learns using mbed software to use A/D converter, PWM generation and digital input / output.*	*2*	*80*	*70*	*L*	*M*	*M*		*M*								*H*		
CLO-3 :	*Learns to program System timer and interval timers; use serial interface and use LCD display.*	*2*	*80*	*70*													*H*		
CLO-4 :	*Learns to use memory effectively and program network interface.*	*3*	*80*	*60*		*M*	*M*										*M*		
CLO-5 :	*Learns to do audio signal processing on embedded platform.*	*3*	*80*	*60*		*M*	*M*	*M*	*M*								*M*		
CLO-6 :	*Use of "mbed" software pack on ARM Cortex-M processor for networking and simple signal processing.*	*3*	*80*	*60*	*L*	*M*	*M*	*M*	*M*								*M*		

Duration (hour)		Cortex-M processor	Peripheral Interfacing-I	Peripheral Interfacing-II	Network Interfacing	Audio Signal Processing
		15	15	15	15	15
S-1	SLO-1	*Introducing embedded systems and mbed*	*Starting to Program Digital Input and Output*	*Introducing Synchronous Serial Communication*	*Memory organization*	*An Introduction to Digital Audio*
	SLO-2	*Introducing embedded systems and mbed*	*Voltages as Logic Values*	*I2C bus*	*Memory organization*	*USB MIDI on the mbed*
S-2	SLO-1	*ARM Cortex assembly language basics.*	*Introducing Analog output Data Conversion*	*Communicating With I2C-Enabled Sensors*	*Using Data Files With the mbed*	*Digital Audio Processing*
	SLO-2	*ARM Cortex assembly language basics.*	*Digital Output on the mbed*	*Asynchronous Serial Data Communication*	*Example mbed Data File Access*	*Digital Audio Filtering Example*
S 3-4	SLO-1 SLO-2	*Lab-1:Assembly language program, simulation -1*	*Lab 4: A/D conversion program*	*Lab 8: Multinode I2C Bus*	*Lab 10: Data logging*	*Lab 13: Audio signal generation*
S-5	SLO-1	*Cortex-M processor architecture and Basics : Programming exercises*	*Digital Input and Output.*	*LCD interfacing*	*Using External SD Card Memory With the mbed*	*Delay/Echo Effect*
	SLO-2	*Cortex-M processor architecture and Basics : Programming exercises*	*Digital Input and Output.*	*Using the mbed TextLCD Library*	*Using External USB Flash Memory With the mbed*	*Working With Wave Audio Files*
S-6	SLO-1	*Development Environment using the mbed*	*Switching Larger DC Loads*	*Time and Tasks in Embedded Systems*	*Introduction to Internet Communication*	*High-Fidelity Digital Audio With the mbed*

	SLO-2	*Development Environment using the mbed*	*Switching Larger DC Loads*	*Responding to External Events*	*The Ethernet Communication Protocol*	*High-Fidelity Digital Audio With the mbed*
S 7-8	SLO-1	*Lab 2: Assembly language program, simulation-2*	*Lab 5: Mini Project: Letter Counter*	*Lab 8: A/D output on LCD*	*Lab 11: Ethernet Communication*	*Lab 14: Model lab examination*
	SLO-2					
S-9	SLO-1	*Keil IDE and Debugging tools*	*Another Form of Analog Output: Pulse Width Modulation*	*An Introduction to Timers*	*Introducing Wireless Data Communication*	*Summary on Digital Audio and Digital Signal Processing*
	SLO-2	*Keil IDE and Debugging tools*	*Pulse Width Modulation on the mbed*	*Using the mbed Timer*	*Wireless Data Communication : Bluetooth and Zigbee*	*Summary on Digital Audio and Digital Signal Processing*
S-10	SLO-1	*C- language review*	*Design of PWM problem*	*Using the mbed Timeout and Ticker*	*Local Area Network Communications With the mbed*	*Review and discussions*
	SLO-2	*Embedded C , introduction*	*Design of PWM problem*	*The Real-Time Clock*	*Using RPC*	*Review and discussions*
S 11-12	SLO-1	*Lab 3: Parallel port programming, simulation*	*Lab 6: PWM waveform generation*	*Lab 9: Experimenting Interrupts, Timers*	*Lab 12: RPC Communication through ethernet*	*Lab 15: Final lab examination*
	SLO-2

CLR-1 :	*Know why many high volume embedded systems need to be function specific*																		
CLR-2 :	*Design circuits using FPGA knowledge of using its resources like, clock, cells, device modules, etc.*																		
CLR-3 :	*study Xilinx FPGA IDE and design practice*																		
CLR-4 :	*Understand platform FPGAs*																		
CLR-5 :	*Understand FPGA system design and practical issues*																		
CLR-6 :	*Develop designs using FPGAs/PSoCs for specific embedded modules and low-power designs*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*																		
CLO-1 :	*Explain Micro controller subsystems*	*2*	*80*	*70*	*M*												*H*		
CLO-2 :	*Make system design with PSoCs*	*3*	*80*	*70*	*L*	*H*	*H*		*M*								*H*		
CLO-3 :	*Understanding of Platform FPGAs*	*2*	*80*	*70*													*H*		
CLO-4 :	*Understanding of FPGA architecture design*	*3*	*80*	*60*		*H*	*H*										*H*		
CLO-5 :	*Designing with Platform FPGAs (examples)*	*3*	*80*	*60*		*H*	*H*	*M*	*M*								*H*		
CLO-6 :	*Design simple FPGA based systems*	*3*	*80*	*60*	*L*	*H*	*H*	*M*	*M*								*H*		

Duration (hour)		Basics of Peripherals	PSoC Design	Xilinx Virtex 5 IDE	Platform FPGA Designs	Designing Simple FPGA based Systems
		15	15	15	15	15
S-1	SLO-1	*Embedded systems performance criteria - Interrupts*	*PSoC3/5 architecture overview*	*Design challenges, life cycle*	*Design quality: correctness, reliability, resilience.*	*Communication: Coprocessor model*
	SLO-2	*Embedded systems performance criteria - Interrupts*	*PSoC3 architecture details and 8051 instructions*	*Metrics: measures of success*	*Modules and interfaces*	*Network on chip model*
S-2	SLO-1	*Embedded systems performance criteria - DMA*	*Interrupts and interrupt lines*	*Spectrometer example using Xilinx IDE*	*Abstraction and state,*	*Transfer of state*
	SLO-2	*Latency and its problems*	*Interrupt priority and nesting*	*Spectrometer example using Xilinx IDE*	*Cohesion and coupling and control flow graph*	*Practical issues: profiling issues*
S 3-4	SLO-1 SLO-2	*Lab 1: Embedded sensors and sensing -1*	*Lab 4: PSoC Design -1*	*Lab 7: VHDL, Verilog Practice session - 1*	*Lab 10: Sample design implementation*	*Lab 13: On-chip memory access, FIFOs*
S-5	SLO-1	*Embedded system subsystems: A/D conversion*	*The concept of memory and its connectivity to CPU*	*Xilinx Virtex 5 IDE*	*Origin of Platform FPGA Designs*	*Spatial design: Principles of parallelism*
	SLO-2	*Digital ports & its current capacity*	*Different DMA modes*	*Xilinx Virtex 5 IDE*	*Platform FPGA components*	*Granularity, degree of parallelism*
S-6	SLO-1	*Introduction to other digital interfaces*	*Clocking system: Internal master oscillator*	*PLD basics*	*Adding to platform FPGA systems*	*Spatial organizations*

	SLO-2	*Introduction to other digital interfaces*	*IMO, and sleep/wake up modes*	*FPGA configurations*	*Assembling custom compute cores*	*Spatial organizations*
S 7-8	SLO-1	*Lab 2: Embedded sensors and sensing - 2*	*Lab 5: PSoC Design -2*	*Lab 8: VHDL, Verilog Practice session - 2*	*Lab 11: Building base systems*	*Lab 14: Model lab examination*
	SLO-2					
S-9	SLO-1	*Sensors and sensing principles. Optical, capacitive sensors*	*Clock distribution*	*Various slices in Virtex 5*	*Software design :root file system, cross-developmental tools*	*Managing bandwidth: Balancing*
	SLO-2	*Magnetic, RF sensors*	*Power management: Internal regulators*	*Various slices in Virtex 5*	*Monitors and boot loaders*	*Khan process network*
S-10	SLO-1	*Processing: Mathematical views.*	*Types of reset*	*Bit stream*	*Overview of partitioning platform*	*Platform FPGA bandwidth techniques*
	SLO-2	*Programmable logic and mixed signal design fundamentals*	*Intro to PSoC creator IDE*	*Programming FPGA*	*Analytical solution to partitioning*	*On-chip, off-chip memory*
S 11-12	SLO-1	*Lab 3: Programmable logic design*	*Lab 6: PSoC Design - 3*	*Lab 9: Sample design implementation*	*Lab 12: Creating IP core*	*Lab 15: Final lab examination*
	SLO-2

Course Code	18ECE207J	Course Name	REAL TIME OPERATING SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	18CSS101J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Develop application program in ARM based hardware, we need to know, C and assembly programming and IDE.*
CLR-2 :	*Interface pheripherals, and hence gain the knowledge of programming, need to be known.*
CLR-3 :	*Study RTOS principles*
CLR-4 :	*Study RTOS principles of various types*
CLR-5 :	*Develop application programming of sample projects*
CLR-6 :	*Study and understand, how OS on ARM processor can be implemented and used.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Read and understand many microprocessor instruction sets and their use.*	2	80	50	M												H		
CLO-2 :	*Implement and write code in assembly and C for embedded applications.*	3	99	70		H	H		M				M				H		
CLO-3 :	*Understand the concepts and requirements of RTOS, in general basic OS principles.*	2	80	70					M								H		
CLO-4 :	*Implement and use RTOS for embedded programs*	3	90	70			H	M	M				M				H		
CLO-5 :	*Apply the knowledge in related sample use cases.*	2	90	85	L	L			L										M
CLO-6 :	*Design processor based embedded systems along with OS implementation. (Specifically RTOS)*	2	90	70	L	M	H	M	M				M				H		L

Duration (hour)		Cortex-M processor & 'C'	Peripheral Programming in 'C'	Concepts of RTOS	RTOS Implementation	RTOS Applications
		15	15	15	15	15
S-1	SLO-1	*Cortex-M processor architecture*	*Parallel I/O programming*	*Introduction to RTOS*	*Process management*	*Real time systems: Data acquisition system*
	SLO-2	*Cortex-M processor architecture*	*Sample programs*	*Introduction to RTOS*	*Dynamic linking and loading*	*Real time systems: Data acquisition system*
S-2	SLO-1	*ARM Cortex assembly language – part1*	*Interrupt processing basics*	*Concurrent programming*	*Spin-lock semaphore, cooperative scheduling*	*Performance metrics*
	SLO-2	*ARM Cortex assembly language – part2*	*System tick; periodic interrupts*	*Thread fundamentals*	*Thread rendezvous*	*Examples and discussions*
S 3-4	SLO-1 SLO-2	*Lab 1: Arm Assembly language programming*	*Lab 4: Interrupts and timers in C and assembly*	*Lab 7: Simple thread programming in RTOS – Wave form simulation*	*Lab 10: Semaphore implementation experiment in RTOS*	*Lab 13: Any application program using RTOS.*
S-5	SLO-1	*ARM Cortex microcontroller interface standards*	*UART programming*	*Shared resources and Critical sections*	*FIFO & Little's theorem*	*Solid state disk*
	SLO-2	*IDE software tools*	*UART programming*	*Consumer producer problem*	*Three semaphore implementation*	*Flash device driver*
S-6	SLO-1	*Pointers in C*	*Digital signal time measurement*	*Switching threads*	*Thread sleeping*	*SD card interface*
	SLO-2	*Arrays, structures and unions, Linked lists*	*Use of timers and compare, capture registers.*	*Profiling the OS*	*Deadlocks, monitors*	*Communication systems with Ethernet*
S	SLO-1					*Lab 14: Model lab examination*

7-8	SLO-2	*Lab 2: C & assembly programming using Keil IDE and kit*	*Lab 5: Debugging hardware with target board – UART interface programming*	*Lab 8: Multi threaded application in RTOS – LED blinking with multi threads*	*Lab 11: Multi threaded application with Communication -1*	
S-9	SLO-1	*Embedded debugging tools in Keil IDE*	*SSI interface*	*Semaphores and implementation*	*Fixed scheduling*	*Application layer protocols for embedded systems*
	SLO-2	*Embedded debugging example with simulation*	*SSI programming with interrupt*	*Operations on semaphores*	*Fixed scheduling*	*CoAP, MQTT*
S-10	SLO-1	*Memory management -1*	*Analog I/O; A/D converter interfacing*	*Resource sharing*	*Kahn process networks*	*Discussions & Reviews*
	SLO-2	*Memory management -2*	*OS considerations of I/O devices*	*Thread Communications*	*Review*	*Discussions & Reviews*
S 11-12	SLO-1 SLO-2	*Lab 3: Practice: C & assembly programming using Keil IDE and kit*	*Lab 6: Debugging hardware with target board – Analog I/O programming*	*Lab 9 : Multi threaded application in RTOS, with semaphores*	*Lab 12: Multi threaded application with Communication -2*	*Lab 15: Final Lab Examination*

Duration (hour)		12	12	12	12	12
S-1	SLO-1	*IC Design Philosophy : Introduction to MOSFET scaling*	*CMOS Single stage Amplifiers: Analog Design Octagon*	*Differential Amplifier: MOS Differential Pair- Operation with Common mode input*	*Noise in Amplifiers: Statistical characteristics of noise*	*Oscillators: General Considerations*
	SLO-2	*Analog IC design process flow, Typical values of IC MOSFET parameters*	*Common Source stage with resistive load*	*Operation with differential input*	*Statistical characteristics of noise-contn*	*Ring oscillators*
S-2	SLO-1	*IC Biasing: MOSFET current source*	*CS stage with diode connected load*	*Small signal operation of MOS differential pair- Differential gain*	*Types of Noises- Thermal Noise, flicker noise*	*LC oscillators*
	SLO-2	*Effect of the output resistance of the current source load*	*CS stage with current source load*	*Common mode gain, CMRR*	*Noise Model- MOSFET, Resistor*	*Cross coupled oscillators*
S 3-4	SLO-1 SLO-2	*Lab 1: Basic MOS Circuits: MOSFET as a switch & Inverter using HSPICE*	*Lab 4: Common source amplifier with resistive load and diode connect load*	*Lab 7: Differential amplifier*	*Lab 10: Noise analysis and a measure of noise figure in CS, CG and CD amplifier*	*Lab 13: Switched capacitor circuits*
S-5	SLO-1	*Basic MOSFET current mirror-operation*	*CS stage with triode load*	*Differential amplifier with current source load*	*Representation of noise in circuits*	*One port oscillators*
	SLO-2	*Study on the effects which deviates performance of the current mirror*	*CS stage with source degeneration*	*Cascode Differential amplifier*	*Representation of noise in circuits-Contn*	*Colpitt oscillator*
S-6	SLO-1	*Cascode Current mirror*	*Source Follower*	*Frequency response of the differential amplifier*	*Noise Analysis of CS stage*	*Voltage Controlled oscillators*
	SLO-2	*Cascode Current mirror- contn. and problem solving*	*Common gate stage*	*Frequency response of the differential amplifier- contn..*	*Noise Analysis of CD stage*	*Voltage Controlled oscillators-contn*

S 7-8	SLO-1	*Lab 2: Basic MOS current mirror, Current mirror circuit to overcome the channel length modulation effect*	*Lab 5: Common gate amplifier and Source follower*	*Lab 8: One stage op-amp*	*Lab 11: Ring oscillator*	*Lab 14: Pre and Post layout simulation of CMOS inverter using Cadence EDA (Virtuoso tool)*
	SLO-2					
S-9	SLO-1	*Wilson MOS current mirror*	*Cascode Amplifier*	*Multistage Amplifiers: Performance parameters of Op-Amp*	*Noise Analysis of CG stage*	*Switched Capacitors circuits: Basic principles*
	SLO-2	*MOS current steering circuits*	*Folded Cascode amplifier*	*One stage op-amp*	*Noise Analysis of Cascode stage*	*Sampling switches*
S-10	SLO-1	*Band gap reference circuits*	*Frequency response of CS amplifier*	*Two stage op-amp*	*Noise Analysis of Differential amplifier*	*Switched capacitor amplifier*
	SLO-2	*Band gap reference circuits-contn.*	*Frequency response of CS amplifier - Contn*	*Two stage op-amp with gain boosting*	*Noise Bandwidth, Noise Figure Concepts*	*Switched capacitor integrator*
S 11-12	SLO-1	*Lab 3: Cascode current mirror, Wilson current mirror*	*Lab 6: Cascode amplifier*	*Lab 9: Two stage op-amp*	*Lab 12: Voltage Controlled oscillators*	*Lab 15: Pre and Post layout simulation of CMOS Amplifier using Cadence EDA (Virtuoso tool)*
	SLO-2

Course Code	18ECE302T	Course Name	MEMS TECHNOLOGIES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify the characteristics and various technology adopted in MEMS fabrication*
CLR-2 :	*Understand the electrical and mechanical phenomenon used in MEMS design*
CLR-3 :	*Analyze how to apply electrostatic and thermal principles in MEMS components design*
CLR-4 :	*Study the application of piezoresistive, piezoelectric principle and the design of microfluidic devices*
CLR-5 :	*Classify the application of polymer in MEMS application, also to explore the principle and application of optical, and RF MEMS devices*
CLR-6 :	*Study the mechanics of miniaturization, learning various micro fabrication technologies and the application of mechanisms used in MEMS sensor and Actuators design.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Acquire the knowledge of MEMS devices principles and microfabrication techniques*	2	75	60	H	-	-	-	-	-	-	-	-	-	-	-	M	L	H
CLO-2 :	*Understand` the essential electrical and mechanical concepts of MEMS.*	2	75	60	H	H	H	-	-	-	-	-	-	-	-	-	M	L	H
CLO-3 :	*Familiarize about electrostatic and thermal sensing principles and actuating technique.*	2	75	60	H	H	H	-	-	-	-	-	-	-	-	-	M	L	H
CLO-4 :	*Attain the knowledge of piezoresistive, piezoelectric and magnetic sensing and actuating technique and microfluidic devices*	2	75	60	H	H	-	-	-	-	-	-	-	-	-	-	M	L	H
CLO-5 :	*Be familiar with the polymers material used in MEMS, design and exposure on optical and RF MEMS.*	2	75	60	H	-	-	-	-	-	-	-	-	-	-	-	M	L	H
CLO-6 :	*Understand the mechanics of miniaturization, familiar with various micro fabrication technologies and able to design MEMS sensor and Actuators based on the required application.*	2	75	60	H	M	H										M	L	H

Duration (hour)		Introduction to mems and micro fabrication	Electrical and mechanical concepts of mems	Electrostatic and thermal principle sensing and actuation	Piezoresistive, piezoelectric and magnetic principle sensors and actuator	Polymer, optical, rf mems and its application
		9	9	9	9	9
S-1	SLO-1	*History of MEMS Development*	*Conductivity of semiconductors*	*Electrostatic sensing - Parallel plate capacitor*	*Piezoresistive sensors -piezoresistive sensor material*	*Polymers in MEMS- polymide,SU-8, Liquid crystal polymer (LCP)*
	SLO-2		*Problems on conductivity of semiconductors*	*Problems on electrostatic sensing*		
S-2	SLO-1	*Characteristics of MEMS – Miniaturization,*	*Crystal plane and orientation- Single crystal Si (FCC, Miller Indices and notation, crystal planes & characteristics, flats & wafer identification)*	*Electrostatic actuation Parallel plate capacitor*	*Stress in flexural cantilever and membrane*	*Polymers in MEMS- PDMS, PMMA , Parylene, Fluorocarbon*
	SLO-2	*Microelectronics integration - Mass fabrication with precision*		*Problems on electrostatic actuation*		
S-3	SLO-1	*Miniaturization and scaling*	*Stress and strain - definition , Relationship between tensile stress and strain*	*Electrostatic sensing and actuation-Application - Inertial, pressure and tactile sensor*	*Piezoelectric sensing and actuation-piezoelectric material properties*	*Optical MEMS-passive MEMS optical components-lenses-mirrors*
	SLO-2	*Sensors and Actuators- Energy domains and example devices for each*				
S-4	SLO-1	*Micro fabrication process - Bulk and Surface Micromachining*	*Stress and strain - definition , Relationship between tensile stress and strain*	*Electrostatic sensing and actuation-Application - parallel plate actuator comb drive*	*Quartz - PZT-*	*Actuation for active optical MEMS.*
	SLO-2				*PVDF -ZnO -Applications*	

S-5	SLO-1	Silicon based MEMS processes- processing anisotropic wet etching	Flexural beam bending analysis under single loading condition	Problems on electrostatic sensing and actuation	Magnetic actuation- Principles- Deposition of magnetic materials	RF MEMS: Switches
	SLO-2	Isotropic wet etching				
S-6	SLO-1	Dry etching (plasma etching, ion milling, RIE, DRIE)	Types of beam, longitudinal strain under pure bending	Thermal sensing and Actuations- sensors and actuators based on thermal expansion	Design and fabrication of magnetic coil	RF MEMS - Filters, oscillators
	SLO-2	Photolithography,				
S-7		Thin film deposition -sputtering, evaporation,	Deflection of beam- Spring constant	Thermocouples	Microfluidics – Concepts of fluid mechanics	MEMS Packaging
		Thin film deposition - LPCVD, PECVD	Problems: Deflection of beam- Spring constant	Thermal resistors		
S-8	SLO-1	Thin film deposition - sputtering, evaporation, LPCVD, PECVD	Torsional deflection, intrinsic stress	Application of thermal sensors – Inertial, Flow, Infrared.	Microfluidics –Application: Channels, valves	MEMS Testing
	SLO-2	Thin film deposition - plating, spin-on				
S-9	SLO-1	New material and fabrication processing techniques	Resonance and quality factor	Problems on thermal sensing and actuation	Microfluidics – Application valves	Reliability issues in MEMS packaging
	SLO-2	Points of consideration for processing structural and sacrificial material.

Course Code	18ECE303T	Course Name	NANOELECTRONIC DEVICES AND CIRCUITS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECC102J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering		Data Book / Codes/Standards	Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Identify the need and effects of device miniaturization*
CLR-2 :	*Understand the principles of nano devices*
CLR-3 :	*Learn about new devices at nano scale*
CLR-4 :	*Create insights to the concepts of nano CMOS circuits*
CLR-5 :	*Analyze the design considerations of the circuits*
CLR-6 :	*Utilize the design procedure in circuits*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Realize the importance of scaling of devices.*	2	80	70	H	M	-	M	-	-	-	-	-	-	-	-	-	-	M
CLO-2 :	*Identify the difference of nano devices from conventional devices.*	2	85	75	H	-	-	M	-	-	-	-	-	-	-	-	M	-	
CLO-3 :	*Analyze the performance measures of various devices*	2	75	70	H	-	M	H	H	-	-	-	-	-	-	-	-	-	H
CLO-4 :	*Choose appropriate application of the device*	2	85	80	H	H	-	-	-	H	L	H	-	-	-	-	-	L	H
CLO-5 :	*Understand the design considerations of nano circuits*	2	85	75	H	-	H	H	M	-	-	-	-	-	-	-	-	-	M
CLO-6 :	*Apply the design concepts of nano circuits in real time applications*	2	80	70	H	M	-	-	-	H	L	H	-	-	-	-	M	-	M

Duration (hour)		Introduction to Nano Devices	Silicon MOSFETs- Novel Materials and Alternative Concepts	Nano Devices – Principles and Techniques	Nano- CMOS scaling Problems and Implications	Mixed Signal Circuit Design
		9	9	9	9	9
S-1	SLO-1	*MOS transistor- A First Glance at the Device*	*SOI MOSFET, partially depleted*	*Classical transport: classical resistance and conductance*	*Design Methodology in the Nano-CMOS Era*	*Design Considerations – Device Modeling*
	SLO-2	*The MOS Transistor under Static Condition*	*fully depleted SOI*	*Quantum ballistic transport: quantum Resistance and conductance*	*Innovations needed to continue performance scaling -*	*Passive Components*
S-2	SLO-1	*MOS Transistor Capacitances- Channel Capacitance*	*Strained channel MOSFET,*	*Coulomb blockade effect*	*Sub-100-nm Scaling Challenges- Back-End-of-Line Challenges (Metallization)-*	*Design Using Thin Oxide Devices – Design Using Thick Oxide Devices*
	SLO-2	*Junction Capacitance*	*Hi-k gate dielectric, Metal gate electrode*	*Single Electron Transistor*	*Interconnect scaling-copper wire technology*	*Low-Voltage Techniques*
S-3	SLO-1	*The Actual MOS Transistor—Some Secondary Effect*	*Double gate MOSFET*	*Performance of the single-electron transistor*	*Low –k dielectric challenges-future global interconnect technologies*	*Design Procedures*
	SLO-2	*Challenges in Nanoscale MOSFETs*	*FinFET*	*SET technology and Field effect transistors*	*Front-End-of-Line Challenges (Transistors)-Quantum effects model*	*Electrostatic Discharge Protection*
S-4	SLO-1	*Scaling of transistor dimensions*	*Tunnel Effect*	*Carbon Nano Tube(CNT)*	*Polysilicon gate , Metal gate electrodes,*	*Multiple-Supply Concerns*
	SLO-2	*Moore's law*	*Tunneling through a potential barrier*	*Electronic properties of CNT*	*Direct tunneling gate leakage-Parasitic capacitance*	*Noise Isolation*
S	SLO-1				*Reliability concerns*	

5-6	SLO-2	*Short Channel Effects (SCE) : Sub-threshold Conduction,*	*Potential energy profiles for material interfaces*	*Geometrical structure, Electronic structure of CNT Transport properties*		*Guard Ring Structures Isolated NMOS Devices*
S-7	SLO-1	*Drain Induced Barrier Lowering*	*Metal -insulator, metal -semiconductor*	*CNTFET, comparison of Si MOSFET with CNTFET*	*Process Control Reliability*	*Epitaxial Material versus Bulk Silicon –*
	SLO-2	*Velocity Saturation, Hot electrons*	*Metal –insulator -metal junctions*	*FeFET*	*Lithographic Issues*	*Decoupling*
S-8	SLO-1	*Emergence of new materials,*	*Tunneling Diode*	*Principle of Spintronics*	*Mask Data Explosion*	*Power Busing*
	SLO-2	*Hi-k materials and its issues*	*Resonant Tunneling diode*	*Spin valves, SpinFET*	*New Breed of Circuit*	*Integration Problems*
S-9	SLO-1	*metal gate, copper interconnect and*	*Three-terminal resonant tunneling devices*	*Magnetic Tunnel Junctions*	*– Physical Design – Modeling Challenges*	*Corner Regions*
	SLO-2	*low-k interlayer dielectric*	*inverter and logic OR gates based on RTD*	*MRAM*	*Need for Design Methodology Changes*	*Neighboring Circuitry*

Course Code	18ECE304T	Course Name	MICROWAVE INTEGRATED CIRCUITS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECC105T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Create the insights of microwave circuits*
CLR-2 :	*Analyze matching networks and filter design*
CLR-3 :	*Identify and implement amplifiers and oscillators*
CLR-4 :	*Layout the types of mixers and control circuits*
CLR-5 :	*Utilize techniques to fabricate and measurement of MICs*
CLR-6 :	*Analyze and realize microwave circuits and its techniques*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the different types of MICs, different MIC devices and parameters to be used in MICs*	2	75	60	H	-	-	-	-	-	-	-	-	-	-	-	-	-	M
CLO-2 :	*Explore concept of frequency parameters, ZY smith chart, its interpretation in the analysis and design of matching circuits*	2	75	60	H	H	H	M	-	-	-	-	-	-	-	-	-	-	M
CLO-3 :	*Understand the design of Amplifiers and Oscillators*	2	75	60	H	H	H	H	-	-	-	-	-	-	-	-	-	-	H
CLO-4 :	*Explore the different Mixer types and Microwave diodes*	2	75	60	H	H	-	M	-	-	-	-	-	-	-	-	-	-	M
CLO-5 :	*Understand Micro fabrication of MIC devices and measurement techniques of MICs*	2	75	60	H	-	-	M	-	-	-	-	-	-	-	M	-	-	H
CLO-6 :	*Comprehend the MICs, fabrication and measurement of MIC devices*	2	75	60	H	H	H	H	-	-	-	-	-	-	-	M	M	-	M

Duration (hour)		Introduction to MIC	Matching Circuits	Microwave Amplifiers and Oscillators	Mixers and Microwave Diodes	MIC Measurement Techniques
		9	9	9	9	9
S-1	SLO-1	*Introduction to MICs*	*Circuit Representation of two port RF/Microwave Networks*	*Introduction to amplifiers*	*Introduction to Mixers*	*Microwave Integrated Circuits : Introduction to SOC, SOP*
	SLO-2			*Stability considerations in active networks*		
S-2	SLO-1	*Frequency Bands*	*Low Frequency Parameters*	*Gain Consideration in Amplifiers*	*Mixer Types*	*MIC Materials.*
	SLO-2	*Lumped versus Distributed Circuits*	*High Frequency Parameters*			
S-3	SLO-1	*Behavior of finite length transmission lines*	*Transmission Matrix*	*Noise Consideration in active networks*	*Conversion Loss*	*Hybrid versus Monolithic MICs*
	SLO-2					
S-4	SLO-1	*General Characteristics of PC Boards*	*ZY Smith Chart*	*Broadband Amplifier design*	*SSB Mixers*	*Multichip Module Technology*
	SLO-2			*Low Noise Amplifier Design*	*DSB Mixers*	
S-5	SLO-1	*Transmission Lines on PC Boards*	*ZY Smith Chart*	*Introduction to oscillators*	*Design of Mixers: Single Ended Mixers*	*Fabrication Techniques*
	SLO-2					
S-6	SLO-1	*Passives made from Transmission Lines*	*Design of Matching Circuits using Lumped Elements*	*Oscillator versus Amplifier Design*	*Single Balanced Mixers*	*Miniaturization techniques*
	SLO-2					
S-7	SLO-1	*Resonators*	*Design of Matching Circuits using Lumped Elements*	*Oscillation conditions*	*Sub Harmonic Diode Mixers*	*Test fixture measurements*
	SLO-2		*Matching Network Design using Distributed Elements*			
S-8	SLO-1	*Combiners and Splitters*	*Matching Network Design using Distributed Elements*	*Design and stability considerations of Microwave Transistor Oscillators.*	*Microwave Diodes*	*probe station measurements*
	SLO-2					
S-9	SLO-1	*Couplers*	*Filter design*		*Phase Shifters and PIN*	*thermal and cryogenic measurements*

	SLO-2			*Design and stability considerations of Microwave Transistor Oscillators.*	*Diode Attenuators*

Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Study the hardware architecture of ARM Cortex-M core*
CLR-2 :	*Study the AHB (high speed bus) and peripherals*
CLR-3 :	*Study the AHB (high speed bus) and peripherals*
CLR-4 :	*Program high speed peripherals*
CLR-5 :	*Study APB bus and peripherals. Designing applications with CMSIS*
CLR-6 :	*Understand and learn to use ARM Cortex-M processor architecture, and deice level programming.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	Program Learning Outcomes (PLO) 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Explain hardware and register architecture of ARM Cortex-M based processors*	*2*	*80*	*70*													*H*		
CLO-2 :	*Explain AHB and its signals, and program high speed peripherals*	*3*	*80*	*70*		*M*	*H*	*L*	*H*								*H*		*M*
CLO-3 :	*Understand AHB and its signals and program high speed peripherals*	*3*	*80*	*70*		*H*	*H*	*L*	*H*								*H*		*M*
CLO-4 :	*Program high speed peripherals with case study.*	*3*	*80*	*60*		*M*	*H*		*H*								*M*		
CLO-5 :	*Program device driver and create libraries.*	*3*	*80*	*60*		*M*	*H*		*M*								*M*		
CLO-6 :	*Perform system programming of ARM Cortex-M based processor.*	*3*	*80*	*60*		*M*	*H*	*L*	*H*								*M*		

		ARM Cortex-M architecture	ARM Internal bus	ARM pheripherals	SOC programming	Case studies
Duration (hour)		12	12	12	12	12
S-1	SLO-1	*Introduction to Programmable SoC*	*AMBA 3 AHB Lite architecture*	*AHB UART peripheral*	*Programming an SOC using C language*	*Graphics LCD interfacing*
	SLO-2	*Introduction to Programmable SoC*	*AMBA 3 AHB Lite architecture*	*AHB UART peripheral*	*Programming an SOC using C language*	*Graphics LCD interfacing*
S-2	SLO-1	*ARM architecture*	*AMBA 3 AHB Lite architecture*	*AHB UART peripheral*	*APB Bus*	*Board support package*
	SLO-2	*ARM architecture*	*AMBA 3 AHB Lite architecture*	*AHB UART peripheral*	*APB Bus*	*Board support package*
S 3-4	SLO-1, SLO-2	*Lab-1:ARM Keil IDE usage – sample ARM program.*	*Lab 4: Study of AHB peripheral*	*Lab 7: Multinode I2C Bus*	*Lab 10: Making a device driver*	*Lab 13: Case study – 2*
S-5	SLO-1	*ARM Register architecture*	*AHB SRAM controller*	*AHB timer*	*ARM CMSIS*	*Ethernet interfacing*
	SLO-2	*ARM Register architecture*	*AHB SRAM controller*	*AHB timer*	*ARM CMSIS*	*Ethernet interfacing*
S-6	SLO-1	*ARM assembly language*	*AHB SRAM controller*	*AHB-APB bridge*	*Device drivers*	*Ethernet interfacing*
	SLO-2	*ARM assembly language*	*Review and discussions*	*AHB-APB bridge*	*Device drivers*	*Ethernet interfacing*
S 7-8	SLO-1, SLO-2	*Lab 2: Assembly language programming of ARM processor using Keil IDE*	*Lab 5: ARM memory management*	*Lab 8: Application of timers*	*Lab 11: Using CMSIS*	*Lab 14: Model lab examination*
S-9	SLO-1	*ARM Cortex-M Architecture -1*	*AHB VGA peripheral*	*Fast GPIO programming*	*Application programming*	*Student Seminar / discussions*
	SLO-2	*ARM Cortex-M Architecture -1*	*AHB VGA peripheral*	*Fast GPIO programming*	*Application programming*	*Student Seminar / discussions*
S-10	SLO-1	*ARM Cortex-M Architecture -2 (pipelines)*	*AHB VGA peripheral*	*Interrupt mechanism of ARM*	*Case study - 1*	*Student Seminar / discussions*
	SLO-2	*ARM Cortex-M Architecture -2*	*AHB VGA peripheral*	*Interrupt mechanism of ARM*	*Case study - 2*	*Student Seminar / discussions*
S 11-12	SLO-1, SLO-2	*Lab 3: Parallel port programming*	*Lab 6: Graphics application*	*Lab 9: Experimenting Interrupts, Timers*	*Lab 12: Study of USB interface*	*Lab 15: Final lab examination*

Course Code	18ECE306J	Course Name	ARM BASED DIGITAL SIGNALS PROCESSING	Course Category	E	Professional Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	18ECE204J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the concepts of DSP, discrete time signals and its properties.*
CLR-2 :	*Understand applications of transforms in solving digital signal processing*
CLR-3 :	*Study FIR filters*
CLR-4 :	*Study IIT filters*
CLR-5 :	*Understand the usage of adaptive filter techniques*
CLR-6 :	*Understand the usage of DSP in embedded ARM Cortex-M processor platform*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Apply theory and application of discrete time signals*	*3*	*80*	*70*		*M*	-	-	*M*	-	-	-	-	-	-	-	*H*	-	*L*
CLO-2 :	*Apply theory and implementing methods of Z-transforms, DFT and FFT.*	*3*	*80*	*70*		*H*	-	-	*M*	-	-	-	-	-	-	-	*H*	-	*L*
CLO-3 :	*Apply FiR filter theory and processor implementation in C.*	*3*	*80*	*70*		*H*	-	-	*M*	-	-	-	-	-	-	-	*H*	-	*L*
CLO-4 :	*Apply IIR filter theory and processor implementation in C*	*3*	*80*	*60*		*H*	-	-	*M*	-	-	-	-	-	-	-	*H*	-	*L*
CLO-5 :	*Implement adaptive filter design theory, methods and its uses.*	*2*	*80*	*60*		*H*	-	-	*L*	-	-	-	-	-	-	-	*H*	-	*L*
CLO-6 :	*Apply the theory and implementation aspects of DSP in ARM Cortex-M based processor platform.*	*3*	*80*	*60*		*H*	-	-	*M*	-	-	-	-	-	-	-	*H*	-	*L*

Duration (hour)		Basics of digital signals	Transforms for DSP	FIR filters	IIR filters	DSP applications
		12	12	12	12	12
S-1	SLO-1	*DT Signals-basics properties &Operations on DT signals*	*Z-Transform Properties*	*Design of Finite Impulse Response Filters-Symmetric and Antisymmetric FIR filters*	*Frequency Response and Characteristics of Analog Filters*	*Introduction-Steepest Descent Method-Least Mean Squares Method*
	SLO-2	*DT Signals-basics properties &Operations on DT signals*	*Z-Transform Properties*	*Design of Finite Impulse Response Filters-Symmetric and Antisymmetric FIR filters*	*Frequency Response and Characteristics of Analog Filters*	*Introduction-Steepest Descent Method-Least Mean Squares Method*
S-2	SLO-1	*DT systems-Properties of DT Systems – LTI system*	*Inverse Z-Transform-solving Difference Equation*	*Design of Linear- Phase FIR filters Using window methods*	*IIR Filter Design by Impulse Invariance*	*Adaptive Filters: Prediction and System Identification*
	SLO-2	*DT systems-Properties of DT Systems – LTI system*	*Inverse Z-Transform-solving Difference Equation*	*Design of Linear- Phase FIR filters Using window methods*	*IIR Filter Design by Impulse Invariance*	*Adaptive Filters: Prediction and System Identification*
S 3-4	SLO-1 SLO-2	*Lab 1: Introduction- Keil MDK-ARM application development Environment.*	*Lab 4: LTI System Implementation*	*Lab 7: Filter Structures in the CMSIS-DSP Library*	*Lab 10: IIR Filter Structures in the CMSIS-DSP Library*	*Lab 13: CMSIS Implementation of the LMS and Normalized LMS methods*
S-5	SLO-1	*Convolution and Correlation*	*DFT-review; problems*	*Design of Linear- Phase FIR filters Using window methods*	*Design of Butterworth filter using Bilinear Transformation*	*Adaptive Filters: Equalization and Noise Cancellation*
	SLO-2	*Convolution and Correlation*	*DFT-review; problems*	*Design of Linear- Phase FIR filters Using window methods*	*Design of Butterworth filter using Bilinear Transformation*	*Adaptive Filters: Equalization and Noise Cancellation*
S-6	SLO-1	*CT-to DT Conversion Sampling Theorem in the Time Domain*	*DIT-FFT Radix 2 butterfly derivation - problems*	*Design of Optimum Equiripple Linear-Phase FIR filters*	*Chebyshev Filter Designs based on the Bilinear Transformation*	*Adaptive Filters: Adaptive FIR Filter*
	SLO-2	*CT-to DT Conversion Sampling Theorem in the Time Domain*	*DIT-FFT Radix 2 butterfly derivation - problems*	*Design of Optimum Equiripple Linear-Phase FIR filters*	*Chebyshev Filter Designs based on the Bilinear Transformation*	*Adaptive Filters: Adaptive FIR Filter*
S 7-8	SLO-1 SLO-2	*Lab 2: Digital Signals-operations on Digital Signals*	*Lab 5: Calculating the DFT-FFT*	*Lab 8: FIR Filter Design*	*Lab 11: IIR Filter Design*	*Lab 14: Model Practicals*

S-9	SLO-1	*Sampling Theorem in the Frequency Domain-Aliasing*	*Filtering in the FD-Circular & Convolution*	*Design of Optimum Equiripple Linear-Phase FIR filters*	*Chebyshev Filter Designs based on the Impulse Invariance*	*Review, Problems and Discussions*
	SLO-2	*Sampling Theorem in the Frequency Domain-Aliasing*	*Filtering in the FD-Circular & Convolution*	*Design of Optimum Equiripple Linear-Phase FIR filters*	*Chebyshev Filter Designs based on the Impulse Invariance*	*Review, Problems and Discussions*
S-10	SLO-1	*Reconstruction in the Frequency Domain & time Domain*	*Filtering in the FD-Linear Convolution*	*Filter Design using Software*	*Filter Design using Software*	*Review, Problems and Discussions*
	SLO-2	*Reconstruction in the Frequency Domain & time Domain*	*Filtering in the FD-Linear Convolution*	*Filter Design using Software*	*Filter Design using Software*	*Review, Problems and Discussions*
S 11-12	SLO-1 SLO-2	*Lab 3: A-D & D-A conversion-Changing the Sampling Frequency*	*Lab 6: Filtering in the Frequency Domain*	*Lab 9: Implementing a FIR Filter using Different Structures*	*Lab 12: Implementing a Filter using Different Structures*	*Lab 15: University practicals*

							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering		Data Book / Codes/Standards	Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understanding the Machine Learning concept and types*
CLR-2 :	*Analyze the ML algorithm performance by Learning Curve and error*
CLR-3 :	*Applying ML algorithm for solving practical problems*
CLR-4 :	*Create insights to the concepts and programming of supervised and unsupervised ML methods*
CLR-5 :	*Analyze and understand the working principle and model development of Evolutionary Learning*
CLR-6 :	*Create insights to the concepts and programming of Reinforcement learning*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Apply Genetic Algorithm for evalualionary learning*	2	80	70	H	H	H	-	-	-	-	-	-	-	-	-	-	-	H
CLO-2 :	*Analyze Reinforcement learning*	2	85	75	H	H	-	H	H	-	-	-	-	-	-	-	-	-	H
CLO-3 :	*Apply linear model of linear regression and SVM for classification problem*	2	75	70	H	H	H	H	-	-	-	-	-	-	-	-	H	-	H
CLO-4 :	*Apply neural network and CNN for classification problem*	2	85	80	H	H	H	H	H	-	-	-	-	-	-	-	H	-	H
CLO-5 :	*Apply Decision Trees , clustering For classification problem*	2	85	75	H	H	H	H	H	-	-	-	-	-	-	-	H	-	H
CLO-6 :	*Apply probability model of Bayesian decision theory and HMM for classification problem*	2	80	70	H	H	H	H	H	-	-	-	-	-	-	-	H	-	H

Duration (hour)		Introduction to Machine Learning and Linear Model	Multiplayer Perceptrons and Decision Tree	Clustering, SOM and HMM	Bayes Network, Reinforcement Learning and CNN	Genetic Algorithm and Application of ML
		12	12	12	12	12
S-1	SLO-1	*Introduction to Machine learning: Types of Machine Learning - Supervised Learning – Unsupervised, Learning*	*Multiplayer, Perceptrons*	*Clustering*	*Bayesian decision theory*	*The Genetic Algorithm*
	SLO-2	*reinforcement learning , The Curse of dimensionality*	*Multiplayer, Perceptrons*	*K-Means clustering*	*Bayesian decision theory*	*The Genetic Algorithm*
S-2	SLO-1	*Bias and Variance, Learning Curve*	*Multiplayer, Perceptrons*	*Hierarchical clustering*	*Bayesian estimation*	*Facial Expression Recognition*
	SLO-2	*Classification, Error and noise, linear regression*	*Multiplayer, Perceptrons*	*Agglomerative clustering*	*Bayes network*	*Human Emotion Research*
S-3,4	SLO-1 SLO-2	*Lab 1: Linear Regression*	*Lab 4: Multiplayer, Perceptrons*	*Lab 7: K-Means clustering*	*Lab 10: Bayes Network*	*Lab 13: Genetic Algorithm*
S-5	SLO-1	*Support Vector Machines*	*example of using MLP*	*Vector Quantization*	*Reinforcement learning*	*Facial Expression Recognition System*
	SLO-2	*Support Vector Machines*	*example of using MLP*	*Vector Quantization*	*Reinforcement learning*	*Facial Expression Recognition System*
S-6	SLO-1	*Support Vector Machines*	*example of using MLP*	*The Self-Organizing Feature Map*	*Reinforcement learning*	*Speech Emotion Recognition*

Course Code	18ECE220T	Course Name	ADVANCED MOBILE COMMUNICATION SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECC301T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Gain knowledge about the latest Standards from 3G to 5G systems.*
CLR-2 :	*Introduce the concepts of OFDM systems and standards.*
CLR-3 :	*Study the basics of MIMO system and the impact of different channel models on it.*
CLR-4 :	*Understand the techniques of cognitive radio spectrum sensing and sharing*
CLR-5 :	*Study the techniques of Millimeter wave Communication*
CLR-6 :	*Apply the knowledge gained to various Advanced Mobile Communication Systems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3

Course Code	18ECE221T	Course Name	RADAR AND NAVIGATIONAL AIDS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECC205J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering		Data Book / Codes/Standards	Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Get introduced to basics of Radar System*
CLR-2 :	*Impart the knowledge of different types of Radar*
CLR-3 :	*Analyze the various detection schemes*
CLR-4 :	*Understand the Radar transmitters and Receivers*
CLR-5 :	*Understand the fundamentals of navigation system*
CLR-6 :	*Acquire knowledge on theoretical concepts and analysis techniques related to different types of Radar and various navigational aids*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Gain knowledge about Radar theory and Range equation*	2	80	70	H	M	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Apply Doppler principle to Radars and hence understand the working principle of different types of Radar*	2	85	75	-	-	-	-	-	-	-	-	-	H	-	-	M	-	-
CLO-3 :	*Gain knowledge on Radar signal detection methods and propagation as related to Radars*	2	75	70	-	H	-	-	-	-	-	-	-	-	-	-	M	-	-
CLO-4 :	*Acquire information about Radar transmitters and Radars*	2	85	80	H	H	-	-	-	-	-	-	-	-	-	-	-	-	H
CLO-5 :	*Understand principles of navigation , in addition to approach and landing aids as related to navigation*	2	85	75	H	M	-	-	-	-	-	-	-	M	-	-	M	-	-
CLO-6 :	*Understand the principle of operation of Radar in the detection of different types of targets and various navigational aids*	2	85	75	H	H	-	-	-	-	-	-	-	H	-	-	-	-	H

Duration (hour)		Introduction To Radar Equation	MTI And Pulse Doppler Radar	Detection Of Signals In Noise	Radar Transmitter And Receiver	Radio Navigation
		9	9	9	9	9
S-1	SLO-1	*Introduction-Basic Radar*	*Introduction to Doppler Radar*	*Detection of Signals in Noise -Detection Criteria*	*Radar Transmitters and Receivers.*	*Introduction - Four methods of Navigation .- Positioning- Errors in Direction Finding*
	SLO-2	*Radar Frequencies -Applications of Radar*	*Introduction to MTI Radar*	*Probabilities of Detection and False Alarm*	*Linear Beam Power Tubes-Reflex Klystron*	*Line of sight Distance measurement*
S-2	SLO-1	*The Simple form of Radar Equation*	*Delay –Line Cancellers*	*Matched Filter Receiver*	*Linear Beam Power Tubes-TWT*	*Terrestrial Radio Navigation systems*
	SLO-2	*Tutorials*	*Delay –Line Cancellers*	*Derivation of Matched filter frequency response*	*Solid State RF Power Sources*	*Radio transmission and Reception*
S-3	SLO-1	*Radar Block Diagram*	*Doppler Filter Banks*	*Automatic Detector*	*Magnetron - Crossed Field Amplifiers*	*System design considerations-System Performance Parameters*
	SLO-2	*Receiver Noise*	*Digital MTI Processing*	*Constant-False-Alarm Rate Receivers*	*Magnetron - Crossed Field Amplifiers*	*The Loop Antenna - Adcock Direction Finders*
S-4	SLO-1	*Signal-to-Noise Ratio*	*Block Diagram of Digital MTI Doppler Signal Processor*	*Signal Management*	*Other RF Power Sources*	*Direction Finding at Very High Frequencies - Automatic Direction Finders*
	SLO-2	*Integration of Radar Pulses*	*Moving Target Detector - Limitations to MTI Performance*	*Propagation Radar Waves- Atmospheric Refraction*	*Other aspects of Radar Transmitter*	*VHF Omni Directional Range(VOR) - VOR Receiving Equipment - Range and Accuracy of VOR*
S-5	SLO-1	*Radar Cross Section of Targets-Simple Targets*	*Pulse Doppler Radar*	*Standard propagation*	*The Radar Receiver*	*Hyperbolic Systems of Navigation-Loran*

	SLO-2	*Radar Cross Section of Targets-Complex Targets Transmitter Power*	*High, Medium and Low prf Doppler*	*Nonstandard Propagation*	*Receiver noise Figure*	*Loran-C*
S-6	SLO-1	*Radar cross Section Fluctuations*	*Other Doppler Radar Topics*	*Ambiguity Diagram*	*Receiver noise Figure*	*The Decca Navigation System -Decca Receivers*
	SLO-2	*Swerling Target Model*	*Tracking with Radar*	*Ambiguity Diagram*	*Super heterodyne Receiver*	*Range and Accuracy of Decca*
S-7	SLO-1	*Transmitter Power*	*Mono pulse Tracking*	*Pulse compression*	*LNA and Mixers*	*TACAN*
	SLO-2	*Pulse Repetition Frequency*	*Two Coordinate amplitude comparison monopulse tracking*	*Linear FM pulse compression*	*Duplexers*	*TACAN Equipment*
S-8	SLO-1	*Antenna Parameters*	*Conical Scan and Sequential Lobing*	*Binary Phase Coded pulse compression*	*Receiver Protectors*	*Case study on Airborne Tactial networks-Instrument Landing System*
	SLO-2	*System losses-Microwave plumbing loss, Antenna loss, Signal Processing loss*	*Limitations to Tracking Accuracy*	*Questionnaire*	*Receiver Protectors*	*Case study on Airborne Tactial networks-Instrument Landing System*
S-9	SLO-1	*System losses-Doppler processing, Collapsing, Operator loss, propagation Effects*	*Case study on weather radars*	*Introduction to clutter*	*Radar Displays*	*Introduction to satellite Radio Navigation-*
	SLO-2	*Other Radar Equation Considerations*	*Case study on weather radars*	*Surface Clutter Radar equation*	*Surprise Test*	*Navstar Global Positioning System (GPS)*

							3	0	0	3

Pre-requisite Courses	18ECC205J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the orbital and functional principles of satellite Communication systems*
CLR-2 :	*Architect, interpret, and select appropriate technologies for implementation of specified satellite Communication systems*
CLR-3 :	*Analyze and evaluate a satellite link and suggest enhancements to improve the link performance*
CLR-4 :	*Select appropriate modulation, multiplexing, coding and multiple access schemes for a given satellite Communication link*
CLR-5 :	*Specify, design, prototype and test analog and digital satellite Communication systems as per given specifications*
CLR-6 :	*Utilize the concepts in optical Communication for the understanding of engineering and technology*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Understand the principles, concepts and operation of satellite Communication systems*	2	80	70	H	H	M	H	H	L	L	L	M	H	L	M	H	-	-
CLO-2 :	*Gain the knowledge of Satellite orbits and launching, link design, link availability and perform interference calculations*	2	85	75	H	H	M	H	H	L	L	L	M	H	L	M	H	-	-
CLO-3 :	*Analyze the concepts of Satellite systems in relation to other terrestrial systems*	2	75	70	H	H	M	H	H	L	L	L	L	H	L	M	H	-	-
CLO-4 :	*Evaluate the performance of various channel access schemes*	2	85	80	H	H	M	H	H	L	L	L	L	H	L	M	H	-	-
CLO-5 :	*Familiarize with applications of satellites and compression standards*	2	85	75	H	H	M	H	H	L	L	L	L	H	L	M	H	-	-
CLO-6 :	*Apply their idea in Satellite Communication module*	2	80	70	H	H	M	H	H	L	L	L	M	H	L	M	H	-	-

Duration (hour)		Satellite Orbit	Link Design	Space and Earth Segment	Multiple Access Techniques for Satellite Communication	Broadcast and Services
		9	9	9	9	9
S-1	SLO-1	*Satellite Orbit*	*Link Design*	*Space Segment*	*Concepts of Multiple Access techniques, types*	*Concept of Broadcasting satellites*
	SLO-2	*Kepler's law*	*EIRP*	*Basic concept of space segmen*	*Single Access*	*Direct Broadcasting Satellite*
S-2	SLO-1	*Earth - Orbiting satellites terms*	*Transmission Losses*	*Power Supply*	*Pre assigned FDMA*	*Orbital Spacing*
	SLO-2	*Types of satellites*	*Link Power Budget equation*	*Altitude control*	*Demand Assigned FDMA*	*Power ratings*
S-3	SLO-1	*Orbital elements*	*System Noise*	*Station keeping*	*SPADE system*	*Frequency and polarization*
	SLO-2	*Orbit Perturbations*	*Carrier to noise ratio*	*Thermal Control*	*TWT amplifier operation*	*Transponder Capacity*
S-4	SLO-1	*Inclined Orbits*	*Types of FEC*	*TT&C Subsystems*	*Downlink analysis*	*Bit rate*

Course Code	18ECE225T	Course Name	INFORMATION THEORY AND CODING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18MAB203T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/ Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce source coding in information theory*
CLR-2 :	*Impart the fundamentals of error control coding techniques and their applications*
CLR-3 :	*Address the noisy channel coding problem*
CLR-4 :	*Assess the performance of both block and convolutional coding schemes in different practical situations*
CLR-5 :	*Derive Shannon's fundamental channel capacity results*
CLR-6 :	*Know about channel and impairments channel and how to mitigate them*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Comprehend various source coding schemes*	2	80	70	-	H	-	-	-	-	-	-	-	-	-	-	-	-	H
CLO-2 :	*Apply variable length codes for source coding*	2	85	75	-	H	-	-	-	-	-	-	-	-	-	-	-	-	H
CLO-3 :	*Apply linear block codes for error detection and correction*	2	75	70	-	H	-	-	-	-	-	-	-	-	-	-	-	H	-
CLO-4 :	*Apply convolution codes for performance analysis & cyclic codes for error detection and correction.*	2	85	80	-	H	-	-	-	-	-	-	-	-	-	-	-	H	-
CLO-5 :	*Design the channel performance using Information theory*	2	85	75	-	H	-	-	-	-	-	-	-	-	-	-	-	-	H
CLO-6 :	*Analyse any type of channel and select coding techniques to improve channel performance*	2	85	75	-	H	-	-	-	-	-	-	-	-	-	-	-	-	H

Duration (hour)		Source coding	Variable-Length Codes	Error Detecting and Error Correcting Codes	Convolutional Codes	Entropy and Channel Capacity
		9	9	9	9	9
S-1	SLO-1	*Introduction to Information theory*	*Unique decoding*	*Hamming codes Generation*	*Convolutional codes introduction*	*Entropy*
	SLO-2	*Model of signaling system*	*Rules and construction of Unique decoding*	*Hamming code checking*	*Convolutional codes generation*	*Mathematical properties*
S-2	SLO-1	*Block Diagram*	*Instantaneous codes*	*Hamming weight*	*Convolutional encoder*	*Entropy and coding*
	SLO-2	*Mathematical models for information sources*	*Construction of Instantaneous codes*	*Hamming distance*	*Encoder for different rates*	*System entropies*
S-3	SLO-1	*Encoding a source alphabet*	*The Kraft's inequality*	*Minimum distance decoding*	*code tree formation*	*Mutual information*
	SLO-2	*Source coding*	*Shortened block codes*	*Linear block codes Generator polynomial*	*code tree formation*	*Example Problem solving- Mutual information*
S-4	SLO-1	*ASCII code*	*The McMillan's Inequality*	*Linear block codes Generation*	*state diagram generation*	*Shannon-Fano coding*
	SLO-2	*Code Formation for an information*	*Huffman codes*	*Linear block codes Decoding*	*state diagram generation for different rates*	*Example Problem solving- Shannon-Fano coding*
S-5	SLO-1	*Radix r code*	*Huffman codes -special cases*	*Example Problem solving- Linear block codes*	*trellis diagram for decoding convolutional codes*	*Classification of channels*
	SLO-2	*Different examples for different 'r'*	*Extensions of a code*	*Cyclic codes Generator polynomial*	*trellis diagram for decoding convolutional codes*	*Channel Capacity*
S-6	SLO-1	*Simple parity checks – Generator*	*Huffman codes Radix r*	*Cyclic codes Generation*	*Maximum likelihood decoding of convolutional codes*	*Calculation of channel capacity*
	SLO-2	*Simple parity Checker*	*Example Problem solving in Huffman coding*	*Cyclic codes Decoding*	*Maximum likelihood decoding of convolutional codes*	*Types of channel*

S-7	SLO-1	*CRC codes-Generation*	*Example Problem solving in Huffman coding-special cases*	*Example Problem solving -Cyclic codes*	*Sequential decoding of convolutional codes-*	*Conditional mutual information*
	SLO-2	*CRC codes-Checking*	*Noise in Huffman coding probabilities*	*Example Problem solving- Syndrome calculation*	*Sequential decoding of convolutional codes*	*Random encoding*
S-8	SLO-1	*Single parity checks*	*Use of Huffman codes*	*Block encoders*	*Applications of Viterbi decoding*	*Average random code*
	SLO-2	*Double parity checks*	*Hamming coding*	*Block Decoders*	*Viterbi decoding*	*Fano bound*
S-9	SLO-1	*Miscellaneous codes*	*Example Problem solving in Hamming coding*	*Assignment Problems in Linear Block codes*	*Turbo codes*	*Converse of Shannon's theorem*
	SLO-2	*Problems in source coding with different radix and parity*	*Assignment Problems in Huffman and Hamming coding*	*Assignment Problems in Cyclic codes*	*Assignment Problems in Convolutional codes*	*Assignment Problems in Channel capacity and mutual information*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the basics working principle of optical fibers, fiber modes configurations and structures.*
CLR-2 :	*Learn the various optical source materials, LED structures, quantum efficiency, Laser diodes. To learn the fiber optical network components, switches, EDFA, SOA.*
CLR-3 :	*Acquire the basic knowledge of fiber optical receivers such as PIN APD diodes, noise performance in photo detector, receiver operation and configuration.*
CLR-4 :	*Get the knowledge on optical wave guides modulators and other signal degradation factors*
CLR-5 :	*Understand the basic working principle of WDM, DWDM etc..*
CLR-6 :	*Understand, the basic optical networks and their applications*

		Learning			Program Learning Outcomes (PLO)

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Familiarize with the fundamentals of light transmission through fiber*	2	80	70	H	M	-	-	-	-	-	-	-	-	-	-	H	-	H
CLO-2 :	*Understand how signal degrades inside the fiber due to physical effects and externally due to various factors like alignment, splicing and connecterization*	2	85	75	H	M	-	-	-	-	-	-	-	-	-	-	H	-	H
CLO-3 :	*Understand the operation of optical sources, amplifiers and detectors and thereby build transmitter and receiver circuits*	2	75	70	H	-	-	H	-	-	-	-	-	-	-	-	H	-	H
CLO-4 :	*Familiarize with optical measurements for performance analysis*	2	85	80	H	M	-	-	-	M	M	-	-	-	-	-	H	-	-
CLO-5 :	*Design a basic optical Communication system*	2	85	75	H	-	H	-	-	-	-	-	-	-	-	-	H	-	M
CLO-6 :	*Acquire fundamental concepts on multichannel system and related components*	2	80	70	-	-	-	-	M	-	-	-	-	-	-	-	-	-	-

Duration (Hour)		Optical Fibers and transmission characteristics	Optical Sources, Amplifier and Transmitter	Optical Detectors and receivers	Optical modulators, switches and OEICs	Optical Communication systems
		9	9	9	9	9
S-1	SLO-1	*Elements of Optical fiber Communication, Optical spectral bands*	*Introduction to Luminescence: Photo, electro, cathodo, injection luminiscence*	*Photo detection principle*	*Electro optic modulators*	*Point to point links*
	SLO-2	*Optical fiber structure, Light Propagation in Optical fibers: Ray theory , Total Internal reflection, Skew rays, Fiber types: SI, GI, MM, SM*	*Plasma display, LCD*	*Photoconductor,*	*Acousto optic modulators*	*Digital and analog systems design considerations*
S-2	SLO-1	*Overview of Modes, Cutoff wavelength and V number,*	*LED: Choice of material,*	*Noise in photoconductors, SNR*	*Interferometry modulators*	*Digital link design,*
	SLO-2	*Problems on v-number*	*LED Structures; Surface and Edge emitters,*	*Response time*	*Semiconductor optical amplifiers*	*Links power budget*
S-3	SLO-1	*Wave Equations for Step index fiber, Modal equation, Modes in SI fibers*	*Quantum efficiency and power, LED Characteristics*	*Problems on response time and SNR*	*Optical switching and logic devices*	*Rise time budget*
	SLO-2	*Problems on V-number, modes*	*Problems on LED quantum efficiency*	*Problems on Photoconductor*	*Problems on modulators*	*Overview of analog links*
S-4	SLO-1	*Special Fibers introduction, Polarization Maintaining fibers,*	*Semiconductor Laser Diode, Operating principles,*	*Photodiode: PIN Photodiode*	*Optical switching*	*Radio over fibers*
	SLO-2	*Photonic Crystal fibers, Dispersion compensated fiber*	*Emission absorption and radiation*	*Avalanche photodiode*	*Logic devices*	*Key link parameters*
S-5	SLO-1	*Attenuation Introduction*	*Population inversion*	*Detector performance parameters*	*Hybrid integration*	*Multichannel systems*

	SLO-2	*Material Adsorption, Scattering, bending and core cladding losses*	*Optical feed- back, Threshold condition*	*Detectors for long wavelength operation*	*Monolithic integration*	*Need for multiplexing*
S-6	SLO-1	*Problems*	*External Quantum efficiency, LASER Characteristics*	*wavelength selective detection*	*Comparison of hybrid and monolithic*	*Operating principle of WDM*
	SLO-2	*Overview of Signal dispersion in fibers*	*Problems on LASER quantum efficiency*	*Fundamental receiver operation*	*Slab waveguides*	*Operating principle of DWDM*
S-7	SLO-1	*Dispersion limitations, Intermodal dispersion*	*Single mode Laser: VCSEL*	*Front end amplifier and decision circuit*	*Strip waveguides*	*WDM components*
	SLO-2	*Intra-Modal dispersion: Material dispersion,*	*Introduction to Fiber Amplifiers*	*Functional block diagram of receiver circuit*	*Guided wave devices*	*Couplers/splitters*
S-8	SLO-1	*Waveguide dispersion and PMD*	*EDFA*	*Measurement standards, basic test equipment*	*Active filters*	*Isolators and circulators*
	SLO-2	*Problems on Dispersion*	*SOA*	*Optical spectrum analyzer*	*Problems*	*Machzender interferometer*
S-9	SLO-1	*Non linear effects : Non linear scattering, Kerr effects*	*Modulation characteristics and Driver circuits*	*Oprtical power meter*	*Integrated Transmitter*	*Fabry perot filters*
	SLO-2	*Fiber alignment and Joint Loss, Fiber Splices Optical fiber connectors, Expanded Beam Connectors*	*Functional block diagram of a Transmitter module*	*OTDR*	*Integrated Receivers*	*Optical MEMS*

Course Code	18ECE320T	Course Name	SOFTWARE DEFINED NETWORKS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECC303J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering		Data Book / Codes/Standards	Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understanding SDN- Evolution*
CLR-2 :	*Understanding The Control Plane, Data Plane of SDN*
CLR-3 :	*Analyze and understand various SDN controller*
CLR-4 :	*Create insights to the standard Open Flow for SDN*
CLR-5 :	*understand the Network Programmability for SDN and SDN Open Source*
CLR-6 :	*understand the Application of SDN and role of SDN in 5G*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*understand the SDN architecture and benefit*	2	80	70	H	-	-	-	H	-	-	-	-	-	-	-	-	H	-
CLO-2 :	*Analyze and compare available SDN controller*	2	85	75	H	-		H	H	-	-	-	-	-	-	-	-	-	H
CLO-3 :	*Program the SDN elements*	2	75	70	H		H	H	-	-	-	-	-	-	-	-	H	-	-
CLO-4 :	*Apply NVF for next generation networks and 5G*	2	85	80	H	H	H	H	H	-	-	-	-	-	-	-	-	-	H
CLO-5 :	*Understand the possible application of SDN*	2	85	75	H	-		H	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Understand standard OpenFlow*	2	80	70	H	-	H	-	H	-	-	-	-	-	-	-	-	-	-

Duration (hour)		Basics of SDN	SDN Devices and Controller	OpenFlow, Programmability and Management Interface	SDN Application and Use Case	SDN Implementation and Mobile Networks
		9	9	9	9	9
S-1	SLO-1	*Introduction to SDN- Evolution of Switches and Control Planes , Cost*	*How SDN Works- Fundamental Characteristics of SDN*	*OpenFlow Overview- The OpenFlow Switch, The OpenFlow Controller,*	*SDN in the Data Center - Data Center Definition, Data Center Demands*	*SDN Open Source-Chapter-Specific Terminology ,Open Source Licensing Issues*
	SLO-2	*Introduction to SDN - SDN Implications for Research and Innovation*	*SDN Operation, SDN Devices*	*The OpenFlow Protocol, The OpenFlow Protocol*	*Tunneling Technologies for the Data Center.*	*Profiles of SDN Open Source Users ,OpenFlow Source Code,*
S-2	SLO-1	*need of SDN- Data Center Innovation,*	*SDN Controller*	*OpenFlow 1.0 and OpenFlow Basics- Ports and Port Queues, Flow Table, Packet Matching,*	*Path Technologies in the Data Cente Ethernet Fabrics in the Data Center*	*Switch Implementations , Controller Implementations SDN Applications*
	SLO-2	*need of SDN- Data Center Needs*	*SDN Applications ,Alternate SDN Methods*	*Actions and Packet Forwarding, Messaging Between Controller and Switch*	*SDN Use Cases in the Data Center*	*Simulation, Testing, and Tools, OpenStack, Example: Applying SDN Open Source .*
S-3	SLO-1	*Genesis of SDN- The Evolution of Networking Technology*	*General Concepts of SDN Controller*	*Example: Controller Programming Flow Table ,Example: Basic Packet Forwarding, Example: Switch Forwarding Packet to Controller*	*Open SDN versus Overlays in the Data Center*	*SDN Futures-Current State of Affairs*
	SLO-2	*the Genesis of SDN- forerunners of SDN*	*VMware*	*OpenFlow 1.3 Additions and OpenFlow Limitations*	*Real-World Data Center Implementations*	*Potential Novel Applications of Open SDN*
S-4	SLO-1	*the Genesis of SDN- software Defined Networking is Born, Sustaining SDN Interoperability*	*Nicira*	*Introduction to Network Programmability and The Management Interface*	*SDN in Other Environments - Wide Area Networks. Service Provider and Carrier Networks*	*role of SDN in 5G- Drawback of hardware-based network functions., Network Functions Virtualization (NFV) and Software Defined Networking (SDN) in 5G*
	SLO-2	*Open Source Contributions, Legacy Mechanisms Evolve Toward SDN , Network Virtualization*	*VMware/Nicira*	*The Application-Network Divide*	*Campus Networks, Hospitality Networks*	*optimization models that aim at finding the optimal design for a mobile core network based on SDN and NFV*

S-5	SLO-1	*The Control Plane, Data Plane*	*OpenFlow-Related*	*Modern Programmatic Interfaces- Publish and Subscribe Interfaces, XMPP*	*Mobile Networks. In-Line Network Functions,*	*SDN and NFV Mobile Network Architectures*
	SLO-2	*Moving Information Between Planes, Separation Importance*	*Mininet ,NOX/POX*	*Google's Protocol Buffers , Thrift ,JSON*	*Optical Networks*	*Dimensioning and Resource Allocation Problems*
S-6	SLO-1	*Distributed Control Planes- IP and MPLS, Creating IP Underlay, Convergence Time*	*Trema, Ryu*	*I2RS 143 Modern Orchestration- OpenStack*	*SDN vs. P2P/Overlay Networks*	*Mobile Core Network Architecture*
	SLO-2	*Load Balancing ,High Availability, Creating the MPLS Overlay, Replication*	*Big Switch Networks/Floodlight,*	*CloudStack, puppet*	*SDN Applications- reactive versus Proactive Applications ,Analyzing Simple SDN Applications ,*	*SDN Mobile Core Network Architecture*
S-7	SLO-1	*Centralized Control Planes- Logical Versus Literal*	*Layer 3 Centric, L3VPN*	*Introduction to Network Function Virtualization, Virtualization and Data Plane I/O*	*A Simple Reactive Java Application, Background on Controllers*	*NFV Mobile Core Network Architecture*
	SLO-2	*ATM/LANE ,Route Servers*	*Path Computation Element Server*	*Services Engineered Path*	*Using the Floodlight Controller, Using the OpenDaylight Controller, Using the Cisco XNC Controller, Using the Hewlett-Packard Controller.*	*Data Plane Function Chains Analysis*
S-8	SLO-1	*Introduction to OpenFlow- Wire Protocol*	*Path Computation Element Server*	*Service Locations and Chaining*	*witch Considerations, Creating Network Virtualization Tunnels, Offloading Flows in the Data Center, Access Control for the Campus, Traffc Engineering for Service Providers*	*Control Plane Function Chains Analysis*
	SLO-2	*Replication ,FAWG (Forwarding Abstraction Workgroup)*	*Plexxi Plexxi Affinity*	*Non-ETSI NFV Work- Middlebox Studie*	*SDN Use Cases- Use Cases for Bandwidth Scheduling*	*requirements & challenges of SDN and NVF In 5G*
S-9	SLO-1	*Configuration and Extensibility, Architecture*	*Cisco OnePK*	*Embrane/LineRate*	*Big Data and Application Hyper-Virtualization for Instant CSPF*	*Existing Solutions*
	SLO-2	*Hybrid Approaches , Ships in the Night ,Dual Function Switches*	*Relation to Idealized SDN Framework*	*Platform Virtualization*	*use Cases for Input Traffic Monitoring, Classification, and Triggered Action*	*future directions*

Pre-requisite Courses	18ECC302J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce the advanced features of Fibers and light wave system*
CLR-2 :	*Illustrate the basics of light wave system and multichannel system*
CLR-3 :	*Understand the various dispersion compensation techniques*
CLR-4 :	*Gain the information on advanced RoF Systems*
CLR-5 :	*Improve the knowledge about the characterization of the Visible Light Communication*
CLR-6 :	*Utilize the concepts in optical Communication for the understanding of engineering and technology*

		Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Explain the concept of wave propagation and dispersion in single-mode fibers, loss and nonlinear of fiber and fiber design and fabrication.*	*2*	*80*	*70*	*H*	*H*	*M*	*H*	*H*	-	*L*	-	-	*H*	-	-	*H*	*M*	*H*

Duration (hour)		Optical fibers and lightwave systems	Lightwave systems and multichannel systems	Loss management and dispersion management	Radio over fiber systems	Optical wireless Communication
		9	9	9	9	9
S-1	SLO-1	*Geometrical-Optics Description*	*System Architectures*	*Compensation of Fiber Losses*	*Trends in Wireless Communications*	*Free-space optical wireless Communication*
	SLO-2	*Wave Propagation*	*Working Principles*	*Erbium-Doped Fiber Amplifiers les*	*Basic Transmission problems and solutions*	*Free-space optical OFDM Communication*
S-2	SLO-1	*Dispersion in Single-Mode Fibers*	*Design Guidelines*	*Raman Amplifiers*	*Regulation*	*Wireless optical CDMA Communication systems*
	SLO-2	*Dispersion Induced Limitations*	*Long-Haul Systems*	*Optical Signal-To-Noise Ratio*	*Standardization*	*Comparison of Free-space optical OFDM & CDMA Communication*
S-3	SLO-1	*Fiber Losses*	*Sources of Power Penalty*	*Electrical Signal-To-Noise Ratio*	*System concepts for the central processing of signals*	*Indoor wireless optical Communication*
	SLO-2	*Nonlinear Optical Effects*	*Forward Error Correction*	*Receiver Sensitivity and Q Factor*	*Wireless Trends*	*outdoor wireless optical Communication*
S-4	SLO-1	*Fiber Design and Fabrication*	*Types of FEC*	*role of Dispersive and Nonlinear Effects*	*Architecture options,*	*Heterogeneous optical networks (HONs)*

	SLO-2	*multicore fibers*	*Computer-Aided Design*	*Periodically Amplified Lightwave Systems*	*global centralized Architecture*	*System Performance*
S-5	SLO-1	*multiclad fibers*	*WDM*	*Dispersion Problem*	*FUTON scenarios*	*VLC System Model*
	SLO-2	*advantages and its applications*	*DWDM*	*Its Solution*	*Optical Infrastructure*	*Advantages and its applications*
S-6	SLO-1	*Advanced Modulation Formats*	*Light wave Systems*	*Dispersion-Compensating Fibers*	*Concepts of Radio over Fiber systems*	*(RF) sensor network system*
	SLO-2	*Demodulation Schemes*	*WDM Components*	*Fiber Bragg Gratings*	*Features of ROF*	*Advantages and its applications*
S-7	SLO-1	*Shot Noise*	*System Performance Issues*	*Dispersion Equalizing Filters*	*Categories RoF systems*	*(FSO) sensor network system*
	SLO-2	*Bit-Error Rate*	*Time-Division Multiplexing*	*Optical Phase Conjugation*	*Performances RoF systems*	*Advantages and its applications*
S-8	SLO-1	*Sensitivity Degradation Mechanisms*	*Subcarrier Multiplexing*	*Channels at High Bit Rates*	*Applications of RoF Technology*	*Recent Advancement in Optical Wireless Communication*
	SLO-2	*Impact of Nonlinear Effects*	*Code-Division Multiplexing*	*Electronic Dispersion Compensation*	*Advantages of RoF Technology*	*Advantages and its applications*
S-9	SLO-1	*Recent Progress*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*
	SLO-2	*Ultimate Channel Capacity*	*Solving Problems*	*Solving Problems*	*Solving Problems*	*Solving Problems*

Course Code	18ECE243J	Course Name	DIGITAL IMAGE AND VIDEO PROCESSING	Course Category	E	Professional Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	18ECC204J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Introduce the fundamentals of image processing and transforms*
CLR-2 :	*Understand the concepts of image enhancement and restoration*
CLR-3 :	*Acquire knowledge on image compression and segmentation methods*
CLR-4 :	*Gain knowledge on basics of video processing*
CLR-5 :	*Know about motion estimation methods in video processing*
CLR-6 :	*Utilize the concepts of image and video processing for practical applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Understand the basics of digital image processing fundamentals and transforms*	*1,2*	*95*	*70*	*L*	-	-	-	-	-	-	-	-	-	-	*H*	*M*	-	-
CLO-2 :	*Design 2D filters and apply it for image enhancement and restoration*	*2*	*90*	*70*	*M*	*H*	-	*H*	*H*	-	-	-	-	-	-	*H*	*M*	-	*H*
CLO-3 :	*Apply image compression and segmentation methods on digital images*	*2*	*90*	*65*	*M*	*H*	-	*H*	*H*	-	-	-	-	-	-	*H*	-	-	*H*
CLO-4 :	*Analyze the video formation techniques*	*1*	*95*	*70*	*H*	*H*	-	*H*	*H*	-	-	-	-	-	-	*H*	-	-	*H*
CLO-5 :	*Learn about the techniques for applying motion estimation in video coding*	*1,2*	*90*	*65*	*M*	*H*	-	*H*	*H*	-	-	-	-	-	-	*H*	-	-	*H*
CLO-6 :	*Apply the concepts of digital image, video processing and their applications*	*1,2*	*90*	*70*	-	-	-	-	-	-	-	-	-	-	-	-	*M*	-	*H*

Duration (hour)		Digital Image Fundamentals and Image Transforms	Image Enhancement and Restoration	Image Compression and Segmentation	Basic Steps of Video Processing	2D Motion Estimation
		12	12	12	12	12
S-1	SLO-1	*Origin of digital image processing*	*Some basic intensity transformation functions – image negatives, log transformations*	*Fundamentals of image compression-coding redundancy, spatial and temporal redundancy*	*Analog video signals, standard*	*2D motion estimation – Optical flow – 2D motion vs. apparent motion*
	SLO-2	*Fundamental steps in digital image processing*	*Piecewise linear transformation functions*	*Irrelevant information, measuring image information*	*Digital video signal, standard, Digital video processing*	*Correspondence and optical flow*
S-2	SLO-1	*Components of an image processing system*	*Histogram equalization, Matching*	*Image compression model, Lossless compression, Huffman coding*	*Time varying image formation models – 3D motion models*	*Occlusion problem*
	SLO-2	*Structure of human eye, Image formation*	*Local Histogram Processing*	*Arithmetic Coding, Run length coding*	*Rigid motion in Cartesian, Homogenous coordinates*	*Aperture problem, 2D motion field models*
S- 3-4	SLO-1 SLO-2	*Lab 1: To learn MATLAB software and its basic commands for image processing*	*Lab 4: Histogram Modifications*	*Lab 7: Run length coding*	*Lab 10: Wavelet coding*	*Lab 13: Convert video into frames and process them*
S-5	SLO-1	*Brightness adaptation and discrimination*	*Using histogram statistics for image enhancement*	*Lossy compression - Transform coding*	*Deformable motion*	*Block motion models- translational block motion*

	SLO-2	Basic concepts in sampling and Quantization , Representing digital images	Smoothing linear filters	Wavelet coding	Geometric image formation	Generalized/ Deformable block motion
S-6	SLO-1	Neighbors of a pixel, Adjacency, Connectivity, Regions and Boundaries	Order statistics nonlinear filters	Image segmentation – detection of isolated points, line detection	Perspective projection	Block matching criteria, Matching procedures
	SLO-2	Distance Measures, A simple image formation model	Sharpening spatial filters	Edge models, Basic edge detection	Photometric image formation	Hierarchical motion estimation
S- 7-8	SLO-1	Lab 2: Fourier analysis of image	Lab 5: Image smoothing and sharpening	Lab 8: Basic edge detection operations	Lab 11: JPEG Compression	Lab 14:Filtering video signals
	SLO-2					
S-9	SLO-1	Fourier transform of sampled functions	Combined spatial enhancement methods	Region based segmentation – region growing	Photometric effects of 3D motion	Gradient based optimization
	SLO-2	Sampling theorem, Aliasing, Obtaining the DFT from the Continuous Transform of a Sampled Function	Homomorphic filtering, A model of image degradation/ restoration process	Region splitting and merging	Observation noise, Sampling structures of analog, digital video	Steepest Descent method
S-10	SLO-1	Properties of 2D DFT – Relationship between spatial and frequency interval, Translation and Rotation, Periodicity, symmetric properties	A model of image degradation/ restoration process, Noise models	Spatial, frequency domain techniques	2D fourier transform relations, Intra frame filtering- LMMSE filtering	Newton Raphson method, Transform coding , 3D waveform coding
	SLO-2	DWT, DCT	Singular value decomposition	Texture based segmentation	Median and weighted median filtering, Motion detection based filtering	Local vs. Global minima, Predictive coding
S- 11 - 12	SLO-1	Lab 3: Image filtering	Lab 6: Singular value decomposition	Lab 9: Repeat/Revision of experiments	Lab 12: Region based image segmentation	Lab 15: Mini project
	SLO-2

Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	IEEE 1641-2010, IEEE 754, IEEE Standard. 1149.1		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire knowledge on Floating and Fixed point Processor such as TMS320C6X for complex signal*
CLR-2 :	*Learn and code TMS320C6x Assembly level programming for real time signal processing applications*
CLR-3 :	*Design and coding DSP algorithm such as FFT, DFT, Convolution , IIR and FIR filters in TMS320C6x*
CLR-4 :	*Gain knowledge on advance filter concepts and filter signal noise using Filter Bank, adaptive filters and analyzes such filters for high end designing.*
CLR-5 :	*Design DSP system for real time applications.*
CLR-6 :	*Utilize the concept of DSP for Engineering and Technology*

Duration (hour)		TMS320C6X Architecture	TMS3206X Assembly Language	Frequency Transforms	Digital Filters	DSP Applications
		15	15	15	15	15
S-1	SLO-1	*Architecture of TMS320C6X*	*TMS320C6X Assembly Language Operations*	*Digital filtering using the DFT*	*Filter banks – Decimation,*	*Dual tone Multi-Frequency (DTMF) Signaling*
	SLO-2	*Pipeline CPU*	*Individual Instruction Descriptions*	*Convolution and correlation*	*Inverse Decimation*	*Software Defined Radio (SDR)*
S-2	SLO-1	*VelociTI, Functional Units,*	*Arithmetic operations, ,*	*Fast Fourier Transform –DIT*	*Perfect Reconstruction*	*QAM Transmitter and QAM Receiver*
	SLO-2	*Addressing modes,*	*logical operations,*	*Fast Fourier Transform –DIT*	*Analysis of M-Band filter Banks*	*Miscellaneous Projects--FSK Modem*
S-3	SLO-1	*Lab1: Generation of sequences (functional & random) (Matlab)*	*Lab 7: MAC operation using various addressing modes*	*Lab 13: Spectrum analysis using DFT(Matlab)*	*Lab 19: FIR Implementation using TMS Processor*	*Lab 25: Equalization (Matlab)*
	SLO-2					
S-4	SLO-1	*Lab 2: Correlation(Matlab)*	*Lab 8: MAC operation using various addressing modes*	*Lab 14: FFT Implementation(DSP processor)*	*Lab 20: FIR Implementation using TMS Processor*	*Lab 26: Equalization (Matlab)*
	SLO-2					
S-5	SLO-1	*TMS320C6X Instruction Sets,*	*Memory data operations*	*Fast Fourier Transform –DIF*	*Orthogonality and Biorthogonality in Filter banks*	*u-Law for Speech Companding,*
	SLO-2	*Assembler directives*	*Conditional Operations*	*Fast Fourier Transform DIF*	*QMF Filter banks and*	*Acoustic Direction Tracker*
S-6	SLO-1	*Multichannel Buffered Serial Ports*	*Floating Point –Data type operations,*	*IFFT*	*CQF Filter Banks*	*MultirateFilter,Neural Network for Signal Recognition*

	SLO-2	*Memory Considerations –Constraints*	*Floating Point –Data type operations*	*FIR filters*	*Transmultiplixers;*	*PID Controller, Four-Channel Multiplexer for Fast Data Acquisition*
S-7	SLO-1	*Lab 3: Linear Convolution (Matlab)*	*Lab 9: MAC operation using various addressing modes*	*Lab 15: FIR filter design-Windowing Techniques(Matlab)*	*Lab 21: IIR implementation using TMS processor*	*Lab 27: Real time audio signal processing with Processor*
	SLO-2					
S-8	SLO-1	*Lab 4 :Circular convolution(Matlab)*	*Lab 10: Linear convolution(DSP processor)*	*Lab 16: FIR filter design-Windowing Techniques(Matlab)*	*Lab 22: IIR implementation using TMS processor*	*Lab 28: Real time audio signal processing with Processor*
	SLO-2					
S-9	SLO-1	*Instruction Operation and Execution notations*	*Fixed- Point Operations,*	*FIR filters*	*Structures and Programming Examples for Noise cancellation*	*Video Line Rate Analysis*
	SLO-2	*Overview of IEEE Standard single and Double Precision formats ,*	*Fixed- Point Operations*	*IIR filter*	*Adaptive Filters-Adaptive filters in DSP simulation software's and TMSC320C6x*	*DSP System Design*
S-10	SLO-1	*Q-format Number Representation on Fixed Point DSPs, Finite Word length effects on Fixed point DSPS*	*Pipeline Operations overview*	*IIR filter*	*Software simulation of FIR*	*MP3 Player*
	SLO-2	*Floating point number representation, , Overflow and Scaling*	*Interrupts-overview.*	*FIR and IIR filter design using TMS320C6x*	*IIRFilters and Filter banks*	*DSP Automotive application*
S-11	SLO-1	*Lab 5: Study of architecture of Digital Signal Processor*	*Lab 11: Circular convolution(DSP processor)*	*Lab 17: IIR filter design-Bilinear and Impulse Invariance Technique(Matlab)*	*Lab 23: Multirate filters*	*Lab 29: Real time audio signal processing with Processor*
	SLO-2					
S-12	SLO-1	*Lab 6: Study of architecture of Digital Signal Processor*	*Lab 12: Waveform generation(DSP processor)*	*Lab 18: IIR filter design-Bilinear and Impulse Invariance Technique(Matlab)*	*Lab 24: Finite Word Length Effect*	*Lab 30: Real time audio signal processing with Processor*
	SLO-2

Duration (hour)		Introduction to Stochastic Process	Adaptive Filters	Least Mean Square Algorithm	Variants of LMS Algorithm And Lattice Structures	Recursive Least Square Algorithm
		9	9	9	9	9
S-1	SLO-1	*Introduction to random process*	*Introduction to adaptive filters*	*Least mean square algorithm*	*Sign LMS algorithm*	*Recursive adaptive filters*
	SLO-2	*Variables, vectors*	*Block diagram of adaptive structure with shift variant filter*	*Derivation*	*Normalized LMS*	*Principle of RLS algorithm*
S-2	SLO-1	*Ensemble averages*	*Properties of adaptive filter*	*Properties of LMS adaptive filters*	*Leaky LMS*	*FIR RLS filter algorithm*
	SLO-2	*Time averages*	*Error sequence generation in adaptive filters*	*Properties of LMS adaptive filters*	*Block LMS*	*Derivation*
S-3	SLO-1	*Stationarity and Stationary random process*	*Channel Equalization- Block diagram of Communication system with Channel equalization*	*Complex LMS algorithm*	*FFT based implementation of block LMS*	*Sliding window RLS*
	SLO-2	*Wide sense stationarity*	*Echo cancellation*	*Convergence of LMS algorithm*	*FFT based implementation of block LMS*	*Derivation*
S-4	SLO-1	*Power Spectral Density*	*Concept of adaptive noise cancelling*	*Learning curve for adaptive filters*	*Comparison of variants on LMS for some practical problem*	*Comparing variants of RLS using MATLAB program*
	SLO-2	*Properties of PSD*	*Beam forming with pilot signals*	*Sample MATLAB program for LMS convergence and plotting learning curve*	*Comparison of variants on LMS for some practical problem*	*Comparing variants of RLS using MATLAB program*
S-5	SLO-1	*Sample problems on WSS random process*	*System modeling using adaptive filters*	*Performance analysis of LMS adaptive filters by varying step size (MATLAB)*	*Lattice filters introduction*	*Kalman filters*

	SLO-2	*Sample problems on WSS random process*	*System Identification structure*	*Performance analysis of LMS adaptive filters by varying step size (MATLAB)*	*Advantages of Lattice structures*	*Kalman filters*
S-6	SLO-1	*Filtering of random process*	*System inversion using adaptive filters*	*Weight error correlation matrix*	*Forward linear prediction*	*Sample problems on RLS algorithms*
	SLO-2	*Filtering of random process*	*Interference cancellation in multi sensor systems*	*LMS misadjustment definition*	*Forward linear prediction*	*Sample problems on RLS algorithms*
S-7	SLO-1	*Autocorrelation Structures*	*Minimization of mean square error*	*Effects of misadjustment factor*	*Backward linear prediction*	*Non linear adaptive filters*
	SLO-2	*Covariance Structures*	*Derivation on MMSE*	*Sample problems for designing adaptive filters using LMS*	*Backward linear prediction*	*Introduction to Neural networks*
S-8	SLO-1	*Eigen value decomposition*	*Steepest Descent algorithm*	*Sample problems on step size*	*Reflection coefficients of forward and backward predictors*	*Neural networks and multilayer perceptorns*
	SLO-2	*Eigen value analysis of autocorrelation matrices*	*Linear prediction example*	*Sample problems on step size*	*Relation between forward and backward prediction coefficients*	*Neural networks and multilayer perceptorns*
S-9	SLO-1	*Ergodicity*	*Wiener filters*	*Stability analysis of LMS algorithms*	*Properties of Lattice structures*	*Adaptive IIR filtering*
	SLO-2	*Ergodic random process*	*Optimization solution in wiener filters*	*Stability analysis of LMS algorithms*	*Updating predictor coefficients*	*Adaptive IIR filtering*

Pre-requisite Courses	18ECE242J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Have an insight on image and color fundamentals*
CLR-2 :	*Analyze the various shapes and regions for the image description*
CLR-3 :	*Acquire knowledge on the texture analysis of an image*
CLR-4 :	*Identify the relation between the templates to match the image requirements*
CLR-5 :	*Know the practical applications of computer vision in images understanding*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*To outline the fundamentals of image and color models*	*1*	*90*	*85*	*H*		*L*		*M*	*H*							*L*	*L*	*M*
CLO-2 :	*Understand the basic shapes and region based image modeling*	*1*	*85*	*85*		*H*						*H*					*M*	*H*	*M*
CLO-3 :	*Analyze the various textures for image synthesis*	*1&2*	*85*	*80*			*M*			*M*		*H*					*L*	*M*	*M*
CLO-4 :	*Identify the objects based on template relations*	*1&2*	*85*	*75*							*H*	*M*	*M*				*L*	*M*	*M*
CLO-5 :	*To apply the image understanding knowledge for image recognition*	*2&3*	*85*	*80*	*H*	*M*						*H*	*M*				*L*	*M*	*H*
CLO-6:	*To understand the principles of image modeling and synthesis with image recognition*	*1,2,3*	*85*	*80*	*M*	*H*	*H*	*H*	*M*								*M*	*M*	*H*

Duration (hour)		Learning Unit / Module 1 Basic Audio Processing	Learning Unit / Module 2 Human Auditory System	Learning Unit / Module 3 Speech Signal Analysis in Time Domain	Learning Unit / Module 4 Speech Signal Analysis in Frequency Domain	Learning Unit / Module 5 Speech and Audio processing applications
		12	12	12	12	12
S-1	SLO-1	*Review of Image processing methods*	*Binary Shape analysis*	*Representing textures*	*Finding objects by voting on relation between templates*	*Face detection*
	SLO-2	*Review of Image processing methods*	*Binary Shape analysis*	*Representing textures*	*Interest points, Simple voting, Voting on raltions.*	*Face detection*
S-2	SLO-1	*Introduction to image formation*	*Connectedness*	*Extracting image Structure with filter banks*	*Relational reasoning using probabilistic framework*	*Face recognition*
	SLO-2	*Introduction to image formation*	*Object labeling and counting*	*Extracting image Structure with filter banks*	*Growing Assemblies Incrementally, Detection, Pruning*	*Face recognition*
S-3	SLO-1	*Image models*	*Size filtering*	*Representing texture using statistics of filter output*	*Frames and probability models*	*Eigen faces*
	SLO-2	*Camera models*	*Distance functions*	*Representing texture using statistics of filter output*	*Representing coordinate frames*	*Active appearence*
S-4	SLO-1	*Sample programs for reading images, understanding pixels*	*Skeletons and thinning*	*Analysis using oriented pyramids*	*Using probability model for detecting the frames*	*3D shape models of face surveillance*
	SLO-2	*Sample programs for reading images, understanding pixels*	*Deformable shape analysis*	*Laplacian pyramids*	*Building probability models for frame invariant*	*3D shape models of face surveillance*
S-5	SLO-1	*Shadows*	*Boundary tracking procedures*	*Filters in the spatial frequency domain*	*Classifiers to prune search*	*Foreground separation*

	SLO-2	*Color representation*	*Boundary tracking procedures*	*Filters in the spatial frequency domain*	*Identifying acceptable assemblies*	*Background separation*
S-6	SLO-1	*Human color perception*	*Shape models*	*Oriented pyramids*	*Sample examples for prune search*	*Particle filters*
	SLO-2	*Human color perception*	*Shape recognition*	*Oriented pyramids*	*Hidden Markov model*	*Particle filters*
S-7	SLO-1	*Image color*	*Centroidal profiles*	*Synthesizing textures for rendering*	*Computing, Maximizing parameters*	*Champer matching, tracking and occlusions*
	SLO-2	*Image color*	*Handling occlusions*	*Synthesizing textures for Homogeneity*	*Varieties of HMM*	*Champer matching, tracking and occlusions*
S-8	SLO-1	*Handling Color Images (MATLAB)*	*Boundary descriptors*	*Synthesis by sampling local models*	*Background subtraction*	*Combining views from multiple cameras*
	SLO-2	*Handling Color Images (MATLAB)*	*Boundary descriptors*	*Synthesis by sampling local models*	*Sample programs on background subtraction*	*Human gait*
S-9	SLO-1	*Surface Color*	*Region descriptors*	*Shape from texture planes*	*Hough transform*	*Constructing 3D models from image sequences*
	SLO-2	*Surface Color*	*Region descriptors*	*Texture from shape planes*	*Sample problems on Hough transforms*	*Scene modeling from registered and unregistered images*

Course Code	18ECE341T	Course Name	MULTIMEDIA COMPRESSION TECHNIQUES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECE240T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn about probability model and coding theory*
CLR-2 :	*Understand about lossless compression*
CLR-3 :	*Understand about Lossy data compression*
CLR-4 :	*Learn about the encoding methods*
CLR-5 :	*Compression Techniques and their applications*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the fundamental concepts of probability model and practical limits specified by coding theory*	*L1&L2*	*90*	*68*	*H*	*H*		*M*	*M*	*M*		*M*				*M*	*H*	*M*	*H*
CLO-2 :	*Learn about rate-distortion theory and what they reveal about efficient information transfer*	*L2&L3*	*86*	*68*	*H*	*H*		*M*	*M*	*M*		*M*				*M*	*H*	*M*	*H*
CLO-3 :	*Understand the fundamental approaches towards lossy image compression*	*L2&L3*	*86*	*68*	*H*	*M*		*H*	*M*	*M*		*M*				*M*	*M*	*M*	*H*
CLO-4 :	*Analyze image, video and audio in the frequency domain to identify important components to be encoded*	*L2*	*85*	*63*	*H*	*M*		*H*	*H*	*M*		*H*				*M*	*M*	*L*	*H*
CLO-5 :	*Applications of various compression techniques*	*L2&L3*	*85*	*63*	*M*	*M*		*M*	*M*	*H*		*M*				*M*	*H*	*M*	*M*
CLO-6:	*Learn about data compression and encoding methods*	*L1,L2,L3*	*90*	*68*	*H*	*M*		*M*	*M*	*M*		*H*				*M*	*H*	*M*	*H*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*The discrete memory less information source*	*Mathematical Preliminaries for Lossless*	*Rate distortion function*	*Vector Quantization*	*Transform Coding: Introduction, Karhunen-Loeve transform, Image compression – EZW, SPIHT, JPEG 2000- Analysis/Synthesis Schemes.*
	SLO-2	*Kraft inequality; optimal codes*	*Mathematical Preliminaries for Lossless Compression*	*Rate distortion function*	*LBG algorithm*	*Karhunen-Loeve transform*
S-2	SLO-1	*Source coding theorem-Entropy*	*Huffman Coding*	*Properties of RD*	*Tree structured VQ*	*Karhunen-Loeve transform*
	SLO-2	*Joint Entropy and Conditional Entropy*	*Huffman Coding*	*Properties of RD*	*Structured VQ*	*discrete cosine transform,*
S-3	SLO-1	*Relative Entropy*	*Optimality of Huffman codes*	*Calculation of RD for the binary source and the Gaussian source*	*Variations of VQ*	*discrete cosine transform,*
	SLO-2	*Mutual Information*	*Extended Huffman Coding*	*Calculation of RD for the binary source and the Gaussian source*	*Gain shape VQ*	*discrete Walsh Hadamard transform*
S-4	SLO-1	*Chain Rules*	*Adaptive Huffman Coding*	*Rate distortion theorem*	*Mean removed VQ*	*discrete Walsh Hadamard transform*
	SLO-2	*Data-Processing Inequality*	*Arithmetic Coding*	*Rate distortion theorem*	*Classified VQ*	*Quantization and coding of transform coefficients*
S-5	SLO-1	*Fano's Inequality Symmetric Channels*	*Adaptive Arithmetic coding*	*Converse of the Rate distortion theorem*	*Multistage VQ*	*Quantization and coding of transform coefficients*
	SLO-2	*Fano's Inequality Symmetric Channels*	*Run Length Coding*	*Quantization problem*	*Adaptive VQ*	*JPEG*

S-6	SLO-1	*Properties of Channel Capacity, Jointly Typical Sequences*	*Dictionary Techniques*	*Scalar Quantization- Uniform Quantizer*	*Trellis coded quantization Transforms.*	*JPEG*
	SLO-2	*Properties of Channel Capacity, Jointly Typical Sequences*	*Lempel Ziv coding*	*Scalar Quantization- Uniform Quantizer*	*Trellis coded quantization Transforms.*	*MDCT*
S-7	SLO-1	*Channel Coding Theorem*	*Applications*	*Adaptive Quantization*	*Basic algorithm*	*MDCT*
	SLO-2	*Channel Coding Theorem*	*Predictive Coding*	*Adaptive Quantization*	*Prediction in DPCM*	*Image compression – EZW-Analysis/Synthesis Schemes*
S-8	SLO-1	*Fano's Inequality*	*Prediction with Partial Match*	*Non-uniform Quantization*	*Prediction in DPCM*	*Image compression – SPIHT-Analysis/Synthesis Schemes*
	SLO-2	*Fano's Inequality*	*Burrows Wheeler Transform*	*Non-uniform Quantization*	*Adaptive DPCM*	*Image compression – JPEG 2000-Analysis/Synthesis Schemes*
S-9	SLO-1	*Converse to the Coding Theorem*	*Dynamic Markov Compression*	*Entropy coded Quantization*	*Adaptive DPCM*	*Audio coding:-MPEG audio coding*
	SLO-2	*Converse to the Coding Theorem*	*Dynamic Markov Compression*	*Entropy coded Quantization*	*Delta Modulation*	*Audio coding:-MPEG audio coding*

Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	ISO/TC 43/SC 1, ISO/TC 43/SC 2		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*learn what is acoustic and its basic sound equations, and how acoustics transmission, reflection, absorption when subjected to various mediums*
CLR-2 :	*learn how does human auditory system and hearing function.*
CLR-3 :	*learn what is acoustic echo, and how to control such echo due to noise and cancel echo using various algorithms.*
CLR-4 :	*learn what are the various types of transducers used for acoustic measurements*
CLR-5 :	*knowwhich transducers can be used in various applications of acoustics.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*To understand the basics of acoustic such as Sound equation, Transmission, Reflection, Absorption under various mediums*	*L1*	*80*	*65*	*M*											*H*	*H*	*M*	*H*
CLO-2 :	*To acquire knowledge on human auditory system and hearing*	*L1*	*85*	*65*	*M*											*H*	*H*	*M*	*H*
CLO-3 :	*To understand and analyze acoustic echo, noise control and cancel echo using various algorithms.*	*L1, L2*	*85*	*65*	*H*	*H*	*H*	*H*	*H*							*H*	*M*	*M*	*H*
CLO-4 :	*To understand about various types of transducers used for acoustic measurements*	*L1*	*85*	*65*	*M*	*H*	*H*										*H*	*M*	*H*
CLO-5 :	*To gain knowledge on various applications of acoustics.*	*L1, L3*	*85*	*65*		*H*		*H*								*H*	*H*	*M*	*M*
CLO-6	*Speech processing analysis in different environment*	*L1, L2, L3*	*85*	*65*	*H*	*H*	*H*	*H*	*H*							*H*	*H*	*H*	*M*

Duration (hour)		Basics of Acoustic Engineering	Auditory System and Hearing	Acoustic Echo and Noise control	Transducers for Acoustic Measurements	Applications of Acoustics
		9	9	9	9	9
S-1	SLO-1	*Introduction to acoustic*	*Anatomy of the auditory systems*	*Human Perception of Echoes*	*Fundamental properties of Transducers*	*Architectural acoustics – Sound in enclosures*
	SLO-2	*Introduction to acoustic*	*Anatomy of the auditory systems*	*Human Perception of Echoes*	*Fundamental properties of Transducers*	*Reverberation time*
S-2	SLO-1	*Harmonic Plane Waves*	*Physiology of the auditory systems*	*Echo Problem*	*Condenser Microphones*	*Sound absorption materials*
	SLO-2	*Harmonic Plane Waves*	*Physiology of the auditory systems*	*Echo Problem*	*Condenser Microphones*	*Measurements of acoustic output in living rooms*
S-3	SLO-1	*Energy Density*	*Function of the auditory systems*	*Adaptive Filters for Echo Cancellation*	*Dynamic Pressure Microphones*	*Acoustic Factors in architectural design*
	SLO-2	*Energy Density*	*Function of the auditory systems*	*Adaptive Filters for Echo Cancellation*	*Dynamic Pressure Microphones*	*Environmental acoustics – Introduction*
S-4	SLO-1	*Acoustic Intensity*	*Physiological measures*	*LMS algorithm*	*Dynamic Pressure Microphones*	*Weighted sound level*
	SLO-2	*Specific Acoustic Impedance*	*Physiological measures*	*NLMS algorithm*	*Dynamic Pressure difference Microphone*	*speech interference*
S-5	SLO-1	*Spherical Waves*	*Physiological measures*	*Least Squares Algorithms*	*Dynamic Pressure difference Microphone*	*Highway noise*

	SLO-2	*Spherical Waves*	*Auditory processing models*	*Least Squares Algorithms*	*Piezo ceramic accelerometer*	*Aircraft noise rating*
S-6	SLO-1	*Decibel Scales*	*Auditory processing models*	*Recursive Least Squares Algorithms*	*Piezo ceramic accelerometer*	*Virtual Sound--*
	SLO-2	*; Rays and Waves*	*Auditory processing models*	*Recursive Least Squares Algorithms*	*Piezo ceramic accelerometer*	*Sound localization cues*
S-70	SLO-1	*Transmission-Incidence*	*Auditory processing models*	*Affine Projection algorithm*	*Laser Doppler velocimeter*	*synthetic 3D Audio*
	SLO-2	*Transmission-Incidence*	*Auditory processing models*	*Affine Projection algorithm*	*Laser Doppler velocimeter*	*synthetic 3D Audio*
S-8	SLO-1	*Reflection*	*Speech Intelligibility*	*Noise cancellation using Affine Projection algorithm*	*Laser Doppler velocimeter*	*Seismology- Signal Model in seismic processing*
	SLO-2	*Absorption*	*Speech Intelligibility*	*Noise cancellation using Affine Projection algorithm*	*Capacitive sensors*	*Optical sensor Signal Model in seismic processings*
S-9	SLO-1	*Viscosity*	*signal processing in hearing aids*	*Fast Affine Projection Algorithm (FAP).*	*Capacitive sensors*	*Underwater and Oceanographic acoustics*
	SLO-2	*Thermal conduction*	*signal processing in hearing aids*	*Fast Affine Projection Algorithm (FAP)*	*Capacitive sensors*	*Inverse Problems in underwater acoustics*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*																		
CLO-1 :	*Understand the basic techniques in speech signal processing broadly used in the area of speech recognition*	*2*	*80*	*63*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Learn how hidden Markov models can be used as generative models for speech and how they can be trained*	*2*	*85*	*68*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-3 :	*To help in understanding account for commercial as well as research-oriented applications within speech recognition*	*2*	*75*	*68*	*H*	-	-	*H*	-	-	-	-	-	-	-	-	-	-	-
CLO-4 :	*To understand basic understanding of dialogue system design and evaluation*	*2*	*85*	*68*	*H*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5 :	*Implement simple dialogue systems and Stochastic Approaches*	*2*	*85*	*68*	*H*	-	*H*	-	-	-	-	-	-	-	-	-	-	-	-
CLO-6 :	*Apply the speech recognition techniques in real time applications.*	*2*	*80*	*68*	*H*	-	-	-	-	-	-	-	-	-	-	-	-	-	-

Duration (hour)		Distance Measurements For Comparing Speech Patterns	Statistical Models For Speech Recognition	Architecture of Continuous Speech Recognition System	Understanding of Spoken Dialogue Systems	Natural Language Generation and Stochastic Process
		9	9	9	9	9
S-1	SLO-1	*Feature, Feature Extraction and Pattern Comparison Techniques*	*Introduction to Perceptual Motivated Representations*	*Introduction to speech recognition*	*Simple models of dialogue structure:*	*Natural language generation for dialogue systems*
	SLO-2	*Feature, Feature Extraction and Pattern Comparison Techniques*	*Perceptual Motivated Representations*	*Introduction to speech recognition*	*Simple models of dialogue structure:*	*Natural language generation for dialogue systems*
S-2	SLO-1	*Speech Distortion measures-Mathematical*	*Formant Frequencies – Role of Pitch – Pitch Detection of Speech and Music*	*Large vocabulary continuous speech recognition*	*Trees and finite state approaches*	*Text-to-speech synthesis*
	SLO-2	*Speech Distortion measures-Mathematical*	*Formant Frequencies – Role of Pitch – Pitch Detection of Speech and Music*	*Large vocabulary continuous speech recognition*	*Trees and finite state approaches*	*Text-to-speech synthesis*
S-3	SLO-1	*Perpectual-Log spectral distance*	*Channel Vocoders and Predictive Coding Scalar Waveform Coders*	*Architecture of large vocabulary continuous speech recognition system*	*Dialogue acts, key phrase reactive approaches*	*Use of speech synthesizers in dialogue systems*
	SLO-2	*Perpectual-Log spectral distance*	*Channel Vocoders and Predictive Coding Scalar Waveform Coders*	*Architecture of large vocabulary continuous speech recognition system*	*Dialogue acts, key phrase reactive approaches*	*Use of speech synthesizers in dialogue systems*
S-4	SLO-1	*Cepstral Distances, Weighted Cepstral distances and Filtering*	*Scalar Frequency Domain Coders*	*Architecture of large vocabulary continuous speech recognition system*	*Information retrieval-based approaches*	*Dialogue system evaluation*
	SLO-2	*Likelihood Distortions*	*Code excited linear Prediction*	*Architecture of large vocabulary continuous speech recognition system*	*Information retrieval-based approaches*	*Dialogue system evaluation*
S-5	SLO-1 SLO-2	*Spectral distortion using a Warped Frequency scale*	*Low – Bit rate Speech coders Speech Recognition*	*Acoustics model*	*Voice XML*	*Stochastic approaches to dialogue*
S-6	SLO-1	*LPC, PLC and MFCC Coefficients*	*Hidden Markov Models (HMM) – Practical Issues in Using HMMs – HMM Limitations*	*Language model*	*Speech recognition*	*Dialogue policy design and training*

	SLO-2	*LPC, PLC and MFCC Coefficients*	*Hidden Markov Models (HMM) – Practical Issues in Using HMMs – HMM Limitations*	*Language model*	*Speech recognition*	*Dialogue policy design and training*
S-7	SLO-1	*Time Alignment and Normalization*	*Acoustic Modeling – Phonetic Modeling, Language Modeling*	*n-gram model*	*Use of speech recognizers in dialogue systems*	*MDP reinforcement learning*
	SLO-2	*Time Alignment and Normalization*	*Acoustic Modeling – Phonetic Modeling, Language Modeling*	*n-gram model*	*Use of speech recognizers in dialogue systems*	*MDP reinforcement learning*
S-8	SLO-1	*Dynamic Time warping*	*Speaker Recognition Algorithm*	*context dependent sub word units*	*Natural language understanding*	*POMDP reinforcement learning*
	SLO-2	*Dynamic Time warping*	*Speaker Recognition Algorithm*	*context dependent sub word units*	*Natural language understanding*	*POMDP reinforcement learning*
S-9	SLO-1	*Multiple Time-Alignment Paths*	*Signal Enhancement for Mismatched Conditions*	*Applications and present status*	*Natural language understanding*	*Simulated users*
	SLO-2	*Multiple Time-Alignment Paths*	*Signal Enhancement for Mismatched Conditions*	*Applications and present status*	*Natural language understanding*	*Simulated users*

2. Mr. Hariharasudhan - Johnson Controls, Pune, hariharasudhan.v@jci.com	*2. Dr. Venkatesan, Sr. Scientist, NIOT, Chennai, venkat@niot.res.in*	*2. Mrs. K. HariSudha, SRM IST*

Course Code	18ECE360T	Course Name	REHABILITATION ENGINEERING	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn concepts and terminologies in Rehabilitation Engineering*
CLR-2 :	*Understand different types of wheel chair design and mobility aids*
CLR-3 :	*Study the components of orthotic and prosthetic devices and their fabrication*
CLR-4 :	*Become aware of Engineering concepts in sensory substitution and augmentation*
CLR-5 :	*Understand the legal concepts in Rehabilitation Engineering*
CLR-6 :	*Study the contemporary topics in Rehabilitation Engineering*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Understand the need for rehabilitation Engineering and proficiently use terminologies related to it.*	*1,2*	*80*	*70*						*M*						*L*	*L*		
CLO-2 :	*Know the various wheel chair design and mobility aid design aspects*	*1,2*	*75*	*65*	*M*		*L*			*L*							*L*	*L*	
CLO-3 :	*Learn about orthotic and prosthetic devices, their design and types.*	*2*	*70*	*65*	*L*		*L*				*L*						*L*		
CLO-4 :	*List the various possibilities to augment or substitute visual and auditory capabilities*	*2,3*	*70*	*65*	*M*	*M*	*L*			*L*								*L*	
CLO-5 :	*Describe the legal concepts in Rehabilitation Engineering*	*3*	*80*	*65*						*M*	*M*								*L*
CLO-6 :	*Gain exposure to the latest topics in Rehabilitation Engineering*	*3*	*80*	*65*	*M*	*L*	*L*	*M*		*L*							*L*	*M*	*L*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduce to Rehabilitation Engineering and Assistive technologies*	*Interventions in seating system*	*Amputation: Definition, need, situations where it can be avoided*	*Basic structure of eye, How it functions, problems that can be faced*	*Application of robots in rehabilitation*
	SLO-2	*Learn Concepts of Rehabilitation Engineering*	*Wheel Chairs-Introduction*	*Classification of amputation*	*Categories of visual impairment, identification of level of intervention needed*	*Types of robots used*
S-2	SLO-1	*Learn Terminologies Rehabilitation Engineering*	*Types of Wheelchairs*	*Prosthetics: Definition, Need for prosthesis*	*Artificial Eye-Complete replacement*	*Challenges in robot design for differently abled people*
	SLO-2	*Considerations for Rehabilitation Engineering*	*Describe on Manual wheelchairs*	*Use of prosthesis, Where prosthesis can't be used*	*Retinal implant*	*Differences in material used*
S-3	SLO-1	*Various approaches for Rehabilitation engineering*	*Component Design*	*Basic types of prosthesis, Prosthesis Prescription*	*Sensory augmentation for blind*	*Functional electrical stimulation definition,*
	SLO-2	*PAD process*	*Electrical Power wheel chairs*	*Prosthesis for shoulder, neck, torso*	*Cortical prosthesis*	*Circuit for stimulations*
S-4	SLO-1	*PHAATE model*	*Power assisted wheelchair-Design*	*Prosthesis for elbow, arm*	*Assist devices for visual rehabilitation*	*Significance of myoelectricl signal*
	SLO-2	*Universal design- Introduction*	*Design types*	*Fabrication and issues involved*	*Auditory devices*	*Acquisition of myoelectricl signal, challenges*
S-5	SLO-1	*Seven Principles of Universal design*	*Wheelchair transportation*	*Parts of Lower extremity*	*Devices for navigation, Design of navigation device*	*Activities of daily living*
	SLO-2	*Benefits of Universal design*	*Lift Mechanism*	*Significance of each part, Different movements involved*	*Tactual sensory substitution, Applications and examples of tactual substitution in real life*	*Low tech and hi tech aids in daily living*
S-6	SLO-1	*Universal design Matrix*	*Wheelchair safety*	*Prosthesis for knee, hip*	*Main part of ear, Measurement of hearing*	*Neural engineering*

	SLO-2	*Design based on human ability*	*Wheelchair standards and tests*	*Material used for fabrication, examples of available prosthesis*	*Problems that can arise, Range of hearing*	*Implementation in rehabilitation*
S-7	SLO-1	*Standards for assistive technology- National and International*	*Intelligent Mobility aids*	*Orthosis: Definition, Difference between orthosis and prosthesis*	*Surgical hearing aids*	*Behavioural disorders and its types*
	SLO-2	*Role of Rehabilitation Engineering in standards development*	*Smart wheeled walkers*	*Orthosis for shoulder, neck*	*Cochlear and eardrum interventions*	*Rehabilitation methods involves*
S-8	SLO-1	*Rehabilitation Engineering and its research opportunities*	*All terrain wheelchair*	*Orthosis for foot, Material used: the problems faced with the material*	*Non surgical hearing aids*	*Sports rehabilitation*
	SLO-2	*Future of Engineering in Rehabilitation*	*Current directions in wheelchair research*	*Components of lower limp prosthesis*	*Design of a simple external hearing aid*	*Measurement technology for sports mechanics*
S-9	SLO-1	*Seating and common pathologies*	*Parts of Upper extremity*	*External circuitry design and support system*	*Sign language*	*Legal aspect in rehabilitation*
	SLO-2	*Seating assessment*	*Significance of each part, Different movements involved*	*Indentifying the orthosis and prosthesis which can be used* *Practice session: student to indentify the area of amputation and what to use in that location*	*Devices for sign language translation*	*Provision for rehabilitation*

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication ERRRngineering		Data Book / Codes/Standards	Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*	Learning			Program Learning Outcomes (PLO)														
CLR-1 :	*Learn the different synthesis method and its application*	1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-2 :	*Apply the various characterization techniques in nano materials*	Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLR-3 :	*Comprehend the principles behind nanomedicine*																		
CLR-4 :	*Gain a broad understanding of concepts and applications of nanomedicine*																		
CLR-5 :	*Apply concepts of nanomedicine to a focused clinical area of their choice*																		
CLR-6 :	*Acquire knowledge to apply these nanosystems for the diagnosis and therapy.*																		
Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*																		
CLO-1 :	*Analyze the suitable method in biomedical application*	*3*	*80*	*75*	*M*	-	-	*L*	-	-	-	-	-	-	-	-	*L*	-	*L*
CLO-2 :	*Identify the various characterization techniques in nano materials*	*3*	*80*	*70*	*L*	-	-	*L*	-	-	-	-	-	-	-	-	*L*	-	*L*
CLO-3 :	*Describe the properties and techniques in nano biomaterials*	*3*	*75*	*70*	*L*	-	-	*L*	-	-	-	-	-	-	-	-	*L*	-	*L*
CLO-4 :	*Analyze the concept of nano therapeutics and application in biomedical*	*3*	*80*	*75*	*M*	-	-	*M*	-	-	-	-	-	-	-	-	*L*	-	*L*
CLO-5 :	*Identify the principle behind modern bio nano imaging techniques*	*3*	*80*	*70*	*M*	-	-	*M*	-	-	-	-	-	-	-	-	*L*	-	*L*
CLO-6 :	*Apply the nano materials in 3D printing techniques*	*3*	*80*	*70*	*M*	-	-	*M*	-	-	-	-	-	-	-	-	*L*	-	*L*

Duration (hour)		Synthesis of nano material	Nano materials characterization techniques	Nano biomaterials	Nano therapeutic	Nano biomedical imaging and 3D Bio printing techniques
		9	9	9	9	9
S-1	SLO-1	*Introduction About Nano technology*	*Introduction to Scanning electron microscope(SEM)*	*Introduction to nano biomaterials*	*Drug to delivery to central nervous system*	*Introduction to biomedical imaging*
	SLO-2	*Bulk synthesis:*	*Application of scanning electron microscope*	*Surface and bulk properties of biomaterials*	*Drug delivery across blood brain barrier*	*The emergence of nanoparticle as imaging platform in medicine*
S-2	SLO-1	*Top down and bottom approaches*	*Energy dispersive spectroscopy (EDS)*	*Nano biomaterials, Nano bio ceramics*	*Nano wire monitoring the brain activity*	*Magnetic resonance imaging basics*
	SLO-2	*Physical vapour deposition methods*	*Basics principle of atomic microscopy*	*Hydroxyapatite ant its properties*	*Introduction to Nano robot medical device*	*MRI working ,paramagnetic contrast agents*
S-3	SLO-1	*Electron beam evaporation techniques*	*Construction, working and application of atomic microscopy*	*Hydroxyapatite ant its applications*	*Application of Nano robot medical device*	*Magnetic Nano sensor*
	SLO-2	*Pulsed laser deposition*	*Introduction to transmission electron microscopy*	*Alumina and its properties ,application*	*Introduction to nano drug carrier*	*Radio labeled nano particles.*
S-4	SLO-1	*Sputtering techniques*	*Application of transmission electron microscopy*	*Zirconia and Titania and its properties*	*Nano carrier for ocular drug delivery*	*Sound waves nano particle*

	SLO-2	*Evaporation techniques*	*Scanning probe microscope*	*Zirconia and Titania ant its applications*	*cell therapy for myocardial infection*	*Application in ultra sound imaging*
S-5	SLO-1	*Cathodic arc deposition*	*Nano indentation techniques*	*Nano diamond carbon nano materials*	*Types of cell therapy for myocardial infection*	*Biological imaging*
	SLO-2	*Spin coating unit, spray pyrolysis*	*Cantilever array sensor*	*Nano diamond carbon materials and its applications.*	*Nano neurosurgery,*	*Quantum dot in optical imaging*
S-6	SLO-1	*Chemical vapor deposition(CVD)*	*Basics principle of scanning tunneling microscopy*	*Introduction to surface modification*	*nanolipoblockers*	*3D printing*
	SLO-2	*Types of chemical vapour deposition*	*Constriction and application of scanning tunneling microscope(STM)*	*Types of surface modification method*	*Antirestenosis drugs*	*Introduction and principle*
S-7	SLO-1	*Plasma method: Plasma enhanced CVD*	*Introduction about X-ray diffraction*	*Textured and porous materials*	*Introduction to nano particle drug formulations*	*3D printing technology :ink let based*
	SLO-2	*Hot filament CVD*	*Measurement and application of XRD*	*Cell biomaterials interactions*	*nano particle drug formulations for spray inhalations*	*Pressure assisted, laser assisted*
S-8	SLO-1	*Chemical synthesis: Sol gel processing*	*X-ray photon spectroscopy(XPS)*	*Immune response*	*Introduction to nano bone implants*	*Solenoid valve based, acoustic jet based*
	SLO-2	*hydrothermal,co precipitation,*	*Application XPS*	*Bone Scaffold preparations*	*Nano bone implants and scaffolds*	*3D bio printing in ceramics ,polymers*
S-9	SLO-1	*Wet chemical method*	*Electrochemical work station*	*Scaffold properties and its applications*	*Introduction to nano technology in cardio vascular system*	*3D bio printing in organs*
	SLO-2	*Hydrolysis ,Electrophoretic deposition*	*Application of electrochemical work station*	*In vitro and in vivo tissue biocompatibility*	*Regeneration of cardiovascular system*	*Challenge and future development of 3D bio printing*

Course Code	18ECE362T	Course Name	PHYSIOLOGICAL MODELING AND SIMULATION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Build an engineering model based on physiological subsystems*
CLR-2 :	*Implement static analysis for physiological systems*
CLR-3 :	*Understand time domain and stability analysis of physiological systems*
CLR-4 :	*Implement frequency response analysis for physiological systems*
CLR-5 :	*Identify and estimate unknown parameters in system modeling*
CLR-6 :	*Represent the working of physiological systems using different modeling techniques*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1	Learning 2	Learning 3	Program Learning Outcomes (PLO) 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Develop a more in-depth level of understanding engineering analysis for modeling physiological systems*	*1,2*	*80*	*70*	*M*	-	-	-	-	-	-	-	-	-	-	-	*M*	-	-
CLO-2 :	*Perform static analysis of a system*	*1,2*	*80*	*70*	-	*M*	-	-	-	-	-	-	-	-	-	-	*M*	-	-
CLO-3 :	*Perform transient and stability analysis of a system.*	*1,2*	*80*	*70*	-	*M*	-	-	-	-	-	-	-	-	-	-	*M*	-	-
CLO-4 :	*Able to do frequency analysis of the system*	*1,2*	*80*	*70*	-	*M*	-	-	-	-	-	-	-	-	-	-	*M*	-	-
CLO-5 :	*Understand and implement system identification techniques*	*1,2*	*80*	*70*	-	*L*	-	-	-	-	-	-	-	-	-	-	*M*	-	-
CLO-6 :	*Implement the various mathematical modeling techniques to physiological systems*	*1,2*	*80*	*70*	*M*		-	-	-	-	-	-	-	-	-	-	*M*	-	-

Duration (hour)		Linear Model	Static Analysis	Time Domain Analysis	Frequency Domain Analysis	System Identification
		9	9	9	9	9
S-1	SLO-1	*Introduction to modeling methodology, need for models, approaches to modeling*	*Static analysis: Open loop versus closed loop*	*Introduction to time domain analysis*	*Frequency response: Open loop frequency response*	*Identification of physiological control system*
	SLO-2	*Model identification, model validation and Simulation*	*Loop gain calculation: Room temperature control*	*Linearized respiratory mechanics transient response*	*Closed loop frequency response*	*Basic problems in Physiological system analysis*
S-2	SLO-1	*System analysis, fundamental concepts*	*Steady state characteristics*	*Linearized respiratory mechanics first order model – impulse response for open loop*	*Relation between transient and frequency response*	*Nonparametric and parametric identification methods*
	SLO-2	*Physiological control system an example*	*Determination of steady state operating point for simple model of muscle stretch reflex*	*Linearized respiratory mechanics first order model – impulse response for closed loop*	*Frequency domain specifications*	*Numerical Deconvolution, Least square estimation*
S-3	SLO-1	*Engineering control system versus physiological control system*	*Human body Glucose – Insulin regulatory system*	*Transient response descriptors : Impulse response*	*Graphical representation of frequency response: Bode plot*	*Estimation using correlation functions*
	SLO-2	*Science of modeling*	*Steady state analysis of glucose –insulin model*	*Transient response descriptors : Step response*	*Bode plot :Linearized lung mechanics*	*Estimation in frequency domain, optimization techniques*
S-4	SLO-1	*Generalized system properties*	*Human body chemical regulation of ventilatory system*	*Concept of sliding theory*	*Graphical representation of frequency response: Nicholas chart*	*Problems in parameter estimation*
	SLO-2	*Models with combinations of system elements*	*Mechanism of respiration*	*Neuromuscular reflex action*	*Nicholas chart : Linearized lung mechanics*	*Input design*
S-5	SLO-1	*Linear model of respiratory mechanics*	*Gas exchanger mathematical modeling*	*Mathematical model of neuromuscular reflex motion*	*Graphical representation of frequency response : Nyquist plot*	*Identification of closed loop systems – "opening the loop"*

	SLO-2	*Linear model of respiratory mechanics: Derivation of transfer function*	*Respiratory controller mathematical modeling*	*Calculation of transfer function*	*Nyquist plot: Linearized lung mechanics*	*Starling heart- lung preparation*
S-6	SLO-1	*Linear model of muscle mechanics*	*Closed loop analysis : lung and controller*	*Stability and transient response*	*Introduction : Circulatory system*	*Kao's cross – circulation experiment*
	SLO-2	*Linear model of muscle mechanics: Derivation of transfer function*	*Calculation of transfer function*	*Root locus and Routh-Hurwitz stability criterion*	*Mathematical model of circulatory system*	*Artificial brain perfusion for partitioning central and chemo reflexes*
S-7	SLO-1	*Distributed versus lumped parameter model*	*Heart and systemic circulation*	*Stability analysis: root locus method*	*Frequency response of circulatory system*	*Voltage clamp*
	SLO-2	*Distributed versus lumped parameter model: Derivation of transfer function*	*Mathematical modeling of cardiac output*	*Introduction to Nyquist plot*	*Graphical representation for frequency response of circulatory system*	*Opening the Pupillary reflex loop, Read rebreathing technique*
S-8	SLO-1	*Linear system and superposition principle*	*Calculation of transfer function for simplified model of cardiac output regulation*	*Nyquist criterion for stability*	*Frequency response of glucose – insulin model*	*Identification under closed loop condition*
	SLO-2	*Laplace transform and transfer function*	*Cardiac characteristics curve analysis*	*Relative stability theory*	*Mathematical model and simulation of glucose – insulin model*	*Minimal model of blood glucose regulation*
S-9	SLO-1	*Impulse function analysis*	*Venous return curve*	*Physiology: Pupillary reflex control*	*Frequency response approach to pupil control*	*Optimization : Introduction*
	SLO-2	*Basics of Linear convolution*	*Closed loop analysis of heart and systemic circulation*	*Mathematical modeling and stability analysis of pupillary reflex control*	*Frequency response characteristics curve for pupillary control*	*Optimization in systems with negative feedback*

Course Code	15EC363J	Course Name	MEDICAL IMAGE PROCESSING	Course Category	E	Professional Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Understand the fundamental image operations and image transforms*
CLR-2 :	*Apply various image enhancement techniques in enhancing the medial images*
CLR-3 :	*Analyze the various types of image segmentation algorithms*
CLR-4 :	*Gain knowledge in Image compression and image registration methods*
CLR-5 :	*Understand the image reconstruction techniques used in reconstruction of medical images*
CLR-6 :	*The learner gains knowledge in Image retrieval and digital image watermarking*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
		Level of Thinking (Bloom)	Expected Proficiency (%)	Expected Attainment (%)	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
CLO-1 :	*Describe the 2D Sampling theory and different types of image transforms*	*1, 2*	*80*	*70*	*M*														
CLO-2 :	*Implement the image enhancement techniques for improving the quality of medical images*	*2*	*80*	*70*	*M*														
CLO-3 :	*Apply the different image segmentation algorithms for various medical applications*	*2*	*80*	*70*			*M*		*M*								*M*		*L*
CLO-4 :	*Differentiate and analyze the various image compression and registration algorithms*	*3*	*80*	*70*					*M*										
CLO-5 :	*Analyze the various image reconstruction methods used for medical images*	*3*	*80*	*70*	*M*												*M*		*L*
CLO-6 :	*Illustrate the concepts of wavelet transform and digital image water marking*	*3*	*80*	*70*	*M*														

Duration (hour)		Fundamental Image Operations and Transforms	Image Enhancement methods	Image Segmentation Algorithms	Image compression and image registration methods	Image Reconstruction Methods
		12	12	12	12	12
S-1	SLO-1	*Elements of Visual Perception- structure of human eye and image formation*	*Basic gray level transformation- image negative, intensity slicing techniques*	*Morphological operations-Erosion*	*Image compression-Introduction*	*Image reconstruction from projections- Radon transform- derivation*
	SLO-2	*Brightness range adaptation and discrimination*	*Contrast stretching, dynamic range compression and bit plane slicing*	*Dilation*	*Types of redundancies*	*Properties*
S-2	SLO-1	*Image sampling-2D sampling Theory*	*Histogram equalization*	*Image opening*	*Huffman coding technique*	*Inverse radon transform- convolution back projection*
	SLO-2	*Reconstruction from its samples*	*Histogram specification*	*Image closing*	*Procedure*	*Filter back projection*
S 3-4	SLO-1	*Lab1: Basic operations on images*	*Lab4: Gray transformation and histogram equalization*	*Lab 7: Morphological operations*	*Lab 10: Image compression*	*Lab 13: Image reconstruction from projection data*
	SLO-2					
S-5	SLO-1	*Quantization- optimal mean square quantizer*	*Image smoothening in spatial domain – Low pass filter*	*Edge detection- Marr hildreth edge detector*	*Image registration- Introduction*	*Digital implementation of filter back projection- Block diagram*
	SLO-2	*Uniform quantizer*	*Median filter*	*Algorithm*	*Dimensionality transformation*	*Algorithm*
S-6	SLO-1	*Neighborhood pixel relationships- adjacencies*	*Image sharpening in spatial domain – High pass filter, high boost filter*	*Canny edge detection- smoothing*	*Rigid registration algorithm*	*Wavelet transform-Introduction*

	SLO-2	*Distance measures*	*Derivative filters*	*Non maxima suppression and thresholding*	*Rigid registration algorithm*	*Algorithm*
S 7-8	SLO-1	*Lab2: Image transforms in spatial domain*	*Lab 5: Image smoothening using suitable filters*	*Lab 8: Edge detection techniques*	*Lab 11: Image registration*	*Lab 14: Wavelet transform*
	SLO-2					
S-9	SLO-1	*Image transform –DFT, DCT*	*Image smoothening in frequency domain*	*Thresholding –basics*	*Registration of MRI and PET images*	*Digital image watermarking-Introduction*
	SLO-2	*Properties*	*Image sharpening in frequency domain*	*Global thresholding algorithm*	*Clinical applications*	*Applications*
S-10	SLO-1	*Haar Transform*	*Color image processing-Introduction*	*Region based segmentation-region growing algorithm*	*Registration of MRI and CT images*	*Image retrieval-Introduction*
	SLO-2	*Properties*	*Color models*	*Region splitting and merging algorithm*	*Clinical applications*	*Content based image retrieval*
S 11-12	SLO-1	*Lab3: Image transforms in frequency domain*	*Lab 6: Image sharpening using suitable filters*	*Lab9: Image segmentation using Thresholding*	*Lab 12: Fusion of MRI and CT images*	*Lab 15: Digital image watermarking*
	SLO-2

Course Code	18ECE364T	Course Name	BODY AREA NETWORK AND MOBILE HEALTHCARE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECC205J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of the learning this course is to:*
CLR-1 :	*Comprehend technical information and challenges in WBAN.*
CLR-2 :	*Describe the hardware requirements of BAN*
CLR-3 :	*Review the wearable sensors and standards for BAN*
CLR-4 :	*Describe the mobile devices that is available for health care*
CLR-5 :	*Summarize the possible and latest applications of mobile healthcare*
CLR-6 :	*Learn about context-aware health care applications*

Course Learning Outcomes (CLO):	*At the end of this course, learns will be able to :*	Learning			Program Learning Outcomes (PLO)														
		1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

CLO-1 :	*List out the BAN challenges*	*1*	*80*	*75*		*L*													
CLO-2 :	*Identify the hardware necessary for BAN*	*1*	*80*	*75*	*L*														
CLO-3 :	*List and describe the various wearable sensors*	*1,2*	*80*	*75*		*L*											*L*		
CLO-4 :	*Appreciate the mobile devices available for healthcare*	*1.2*	*80*	*75*	*L*														
CLO-5 :	*List the latest applications and research opportunities with mobile healthcare.*	*2*	*80*	*75*														*L*	
CLO-6 :	*Think about context-aware health care solutions*	*3*	*80*	*75*															*M*

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*BAN-Definition*	*Processor in BAN*	*RF Communication*	*Sensors for wearable system*	*Mobile health technologies*
	SLO-2	*Terminologies used with BAN*	*Low Power MCUs*	*RF Communication in and around the body*	*Wearable system design for specific applications*	*Mobile nutrition tracking*
S-2	SLO-1	*Technical Challenges*	*Mobile Computing MCU*	*Antennal Design*	*Wearable system for ECG monitoring,*	*Accessing existing virtual electronic patient record*
	SLO-2	*Sensor design concepts*	*Integrated processor*	*Antenna testing*	*Wearable system for EEG monitoring,*	*Mobile personal health records,*
S-3	SLO-1	*Types of sensors*	*Radio transceiver along with the processor*	*Propagation issues*	*Wearable system for Gait analysis*	*Monitoring hospital patients,*
	SLO-2	*Biocompatibility issues*	*Integrated processor with Memory*	*Base Station considerations*	*Evaluation of general performance*	*Sensing vital signs*
S-4	SLO-1	*Energy Requirements*	*Antenna for BAN*	*Network topology*	*Evaluation of night time performance*	*Transmission using wireless networks*
	SLO-2	*Energy supply*	*Antenna Requirements*	*Stand – Alone BAN*	*Evaluation parameters*	*Continuous monitoring*

S-5	SLO-1	*Nodes, number of node*	*Antenna Considerations*	*Wireless personal Area Network*	*Latest health monitoring methods*	*Patient Monitoring and wearable devices*
	SLO-2	*Optimal node placement in BAN*	*Types of antenna*	*Wireless personal Area Network Technologies*	*Smart phone based health care monitoring system*	*Patient Monitoring in Diverse Environments*
S-6	SLO-1	*System security*	*Wire antenna*	*IEEE 802.15.1*	*Phone based fall risk prediction*	*A framework for Capturing Patient Consent in Pervasive Healthcare Applications*
	SLO-2	*System Reliability*	*Ceramic antenna*	*IEEE P802.15.13*	*Emergency alerts*	*M-health application*
S-7	SLO-1	*BAN Standards*	*External antenna*	*IEEE 702.15.14*	*RFID based personal mobile medical assistance*	*Context aware sensing*
	SLO-2	*BAN with other standards*	*Sensor Interface*	*Zigbee*	*Other similar technologies*	*Technology Enablers for context-Aware healthcare Applications*
S-8	SLO-1	*BAN Architecture*	*Considerations on the interface*	*BAN and WBAN technologies*	*Infusing image processing capabilities*	*Case study I*
	SLO-2	*BAN and other technologies*	*Power sources- Batteries*	*Limitations in use*	*Secure medical sensor network with HIP*	*Case study I*
S-9	SLO-1	*BAN and Healthcare*	*Fuel cells for sensor nodes.*	*Coexistence issues with BAN*	*Diagnostic applications*	*Case study II*
	SLO-2	*Medical Applications of BAN*	*Other novel power sources*	*Other practical considerations*	*Therapeutic applications*	*Case study II*

Course Code	18ECE366T	Course Name	IMPLANTABLE BIOELECTRONICS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18EES101J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Comprehend technical information about miniaturized Implantable Biomedical devices*
CLR-2 :	*Introduce to neural interfaces and cyborgs*
CLR-3 :	*Know about implantable user interface and CMOS imaging systems*
CLR-4 :	*Learn about implantable electronics biocompatibility criteria and telemetry*
CLR-5 :	*Know the key design trends in implantable systems*
CLR-6 :	*Know the future of Biomedical Implantable systems*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Describe the design of Implantable Biomedical Devices*	*1,2*	*80*	*75*	*M*														
CLO-2 :	*Tell about neural interfaces and cyborgs*	*1*	*80*	*75*	*L*														
CLO-3 :	*Describe about implantable user interface and CMOS imaging systems*	*1,2*	*80*	*75*	*M*														
CLO-4 :	*Tell about implantable electronics biocompatibility criteria and telemetry*	*1*	*80*	*75*						*L*	*L*								
CLO-5 :	*Consolidate on design trends in implantable systems*	*2,3*	*80*	*75*	*L*													*L*	
CLO-6 :	*Summarize the future of Biomedical Implantable systems*	*2,3*	*80*	*75*														*L*	

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Bioelectronics-Introduction*	*Neural interfaces and cyborgs- introduction*	*Implantable user interfaces*	*Biotelemtry*	*Design trends in Biomedical Implantable systems*
	SLO-2	*Energy Harvesting as a Pathway to miniaturization,*	*Fusing Robotics with the Human Body*	*Design Considerations*	*Inductive Link for Forward Data*	*Design of Implant Systems-*
S-2	SLO-1	*Implantable Devices*	*Anatomy of Peripheral Nerves*	*Evaluating Basic Implanted User Interfaces*	*Wireless Power Link*	*Review-History*
	SLO-2	*Implementation of Implantable Devices*	*Interfacing with the periphery for recording and stimulation*	*Qualitative Evaluation,*	*Implantable device with external units*	*Basic Considerations and Characteristics of RF MEMS Implantable Systems-*
S-3	SLO-1	*RF Power Harvesting*	*Listening to the Brain*	*Medical Considerations*	*Implantable Telemetry Link*	*Legal Considerations of the Radio Frequency (RF)*
	SLO-2	*Matching network, rectifier,*	*Interfacing with the Central Nervous System*	*Limitations*	*Wideband telemetry links*	*Field Strength*
S-4	SLO-1	*Regulator and band gap reference*	*Eletrical Modulation of the Human Nervous System*	*CMOS Imaging Devices*	*Multichannel neural recording systems*	*Power Levels*
	SLO-2	*Implant functional block*	*Pain Modulation*	*Fundamentals of CMOS Imaging*	*Wireless endoscope*	*Biocompatibility*
S-5	SLO-1	*Wireless Communication Link,*	*Electrical Modulation of Inflammation*	*Photo sensors,*	*Microelectrode Arrays*	*Protection of the Biomedical Implant*
	SLO-2	*Forward and reserve data link*	*Cyborgs*	*Log sensors*	*Interface Electronics*	*Systems-Characteristics of Biological and Medical Signals*

S-6	SLO-1	*Payload*	*The Neuro-Tech Version*	*SPAD sensors*	*Electrode equivalent circuit*	*Design considerations of Implantable Systems, Micro power Electronic Design*
	SLO-2	*Applications*	*Biological Brains in a Robot Body*	*Artificial Retina*	*Stimulation Front Ends*	*Approaches*
S-7	SLO-1	*Locomotive Implant*	*Deep Brain Stimulation*	*Principle of Artificial Retina*	*Recording Front-Ends*	*Samples*
	SLO-2	*Implantable Cardiac Probe,*	*General Purpose Brain Implants*	*Artificial Retina Based on CMOS Imaging Device*	*Instrumentation amplifier*	*Power Supply design.*
S-8	SLO-1	*Communication power delivery*	*Brain-Computer Interfaces*	*Brain-Implantable CMOS Imaging Device*	*Improving the Biocompatibility of Implantable Bioelectronics Devices.*	*System integration*
	SLO-2	*System Overview of a Generic Bioelectronics Implant*	*Noninvasive Brain-Computer Interfaces*	*Measurement Methods for Brain Activities*	*Implantable Bioelectronics Devices Materials*	*Micro-Packages,*
S-9	SLO-1	*Circuit Design for Low-Power Signal Processing.*	*Sub dermal Magnetic Implants*	*Fiber Endoscope and Head-Mountable Device*	*Surface Composition*	*Present Challenges,*
	SLO-2	*Architecture-Level Optimization for Low-Power Data Processing*	*RF ID Implants.*	*Summary and future directions*	*Response to Implantation*	*Nano-Enabled Implantable Device for In Vivo Glucose Monitoring*

Learning Resources	1. *Evgeny Katz, "Implantable Biolectronics Devices materials and Applications", Wiley-VCH, 2014.* 2. *Vinod Kumar Khanna, "Implantable Medical Electronics Prosthetics, Drug Delivery and Health Monitoring", Springer, 2016*	3. *Swarup Bhunia, Steve Majerus, Mohamad Sawan, Implantable Biomedical Microsystems: Design Principles and Applications", Elsevier, 2015.*

Learning Assessment

	Bloom's Level of Thinking	Continuous Learning Assessment (50% weightage)								Final Examination (50% weightage)	
		CLA – 1 (10%)		CLA – 2 (15%)		CLA – 3 (15%)		CLA – 4 (10%)#			
		Theory		Theory	Practice	Theory	Practice	Theory	Practice	Theory	Practice

Course Code	18ECE367T	Course Name	REGULATORY AFFAIRS IN MEDICAL INSTRUMENTS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECC201J, 18ECE260J	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department		Electronics and Communication Engineering		Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Understand the fundamental troubleshooting procedures and testing of basic electronic components*
CLR-2 :	*Get an idea about the fault diagnosis in analog circuits and digital ICs.*
CLR-3 :	*Acquire an idea about the basic troubleshooting procedures for biomedical equipment*
CLR-4 :	*Get an idea about the medical device classification globally and regulatory standards*
CLR-5 :	*Get an idea about the Indian perspective medical device regulatory system*
CLR-6 :	*Get an overall idea about the importance of troubleshooting and medical device classification in India*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Apply the common troubleshooting procedures in Electronic Equipment and Outline the testing procedures of active and passive components*	*1, 2*	*80*	*70*	*M*	-	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2 :	*Analyze the faults in analog circuits and digital ICs*	*1, 2*	*80*	*70*	*M*	-	-	-	-	-	-	-	-	-	-	-	*M*	-	-
CLO-3 :	*Identify the problems in common biomedical equipment in hospitals when it is not working and provide a suitable solution*	*2*	*80*	*70*	-	*M*	-	-	-	-	-	-	-	-	-	-	*M*		-
CLO-4 :	*Outline the importance of medical device classification based on the application and ISO standards*	*1*	*80*	*70*	-	-	*H*	-	-	-	-	-	-	-	-	*M*	-	*M*	-
CLO-5 :	*Describe the Indian medical device regulatory system*	*1*	*80*	*70*	-	-	-	-	-	-	-	-	-	-	-	*M*	-	-	-
CLO-6 :	*Outline the job opportunities in regulatory affairs in India*	*1,2*	*80*	*70*	-	-	-	-	-	-	-	-	-	-	-	*L*	-	-	-

Duration (hour)		Basic Troubleshooting Techniques& Testing Procedures	Fault Diagnosis in Analog, Digital Integrated Circuits and Home care device	Biomedical Machine Troubleshooting in Hospitals	Medical Device Classification and Standards	Medical Device Regulatory System in India
		9	9	9	9	9
S-1	SLO-1	*Equipment failure and its types*	*Characteristics of ideal op-amps*	*Troubleshooting- ECG Machine*	*Global Harmonization Task Force (GHTF) definition for medical device*	*Importance of regulatory system*
	SLO-2	*Causes of Equipment failure*	*Typical op-amp based medical circuits*	*And its preventive maintenance*	*Medical Device Life Cycle: Identify, Characterize*	*Market Overview*
S-2	SLO-1	*Functional block diagram of a troubleshooting system*	*Typical op-amp based medical circuits*	*Troubleshooting- EEG Machine*	*Medical Device Life Cycle: Optimize, Verify/Validate*	*Overview of Regulatory Environment*
	SLO-2	*Functional block diagram of a troubleshooting system*	*Fault diagnosis in op-amp circuits*	*And its preventive maintenance*	*Global Perspective on medical device regulations: USA, European Union*	*Overview of Regulatory Environment*
S-3	SLO-1	*Troubleshooting process*	*Example: Inverting amplifier troubleshooting process*	*Troubleshooting- defibrillator, suction machine*	*Global Perspective on medical device regulations: Canada, Australia, Japan*	*Functions Undertaken by DCGI and Central Government*
	SLO-2	*Fault finding aids*	*Typical Faults in digital circuits*	*And its preventive maintenance*	*Medical device classification: USA*	*Functions Undertaken by the FDA and State Governments*
S-4	SLO-1	*Troubleshooting techniques: Preliminary Observations*	*Different testing methods in digital circuits: Functional Testing, DC Test*	*Troubleshooting- electrosurgical unit*	*Medical device classification: European Union, GHTF*	*Indian Pharmacopoeia Commission*
	SLO-2	*Troubleshooting techniques: Functional block diagram approach*	*AC Test*	*And its preventive maintenance*	*Premarket Notification 510(k), Premarket Approval*	*Details of Key Regulator*
S-5	SLO-1	*Troubleshooting techniques: Split half method*	*Digital IC Troubleshooter:, Logic clip, Logic probe*	*Troubleshooting- anesthesia machine*	*Standards and its need*	*Organization Chart — CDSCO*
	SLO-2	*Application of Split half method in circuit troubleshooting*	*Digital IC Troubleshooters: Logic pulser, Logic current tracer*	*And its preventive maintenance*	*ISO 9000 core standards: Basic overview*	*Role of Distributors or Local Subsidiaries*

S-6	SLO-1	*Troubleshooting techniques: Systematic Troubleshooting*	*Digital IC Troubleshooters: Logic comparator*	*Troubleshooting- autoclaves & sterilizers*	*ISO 13485: Basic overview*	*Product Registration*
	SLO-2	*Correction action*	*Circuit board Troubleshooting*	*And its preventive maintenance*	*ISO 14971: Basic overview*	*Manufacturing site and product registration: process flow chart*
S-7	SLO-1	*Testing of passive components: Resistors, Capacitors*	*Troubleshooting- oxygen concentrators*	*Troubleshooting- endoscope*	*ISO 10933: Basic overview*	*Quality System Regulation*
	SLO-2	*Testing of passive components: Inductors, Diodes, LDR*	*And its preventive maintenance*	*And its preventive maintenance*	*ISO 14155: Basic overview*	*Technical Material Requirement & Labelling Requirement of Medical Device*
S-8	SLO-1	*Testing of active components: BJT*	*Troubleshooting- sphygmomanometers, Analog Blood pressure apparatus*	*Troubleshooting- incubators*	*ISO 11607: Basic overview*	*Manufacturing-Related Regulation*
	SLO-2	*Testing of active components: JFET*	*And its preventive maintenance*	*And its preventive maintenance*	*ISO 11137: Basic overview*	*Clinical Trial-Related Regulation*
S-9	SLO-1	*Testing of active components: MOSFET*	*Troubleshooting- nebulizer*	*Troubleshooting- X-ray Machine*	*IEC 60601: Basic overview*	*Commercial Aspect*
	SLO-2	*Testing of variable resistors and its different types*	*And its preventive maintenance*	*And its preventive maintenance*	*IEC 62353: Basic overview*	*Related Agencies/Departments and Ministries*

							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Acquire familiarity about various industrial instrumentation types, their parameters and different types of measurement techniques.*
CLR-2 :	*Gain knowledge about pressure measurement techniques.*
CLR-3 :	*Learn about the different techniques of measurement of flow.*
CLR-4 :	*Get exposed to the various techniques of measurement of level.*
CLR-5 :	*Gain knowledge about the temperature measurement techniques.*
CLR-6 :	*Familiarize the measuring devices used in industrial applications.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)
CLO-1 :	*Understand the need for measurement in industries and the basic measurement techniques.*	*3*	*80*	*75*
CLO-2 :	*Elucidate the construction & working of various industrial devices used to measure pressure.*	*3*	*80*	*70*
CLO-3 :	*Summarize the different methods for flow measurement.*	*3*	*75*	*70*
CLO-4 :	*Illustrate the different methods for the measurement of level.*	*3*	*80*	*75*
CLO-5 :	*Analyze different techniques to measure temperature.*	*3*	*80*	*70*
CLO-6 :	*Analyze, formulate and select suitable sensor for the given industrial applications.*	*3*	*80*	*70*

Program Learning Outcomes (PLO)

Duration (hour)		Force, Acceleration and Speed Measurement	Pressure Measurement	Level Measurement	Flow Measurement	Temperature Measurement
		9	9	9	9	9
S-1	SLO-1	*Introduction to industrial symbols and standards*	*Units of pressure and vacuum*	*Need for level Measurement*	*General concepts - Laminar flow, Reynolds's number*	*Definitions and standards*
	SLO-2	*Classification of industry*	*Need for pressure measurement*	*Visual level indicators*	*Effect of temperature and pressure on flow rate measurement*	*Primary and secondary fixed points*
S-2	SLO-1	*Definitions of Process variable*	*Manometer Dynamics*	*Purge method*	*Calibration of flow meters.*	*Calibration of thermometer*
	SLO-2	*Unit conversions*	*Types- U tube, Inclined Tube and Well type Manometers*	*Buoyancy method*	*Head type flow measurement -Principle*	*Different types of filled in system thermometer*
S-3	SLO-1	*Types of measurement required*	*Elastic Pressure Sensor Instruments – Bourdon Tube Pressure Gauge, Capsule Gauge*	*Resistance, Capacitance and inductive probes*	*Orifice , Venturi tube*	*Sources of errors in filled in systems and their compensation*
	SLO-2	*Detectors, probe analyzers, actuators*	*Diaphragm gauges, bellows and force balance type sensors*	*Ultrasonic type*	*Pitot Tubes, Flow nozzle*	*Bimetallic thermometers*
S-4	SLO-1	*Measurement of force*	*Electronic Pressure / DP transmitters- capacitive type*	*Laser type*	*Variable Area Flow meters-Principle*	*Review of RTD and Thermistors*
	SLO-2	*Different types of load cells – Magneto-elastic load cell, Strain gauge load cell*	*Piezo - resistive and resonating wire type*	*Optical fiber, Thermal type*	*Rotameters*	*Signal conditioning of industrial RTDs and their characteristics*
S-5	SLO-1	*Acceleration Measurement*	*Vacuum pressure Measurements- Mcleod Gauge*	*Radar, Radiation type*	*Electrical Type Flow meters-Principle*	*Three lead and four lead RTDs.*

	SLO-2	*Strain gauges, Piezoelectric*	*Pirani gauge*	*Solid level measurement*	*Electromagnetic type, Ultrasonic type*	*Thermocouples – Laws of thermocouple*
S-6	SLO-1	*Translational and rotational displacement using potentiometers*	*Thermocouple gauge*	*Boiler drum level measurement :– Differential pressure method*	*Positive displacement type*	*Fabrication of industrial thermocouples*
	SLO-2	*Differential transformers*	*Knudsen gauge*	*Hydrastep method*	*Nutating disc, Reciprocating piston*	*Commercial circuits for cold junction compensation*
S-7	SLO-1	*Mechanical type vibration instruments – Seismic instrument as an accelerometer*	*Ionization gauge- cold cathode and hot cathode types*	*Miscellaneous Measurement,*	*Mass flow meters - Coriolis type*	*Pyrometers:Total radiation pyrometers*
	SLO-2	*Vibrometer*	*Thermal conductivity gauge*	*Humidity – Dry and wet bulb psychrometers*	*Thermal, Impeller type*	*Selective radiation pyrometers*
S-8	SLO-1	*Speed measurement – Revolution counter*	*Testing and calibration of pressure gauges*	*Resistive and capacitive type hygrometers*	*Weirs, Flumes*	*Optical pyrometer*
	SLO-2	*D.C and A.C tachogenerators*	*Dead weight tester*	*Moisture measurement in solids- Conductivity sensor-Microwave and IR sensors.*	*Open channel flow measurement*	*Two colour radiation pyrometers*
S-9	SLO-1	*Stroboscope.*	*Discussion of device types and models used in practical industrial applications*	*Discussion of device types and models used in practical industrial applications*	*Discussion of device types and models used in practical industrial applications*	*Discussion of device types and models used in practical industrial applications*
	SLO-2	*Discussion of device types and models used in practical industrial applications*	*Installation Requirements*	*Installation Requirements*	*Installation Requirements*	*Installation Requirements*

Course Code	18ECE281J	Course Name	PROCESS DYNAMICS AND CONTROL	Course Category	E	Professional Elective	L	T	P	C
							2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering		Data Book / Codes/Standards	Nil	

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Impart fundamental knowledge on the dynamics and mathematical modeling of various processes*
CLR-2 :	*Introduce the effect of various control actions and the tuning techniques of controllers.*
CLR-3 :	*Impart knowledge on final control elements*
CLR-4 :	*Get exposed different types of advanced control schemes*
CLR-5 :	*Explore the computer as controller in digital control system.*
CLR-6 :	*Identify the different type of control schemes used in process industries and paraphrase their importance*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Analyze and mathematically model the process systems*	3	80	75	H	H	M	H	H	-	-	H	H	-	H	H	M	L	L
CLO-2 :	*Select and optimize the tuning of a controller*	3	80	70	H	H	H	H	H	-	-	H	H	-	H	H	H	L	L
CLO-3 :	*Demonstrate the working and application of different type of actuators and control valves*	3	75	70	H	H	H	H	H	-	-	H	H	-	H	H	H	M	L
CLO-4 :	*Understand and analyze the various advanced control schemes*	3	80	75	H	H	H	H	H	-	-	H	H	-	H	H	H	M	H
CLO-5 :	*Design suitable digital controllers for the process*	3	80	70	H	H	H	M	H	-	-	H	H	-	H	H	H	H	H
CLO-6 :	*Recommend the right choice of control schemes for the application*	3	80	70	H	H	M	H	H	-	-	H	H	-	H	H	M	H	H

Duration (hour)		Process Dynamics	Control Action and Tuning of controllers	Final Control Elements	Advanced Control Schemes	Digital Control System
		12	12	12	12	12
S-1	SLO-1	*Need for process control*	*Basic control actions*	*I/P converter*	*Feedback and Feed-forward control*	*Introduction to state space ,Basic building blocks of computer control system*
	SLO-2	*The process control loop*	*Characteristics of ON- OFF controllers*	*P/I converter*	*Application of feed forward control in various processing units*	*Data loggers*
S-2	SLO-1	*Need for process modeling*	*Characteristics of Single speed floating controllers*	*Pneumatic actuators*	*Split-range control*	*Data acquisition systems*
	SLO-2	*Servo and Regulatory operation*	*P+I, P+D and P+I+D control modes*	*Electric actuators*	*Application of cascade control in various processing units*	*Supervisory control , SCADA, Direct digital control*
S 3-4	SLO-1 SLO-2	*Lab1: Identify the components of the process control loop.*	*Lab 4: Design the on-off, P,PI and PID controller for the Pressure Process*	*Lab 7: Determine the characteristics of I/P and P/I converter*	*Lab10: Tune the PID Controller for mathematically described process using ZN method*	*Lab13:Determine the state model for the mechanical system using MATLAB*
S-5	SLO-1	*Continuous and batch processes*	*Practical forms of PID controller*	*Control Valves*	*Inferential control*	*Review of z transforms*
	SLO-2	*Self-regulation, Degrees of freedom*	*Auto/manual transfer, Reset windup*	*Characteristic of Control Valves:- Inherent characteristics*	*Ratio control*	*Digital PID , Position and velocity form*
S-6	SLO-1	*Mathematical model of level, flow processes*	*Evaluation criteria- Quarter Decay Ratio, IAE, ISE and ITAE*	*Installed characteristics*	*Cascade control.*	*Implementation of digital controllers*
	SLO-2	*Interacting and non interacting systems*	*Selection of Time Integral performance Criteria*	*Modeling of control valves and types*	*Fuzzy controllers*	*Design of Deadbeat controller, Dahlin's controller*
S	SLO-1					

7-8	SLO-2	*Lab 2 : Determine the characteristics of interacting system*	*Lab 5: Design the on-off control, P,PI and PID controller for the flow Process*	*Lab 8: Determine the characteristics of Pneumatically Actuated Control Valve*	*Lab11: Tune the PID Controller for mathematically described process using ZN open loop method*	*Lab14:Design the Deadbeat algorithm for the given system using MATLAB*
S-9	SLO-1	*Laws and assumptions governing gas process*	*Tuning – Process reaction curve method*	*Valve Positioner and its importance*	*Adaptive controllers*	*Multi-loop multivariable control , Introduction*
	SLO-2	*Mathematical models of pressure processes*	*Z-N open loop tuning techniques*	*Control valve sizing*	*Model predictive control*	*Interaction between control loops*
S-10	SLO-1	*Laws and assumptions governing thermal process*	*Continuous cycling method*	*Cavitation and flashing*	*Smith predictor control scheme*	*The Relative Gain Array (RGA)*
	SLO-2	*Mathematical models of thermal processes*	*Damped oscillation method*	*Selection criteria*	*Internal model control (IMC) ,P& I diagram*	*Decoupling of control loops*
S 11-12	SLO-1 SLO-2	*Lab3: Determine the characteristics of non interacting system*	*Lab 6: Design on-off control, P,PI and PID controller for the level Process*	*Lab 9: Determine the characteristics of Pneumatically Actuated Control Valve (with and without Positioner)*	*Lab12: Compare the responses of simple and cascade control system using MATLAB*	*Case study : Design of computerized multi loop controller*

Course Code	18ECE282T	Course Name	MODERN CONTROL SYSTEMS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18ECS201T	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Know and design various conventional compensators.*
CLR-2 :	*Know and develop mathematical modeling using state space technique.*
CLR-3 :	*Know and analyze the system using state space analysis techniques.*
CLR-4 :	*Know the importance of structural properties and to analyze the stability of the system.*
CLR-5 :	*Study the state space control methodologies for various systems.*
CLR-6 :	*Know and design modern control techniques which are linear.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Design cascade compensators in time domain and design PID controllers in time domain.*	3	80	75	H	H	H	-	L	-	-	H	-	-	-	H	H	-	H
CLO-2 :	*Understand and develop state space model for different systems*	3	80	70	H	L	H	-	H	-	-	H	-	-	-	-	M	-	H
CLO-3 :	*Analyze the controllability and observability of a system and to design controllers and observers.*	3	75	70	H	H	-	H	H	-	-	H	-	-	-	-	M	-	H
CLO-4 :	*Implement procedure to find the structural properties of any linear system*	3	80	75	H	H		H	H	-	-	H	-	-	-	-	M	-	H
CLO-5 :	*Understand the procedure of applying the control methodology on various linear systems*	3	80	70	H	H	H	H	H	-	-	H	-	-	-	H	M	-	H
CLO-6 :	*Design and apply linear based modeling and modern control methods for different linear systems.*	3	80	70	H	H	H	-	L	-	-	-	-	-	-	H	H	-	H

Duration (hour)		Linear Control Design	State Space Analysis	Controllability And Observability	Controller Design For Linear System	Applications
		9	9	9	9	9
S-1	SLO-1	*Design specifications*	*Concept of State variables*	*Concept of Stability*	*Pole placement using feedback*	*State space Modeling of Inverted Pendulum*
	SLO-2	*Compensator configuration (series and feedback)-*	*Concept of State space model*	*Computation of Stability of State space model*	*Eigen value placement theorem*	
S-2	SLO-1	*Design cascade compensators - lag by using time domain*	*Relationship between transfer function and State space model*	*Concept of Controllability*	*Selection of desired poles*	*State space Modeling of Ball and Beam system*
	SLO-2	*Design feedback compensators - lag by using time domain*	*State space representation of linear continuous time systems using physical variables*	*Computation of Controllability of State space model*	*Eigen structure assignment*	
S-3	SLO-1	*Design cascade compensators - lead by using time domain*	*State space representation of linear continuous time systems using phase variables*	*Concept of Observability*	*State controller design exercise*	*State space Modeling of Translational Mechanical Systems*
	SLO-2	*Design feedback compensators - lead by using time domain*	*State space representation of linear continuous time systems using canonical variables*	*Computation of Observability of State space model*		
S-4	SLO-1	*Compensator design exercises*	*Conversion of transfer function to various state space representations*	*Computation of structural properties using Controllability & Observability*	*State controller design exercise*	*State space Modeling of Rotational Mechanical Systems*
	SLO-2	*Compensator design exercises*				
S-5	SLO-1	*Design cascade compensators – lead-lag by using time domain*	*Diagonalization*	*Computation of structural properties using eigen decomposition*	*State controller design exercise*	*Modeling exercises for Translational and Rotational Mechanical Systems*

	SLO-2	*Design feedback compensators – lead-lag by using time domain*	*State space representation of discrete time systems*			
S-6	SLO-1	*Design specifications – PID Controllers*	*Solution of state equations – from differential equations*	*Concept of Pole Placement by state feedback*	*Optimal Control – Linear Quadratic Regulation (LQR)*	*State space Modeling of Electrical Systems*
	SLO-2	*Effect of PID on linear systems*		*Concept of State Observers*	*Infinite Horizon Regulator*	
S-7	SLO-1	*Design of PD controller using time domain*	*Solution of state equations – from Transfer Functions*	*Control System Design Via Pole Placement by state feedback*	*Receding Horizon Regulator*	*Modeling exercises for Electrical Systems*
	SLO-2	*PD Controller design exercises*			*Receding Horizon Regulator - Design Parameters*	
S-8	SLO-1	*Design of PI controller using time domain*	*Concepts of state transition matrix.*	*Effect of state feedback*	*Controller Design with Reference Input*	*State space Modeling of Field controlled DC Motor*
	SLO-2	*PI Controller design exercises*	*Computation of state transition matrix*		*Tracking/ Servo Control using State Feedback*	
S-9	SLO-1	*Design of PID controller using time domain*	*Computation of state transition matrix*	*State feedback Controller design exercises*	*State controller with reference input design exercise*	*State space Modeling of Armature controlled DC Motor*
	SLO-2	*PID Controller design exercises*

L	T	P	C
2	0	2	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Study the hardware components of Programmable Logic Controller*
CLR-2 :	*Understand the need of programming languages for PLC*
CLR-3 :	*Explore the ladder logic program for control application*
CLR-4 :	*Identify applications of timers and counters in process automation*
CLR-5 :	*Locate the malfunctions and troubleshooting various types of errors in Programmable Logic Controller*
CLR-6 :	*Provide the knowledge of Commissioning, Maintenance and their importance in industry.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Select right I/O modules in PLC for process control*	3	80	75	H	L	-	-	-	-	-	-	L	-	-	H	H	H	H
CLO-2 :	*Develop ladder logic program for control application*	3	80	70	H	H	H	H	H	-	-	H	H	M	-	H	H	H	H
CLO-3 :	*Use timers and counters in process automation*	3	75	70	H	H	H	H	H	-	-	H	H	M	-	H	H	H	H
CLO-4 :	*Interpret data compare instruction in PLC program*	3	80	75	H	H	H	H	H	-	-	H	H	M	-	H	H	H	H
CLO-5 :	*Troubleshoot the input and output malfunctions in PLC*	3	80	70	H	H	-	H	H	-	-	-	H	H	-	H	M	H	H
CLO-6 :	*Select a right PLC for the given application*	3	80	70	H	H	-	-	-	-	-	H	H	-	M	M	H	H	H

Duration (hour)		PLC Hardware Components	PLC Programming and Wiring	Timers and Counters	Data manipulation and Math instructions	Troubleshooting
		12	12	12	12	12
S-1	SLO-1	*Evolution of Programmable logic controllers*	*PLC programming languages-Ladder Logic*	*Timer Instructions*	*Data manipulation*	*Electrical Noise*
	SLO-2	*Architecture of a PLC*	*Function Block Diagram, Instruction List*	*On-Delay timer instruction*	*Data transfer operations*	*Leaky Inputs and Outputs*
S-2	SLO-1	*Principles of Operation*	*Instruction Addressing*	*Off-delay timer instruction*	*Data compare instructions*	*Grounding*
	SLO-2	*PLCs versus Computers*	*Branch Instructions*	*Retentive Timer*	*Data manipulation programs*	*Voltage Variations and Surges*
S 3-4	SLO-1 SLO-2	*Lab1: PLC Wiring*	*Lab 4: Traffic light control system*	*Lab 7: HMI Programming*	*Lab10: Lift control*	*Lab13: Electro pneumatic direction control*
S-5	SLO-1	*PLC size and application*	*Electromagnetic Control Relays*	*Cascading Timers*	*Numerical Data I/O Interfaces*	*Program Editing and Commissioning*
	SLO-2	*Discrete I/O modules*	*Contactors*	*Up-Counter*	*Closed-Loop Control*	*Preventive Maintenance*
S-6	SLO-1	*Sinking and sourcing*	*Manually Operated Switches*	*One-Shot Instruction*	*Math Instructions*	*Troubleshooting*
	SLO-2	*Analog I/O modules*	*Mechanically Operated Switches*	*Down-Counter*	*Addition Instruction*	*Processor Module*
S 7-8	SLO-1 SLO-2	*Lab 2 :Water level control system*	*Lab 5: Sequential operation of motor*	*Lab 8: DC motor speed control system*	*Lab11: Car parking system*	*Lab14: Stamping machine control*

S-9	SLO-1	*Special I/O modules*	*Proximity Sensor, Magnetic Reed Switch*	*Cascading Counters*	*Subtraction Instruction*	*Input Malfunctions*
	SLO-2	*I/O Specifications*	*Light Sensors, Velocity and Position Sensors*	*Combining Counter and Timer Functions*	*Multiplication Instruction*	*Output Malfunctions*
S-10	SLO-1	*Human Machine Interfaces (HMIs)*	*Output Control Devices, Seal-In Circuits, Electrical Interlocking Circuits*	*High-Speed Counters*	*Division Instruction*	*Comparative study of Industrial PLCs.*
	SLO-2	*Alarms, Graphics Library*	*Converting Relay Schematics into PLC Ladder Programs*	*Problems*	*Other Word-Level Math Instructions*	
S 11-12	SLO-1 SLO-2	*Lab3: Material handling system*	*Lab 6: Bottle filling system*	*Lab 9: Temperature control system*	*Lab12: Flow control system*	*Lab15: Servo controller programming*

Duration (hour)		Programming Concepts in LabVIEW	Measuring Concepts in Virtual Instrumentation	Controlling Concepts in Virtual Instrumentation	Final Control Elements and its implementation	Signal Processing and Applications
		12	12	12	12	12
S-1	SLO-1	*Historical perspective, Need of VI, Advantages of VI, Virtual Instruments versus Traditional Instruments*	*Components of Measuring System,Origin of signals*	*Introduction to Non continuous controllers in LabVIEW*	*Final Control Operation*	*PC based digital storage oscilloscope*
	SLO-2	*Review of software in Virtual Instrumentation ,Software environment Architecture of VI, Introduction to the block diagram and Front panel Pallets*	*Transducer, Sensors, Differences between chemical sensors, physical sensors, Biosensors. Selection criteria*	*Introduction to continuous controllers in LabVIEW*	*Fundamentals of Mechatronic Actuators*	*Sensor Technology*
S-2	SLO-1	*Creating and saving a VI, Front Panel Tool Bar, Block diagram Tool Bar, Palettes*	*General Conditioning Functions, A/D Control ,D/A Control in VI platform*	*Design of ON/OFF controller*	*Position-Controlled Actuators*	*Oscillators, counters*
	SLO-2	*Creating sub VI, Creating an ICON, Building a connector pane, Displaying VI'S Placing and Saving Sub VI'S on block diagram* *Example of full adder circuit using half adder circuit*	*Introduction to MyRIO ,Applications of MyRIO*	*P,PI,PID controllers for a mathematically described processes using VI software.*	*open-loop and closed-loop actuator position control in a hands-on application*	*Signal and image processing Techniques*
S-3,4	SLO-1 SLO-2	*Lab 1: Verification of Arithmetic Operations & Verification of Half Adder*	*Lab 4 :Design a VI to measure angle with my RIO using Y-axis onboard accelerometer*	*Lab 7: To apply on-off controller using QNET HVAC in virtual instrumentation platform*	*Lab 10: To apply Position Controlled actuators*	*Lab 13: To Design of DSO*
S-5	SLO-1	*Loops-For Loop,*	*Introduction to PC Buses*	*Modeling of level process*	*Manipulator Importance, Operation of Manipulators*	*Spectrum Analyzer*
	SLO-2	*While Loop*	*Local Buses-ISA, PCI,*	*Basic control of level process in LabVIEW*	*Types of Manipulators Selection Criteria,*	

						Waveform Generator
S-6	SLO-1	*Arrays*	*RS232, RS422*	*Modeling of Reactor Processes*	*Controlling techniques on Manipulators*	*Data visualization from multiple locations*
	SLO-2	*Clusters, plotting data*	*RS485*	*Basic control of Reactor process in LabVIEW*	*Controlling techniques on Manipulators*	*Distributed monitoring and control*
S-7,8	SLO-1	*Lab 2:Program to find Addition of First n natural numbers using for loop*	*Lab 5:To implement Speed Control of DC Motor (QNET)*	*Lab 8:Continous Control of any process using LabVIEW*	*Lab 11:To apply PID to Control Manipulators*	*Lab 14:Real time spectrum analysis using LabVIEW*
	SLO-2					
S-9	SLO-1	*Charts, Graphs, Formula nodes,*	*Interface Buses-USB,PXI*	*Case studies on development of HMI in VI*	*Remote access using LabVIEW*	*Vision and Motion Control*
	SLO-2	*Case and Sequence Structures*	*VXI,*	*Case studies on development of HMI in VI*	*Different types of Protocols*	*Examples on Integrating Measurement with vision and motion*
S-10	SLO-1	*Acquiring Data Using Hardware*	*SCXI*	*Case studies on development of SCADA in VI*	*Case study on TCP/IP Protocol application*	*NI Motion control*
	SLO-2	*DAQ Devices*	*PCMCIA*	*Case studies on development of SCADA in VI*	*Case studies on web publishing tool*	*Speed control system*
S-11,12	SLO-1	*Lab 3:Design a Voltmeter by using AO to generate a signal and AI to acquire the signal using DAQ*	*Lab 6: Simple Modeling of QNET Rotary Inverted Pendulum*	*Lab 9:Controlling of Rotary Inverted Pendulum*	*Lab 12:Online process control using LabVIEW using TCP/IP and web publishing*	*Lab 15 :Minor Project*
	SLO-2

Course Code	18ECE380T	Course Name	INSTRUMENTATION AND CONTROL IN PROCESS INDUSTRIES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Learn various methods involved in the petroleum industries.*
CLR-2 :	*Import the knowledge of control and measurement used in iron and steel industries.*
CLR-3 :	*Study the various instruments and the role of instrumentation in paper industries.*
CLR-4 :	*Learn the measurement and control in thermal industries.*
CLR-5 :	*Study the industry standards and safety consciousness in process industries.*
CLR-6 :	*Import the knowledge of chemical process hazards in industries.*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	Program Learning Outcomes (PLO) 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Understand the basics of petrochemical industries.*	*3*	*80*	*75*	*H*	-	-	-	-	-	-	-	*H*	-	-	*H*	*H*	-	-
CLO-2 :	*Apply knowledge in working of various instruments that are used in iron and steel industries.*	*3*	*80*	*70*	*H*	*H*	-	-	-	-	-	*H*	*H*	-	-	*H*	*H*	-	*H*
CLO-3 :	*Acquire the knowledge of analyzers and measurement of density, level in paper industries.*	*3*	*75*	*70*	*H*	*H*	*M*	-	-	-	-	*H*	*H*	-	-	*H*	*H*	*H*	*H*
CLO-4 :	*Understand the operation of boiler in thermal industries.*	*3*	*80*	*75*	*H*	*H*	*M*	*H*	-	-	-	*H*	*H*	-	-	*H*	*H*	*H*	*H*
CLO-5 :	*Understand the process safety in chemical industries.*	*3*	*80*	*70*	*H*	*H*	*M*	*H*	-	*H*	-	-	*H*	-	-	*H*	*M*	*M*	*H*
CLO-6 :	*Apply the knowledge of process hazards in industries.*	*3*	*80*	*70*	*H*	-	-	-	-	*H*	-	-	-	-	-	*H*	-	*M*	*H*

Duration (hour)		Instrumentation in Petroleum Industry	Measurement and control in Iron and Steel Industry	Instrumentation and control in Paper Industry	Boiler operation and control in Thermal Industry	Industrial Safety Management
		9	9	9	9	9
S-1	SLO-1	*Introduction to petroleum*	*Introduction: Steel Production*	*Conventional and non-conventional raw materials for paper manufacture*	*Introduction to power generation*	*Introduction to process safety*
	SLO-2	*Petroleum exploration Methods*	*Basic oxygen furnace*	*Different pulping processes*	*Importance of instrumentation & control in power generation*	*Importance of Safety consciousness in Indian Chemical Industries*
S-2	SLO-1	*Magnetic Survey*	*Blast furnace*	*Continuous and batch digesters*	*Classification of instruments in power plant*	*Industry Standards and Regulations.*
	SLO-2	*Drilling process*	*Rolling process*	*Chemical recovery process*	*Building blocks*	*Set of Standards. HSE – PES, AIChE – CCPS,*
S-3	SLO-1	*Rotary Drilling*	*Hot rolling process*	*Conversion process*	*Combined Heat and Power System*	*Process hazard analysis*
	SLO-2	*Petroleum production*	*Cold rolling process*	*Identification of various process parameters*	*Control Loops in Boiler*	*Chemical process hazards*
S-4	SLO-1	*Petroleum refining and unit operations in refinery*	*Temperature measurement*	*pH measurement*	*Combustion Control,*	*Material hazards*
	SLO-2	*Constituents of crude oil*	*Pressure measurement*	*Density measurement*	*Air/fuel ratio control*	*Energy hazards*
S-5	SLO-1	*Atmospheric distillation of crude oil*	*Shape and thickness measurement*	*Level measurement*	*Steam flow measurement*	*Chemical interaction hazards*

	SLO-2	*Vacuum distillation process*	*Analyzers in iron and steel industry*	*Special applications for control*	*Smoke, density measurement*	*Layers of protection*
S-6	SLO-1	*Thermal conversion process*	*Oxygen analyzer*	*Digester blow tank control*	*Turbine speed and vibration measurement*	*Types of safeguard*
	SLO-2	*Control of distillation column*	*Blast furnace and stove combustion control system*	*Dryer temperature control.*	*Use of feed forward and cascade control in process industries*	*Safety performance measurement tools*
S-7	SLO-1	*Temperature control.*	*Casting mold Level Control*	*Fuel gas oxygen analyzer*	*Instrumentation and control in reactors*	*Techniques used to reduce explosion hazards*
	SLO-2	*Pressure control*	*Computer Applications*	*Dissolved oxygen analyzer*	*Sodium analyzer*	*Hazard identification techniques*
S-8	SLO-1	*Level measurement of petroleum*	*Data logging applied to Steel Making*	*Computer applications: Direct Digital Control*	*Flue gas analyzer*	*Fault tree analysis*
	SLO-2	*Temperature measurement of petroleum*	*Steel rolling mill Control*	*Distributed control system in power plant*	*Fuel composition analyzer*	*Operation and maintenance*
S-9	SLO-1	*Case Study: An. Application for Petroleum Refineries.*	*Case Study on iron and steel manufacturing process.*	*Case Study: Water Treatment for Paper and Pulp Industry*	*Case Study: Chandrapura Thermal Power Station*	*Case Study: Safety in Explosive*
	SLO-2	*Case Study: Control of an Industrial Distillation Column*	*Case Study: Analysis of the Production Processes in a Steel Factory*	*Case Study: Boiler Materials for the Pulp and Paper Industry*	*Case Study:Boiler tube failures*	*Case Study: Chemical splash at process plant.*

Course Code	18ECE381T	Course Name	DISTRIBUTED CONTROL SYSTEM AND SCADA	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Give basic knowledge in SCADA in the field of automation*
CLR-2 :	*Understand the Communication modules used in SCADA*
CLR-3 :	*Give basic knowledge in different architectures of DCS*
CLR-4 :	*Explore the local control unit of distributed control system*
CLR-5 :	*Impart adequate information in the interfaces used in DCS*
CLR-6 :	*Learn the applications of DCS in process industries*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	Learning 2: Expected Proficiency (%)	Learning 3: Expected Attainment (%)	PLO 1: Engineering Knowledge	PLO 2: Problem Analysis	PLO 3: Design & Development	PLO 4: Analysis, Design, Research	PLO 5: Modern Tool Usage	PLO 6: Society & Culture	PLO 7: Environment & Sustainability	PLO 8: Ethics	PLO 9: Individual & Team Work	PLO 10: Communication	PLO 11: Project Mgt. & Finance	PLO 12: Life Long Learning	PLO 13: PSO - 1	PLO 14: PSO - 2	PLO 15: PSO - 3
CLO-1 :	*Understand the elements of SCADA system*	3	80	75	H	-	-	-	-	H	-	-	-	-	-	H	M	H	-
CLO-2 :	*Develop any application based on SCADA along with GUI using SCADA software.*	3	80	70	H	-	-	-	-	H	-	-	-	-	H	H	-	H	-
CLO-3 :	*Understand evolution and architecture of DCS and hierarchical control in DCS*	3	75	70	H	H	M	H	M	H	-	M	M	-	H	H	H	H	H
CLO-4 :	*Demonstrate interfacing of hardware and software of computer based automation system.*	3	80	75	H	H	M	H	M	-	-	M	H	-	H	H	M	H	H
CLO-5 :	*Select and use the most appropriate automation technologies for a given application*	3	80	70	H	-	M	-	H	-	-	H	H	-	H	H	M	H	H
CLO-6 :	*Evaluate computer based automation system used in industries ranging from discrete, continuous process to hybrid processes.*	3	80	70	H	-	-	-	-	H	-	H	H	-	H	H	H	H	H

Duration (hour)		SCADA Elements	Communication	DCS Architecture	Operator interface	DCS Application
		9	9	9	9	9
S-1	SLO-1	*SCADA basics introduction*	*SCADA Communication introduction*	*DCS - basics*	*DCS operator interfaces- introduction*	*DCS Application in Power plant*
	SLO-2	*Elements of SCADA*	*Communication system components*	*Evolution of Distributed Control System*	*Operator Interface Requirements*	*Automation strategy*
S-2	SLO-1	*Functionality of SCADA*	*Structure of a SCADA Communications Protocol*	*DCS Architecture*	*Low-level Operator Interface*	*Distributed system structure*
	SLO-2	*Process example*	*Field/RTU Communication*	*Local control unit*	*Continuous control station*	*Application functions*
S-3	SLO-1	*History of SCADA*	*Analog electronic controllers*	*I/O module(Analog & Digital)*	*Manual Loader Station*	*DCS Application in cement plant*
	SLO-2	*Development from Telemetry*	*Communication Topology*	*Basic elements*	*Indicator/Logic Station*	*System architecture*
S-4	SLO-1	*Key features*	*RTU/MTU Communication*	*Architectural parameters*	*Smart annunciators*	*DCS Application in iron plant*
	SLO-2	*Real time systems*	*System components*	*Types of architecture*	*High level Operator interface*	*System architecture*
S-5	SLO-1	*Analog signals measurement*	*Communication Protocols*	*CPU, Memory*	*Architectural Models*	*DCS Application in steel plant*
	SLO-2	*Control techniques*	*Operator interface*	*Local control unit languages*	*Hardware Elements*	*System architecture*

S-6	SLO-1	*Discrete signals measurement*	*Monitoring alarms*	*Language requirements*	*Operator displays*	*DCS Application in Paper and pulp industry*
	SLO-2	*Control techniques*	*Status points*	*Functional blocks*	*Engineering interface- Introduction*	*System architecture*
S-7	SLO-1	*Remote terminal unit*	*Control interfacing*	*Problem-oriented languages*	*System configuration requirements*	*DCS Application in petroleum-refining industry*
	SLO-2	*Analog and Discrete control*	*Parallel operator interface*	*High-level languages*	*Diagnosis of System Problems*	
S-8	SLO-1	*Monitoring signals*	*SCADA Development for any one typical application*	*Process interfacing issues*	*Low-level engineering interface*	*DCS Application in oil and gas processing industry.*
	SLO-2	*Master terminal unit*		*Security design issues*	*System configuration*	
S-9	SLO-1	*Process configuration*	*Programming for GUI development using SCADA software*	*Process input/output design issues*	*High-level engineering interface*	*DCS Application in water treatment plant*
	SLO-2	*Applications*		*Remote I/O and Communication modules*	*System configuration*	*System architecture*

Course Code	18ECE382T	Course Name	BUILDING AUTOMATION	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Give basic knowledge in intelligent building and building automation systems*
CLR-2 :	*Gain Knowledge on different sensors and measurement systems in BMS system*
CLR-3 :	*Know the basic concepts of HVAC Air handling unit*
CLR-4 :	*Understand the basic concepts of HVAC terminal unit*
CLR-5 :	*Explore the BAS Architecture*
CLR-6 :	*Present an overview of different Communication protocols*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the need of intelligent buildings and automation systems*	3	80	75	H	-	-	-	-	H	H	-	-	-	-	H	H	H	H
CLO-2 :	*Measure the parameters and design of sensors*	3	80	70	H	-	-	-	-	H	H	-	-	-	H	H	-	M	H
CLO-3 :	*Design different Air handling units*	3	75	70	H	H	M	H	M	H	M	H	-	-	H	H	H	M	H
CLO-4 :	*Understand and design terminal units*	3	80	75	H	H	M	H	M	-	M	H	H	-	-	H	-	M	H
CLO-5 :	*Familiarize with the components of BAS architecture*	3	80	70	H	-	M	-	H	-	M	H	-	-	-	H	-	M	H
CLO-6 :	*Select the Communication protocol for a particular application*	3	80	70	H	-	-	-	-	H	-	H	-	H	M	H	H	-	H

Duration (hour)		Introduction to Building automation systems	Comfort parameters	HVAC Basic Concepts- Air handling unit	Terminal Unit	BAS Architecture
		9	9	9	9	9
S-1	SLO-1	*Introduction to intelligent building*	*Temperature*	*Concept of Air handling unit*	*Concept of Variable Air Volume (VAV) system*	*BAS Hierarchy*
	SLO-2	*intelligent architecture*	*Enthalpy, Entropy*	*components in AHU*	*different types of VAV*	*Field level components*
S-2	SLO-1	*structure*	*Heat Transfer - Conduction, Convection, Radiation*	*different types of dampers*	*Design, working*	*Direct Digital Control (DDC)*
	SLO-2	*Facility management vs. intelligent buildings*	*Working Principle, Characteristics of RTD*	*Working, configuration,*	*series fan powered*	*Supervisory Controller*
S-3	SLO-1	*Lifecycle of building*	*Thermistor, Thermocouple*	*different types of AHU*	*parallel fan powered*	*Server, Operator Workstation (OWS)*
	SLO-2	*Evolution of intelligent buildings*	*Bimetallic strip*	*Design and working*	*pressure dependent*	*Different Communication protocol*
S-4	SLO-1	*Introduction to BAS*	*Humidity, Specific Humidity,*	*Operation of different modes in AHU*	*supply-exhaust VAV*	*addressing concepts*
	SLO-2	*Different systems of BAS*	*Relative Humidity, Due point, Saturation point*	*humidification*	*dual duct VAV*	*Open Protocols -BACnet, LON*
S-5	SLO-1	*HVAC*	*Working principle of relative humidity sensors*	*dehumidification*	*Design, working, use of radiation coil*	*Profibus, Modbus*
	SLO-2	*HVAC Applications*	*mounting for humidity sensors in BAS*	*static pressure control*	*chilled beam*	*M-bus*

S-6	SLO-1	*Security system*	*Psychrometric chart*	*volume matching*	*CRAC unit, VRV systems*	*Proprietary Protocols- N2, CBUS*
	SLO-2	*Field Devices*	*Pressure, Static Pressure, Velocity pressure, Absolute Pressure*	*cooling, heating,*	*unit heater, Fan coil unit and unit ventilator*	*Wireless filed devices*
S-7	SLO-1	*Fire alarm system*	*Gauge Pressure, Vacuum Pressure, Differential Pressure, Sealed Pressure*	*economizer mode*	*Chilled water system*	*controllers*
	SLO-2	*Types of Detectors*	*Working Principle of Different types of Pressure Sensors*	*Heat recovery techniques*	*Concept of refrigeration cycle, components used in refrigeration cycle*	*routers*
S-8	SLO-1	*Modules*	*Working of principle of different air flow sensors*	*plate heat exchanger*	*different types of chilled water system*	*coordinators*
	SLO-2	*Indicating Devices*	*Working of principle of different water flow sensors*	*heat recovery wheel*	*Working and design of different types of boilers*	*Benefits of a Wireless BAS*
S-9	SLO-1	*lighting systems*	*Measurement of CO2 level*	*AHU for different applications*	*Working and design of different types of heat exchanger*	*Wireless Field Bus*
	SLO-2		*Working principal of BTU meter*			*Basic Reference Model (BRM)*

Learning Resources	1. *Smart Buildings by Jim Sinopoli, Butterworth-Heinemann imprint of Elsevier, 2nd Edition., 2010* 2. *Intelligent Building Systems by Albert Ting-Pat So, WaiLok Chan, Kluwer Academic publisher, 3rd Edition., 2012.*	3. *Design of Special Hazards and Fire Alarm Systems by Robert Gagnon, Thomson Delmar Learning; 2nd Edition, 2007.*

Duration (hour)		Review of Signal Conditioning circuits	Design of Level and Pressure Measurement	Design of Flow measurements and Control Valve	Design of Transmitters and final control element	Design of indicators and Logic circuits
		12	12	12	12	12
S-1	SLO-1	*Requirements of Signal Conditioning*	*Electronic PID controller Design.*	*Study of Orifice, Venturi and Rotameter.*	*2 wire and 3 wire transmitter*	*Alarm circuit design*
	SLO-2	*Analog, Digital and adaptive filter design*	*P,I,D modes of operation Solving numerical..*	*Review of design requirements.*	*Thermocouple based temperature transmitter*	*Annunciator circuit design*
S-2	SLO-1	*V/I and I/V Converter design. Design of amplifiers – Pre amplifier*	*Composite modes – PI, PD and PID.*	*Design of Orifice.*	*Design of transmitter*	*Interlocks*
	SLO-2	*Instrumentation Amplifier, Bridge and Isolation Amplifier.*	*Realization using composite modes.*	*Design of Rotameter.*	*Capacitance based flow transmitter*	*Overview of Programmable logic controllers*
S 3-4	SLO-1 SLO-2	*Lab1: Design of Active Filters – LPF, HPF and BPF.*	*Lab 4: Design, Fabrication and Testing of Analog PID Controller.*	*Lab 7: Development of Software Program for sizing Orifice.*	*Lab10: Design, Fabrication and Testing of 2-wire Analog Transmitter.*	*Lab 13: Sequential controller using PLD*
S-5	SLO-1	*Signal conditioning circuits for temperature measurement. – RTD.*	*Requirements of Pressure Measurement.*	*Design constraints.*	*Level transmitter*	*Microprocessor based PID controller*
	SLO-2	*Design of RTD*	*Bourdon tube, Bellows, Diaphragms*	*Study of Valve characteristics and valve body*	*Flapper nozzle amplifier characteristics*	*Study of recorders*
S-6	SLO-1	*Signal Conditioning for Thermocouple.*	*Factors affecting sensitivity.*	*Design of Actuator and positioner*	*Pneumatic actuator*	*Numerical in alarm circuit*
	SLO-2	*Design of thermocouple*		*Control Valve sizing*	*Hydraulic actuator*	*Real time case study*

			Adjustment of set point, bias and controller settings			
S 7-8	SLO-1	*Lab 2 :Design of Instrumentation Amplifier.*	*Lab 5: Design of V/I and I/V converter.*	*Lab 8: Development of Software Program for sizing Rotameter.*	*Lab11: Design of multi channel data acquisition system*	*Lab 14: Functional constraints and specification in industry*
	SLO-2					
S-9	SLO-1	*Cold junction compensation and Linearization.*	*Air purge Level Measurement*	*Design of Control valve factor and plug area.*	*Characteristics of pumps*	*Operating console and control room panel design.*
	SLO-2	*Design of cold junction compensation circuits.*	*Design of air purge system*	*Selection of material for body and trim.*	*Instruments used in pumping practices*	*Instrument symbols and signals*
S-10	SLO-1	*Zero and Span adjustment in Temperature Transmitters.*	*Capacitive based level Measurement.*	*Cavitation and flashing in Control valve*	*Pump operation and maintenance*	*Mini project on any process application.*
	SLO-2	*Temperature indicators and selection criteria for temperature sensing instruments.*	*Design of capacitance based level measurement.*	*Characteristics of control valve for typical applications*	*Selection of pumps*	*Discussion on project*
S 11-12	SLO-1	*Lab3: Design of regulated power supply.*	*Lab 6: Design of signal conditioning circuits for level measurements.*	*Lab 9: Study of control valve characteristics*	*Lab12: Study of P&I diagrams*	*Lab 15: Process application*
	SLO-2

Course Code	18ECE384T	Course Name	FACTORY INSTRUMENTATION NETWORKS	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering			Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Educate on the basic concepts of data networks*
CLR-2 :	*Introduce the basics of inter-networking and serial Communications*
CLR-3 :	*Provide details on HART and Field buses*
CLR-4 :	*Know different techniques on Modbus, PROFIBUS and other Communication protocols*
CLR-5 :	*Present an overview of industrial Ethernet*
CLR-6 :	*Study the working of computer busses and protocols*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	PLO 1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the basic concepts of data networks*	3	80	75	H	H	-	-	M	H	-	-	-	-	-	H	H	-	H
CLO-2 :	*Analyze the techniques of inter-networking and serial Communications*	3	80	70	H	-	-	H	-	H	-	-	-	-	-	H	-	M	H
CLO-3 :	*Understand the protocols and layers of HART and field bus*	3	75	70	H	-	M	H	M	H	-	H	-	H	M	H	M	H	H
CLO-4 :	*Analyze the techniques of MODBUS, PROFIBUS and other Communication protocol*	3	80	75	H	H	M	H	M	-	-	H	H	H	H	H	-	H	H
CLO-5 :	*Utilize the concept of industrial Ethernet*	3	80	70	H	-	M	-	H	-	-	H	-	H	H	H	H	H	H
CLO-6 :	*Analyze the working of computer busses and protocols*	3	80	70	H	-	M	-	-	H	-	H	-	H	-	H	H	H	H

Duration (hour)		OSI Model	Inter-Networking	HART and Field bus	PROFIBUS and Modbus	Industrial Ethernet
		9		9	9	9
S-1	SLO-1	*Introduction to Modern instrumentation*	*Introduction to RS-232*	*Introduction to HART and smart instrumentation*	*Introduction to PROFIBUS*	*Introduction to Industrial Ethernet*
	SLO-2	*Introduction to control systems*	*RS-422 and RS-423*	*HART protocol*	*PROFIBUS protocol stack*	*10 Mbps Ethernet*
S-2	SLO-1	*Open systems interconnection (OSI) model*	*Electrical characteristics of RS 232*	*Physical layer- Analog 4–20 mA*	*Physical layer (layer 1)*	*Media systems*
	SLO-2	*Representation of the OSI model*	*Examples*	*Digital frequency shift keying (FSK)*	*Type A cable*	*10Base5, 10Base2, 10BaseT*
S-3	SLO-1	*Protocols*	*Communications between two nodes*	*Data link layer*	*Type B cable*	*Signaling methods*
	SLO-2	*Basic structure of an information frame defined by a protocol*	*Transmission and reception of characters*	*HART protocol implementation of OSI model layer*	*Data link layer (layer 2)*	*Medium access control*
S-4	SLO-1	*Standards*	*Simple no-handshaking Communications*	*Application layer- Universal commands*	*Hybrid medium access control*	*Frame transmission*
	SLO-2	*EIA-232 interface standard*	*Software handshaking*	*Common practice commands, Device specific commands*	*Application layer*	*Frame reception*
S-5	SLO-1	*EIA-485 interface standard*	*Hardware handshaking*	*Troubleshooting*	*Introduction to Modbus*	*MAC frame format*
	SLO-2	*Interoperabiltity, Interchangeability*	*Two-way Communications with handshaking*	*HART cable length calculation*	*Modbus protocol structure*	*Differences between IEEE 802.3 and Blue Book Ethernet (V2)*

S-6	SLO-1	*Mod bus*	*DTE-DCE connections (PC to modem)*	*Introduction to foundation field bus*	*Function codes*	*IEEE 802.2 LLC*
	SLO-2	*Data Highway Plus protocol structure*	*Exercises*	*Physical layer*	*Read coil or digital output status (function code 01) and Read digital input status (function code 02)*	*Reducing collisions*
S-7	SLO-1	*DeviceNet*	*Introduction to RS-485 (ISO 8482)*	*Wiring rules*	*Read holding registers (function code 03) and Reading input registers (function code 04)*	*Design rules*
	SLO-2	*Profibus*	*RS-485 connecting to multiple nodes*	*Encoding rule, permeable and delimiters*	*Force single coil (function code 05)*	*Length of the cable segments*
S-8	SLO-1	*Introduction to OLE for process control*	*Line drivers*	*Data link layer*	*Preset single register (function code 06)*	*100 Mbps Ethernet*
	SLO-2	*Common problems and solutions*	*Unbalanced digital interface circuit (RS-423) and balanced digital interface circuit (RS-422)*	*Data link layer: packet format*	*Troubleshooting*	*Media access: full-duplex*
S-9	SLO-1	*General comments on troubleshooting*	*RS-232/485 converter*	*Application layer*	*Common Problems and Discussion*	*Auto-negotiation*
	SLO-2	*Specific Methodology*	*Exercises*	*User layer*	*Modbus Plus protocol overview*	*Fiber optic cable distances 100BaseFX*

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*Impart fundamental knowledge on the concepts of Internet of Things with its Architecture.*
CLR-2 :	*Provide an overview of various techniques that are using Internet of Things in Industry applications.*
CLR-3 :	*Understand the working of Internet of Things in Industry with the advanced Industry 4.0 platforms.*
CLR-4 :	*Understand the application of Internet of Things in Automation*
CLR-5 :	*Gain knowledge on the operation of Engineering in IoT Automation with arrowhead framework.*
CLR-6 :	*Explore the working of IoT in various real-time industries*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1: Level of Thinking (Bloom)	2: Expected Proficiency (%)	3: Expected Attainment (%)	1: Engineering Knowledge	2: Problem Analysis	3: Design & Development	4: Analysis, Design, Research	5: Modern Tool Usage	6: Society & Culture	7: Environment & Sustainability	8: Ethics	9: Individual & Team Work	10: Communication	11: Project Mgt. & Finance	12: Life Long Learning	13: PSO - 1	14: PSO - 2	15: PSO - 3
CLO-1 :	*Understand the basic concepts of IoT, Architecture and Its Applications*	3	85	80	H	-	-	-	-	-	-	-	-	-	-	H	-	H	-
CLO-2 :	*Analyze the techniques to apply IoT for Industry*	3	85	75	H	H	H	H	H	-	-	H	-	-	-	H	-	H	-
CLO-3 :	*Apply the knowledge of different techniques of IoT in industry with an advanced platform of Industry 4.0*	3	80	80	H	H	H	H	H	H	-	-	-	-	-	H	-	H	H
CLO-4 :	*Develop the knowledge of IoT in Automation.*	3	85	80	H	H	H	H	H	-	-	-	H	-	-	H	-	H	H
CLO-5 :	*Apply the knowledge of Engineering in IoT Automation System*	3	80	75	H	-	H	-	H	-	-	H	-	-	-	H	H	H	H
CLO-6 :	*Design the IoT based real-time projects*	3	85	85	H	-	H	H	H	H	H	H	H	H	H	H	H	H	H

Duration (hour)		IoT – Landscape, System Architectures	Industrial Internet of Things(IIoT)	IIoT Platforms	IoT Automation	Engineering of IoT Automation System
		9	9	9	9	9

2. Mr. Hariharasudhan - Johnson Controls, Pune, hariharasudhan.v@jci.com	*2. Dr. D. Nedumaran, Madras University, dnmaran@gmail.com*	*2. Dr. A. Vimala Juliet, SRMIST*

Course Code	18ECE387T	Course Name	MICRO SENSORS AND SMART DEVICES	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	Nil	Co-requisite Courses	Nil	Progressive Courses	Nil
Course Offering Department	Electronics and Communication Engineering	Data Book / Codes/Standards	Nil		

Course Learning Rationale (CLR):	*The purpose of learning this course is to:*
CLR-1 :	*To realize the importance of micro sensors and actuators*
CLR-2 :	*To learn the operating principle of various micro sensors*
CLR-3 :	*To analyze the applications of various micro fabrication techniques*
CLR-4 :	*To understand the different packaging techniques*
CLR-5 :	*To appreciate the significance of available MEMS based smart devices*
CLR-6 :	*To recognize recent developments and challenges in MEMS*

Course Learning Outcomes (CLO):	*At the end of this course, learners will be able to:*	Learning 1 Level of Thinking (Bloom)	2 Expected Proficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Appreciate the importance of sensors and actuators based on MEMS technology*	3	80	75	H	-	-	-	-	H	-	-	-	-	-	H	H	-	H
CLO-2 :	*Understand the fabrication and machining techniques of MEMS devices*	3	80	70	H	-	-	-	-	H	-	-	-	-	-	H	-	-	H
CLO-3 :	*Familiarize with the concepts of packaging and interfaces in MEMS devices*	3	75	70	H	H	M	H	M	H	-	-	-	-	-	H	H	-	H
CLO-4 :	*Appreciate the significance of general micro fabrication processes*	3	80	75	H	H	M	H	M	-	-	-	H	-	-	H	-	-	H
CLO-5 :	*Differentiate between the working principle of various micro sensors*	3	80	70	H	-	M	-	H	-	-	-	-	-	-	H	-	-	H
CLO-6 :	*Analyze recently developed smart devices employing MEMS technology*	3	80	70	H	-	-	-	-	H	-	-	-	-	-	H	H	-	H

Duration (hour)		9	9	9	9	9
S-1	SLO-1	*Introduction to Microelectronics*	*Micro thermal Sensors-overview*	*Micro machining techniques*	*MEMS Packaging*	*Smart Devices-Overview*
	SLO-2	*Evolution& History of MEMS*	*TEG and Thermopiles*	*Significance and types*	*Objectives in Packaging*	*Functionalities*
S-2	SLO-1	*Overview of Micro system technology*	*Micro radiation Sensors-overview*	*Bulk MMC-overview*	*Flip chip assembly*	*Features & requirements*
	SLO-2	*Broad applications of Micro systems*	*Implementation*	*Principle and block diagram*	*Ball grid array*	*Broad applications*
S-3	SLO-1	*Miniaturization & Scaling laws*	*Micro mechanical Sensors-overview*	*Surface MMC-overview*	*wire bonding techniques*	*Airbag deployment*
	SLO-2	*Micro devices -examples*	*Vibration sensor -Accelerometer*	*Principle and block diagram*	*Types*	*Tire pressure monitoring*
S-4	SLO-1	*Types of Micro Sensors*	*Micro pressure Sensors-overview*	*LIGA process-overview*	*surface bonding techniques*	*GPS-Gyro sensor*
	SLO-2	*Types of Micro actuators*	*Parameter measurement*	*Principle and block diagram*	*Types*	*Micro Energy harvesters*
S-5	SLO-1	*Si and other substrates*	*Micro humidity Sensors-overview*	*Photolithography*	*sealing*	*Smart home automation*
	SLO-2	*Special MEMS Materials& properties*	*Types of Sensing film & measurement*	*Process Description, implementation*	*Different types of sealing*	*MEMS devices in agriculture*

S-6	SLO-1	*Polymer materials*	*Micro SAW Sensors-overview*	*Ion implantation and oxidation*	*Process design*	*Blood pressure monitor*
	SLO-2	*Electro active polymers*	*Implementation*	*Process Description, implementation*	*Block diagram*	*Heart Parameter monitors*
S-7	SLO-1	*Shape memory alloys*	*Micro magnetic Sensors-overview*	*PVD-CVD*	*Interferences*	*RF MEMS technology*
	SLO-2	*Shape memory polymers*	*Si* *gnificance & measurement*	*Process Description, implementation*	*Types of interferences*	*Optical Mirrors*
S-8	SLO-1	*Piezoelectric materials*	*Micro bio chemical Sensors-overview*	*Wet and dry etching*	*Electronic Interfacing*	*Micro fluidics*
	SLO-2	*Ceramic materials*	*Parameter measurement*	*Isotrophic and Anisotrophic*	*Electro mechanical interfacing*	*LOC module*
S-9	SLO-1	*Case study-1*	*Micro optical Sensors-overview*	*Case study-1*	*Case study-1*	*Case study-1*
	SLO-2	*Case study -2*	*Types & Implementation*	*Case study -2*	*Case study -2*	*Case study -2*

Learning Resources	1. *Marc Madou,"Fundamentals of Microfabrication" CRC Press* 2. *Tai Ran Tsu,"MEMS and Microsystems: Design Manufacture", Tata McGraw Hill*	3. *Vardhan Gardener,"Micro sensors and smart devices", John Wiley & Sons*

Learning Assessment

	Bloom's Level of Thinking	Continuous Learning Assessment (50% weightage)								Final Examination (50% weightage)	
		CLA – 1 (10%)		CLA – 2 (15%)		CLA – 3 (15%)		CLA – 4 (10%)#			
		Theory	Practice	Theory	Practice	Theory	Practice	Theory	Practice	Theory	Practice
Level 1	Remember Understand	30 %	-	30 %	-	30 %	-	30 %	-	30%	-
Level 2	Apply Analyze	40 %	-	40 %	-	40 %	-	40 %	-	40%	-
Level 3	Evaluate Create	30 %	-	30 %	-	30 %	-	30 %	-	30%	-
	Total	100 %		100 %		100 %		100 %		100 %	

CLA – 4 can be from any combination of these: Assignments, Seminars, Tech Talks, Mini-Projects, Case-Studies, Self-Study, MOOCs, Certifications, Conf. Paper etc.,

2. Mr. Hariharasudhan - Johnson Controls, Pune, hariharasudhan.v@jci.com	*2. Dr. D. Nedumaran, Madras University, dnmaran@gmail.com*	*2. Mrs. R. Bakiya Lakshmi, SRMIST*

ACADEMIC CURRICULA

Professional Elective Courses

MECHANICAL ENGINEERING

Regulations - 2018

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

(Deemed to be University u/s 3 of UGC Act, 1956)

Kattankulathur, Kancheepuram, Tamil Nadu, India

Course Code	18MEE301T	Course Name	FUNDAMENTALS OF VIBRATION AND NOISE	Course Category	E	Professional Elective	L	T	P	C
							3	0	0	3

Pre-requisite Courses	18MEC201T Machines and Mechanisms	Co-requisite Courses	NIL	Progressive Courses	NIL
Course Offering Department	Mechanical Engineering	Data Book / Codes/Standards			

Course Learning Rationale (CLR):	The purpose of learning this course is to:
CLR-1 :	*Be familiar with the vibrations of two degree of freedom systems*
CLR-2 :	*Be familiar with the vibrations of multi degree of freedom systems*
CLR-3 :	*Be familiar with the vibrations of continuous systems*
CLR-4 :	*Be familiar with the Numerical Integration methods in Vibration analysis*
CLR-5 :	*Be familiar with the vibration measurement devices*
CLR-6	*Be familiar with the vibrations of multi degree of freedom systems & Continuous systems, numerical integration methods in vibration analysis and vibration measuring devices*

Course Learning Outcomes (CLO):	At the end of this course, learners will be able to:	Learning 1 Level of Thinking (Bloom)	2 Expected roficiency (%)	3 Expected Attainment (%)	PLO 1 Engineering Knowledge	2 Problem Analysis	3 Design & Development	4 Analysis, Design, Research	5 Modern Tool Usage	6 Society & Culture	7 Environment & Sustainability	8 Ethics	9 Individual & Team Work	10 Communication	11 Project Mgt. & Finance	12 Life Long Learning	13 PSO - 1	14 PSO - 2	15 PSO - 3
CLO-1 :	*Able to learn the concepts of vibration analysis of two degree of freedom systems and vibration absorbers*	*1& 2*	*75*	*70*	*H*	*M*	*M*	*H*	*L*	*L*	*M*	*L*	*L*	*L*	*L*	*M*
